ii. Language.—D. S. Margoliouth attempted (*JRAS*, Apr. 1890, pp. 263–297) to prove a Heb. original for the Book of Wisdom.* But, in spite of certain phenomena which at first sight favour this theory, J. Freudenthal (*JQR*, July 1891, pp. 722–753) has conclusively shown that both the speech and the form of thought in our book plainly point to a Greek original. Hebraizing expressions are employed by the author because he found these in the LXX, and because he was himself a Jew (cf. Farrar, 404^{b}, 405^{a}; Grimm, *Apokr.* 6^{te} Lieferung, pp. 5, 8); but these expressions do not justify the conclusion that the work was originally composed in Hebrew.—The Greek of the book is indeed not always correct. Our author at times gives words a meaning which is not usual in classical literature (cf. Farrar, 405^{a}). To this category belong expressions which are particularly characteristic of the Platonic or the Stoic philosophy (Farrar, 407^{a}; Grimm, 19); compound adjectives, which appear to be in part of the author's own coining (Farrar, *l.c.*; for similar phenomena in Philo see Siegfried, *Philo von Alexandria*, 1874, pp. 46 f., 135). The author shows himself to be also well read in Greek poetry (Farrar, 405^{b}, 406^{a}; Grimm, 7); he imitates Greek figures of speech (according to Farrar, 405^{b}, 406^{a}, and Grimm, *l.c.*), although not always with success (Farrar, 406^{a}). Regarding the influence which the Greek of the Book of Wisdom exercised upon the NT, cf. Farrar, p. 408. Our author reveals also an acquaintance with Greek culture, art, and science; in particular, he displays a knowledge of astronomy and natural history (cf. 7^{17-20}), makes reflexions on the origin of idolatry (13^{1-9} $14^{13f.}$ $15^{5ff.}$), etc. Towards the end of his book his creative power gets exhausted, and he begins to repeat himself ($11^{4ff.}$, cf. chs. 16–19). His language, too, degenerates into rhetorical bombast.

iii. General Character of the Book.—In spite of our author's familiarity with Greek culture, and the profundity of his studies, especially in the Platonic and the Stoic philosophy, which may be detected both in his language (Farrar, 407^{a}) and his world of ideas (Grimm, 19 f.), he was far from feeling, like Josephus and Philo, hampered by his Jewish faith, and far from seeking, like the former, to embellish it with Hellenizing graces, or, like the latter, to make it more acceptable to the educated classes by allegorizing explanations. Besides, he felt himself, as a worshipper of the true God, too far raised above all idolaters (13^{10}–14^{31}) for this, and too much embittered against those of his countrymen who had allowed themselves to be turned by Greek philosophy away from their ancestral religion to free-thought and immorality (1^{16}–2^{24}). His Jewish temper shows itself even in the outward form of his work, to which he strove with all diligence to give a genuine biblical colouring. We have seen already (p. 928^{b}) how closely he attached himself to the LXX and its Hebraisms. Although he is capable of imitating the artistic periodic structure of the Greeks (cf. 12^{27} $13^{\text{1ff. 11-15}}$), he prefers as a rule the simple Hebrew fashion of clauses connected without particles (cf. Grimm, p. 13). He seeks also, at least in the greater part of 1 – 12^{18}, by imitating the Heb. parallelism, to make his book approximate as closely as possible to his model, the Book of Proverbs.

---

* His treatment of this book in the *Expositor* (Feb.–March 1900) can hardly be taken seriously.

iv. THE AIM OF THE BOOK.—The author's zeal for the Jewish religion, and his orthodoxy, are still more evident in the aim of the Book of Wisdom. The Judaism of his time and environment found itself sorely pressed both from without and from within, and this in proportion to its faithfulness ($2^{\text{10. 12-20}}$). It was weakened ($3^{\text{10-12}}$ $4^{\text{14b-20}}$) by internal dissensions and by apostasy, particularly, it would appear, on the part of the wealthy and influential classes (5^{8}). In addition, it was continually threatened by the spiritual force of Greek culture and philosophy ($2^{\text{1ff.}}$). In face of these dangers, the author seeks to provide a sure hold for the professors of the Jewish faith. It is quite intelligible that, face to face with these Hellenized Jews who 'sought after wisdom' (1 Co 1^{22}), he felt himself moved to proclaim the Jewish religion as the true Wisdom, and to make the notion of *σοφία* the centre of his discourse. The choice of this notion was specially happy, because within its sweep could be brought all that the Greek philosophy contained of truth and all that the OT taught about *Ḥokhma*. We find, accordingly, that the author drew from all these sources. Platonic is his doctrine of amorphous matter (11^{17}), of the central ideas (13^{1} *ὁ ὤν*), of the pre-existence of the soul ($8^{\text{19f.}}$), of the body as hindering elevation to the divine (9^{15}; in the expressions *βαρύνει*, *βρίθει*, and *γεῶδες* there are points of contact with Plato's *Phædo*, 87^{b}); he Platonizes also in his doctrine of the four cardinal virtues (8^{7}). Stoic is his conception of Wisdom as the all-pervading power ($7^{\text{22. 24}}$). On the other hand, his doctrine of Wisdom as an attribute of God is based wholly upon Pr 8. 9. He thinks of Wisdom as immanent in God, as something belonging to the Divine essence (7^{26}), but, on the other hand, also as something independent, existing side by side with God (7^{22} 8^{3} 9^{4}, cf. Pr 8^{30}), so that he frequently personifies Wisdom (1^{6} 8^{9} $10^{\text{1ff.}}$). In one point, however, his conception differs from that of Proverbs. While, according to Pr $8^{\text{26-30a}}$, at the creating of the things in heaven and earth God alone was active, and Wisdom was simply an onlooker (v.$^{\text{30b}}$, cf. above, p. 925^{a}), in the Book of Wisdom (8^{4b}) she is *αἱρετὴς τῶν ἔργων αὐτοῦ* (*sc. τοῦ θεοῦ*), and makes a selection among God's works, *i.e.* she determines which of the works whose idea God has formed are to be actually carried out (Grimm). She is an emanation from God (7^{25}), therefore free from all stains, and she pervades all things (1^{7} 7^{24}), without being in any way infected with the imperfections inherent in them: because she is 'more mobile than any motion,' it is impossible for any of the impurities which belong to things to attach to her.—On the relation of the Wisdom of Solomon to Philo cf. Menzel, *De Græcis in libris* קהלת *et σοφία vestigiis*, 1858, p. 66; Ed. König, *Einl. in d. AT*, Bonn, 1893, p. 489; Soulier, *La doctrine du logos chez Philon*, 1876, p. 162 f.—But, as in Pr 8^{31} $9^{\text{1ff.}}$, the special object of interest to Wisdom is man (Wis $7^{\text{23. 27cd}}$). Penetrating into the human understanding, she gives birth to all varieties of theoretical knowledge ($8^{\text{6. 8}}$), particularly in the realm of theology, because she is initiated into the knowledge of God (8^{4a}). She communicates the inspiration of the prophets (8^{8} 9^{17}), but also the knowledge of earthly things in the sphere of history (8^{8b}), astronomy, chronology, natural science ($7^{\text{17-21}}$), art (7^{16b}; cf. Ezk 18^{3}). But in the practical sphere as well Wisdom is the best counsellor of man, for from her comes all morality and virtue ($1^{\text{4f.}}$ 7^{25c} 8^{7}; cf. Pr $8^{\text{12. 18-20. 31-36}}$). See, further, Farrar, p. 420.

v. CONTENTS OF THE BOOK.—(*a*) The first section (chs. 1–5) describes the conflict which the Divine Wisdom has constantly to carry on with the godless wisdom of the world, and the victory to which she leads those who surrender themselves to her. In the first place (ch. 1) the author addresses himself apparently, in quite a general exhortation, to all rulers and authorities in the world. But as in what follows he deals not with public conditions or the duties of rulers, but with purely inward physico-ethical developments, it is natural to suppose that he has in view not heathen rulers, but powerful and influential personages in his Jewish environment, who, as is evident from 1^{16} $2^{\text{1ff.}}$, had apostatized from their religion and attached themselves to the heathen Government. How high in those days such men might sometimes rise may be seen from the case of the Jewish noble Tiberius Alexander, who a little later was nominated Imperial administrator (*alabarch*) of the whole of the so-called Arabian side of the Nile (Schürer, *GJV*^{3} iii. 490). It was only such rulers, of Jewish descent, that our author could hope to reach with his words; he could scarcely expect to be read by heathen ones. The description contained in 1^{16}–2^{20} suits, moreover, only such apostate powerful Jews. Greek philosophy, particularly Epicureanism, had estranged them from their religion ($2^{\text{1-5}}$), and the practical consequences of the new frivolous view of life had speedily shown themselves in abandonment to sensualism and immorality ($2^{\text{6-9}}$). To these men their fellow-countrymen who remained true to their religion were a genuine stone of stumbling. The life of the latter, with its piety and fidelity to the Law, caused them secret shame, and was a constant prick to their conscience. This drove them to hatred and bitter persecution of the 'righteous' ($2^{\text{10-20}}$). The author now faces these apostates like a prophet of rebuke, and exposes the vanity of their whole conduct in the passage 2^{21}–5^{23}. Wholly ensnared by earthly things, they have no idea that man, formed after the image of God, has an eternal destiny ($2^{\text{21-23}}$), whose form is only decided in the world beyond (3^{7} *ἐν καιρῷ ἐπισκοπῆς* 'on the day of visitation'; v.$^{\text{17b}}$ *ἐπ' ἐσχάτων, ἐν ἡμέρᾳ διαγνώσεως*; v.$^{\text{18b}}$ 'at the final decision' [the statement varies, it is true, in regard to some points: in $4^{\text{16ff.}}$ it is a judgment carried out in the next world after death, in $5^{\text{17-23}}$ it is one that takes place in this world in eschatological times]). Then shall it be manifested whose life was the truly profitable one. The ungodly, *i.e.* those Jews who have despised the Law (3^{16} 4^{20} 5^{7}), with their whole brood, are exposed in their nothingness ($3^{\text{10-12. 16-19}}$ $4^{\text{3-6. 18-20}}$). They themselves shall confess their mistake with bitter but vain repentance ($5^{\text{3-14}}$). The righteous, on the other hand, who kept by the Law, shall reap the fruit of their strivings ($3^{\text{13-15}}$ $4^{\text{1f.}}$ $5^{\text{5. 15f.}}$), and shall pronounce judgment on the ungodly (4^{16} $5^{\text{1f.}}$). The author incidentally controverts the old

Jewish doctrine that premature death is a sign of impiety (Ps 55^{23} 102^{24}), holding that it is so only in the case of the wicked ($3^{18\text{f.}}$), but not in that of the righteous, whose sufferings are meant simply to try them, and whose death is a rapture to perfect bliss (3^{1-9} 4^{7-17} $5^{5.\ 15\text{f.}}$).

(*b*) The second section (chs. 6–9) sets forth the great advantages of Wisdom. The author here attaches his words in the first instance to the exhortation of 1^{1-15} to rulers, on whom he urges (α) in 6^{1-11} that they in particular are bound in quite a special way to seek after Wisdom, and that they will be held specially responsible if they have ruled without it. Such conduct is all the more culpable, seeing that (β) Wisdom is so easily accessible and so ready to meet those that seek her, 6^{12-25}. This is followed by (γ) 7^{1}–8^{1}, a description which Solomon from his own experience gives of the nature of Wisdom; and (δ) 8^{2-21} an account by the same king of how he came to attach himself to Wisdom as a life companion; and the whole closes with (ε) 9^{1-18} Solomon's prayer for Wisdom.

(*c*) The third section (10^{1}–19^{22}) recounts, finally, the wonders wrought by Wisdom in the history of Israel: (α) in the period from Adam to Moses, specially down to the passage of the Red Sea, 10^{1}–11^{1}; (β) during the wilderness wanderings, 11^{2}–12^{27}. This is followed by some general observations (γ) on the folly of the Wisdom-forsaken heathen, who have given themselves over to the worship of natural forces and images of gods, as contrasted with the Israelites who obey Wisdom, chs. 13–15; and (δ) on the remarkable providences of God, whereby the animal-worshipping Egyptians were punished by means of the very same animals which brought deliverance to the Israelites; in which connexion other instances of contrast between the lot of the Egyptians and the Israelites are also insisted upon.

vi. PROGRESS IN THE DEVELOPMENT OF RELIGIOUS DOCTRINE IN THE BOOK OF WISDOM.—(*a*) In the doctrine of *God* the central point in the religious system of this book is the thought that the Divine essence is *love*. Whereas the canonical OT regarded Jahweh by preference as the *Lord* of His creatures, who, according to His pleasure, called these into being by His breath, and who by withdrawing that breath causes them to perish (Ps $104^{29.\ 30}$), in the Book of Wisdom Jahweh is full of love to all His creatures, and upholds and spares them because He has pleasure in all that lives. Even the wicked, to whom He gives every opportunity to repent (τόπον μετανοίας, 12^{10}, cf. He 12^{17}), God seeks to spare as long as possible. Alongside of this the author's inclination towards Jewish particularistic notions shows itself. God is Father only in relation to the Jews, to the heathen He is Ruler. Sufferings are to the former fatherly chastisement and have an educative value; in the case of the latter they are an expression of anger and a sign of judgment ($11^{9.\ 10}$).

(*b*) In his *anthropology* the author insists preeminently upon individual immortality. Of this the canonical OT knew nothing, its point of interest lying merely in the continuance of the people of Israel and the consummating of the kingdom of God amongst them. But the Book of Wisdom recognizes that man, *i.e.* the individual, was created for incorruption (2^{23} 6^{19} 12^{1}); in particular, the righteous live for ever ($5^{15\text{a}}$); the knowledge of the power of God is the root of immortality (15^{3}). It is true that the conception of immortality vacillates between that of a continued personal existence and that of a survival in the memory of posterity (8^{13}), or even between the first conception and that of the ideal community of life with Wisdom (8^{17}), which the righteous enjoy even here during their earthly existence. On the other hand, a future judgment for the wicked is presupposed in 4^{20}, following up the OT conception of a mockery of the dead in Sheol (4^{19}, cf. Is $14^{10\text{ff.}}$). See, further, Farrar, p. 409.

(*c*) In the *soteriology* of the book, the late prophetic expectation of a personal Messiah, the Servant of the Lord, recedes. The author knows Him neither as vicarious sufferer nor as deliverer of His people. The Messianic glory consists in the establishment of a kingdom of Jahweh which shall rule over the heathen (3^{8}); the righteous exercise personally this sway upon earth ($5^{16\text{a}}$), as happened formerly with Solomon by God's command (8^{14}). On the attitude of the rest of the Apocryphal books to this question cf. Farrar, 410^{a}, esp. note 3.—Our author maintains rigidly the Jewish doctrine of retribution (δι' ὧν τις ἁμαρτάνει διὰ τούτων κολάζεται, 11^{16}). But his method of expounding this dogma is new. He seeks to show that even the form of punishment corresponds exactly to the sin committed. The Egyptians worshipped animals, therefore they were also punished by means of animals, nay the very animals which they adored (11^{16} 15^{18} 16^{1}). They sinned in connexion with water by casting the newly-born children of the Hebrews into the Nile (11^{6}), therefore they were also punished by means of blood-red water (*ib.*).

vii. INTEGRITY OF THE BOOK.—The work is evidently the well-arranged product of a single author. On now defunct hypotheses, which found in it the work of a number of different hands, see Grimm, pp. 9–15, and Farrar, p. 415^{a}. Its integrity, too, may in general be admitted (Grimm, 15 f.). Only the conclusion ($19^{18\text{ff.}}$) gives the impression of abruptness. Although in general the author's intention is successfully carried out in depicting the wonderful guidance of Israel by Wisdom from the Exodus onwards (Grimm), yet the theme started in v.^{18} appears to require somewhat fuller treatment between v.^{21} and v.^{22}, so that the traditional text is here defective.

viii. AUTHORSHIP.—As to the personality of the author various suggestions have been offered. The book has been attributed to Solomon by Clem. Alex. (*Strom.* vi. 120 ff.), Tertullian, Hippolytus (ed. Lagarde, p. 66), *et al.*; to Philo by Jerome, Luther, Joh. Gerhard, *et al.* For these and other conjectures see Grimm, pp. 16–26; Farrar, 412–415^{a}. In view of their untenable character, we consider that we may dispense with a closer examination of them. The probabilities are in favour of an Egyptian Jew who had received a Greek education but had remained true to the Law. His description of Epicureanism, to which many Jews had apostatized ($2^{1\text{ff.}}$), appears to have been derived partly from Qoheleth. For his further acquaintance with the works of Greek philosophers see above, p. 928^{b}. The beauty of the works of Greek plastic art found him as unimpressionable as St. Paul (Ac 17^{16}). Sculptors and painters are to him lovers of evil, and their work is unprofitable ($15^{4\text{ff.}}$); works of sculpture are to him nothing but idols (14^{10}). He has Euhemeristic notions of the motives that led to the making of them ($14^{15\text{ff.}}$). That he was not a Palestinian but an Alexandrian Jew, is shown by his allusions to the Egyptian animal-worship ($15^{18.\ 19}$ $16^{1.\ 9}$). Greek images of the gods ($15^{4\text{ff.}}$) might then be seen even in Egyptian cities. In favour of the view that the author lived in Alexandria, is the circumstance that both a Greek and a Jewish population were settled there, and that his culture was derived from both these quarters.

ix. DATE.—For the date of the Book of Wisdom, the *terminus a quo* is the Greek translation of the Bible (*c.* 250 B.C.), the *terminus ad quem* the unquestionable acquaintance of St. Paul with the book (cf. Grafe, 'Das Verhältniss der paulin. Schriften zur Sap. Salom.' in *Theol. Abhandlungen C. v. Weizsäcker zu s. 70 Geburtstage gewidmet*, Freiburg, 1892, p. 251 ff., where in particular the author establishes St. Paul's dependence upon the book in regard to the doctrine of predestination, the condemnation of the heathen, and the conception of the relation of soul and body). Resemblances to the book or influences from the same quarter are discoverable also in the Epistle to the Hebrews (cf. He 1^{3} with Wis 7^{26}, He 4^{12} with Wis 7$^{22ff.}$ etc.). The most recent attempts to fix the date vary up and down between 150 B.C. and 40 A.D. (cf. Farrar, 420^{b}–422^{a}). The position which the author assumes in the development of Alexandrianism prior to Philo (cf. Siegfried, *Philo von Alex.* 22-24) is in favour of placing him between B.C. 100 and 50. Kuenen (*Hist.-crit. Onderzoek*, § 105^{10}), it is true, will have it that the book was not composed till the time of Gaius Caligula.

x. TEXT.—The Text is best preserved in cod. Vaticanus (B); it is very good also in cod. Sinaiticus (ℵ or S), as well as in the fragments of cod. Ephræmi rescriptus (C); it is less satisfactory in cod. Alexandrinus (A) and, with the exception of the excellent cod. 68, in 10 cursives. Swete (*OT in Greek*, vol. ii., Camb. 1891, 2nd ed. 1897, pp. 604–643) uses B in general as the basis of his text, but gives in footnotes all the variants of ℵ (S), A, and C. O. F. Fritzsche in his *Libri apocryphi V.T. græce*, Lipsiæ, 1871, gives not only the variants of the above MSS but also those of cod. Venetus (HP 23), etc., as well as those derived from the cursives and the Versions. W. J. Deane (*The Book of Wisdom*, Oxford, 1881) agrees almost entirely with Fritzsche. Noteworthy emendations are to be found in Grimm *ap.* Fritzsche, in Grimm, *Kgf. exeget. Hdb. zu den Apokr.* 6te Lieferung (Lpzg. 1860), and in F. W. Farrar in 'Speaker's Com.' *Apocrypha*, i. (London, 1888) 403–534, as well as in H. Bois, *Essai sur les origines de la philosophie judéo-alexandrine* (Toulouse, 1890), p. 378 ff.

xi. VERSIONS.—Of the Versions, the Vetus Latinus of Jerome was taken over unaltered into the Vulgate, in the Books of Sirach and Wisdom. The Latin text of the two Wisdoms from the cod. Amiatinus was critically edited for the Wisdom of Solomon by de Lagarde in *Mitteilungen*, Bd. i. 243–284.—Of the Syriac Versions, the Peshitta recension was published in de Lagarde's *Libri apoc. V.T. Syriace*, Lips. 1861; another recension in Ceriani's edition of the cod. Ambros. sæc. vi. (Milan, 1876 ff.); cf. Nestle in *Urtext u. Übersetzungen der Bibel* (a reprint of the art. in *PRE*^{3}), p. 230; Ryssel in Kautzsch's *Apokr. und Pseudepigr. d. AT*, i. 250-254.—On the Armenian literal Version, the so-called Mechitar Bible, Venice, 1805, cf. Nestle, *l.c.* pp. 155-157; also *PRE*^{3} iii. 79 on the special editions of the Wisdom of Solomon, from 1824 to 1854.—For recent English translations by Deane and Farrar see above.—The most recent German translation is that of C. Siegfried in Kautzsch's *Apokr. und Pseudepigr. d. AT*, i. 476-507, with Introduction and short exegetical notes. J. K. Zenner arranged the first section of the book (1^{1}–6^{11}) in strophes and in verses of from 2 to 3 strophes, and published this in a German translation, with short explanatory notes in the *Ztschr. für kath. Theol.* xxii. [1898] pp. 417–429. In an Appendix he adds Egyptian parallels to ch. 2 from Erman's translation (p. 430 f.).

LITERATURE.—For references see Grimm, *Buch der Weisheit* (cf. *Kgf. exeget. Hdb. zu den Apokr. d. AT*), pp. 45, 46, and Farrar, *l.c.* pp. 422^{b}–423. See also W. J. Deane, *The Book of Wisdom*, Oxford, 1881, pp. 42, 43; Zöckler, *Apokryphen*, 1891, pp. 360, 361; Schürer in *PRE*^{3} i. 652, and *GJV*^{3} iii. 383 ff.; Ph. Thielmann, *Bericht über das gesammelte handschriftliche Material zu einer kritischen Ausgabe der latein. Übersetzungen bibl. Bücher d. AT*, Munich, 1900, pp. 207–214. The last-named author has either personally or through others collated 30 MSS. Of these, 27 are complete, while the other 3 contain fragments of the Book of Wisdom. They belong to the 8th–10th centuries, and include Spanish, Anglo-Saxon, pre-Carlovingian French, South German, Swiss, Italian texts, as well as the Bibles of Theodulf and Alcuin. In addition, he deals with excerpts from 33 MSS. This had been preceded by Thielmann's studies, 'über den character der latein. Übersetzung der Weisheit Salomonis,' etc., in *Archiv für latein. Lexicographie und Grammatik*, viii. (1893) 235-297, 501–561, ix. (1894) 247–284. According to Thielmann, the unity of the Latin text of Wisdom can be established; see, further, Schürer in *ThLZ*, 1900, No. 12.

C. SIEGFRIED.

WIST, WIT, WOT, WITTY.—The parts of the verb 'to wit' (Anglo-Sax. *witan*, Middle Eng. *witen*, 'to know') were: Pres. tense 'I wot,' 'thou wotest,' 'he wot' or 'woteth'; plu. 'we witen'; past tense 'wiste'; past ptcp. 'wist'; infin. 'to wit.'

Examples: *I wot*—Maundeville, *Travels*, 72, 'I wot never, but God knoweth'; Knox, *Hist.* 67, 'I wot, and know surely by the Word of God'; Jn 11^{42} Tind. 'I wot that thou hearest me all wayes' (where the tense should be past, ᾔδειν, Wyc. 'I wiste,' Cran. and AV 'I knew,' Rhem. 'I did know'). *Thou wotest*—Jn 13^{7} Tind. 'What I do, thou wotest not now, but thou shalt knowe herafter.' *He wot* or *woteth*—Tindale, *Expos.* 60, 'He that hateth his brother is in darkness, and walketh in darkness, and woteth not whither he goeth.' *We, ye, they witen* (and later, as in AV, *wot*)—*Piers Plowman*, ii. 74—

> 'Witen all and witnessen that wonen here on earth
> That Meed is ymarried more for her richesse
> Than for holiness or hendeness, or for high kind:
> Falseness is fain of her, for he wot her rich.'

Wyclif uses 'they wyteth,' *Works*, iii. 107, 'Fader, forgeve hem this gylt, for they wyteth nought what they dooth.' Past tense, *wiste*—Jn 13^{28} Wyc. 'Noon of hem that saten at the mete wiste wherto he saide to hym'; Tindale has 'wyst,' Dt 34^{6} 'No man wyst of his sepulchre unto this daye.' Past ptcp. *wist*—Mt 12^{7} Tind. 'Wherfore yf ye had wist what this sayinge meneth'; Occleve in Skeat's *Specimens*, p. 22—

> 'For, yf myn hertes wille wist were and preved
> How, yow to love, it stered is and meved,
> Ye shulde knowe I your honour and welthe
> Thurste and desire, and eke your soules helthe.'

Infin. *wit*—Malory, *Holy Grail* (in Morley's *Eng. Rel.* 38), 'And so they looked upon him, and felt his pulse, to wit whether there were any life in him;' Ex 9^{7} Tind. 'And Pharas sent to wete.' For the phrase 'do to wit' (2 Co 8^{1}) see art. Do in vol. i. p. 614^{b}, and observe the parallel phrases 'give to wit,' Rhem. NT, note to Jn 15^{4} 'These conditional speaches, *If you remaine in the vine, If you keepe my commaundements*, and such like, give us to wit that we be not sure to persist or persevere, nor to be saved, but under conditions to be fulfilled by us'; and 'let to wit,' Cranmer, *Works*, i. 70, 'We let you to wit, that forasmuch as it belongeth unto us,' etc.

In AV there occur: (1) Present tense, 'I wot,' Gn 21^{26}, Nu 22^{6}, Jos 2^{5}, Ac 3^{17}, Ph 1^{22}; ['he] wotteth,' Gn 39^{8} 'My master wotteth not what is with me in the house'; 'we wot,' Ex 32$^{1\cdot 23}$, Ac 7^{40}; 'ye wot,' Gn 44^{15}, Ro 11^{2}. (2) Past tense, 'I wist,' Jos 2^{4}, Ac 23^{5}; 'he wist,' Ex 34^{29}, Lv 5$^{17.18}$, Jos 8^{14}, Jg 16^{20}, Mk 9^{6}, Jn 5^{13}, Ac 12^{9}; 'ye wist,' Lk 2^{49}; 'they wist,' Ex 16^{15}, Mk 14^{40}. (3) Infin. 'to wit,' Gn 24^{21}, Ex 2^{4}, 2 Co 8^{1} ('do to wit').

The Heb. and Gr. are the ordinary verbs 'to know,' *yādaʿ* and οἶδα, except in the last case, where 'we do you to wit' is the tr. of γνωρίζομεν ὑμῖν, RV 'we make known to you.'

The infin. 'to wit' is also used as a connecting phrase in Jos 17^{1}, 1 K 2^{32} 7^{50} 13^{23}, 2 K 10^{29}, 1 Ch 7^{2} 27^{1}, 2 Ch 4^{12} 25$^{7.10}$ 31^{3}, Est 2^{12}, Jer 25^{18} 34^{9}, Ezk 13^{16}, Ro 8^{23}, 2 Co 5^{19}. The fuller phrase is 'that is to wit,' which shows the infin. more clearly, as Mt 23^{8} Tind. 'For one is youre Master, that is to wyt Christ, and all ye are brethren'; Tindale, *Works*, i. 87, 'Wherefoer they which are of faith are blessed, that is to wit made righteous, with righteous Abraham.' Except in 2 Co 5^{19} (ὡς) there is no equivalent in Heb. or Greek.

Wit as a subst. occurs in Ps 107^{27} 'And are at their wit's end' (וְכָל־חָכְמָתָם תִּתְבַּלָּע, lit. as AVm, RVm 'and all their wisdom is swallowed up,' RV 'and are at their wits' [plu.] end'; the AV phrase comes from Cov.; Wyc. has the more lit. 'and al the wisdom of hem was devourid,' after Vulg. *et omnis sapientia eorum devorata est*); 1 Es 4^{26} 'Many there be that have run out of their wits for women' (*πολλοὶ ἀπενοήθησαν ταῖς ἰδίαις διανοίαις διὰ τὰς γυναῖκας*); 2 Es 5^{9} 'Then shall wit hide itself' (*abscondetur tunc sensus*); Sir 31^{20} 'He riseth early, and his wits are with him' (*ἀνέστη πρωΐ, καὶ ἡ ψυχὴ αὐτοῦ μετ' αὐτοῦ*).

The subst. 'wit' was very common in the cent. preceding the issue of AV. It was losing its tone by 1611, and not only occurs less frequently in AV than in previous versions, but is used more readily in the *Preface*, with its familiar style, than in the tr. of any of the books. Thus, 'their sharpnesse of wit'; 'to exercise and whet our wits'; 'opening our wits, that we may understand his word'—all occurring in the Preface. In the earlier versions we find, *e.g.*, He 5^{14} Wyc. 'hem that for custum han wittis exercisid,' so Tind. 'which thorow custome have their wittes exercised,' and all the VSS till Rhem., and AV ('senses,' Gr. τὰ αἰσθητήρια); Lk 2^{47} Tind. 'And all that hearde him mervelled at his wit and answers' (so Matt., Wyc. 'prudens,' Rhem. 'wisedom,' others 'understanding,' Gr. σύνεσις); 24^{45} Tind. 'Then openned he their wyttes that they myght understond the scriptures' (Rhem. and AV 'understanding,' Gr. τὸν νοῦν); Mk 5^{15} Rhem. 'They see him that was vexed of the devil, sitting, clothed, and wel in his wittes.'

The word has some range of meaning, thus: (1) *Sense, meaning*, as Wyclif, *Works*, i. 98, 'Syththe the Pater Noster is the beste prayer that is, for in it mot alle other prayers be closed yf thay schulle graciouslyche be hurde of God, therfore scholde men kunne this prayour, and studie the wyt thereof'; Melvill, *Diary*, 36, 'A babling of words without wit, at least wesdome.' (2) *Cleverness*, as Hall, *Works*, ii. 69, 'How many shall once wish they had been born dullards, yea idiots, when they shall find their wit to have barred them out of heaven? Say the world what it will, a dram of holinesse is worth a pound of wit.' (3) *Understanding, ability to understand*, as Pr. Bk. 1552 (Keeling, p. 379)—

'O Holy Ghost, into our wits,
Send down thine heavenly light';

Elyot, *Governour*, ii. 439, 'A man of greate witte, singuler lernynge, and excellent wisedome.' (4) *Wisdom*, as Ro 11^{34} Wyc. 'Who knew the witte of the lord, or who was his counceilour?'; Spenser, *Hymn of Heavenly Beauty*—

'O thou most Almightie Spright,
From whom all guifts of wit and knowledge flow.'

Wittingly is found in Gn 48^{14}: cf. Tind. *Expos.* 177, 'When they espied that the truth could not stand with the honours which they sought in the world, they wittingly and willingly persecuted it.'

Witty occurs in Pr 8^{12}, Jth 11^{23}, Wis 8^{19}. Cf. Mt 11^{25} Cheke's version, 'which has hidden yees thinges from wijs and witti men, and hath disclosed the saam to baabs'; Wyclif, *Works*, iii. 88, 'Who wiser than David? or hwo moore witti than Salomon his sone?' J. HASTINGS.

WITCH, WITCHCRAFT.—See MAGIC, vol. iii. p. 208 f.

WITHS is the tr. in Jg $16^{7.8.9}$ of יֶתֶר in plu., which means 'bowstring' in Job 30^{11}, Ps 11^{2}, and is so tr^{d} here by Moore, who thinks that it was with cords made from the intestines of animals that Samson offered to be bound, 'green' meaning fresh, not dried, when they would tie better and be less liable to split. But RV tr. the word 'tent-cord' in Job 4^{21}, and probably the meaning in Jg 16 is simply 'green ropes.' The Eng. word (usually spelt 'withe') means a tough flexible twig or willow branch. Wyclif uses it in Lv 23^{40} 'withies of the rennynge water,' *i.e.* willow branches; also in Ps 137^{2}, Is 15^{7}. J. HASTINGS.

WITNESS.—For 'tabernacle of witness' (הָעֵדוּת Nu $17^{7.8}$ 18^{2}, 2 Ch 24^{6}; *τοῦ μαρτυρίου* Ac 7^{44} [RV in all 'testimony']) see art. TESTIMONY. 'Witness,' as treated in the present article, represents the following verbs and nouns: [עוּד], עָנָה (lit. 'answer'); עֵד and עֵדָה (the latter only of things); LXX and NT *μαρτυρέω, ἐπιμαρτυρέω, καταμυρτυρέω* ('witness against'), *συνμαρτυρέω* ('witness along with,' 'corroborate'), *ψευδομαρτυρέω* ('bear false witness'), *μαρτύρομαι, διαμαρτύρομαι, προμαρτύρομαι* ('witness beforehand'); *μάρτυς* (of persons), *μαρτυρία, μαρτύριον*.

The nouns עֵד and עֵדָה [whose root notion is prob. that of *reiterating*, hence *emphatically affirming*] are used in two leading senses—

1. *Witness=testimony, evidence* (of things): Gn $31^{44.48.52}$ [JE] the heap of stones that was to witness the covenant between Jacob and Laban, Ex $22^{12\,(13)}$ [E] the carcass that was to be brought in evidence that the animal entrusted to the keeping of a neighbour had been torn, Dt $31^{19.21}$ [J] the Song of Moses is to be a witness against the children of Israel if they go astray, v.^{26} (D^{2}) the book of the Law is to serve the same purpose, Jos $22^{27.28.34}$ [P] the altar erected by the 2½ tribes (see art. ED), Is 19^{20} the altar and the *mazzēbah* in the land of Egypt, Job 16^{8} Job's miserable condition is a witness against him, Ps $89^{37\,(38)}$ the moon [possibly, but we prefer the interpretation below]. In all these passages עֵד is used. עֵדָה [only E] occurs in Gn 21^{30} of the seven ewe lambs that are to witness the covenant between Abraham and Abimelech, 31^{52} the heap of stones that witnessed Laban's covenant with Jacob, Jos $24^{27\,bis}$ the great stone set up by Joshua at Shechem to witness Israel's covenant with Jahweh.—Similarly in NT *μαρτύριον* is used: Mt 8^{4} (‖ Mk 1^{44}, Lk 5^{14}) of the gift to be offered by the leper, Mt 10^{18} (‖ Mk 13^{9}, Lk 21^{13}) the persecutions of Christ's followers, Mk 6^{11} (‖ Lk 9^{5}) the dust to be shaken off the apostle's feet [on all these passages see Swete's note on Mk 1^{44}], Ja 5^{3} the dust of the rich men's silver and gold to be a witness against them.

2. *Witness* (of persons): (*a*) of God: Gn 31^{50} [E] God is to be witness between Jacob and Laban, Job 16^{19} 'my witness is in heaven,' 1 S $12^{5\,bis}$ 'the LORD is witness against you . . . He is witness,' so v.^{6} [reading עֵד י״י, after LXX *μάρτυς Κύριος*], 20^{12} 'the Lord be witness' [inserting עֵד before י״י], Jer 29^{23} against the false prophets Ahab and Zedekiah, 42^{5} invoked as a witness by Johanan and his companions (cf. Jg 11^{10}, where the elders of Gilead say to Jephthah, 'The LORD shall be witness [lit. 'hearer,' שֹׁמֵעַ] between us'), Mic 1^{2} against the nations, Mal 3^{5} against evil-doers in Israel, Ps $89^{37\,(38)}$ 'the witness in the sky, *i.e.* God [see Driver, *Par. Psalt.*], is faithful.'—Similarly, in NT St. Paul calls God as witness (*μάρτυς*) to the truth of his words and the purity of his motives, Ro 1^{9}, 2 Co 1^{23}, 1 Th $2^{5.10}$, Ph 1^{8}.

(*b*) David (or perhaps the Davidic dynasty personified) was God's witness to the nations, Is 55^{4}.

(*c*) Of witnesses in a more or less strictly forensic sense: Jer $32^{10.12.25.44}$ of transfer of property, Ru $4^{9.10.11}$ betrothal (see art. SHOE); usually of testimony in court and in civil and social relations: *e.g.* Nu 5^{13}, Dt 5^{20} 17^{6}, Job 10^{17} (fig.), Is 8^{2}, Jer 32^{10}. Note the phrases 'false witness' עֵד שֶׁקֶר (hence Ex 20^{16} ענה עֵד שֶׁקֶר בְּ 'bear false witness [lit. 'answer (in court) as a false witness'] against') Ex 20^{16}, Dt $19^{18\,bis}$, Ps 27^{12}, Pr 6^{19} 14^{5}; also עֵד שָׁוְא Dt 5^{20}, Pr 25^{18}; עֵד שְׁקָרִים Pr 12^{17} $19^{5.9}$; עֵד כְּזָבִים Pr 21^{28}; עֵד חִנָּם 24^{28}; עֵד בְּלִיַּעַל 19^{28}, cf. עֵד חָמָס 'witness of [*i.e.* supporting] violence,' Ex 23^{1} [E], Dt 19^{16}, Ps 35^{11}; 'faithful witness' is עֵד אֱמוּנִים Pr 14^{5}, or עֵד אֱמֶת Jer 42^{5}, Pr 14^{25}; 'at the mouth of witnesses' is לְפִי עֵדִים Nu 35^{20} [P], or עַל־פִּי עֵד(י)ם Dt $17^{6\,bis}$ $19^{15\,bis}$.

The verb [עוּד], denom. from עֵד, means in Hiphil [the only instance of Qal is in *Kethîbh* of La 2^{13}]—(1) 'testify *or* witness,' in favour of (Job 29^{11}, La 2^{13} [*Kerê*]), or against (1 K $21^{10.13}$) one, or between two parties (Mal 2^{14}); (2) 'cause to testify,' *i.e.* 'take as witness' (Is 8^{2}, Jer $32^{10.25.44}$), with בְּ 'against' (Dt 4^{28} 30^{19} 31^{28}); (3) 'protest,' 'affirm solemnly,' 'warn' (Jer 6^{10}, Neh 13^{15}), with בְּ (Gn $43^{3\,bis}$ [J], Ex 19^{21} [E] 21^{19} [Hoph. 'if a protest have been entered'], 1 S $8^{9\,bis}$, 1 K 2^{42}, 2 Ch 24^{19}, Neh 9^{26} 13^{21}, Jer 42^{19}, Am 3^{13}); note esp. the instances where God is the subject: Ex 19^{23} [J], Dt 8^{19} 32^{46}, 2 K $17^{13.15}$, Neh $9^{29.30.34}$, Jer $11^{7\,ter}$, Zec 3^{6}, Ps 50^{7} 81^{9}; whence the use explained in art.

TESTIMONY of the term 'testimonies' for God's laws as solemn charges or declarations of the Divine will.

עָנָה [lit. 'answer,' 'respond'] has the specific sense of 'respond *as a witness*,' 'testify': with בְּ 'for' Gn 30^{33}; but usually *against*, Ex 20^{16} 23^{2}, Nu 35^{30} [P], Dt 3^{17} $19^{16.18}$, 1 S 12^{3}, 2 S 1^{16}, Is 3^{9} 59^{12}, Mic 6^{3}, Jer 14^{7}, Ru 1^{21} (?), Pr 25^{18}; with בִּפְנֵי Hos 5^{5} 7^{10}, Job 16^{8}; with לְפָנָיו Dt 31^{21} (+לְעֵד 'as witness').

The testimony of at least two witnesses was required to justify a capital sentence, Dt 17^{6} 19^{15}, Nu 35^{30} [P]. Cf. the general saying 'that at the mouth of two witnesses or three every word may be established' (Mt 18^{16}, similarly 2 Co 13^{1}, He 10^{28}; also the rule laid down in 1 Ti 5^{19} that an accusation is not to be received against an elder except on the information of two or three witnesses); and note the two witnesses against Naboth (1 K 21^{10}), and against Jesus (Mt 26^{60}). Although perjury was punished by the infliction of the same penalty as the false evidence, if accepted, would have involved for the accused (Dt $19^{16ff.}$), we gather from the last two instances (cf. the evidence suborned against Stephen, Ac 6^{13}) as well as from the terms of the Ninth Commandment, that amongst the Jews false witness was as common and as easily procurable as it still is in many Eastern courts of justice. The witnesses, in the event of the accused being condemned to death, had to take the leading part in carrying out the sentence, Dt 17^{7}, cf. $13^{10\,(9)}$ and Ac 7^{58}.

In the NT the apostles are repeatedly presented in the character of witnesses (*μάρτυρες*) regarding the life and death and, above all, the resurrection of the Lord Jesus (Lk 24^{48}, Ac $1^{8.22}$ 2^{32} 3^{15} 5^{32} $10^{39.41}$ 13^{31} 22^{15} 26^{16}, 1 P 5^{1}; cf. Mt 24^{14}, Ac 4^{33}). The name *μάρτυς* is twice (Rev 1^{5} 3^{14}, cf. 1 Ti 6^{13}) applied to our Lord Himself; it is used also of the two witnesses of Rev 11^{3}. John the Baptist came *εἰς μαρτυρίαν*, that he might bear witness concerning the Light (Jn 1^{7}). The heroes of faith of the OT are 'the cloud of witnesses' (*νέφος μαρτύρων*) of He 12^{1}. AV tr. *μάρτυς* by 'martyr' in Ac 22^{20}, Rev 2^{12} 17^{6}, but it is questionable whether the word had acquired this sense in NT times (see MARTYR). RV has 'martyr' only in Rev 17^{6}, elsewhere 'witness.' For the 'witness of the Spirit' (Ro 8^{16}, cf. 1 Jn 5^{10}) see art. HOLY SPIRIT, vol. ii. p. 409^{b}.

J. A. SELBIE.

WIZARD.—See SORCERY, p. 606^{a}.

WOLF.—In all the passages in the OT where AV and RV have 'wolf' the Heb. original is זְאֵב *zĕ'ēb*, LXX and NT *λύκος*, Vulg. *lupus*, Arab. *dhi'b*. The wolf is, unfortunately, quite abundant in the Holy Land, and very destructive to the flocks of sheep and goats, which constitute so large a part of the wealth of the people. It is not surprising, therefore, that the allusions to it and its habits should be frequent. Its insatiableness is the theme of a comparison with Benjamin (Gn 49^{27}). One of the most signal miracles of the triumph of God's kingdom is the change in the habits and instincts of the wolf (Is 11^{6} 65^{25}, Sir 13^{17}). The princes of apostate Israel are characterized as wolves (Ezk 22^{27}). The nocturnal habits of the wolf are noted (Jer 5^{6} עֲרָבוֹת 'evenings,' m. 'deserts,' Hab 1^{8}, Zeph 3^{3}). The enemies of the truth are wolves (Mt 10^{16}, Lk 10^{3}, Jn 10^{12}). Hypocrites in the Christian Church are wolves (Mt 7^{15}, Ac 20^{29}). The wolves of the Holy Land are large, tawny, and usually solitary, or one or two together. They prowl around the flocks and herds, and sometimes get into the folds. They seldom attack men.

G. E. POST.

WOMAN.—

Heb. אִשָּׁה, a form similar to אִישׁ and אֱנוֹשׁ 'man,' but, according to *Oxf. Heb. Lex.*, not derived from the same root, but perhaps from אנשׁ, انث, with the sense of 'tender,' 'frail.' Gn 2^{23} (where Luther has *Männin*, Symm. *ἀνδρίς*, Vulg. *virago*) cannot be taken as an authoritative statement of etymology; but it illustrates a popular conception of the relation of the words based on the Heb. tradition of the origin of woman. In three places (Lv 15^{33}, Nu 31^{15}, Jer 31^{22}) AV, followed by RV, has the Eng. word 'woman' for נְקֵבָה, which is literally 'female,' is used for the female of animals (*e.g.* Gn 6^{19}, Lv $3^{1.6}$), and tr. 'female' when applied to the human race in Gn 1^{27} 5^{2}.

Gr. *γυνή*, which also stands for 'wife,' as does the Heb. equivalent. In Ro $1^{26.27}$ AV is followed by RV in using the Eng. word 'woman' for the Gr. *θήλεια* ('female'). The diminutive *γυναικάριον* occurs in the plural in 2 Ti 3^{6}, and is rendered 'silly women' both in AV and in RV.

For information on the social and legal status of woman in Israel see FAMILY and MARRIAGE. There remain to be considered the place of woman in religion, Jewish and Christian, and the treatment of questions affecting woman religiously and ethically by the Scripture writers.

i. IN THE OLD TEST. AND JUDAISM.—While sharing to some extent the universal Eastern conception of the inferiority of woman to man, the Jewish religion of biblical times by no means sanctioned the total subjection of woman subsequently authorized by Mohammedanism or the low view of woman's place in religion taken by rabbinical Judaism. Women seem to have enjoyed considerable rights and privileges in all the Semitic cults. This is apparent in the ancient Arabic cult, in which an important part was played by female divinities.

Most of the *jinns* were female. According to Robertson Smith, 'in old Arabian religion gods and goddesses often occurred in pairs, the goddess being the greater' (*Kinship and Marriage in Early Arabia*, p. 300). The Byzantine writers regarded the worship of *Aphrodité* as the principal cult at Mecca. This idea is supported by recent research, the white stone being the original Meccan divinity, and the black stone her son, the very name *ka'ba* seeming to point to a supreme female deity. Prostitution, both by married and by unmarried women, in imitation of the conduct of the goddess, was a recognized custom in the ancient Arabian cult. In the various functions of worship, bringing offerings, stroking the sacred stone, etc., women took part as well as men, and in the cult of the dead it was their part to chant the rhythmical dirge. Women were also found in the official position of the *kâhin* (seer), originally the chief officer of the Arabian religion.

Woman also has a prominent place in the Babylonian, Assyrian, and Phœnician religions.

This is seen in the prominence given to female divinities. The Babylonian Ishtar was the mother goddess and head of all the gods. Among the Assyrians Astarté is the supreme goddess. It is to a goddess, apparently, that king Mesha devotes the Israelite captives in the inscription on the Moabite Stone. Then women took a prominent part in the worship. There are inscriptions with the words 'handmaid of Melkart,' 'sister of Melkart.' Women, too, were recognized as priestesses and prophetesses. Thus there were priestesses of Ishtar at Uruk.

The OT contains evidence of the lead taken by women in idolatrous rites. Maacah, the mother of Asa, introduced the worship of Astarté (1 K 15^{13}). Jezebel in the Northern kingdom supported the prophets of the Phœnician cults and persecuted the followers of J" (1 K $18^{4.19}$); and her daughter Athaliah apparently played the same part in the Southern kingdom (cf. 2 K 8^{18} and 2 Ch 21^{6} with 2 Ch 22^{2} and 24^{7}). Jeremiah describes the devotion of the women of Jerusalem to the rites of Ishtar, kneading dough and making cakes which would be shaped like the moon (see QUEEN OF HEAVEN), to represent the goddess (Jer 7^{18}). If we do not accept Stade's conjecture that 2 K 23^{7b} is a gloss, possibly the clause may refer to the work of some of the women in providing sacred garments for the worship of Astarté (*i.e.* on the suggestion of Peritz that כתנות [*χιτών*, cf. Lucian *στολάς*] be substituted for the Massoretic בתים). Ezekiel mentions the devotion of Jerusalem women to the worship of the Babylonian Adonis, saying, 'There sat the women weeping for Tammuz' (Ezk 8^{14}). Women must have had their share in the horrible rites of Molech, which took place in the Valley of Hinnom, as the 'inhabitants of Jerusalem' generally, without distinction of sex, are accused of having 'filled this place with the blood of innocents' (Jer $19^{2\text{-}4}$).

It is therefore quite in accordance with contemporary Semitic custom that woman should take part in the religion of Israel, as Peritz has demonstrated in his exhaustive monograph on the subject, a work to which this article is largely indebted.

1. *The Participation of Woman in the Privileges of Religion.*—(*a*) *Prayer*, *e.g.* the instance of Hannah at Shiloh (1 S $1^{9ff.}$).—(*b*) *Feasts.* In primitive times women attended the periodic religious gatherings of Israel. It was taken for granted that the daughters of Shiloh would be present at the annual feast (Jg $21^{16\text{-}19}$). Later, the wives and daughters of Elkanah are found attending the Shiloh festival (1 S $1^{1\text{-}4}$ 2^{19}). Women were present at David's feast and sacrifices on the recovery of the ark (2 S 6^{19}). The Deuteronomic code makes express provision for the presence of women at the temple festivals. The Jews are exhorted to rejoice with their sons and their daughters (Dt 12^{12}). Among those who are to eat the feast we have 'thy daughter' and 'thy maidservant' (v.^{18}), 'thine household' (14^{26} 15^{20}), cf. $16^{11.\,14}$.—(*c*) *Sacrifices.* Women also took part in the ancient sacrifices. When Manoah offered a burnt-offering because the angel of J″ had visited him, his wife joined him in the deed. They both 'fell on their faces to the ground' (Jg 13^{20}), and it was the woman who said, 'If the Lord were pleased to kill us, he would not have received a burnt-offering and a meal-offering at *our* hand' (v.^{23}). The Law required the attendance only of men at the yearly feasts (Ex 23^{17} 34^{23}, Dt 16^{16}); but it did not forbid women to come, and it is evident that custom, which lay behind the Law, allowed the attendance of women. The meaning of the Law was to make this obligatory on men while it was left optional with women, in part, no doubt, owing to the fact that they could not always take the necessary journey. The women of post-exilic times also have their share in religious functions. The presence of women is expressly mentioned in the account of Nehemiah's reading of the Law (Neh $8^{2.\,3}$), and again in the description of the sacrifices and rejoicings associated with the dedication of the city walls (12^{43}). Certain sacrifices women were forbidden to eat, viz. the flesh of the sin-offering, which was allowed only to males (Lv 6^{29}). This plainly implies that they were allowed to eat of those sacrifices concerning which no such prohibition was made (see W. R. Smith, *RS* p. 379, note 2). The priest's daughters are mentioned with his sons as those who are to share with him in eating sacrificial meat (Lv 10^{14}). If a priest's daughter is married to an alien she may not eat of the sacrifice, but the privilege will be restored to her on her widowhood or divorce if she has no children ($22^{12.\,13}$); cf. Nu 18^{11}. Women were required to bring sacrifices for purification (Lv 12. $15^{19\text{-}33}$).—(*d*) *Vows.* They were free to take the Nazirite vow (Nu 6^{2}).—(*e*) *Oracles.* Women could consult oracles, as we read in the case of Rebekah (Gn 25^{22}).—(*f*) *Theophanies.* They enjoyed the privilege of theophanies, as in the cases of Hagar (Gn $16^{7ff.}$ $21^{17ff.}$), Sarah ($18^{9ff.}$), Manoah's wife (Jg $13^{3ff.}$).

2. *Official and other leading Positions in Religion held by Women.*—(*a*) *Witchcraft.* The lowest form of female influence in this direction is seen in the idea of witchcraft, according to which certain occult powers in dealing with the unseen world were ascribed to women. The witch of Endor was supposed to be holding intercourse with 'a familiar spirit,' which enabled her to call back Samuel from the dead against the will of the great seer (1 S $28^{7ff.}$). The Law attached the death penalty to the crime of sorcery on the part of a woman, in the command, 'Thou shalt not suffer a sorceress to live' (Ex 22^{18}). For the purpose of divination women attached some sort of amulets to the arm (כסתות Ezk 13^{18}, which the Hexapla renders *φυλακτήρια*), and also something to the head, both used, according to W. R. Smith, for the purpose of invoking the deity. With this we may compare Rachel's possession of the teraphim. She would hope to perform some occult rite with the idol and obtain an oracle from it (Gn 31^{19}).—(*b*) *Mourning.* While the funeral rites and their accompanying lamentations were used for women as well as for men (Jer 16^{7}, Mk 5^{38}), women took a prominent place in the performance of them, just as there were 'mourning women' in Arabic heathenism.—(*c*) *Tabernacle and temple service.* There were 'serving-women which served at the door of the tent of meeting' (Ex 38^{8}; the mention of these women in 1 S 2^{22b} is generally regarded as an interpolation). No account of the service of these women is given anywhere in the OT. The LXX has in Exodus *τῶν νηστευσασῶν αἳ ἐνήστευσαν*, but in 1 Sam. *τὰς γυναῖκας τὰς παρεστώσας*; Vulg. *quæ excubabant*, and Targ. and Syr. have 'who prayed' and 'who came to pray,' manifestly no more than a loose paraphrase of the original Hebrew צבא, a word frequently used in the Priestly Code for some sort of Levitical service in the tabernacle (*e.g.* Nu 4^{23}). The statement that the laver of brass, etc., were made out of the mirrors of 'the serving-women which served' (we might read 'which had served,' reading צבאו as a pluperfect), seems to imply that this service was no longer going on. Thus the sentence points to an ancient custom which had been abandoned. Except that some ritual service associated with the priest's sacrificial work is implied, it is impossible to say what the work of these women had been.—(*d*) *Music, singing, and dancing.* Women appeared in choral dances on occasions of great victories and other sources of rejoicing (*e.g.* Ex 15^{20}, Jg 11^{34}, 1 S 18^{6}, Ps 68^{25}). In company with singing men, women were also engaged in the temple choir (Ezr 2^{65}). The register of returned exiles contains a reference to 'two hundred forty and five singing men and singing women' (Neh 7^{67}). We are left to conjecture what their special function was, but the fact that there were subsequently men and women singers in the temple points to the conclusion that a guild of singers in connexion with public worship had been formed as early as the Exile.—(*e*) *Prophecy.* Women appear from time to time in the history of Israel as inspired prophetesses. Miriam is called a 'prophetess' (Ex 15^{20}), and is associated with her brother Aaron in exclaiming, 'Hath J″ indeed spoken only by Moses? hath he not spoken also by us?' (Nu 12^{2}). The prominence of Miriam appears also in Mic 6^{4} 'And I sent before thee Moses, Aaron, and Miriam' (see MIRIAM). Deborah appears both as a prophetess and as a judge (Jg $4^{4.\,5}$). See DEBORAH. Huldah appears as a prophetess to whom the messengers of Josiah applied when they were directed to 'inquire of the Lord' (2 K $22^{13\text{-}20}$). See HULDAH. In Neh 6^{14} 'the prophetess Noadiah' [but see NOADIAH] appears among 'the rest of the prophets' hired by Tobiah and Sanballat to hinder the restoration of Jerusalem, who must therefore be regarded either as heathens or as false Jewish prophets. It is manifest that the appearance of a prophetess in Israel was quite exceptional. The prophetic guilds did not include women; they consisted only of 'sons of the prophets.' A prophetess was, like Amos coming from his farm work, not trained for office, but inspired and compelling respect by her gifts and the power of her utterances. No law forbade her to speak; no custom hindered her from rising to a position of great influence.

ii. IN THE NEW TEST. AND CHRISTIANITY.—

The freedom and prominence of woman in the early Church, compared with the restraint and suppression commonly observed in Eastern civilization, are to some extent developments of contemporary Jewish customs. Women moved freely about in society, and were present at the table of hospitality, though it cannot be shown that in Palestine they partook of the meals in common with men. They went up to the temple to worship, but were there limited to the privilege of using the 'court of the women,' and could not advance so near the altar as men were permitted to go. They united in the worship at the synagogue, apparently sitting by themselves apart from the male worshippers. Now that Conybeare has gone some way towards vindicating the *De Vita Contemplativa* as a genuine work of Philo, it is possible to appeal to that treatise as a witness to customs current in the time of Christ. The following extract describes the arrangements of public worship of the Therapeutæ or Egyptian Essenes:—

> 'And this common holy place to which they all come together on the seventh day is a twofold circuit, being separated partly into the apartment of the men, and partly into a chamber for the women; for women also, in accordance with the usual fashion there, form a part of the audience, having the same feelings of admiration as the men, and having adopted the same sect with equal deliberation and decision; and the wall which is between the houses rises from the ground three or four cubits upwards, like a battlement, and the upper portion rises upwards to the roof without any opening, on two accounts: first of all, in order that the modesty which is so becoming to the female sex may be preserved; and, secondly, that the women may be easily able to comprehend what is said, being seated within earshot, since there is then nothing which can possibly intercept the voice of him who is speaking' (*De Vit. Contemp.* 3).

The phrase 'in accordance with the usual custom there' shows that this participation in the Sabbath worship of men and women, but with some degree of separateness, was the common Jewish form of procedure. The illustration of a battlement, the upper portion of which reached the ceiling, indicated a wall perforated near the top with square holes. We cannot infer from this description that the separation was by the same means and to the same extent in the synagogues of ordinary Jews. All that is implied is that the sexes did not mingle in public worship, though they joined in the same acts of worship. In the simple room known as a προσευχή (Ac 16^{13}) there could have been no elaborate barriers of separation. Paul and Silas seem to have entered freely into the society of Lydia and the other devout women at Philippi. No office in the synagogue appears to have been open to women. The limited education commonly enjoyed by all women but those of the wealthy and leisured class would necessarily debar them from much influence in intellectual regions. The Jews paid great attention to the education of children; but whenever we meet with an explicit statement on the subject we read only of boys. Thus Josephus says that Moses 'commanded to instruct children' (*c. Apion.* ii. 25), and 'we take most pains of all with the instruction of children' (*ib.* i. 12); but when he is more explicit he states that Moses prescribed 'that *boys* should learn the most important laws' (*Ant.* IV. viii. 12). Philo and the Talmud follow on similar lines (see Schürer, *HJP* II. ii. 27). The inference is that all young children were taught the elements of religion by their parents, but that when it came to the question of more exact instruction about the Law, in the synagogue schools, this was confined to boys.

1. *The Prominence of Women in the NT.*—Women come to the front with reference to the life of our Lord. This is especially the case in the Third Gospel, St. Luke delighting in gathering information concerning women and in showing their part in the Gospel story. It cannot be maintained that the Magnificat, though ascribed to the Virgin Mary, was actually composed by her. It is more consonant with ancient literary custom to suppose that the evangelist supplies hymns of the Jewish or Christian Church to express the sentiments of the persons whom he represents as uttering them. But, while we may not venture to designate the mother of Jesus as a poetess, Anna is distinctly represented as a prophetess who spent all her time in worship in the precincts of the temple (Lk 2^{36}). Our Lord's teaching and healing ministry was carried on among women as freely as among men. The means for the support of Christ and His apostles appears to have been chiefly derived from the contributions of women: this was in accordance with custom, women sometimes contributing largely towards the support of Rabbis (see Plummer, *Intern. Com.* on Lk 8^{1-3}). Women were prepared to perform the last offices for the dead on the body of Jesus. In the early apostolic age it was to the house of a woman that St. Peter went, after his liberation from prison during the persecution by Herod, to meet a considerable group of disciples ('where *many* were gathered together,' etc., Ac 12^{12}). We cannot infer that the whole Church was accustomed to meet in this house, as has been often assumed, for the majority were not present on this occasion, nor was St. James, since St. Peter says, 'Tell these things unto James, and to the brethren' (v.^{17}). At Joppa, Tabitha was a woman disciple highly honoured for her 'good works and alms deeds' (Ac 9^{36}). St. Paul's first convert in Europe was a woman, and he and his companions stayed at her house ($16^{14.15}$). At Philippi, where this occurred, there were other women who laboured with the apostle (Ph $4^{2.3}$). Priscilla is mentioned before her husband in regard to their teaching of Apollos, as though she took the lead (Ac 18^{26}). Timothy's faith is to be encouraged with memories of his mother's and grandmother's earlier faith (2 Ti 1^{5}). One NT Epistle (viz. 2 John) appears to have been written to a woman, though this is doubtful (see JOHN, EPISTLES OF). Women figure largely in the symbolism of the Apocalypse, *e.g.* 'the woman Jezebel, which calleth herself a prophetess' (Rev 2^{20}, see JEZEBEL, n.), the 'woman arrayed with the sun' ($12^{1ff.}$), the woman representing 'Babylon the Great' ($17^{1ff.}$).

2. *The Gifts of Women and the Exercise of them.*—There were no women among the Twelve Apostles, to whom special gifts of healing were given by our Lord. There is no proof that women disciples were not included among the Seventy (Lk 10^{1-20}), but there is no evidence that there were any, and the nature of the mission renders it improbable. No miracle is ever attributed to a woman. Still, as there were women in the churches among whom gifts of healing were said to be distributed, and no exception in their case is named, it cannot be denied that they may have shared in these as in other gifts. No book of the NT claims to be written by a woman; but Harnack assigns the authorship of Hebrews to Priscilla. Women were present at the day of Pentecost when the gift of the Spirit was bestowed (cf. Ac 1^{14} and $2^{1ff.}$), and must have shared in it, since St. Luke, referring to the whole company, says of the appearance of the tongues, that 'it sat upon each one of them' (2^{3}). Its result was prophecy (v.^{18}), and prophecy is the specific gift, the exercise of which at Corinth by women St. Paul refers to (1 Co 11^{5}), a gift which he prefers in honour to all others (14^{2}). The apostle assumes that women prophesy and pray in the church, only directing that they do so veiled. A little later he orders women to 'keep silence in the churches' (14^{34}). This seems to imply that on further reflexion he thought it not sufficient to protect their modesty that women should wear veils while

preaching or praying, and therefore forbade their exercise of the gift of prophesying in public at all. But observe, (*a*) this was at Corinth, a most dissolute city, where 1000 women were devoted to immorality at the shrine of Aphroditê on the Acrocorinthus, and therefore where it was most important to preserve the modesty of the Christian women from any suspicion or temptation; and (*b*) in the context of the second passage St. Paul does not again mention prophesying or praying, but says, 'It is not permitted unto them to *speak*' (λαλεῖν, which might be rendered 'talk'). This looks as though the apostle were now thinking of mere chattering, or, at best, questioning, especially as he adds, 'And if they would learn anything, let them ask their own husbands at home' (v.^{35}). The ground of the prohibition is more than the requirements of modesty; it is the idea of the subjection of married women to their husbands (' but let them be in subjection,' *ib.*). Possibly there was a temporary and local reason for this apostolic precept in the condition of the Corinthian Church at the time. The apostle's words suggest the idea that in some cases the new, large family brotherhood and sisterhood of the Church was threatening to submerge the original relationships of the home. That must be prevented. But that the apostle holds to a certain subjection of woman in general must be inferred from his appeal to Genesis (3^{16}). This, however, is to be considered rather as a matter of order than a question affecting the spiritual status of women. When referring to the latter, St. Paul lays down the principle that in Christ 'there can be no male or female' (Gal 3^{28}). It has been said that the apostle was inconsistent with the principle here enunciated when giving his specific directions to the Corinthians (McGiffert, *Apost. Age*, p. 305). But he had also said 'there can be neither bond nor free' (Gal 3^{28}), and yet he sent the slave Onesimus back to his master (Philem ^{12}). In both cases he supported established customs for the time being while enunciating great principles which would ultimately abolish them. Thus the NT leads to the emancipation of woman as to the abolition of slavery, not by sudden revolution from without, but by gradual evolution from within. St. Paul's lofty conception of marriage (Eph 5^{22-33}), while including the subjection of women, involves the dignity of womanhood. Even under the restrictions required at the time, it is manifest that women enjoyed more liberty and were more on an equality with men in the church than in the synagogue. There could have been no such separation as Philo (?) describes. 1 Cor. plainly indicates that women took part with men at the *Agapê*. They must have been in view if it was requisite for them to be veiled. Their prophesying before the Church involves their being in the presence of the whole community. Doubtless, the sexes were so far divided as that the men and women sat in separate groups, since this was the custom in the churches of early patristic times. That the kiss of Christian brotherhood and sisterhood was not restricted between the sexes is plain from the fact that in later times it was subject to abuse, which led to the restriction being imposed upon it. Athenagoras (A.D. 177) quotes some apocryphal writing under the designation of 'the Logos' in rebuke of the abuse, which says, 'If any one kiss a second time because it gives him pleasure,' etc., and again, 'Therefore the kiss, or rather the salutation, should be given with the greatest care, since, if there be mixed with it the least defilement of thought, it excludes us from eternal life' (*Legat. pro Christian.* 32). Clement of Alex. condemns 'the shameless use of the kiss, which ought to be mystic' (*Pædagog.* iii. 11). Tertullian remarks on the reasonable complaint of a pagan husband that his wife should 'meet any one of the brethren to exchange a kiss' (*ad Uxor.* ii. 4). Accordingly the custom was altered, the earliest instance of the new regulations appearing in the *Apostolical Constitutions*: 'Let the clergy salute the bishop, the men of the laity salute the men, the women the women' (*Const. Apostol.* viii. 2. See *Dict. of Chr. Ant.*, art. 'Kiss').

3. *Offices held by Women.*—There were no women apostles. The elders were all men, in accordance with the invariable custom of the synagogue. It is given as a sign of the 'contempt' into which religion had fallen in the 5th cent., that women were found to be acting as priests at the altars, a complaint implying that this was an innovation previously unheard of (see *Dict. of Chr. Ant.*, art. 'Women'). Two offices are said to have been held by women in the NT Church—the office of the Deaconess and that of the Widow.—(*a*) **Deaconesses.** There is no certain description of the office of deaconess in the NT. We meet with deacons in Ph 1^{1} and in 1 Ti 3^{8-13}, but without any clear reference to deaconesses, though in the latter passage deacons' wives are referred to; and there is mention of women in the course of the directions about the deacons (v.^{11}), and before the mention of their wives, which seems to suggest that women deacons are meant. Earlier than this, Phœbe of Cenchrea is called 'a servant of the Church' (Ro 16^{1}). The word is διάκονος, RVm 'deaconess.' In the earlier parts of the *Apostolical Constitutions* (ii. 26, iii. 15), ἡ διάκονος is the title of the deaconess; later we have διακόνισσα (viii. 19, 20, 28). See Sanday-Headlam, *in loc.*, also Lipsius, who considers that Phœbe's work would be care of the sick and of strangers. The fact that she went with a letter of recommendation suggests that she was travelling in the service of the Church. She must have been a woman of wealth and social standing, which gave her importance apart from her office, as she is called προστάτις, *i.e.* 'patroness.' See PHŒBE. The earliest definite reference to deaconesses is in Pliny (*Ep.* x. 96), '*Quo magis necessarium credidi ex duabus ancillis, quæ ministræ dicebantur, quid esset veri et per tormenta quærere.*' The title 'ministræ,' by which Pliny says these 'handmaidens'—surely in a humbler position than that of Phœbe—were known, is the Latin representative of διάκονοι and διακόνισσαι; the former of which titles would probably have been in use in Bithynia. There is nothing in the NT to identify the deaconesses with the 'widows' of the Pastoral Epistles; and if 1 Ti 3^{11} refers to deaconesses, they must be in a distinct office, as they are mentioned apart from the widows, to whom reference is made later (5^{3-16}). See Lightfoot, *Com. on Ph.*, Dissertation on Chr. Ministry, p. 189. We have no description of the work of deacons and deaconesses. But the significance of the title, pointing to service in distinction from the work of ruling entrusted to the elders or bishops, implies that they would have the care of the poor, 'serving tables' like 'the seven' (Ac 6^{2-4}). The division of labour effected in the appointment of the seven is also implied in the Pastoral Epistles, since, while the bishop is required to be a capable teacher (Tit 1^{9}), that is not said of the deacon; much less, then, could it have been required of the deaconess. Priscilla's instruction of Apollos, in conjunction with her husband, is not associated with any office.—(*b*) **Widows**, see WIDOW.

LITERATURE.—See the works named in the articles on FAMILY and MARRIAGE; also Peritz, *Woman in the Ancient Hebrew Cult*; W. R. Smith, *RS*; Stade, *Geschichte*; Schwally, *ZATW* xi. p. 176 ff.; Schechter, *Studies in Judaism*; Wellhausen, *Reste arabischen Heidentums*; Allen, *Christian Institutions*; Bartlet, *The Apostolic Age*; McGiffert, *Hist. of Christianity in the Apost. Age*; the *Internat. Critical Comm.* and the *Hand-Commentar* on passages referred to.

WOOD.—See Grove, Forest, Tree.

WOOL (צֶמֶר *zemer*; גֵּז *gēz*, גִּזָּה *gizzah*, Arab. *jazzah*, 'a fleece').—Wool was an important article of commerce (2 K 3^{4} [part of the tribute of king Mesha], Ezk 27^{18}), and woollen fabrics formed a representative element in Oriental wealth (Mt 6^{19}, Ja 5^{2}). It was also an indication of social rank (Mt 11^{8}, Lk 7^{25}). The soft raiment (*τὰ μαλακά*) worn in kings' houses was not the rough homespun of the shepherd's cloak, but prob. like the close smooth-faced broadcloth still woven in the East, with native dyes in grey-blue, moss-green, and various brown and purple tones. Until recently the emirs of the Lebanon prohibited the peasantry from wearing such cloth. A many-folded Oriental suit of woollen cloth must have always been costly, and in modern use it is kept for high family occasions and religious festivals. Esau's 'goodly' garment was under his mother's personal charge (אֲשֶׁר אִתָּהּ Gn 27^{15}), and Tyrian cloth was valuable enough to be stored up as an ancestral heirloom (עָתִיק Is 23^{18}).

Great care had to be taken to protect woollen cloth from the ravages of moths (Is 50^{9}, Lk 12^{33}). In Is 51^{8} mention is made both of the *moth* (עָשׁ *'āsh*, Arab. *'uththah*) and the *worm* (סָס *ṣāṣ*, Arab. *ṣuṣ*, Gr. *σής*). In Arab. the former is the small silvery moth, and the latter word indicates the destructive larvæ.

The Israelites were forbidden to wear clothing made of interwoven wool and linen, called שַׁעַטְנֵז *sha'aṭnēz*. The context, Lv 19^{19} Dt 22^{11}, seems to indicate that the objection was to the mixture as such. The matter is the subject of discussion in the Mishna (*Kilaim* ix. 1), and Josephus briefly states that the reason was because such cloth of wool and linen was the special dress material of the priests (*Ant.* IV. viii. 11). It is one of the tit-bits of rabbinical conscientiousness to discuss whether a man wearing a woollen coat, of which the buttons are sewn on with linen thread, is wearing *sha'aṭnēz*, and so breaking the Law.

Wool was the standard of lustrous whiteness (Ps 147^{16}, Is 1^{18}, Dn 7^{9}, Rev 1^{14}), as goats'-hair or sackcloth was of intense black (Rev 6^{12}).

G. M. Mackie.

WORD (λόγος, ῥῆμα).—Commenting on Dt 8^{3}, Philo says (*Leg. Alleg.* iii. 61), *τὸ μὲν γὰρ στόμα σύμβολον τοῦ λόγου, τὸ δὲ ῥῆμα μέρος αὐτοῦ.* The definition of *ῥῆμα*, as an isolated specific affirmation in contrast with *λόγος*, a connected whole, though for the most part tenable, cannot be universally accepted. In LXX both words are used indifferently as tr. of דָּבָר, and sometimes *λόγος* is found, where on the ground of this distinction we might have expected *ῥῆμα* (Is 50^{4}). In the familiar phrase, 'the word of the Lord came,' 'word' is rendered in the historical books, now by *λόγος* (2 S 24^{11}, 1 K 6^{11} 12^{22} 16^{1} etc.), now by *ῥῆμα* (1 S 15^{10}, 2 S 7^{4}, 1 K 17^{8} 19^{9} etc.); but in the prophetical books (with the possible exception of Jer 1^{1}, where the translation is inexact) *λόγος* is invariably used to denote the message which God revealed to the prophet that he might declare it to the people in His name. It may be noted that, in referring to the call of the Baptist—'the word of the Lord came unto John' (3^{2})—St. Luke uses *ῥῆμα*. The choice of *ῥῆμα* may be accidental; or he may have done so designedly to mark the contrast between the word that came to the Baptist and the word (*λόγος*) proclaimed and revealed by Christ.

At a very early date, if not at the very beginning of the Church, *ὁ λόγος* was used *κατ' ἐξοχήν* to designate the special revelation of grace given in and by Jesus Christ (Lk 1^{2}, Ac 4^{4} etc.). Our Lord appears to have so described His message (Mt 13^{20}, Mk 4^{14}). St. Mark thus summarizes the teaching of Jesus (2^{2}). At the institution of the diaconate the apostles characterize their own distinctive duty as a steadfast continuance in the ministry of the word (Ac 6^{4}); it is represented as the exclusive subject and substance of the proclamation of the early missionaries of the cross (Ac 8^{4} 17^{11} etc.); it is found in the earliest as well as in the latest of the Epistles of St. Paul (1 Th 1^{6}, 2 Ti 4^{2}). By describing the gospel in this way, the speakers or writers meant to imply that it was the perfect and authoritative word which was to supersede all other words that God had spoken to men. In relation to its origin it is the word of God (Lk 8^{11}, Ac 4^{31}, 1 Co 14^{36}, He 4^{12}, 1 P 1^{23}); in respect of its method of communication it is the word of hearing (1 Th 2^{13}, He 4^{2}); as to its nature it is the word of the kingdom (Mt 13^{19}), of truth (2 Ti 2^{15}), of life (Ph 2^{16}); it is pre-eminently the word of salvation (Ac 13^{26}), of reconciliation (2 Co 5^{19}), the word of the cross (1 Co 1^{18}). (See Cremer, *Bib. Theol. Lex.*^{4} pp. 392, 393; Trench, *N.T. Syn.* 289, 337). For Word in the personal sense see Logos.

John Patrick.

WORLD.—'The world,' in that meaning of the term from which others that are in use may be most clearly derived, denotes a system known to man through his senses, to which he himself on one side of his nature belongs, but from which, as a personal being, he can and usually does regard himself as distinct. It is a portion of the material universe, and may even stand for the whole of it where man's knowledge of nature is limited. It will be our chief aim in this article to examine the view taken in OT and NT of this material system, and of man's actual as well as his true relation to it.

i. In Old Testament.—תֵּבֵל, which is commonly rendered 'world' both by AV and RV, is not a word of larger meaning than אֶרֶץ 'earth'; indeed, so far as a distinction can be drawn between them, it has the narrower application. [Cf. art. Earth, and see esp. Pr 8^{31} תֵּבֵל אַרְצוֹ=RV 'his habitable earth,' also Job 37^{12}]. The two words constantly occupy the corresponding places in the parallelisms of Heb. poetry (Ps 19^{4} 24^{1} etc.). תֵּבֵל occurs only in poetry, and the word 'world' may have been thought to have somewhat more poetic associations, and have been adopted for this reason to translate it. [תֵּבֵל is never rendered by 'earth' either in AV or RV; אֶרֶץ is rendered by 'world' only at Ps 22^{27}, Is 23^{17} 62^{11}, and Jer 25^{26} in AV, and only at Job 37^{12}, Is 23^{17}, and Jer 25^{26} in RV. In these last two places 'earth' was reserved to tr. אֲדָמָה].

There is no single word in OT which describes the material universe, even as it was conceived by the Hebrews. The phrase 'heaven and earth' is used to convey that notion (Gn 1^{1}, Ps 89^{11}, Jer 10^{12} 51^{15} etc.). Both אֶרֶץ and תֵּבֵל are also distinguished from the seas or the sea (Gn 1^{10}, Ps 98^{7}).

Heaven and earth by their vastness and stability, and by the rich variety, excellence, and beauty of that which they contain (cf. the expression 'the fulness of the world' and 'of the earth,' Ps 50^{12} and 24^{1} etc., as also 'the sea and its fulness,' Ps 98^{7}); the sea kept under firm restraint for all its raging; the sun, moon, and stars observing their regular times and seasons, were felt to be constant witnesses to the power and wisdom of God, of Jehovah the God of Israel, who is the Creator and ruler of all (Am 4^{13} 5^{8}, Is 48^{13} 51^{13}, Jer 5^{22} 10^{12} 51^{15}, Ps 19^{1-6} $24^{1.2}$ 8. 33^{6-9} 29. 89^{11} 93. $95^{4.5}$ 104). To their testimony even the heathen might be expected to pay heed (see esp. Ps 19^{1-6}). In this sense even inanimate things praise God (Ps 96^{10-13} $98^{8.9}$ 148). Moreover, His care for His creatures was recognized, as shown in the regular provision which He has made for their sustenance. He is their guardian, the source of life and happiness to all living things (Gn 8^{22}, Ps 33^{5} 36^{5-9} 65^{5-13} $103^{4.\,5}$ 104^{27-30} 147^{8-17}, Job 10^{12}). But He was believed, too, to manifest Himself in a special manner in the more exceptional and terrible aspects of Nature, in storm and earthquake, in drought and pestilence. By means of these He had fought and was expected to fight on the side of His own people against their enemies (Ex 15, Jg $5^{20.\,21}$, Am $9^{5.\,6}$, Ps 18^{7-15} $48^{6.\,7}$ 68^{7-9} 76^{3-9} 77^{11-20} 78. 83^{13-16} 97^{3-6} 105. 106^{7-10} 111. 114. 144^{5-8}), or punished Judah and Israel (Am 4^{6-11}) or individuals (Ps 107) for their sins. Those proofs of His presence and operation which are regular, and those more unusual ones where there has evidently been some particular end in view, are remarkably brought together in some passages (Ps 74^{18-18} 89^{10-14} 136).

With the rise and development of the doctrine of WISDOM, interest in Nature was greatly stimulated, a more careful observation of particular facts, and even a certain kind of speculation upon her laws, were encouraged, but all under the guidance of a strongly religious spirit (Pr 8^{22-31}, Job 26^{7-14} 28. 36^{22}–39. 40^{6}–41. Comp. Wis 7^{17-22}, Sir 43. A similar bent may be noted in a work belonging to another class of literature, En. 72–82 and 2–5).

So far we have spoken of the impression made upon the minds of devout and inspired Heb. prophets, psalmists, and philosophers by the contemplation of that order of which the earth forms a part. But the earth itself was specially thought of by them as the spacious dwelling-place of mankind, divided into its many races, tribes, and kingdoms. [See such expressions as 'kingdoms,' 'peoples,' 'inhabitants' of 'the earth,' or 'the world,' Gn 22^{18}, Jos 4^{24}, 2 K $19^{15.\,19}$, Is $26^{9.\,18}$ 37^{20} etc.]. Hence, further, both תֵּבֵל and אֶרֶץ (ה) are used by themselves for mankind, which is capable of doing right and wrong and of knowing God, and which shall be judged by God (Gn 6^{11}, Ex 9^{16}, Nu 14^{21}, Gn 18^{25}, 1 S 2^{10}, Ps 2^{8}, Is 38^{11}, Ps 9^{8} 10^{18} 33^{8} 96^{13} etc.). But when we speak of mankind in these relations we must beware of thinking primarily of a collection of responsible individuals, as from our modern habits of thought we may be apt to do. In accordance with the point of view of the OT, 'the earth' in this use of the term must be understood to mean 'the nations of the earth'; the judgment of nations and the homage that should be paid by the nations generally to the God of Israel are intended in the passages in question. 'Earth' is also used in a sense akin to our phrase 'human society' in Ps 75^{3} ('the foundations of the earth'='the principles on which human society rests'; cf. Pr 30^{21}). In the following places, however, it seems to describe men as men—Jos 23^{14}, Is 24^{18-20} 26^{18}, Jer 50^{46} 51^{25}.

The last-mentioned use may possibly be associated with the idea of man's origin (Gn 2^{7} and 3^{19}, Ps 146^{4}), though it is to be remembered that in these places the words used are אֲדָמָה and עָפָר. But at Ps 10^{18} the expression אֱנוֹשׁ מִן־הָאָרֶץ 'mortal man from the earth' may most naturally be explained thus. The little value of man and his transitoriness are in this way brought home to the mind. No moral signification seems to attach to this 'earthiness' of man. It does not imply earthliness of aims and principles. On the other hand, a notion analogous to this is suggested in at least one passage (Ps 17^{14}) where another word חֶלֶד, sometimes translated 'world,' in sense of *time* (Arab. *khalada* 'abide,' 'endure') is used. [At Ps 39^{5} 89^{47} and Job 11^{17} it is rendered 'age,' 'time,' 'life'; but at Ps 17^{14} 49^{1} and Is 38^{11} (implying here חֶלֶד for חֶדֶל) 'world' both in AV and RV. In the former of these passages, however, 'mortals of time' would give a good sense]. An excessive devotion to the things of this present life, which are the things of sense, is here indicated such as to constitute a type of character. This is an interesting anticipation of NT thought. Another point of interest is the analogy between the use of חֶלֶד, a word denoting time, and the subsequent use of *αἰών*. Another word עוֹלָם, to the meaning of which *αἰών* still more closely approximates, is also translated 'world' at Ec 3^{11} AV and RV (not RVm). In later Hebrew it did bear at times this sense, but it is more than doubtful whether it has it here. (See esp. the commentaries of Nowack-Hitzig in the *Kurzgef. Com.*, and E. H. Plumptre, *in loc.*).

ii. APOCRYPHA.—In the Books of Wisdom and 2 Maccabees we are introduced to the important word *κόσμος* in the sense which it acquired among the Greeks through philosophic usage. The LXX of OT has the word, but only in its earlier meaning of 'adornment,' or as a rendering of צָבָא 'host' (Gn 4^{1}, Dt 4^{19} etc.); while אֶרֶץ and תֵּבֵל are there translated by *γῆ* and *οἰκουμένη* (אֶרֶץ almost always by *γῆ*, and תֵּבֵל by *οἰκουμένη*; there are, however, a few cases in which these renderings are interchanged, all in Isaiah). But in the Apocrypha, *i.e.* in the two books of the Apocrypha above mentioned, it occurs repeatedly as a name for the material universe, which is its most common signification there. The Most High is again and again described by such phrases as 'the Creator of the world,' 'the Ruler of the world.' For the word in this sense comp. Plato, *Gorgias*, 508; Aristotle, *de Mund.* 2. The thought of order, and of the beauty arising therefrom, which the word by its derivation suggested, is naturally associated with this application of it, and may well have been present to the mind of the author of the Book of Wisdom in his use of it at 11^{17}. Other passages, interesting in connexion with his view of the *κόσμος*, are 1^{14} and $7^{17\text{f}.}$. In 5^{20} and 16^{17} reference is made to the co-operation of the world, *i.e.* the forces of nature, in the work of moral retribution and the defence of the righteous, in full agreement with OT thought, though the language is somewhat different. Man's birth is described as an entry into the world, 7^{6} (some MSS, however, read *βίον*). The position assigned to him in it is, in accordance with Gn $1^{26.\,28}$, Ps $8^{6\text{f}.}$, that he should 'rule the world—*διέπῃ τὸν κόσμον*—in holiness and righteousness' (9^{3}). For this reason, too, it would seem, Adam is somewhat strangely called 'the first-formed father of the world' (10^{1}). But the world has, through human perversity, become the scene of idolatry and moral corruption, and therewith death has been admitted into it, though this is attributed to the envy of the devil (14^{12-31} 2^{24}, cf. Ro 5^{12}).

There does not seem to be a passage in which *κόσμος*, either in this book or in 2 Mac., denotes mankind exclusively, for at Wis 6^{24} where the world is said to be benefited by the large number of the wise, and at 14^{6} where the ark is spoken of as 'the hope of the world,' the whole of creation may be thought of as associated with men.

Before passing from the Apocrypha we may observe that in Wis 13^{9} there is a use of *αἰών* which may help to show how it came to have at times almost the sense of 'world.'

iii. NEW TESTAMENT.—We have noticed one or two places in the Book of Wisdom in which *κόσμος* appears to denote simply this earth and its inhabitants. Two interesting examples are referred to by Liddell and Scott (*sub voce*) of the use of the word in much the same way in public inscriptions of the end of the first or beginning of the 2nd cent. A.D. Nerva is called *σωτὴρ τοῦ πάντος κόσμου*, and Trajan *σωτὴρ τοῦ κόσμου*. See Boeck, *CIG* 1306, 334. In NT many more instances of its having this meaning will come before us, as well as of other meanings which arise out of this one. It is necessary to ask at once whether we ought to attempt to carry the original meaning of 'order' through all these applications of the word [Westcott, Comm. on *Gospel according to St. John*, Additional Note at end of ch. 1, on *κόσμος*, tries to do this]. Its sense is not anywhere restricted to denote the earth in classical literature. It is there used sometimes of the heavens alone; and indeed there is reason to think that the Pythagoreans, who are credited with having been the first who employed it to express a philosophical conception, applied it thus. And we can readily understand that the heavenly bodies with their regular motions might impress them with their order and beauty. The earth, too, might well come to be included under the term *κόσμος*, as forming one member of a great system in which there was true relation of parts. But it is not so easy to see how by itself it could have been regarded as 'an ordered whole.' It must be remembered that the ancient mind was not penetrated as the modern is with the thought of law in nature. On the other hand, the possibility that the 'cosmopolitanism' of the Cynics and Stoics influenced common speech is not to be overlooked. Yet it should be observed that their phrase *κόσμου πολίτης* had a different force from that which 'citizen of the world' has to our ears. In the mouth of the Stoic it expressed the conviction that the universal system and law, the polity of the great City of Zeus, in which every man had his own place, conditioned his life and determined his obligations. To the Cynic, on the other hand, —if we may take the passage in Lucian, *Βίων πρᾶσις* §§ 7–10, as a correct representation of the teaching of Diogenes and his school,—it meant, indeed, that he was unfettered by ties of country and could make his home anywhere, but the reason for this was that his life was composed of the simplest, most universal elements. The saying attributed to Socrates by Plutarch (*Περὶ Φυγῆς*, § 4, 600 f.)—that he was himself not Athenian nor Hellene, but citizen of the world (*κόσμιος*)—should also be compared, where in the context Plutarch quotes the saying of Plato that man is *οὐράνιος*. The use of *κόσμος* with that particular limitation of its meaning which we are considering may have been facilitated in a measure by this language of the schools. To a still greater degree, probably, it was due to the fact that the earth seemed, especially perhaps to the Hebrew mind, to be incomparably the most important part of the created universe, to which the heaven with its lights, properly speaking, belonged, as a canopy over it. But the question for us is, not so much what the history of this usage was, but whether the notion of order was usually present to the mind of those who employed it as the NT writers do. We can conceive that it might have been to that of St. Paul (cf. Ac 17^{24}), but it does not seem probable in the case of others, and indeed the idea is not suggested in connexion with the term *κόσμος* by any context in which it is used, even in St. Paul's Epistles. And when our world was viewed in its ethical aspects it seemed to Christian apostles to be, not a realm of order but a scene of disorder; and their teaching substantially is, that it could not be an order while God was left out of account, though there is no evidence that they formulated their thought to themselves exactly in this way.

We have seen what range of meaning אֶרֶץ and תֵּבֵל have in OT, and have observed that *γῆ* and *οἰκουμένη* are used in LXX to render them. In connexion with the meanings of *κόσμος* it is not unimportant to notice that there are in NT parallel or closely similar passages in one of which *γῆ* or *οἰκουμένη* is found, and in the other *κόσμος*. Comp. Mt 4^8 with Lk 4^5, Mt 24^{14} and 26^{13}, Mt 5^5 with Ro 4^{13}, Jn 3^{31} and 8^{23}. Yet, even though *κόσμος* at times seems to have much the same meaning as *γῆ* or *οἰκουμένη* in many passages of LXX, it was felt to be a preferable word for many purposes. In spite of the usage of LXX there was danger of confusion in employing *οἰκουμένη*, which was applied by Greeks and Romans specially to the Græco-Roman world. [This word occurs most frequently in the writings of St. Luke, and most often with the meaning just indicated]. *Κόσμος* may also more readily have suggested a comprehensive idea, so as to include more at least than *γῆ* did; it suggested the idea of a whole, if not necessarily of an ordered whole. The philosophical associations which still clung to the word also made it more suitable when the intention was to signalize certain principles which underlay and governed the entity in question. It may be observed that *οἰκουμένη* occurs but once in St. Paul's writings (Ro 10^{18}), and there in a quotation from LXX; *γῆ* also is met with there comparatively rarely.

We proceed to review the use of *κόσμος* in NT more in detail. Our object in doing so will be to mark differences between various writers, and also to some extent in the same writers, in the denotation of the term, and in the conception implied when that which is denoted is the same. It will be seen that there are instances in all the chief groups of writings of its standing for (1) the material universe, (2) our world as containing mankind, but without the connotation that the world or men have certain ethical characteristics. The ethical signification of the word appears to be confined to the Epp. of St. Paul, the Gospel and Epp. of St. John, the Ep. of St. James, and 2 Peter; though there is a possible exception when the kingdoms of the world and their glory are offered as a temptation (Mt 4^8), and the possession of the whole world is compared with the true interests of the soul (Mk 8^{36}, Mt 16^{26}, Lk 9^{25}); we may in these places be intended to gather that worldly dominion and wealth are even of themselves dangerous to the soul. Further, we ought to be better able to form for ourselves a clear and complete view of the conception as a whole presented in the teaching of NT and in individual writers, after marking aspects of it which are severally prominent in particular passages. The idea thus obtained we must take with us in order that we may fully feel the force of other passages. This is specially true in the case of St. John's writings. Thus, when in Jn 13^1 it is said that the hour had come that Jesus 'should depart out of this world unto the Father,' and that He had 'loved his own which were in the world,' some thought of what the world is must have been present to the mind of the evangelist. It is, moreover, obvious that where St. John uses the word in successive, or nearly successive, clauses or sentences—as he does again and again in chs. 14–17—though from each occurrence the same notion cannot be gathered fully, it would be a mistake to regard them disconnectedly. The word has one meaning in the thought of the writer, though he may not be equally conscious of all its elements at every moment, and though he is still less able to convey the whole of it at once to others, but lights up first this, then that part of it, after his characteristic manner.

1. The material universe, the heaven and earth which were created at the beginning, most frequently in the phrase *ἀπὸ καταβολῆς κόσμου*, or others similar to this, Mt 24^{21} 25^{34}, Lk 11^{50}, Jn $17^{5.24}$, Ro 1^{20}, Eph 1^4, 1 P 1^{20}, He 4^3 9^{26}. In Jn 11^9 we read of the natural light of this world; in 1 Co 8^4 14^{10} *ἐν κόσμῳ* seems to be equivalent to the Latin phrase *in rerum natura*.

1 Co 4^9 belongs, perhaps, here. Angels are added probably as distinguished from the world; men, on the other hand, as a particular and important part of it.

2. The earth, but rarely without reference to that which it contains, and especially to its human inhabitants.

(*a*) The scene of human life, the abode of mankind, Ro $5^{12.13}$, 2 Co 1^{12}, Eph 2^{12}, 1 Ti 1^{15} 6^7, He 10^5, 1 P 5^9, Jn 1^9 6^{14} 11^{27}, 1 Jn

$4^{1.9.17}$. In Jn 21^{25} little more seems to be implied than the extent of space included.

(*b*) The earth, together with all the treasures it contains, and including, no doubt, dominion over men, Mt 4^{8}, Mt 16^{26}=Mk 8^{36} =Lk 9^{25}, Ro 4^{13}, 1 Co 3^{22}.

(*c*) The scope appointed for the work of the missionaries of the gospel; it is to be preached throughout the world: Mt 5^{14} 13^{38}, Mt 26^{13}=Mk 14^{9}, Mk 16^{15}, Ro 1^{8}, Col 1^{6}, Ph 2^{15}, 1 Ti 3^{16}.

3. Idiomatic and peculiar uses—

(*a*) A rhetorical expression for the great majority of people in a particular place, as in French, 'tout le monde,' Jn 12^{19}.

(*b*) Equivalent almost to the modern phrase 'the public.' 'Show thyself to the world'='court publicity,' Jn 7^{4}, cf. 18^{20}.

(*c*) Means of sustenance for the body is called *βίος τοῦ κόσμου*, 1 Jn 3^{17}.

(*d*) 'The tongue a world of iniquity,' Ja 3^{6}.

(*e*) The world before the Flood, He 11^{7}, 2 P 2^{5} 3^{6}. The population of the world, then, and its accumulations of wealth and the products of its labour, are no doubt chiefly in view; yet the comparison in 2 P $3^{6.7}$ with 'the heavens and the earth that now are,' suggests a sweeping away at that time of the old order of nature.

4. The term used with ethical significance.

(*a*) As material and transitory the world presents a contrast with that which is spiritual and eternal. In this way St. Paul seems to regard it in the very important passages Gal 4^{3} 6^{14}, Col $2^{8.20}$. So we gather from comparing them together and from their contents (see Lightfoot, *in loc.*). The instances with which the apostle is dealing illustrate the general principle to which he refers. The Law and its ordinances belong to an external sphere. Now things outward (='the things that are seen' of 2 Co 4^{18}) have for St. Paul lost all their value through Christ's death, in comparison with the things spiritual, and this ought to be the case with all Christians. He is not thinking of the world as evil. Indeed the Law, which is 'of the world' in the sense defined, has been used by God for the rudimentary instruction and discipline of the Israelites, and so may other things which are of the world be used. Elsewhere, also, he allows for a certain use of them, which must, however, be sparing and kept in strict subordination to higher considerations, 1 Co $7^{31.34}$; cf. Lk 12^{30}. This view of the world is hardly to be traced in St. John's writings; a darker one appears, we shall find, there, upon which St. Paul dwells less.

(*b*) Devotion to the things of the world produces a certain temper of mind, which under the sense of loss is manifested in that 'sorrow of the world' which is not 'according to God,' 2 Co 7^{10}. There is a scale for estimating men and things, which may be in a measure true relatively to the things of this world, but which is, to say the least, altogether incomplete, 1 Co $1^{27.28}$ 4^{13}, Ja 2^{5}. The world has a fancied wisdom which does not know God, 1 Co $1^{20.21}$ 3^{19}, Jn 1^{10}; it cannot receive the Spirit of Truth, Jn 14^{17}. There is, in short, a spirit of this world, 1 Co 2^{12}. Those in whom this spirit is are described as being 'of the world' or 'of this world' (Jn 8^{23}, 1 Jn $4^{4.5}$); and, by contrast, Christ's disciples as 'not of the world' (Jn 15^{19} 17^{14}; cf. also 1 Co 5^{10} and 11^{32}).

The state of the world arising from the influence of this spirit is one of dire moral corruption, Eph 2^{2}, 1 Jn $2^{15.17}$, Ja 1^{27} 4^{4}, 2 P 1^{4} 2^{20}.

(*c*) The world denotes the mass of men who are hostile to the truth and to the followers of Christ, or at least indifferent to it and them, Jn 7^{7} $16^{20.33}$, 1 Jn $3^{1.13}$ $4^{4.5}$.

(*d*) The world is dominated by the Evil One, Jn 12^{31}, 1 Jn 4^{4} 5^{19}.

(*e*) The world as the object of judgment and of saving mercy, Ro $3^{6.19}$ $11^{12.15}$, 1 Co 6^{2}, 2 Co 5^{19}, Jn 1^{29} 3^{16-19} 4^{42} $6^{33.51}$ $8^{12.26}$ 9^{5} $12^{46.47}$. Primarily, of course, men are the objects of judgment, and that individually. But this is not all that is meant. In view of the general use of the term *κόσμος* and of OT language, we must think, also, of a judgment upon mankind collectively, and on the manner of life and environment which it has made for itself, and in a sense, too, on the whole creation with which it is so intimately connected; and so also with regard to salvation (cf. Ro $8^{19f.}$).

(*f*) The Holy Spirit has a special office in regard to the world, distinct from that which He exercises towards believers (Jn 16^{8-11}).

(*g*) The Christian can through his faith overcome the world; *i.e.*, no doubt, alike its spirit in himself, the opposition of worldly men, and the world's ruler (1 Jn 4^{4} $5^{4.5}$).

5. The word *αἰών*—which signifies properly a period of time, but a much longer one than we mean by an age, probably indeed the whole period during which the present order of nature has continued and shall continue—is used in many places with much the same connotation as 'world.' It is often rendered by this word both in AV and RV, though by 'age' in RVm and at He 6^{5} in RV. *Αἰών* and *κόσμος* are brought into close connexion at 1 Co 1^{20} and Eph $2^{2.3}$. This 'æon' is contrasted with that which is to come (Mt 12^{32}, Mk 10^{30}, Lk 18^{30}, He 6^{5}). We read of its cares (Mt 13^{22}=Mk 4^{19}); its sons (Lk 16^{8} 20^{34}); its rulers, *i.e.* the kings and great ones of the earth (1 Co $2^{6.8}$); its wisdom (1 Co 1^{20} 2^{6} 3^{22}); its fashion, to which the Christian must not be conformed (Ro 12^{2}). It is evil (Gal 1^{4}), and under the dominion of the Evil One (2 Co 4^{4}). This use of *αἰών* with an ethical signification is not difficult to understand, easier indeed than the corresponding and commoner one of *κόσμος*. It is otherwise with the expression at He 1^{2} *ἐποίησεν τοὺς αἰῶνας*. Here *οἱ αἰῶνες* seems to mean 'the sum of the "periods of time," including all that is manifested in and through them' (see Westcott, *in loc.*). But to regard creation primarily with reference to time, and not merely to time as a general condition, but to periods of time, is not natural for us; it would seem to have been more so for the Hebrew mind (cf. the Rabbinic use of עוֹלָם). It may be worth while to note that the original sense of the Eng. word 'world' by its derivation is 'age of man.' In the Gospel and Epp. of St. John and the Apocalypse *αἰών* occurs only in the phrase *εἰς τὸν αἰῶνα* and similar expressions.

The conception of the world which we have been considering is characteristic of Christianity. There is nothing like it in the philosophy or religion of Greece and Rome. It differs widely also from the belief found in the various forms of Gnosticism, in Manichæism, or Neoplatonism, and in Oriental systems to the present day, that matter is essentially evil, or necessarily at best a hindrance and burden to the spiritual nature. From the Christian point of view things material constitute indeed a grave danger owing to the misleading fascination which they have for the minds of men, strengthened, as it is, through the subtle influence of habits of thought and opinions which have grown up in human society, and which are based upon a false estimate of the value of the wealth and honours of this world. To such an extent are men governed by wrong motives and aims in this respect, that any one who, with singleness of purpose, sets himself to act with reference to God and His glory is likely to feel himself more or less alienated from and placed in a position of antagonism to his kind. The little handful of Christians in the first age must have experienced this sense of estrangement with peculiar acuteness. But at the same time they had been taught, and they believed, that the world in its origin came from God, and also that, bad as its present condition was, it was salvable—that alike the men who are of it and the things that belong to it may be redeemed from sin and sinful uses and consecrated to the glory of God.

In conclusion, we may observe that the order of nature is appealed to in NT as well as in OT in proof of the existence, the power, and the goodness of God (Ac 14^{17}, Ro 1^{20}), but the same stress is not laid upon the more exceptional phenomena as signs of His presence.

LITERATURE.—Art. on *κόσμος* in Cremer's *Bibl.-theol. Lexicon*; Westcott's *Commentary on St. John*, Additional Note at end of ch. 1.

V. H. STANTON.

WORM.—The following Heb. words are tr. 'worm' in AV. 1. סָס *ṣāṣ*, *σής*, *tinea* (Is 51^{8}), is undoubtedly the same as the Arab. *sûs*. It is the grub of the moth, *'âsh*, Arab. *'uth*, mentioned in the same passages. See MOTH. 2. רִמָּה *rimmāh*= maggots, bred in putrefying vegetable (Ex 16^{24}) and animal (Job 7^{5} 17^{14} 21^{26} 24^{20}, Is 14^{11}) substances. Once man is declared to be such a maggot (Job 25^{6}). 3. תּוֹלֵעָה *tôlē'āh*, תּוֹלָע *tôlā'*, תּוֹלַעַת *tôla'ath*: (*a*) a maggot, generated in putrefying vegetable (Ex 16^{20}) and animal (Is 14^{11} 66^{24}) substances; (*b*) a worm which gnaws and blights plants (Dt 28^{39}, Jon 4^{7}). The number of these is very large in the Holy Land; (*c*) figuratively to denote the weakness of man (Job 25^{6}, Ps 22^{6}, Is 41^{14}). תּוֹלָע and תּוֹלַעַת are used also of the *coccus* (see CRIMSON, SCARLET). Earth worms do not seem to be included in the meaning of any of the above names. The term 'worms' (AVm 'creeping things,' RV 'crawling things') of the earth; זֹחֲלֵי אֶרֶץ, LXX *σύροντες γῆν* (Mic 7^{17}), is probably generic for all reptiles and worms which burrow in the ground. It certainly does not refer to any genus or species. The worms of which Herod died (*σκώληξ*, Ac 12^{23}) may have been maggots bred in a gangrenous mass. Josephus says that he died five days after he was smitten. *Σκώληξ* is also mentioned in Apocr. (Sir 10^{11} 19^{3}, 1 Mac 2^{62}).

G. E. POST.

WORMWOOD (לַעֲנָה *la'ănāh*).—A generic word for the species of *Artemisia*. It is always spoken of as a bitter and deleterious plant. The root, in Arab. and perh. in Heb., signifies 'to curse.' *La'ănāh* is mentioned with gall (*rôsh*, Dt 29^{18}, Jer 9^{15} 23^{15}, La 3^{19}, Am 6^{12}). It is the summing up of the career of a strange woman (Pr 5^{4}). Figuratively it signifies calamity (La 3^{15}) and injustice (Am 5^{7}). The great star which fell from heaven (Rev 8^{11}) is called 'Wormwood' (Ἄψινθος). In point of fact, the excessive dread which the Hebrews had of most bitter substances was founded not on clinical experience but on prejudice. Camels, at least, eat more or less of the species of *Artemisia*, of which there are five in Palestine and Syria, all known in Arabic by the name *bu'aiterân*. They are *A. monosperma*, Del. (Arab. *'adâh*), *A. Herba-Alba*, Asso. (Arab. *shîḥ*), *A. Judaica*, L., *A. annua*, L., and *A. arborescens* (Arab. *dhoḳn-esh-sheikh*). They are composite plants, mostly of the interior tablelands, esp. of the deserts. Their growth in desolate places, added to their bitterness, gave them their bad reputation. G. E. POST.

WORSHIP, both as subst. and verb, was formerly used of reverence or honour done to men as well as to God, and so occurs in Lk 14^{10} 'then shalt thou have worship in the presence of them that sit at meat with thee' (δόξα, RV 'glory'). The word is a contraction of *worthship* (from Anglo-Sax. *weorth* 'worth,' with the suffix *scipe*, Eng. *ship*, Ger. *schaft*, akin to *shape*). It is used of men in earlier versions frequently. See Driver, *Par. Psalt. s.v.* for the Pr. Bk. Psalms. Cf. also for the subst., Wyclif, *Works*, iii. 156, 'Men abstenen in werre, with myche fastyng and peyne, to wynne worschip of the worlde and to anoye hir enmyes'; Nu 24^{11} Tind. 'I thoughte that I wolde promote the unto honoure, but the Lorde hath kepte the backe from worshepe'; Job 14^{21} Cov. 'Whether his children come to worshipe or no, he can not tell.' And for the verb, Jn 12^{26} Wyc. 'If ony man serue me, my fadir schal worschip hym'; Pr. Bk. *Marriage Service*, 'With my body I thee worship.' J. HASTINGS.

WORSHIP (IN OT).—See PRAISE (IN OT) and TEMPLE.

WORSHIP (IN NT).—Christian worship grew out of the Jewish synagogue worship, to which, in its early forms, it bore considerable resemblance. Our Lord with His disciples visited the synagogues at Capernaum (Mk 1^{21} 3^{1}) and Nazareth (Mk 6^{2}); and, as He preached in the synagogues of Galilee generally (Mk 1^{39}, Lk 6^{6}), He must have taken part in the public worship. When St. Paul was on his missionary tours he invariably sought out the synagogue, or, if that were wanting, the *proseuché* (Ac 16^{13}), no doubt joining in the Jewish worship. See SYNAGOGUE. It was only by degrees that Christian worship came to supersede synagogue worship in the Church. At first the meetings of the Christian brotherhood, which of course were held in private, were quite distinct from the Sabbath worship, and Jewish Christians would go to the synagogue on the Saturday and to their own meeting on the Sunday. The Epistle of St. James seems to imply that the community there addressed consisted of the worshippers in some synagogue who had accepted Christianity as a body, and who then continued to meet in the building, but as a Christian Church, so that the writer, referring to the place of worship where the Church assembled, could call it 'your synagogue' (Ja 2^{2}; but von Soden understands the word συναγωγή here to mean 'assembly,' see *Hdcom. in loc.*; Bennett allows that it may mean the Jewish place of worship 'if the Epistle is very early,' though preferring 'assembly' as RVm, see *Century Bible, in loc.*). The separation of Christian from Jewish worship was brought about under various influences, viz. (1) Jewish antagonism, leading to the expulsion of the Christians from the synagogue; (2) Church development, giving more importance to the worship carried on in the Christian assembly and stamping it with an individual character, thus rendering attendance at the Jewish synagogue superfluous and incongruous; (3) the conversion of the heathen on the lines of Pauline liberalism, dispensing with circumcision, so that the Gentile Christians could not be regarded as proselytes to Judaism. As these free Hellenistic Christians increased in number, and before long became the majority of the Apostolic Church, the necessity for maintaining Christian worship quite apart from the synagogue would be apparent to all but the narrow Judaizers.

i. TEACHING AND PRACTICE OF JESUS CHRIST.—The only worship that our Lord expressly required was private worship, as when He warned His disciples against the Pharisaic ostentation of praying 'in the synagogues [private prayers] and in the corners of the streets,' and bade them enter their 'inner chamber' and pray to their 'Father which is in secret' (Mt 6^{6}). His teaching about prayer deals with the subject of personal prayer, encouraging individual faith with regard to specific petitions (*e.g.* Lk 11^{5-13}). In one place He commends the united prayer of two persons for a common end (Mt 18^{19}); but this refers to a special emergency, and has no bearing on public worship. On the other hand, He assumed that His disciples took part in public worship; He did not need to command a universal practice which He sanctioned by Himself following it. Whenever our Lord's own praying is referred to, this is not connected with public worship. Most frequently it is associated with mountain solitude. In this worship He was either entirely alone or praying by Himself in the presence of disciples rather than praying with them. Still, is it quite accurate to say that He never prayed together with other men? Must He not have done this in the synagogue? The incident of the woman of Samaria contains His most significant utterance on the subject of worship, in which He denies the peculiar efficacy of sacred places (Jerusalem claimed by the Jews, Gerizim claimed by the Samaritans), and affirms that, for the future, worship must be 'in spirit,' *i.e.* internal, not merely in external functions, and 'in truth,' *i.e.* in accordance with the nature of God and our true relations with Him as at once 'Spirit' and 'Father' (Jn $4^{23.24}$). That this teaching influenced the Church, rendering the dedication of sacred buildings superfluous, is apparent from Justin Martyr's answer to Rusticus (*c.* 165 A.D.) who had inquired, 'Where do you assemble?' Justin said, 'Where each one chooses . . . because the God of the Christians is not circumscribed by place; but, being invisible, fills heaven and earth, and everywhere is worshipped and glorified by the faithful' (*Martyrdom*, 2).

ii. APOSTOLIC TEACHING AND CUSTOM.—As the Church gradually emerged from the synagogue, specific Christian worship, as distinguished from the customary Jewish worship, came to be shaped on lines indicated by the principles of the new faith.

(*a*) *Times.*—The NT contains no regulations concerning stated days and hours for worship. In so far as Jewish Christians still followed the law and customs of their people, they observed the Sabbath and the great feasts. St. Paul frequented the synagogues on the Sabbath (*e.g.* Ac $13^{14.44}$ 16^{13} 17^{2}); much more must this have been the case with less liberal Jews in the Church. St. Paul also took some account of the annual festivals, *e.g.* desiring to be at Jerusalem for the

Pentecost (Ac 20^{16}, 1 Co 16^{8}). But he held himself to be free from any obligation in regard to sacred seasons, and never laid any such obligation on his converts, even bidding the Colossians let no man judge them 'in respect of a feast day or a new moon or a Sabbath-day' (Col 2^{16}). The Galatians are rebuked because they 'observe days, and months, and seasons, and years' (Gal 4^{10}). But, while no especial sanctity of seasons was recognized by St. Paul, of necessity a certain periodicity was requisite for public worship in the Greek as well as in the Jewish Church. At Jerusalem, over and above the temple worship, which they shared with other Jews, the disciples had their own private assembly. As no mention is made of their attendance at the synagogue, though the temple is named, it seems probable that they gave up this custom in Palestine—perhaps from the time when Jesus was expelled from the synagogue. Thus a necessity would arise to institute some worship in its place. But that was never done formally, nor did it come about suddenly. The Christian worship arose from another cause; it grew out of the fellowship of Christian brotherhood. The origin of this worship is indicated in the statements that the new converts—doubtless associated with the older Christians—'continued steadfastly in the apostles' teaching and fellowship (κοινωνίᾳ), in the breaking of bread and the prayers' (Ac 2^{42}); that 'day by day, continuing steadfastly with one accord in the temple, and breaking bread at home, they did take their food with gladness and singleness of heart, praising God,' etc. (v.^{46}). This seems to imply a daily meeting, which must have been early in the morning or at night, so as not to interfere with the common work of life. Probably the statement applies only to the time of primitive enthusiasm. We meet with nothing of the kind later. The custom of the Church, both Jewish (cf. Jn 20^{19} and v.^{26}) and Greek (Ac 20^{7}; 1 Co 16^{2}), was to meet on the first day of the week. See LORD'S DAY. The NT contains no reference to any yearly Christian festivals. The Paschal controversy in the 2nd cent. reveals a very early practice of keeping Easter, and Polycarp's association with St. John seems to connect this with apostolic times, especially as the apostolic precedent is cited. Irenæus states that Polycarp, visiting Rome in the time of Anicetus (*c.* 155 A.D.), 'had always observed it [*i.e.* on the 14th Nisan, the date in dispute] with John, the disciple of our Lord, and the other apostles with whom he had associated' (Euseb. *HE* v. 24). But the identification of the date with the Passover—the very question discussed by Polycarp—points rather to St. John's Jewish custom of keeping the Passover than to the institution of Easter as an independent Christian festival. It indicates that, in late apostolic times, the surviving apostles, being Jews, when they kept the Passover, associated this with our Lord's last Passover, and so with His death and resurrection. Similarly, the Pentecost continued down from Jewish times as a Jewish festival adopted by the Church to commemorate the gift of the Holy Spirit as late as the 2nd cent. (Tertullian, *de Idol.* c. 12; *Const. Apost.* v. 20). Subsequently it was divided into the feast of the Ascension and Pentecost proper (Whitsunday), and lost its Jewish associations. Epiphany was not known till the end of the 2nd cent. (Clem. Alex. *Strom.* i. 21), and then as a Gnostic festival, Christmas appearing still later.

(*b*) *Places.*—The Jerusalem Christians worshipped 'in the temple' (Ac 2^{46}). This would be in common with other Jews and according to Jewish custom. The prayer would be private and personal—like the prayers of the Pharisee and the publican in the parable. Similarly, when 'Peter and John were going up into the temple at the hour of prayer, being the ninth hour' (Ac 3^{1}), this must have been for private prayer. There could have been no public Christian worship there. If the phrase κατ' οἶκον (2^{46}) should be rendered 'at home,' as in RV, this would not point to Church fellowship as in AV, where we read 'from house to house.' But when the Christians met at Jerusalem it was in a private house, using an 'upper room' (ὑπερῷον, Ac 1^{13}), perhaps the same room as the 'guest chamber' (κατάλυμα), also called 'a large upper room' (Lk 22$^{11.12}$), in which Jesus took the Last Supper with His disciples. When St. Peter was liberated from prison, he went to the house of Mary, the mother of Mark, and found *many* gathered together there praying (Ac 12^{12}). The word 'many' does not suggest that the whole Church was there assembled. But the Church could only meet in such a place. There were no buildings for Christian worship before the end of the 2nd cent. (see Schaff, *Ante-Nicene Christianity*, i. p. 199). St. Paul frequently refers to the Church in a house (Ro 16^{5}, 1 Co 16^{19}, Col 4^{15}). Once only, and that as late as the Pastoral Epistles, do we meet with the expression 'the house of God' (1 Ti 3^{15}); but probably the word 'house' here means 'family' (cf. 2 Ti 1^{16}, Tit 1^{11}. See von Soden, *Hdcom. in loc.*).

(*c*) *Persons.*—The apostles naturally took the lead in conducting public worship when they were present. It would appear that, at Troas, St. Paul conducted the Lord's Supper, himself breaking the bread (Ac 20^{11}). This is the only passage in the NT in which the distribution of the elements by any person, other than our Lord Himself, is mentioned. Elsewhere, the references to the Lord's Supper, in apostolic times, simply tell us of the Christians partaking of it together. The NT references to the functions of Church officers are confined to administration, discipline, and teaching; they are silent in regard to worship. From the fact that the bishops took the lead in the worship of the sub-apostolic age, we may conclude that the elders in the Jewish Churches, and the bishops in the Greek Churches of NT times, had some pre-eminence in the conduct of worship. But from the example of Corinth—the one Church concerning the internal life of which we have any fulness of information—it is apparent that this was not always the case; for 1 Cor. shows that there it was open to any member of the assembly to offer prayer or give utterance to a hymn of praise or a message of exhortation, even women praying and prophesying. If there were any who were more especially looked to for these offices they were the prophets (1 Co 14^{29}), not the bishops, and the *Didaché* makes it certain that these were different persons. That, too, is apparent from Eph 4^{11}, where the bishops must be looked for among the 'pastors' rather than among the 'prophets.'

(*d*) *Method.*—The proceedings of the best-known Church—that at Corinth—suggest that there was no settled order for the conduct of public worship in the apostolic Churches. It would not be safe to treat this one Church as typical of all other Churches, especially as St. Paul has occasion to rebuke its irregularities. Still, in doing so, he lays down no rules beyond that of mutual deference (1 Co 14^{30}); nor is anything approaching a rubric, except that of the Lord's Supper, to be found in the NT, or in any primitive Church writing, earlier than the *Didaché*. It is probable that, throughout the apostolic age, the worship of the Church was always centred in the Lord's Supper, combined with the Agapé. St. Paul gives directions for the conduct of the Lord's Supper on the authority of Christ, from whom the particulars concerning the institution of the ordinance had come down to him (1 Co 11^{23-28}). The rest of the service seems to have been left to the impulses of individual members as they felt moved by the Spirit (McGiffert, *Apostolic Age*, p. 520 ff.). If, however, the Christians met twice in the day, it is probable that the morning assembly was for prayer and praise, and the evening meeting for the Agapé, the arrangement we find in Bithynia in the reign of Trajan (*c.* 112 A.D.). Pliny writes, 'It was their habit on a fixed day to assemble before daylight and sing by turns a hymn to Christ as a god.' He adds that they 'bound themselves with an oath . . . not to commit theft,' etc., and says, further, 'After this was done, their custom was to depart, and meet together again to take food,' etc. (*Ep.* x. 96). The following functions would certainly be found in the primitive Christian worship: (1) Prayer (1 Co $14^{14.\ 15}$). (2) Praise, either by individual utterance (v.^{26}), or in hymns sung in common. The example of their Lord would encourage the early Christians to employ the Jewish Psalter, which appears to have been always used in the Church (Mt 26^{30}). Then we have fragments of Christian hymns scattered over the NT (*e.g.* Ac 4^{24-30}, perhaps Eph 1^{3-14}, 5^{14}, 1 Ti 3^{16}), especially those of the Apocalypse (4^{8-11} $5^{9.\ 10.\ 12.\ 13}$ 7^{12} 11^{17} 12^{10-12} $15^{3.\ 4}$ $19^{1.\ 6.\ 7}$). The Canticles in St. Luke—the *Magnificat* (1^{46-55}), the *Benedictus* (vv.$^{68-79}$), the *Gloria in Excelsis* (2^{14}), and the *Nunc Dimittis* (2^{29-32})—though possibly of pre-Christian origin, were probably found by the evangelist in use in the worship of the Churches, together with more specially Christian hymns. The passage from Pliny's letter, cited above, shows that in Bithynia, early in the 2nd cent., the singing was antiphonal (*carmenque . . . dicere secum* vicissim). See HYMN. (3) Lessons. St. Paul's frequent allusions to the OT, even in letters to Greek Churches, presuppose a knowledge of the LXX among his readers. This would be read in Christian worship after the analogy of the synagogue, though perhaps the Law would be omitted and preference would be given to Messianic prophecies. Possibly, *logia* of Jesus were also read and facts of His life recited. St. Paul expected his Epistles to be read in the meetings of the Churches (1 Th 5^{27}, Col 4^{16}), but only the OT was treated as Scripture. (4) Prophecy. The inspired utterance, so named, came from any member of the Church who felt the afflatus of the Spirit (1 Co 14^{1}), though it was especially expected from those who were recognized as prophets (v.^{29}). The Thessalonians were warned not to check this gift or despise the exercise of it (1 Th 5^{20}). But they were to use their own intelligence, accepting the good and rejecting what did not approve itself to their judgment (v.^{21}). (5) Other gifts—tongues, exorcism, etc. (6) Contributions. The Corinthians were to put by, on the first day of each week, their contribution towards the fund for the poor of Jerusalem (1 Co 16^{1}). St. Paul's language implies, not that they were to bring it to the assembly every week, but that they should make up an amount at home by weekly instalments. The gifts for the Agapé, however, would be brought every week, and the apostle requires them to be divided among the brethren. Out of this subsequently grew the communion collections, which were sent to the poor, the sick, and confessors in prison (Justin Martyr, 1 *Apol.* 65–67).

(*e*) *Object.*—Christian worship in NT times is usually offered to God as Father through Jesus Christ as His Son (see Ro 1^{8}, Eph 1^{3} 3^{14}). The Aramaic 'Abba' appears to have been adopted by Greek-speaking Christians as the peculiar title for God in the Churches (see Ro 8^{15}). But, while this was the normal type, worship was sometimes offered to Christ and prayer addressed to Him. Some indefiniteness attaches to this subject, partly owing to the two senses in which the Gr. word *προσκυνεῖν* is used, and partly owing to the ambiguous usage of the title *κύριος*. Liddon claimed many instances of the worship of Jesus during His earthly life, mostly on the strength of the use of the word *προσκυνεῖν* in the Gospels, viz. Mt 2^{11} 8^{2} 9^{18} 14^{33} 15^{25} $17^{14.\ 15}$ 20^{20} $28^{9.\ 17}$, Lk $7^{37.\ 38}$ $17^{15.\ 16}$ $24^{51.\ 52}$, Jn 9^{35-38} $20^{17.\ 28}$ (*Bampton Lectures*, 1866, vii. 1). But it cannot be proved that in any of these cases (except the last, and there the word 'worship' is not used) more than an act of homage and humble obeisance is intended. Josephus uses the word *προσκυνούμενοι* of the high priests (*BJ* IV. v. 2). In the second case cited (Mt 8^{2}), which occurred quite early in our Lord's public ministry, it cannot be supposed that the leper actually offered Divine honours to Christ. The physical act of prostration in profound humility, and as rendering great honour, is all that can be meant. In another case (Mt 17^{14}) the word *προσκυνεῖν* is not used, but we have *γονυπετῶν* (kneeling). Still it is to be observed that this homage was reserved for Christ alone, being repudiated by St. Peter (Ac $10^{25.\ 26}$) and by the angel in the Apocalypse before whom St. John had prostrated himself (Rev $22^{8.\ 9}$). The homage offered to Christ would vary in its significance from the simple prostration of the leper before the Great Healer to the adoration of Mary Magdalene and Thomas in presence of the risen Christ, its significance depending wholly on the idea of His nature that had been attained, and therefore not to be determined by the mere statements of the outward acts which we find in the Gospels. It is inappropriate to introduce the case of the dying malefactor (Lk 23^{42}) as an instance of prayer to Christ (Liddon). This was a simple request without the element of worship.

But one effect of the resurrection was to develop so exalted a conception of Christ in the Church that homage which cannot be distinguished from worship came to be addressed to Him. Thus Ananias of Damascus, when addressing Jesus in a vision (since it was in a vision, we cannot cite this as an act of prayer to Christ, because, in this vision, Jesus appears to Ananias and a conversation takes place), describes Christians as 'all that call upon thy name' (Ac 9^{14}; cf. v.^{21} 'them which called on this name'). The same expression is used by St. Paul (1 Co 1^{2}). The form of words is a Hebraism, used in the OT of the worship of Jehovah—קָרָא בְּשֵׁם יְהֹוָה (Gn 4^{26} 12^{8}, 2 K 5^{11}), and St. Paul cites an OT passage where it occurs with reference to God and applies this to Christ (Ro 10^{13}). St. Stephen commends his spirit to Jesus, and prays to Jesus as Lord for the pardon of his enemies, in language closely resembling that which Jesus addressed to God (Ac $7^{59.\ 60}$, cf. Lk $23^{34.\ 46}$). St. Paul refers to Jesus Christ in association with 'God himself' as exercising a directing Providence for the help of which he prays (*e.g.* 1 Th 3^{11}, 2 Th $2^{16.\ 17}$, Ph 2^{19}). Various forms of benediction imply a reference to Christ (*e.g.* Ro 16^{20}, 1 Co 1^{3}). St. Paul writes of praying to 'the Lord,' evidently meaning Christ, but in language which suggests an allusion to the Jewish thought of Jehovah (*e.g.* 2 Co $12^{8.\ 9}$). The author of Hebrews claims for Christ OT language referring to the worship of God (He $1^{6.\ 10-12}$). According to the Fourth Gospel, 'all men are to honour (*τιμῶσι*) the Son, even as they honour the Father' (Jn 5^{23}). In the Apocalypse, direct worship is offered to Christ as 'the Lamb.' The prayers of the saints are presented to Him (Rev 5^{8}), and hymns are sung in honour of Him (vv.$^{9.\ 11.\ 12}$). In the sub-apostolic age prayer is usually offered to God through Christ, rather than directly to Christ Himself (*e.g. 1 Clem.* 59–61; *Didaché*, 9, 10); but Ignatius (*ad Rom.* 4) and Polycarp (*ad Phil.* 1, 12) use the language of prayer concerning Christ; and the ancient homily, called *2 Clement*, begins, 'Brethren, we ought so to think of Jesus Christ as of God' (see Harnack, *Hist. of Dog.* I. iii. 6).

According to Pliny, the Christians were in the habit of meeting to 'sing a hymn to Christ as God' (*carmenque Christo quasi deo dicere,—Ep.* x. 96). There is no indication of saint-worship or of the adoration of the Virgin Mary in the NT; nor do we there meet with the distinction between the *adoration* (λατρεία) due to God alone, and the lower form of prayer to saints (δουλεία, *invocatio*) observed from the time of Augustine. St. Paul rebukes the worship of angels, associated with Jewish Gnosticism (Col 2^{18}).

W. F. ADENEY.

WOT.—See WIT.

WRATH.—See ANGER.

WRESTLING is twice referred to in EV of OT and once in NT. The Heb. terms are—1. אבק (in Niph.),* of Jacob's wrestling at Peniel, Gn $32^{24.25}$ (LXX παλαίω). On the word-play between *ne'ĕbaḳ* and *Jabboḳ* see vol. ii. p. 530^a, note †. **2.** פָּתַל, in Rachel's saying: 'With mighty wrestlings (*naphtûlîm*) have I wrestled (*niphtalti*) with my sister and have prevailed,' whence she is said to have given to Bilhah's son the name NAPHTALI, Gn 30^8. The word means '*twist* oneself' without being specifically confined to wrestling.

Wrestling, which was a familiar spectacle at the games in any Greek city, supplies a metaphor to St. Paul in Eph 6^{12} 'For our wrestling is not against flesh and blood,' etc. (ὅτι οὐκ ἔστιν ἡμῖν [*v.l.* ὑμῖν] ἡ πάλη πρὸς αἷμα καὶ σάρκα, κ.τ.λ.). For a description of wrestling contests see Smith's *Dict. of Gr. and Rom. Ant.*, *s.v.* 'Lucta.'

WRITING.—i. THE ANTIQUITY OF WRITING. —The practice of writing in the countries of the nearer East goes back to a remote and indefinite antiquity. Looking only at the nations connected in some measure with Palestine, we find evidence of the use of written characters at a date far earlier than the beginnings of anything that can be called definite Hebrew history. In Egypt, inscriptions have been found containing the name of Menes, the first king in the first dynasty known to subsequent Egyptian chroniclers, whose date cannot be much later (and may be earlier) than B.C. 5000, while other inscriptions are believed to belong to yet earlier rulers. These are inscribed upon stone: the earliest extant example of writing upon papyrus is one found at Sakkara in 1893, containing accounts dated in the reign of Assa, the last king of the 5th dynasty (*c.* 3580–3536 B.C.). To the same date purports to belong the first recorded literary composition in Egypt, the Proverbs of Ptah-hotep, preserved in the Papyrus Prisse, though the papyrus itself is of a much later date (*c.* 2500 B.C.). In Babylonia, inscriptions are extant of Sargon I., who flourished about B.C. 3750; while the thousands of tablets found at Telloh prove the free use of writing among the Sumerian inhabitants of Babylonia at an even earlier date, which cannot be placed lower than B.C. 4000. From Palestine itself we have no remains of so early a period; but the tablets of Tel el-Amarna (see § iii.) include several letters written by the governors of cities in Palestine to their masters in Egypt in the 15th cent. B.C.; and recent excavations at Knossos in Crete have brought to light a large quantity of inscribed tablets, partly hieroglyphic, but mainly linear in script, in characters as yet undeciphered, which must also be assigned to about the middle of the second millennium B.C. How far these are to be regarded as the ancestors of Greek writing is a point still undetermined; but they complete the proof that in the countries surrounding Palestine, and probably also in Palestine itself, writing was an art well known and familiarly practised for many centuries before the earliest examples of Hebrew writing at present extant.

LITERATURE.—Arts. BABYLONIA, EGYPT, above; Petrie, *Royal Tombs of the First Dynasty at Abydos*, 1900, *Hist. of Egypt*, i. 81; L. W. King, *Encyc. Bibl.* i. 439–442; A. J. Evans, *Annual of the British School at Athens*, 1899–1900, pp. 55–63.

ii. MATERIALS.—Many materials were used in Palestine and the adjoining countries for the reception of writing at various times. (*a*) **Stone** is almost everywhere the earliest material on which writing has come down to us. The earliest inscriptions in Egypt and Babylonia are on stone. Stone is also used for the Hittite inscriptions in northern Syria and Asia Minor; and in Palestine itself the earliest considerable examples of writing are the MOABITE STONE and the SILOAM inscription (see § iii.). The Hebrew books, moreover, mention the use of stone in the earliest periods of their history. The Law given to Moses on Mt. Sinai is said to have been written on 'tables of stone' (Ex 31^{18} $34^{1.28}$). Moses commanded the people, when they passed over Jordan, to set up great stones, covered with plaster, and to write the Law upon them (Dt $27^{2.3}$, cf. Jos 8^{30-32}). Job desires that his words might be graven in the rock for ever with an iron pen and lead (Job 19^{24}). In Phœnicia and Greece, similarly, the earliest extant examples of writing are inscriptions upon stone. (*b*) **Clay** was used predominantly in Assyria and Babylonia, the records and literature of which countries have come down to us mainly in the form of tablets of clay, on which characters in cuneiform writing have been inscribed while it was soft (see BABYLONIA). The discovery at Tel el-Amarna, in Upper Egypt, of similar tablets, containing the correspondence of the governors of the Syrian provinces and others with their Egyptian masters (see § iii.), shows that this kind of writing was the normal form of official correspondence between Egypt and Syria, at any rate in the time of the 18th dynasty (*c.* 1400 B.C.). The Knossian tablets also are of sun-baked clay. In Ezk 4^1 the prophet, in captivity in Assyria, is directed to draw a plan of Jerusalem upon a tile (Heb. *lĕbhēnāh*, LXX πλίνθος). (*c*) **Wood** was largely used in many countries, in the form of tablets. In Greece it appears to have been the principal material in use before the introduction of papyrus, and to have continued to be employed for special purposes long after that date. The earliest mention of writing in Greek literature (Homer, *Il.* vi. 169) describes a message written ἐν πίνακι πτυκτῷ. The laws of Solon were written upon wooden tablets (ἄξονες and κύρβεις, Arist. *Birds*, 1354; Plut. *Sol.* 25). Tablets, whitewashed in order to receive ink better, were employed for official notices in Athens in the 4th cent. B.C. (γραμματεῖα λελευκωμένα, πινάκιον λελευκωμένον, Ar. 'Αθ. Πολ. 47, 48); a set of such tablets, used for private purposes at Panopolis in Upper Egypt about the 7th cent. after Christ, is now in the British Museum (Add. MS 33369).

---

* This word may be a denom. from אָבָק 'dust,' and mean 'get dusty' (cf. κόνις, κονίω), or may be a dialectical variant of חָבַק 'clasp,' 'embrace.'

Wooden boards, inscribed in the one case with lines from Homer, in another with part of the *Phœnissæ* of Euripides and the *Hecalê* of Callimachus, are in the British Museum and the Rainer Collection at Vienna respectively, both having been found in Egypt. Many wooden tablets with Egyptian writing are also in existence, and Egyptian monuments represent scribes in the act of using such tablets. In Is 30^{8} and Hab 2^{2} the 'tablet' or 'table' [Heb. *lûaḥ*, LXX πυξίον] is no doubt wooden. The 'tables [same Heb.] of the heart,' metaphorically spoken of in Pr 3^{3}, may be regarded either as wood or, in the light of Jer 17^{1}, more probably as stone. It is not always possible to tell whether the writing upon tablets mentioned by ancient authors is upon the wood itself or upon wax or some similar material with which the wood was covered. **Wax** was certainly used sometimes, and in later periods wax tablets were the commonest form of note-books in Greece and Italy. Herodotus mentions such a tablet (vii. 239), and Cicero, Martial, and other authors refer to them very frequently. Many examples of them are still extant, notably those discovered at Pompeii.[*] (*d*) **Bark** is said by Pliny (*HN* xiii. 11) to have been used for writing before papyrus was known, and it continued to be used in the West, though rarely, as late as the 5th cent. after Christ (Martianus Capella, ii. 136; though it is not quite clear that the books so described are intended to be contemporary productions). From its name, *liber*, comes the Latin word for 'book.' (*e*) **Linen** also was used in Italy in ancient times (*libri lintei*, Livy, iv. 7, x. 38). The largest extant example of Etruscan writing is upon linen (in the museum at Agram). Linen was also used by the Egyptians for this purpose. (*f*) **Lead** was used in Greece and Italy, and probably elsewhere. Pausanias (ix. 31. 4) mentions a leaden plate which he saw at Helicon, inscribed with the *Works and Days* of Hesiod; but the principal use to which lead (and other metals) was put as writing material seems to have been to receive magical incantations and charms. Such tablets have been found, and mention of them is frequently made in magical papyri. (*g*) **Potsherds** (ὄστρακα) were used at Athens to receive the names of persons on whom sentence of banishment (*ostracism*) was to be pronounced. In Egypt they were very plentifully used for accounts, and especially for tax receipts; in the Coptic period passages of Scripture and quasi-literary pieces were also inscribed upon potsherds. (*h*) **Leather** plays a far more important part in the history of writing, especially of the Bible. It was used in Egypt; leather rolls are extant from about B.C. 2000, and papyri of later date refer to documents written on skins as far back as the 4th dynasty. On the Assyrian monuments scribes are shown holding rolls which appear to be of this material. The Persians used leather to contain the royal records (βασιλικαὶ διφθέραι, Ctesias, *ap.* Diod. II. xxxii. 4). Similarly, Herodotus states that the Ionians of Asia Minor formerly used skins of sheep and goats, and that many barbarous peoples continued to do the same in his own time. In the OT, leather or skins are not expressly mentioned, but it is practically certain that this material was largely used, and was, in fact, the principal vehicle of Hebrew literature in historical times. The use of books in roll form is mentioned in Ps 40^{7}, Jer $36^{2.4}$ etc., Ezk 2^{9}; and the roll form implies the use of either leather or papyrus (vellum not having been yet invented, and bark, so far as is known, never having been employed in Palestine). Papyrus might, no doubt, have been introduced into Palestine from Egypt, and there is a recorded case of its being sent to Phœnicia in the 11th cent. (*Zeitsch. f. ägypt. Sprache*, 1900, p. 11); but there is no evidence of its general use at this date. On the other hand, the mention of the 'scribe's knife' (*ta'ar hassôphēr*, LXX τῷ ξυρῷ τοῦ γραμματέως) in Jer 36 $(43)^{23}$ probably indicates that the roll destroyed by Jehoiakim was of leather; since a knife (for the purpose of erasures) was part of the equipment of a scribe writing upon leather or vellum, but could not be used on so delicate a material as papyrus. In Nu 5^{23} it is implied that writing could be washed off with water; but this was the practice in the case of papyrus as well as leather, so that the passage is inconclusive. Clearer evidence is given by later writers. In the Letter of Aristeas the copy of the Law sent from Jerusalem to Egypt for the purpose of the version of the LXX is expressly said to have been written on διφθέραι. Further, the Talmud requires all copies of the Law to be written on skins, and in roll form; and this regulation, which still remains in force for volumes intended for use in the synagogue, no doubt points back to an ancient tradition. All the evidence, in fact, seems to go to show that the OT Scriptures were habitually written on prepared skins, for which, in course of time, vellum was probably substituted in the case of ordinary copies (as distinct from synagogue rolls). It is not improbable that in St. Paul's request (2 Ti 4^{13}) for τὰ βιβλία, μάλιστα τὰς μεμβράνας, the latter word refers to copies of parts of the OT.[*]

(*i*) **Papyrus.**—If skins probably played the most important part in the early history of the Hebrew Scriptures, the papyrus plant certainly did so in the case of the Greek. The papyrus plant (*cyperus papyrus*), which formerly grew in great profusion in the Nile (though now confined to the higher part of its course), was used from a very early date in Egypt as a material for writing. The earliest extant papyrus MS dates from the 5th dynasty (see § i.), and from about the 12th dynasty onwards many such volumes are known, with writings in all the varieties of Egyptian script—hieroglyphic, hieratic, and demotic. From Egypt the use of papyrus spread into the neighbouring countries, and it was the universal material for book-production in Greece and Italy during the most flourishing periods of their literature. The LXX version of the OT was produced in Egypt under the Ptolemies, and there can be no doubt that it was written upon papyrus, like the hundreds of Greek documents of that period which recent discoveries in that country have brought to light. So, too, with the books of the NT. These were written in Greek, in various parts of the Greek-speaking world—in Asia Minor, in Greece, in Rome, etc.; and there is no reason to doubt that they were written on papyrus in the ordinary way. The only books which may have been originally written in Palestine are St. Matthew and St. James; but these, it must be remembered, would not at first be written as sacred books, so that the rules applying to the OT would not apply to them. They, too, must almost certainly have been written on papyrus; and on this material the Greek OT and the NT must have circulated habitually, if not exclusively, until the 4th cent. of our era.—The method of manufacture of papyrus is described by Pliny (*HN* xiii. 11–13). The pith * of the stem of the plant was cut into thin strips, which were laid side by side to form a sheet. Another layer of strips was then laid upon the first, at right angles to it, so that the whole sheet was composed of two layers, in one of which the fibres ran horizontally, in the other perpendicularly. The two layers were attached to one another by moisture and pressure, with or without the addition of glue.† The sheets (κολλήματα, *schedæ*) so formed were dried and polished, and were then ready for use. They could be used singly, as for letters, accounts, and the like; or a number of them could be joined together, so as to form a roll. According to Pliny, the manufacturers prepared rolls (*scapi*) consisting of not more than 20 *schedæ*; but a scribe who required more to contain the work he was copying could attach a second roll to the first, and cut off so much of it as might not be needed. The length of papyrus rolls, as actually used, varies greatly. In ancient Egypt, when books were largely used for ceremonial and ritual purposes, they were often of excessive length; the longest at present known measures 144 ft. But for practical use much more moderate dimensions were necessary, and no Greek literary papyrus is known which exceeds 30 ft. The height varies from 15½ to about 5 in.; about 9 or 10 in. is a common height for a literary papyrus. The writing is normally on that side of the papyrus on which the fibres lie horizontally, *i.e.* parallel to the length of the roll (*recto*); the *verso* is only used either when the scribe's matter exceeds the papyrus at his disposal, so that after filling the *recto* he is forced to continue on the *verso*, or (a commoner case) when the *recto* has already been used to receive some other writing. A roll of the first description (whether its material be leather or papyrus) is that mentioned in Ezk 2^{10} (cf. Rev 5^1), which was 'written within and without; and there was written therein lamentations, and mourning, and woe.' The multitude of calamities is indicated by the writing extending over both sides of the roll. An example of a roll so written occurs in a magical papyrus in the British Museum (Pap. cxxi.). Opisthograph rolls of the second description imply that the writer employed papyrus already once used, either because he was too poor to get any other, or too remote from a town where it might be obtained, or that the matter he wished to write was too unimportant to justify the use of fresh papyrus. Thus rough accounts are frequently written on the back of used papyrus; or schoolboys' copies, as in the case of the papyrus which bears on its *verso* the Funeral Oration of Hyperides, roughly written in a schoolboy's hand; or we may have a literary work, written for the private use of an individual, not for sale or for a public library, as in the case of the Ἀθηναίων Πολιτεία of Aristotle, which is written on the back of farm accounts. Such literary MSS might, no doubt, occasionally come into the market as cheap copies, but they would form no part of the regular book trade. That the habitual use of them implied poverty, appears from Lucian (*Vit. Auct.* c. 9), where it is one of the signs of the poverty-stricken disciple of Diogenes. The writing on papyrus was disposed in columns (σελίδες), the width of which, if not dictated by necessity, as in the verses of a poem, is generally from 2 to 3½ in. in the case of literary MSS of good quality. In copies written without regard to appearances (like the Ἀθ. Πολ.), it might be considerably more. The title of a work was normally written at the end. The inner edge of the roll, or both edges, might be provided with a wooden roller (ὀμφαλός), and volumes which claimed elegance of appearance were probably always provided with them. Commoner copies were not so provided, but the edges were then generally strengthened by an extra strip of papyrus, to prevent tearing. A σίλλυβος, or thin strip of papyrus or vellum, was attached to the outside of the roll, bearing the title of the work; such a σίλλυβος, bearing the title of Sophron's *Mimes*, has been discovered at Oxyrhynchus (Ox. Pap. 301, now Brit. Mus. Pap. 801). The roll might be enclosed in a cover (φαινόλης), to protect it from damage, and stored in a wooden case (*capsa*) with several others.—The roll form of book continued in common, if not universal, use until the 3rd cent.; but from that date onwards (under the influence, no doubt, of the increasing use of vellum) papyrus books in codex form (like modern books) begin to be found, and the roll form gradually drops out of use. The earliest fragments of the Greek Bible are written in the codex form, which seems to have been preferred by the Christian converts. Vellum superseded papyrus as the material for the best books in the 4th cent., but papyrus continued to be employed for inferior copies until the 7th cent. In 640, however, the Arabs conquered Egypt, and, by stopping the export of papyrus, struck the death-blow to its use as a vehicle of Greek and Latin literature. It continued to be used in Egypt to some extent for accounts and for Coptic documents; but its literary importance was at an end.

---

[*] Sir H. M. Stanley (*Cornhill Magazine*, Jan. 1901, pp. 60, 61) records that on his first visit to Uganda, in 1875, portions of the NT, translated or paraphrased by him and his companions, were written on 'thin and polished boards of white wood, about 16 by 12 inches. . . . During the three months I remained with Mtesa, the translations which we made from the Gospels were very copious, and the principal events from the Creation to the Crucifixion were also fairly written out, forming quite a bulky library of boards.'

[*] The suggestions that the μεμβρᾶναι were blank sheets of vellum, or note-books (which were sometimes made of vellum at that date), or account-books, seem inconsistent with the importance evidently attached to them.

(*k*) **Parchment or vellum.**—This material may be regarded as a special development from the use of skins, described above; but it occupies a far more important place in the history of literature than its parent. According to Varro (*ap.* Pliny, *HN* xiii. 11), it originated at Pergamum under Eumenes II. (B.C. 197–158), when the king of Egypt, anxious to cripple his rival's growing library, forbade the export of papyrus. The king of Pergamum accordingly reverted to the use of skins, which had formerly been general in Asia Minor (see above); but the skins were made more suitable for literary purposes by a special preparation, and the material thus produced received from its place of origin the name of περγαμηνή, whence our *parchment*. Parchment differs from leather in not being tanned; the skins are merely stretched and dried, the hairs being removed from the one side and the flesh from the other, and the whole being smoothed with pumice. In modern usage the flesh side is also dressed with chalk; the special methods, if any, of preparing ancient parchment are unknown. The skins used are principally those of sheep, lambs, and calves, but those of goats, asses, and swine may also be used; and specially fine vellum is provided by antelopes. Strictly speaking, vellum denotes the material manufactured from calves (and antelopes), and parchment that provided by sheep, etc.; but practically no distinction is made between them, and the term *vellum* is applied to all kinds of dressed skins used for the purposes of writing. Of the character of the vellum MSS of Pergamum nothing is known; but it is certain that the material did not come into general use for literary purposes, in other countries, until a much later period. At Rome, in the 1st cent. B.C. and the 1st and 2nd cents. after Christ, there is evidence of the use of vellum, but only for note-books and for rough drafts or inferior copies of literary works (Cic. *ad Att.* xiii. 24; Hor. *Sat.* ii. 3; Martial, xiv. 7. 184, etc.; Quintilian, x. 3. 31). A fragment of a vellum MS, which may belong to this period, is preserved in Brit. Mus. Add. MS 34473, consisting of two leaves of Demosthenes, *de Fals. Leg.*, in a small hand, which appears to be of the 2nd century. The use of vellum for note-books, which would be shaped according to the analogy of wax tablets, the form of note-book previously existing, naturally led to the evolution of the *codex*, or modern book form; and the rise of vellum into favour for literary purposes is also the rise of the codex. This appears to have taken place during the 3rd cent., the final victory of vellum and the codex form being achieved in the early part of the 4th century. When Constantine founded his new capital, he instructed Eusebius to have fifty MSS on vellum (*σωμάτια ἐν διφθέραις*) prepared by skilled calligraphers for the churches in it (*Vit. Const.* iv. 36, A.D. 331); and about the middle of the century the library of Pamphilus at Cæsarea (consisting largely of the works of Origen), which had fallen into decay, was restored by Acacius and Euzoius, who had the damaged volumes replaced by vellum ('in membranis instaurare conati sunt,' Jerome, *Ep.* cxli.). The spread of Christianity probably had much to do with the change, by creating a demand for complete copies of the Scriptures. No papyrus roll of ordinary dimensions could hold more than one of the longer books of the NT, and a set of some 30 or 40 rolls would be necessary for the entire Bible; while the whole could be gathered into a single codex of not immoderate size. Examples of such codices from this very period remain in the celebrated Codex Vaticanus and Codex Sinaiticus, and probably also in the earliest copies of Virgil. The vellum of these early MSS ranks with the very finest in quality. For special magnificence, the vellum was sometimes dyed purple, with letters of silver or gold. The existence of such MSS in the 4th cent. is proved by Jerome's denunciation of them ('in membranis purpureis auro argentoque descriptos,' *Præf. in Job*; 'inficiuntur membranæ colore purpureo, aurum liquescit in litteras, gemmis codices vestiuntur,' *ad Eustochium de custod. virg.*).

---

* Dziatzko (*Untersuchungen*, pp. 31, 32) suggests that in ancient Egypt the fibres of the bark were used as well as the pith, the exclusive use of the latter being introduced after the Greek occupation; but there is no authority for this distinction, and an examination of early Egyptian papyri does not reveal any essential difference in the method of their manufacture. Moreover, since Pliny states that even that part of the pith which was nearest the bark made material too coarse for writing purposes, the bark itself must have been still more unsuitable, and could not produce such excellent material as the papyri of the 18th and even earlier dynasties.

† Pliny's words, 'turbidus liquor vim glutinis præbet,' are variously interpreted to mean that the muddy water (of the Nile) 'gives strength to the glue' (*glutinis*, dat. plur.) or 'answers the purpose of glue' (*glutinis*, gen. sing.). Dziatzko (*op. cit.* pp. 84, 85) states that a chemical examination of some fragments of papyrus disclosed no trace of glue between the layers, but showed that it had been applied to the surface, presumably to smooth and strengthen it. Certainly it is not always possible to discern glue, but sometimes it appears to be present.

To this period may perhaps be attributed the Codex Veronensis of the Old Latin Gospels; but most of the purple MSS now extant are of later date. Those of the Greek Gospels are all attributable to the 6th cent. (the codices known as Evann. N, N^a, Σ, Φ, and one recently brought from Sinope to Paris, the latter and N^a being written in gold letters, the others in silver, with gold only for the sacred names). Other purple MSS are the Codices Palatinus and Saretianus (5th cent.), Vindobonensis and Brixianus (6th cent.) of the Old Latin Gospels, the Vienna Genesis (6th cent.), which also has painted miniatures, the Gothic Gospels at Upsala (6th cent.), the Metz Gospels and Psalter of St. Germanus at Paris (6th cent.), the Zürich Greek Psalter (7th cent.), the Vulgate Gospels written by Godescalc for Charlemagne (A.D. 781), the Hamilton Gospels, now in America, and two other copies of the Gospels at Paris (8th cent.). The last four, all written in the time of Charlemagne (to which more of the same and subsequent periods might be added), have letters of gold; the earlier MSS are in silver. Among special curiosities of ornamentation may be mentioned two leaves gilded all over, with lettering in blue, containing the tables of Eusebian Canons, from a copy of the Greek Gospels, of the 6th cent., in the British Museum, and two books of prayers written on black vellum in gold and silver letters, of the 15th to 16th cents., at Vienna.

The sheet of vellum having been prepared for use, it was folded into quires, a process which causes hair-side to face hair-side, and flesh-side flesh-side throughout the volume. Quires are found of various sizes, eight leaves being the commonest number. In Greek MSS the flesh-side normally begins the quire, in Latin MSS the hair-side. Lines were ruled on the vellum with a blunt-pointed instrument, generally on the hair-side, making a furrow on that side and a ridge on the flesh-side. After the use of vellum had become well established, the writing was generally arranged in two columns to the page, sometimes less, but very rarely more. The earliest MSS, however, show a larger number, the Cod. Sinaiticus having four columns to the page, and the Codd. Vaticanus and Patiriensis (5th cent.) three. It is probable that the use of narrow columns which this involves is a reminiscence of the narrow columns habitually found in papyri, from which these MSS were almost certainly copied. A revival of this practice is occasionally found in later MSS, as in Brit. Mus. Royal MS 1 D ii, containing part of the LXX, of which four quires are written with three columns to the page; or the great Bibles containing Theodulf's recension of the Vulgate, which also have triple columns.

(*l*) Paper, the ultimate survivor in the competition between the various vehicles of literature, is of much less importance for the history of writing than either papyrus or vellum, on account of the lateness of its appearance in Europe and Western Asia. The date of its invention is unknown, but there seems to be no doubt that it was first manufactured in China. About the middle of the 8th cent. it became known to the Arabs, perhaps as a result of their conquest of Samarcand, in 704, and factories were established in Baghdad and elsewhere. Specimens of their workmanship have been found in Egypt, dating from an early period in the Arab occupation of that country. To this paper the names *charta* (often with the epithet *Damascena*) and *papyrus* were applied, since it served to take the place of the material formerly known by those names. From the Arabs the knowledge of paper passed, after a considerable lapse of time, to the Spaniards and Italians. The earliest known specimens are of the 12th cent., but it was only slowly that the new material made headway against the supremacy of vellum for literary purposes. Towards the end of the 14th cent. it began to be used with some freedom in the book trade, and during the 15th cent. it was coming to supersede vellum for ordinary purposes, even before the invention of printing dealt the fatal blow to the older material. It was formerly supposed that the earliest paper, introduced into Europe from the East, was made from cotton wool, and a distinction was drawn between cotton paper and linen paper. Microscopic examination, however, shows that this is a delusion, and that no such thing as paper made wholly of cotton has ever existed. The name *bombycina*, which is used to describe the Oriental paper, has probably nothing to do with the material out of which it was made, but is a corruption of *bambycina*, from Bambycé, in Syria, where it was manufactured. The materials out of which it was usually manufactured were hemp or flax, for which woollen cloth was subsequently substituted, and eventually (in the 14th cent.) linen rags. Water-marks, which do not occur in Oriental paper, were introduced by European manufacturers in the 13th cent. The earliest known specimen is on paper used in the district of Ancona in 1293.

(*m*) The *implements of writing* have naturally differed according to the various materials on which they had to be employed. A sharp, pointed metal instrument, known to the Greeks as *στῦλος*, Lat. *stilus*, was used for writing on clay or wax tablets (cf. Job 19^{24}, Jer 17^{1}). On papyrus the reed (*κάλαμος*, *calamus*) was used (cf. 3 Jn ^{13} *διὰ μέλανος καὶ καλάμου*), and possibly also on leather (cf. Ps 45^{1}, where the LXX has *κάλαμος γραμματέως*). Metal pens in the form of a reed or quill have been found in the so-called Grave of Aristotle at Eretria, and (of the Roman period) in Italy and Britain. The quill pen is first mentioned by an anonymous biographer of Theodoric the Goth (*c.* 500) and by Isidore of Seville (*c.* 600).—The earliest form of ink (*μέλαν*, *atramentum*, *ἔγκαυστον*, *incaustum*, whence *ink*) appears to have been either the juice discharged by the cuttle-fish (Persius, iii. 13) or a mixture of soot and gum. This often gives excellent results, the ink of the Greek papyri, even from the earliest times (3rd and 2nd cent. B.C.), being often admirably black. This kind of ink did not sink deeply into the material on which it was laid, and could be washed off without much difficulty; on papyrus this was the ordinary method of deletion on a large scale. Gall-apples are not mentioned until the 5th cent. (Martianus Capella, iii. 225), but were probably used considerably earlier. Metallic inks were not used with papyrus, but must have been adopted early in the history of writing upon vellum; it is to this element that the erosion seen in so many early vellum MSS (*e.g.* the Codex Vaticanus and the Codex Alexandrinus) is due. In the Middle Ages a less corrosive ink is generally used. Some beautiful specimens remain from about the beginning of the 8th cent., *e.g.* the Codex Amiatinus and the Lindisfarne Gospels. Many recipes for ink are recorded in mediæval MSS; the principal ingredients are gall-apples, vitriol, and gum.

Papyrus Erzherzog Rainer, ii. 87 ff.), 1887; Buhl, *Canon and Text of the OT*, Eng. tr. § 74, 1892; Kenyon, *Palæography of Greek Papyri*, ch. ii. 1899; Wattenbach, *Das Schriftwesen im Mittelalter*^{3}, 1896.

iii. HEBREW WRITING.—It is impossible to fix with any precision the beginning of writing among the Hebrews. The uncertainty which attends the dating of the earlier books of the OT and of the materials upon which they are based, makes it dangerous to draw any conclusions from the references in them to the practice of writing. The discovery (in 1887) of the Tel el-Amarna tablets (Fig. 1), near the site of the capital of Amenophis IV., containing correspondence, in cuneiform characters and in Babylonian dialect, between the Egyptian governors or vassal princes in Palestine and Syria and the king and his ministers in Egypt, proves that writing was practised in Palestine at a date either a century before the Exodus (if that event be assigned to the reign of Merenptah, as commonly held), or contemporary with the Hebrew entry into the Promised Land, according to the alternative chronology. There is also no difficulty in believing that Moses, having been brought up in the Egyptian court (cf. Ac 7^{22}), was acquainted with the art of writing; though, of course, this fact in itself proves nothing as to his actual and immediate authorship of the books ascribed to him. The name Kiriath-sepher (Jos 15^{15}) is held by Sayce and some others (but see Moore, *Judges*, 26 f.) to mean 'city of books,' which might indicate even the existence of a library (perhaps such a one as that of Ashur-bani-pal at Nineveh) or record-office; and one interpretation of *shēbeṭ ṣōphēr* in Jg 5^{14} (LXX B ἐν ῥάβδῳ διηγήσεως γραμματέως, AV 'the pen of the writer,' RVm 'the staff of the scribe'; but RV 'the marshal's staff') finds a reference to writing in what is universally admitted to be a very ancient document. It is not until much later, however, that indubitable evidence of Hebrew writing is found. The earliest extant specimens are on the *bowls of Baal Lebanon* (see ALPHABET, vol. i. p. 73), the earliest of which may date from *c.* 1000 B.C., and the *Moabite Stone*, erected by MESHA, king of Moab, about 850 B.C., to commemorate his own revolt against Jehoram. This is written in a dialect scarcely differing from Hebrew, and in the ancient Hebrew characters, which were a development from the original Phœnician alphabet (ALPHABET; for facsimile see MOAB). It is followed by the *Siloam inscription*, attributed to the reign of Hezekiah (*c.* 700 B.C.) or Manasseh (*c.* 650 B.C.), the characters of which are a modification of those on the Moabite Stone. Somewhat later still, probably, are the inscriptions on the jar-handles found by Dr. Bliss at Tell ej-Judeideh, which are assigned approximately to 650–500 B.C. (*PEFSt*, 1900, pp. 207, 341).

Of actual Hebrew *writing* in the old characters we have no remains, since our earliest extant MSS belong to a period long after the adoption of the square characters; but their appearance may be learnt from the MSS of the Samaritan version of the Pentateuch, the Samaritans having retained the ancient alphabet when the Jews abandoned it, after the Captivity, in favour of the Aramæan characters, which represented a different line of descent from the original Phœnician alphabet. The old characters remained in use on coins of the Maccabæan period, but they had fallen out of use for literary purposes long before the time of our Lord, and there can be no doubt that the books read by Him (*e.g.* Lk 4[17]) were written in the square alphabet, in which the smallness of the letter *yôd* justified the metaphor of Mt 5[18].* The square characters of the earliest period were not identical in form with those of the MSS now extant, but they were their direct ancestors. So far we have very little light as to the appearance of the MSS in which the Hebrew Scriptures were preserved; it is only when we reach the period of the Talmud (*c.* 300–500) that we find those principles being laid down which, stereotyped by the Massoretes, have given us the MSS now extant (Fig. 2). Minute directions are given for the copying of the Scriptures, especially of those volumes of the Law which were to be used in the services of the synagogue. These must always be leather rolls, not in modern book form; and they must be written with the most scrupulous care.

> 'A synagogue roll must be written on the skins of clean animals, prepared for the particular use of the synagogue by a Jew. These must be fastened together with strings taken from clean animals. Every skin must contain a certain number of columns, equal throughout the entire codex. The length of each column must not extend over less than 48 or more than 60 lines; and the breadth must consist of thirty letters. The whole copy must be first lined; and if three words be written in it without a line, it is worthless. The ink should be black, neither red, green, nor any other colour, and be prepared according to a definite receipt. An authentic copy must be the exemplar, from which the transcriber ought not in the least to deviate. No word or letter, not even a *yod*, must be written from memory, the scribe not having looked at the codex before him. . . . Between every consonant the space of a hair or thread must intervene; between every word the breadth of a narrow consonant; between every new *parāshāh*, or section, the breadth of nine consonants; between every book, three lines. The fifth book of Moses must terminate exactly with a line; but the rest need not do so. Besides this, the copyist must sit in full Jewish dress, wash his whole body, not begin to write the name of God with a pen newly dipped in ink, and should a king address him while writing that name he must take no notice of him' (S. Davidson, *Text of the OT*^{2}, p. 89).

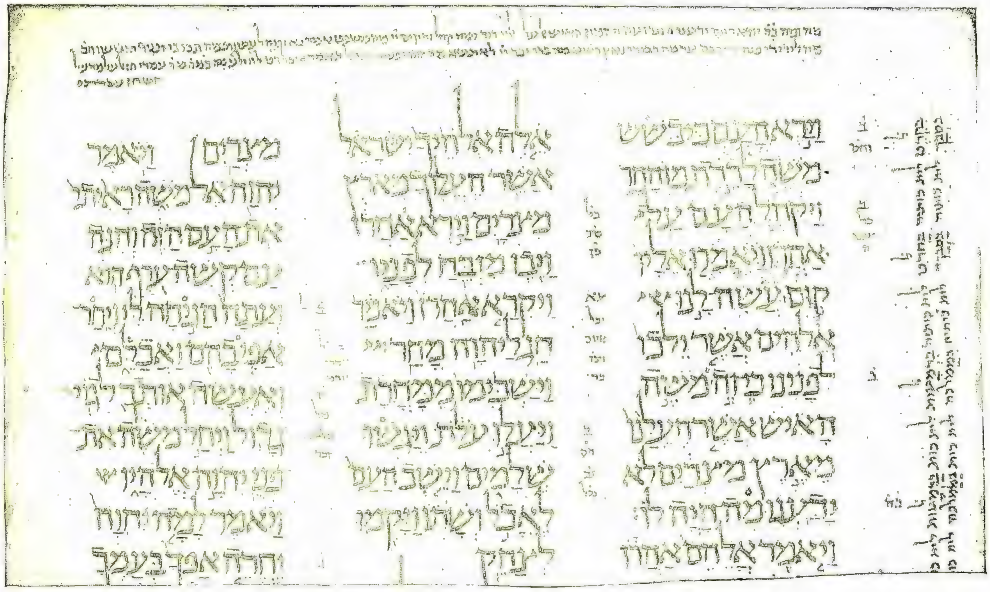

FIG. 2.—HEBREW PENTATEUCH CODEX, 9TH CENT.
(Brit. Mus. MS Or. 4445, reduced).

Vowel-points are never added in synagogue rolls. Originally absent from Hebrew writing altogether, vowels were first represented, when some special need required their indication, by the semi-vowels ו, י, ה, and sometimes א, technically known as *matres lectionis*. The insertion of these signs gives what is known as the *scriptio plena*, their omission the *scriptio defectiva*. The date of the introduction of this device is uncertain, but it must be later than the production of the LXX. The more complete and satisfactory system of vowel-points was introduced about the 7th century. An alternative system, in which the points are supralinear instead of infralinear, is found in the oldest dated MS (the St. Petersburg Codex of the Prophets, A.D. 916), and in some others: this is supposed to have been practised at Babylon (but not exclusively even there), but never gained general acceptance. Vowel-points are habitually inserted in MSS other than synagogue rolls, but it was a rule that the consonantal text should be written independently, and the points added by a different scribe.—*Accentuation* was probably introduced into Hebrew writing at about the same date as vowel-points (5th–7th cents.), and used to denote the logical interrelation of the several words in the sentence, as well as their vocal modulation in public reading.—*Separation of words* is effected in the Moabite and Siloam inscriptions by the insertion of a dot; but the frequent mistakes in the division of words in the LXX, and the subsequent introduction of the 'final letters,' show that in early MSS Hebrew writing, like Greek and Latin to a much later period, was undivided. The use of the five 'final letters,' to indicate the ends of words, belongs to a date intermediate between the version of the LXX and the Talmud, a period in which most of the *minutiæ* in the practice of the scribes probably originated.—*Divisions of the text* in Hebrew MSS are of various kinds. The larger divisions, corresponding roughly to our chapters, are the 'open' and 'closed' sections. Open sections begin a new line in the MSS; and if the previous section has ended at the end of a line, a whole line is left blank before the new section begins. Closed sections follow on in the same line as the end of the previous section, a blank space only being left between; or, if the previous section ends too near the end of a line to admit of this, the next line is indented. Late MSS sometimes insert the letters פ or ס in the blank space, to indicate an open or a closed section respectively. In the Law the MSS agree generally in their distribution of open and closed sections, but in the Prophets and Hagiographa there is considerable divergence, indicating difference of tradition in different Massoretic schools. This section-system was certainly introduced before the time of Jerome, and probably before the period of the Mishna.—Another form of division was into *ṣedarim*, or lections suited to a three-years' cycle of the reading of the Law. The Pentateuch is divided into 167 *ṣedarim*, while of the other books, which were similarly divided, the Former Prophets have 77, the Later Prophets 107, and the Hagiographa 81. Side by side with this was a one-year cycle of the reading of the Law, which was in use in Babylonia, involving a division of the Law into 54 *pārāshîyôth*. These are indicated in the MSS, with a mnemonic mark to show the number of verses in each *parāshā*. Verse-division is rarely found in synagogue rolls; in MSS in book form having accents and vowel-points it is regularly practised. The earliest method of indicating the end of a verse is by placing a *ṣilluḳ* (ֽ) beneath the final letter; subsequently the double point or colon (*ṣoph paṣuḳ*) was introduced. The verses were carefully numbered by the Massoretes, as a precaution against interpolation; but the systems of division practised by the Babylonian and Palestinian Jews respectively differed considerably, and the one now in use differs from both of these, being apparently due to the Massoretes.

---

* An isolated survival of the old alphabet occurs in the case of Aquila, in whose Greek OT the name Jehovah was regularly written in these characters. Origen's statement to this effect has been confirmed by the fragments of Aquila recently discovered at Cairo, and now at Cambridge (Burkitt, *Fragments of Aquila*, 1897, cf. Taylor, *Genizah Fragments*, p. 26 f.).

The margins of Hebrew MSS play an important part in their character, since they generally contain the Massorah and certain kinds of various readings. The **Massorah**, or body of traditional commentary on textual matters, is of two kinds—the Greater and the Lesser Massorah. The Greater Massorah generally occupies the upper and lower margin of the page, while the Lesser is placed in the outer side margin. Between the columns come the various readings known as the *Ḳĕrê* and *Ṣevirin* (see TEXT OF OT). The places of the Lesser Massorah and the various readings are, however, sometimes interchanged. Often, too, the Hebrew text is accompanied by an Aramaic paraphrase, either in parallel columns or between the lines.—On the palæography of Hebrew MSS it is not necessary to dwell. Changes in the manner of writing between the 9th cent. (the date of our earliest MS) and the invention of printing were slight, and the best authorities differ considerably in their attribution of dates on the handwriting alone. Moreover, in view of the stereotyped character of the text preserved in all extant MSS, not so much depends on the precise assignment of dates as in the case of Greek MSS.

LITERATURE.—Ginsburg, *Introd. to the Massoretico-Critical Edition of the Hebrew Bible*, 1897; S. Davidson, *Text of the OT*², 1859; Buhl, *Canon and Text of the OT*², Eng. tr. 1892; Wickes, *Accentuation of the so-called Prose Books*, 1887; Driver, *Notes on the Heb. Text of the Books of Samuel*, 1890, pp. ix–xxxv, see also p. 957; Weir, *Short Hist. of the Heb. Text*, 1899.

iv. GREEK WRITING ON PAPYRUS.—We are far better situated with regard to knowledge of the manner in which the Greek Bible was written than is the case with the Hebrew Bible; for, whereas the earliest extant Hebrew MS is separated by more than a thousand years from the date of composition of the latest Hebrew book of the OT, we have (thanks to the discoveries made in Egypt within the last twelve years) Greek MSS as early as the date at which Greek first began to be used as a vehicle for the Scriptures. From the first half of the 3rd cent. B.C. onwards we have a continuous stream of Greek MSS (not indeed biblical, but showing how the biblical MSS must have been written), at first exclusively on papyrus, but from the 4th cent. after Christ also on vellum.

Greek writing upon papyrus falls into two categories, *literary* and *documentary*, the former being used primarily for works of literature, but at times also for documents of special importance, such as petitions to the great magistrates; while the latter, primarily used for all sorts of non-literary documents (receipts, contracts, accounts, letters, etc.), was also occasionally employed for private copies of literary works. Both classes have therefore to be taken into consideration with regard to the transmission of the sacred text. So far as the LXX is concerned, indeed, the non-literary hand is not of much importance, since there is no reason to suppose that the version circulated to any great extent among other than literary classes. Copies were, no doubt, occasionally made in the common hand for poor people or for private use; but it is not likely that this happened to such an extent as materially to affect the textual tradition. With regard to the NT the case is different, as will be shown below.

The literary hand of the 3rd cent. B.C., at the time of the production of the LXX, is known from the papyri extracted by Prof. Petrie from the cartonnage of some mummy cases found by him at Gurob in 1889, of which the best, from a palæographic point of view, are the fragments of the *Phædo* of Plato and the *Antiope* of Euripides. These are written in a very small uncial hand, neat and firm, in columns about 6 in. high and 2¾ in. wide. According to a rough calculation, two rolls of about 35 ft. each would be required to contain the Book of Genesis in the style of writing employed in the *Phædo* MS; and, even with a taller column and greater economy of space between the lines, it is certain that such a book could not have been contained in a single roll of normal length. The uncial hand on papyrus admits of occasional ligatures between the letters, so that the distinction between uncial and cursive hands is less sharply marked on papyrus than on vellum. Besides the small literary hand just mentioned, the early Ptolemaic papyri show a larger and rougher uncial hand, likewise used for literary purposes, but probably for cheaper and less carefully executed copies. The non-literary hands of the period are various, but for the most part are very cursive, with broad letters freely spaced out and large ligatures.

In the 2nd cent. B.C. two forms of literary hand are again found in existence (and it must be remembered that the extant evidence is still scanty, so that no description is likely to be exhaustive)—one (exemplified by the papyrus of Hyperides *in Athenogenem* at the Louvre) being a square, firm hand, larger than that of the Petrie *Phædo*, while the other (contained in a rhetorical papyrus, also at the Louvre) is smaller, weaker, and more sloping. The non-literary hand is generally less straggling than in the previous century, the larger forms of it being often very handsome, and the smaller neat and flowing. The 1st cent. B.C. is a period of transition, the Roman conquest of Egypt leading gradually to a marked change of hand. Of literary papyri, few can be quite certainly attributed to this century, but there are strong grounds for placing the Herculaneum rolls here, with a few others from Egypt. The Herculaneum papyri show a number of rather small, business-like hands, without much ornament, written in narrow columns on papyrus of moderate height, and from these a good idea may be formed of the appearance of a MS of the LXX in the generation preceding the birth of our Lord.

For the 1st cent. of the Christian era, and especially for the second half of it, during which the books of the NT were written, we have fairly good evidence as to the current literary hand, and ample for the non-literary hand. The literary hand is rather larger than was usual in the Ptolemaic period, with well-rounded curves and not infrequent ligatures; a graceful style of writing, and, at its best (as in a papyrus of the *Odyssey* in the British Museum), very handsome. It is not likely, however, that the authors and early copyists of the books of the NT often had writing of this excellence at their disposal. A better example of the style in which the autographs of the NT may have been written is provided by a MS of Hyperides in the British Museum, written in the latter part of the 1st cent. in a hand akin to the best contemporary non-literary MSS (Fig. 3). Even, however, when the author's autograph or the first transcripts were produced by competent scribes, the conditions of circulation among the Christian community make it practically certain that the Scriptures must often have been copied by private persons, unskilled in the art of writing, and thinking, not of producing a volume fit for the book market, but of reading for themselves, or transmitting to their friends, the all-important narrative of the Master's life. Throughout the first three centuries of the Christian era the books of the NT must have circulated mainly in channels outside the ordinary book trade. Public libraries did not require them; churches must often have lost their copies in times of persecution; professional scribes, unless they happened to be Christians, would not be employed to transcribe them; and in country places skilled calligraphy would not be forthcoming. Under these circumstances, the NT Scriptures must have circulated much in privately written copies. A good example of such a copy of a literary work in a non-literary hand is provided by the papyrus of Aristotle's *Ἀθηναίων Πολιτεία*, written at the end of the 1st cent. on the back of used papyrus, in four different hands, of which three are cursive and one a rough uncial. The cursive hands use abbreviations freely for common words and terminations (*e.g.* / = ἐστί, γ′ =γάρ, κ′=καί, κˋ=κατά, τˋ=τήν, τ′=τῆς, τ′=τῶν), and the possibility must be reckoned with that similarly written MSS enter, to some extent, into the textual history of the NT. The common hands of the Roman period are small and very cursive, and errors in transcription would consequently be easy; to say nothing of the probable want of habits of literary exactness among many of the copyists. No doubt, many well-written copies were also produced, especially in the great towns where Christian communities were strong; and these would have a good chance of preserving a pure tradition, since the literary hand of the 1st and 2nd cents. is clear and good, increasing in size, and perhaps in showiness, as time goes on. The most calligraphically elaborate papyri extant (two copies of the *Iliad*, bk. ii., at Oxford and in the British Museum) probably belong to the 2nd century.

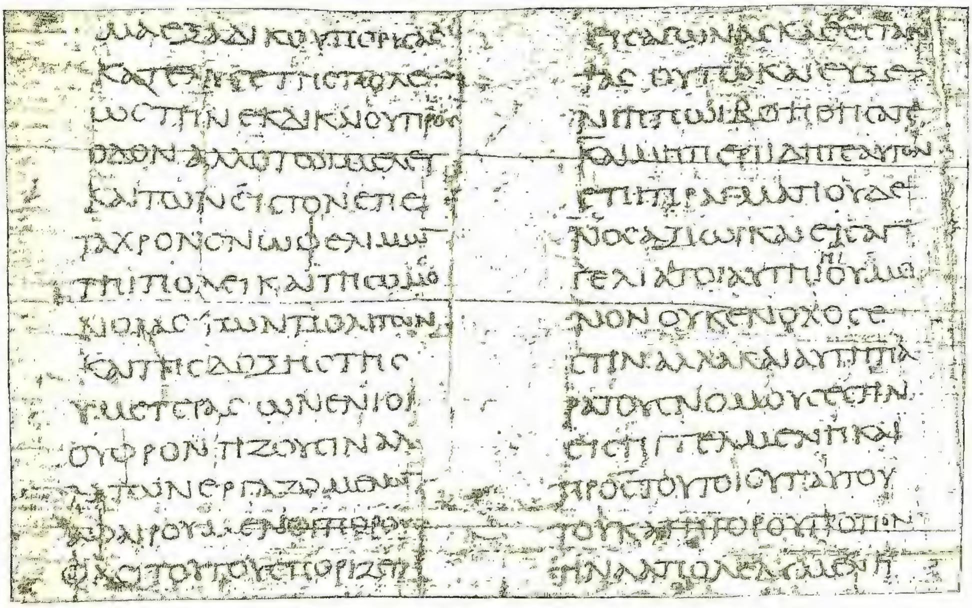

FIG. 3.—GREEK PAPYRUS ROLL, LATE 1ST CENT.

(Brit. Mus. Pap. 115, Hyperides, *pro Euxenippo*).

In the 3rd cent. a new element enters into consideration, namely the adoption of the codex form, the roll form continuing alongside of it for a period which cannot be exactly defined. At first the codex form was inferior, as a style of book production, to the roll form, being an adaptation to literary purposes of a form which had hitherto been adopted mainly for memoranda and rough drafts. There are signs, however, that it was early taken into use among the Christians for their private copies of the Scriptures. The evidence at present available is too scanty to justify dogmatism, but it certainly is the case that several of the earliest examples of the codex form contain Christian writings, and that the majority of papyri of the 3rd cent. containing Christian writings are in the codex form. Of the NT, two fragments are extant which are assigned to the 3rd cent., and three of the 4th; all these are in codex form. Of the OT there are three fragments of the 3rd cent., of which one is certainly from a codex, and one is uncertain. In addition, the Oxyrhynchus fragment containing alleged sayings of our Lord is a leaf from a codex of the 3rd century. It appears, therefore, that the codex form was generally used among Christians at an earlier date than among people in general; for of 21 non-Christian papyri assigned to the 3rd cent. only two are written in this form. These early Christian codices are not showy specimens of the calligrapher's art; on the contrary, they are somewhat roughly written, unornamental productions, generally of small size, suitable, it may be thought, for easy conveyance and easy concealment. This fits in with what has been said above as to the character of the MSS in which the books of the NT circulated before the recognition of Christianity by the State. Prof. Hort has observed (*Introd. to NT*, § 352) that the Codex Ephraemi in the Apocalypse must have been copied from a MS composed of small leaves; and it is possible that it was such a one as those which we have been describing,—a private copy, without beauty of workmanship, and perhaps without much attention to precise accuracy of transcription. From this predilection for the codex form even on papyrus, the Christian Church was well prepared to make use of it when vellum began to come to the front as the material for book production.

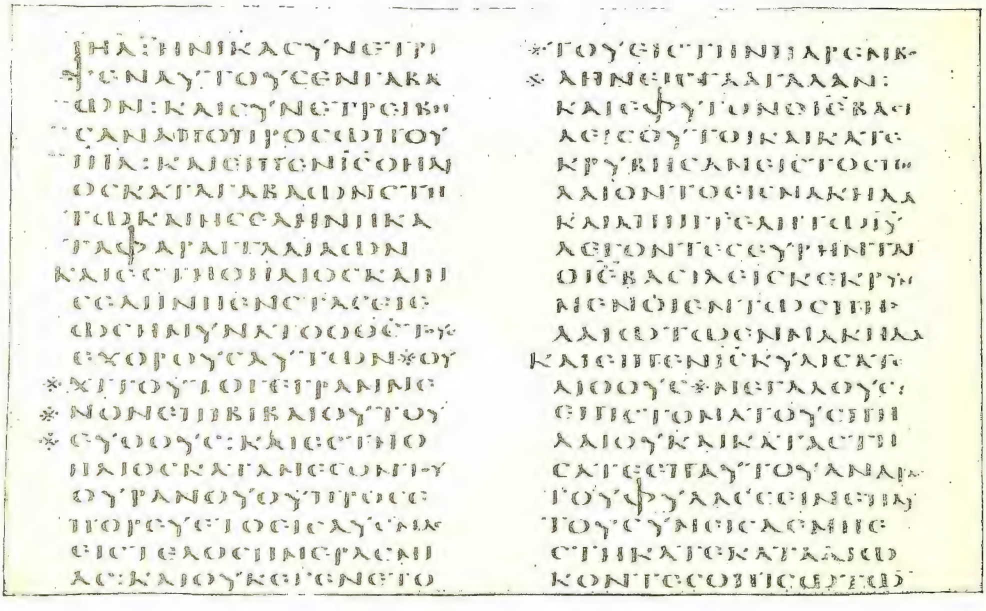

FIG. 4.—GREEK UNCIAL CODEX, 5TH CENT.

(Codex Sarravianus, Leyden University Library, reduced.)

Before considering, however, the progress of palæography upon vellum, it will be as well to say something as to the *minutiæ* of Greek writing upon papyrus. In ordinary literary papyri, the writing is arranged in narrow columns, often leaning to the right, in uncial characters of medium size (smaller than is usual upon vellum), admitting of ligatures between them to a limited extent. Enlarged initials are not used. Pauses in the sense are indicated (if at all) by small blank spaces in the text, often accompanied by a *paragraphus*, or short horizontal stroke below the first letters of the line in which a sentence ends.—*Punctuation* in the ordinary sense is very rarely found in prose MSS, but it occurs sporadically in a few MSS. In one or two very early MSS a double dot, like a colon, is used to separate sentences; but usually only a single dot is employed. According to the strict system, developed by the Alexandrian grammarians, a dot placed above the line has the value of a full stop; in the middle of the line, that of a comma; and at the foot of the line, that of a semicolon. In a few extant papyri these distinctions are observed; but oftener they are neglected, and the dot is placed above the line to denote all values.—*Accentuation* is not unknown, as it is in the earliest vellum uncials, but is rarely and sporadically applied. No papyrus MS has accents fully and systematically supplied, but some of the best-written of them (notably the Bacchylides MS) have them fairly plentifully. Less well-written MSS have fewer of them, and MSS in non-literary hands practically do not have them at all.—*Separation of words* is not found, except in a few cases where ambiguity might result: here a single point is sometimes used to indicate the correct division. This is again especially the case in carefully written MSS, which are always more fully supplied with aids to comprehension than their commoner kindred. It is not at all likely that any of the early copies of the books of the NT were supplied with accents or punctuation, or had any indication of the division of words.—The use of *abbreviations* in non-literary hands has been mentioned above. In addition to the symbols there described, a common method of abbreviation is to drop the termination of a word, writing the last letter which is retained above the line: *e.g.* $αυ^{τ}$ or $αυτ^{ο}$ for αὐτός or αὐτόν, $γρα^{μ}$ for γράμμα or γραμματεύς, $ποιεισ^{θ}$ for ποιεῖσθαι, and so on. Abbreviation by the omission of letters from the middle of a word is not practised, except in the common theological compendia ($\overline{κς}$, $\overline{θς}$, $\overline{χς}$, $\overline{ιης}$, κ.τ.λ.), which are found from the 3rd cent. onwards.

LITERATURE.—Thompson, Kenyon, Birt, Gardthausen, *opp. citt.*; Blass, art. 'Paläographie,' in Müller's *Handbuch der klassischen Alterthumswissenschaft* (1892); Grenfell and Hunt, *Oxyrhynchus Papyri*, pts. i. ii. (1899–1900).

v. **GREEK UNCIAL WRITING ON VELLUM.**—The supersession of papyrus by vellum has been described in § ii. The supersession, however, was not immediate and absolute; for it is clear that copies of the Scriptures continued occasionally to be inscribed on papyrus as long as the material itself was accessible. Fragments of such MSS are in existence (such as a Psalter in the British Museum, and the Books of Zechariah and Malachi in a MS at Heidelberg) which are attributable to the 7th cent.; and much later than this no Greek MS on papyrus can be, on account of the Arab conquest, which closed Egypt to the Christian world. But from the 4th cent. onwards papyrus takes a secondary place. From that century we have the Vatican and Sinaitic Codices, and we know by tradition of the 50 volumes prepared for the churches of Constantinople; and it is not likely that any papyrus MS, extant or hereafter to be discovered, can be put into successful comparison with these. From this time forward, moreover, there was nothing to prevent the free multiplication of copies of the Scriptures, with all the resources of trained penmanship. The textual tradition of the NT henceforth runs, not through private copies, but through the great churches and libraries; and if Constantinople and Cæsarea used vellum, there is no reason to doubt that their example was followed in Rome and Antioch and even Alexandria; indeed there is good reason for believing, on palæographical grounds, that the Vatican and Sinaitic Codices, and still more the Codex Alexandrinus, were produced in Egypt. It is therefore to vellum MSS that we must look for the custodians of the sacred text from about the date of the Council of Nicæa.

The palæography of vellum MSS has been studied much longer than that of papyri, and rests on a far wider consensus of competent opinion. It may therefore be treated the more briefly here. The earliest vellum MSS show a resemblance to the papyri, not only in the use of narrow columns (see § ii.), but in the handwritings themselves. It appears that, when vellum was taken into use for the best copies of literary works, the scribes abandoned the sloping and somewhat inelegant writing which is characteristic of the papyri of the 3rd cent., and cast back to the better models of an earlier period. The uncial* characters of the Vatican and Sinaitic Codices appear to be modelled on the best papyrus MSS of the 1st and 2nd cents., a square, upright uncial of medium size, written with much simplicity of style. Ligatures between letters are entirely eschewed, and no cursive element appears in the writing at all. The Cod. Vaticanus has no punctuation or accents by the first hand, no separation of words, no enlarged initials, no projection of letters into the margin to denote a new paragraph. The same is the case with the Cod. Sarravianus (Fig. 4) of the Pent., probably of the early 5th century. The Cod. Sinaiticus differs only in the last detail, the first letter of a new paragraph projecting very slightly into the margin, but without enlargement. In the Cod. Alexandrinus, assigned to the first half of the 5th cent., the hand is larger and heavier, the number of columns on a page is reduced to two, and the first letter of a new paragraph (or, if the paragraph begins in the middle of a line, the first letter of the first complete line) not only projects into the margin, but is considerably enlarged. In later MSS still these enlarged initials become the subject of ornamentation, until we reach the magnificent illuminated initials of the Middle Ages. In the 6th cent. the style of writing grows generally heavier, and there is more distinction between the thick and thin strokes of a letter. In many MSS, too, the characters are larger, especially in the purple MSS, which are a notable feature of this period. In Egyptian MSS of this period (*e.g.* the Codex Marchalianus of the Prophets) a somewhat stiff and angular style is adopted, which is akin to the hand found in Coptic MSS. After the 6th cent. the best age of uncial writing is past. In the 7th cent. the writing began to assume a sloping form,—always a sign of degeneracy,—and to compensate for its loss of natural strength and firmness by excrescences in the shape of exaggerated knobs and bars at the extremities of the letters. Added to this a tendency to lateral compression is found, which culminates in the so-called 'Slavonic' uncials which dominate the 8th and 9th centuries. In these, whether upright or sloping, the letters are heavy and angular, and tall in proportion to their width. A letter like O, instead of being a circle, is compressed into an oval, or even a diamond shape; while T, K, Γ, and other letters have large bars at the ends of their projecting limbs. A reaction occurs in the 10th cent., when a return to the square and well-rounded characters of the 4th to 6th cents. is seen; but by this time the day for uncial writing was past, and its place was to be taken by a smaller and less cumbrous style.

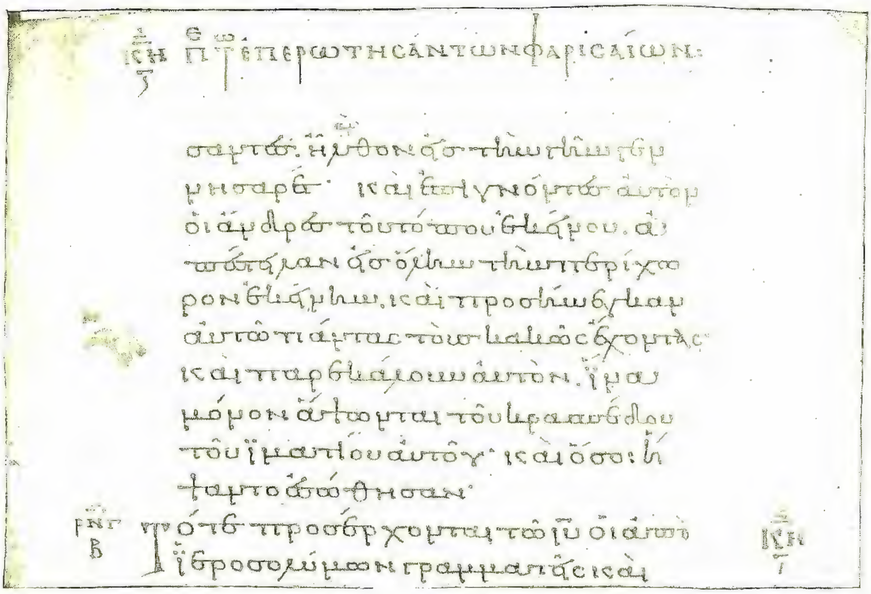

FIG. 5.—GREEK MINUSCULE CODEX, 10TH CENT.
(Brit. Mus. Add. MS 11300).

LITERATURE.—Thompson, *op. cit.*; Gardthausen, *op. cit.*; *Palæographical Society*, facsimiles of MSS; Omont, *Facsimilés des plus anciens manuscrits grecs . . . de la Bibl. Nat.* 1892; Kenyon, *Facsimiles of Biblical MSS in the Brit. Mus.* 1900.

vi. GREEK MINUSCULE WRITING.—The great defect of uncial writing as a vehicle of literature was its cumbrousness. Written without ligatures, in large, heavily-formed letters, it occupied more time and more space than its predecessor on papyrus, and could not be adapted to the production of cheap or handy volumes. Up to the 7th cent. this need was supplied, as has been shown above, by copies upon papyrus; and the failure of the supply of this material drove the scribes ultimately to the production of a substitute. Further, as uncial writing degenerated, it lost its sole recommendation—the beauty of the volumes written in that style; and the way was open to a successor. Both these wants were supplied by an adaptation of the cursive style of common writing to the purposes of literature. It is not to be supposed that uncials were ever the sole manner of writing in existence. From the earliest point at which we have extant remains of Greek writing (3rd cent. B.C.), cursive writing is found in existence side by side with uncial; and common-sense tells us that this must always have been the case, such writing being required for ordinary use, quite apart from the needs of book production. We now have plentiful examples of Greek cursive writing from the 3rd cent. B.C. to the 7th cent. after Christ, with a few specimens from the 8th cent.; and it is only through the accident of the Arab conquest of Egypt that we are unable to trace its development on into the 9th cent. The extant evidence, however, is enough to show that the minuscule hand which was taken into use for literary purposes in the 9th cent. is the direct descendant of that which is found in the Byzantine papyri of the 6th and 7th centuries. The forms of nearly all the letters are the same; only the exuberances of the Byzantine style are repressed, the size of the characters (which is often considerable) reduced, and the whole made far more calligraphic. The Greek minuscule MSS of the 9th and 10th cents. are, in fact, as beautiful examples of writing as exist anywhere; and at the same time the economy in space and labour, as compared with the coarse Slavonic uncials which preceded them, is very considerable (Fig. 5). The effect of the reformation upon the textual tradition of the Greek Bible was very great. The multiplication of copies was rendered infinitely easier, the possession of them was placed within the reach of a much wider circle, and the consultation of the Scriptures was greatly facilitated. The extant uncial MSS of the NT number less than 200, the extant minuscules are nearly 3000; and though much must be allowed for the greater antiquity of the former style (and consequently greater certainty of the destruction of MSS), very much of the disparity must be due to the increased ease with which the minuscule could be produced.

---

* The term is derived from an expression of Jerome's (*præf. ad Job.*), 'uncialibus ('inch-long'), ut vulgo aiunt, litteris,' and is applied to writing in capital letters, each formed separately, as distinct from the smaller minuscule style, introduced in the 9th cent., which lent itself easily to cursive writing. In vellum MSS the distinction between uncial and minuscule is clearly marked; but on papyrus it is less evident, and uncial writing on papyrus, as stated above, admitted not infrequently a cursive element.

Into the details of Greek minuscule writing from the 9th cent. to the 15th it is not necessary to enter here. When all are so far removed from the original autographs, little turns on the precise date of a minuscule MS of the Bible. It is the character of the text contained in them, and the evidence thence derivable as to the archetypes from which they are descended, that make them valuable or the reverse. Moreover, it is not possible to describe the successive styles of minuscule writing, with the slight variations by which the typical hand of one century can (more or less precariously) be distinguished from that of another, without a copious use of facsimiles. For these the reader may be referred to the publications of the Palæographical Society or the series of facsimiles of dated MSS in the Bibliothèque Nationale issued by M. Omont. These illustrate at once the predominant hands of the successive centuries, and the uncertainty which must always attend the precise fixing of undated MSS, owing to the sporadic reappearances of the various hands at considerable intervals of time.

The earliest extant dated minuscule MS is dated in A.D. 835 (the Uspensky Gospels); and in the course of this century, though the uncial style was by no means yet extinct, the minuscule hand was perfected into a style of great beauty. It is a firm, upright hand, rather square in character, and sometimes leaning slightly backwards. The letters are frequently linked together, but only in small groups. The breathings are angular (⊢ ⊣ ∟ ⅃), the accents small and inconspicuous. The characters are pure minuscule, without intermixture of uncial forms. The writing stands upon the lines ruled in the vellum. Towards the end of the 10th cent. a change is made in this respect, and the writing frequently depends from the ruled lines. Uncial forms of certain letters (such as η, κ, ν) creep in again among the minuscules. A looser style of writing is adopted, the letters being less firm and square, and more freely spaced out. This is especially characteristic of a number of MSS of classical authors written about the 11th cent., and the same tendencies continue progressively in the succeeding centuries. In the 11th cent., too, the rounded breathing makes its appearance, and in the 12th it is definitely established as the usual form. In the 12th cent. the minuscule hand is often large and somewhat handsome, though without the compactness of the earlier style; but from this point it degenerates more decisively. The forms of the letters become more irregular, accents are larger and more conspicuous, the practice of contraction is introduced, which in later MSS increases to such an extent as to render them unintelligible except after a special study of the various marks of abbreviation. Accents also are frequently formed in one stroke with the letters, and in every respect the tendency to cursiveness increases. The Renaissance, with its revival of interest in Greek in the West, and the increased demand for handsome specimens of Greek writing which it produced, led to some improvement in calligraphy; but here the invention of printing stepped in, and the handiwork of the scribe was superseded by the mechanical precision of the press.

LITERATURE.—The authorities cited in § v.: Omont, *Facsimilés des manuscrits grecs datés de la Bibliothèque Nationale du ixe au xive siècle*, 1890, and *Facsimilés des manuscrits grecs des xve et xvie siècles*, 1887; Wattenbach and von Velsen, *Exempla Codicum Græcorum litteris minusculis scriptorum*, 1878.

vii. LATIN WRITING.—It does not come within the scope of this article to consider all the forms of writing in which the Bible has circulated; but the Latin version holds such a unique position, as the Bible of the West, and one of such special interest to us, that a short description of Latin writing may be useful. Of its early stages, before the general adoption of vellum, we have much less knowledge than in the case of Greek; for the papyri found in Egypt, which are our chief source of information of the pre-vellum period, contain but very few examples of Latin writing. Even the papyri of Herculaneum are almost wholly Greek; and though we know that papyrus was the main material of book production throughout the whole of the most productive period of Roman literature, and continued to be employed for literary purposes as late as the 7th cent., and for certain official purposes (notably papal rescripts) down to the beginning of the 11th cent., we have no literary works of any substantial size now extant on this material, with the exception of a few papyrus codices of the 6th and 7th cents., long after the victory of vellum had been accomplished. We have nothing to show us what the first editions of Cicero and Cæsar, of Virgil and Horace, or even of Tacitus and Pliny, were like. The history of the Latin literary hand begins, where the history of the Greek literary hand began until recently, with the rise of vellum. Of the early non-literary hand we have rather more evidence, in the shape of a few papyri and a considerable number of wax tablets; and this may have been used, like the Greek non-literary hand, for the dissemination of the Scriptures in very early times. On this point, however, there is at present no evidence.

On vellum the history of Latin writing follows substantially the same course as the Greek. It begins with an elaborately-written majuscule hand, in which all the letters are separate; and this is ultimately superseded by a minuscule hand, which from the 9th cent. to the 15th is the universal vehicle of literature. In the majuscule type of hand, however, distinctions are introduced which find no place in Greek. The earliest phase is that of writing in *capitals*, in which rounded forms of letters are rare, the general character being the same as that of inscriptions upon stone. These, again, are subdivided into *square* capitals, in which the letters are even in height and square in build, and *rustic*, in which the horizontal strokes are very short in proportion to the perpendicular. Of square capitals very few specimens now remain (notably two fragmentary MSS of Virgil), and it seems clear that they were used only for *éditions de luxe*, and never were the form of writing exclusively in use. The shapes of the letters are essentially the same as in rustic capitals, only they are increased in breadth. The two styles are contemporaneous, and of the two the rustic style is unquestionably that which was in common use. It is also the earlier in date, going back to the papyrus period (*e.g.* a Roman military roll of A.D. 156, *Pal. Soc.* ii. 165); while the heavier square capitals can hardly have been written except on vellum. Rustic capitals are found in the great early MSS of Virgil, the Romanus and Palatinus of the 4th cent., and the Mediceus of the 5th; also in the Bembine Terence (4th–5th cent.), the Paris Prudentius (6th cent.), and even as late as the Psalter falsely attributed to St. Augustine, but really of the early 8th cent., and the Utrecht Psalter of the 9th cent. Commoner, however, than the rustic hand,—at any rate from the 4th cent. onwards,—is the other form of the majuscule hand known as *uncial*. In this style many of the letters (notably A D E H M), which are angular in the capital hand, are rounded into curves, and vertical strokes are habitually carried above or below the line of writing. This is the hand found in the earliest extant MSS of the Latin Bible, such as the Codd. Vercellensis (4th cent.), Veronensis and Palatinus (4th–5th cent.), Bobbiensis (5th–6th cent.), and other fragments of the Old Latin version; and from the 6th cent. onwards it ousts the capital style from the field, with the exception of a few isolated examples, such as those mentioned above. At first rather a small and irregular hand, without much pretension to beauty, it improves in regularity, firmness, and handsomeness up to the beginning of the 8th cent.; the MSS of that period, such as the Lindisfarne Gospels and the Cod. Amiatinus, being probably the most magnificent examples of Latin writing in existence. Meanwhile there was a tendency to intermix minuscule forms with uncials in writing of a less formal character, and this, which is known as the *half-uncial* style, is found as early as the 6th cent. adopted into use for literary purposes (*e.g.* a MS of Hilary at Rome, written not later than A.D. 509–10). Subsisting side by side with the uncial style, the half-uncial hands paved the way for a general adoption of minuscules, which thus comes by an easier and less abrupt transition than in the case of Greek. On the one hand, the majuscule style had been gradually toned down successively from capital to uncial, from uncial to half-uncial; on the other, the cursive hand in daily use for common purposes was raised into the various 'national' hands, Lombardic, Visigothic, and Merovingian, which, though inelegant enough, were still book-hands of a kind. By the 8th cent. the old literary hands had been broken up, and their place taken by these various species of mixed hands which had neither the beauty of the majuscule nor the ease and simplicity of the cursive. From this state of chaos Latin calligraphy was rescued by the reforms introduced in the reign and under the inspiration of Charlemagne. The Caroline reform, accomplished principally at the school of Tours, under the direction of Alcuin of York, evolved a style of writing which was at once graceful and clear, easy both to write and to read, which was destined to supersede the various national hands then in existence, and form the foundation of the minuscule hand which was the vehicle of literature until the invention of printing. To the Caroline minuscule style belong the Bibles containing the recensions of the Vulgate text by Alcuin himself and by Theodulf of Orleans; while the beautiful uncials of the various contemporary 'Golden' Gospels, produced perhaps in the palace schools at Aachen, show how the best traditions of the 8th cent. could be carried on.

It is impossible here to follow the developments of Latin palæography in all their details. For the history of the biblical text perhaps the most notable is the compressed hand of the 13th cent., in which so many Bibles are still extant. Coming after the bold and handsome hand of the 12th cent., its rigidity and compression are very noticeable. The scribe seems anxious to economize space to the last degree; and this, aided by the very thin vellum then in use, enables him to produce Bibles in a comparatively small compass. It is natural to connect this activity on the part of the scribes in multiplying copies of the Bible with the activity of the scholars of the University of Paris at this same period in revising and stereotyping its text; the whole testifying to an increased interest in the reading of the Scriptures, which may perhaps be attributed to the influence of St. Louis. In the 14th and 15th cents. it is only necessary to point out the divergence of styles in the north and south of Europe; the northern countries developing a heavy character, which, imitated by the printing-press of Gutenberg, was the parent of the 'black-letter' type of the Mazarin Bible and other early printed books; while in Italy a happier taste led to a renaissance of the Caroline style in the beautiful Italian hand from which, through the intermediary of Aldus and the other printers of the south, our modern types are derived.

LITERATURE.—Thompson, *op. cit.*; *Palæographical Society*, facsimiles; Marini, *I Papiri Diplomatici*, 1805; Wattenbach and Zangemeister, *Exempla Codicum Latinorum litteris majusculis scriptorum*, 1876–79; Delisle, *Album Paléographique*, 1887; Kenyon, *Facsimiles of Biblical MSS in the British Museum*, 1900.

viii. PALIMPSESTS.—A few special subjects remain to be noticed. One peculiar class of MSS consists of palimpsests, or MSS from which the original writing has been removed in order that the material may be used again. With papyrus this could hardly be done. The material would not stand scraping with a knife, and, although ink could be removed with a sponge, it does not appear that this could be effected (at any rate without considerable damage to the surface) except when the ink was fresh and had not sunk deeply in. Certainly it is very seldom that traces of an earlier writing are observable on papyrus. Since the writing was in the first instance confined to one side of the roll, the *verso* was still left open for use by a later possessor when writing material ran short; and further than this it does not seem to have been usual or possible to go. With vellum it was different. The tougher material admitted of the use of the knife, with which the scribe is habitually represented in mediæval miniatures, and many instances are known of MSS in which the original writing has been scraped or washed off, and a later work substituted. Such MSS are known as *palimpsests* ('scraped again,' πάλιν and ψάω); and, since the original writing is seldom wholly obliterated, it is often possible to decipher it in whole or in part. The most notable MSS of the Bible in this category are the Codex Ephraemi (C) at Paris, the Codex Nitriensis (R) in the British Museum, and the Sinaitic Codex of the Old Syriac version. In the first instance the upper writing is Greek, in the two others Syriac. Other biblical palimpsests are the Codex Dublinensis (O of the LXX, Z of the Gospels), Codex Cryptoferratensis (Γ of the LXX), the Codices I$^{1\text{-}7}$, P, Q, T^{w}, W^{b}, W^{f} (in part), Ξ, Υ, ד^{5}, of the Gospels, M, P, ב, of the Acts, R of the Pauline Epistles, *t* of the Old Latin Gospels, *s* of the OL Acts, *gue* of the OL Pauline Epistles, the Fragmenta Wirceburgensia of the OL Pentateuch and Prophets, some leaves at Vienna of the OL Kings, a Reichenau fragment of the OL Psalms, some Vatican and St. Gall fragments of the OL Prophets, and some fragments of the Pauline Epistles in Gothic at Milan. In most of these MSS the original writing is of the 5th or 6th cent.; the upper writing is of various dates.

LITERATURE.—Scrivener, *Introd. to Text. Crit. of NT*^{4}; Gregory, Prolegomena to Tischendorf's *NT Græce*; Swete, *Introd. to the OT in Greek*.

ix. STICHOMETRY AND COLOMETRY.—A στίχος (lit. 'row') is used primarily to mean a line of poetry. Hence it comes to denote a length of writing equal to an average line of poetry, and in this sense is used as a unit of measurement for literary purposes. Books are described as possessing so many στίχοι, and scribes were paid according to the number of στίχοι written by them. Thus Dionysius of Halicarnassus (vi. 1126) states that the extant works of Demosthenes contained 50,000 or 60,000 στίχοι; and the edict of Diocletian, *de pretiis rerum venalium*, fixes the scribe's pay at 25 denarii per 100 στίχοι for the more expensive style of writing, and 20 denarii for the second quality. Galen (*de Placit. Hipp. et Plat.* viii. 1) expressly states that the unit of measurement was the average Homeric hexameter, reckoned at 16 syllables (it was independently calculated by Ch. Graux as 37–38 letters, but Galen's statement shows that the syllable was the basis of calculation actually adopted). Rendel Harris has argued that the average iambic line of 12 syllables was also employed at times, and that this is, in fact, the second quality mentioned in the edict of Diocletian; but explicit confirmation of this hypothesis has not yet been obtained. The system of stichometry was also applied to Latin MSS, though evidences of its use are less numerous. A 4th cent. MS in the Phillipps Library at Cheltenham (Mommsen, *Hermes*, xxi.) contains a computation of the contents of the works of Cyprian in στίχοι which are the average Vergilian hexameter. The number of στίχοι in the various books of the Bible is stated in many MSS, no doubt for the purpose of calculating the scribe's pay; but there are considerable discrepancies in the figures. The oldest extant tables of biblical stichometry are the Cheltenham list (which includes the biblical books as well as Cyprian), a list (applying to the Pauline Epistles only) in the Cod. Sinaiticus (א), a list in the Cod. Claromontanus (D$^{\text{paul.}}$), a list in an 8th cent. Freisingen MS at Munich, published by C. H. Turner, and the list of Nicephorus in the 9th cent.: for the figures see Swete, *Introd. to the OT in*

Greek, p. 346; Scholz, *Prolegomena to the NT*, vol. i. p. xxviii; Turner, *Journ. Theol. Stud.* ii. 236. The division into στίχοι, which is purely mechanical, must be distinguished from the division of texts into κῶλα and κόμματα, which is a division into clauses according to the sense. Some MSS are thus written, not continuously, but in short sense-lines of varying length, presumably in the first instance to facilitate reading aloud. Such *colometry* was a special feature of the edition of the Acts and Epistles by Euthalius, and appears now in the chief MS of that edition, H of the Pauline Epistles. It is also used in the bilingual MSS, D D_2 E_2, in order to keep the two versions more exactly parallel than they would be in continuous script, and to facilitate comparison between them. Between κῶλα and κόμματα there is no clear distinction, but the latter denotes somewhat shorter clauses than the former.

LITERATURE.—Graux, *Revue de Philologie*, 1878, p. 97; Diels, *Hermes*, xvii, 1882; J. Rendel Harris, *Stichometry*, 1893; Thompson, *op. cit.* ch. vi.

X. LIBRARIES.—In conclusion, it may be useful to give some account of the manner in which books were preserved in ancient and mediæval times. The most ancient library of which we have precise knowledge is that of *Ashur-bani-pal*, king of Assyria (B.C. 668–626), the contents of which have actually come down *en masse* to the present day. It was not founded by Ashur-bani-pal, having existed under his predecessors, Sargon, Sennacherib, and Esarhaddon; but it was under his patronage that it assumed its great proportions. He set himself deliberately to collect books, sending scribes to make copies of works in other libraries, and instructing scholars to compile vocabularies of the Sumerian and Assyrian languages. In 1850 this library was disinterred by Sir H. Layard from the mounds of Kouyunjik, and its contents, amounting to over 20,000 tablets, are now in the British Museum. The tablets appear to have been laid on shelves, grouped in classes, and labelled. They included historical, literary, theological, magical, and scientific works, as well as letters, contracts, and other business documents; and the library was apparently accessible to the people in general.—In *Egypt* there must have been depositories of the papyrus rolls, which were produced in large numbers from very early times; probably, the literature being almost wholly theological, they were preserved in or about the temples. Diodorus Siculus (i. 58) states that Osymandyas, who has been identified with Ramses I., possessed a large library; and two officials of his time are described as librarians. But no details are known of these early Egyptian libraries.—Nor have we express mention of libraries in *Palestine* in pre-Christian times,[*] though the references in the Books of Samuel and Kings to other books suggest the probability of the existence of some repository where these works might be consulted (2 S 1^{18}, 1 K 11^{41} $14^{19.29}$ 15^{23} etc.).—In the early history of *Greece*, even when her literature was at its height, libraries (as distinct from public record offices, which certainly existed in Athens and presumably elsewhere) play but a small part. Pisistratus is stated to have formed a library, which was taken to Persia by Xerxes, and restored long after by Seleucus Nicator (*Aul. Gell.* vi. 17). Athenæus (i. 4) mentions libraries belonging to Polycrates of Samos, Nicocrates of Cyprus, the archon Euclides, the poet Euripides, and Aristotle. The latter is said by Strabo to have been the first person to collect books; and indeed it is evident that his works could not have been produced without a library. After his death his library was preserved at Scepsis; and, after having been sold to Apellicon of Teos and brought to Athens, it was ultimately taken by Sulla to Rome. The two most famous libraries of the Greek world, however, were those of Pergamum and Alexandria. The former, founded by Attalus I. and Eumenes II. at the end of the 3rd cent. and beginning of the 2nd cent. B.C., flourished greatly for a century and a half, but ultimately was transported by Mark Antony to Alexandria to replace that which had been destroyed by fire in Cæsar's wars. It is said to have consisted of 200,000 rolls at that time. The library of Alexandria, founded perhaps by Ptolemy I., was especially encouraged by Ptolemy II. (Philadelphus). It was a department of the great Museum, and every effort was made to gather into it all extant literature, and to attract the best scholars to accept posts in connexion with it. According to the well-known story embodied in the letter of Aristeas, it was in connexion with the establishment of the Alexandrian library, and at the express desire of Ptolemy Philadelphus, that the production of the LXX was undertaken. The main library, in the Museum, is stated to have been destroyed during the siege of Cæsar in Alexandria, and thenceforth the principal Alexandrian library was that of the Serapeum, which previously had held a secondary place. This in turn suffered greatly at the sack of the Serapeum by Bishop Theophilus in 390, so that it is doubtful if much was left to be destroyed by the Arabs in 641. From the date of the foundation of these two great libraries, public libraries, previously almost unknown in Greece, seem to have become common. Polybius (xii. 27) in the 2nd cent. B.C. speaks as if they would naturally be found in most large towns. At *Rome* they were of later growth. Private collections of books must certainly have been known to Varro, and Cicero's library was an extensive one for those days. Æmilius Paullus and Lucullus brought back libraries from their wars in the East. Cæsar planned the establishment of a public library; but the execution of it was left to Augustus, who, however, had been slightly anticipated by Asinius Pollio. From this point public libraries, often in connexion with temples, became common in Rome, as elsewhere. A concrete example of a library, though on a small scale, is provided by that at Herculaneum, in which the papyrus rolls, now in the Naples Museum, were found. It was a very small room, with shelves round the walls, on which lay the rolls (1756 in number); and a cabinet, also containing rolls, stood in the middle of the room.

Coming to Christian times and Christian literature, it must have been long before anything in the nature of a library was required. The only books with which Christians, as such, had to deal were those of the OT and NT, and the few books which for a time hovered on the border of the Canon, such as the Epistles of Clement and Barnabas, the Shepherd of Hermas, the Gospel of Peter, and the like. These would either be in private possession or the property of a Church, which would also, in time, require something in the nature of service books. The earliest Christian libraries, therefore, apart from the small collections which an individual might have, were attached to churches; but even these could not attain to any considerable size, so long as they were liable to dispersion in the days of persecution. The earliest of which we have individual knowledge is that which Pamphilus († A.D. 308) established at Cæsarea, consisting primarily of the works of Origen. Here the great scholar's *Hexapla* and *Tetrapla* were preserved, and the colophons of several MSS (notably the Codd. Sinaiticus and Marchalianus, and

---

[*] Little importance attaches to the statement in 2 Mac 2^{13} about Nehemiah founding a library (καταβαλλόμενος βιβλιοθήκην).

Cod. H of the Pauline Epistles) testify to the use of these autographs for the purposes of revision. On the adoption of Christianity as the religion of the State, a library was founded by Constantine in his new capital, which was greatly increased by his successors. With the institution of monasticism, monasteries as well as churches became the homes of libraries. Pachomius, the founder of monasticism in Egypt, required his monks to study the Scriptures, and his rules (Migne, *Patr. Græc.* xl.) clearly imply ready access to manuscripts. Throughout the Eastern empire, though learning was never so exclusively the possession of the clergy as it became in the West, the large majority of scribes were connected with churches or monasteries. Naturally, this is especially the case with MSS of the Bible or theological works; but in the list of scribes of Greek MSS of all kinds, whose names are on record, by far the most are monks or clerics (Gardthausen, *Griech. Pal.* p. 302 ff.). In the West, so long as the old Roman civilization remained, private and public libraries continued to exist throughout the empire, and the great provincial mansions of the nobility were well stocked with books, literary culture being one of the marks of that leisured and luxurious section of society.* The irruptions of the barbarians swept this civilization away. The pagan institutions for the preservation and multiplication of literature went to the ground, and the sole libraries which continued to exist were those of churches, and especially of monasteries. Benedict, like Pachomius in the East, prescribed reading as one of the special duties of his monks, thereby establishing a tradition which became an honourable characteristic of monasticism in general, and of the Benedictines in particular. In the early part of the Middle Ages, learning flourished most in the north of England, which was made famous by the scholarship of Bede and by the excellent schools of Wearmouth and Jarrow. From the north of England proceeded what are perhaps the most beautifully written MSS that Latin scribes ever produced—the Codex Amiatinus and the Lindisfarne Gospels. The history of these MSS establishes a point of some importance, namely the ease with which books were transferred from one part of Europe to another. The Lindisfarne Gospels was certainly transcribed from an exemplar brought from Naples; and the Codex Amiatinus, which must have been copied from the same or a similar volume, was itself (though it is one of the largest MSS in existence) conveyed from England to Rome as a gift to the Pope. From England learning spread southward to France and Switzerland; and while Alcuin founded the famous school of Tours, from which a new tradition of calligraphy came forth to influence all Europe, Irish monks founded (and to a large extent peopled) St. Gall, which became the centre of learning and of writing in the Rhone valley and the adjacent countries. As monasticism grew and the monasteries became rich, so did their libraries increase. Monte Cassino, Bobbio, Grotta Ferrata, in Italy; Fleury, Cluny, Corbie, St. Germain des Prés, in France; Fulda, Reichenau, in Germany; St. Gall, in Switzerland; Canterbury (both St. Augustine's and Christ Church), Rochester, St. Albans, York, Durham, in England,—these are only a few of the most famous monasteries whose libraries were special homes of literature in the ages preceding the invention of printing. The accommodation for books was at first neither large nor luxurious. The early buildings of monasteries show no place for a library. The books (apart from such precious ones as were placed in the shrine of the patron saint) were stored in cupboards (*armaria*) along the sides of the cloister, or in recesses in its walls; and in the cloister the monks read and copied them. In course of time the cloister windows adjoining the books were glazed as a protection, and the elder monks, at least, had 'carrells' or pews in which they could sit at their work. As books multiplied, increased provision had to be made for them. In the Cistercian houses, small cupboard-like rooms were introduced, in which the books lay upon shelves round the walls, much after the fashion of the Roman library at Herculaneum. In the 14th and 15th centuries larger rooms were provided, generally above some earlier building; and here the books could be arranged in regular bookcases. Libraries are provided for also in the statutes of the earliest colleges at the universities; and the manner of them can be realized from examples still extant, as in the Laurentian library at Florence. Sometimes the books lay on desks, sometimes they stood on shelves, with desks below or above on which they could be placed for consultation. In either case they were normally attached to their place by chains, so that they could not be carried away without permission. For the copying of MSS special *scriptoria* were provided in the great monasteries, and monks with a turn for literature were told off for this duty; so that in many places (as at Grotta Ferrata or St. Albans) distinct traditions of penmanship were established, and special styles, whether of historical chronicles or of illuminated miniatures, were cultivated. For a long time these were practically confined to monasteries. Only with the revival of learning did literature and art issue out to the world in general; and then the end of the reign of manuscripts was at hand. In the 15th and 16th centuries we find many scribes (especially the Greek scribes in Italy) and many miniaturists who were certainly laymen; and so, before the decline of monasticism was accomplished, its special work as the exclusive guardian of literature was done, and the secular world was ready to take into its own keeping the heritage of learning which the monks had been so largely instrumental in handing down to it.

X

XANTHICUS.—See TIME, p. 765.

XERXES (Ξέρξης), king of Persia (B.C. 485–465), is the AHASUERUS of Ezr 4^6 and of the Book of Esther.* In the first of these instances the position of the name, between Darius (Hystaspis) and Artaxerxes (Longimanus), scarcely permits of any other conclusion. The view (Ewald, *et al.*) that Cambyses the son of Cyrus is referred to, is now generally abandoned. There has never been any doubt as to the intention of the author of the Book of Esther to identify his Ahasuerus with Xerxes, although a difference of opinion has prevailed regarding the historicity of the rôle he assigns to this king. It may suffice to say here that, while the extravagance, cruelty, and caprice attributed to Ahasuerus, and the vindictiveness of Esther, correspond closely enough to what we are told of Xerxes and his queen Amestris (cf. *e.g.* Herod. vii. 35, 114, 118 ff., 238; viii. 24 ff.; ix. 110 ff.), there are powerful considerations which forbid our accepting the book as a record of actual occurrences. See, further, ESTHER, vol. i. pp. 773^a, 775.

The name *Ahasuerus* appears in the MT as אֲחַשְׁוֵרוֹשׁ or אֲחַשְׁוֵרֹשׁ [in Est 10^1 *Kěthîbh*, prob. by copyist's error, has אחשרש]. The LXX forms are: Ezr 4^6 B Ἀσθηρού [or perh. Ἄσθηρος], A Ἀσσούηρος, Luc. Ἀσσύηρος; Dn 9^1 Theod. Ἀσούηρος [A^1 B] or Ἀσσούηρος [$A^{*\text{ salt}}$ Q], LXX Ξέρξης, Luc. Ἀσσύηρος; To 14^{15} B Ἀσύηρος, A Ἀσούηρος, $ℵ^{c.a}$ Ἀσσύηρος; in Esther BA, confusing with ארתחששתא (*Artaxerxes*), reproduce uniformly by Ἀρταξέρξης or some corruption of that name, although Luc. has Ἀσσύηρος except in 9^{20} Ἀρταξέρξης. Bevan (*Daniel*, p. 149) holds that the form of the name originally in use among the Jews was no doubt אחשירש (*Aḥashyarsh* or *Aḥshayarsh*), answering to the Pers. *Khshayārshā* (Aram. חשיארש, *CIS* II. i. 122).

J. A. SELBIE.

---

* It seems hopeless to attempt to fix the identity of the Ahasuerus of Dn 9^1 and To 14^{15}. In any case he cannot be the *historical* Xerxes.

YOKE (מוֹט, מוֹטָה, עֹל, עוֹל, צֶמֶד ['team']; NT ζεῦγος 'a team,' 'a pair,' ζυγός) in Scripture usage is almost exclusively associated with the plough. The simple yoke (מוֹט, מוֹטָה) was a cross piece of wood fastened to the forehead of the draught ox; and the same Heb. word, especially in the plural (מֹטוֹת), describes the bars going round the neck of the ox to keep the yoke in its place. Generally, however, the cross piece of wood rested upon the necks of two oxen drawing together, and this (עֹל from עָלַל, Arab. = 'insert,' 'thrust in,' Aram. = 'enter') is the *yoke* of the plough with which we are familiar. The plough used by the *fellahîn* of Syria is the same as that with which Elisha was ploughing when Elijah cast his mantle upon him (1 K 19^{19}). Although in the Ḥaurân and the Ghôr of Jordan two pairs of oxen are to be seen yoked to the plough, in Galilee and the plain of Jezreel the plough is drawn by a single pair. The yoke rests upon the neck of the beasts, being fitted to each by forked pieces of wood mortised into the yoke and joined under the neck with a thong or chain. To the yoke the pole of the primitive plough is attached by thongs or cords fastened to the cross-pin of the pole, which passes through a ring on the yoke, or is held firm by a peg inserted into it (see Figures in *PEFSt*, 1891, p. 113; *ZDPV* xii. pp. 159, 160; Benzinger, *Arch.* 207; Whitehouse, *Primer of Heb. Ant.* 87; and art. AGRICULTURE). The 'thongs' are מוֹסֵרוֹת (AV 'bands' or 'bonds'), see Jer 2^{20} 5^5 27^2 30^8, Nah 1^{13}, and cf. Ps 2^3 107^{14}, Is 52^2. For examples of מוֹטָה see Lv 26^{13}, Jer 27^2 $28^{10.\,12.\,13}$, Ezk 30^{18} 34^{27}; fig. Is $58^{6.\,9}$.

The yoke (*nîr*) is composed of a horizontal bar of wood with knobbed extremities, but with no hollowed-out portion to receive the nape of the neck of the ox. In place of the *bow* two pins (*isbalân*) are let into holes in the *nîr*, at an angle of about 30 degrees to each other, their upper extremities being about 8 in. apart to receive the nape of the neck. When adjusted they are fastened by a leather thong or a chain (*jenîr*). The ring (*halaḳah*) is a tough branch, bent in a rude elliptical form. It is tied to the *nîr* by a leather thong (*sher'*) between two pintles (*sifrâyah*), which keep it in place (Post in *PEFSt*, 1891, p. 112).

The pair of beasts in the plough is called *a yoke* (1 K 19^{19}, Jer 51^{23} צֶמֶד [from צָמַד 'to bind *or* join together']), or *yoke of oxen* (צֶמֶד בָּקָר 1 S 11^7, Job 1^3, ζεῦγος βοῶν Lk 14^{19}). The ground that a pair of oxen was sufficient to cultivate was known as צֶמֶד שָׂדֶה (1 S 14^{14}).* See above, p. 910^b.

The yoke was among the Hebrews the emblem of subjection and servitude (Gn 27^{40}, Lv 26^{13}, 1 K $12^{4\text{ff.}}$, La 3^{27}, Nah 1^{13}). Where the subjection was more than usually bitter, the yoke of wood is exchanged for a yoke of iron (Dt 28^{48}, Jer 28^{14}). To impress upon the Jewish people the necessity of submitting quietly to Nebuchadnezzar's sway, the prophet Jeremiah put a yoke upon his own neck, and appeared in public with this badge of servitude. It was the popular thing when Hananiah, one of the prophets who said, 'Peace, peace, when there was no peace,' tore the yoke off Jeremiah's neck to back up his own false prediction that within two years God would break the yoke of Nebuchadnezzar from off the neck of all the nation. To this Jeremiah answered, 'Thus saith the Lord, Thou hast broken the bars of wood, but thou shalt make in their stead bars of iron. For thus saith the Lord of hosts, the God of Israel: I have put a yoke of iron upon the neck of all these nations' (Jer $28^{13.\,14}$). In the NT 'yoke' (ζυγός) is used only in this metaphorical sense,—the yoke of legal obedience (Ac 15^{10}, Gal 5^1), of servitude (1 Ti 6^1), of Christ (Mt $11^{29.\,30}$), whose yoke is 'kindly' (χρηστός), because it is 'lined with love.'†

LITERATURE.—Benzinger, *Heb. Arch.* 207 ff.; *PEFSt*, 1891, p. 112; *ZDPV* xii. 159 f.

T. NICOL.

YOKEFELLOW.—See SYNZYGUS.

---

* This superficial measure is known still in Palestine. The *feddân* in Egypt and Syria is the amount which a pair of oxen can plough in the season. In Scotland it is customary to speak of a three pair or five pair of horse farm.

† Matthew Henry, *ad loc.*

Z

ZAANAN (צַאֲנָן; B^{ab} AQ* Σενναάρ, Q^{a} Σενναάν).—A place mentioned, along with SHAPHIR and BETH-EZEL in Mic 1^{11}, where there is a characteristic word-play: 'the inhabitress of *Ẓaʿănān* went (*yāẓĕah*) not out' (for fear of the enemy). Ẓaʿănān is generally considered to be the same as Ẓenan (צְנָן; B Σεννά, A Σεννάμ, Luc. Σενάμ) of Jos 15^{37}, an unidentified town in the Shephēlah.

ZAANANNIM.—In Jos 19^{33} 'the terebinth of Bĕẓaʿănaim' (אֵלוֹן בְּצַעֲנַיִם) is mentioned in defining the boundaries of Naphtali, while in Jg 4^{11} 'the terebinth of Bĕẓaʿănannim' (א׳ בְּצַעֲנַנִּים; RV gives in both passages 'the oak (m. 'terebinth') in Zaanannim') is the site of the encampment of Heber the Kenite and the scene of Sisera's murder by Jael. There can be little doubt that ב is not the preposition but part of the name (a conclusion which is strongly supported by the absence of the art. from אלון), and that the form בְּצַעֲנַיִם deserves the preference (see Dillm. *Jos. ad loc.*). The LXX has in Jos 19^{33} B Βεσεμιείν, A Βεσενανίμ, Luc. Σεεναvείμ; in Jg 4^{11} it translates, B πλεονεκτούντων [בצע 'be covetous'], A ἀναπαυομένων [confusing with שאננים].

The site of Bĕẓaʿănaim is quite uncertain. It is difficult, not to say impossible, to reconcile some of the other data in Jg 4 with the statement in v.^{11} that it was 'by Kedesh,' if by the latter is meant KEDESH-NAPHTALI. Equally unsuitable is the Kedesh of Issachar (? *Abu Kadeis*) between Taanach and Megiddo. Conder (*Tent-Work*, ii. 132), favoured by G. A. Smith (*HGHL* 395), identifies Bĕẓaʿănaim with *Khirbet Bessûm*, E. of Tabor, and takes Kedesh to be *Ḳadîsh*, a ruin on the shore of the Sea of Galilee, S of Tiberias. Cheyne (*Encyc. Bibl.* i. 571), somewhat arbitrarily, emends בצענים to קדשונים, supposing the reference to be to a Ḳidshon or Ḳadshon in Issachar, whose inhabitants would be called Ḳidshonim. Upon this theory the words אשר את־קדש of Jg 4^{11} must of course be viewed as a gloss. (See, further, Moore, *Judges*, pp. 121, 125 f.; G. A. Smith, *l.c.*; Neubauer, *Géog. du Talm.* 225).

On the difficulties of the narrative of Jg 4 see artt. BARAK, DEBORAH, SISERA.

J. A. SELBIE.

ZAAVAN (זַעֲוָן).—A descendant of Seir, Gn 36^{27} (A Ζουκάμ) = 1 Ch 1^{42} (B Ζουκάμ, A Ἀζουκάν, Luc. Ζαυάν). The tribe of which he appears here as the eponymous head has not been identified.

ZABAD (זָבָד, prob. a contraction for זְבַדְיָה or זַבְדִּיאֵל).—The word זָבָד and others formed from it occur as proper names in Palmyrene and Nabatæan inscriptions (Lidzbarski, *Nordsem. Epigraph.* p. 265). Fuller forms are ZEBADIAH, ZABDIEL = 'my gift is Jehovah' or 'God.' G. B. Gray (*HPN* 222 f.) points out that there are in the OT about * 36 persons bearing the name Zabad or names formed from it. Of these, 23 occur in Chron. alone. No more than 3 are mentioned in pre-exilic books. In the case of one of these (and we may add possibly in that of the other two) the text is doubtful, and the original may not have included the element *Zabad*. He draws the conclusion: 'The historical character, therefore, of persons bearing one of these names and mentioned only by the Chronicler seems to me suspicious.' Cf. Nos. **1**. **2**.

Zabad occurs in the OT as the name of the following:—**1**. One of the links in the genealogy of the Judahite family Jerahmeel, 1 Ch $2^{36f.}$ (Ζαβέδ) 11^{41} (B Ζαβέτ, A Ζαβάτ). Cf. GENEALOGY, § IV. 12, *Sheshan*.

1 Ch 2^{34-41} is an appendix to the account of the clans of Jerahmeel, which is closed in v.^{33} by the subscription: 'these are the sons of Jerahmeel.' A doubt has been raised as to the identity of Zabad ben Nathan ben Attai ben Sheshan and Ahlai (אחלי) his wife in 2^{31-37}, and Zabad ben Ahlai, one of David's mighty men, in 11^{41}. Siegfried-Stade and *Oxf. Heb. Lex.* regard the former as a family name, and the latter as an individual. There can be little doubt that the Chronicler intended to identify them. The historical value of the sections in which this Zabad is mentioned is uncertain. Kittel (*SBOT*) regards 2^{34-41} as one of the latest additions to Chronicles; Kautzsch (*Bibel*), however, refers it to an ancient source; while Gray (*HPN* 235) says of the section as a whole: 'The character of the thirteen names presents nothing inconsistent with the genealogy being genuine.' He is, unfortunately, doubtful about the names in which we are specially interested. 'The only names which appear to me suspicious are זבד [Zabad] and, in a less degree, עתי [Attai].' 1 Ch 11^{41b-47}, a passage peculiar to Chron., is the direct continuation of vv.$^{26-41a}$, which = 2 S 23^{24-39}. Possibly, therefore, vv.$^{41b-47}$ are from the same ancient source as the rest of the list, and were accidentally omitted from Samuel (so Kautzsch, Kittel, etc.). The concluding note in 2 S 23^{39}, 'thirty and seven in all,' is transposed by LXX, and the number 37 does not correspond with the list. But Gray (*op. cit.* 229 ff.) holds that if vv.$^{41b-47}$ is based on an ancient document, the text is very corrupt. Possibly Zabad b. Nathan (1 Ch 2^{36}) is the same as Zabud b. Nathan, Solomon's priest and 'king's friend' in 1 K 4^{5}. The latter occurs in some texts and versions (see ZABUD, and cf. No. 3) as *Zacur* or *Zaccur*, so that we might read for Zabad in 1 Ch 2^{36} *Zacar*, a contraction of the familiar *Zechariah*. In some scripts of Heb. *Zacar* (זכר) and *Zabad* (זבד) can hardly be distinguished. Cf. JOZACAR. If Zabad is accepted, and 1 Ch 2^{26-41} is regarded as based on some old genealogy setting forth the relations of clans, the apparent occurrence of Zabad as an Ephraimite clan in 1 Ch 7^{21} may indicate that the clan was at one time reckoned to Judah, and at another to Ephraim; or that it was ultimately divided between the two tribes. Note also the Elishama in 2^{41} and 7^{26}.

2. A link in an Ephraimite genealogy, 1 Ch 7^{21} (Ζάβεδ), ending apparently in a certain 'Ezer and Elead,' who were slain by the men of Gath. Zabad in MT is the son of Tahath and the father of Shuthelah. In LXX^{B}, however, the genealogy is much shortened, and it is Zabad who is slain—thus, 'And the sons of Ephraim, Sothalath. The sons of Laada, Noome, his son, Zabad his son: and the men of Gath killed him.' It is pointed out in SHUTHELAH that Zabad (זבד) here is probably a corruption of 'and Bered' (וברד) repeated from v.^{20}.* If so, this Zabad disappears. If, however, Zabad is retained here, cf. No. **1**.

3. In 2 Ch 24^{26} the name of one of the murderers of Joash is given as Zabad (B Ζαβέλ, A Ζαβέθ), the son of Shimeath the Ammonitess. 2 K 12^{21} has Jozacar. Perhaps we should read here *Zacar* (Kittel, *SBOT*); cf. JOZACAR.—**4**. **5**. **6**. Three laymen of the time of Ezra, who had married foreign wives, whom they promised to divorce: (*a*) Ezr 10^{27} of the benê Zattu (B Ζαβαδάβ, ℵA Ζαβάδ; 1 Es 9^{28} Σάβαθος, cf. SABATUS). (*b*) Ezr 10^{33} of the benê Hashum (B Ζαβέλ, A Ζαβάδ; 1 Es 9^{33} B Σαβανναιοῦς, A Βανναιοῦς, cf. SABANNEUS). (*c*) Ezr 10^{43} of the benê Nebo (B Σεδέμ, A omits both this and the following *Zebina*; 1 Es 9^{35} Ζαβαδαίας, cf. ZABADAIAS). Apparently *Zebina* is omitted. One of the two, *Zabad*, *Zebina*, may be due to accidental repetition.

W. H. BENNETT.

ZABADÆANS (Ζαβαδαῖοι).—The name of an Arabian tribe defeated by Jonathan (1 Mac 12^{31}). The Pesh. form of the name seems to mean *Zubaidœans*, *i.e.* Banu Zubaid, which was the name of a famous Arabian family; and indeed derivatives from the root *Zbd* form many proper names in Arabic and Nabatæan (the name substituted for Zabadæan by Jos. *Ant.* XIII. v. 11), though the verb itself in its old sense 'to give' is not found in Arabic. The name of the tribe defeated by Jonathan is thought to be retained in *Zebdany* or *Zabadani*, 'a well-known district between Damascus and Baalbek, where the river of Damascus rises' (Yāḳūt, ii. 913). The plain of Zebdany is thus described by Conder, *Tent-Work in Palestine*, i. 249: 'It is flanked on the west by the ragged and castellated ridges of the Anti-Lebanon, and on the east by a range of equal height. The plateau is bare and treeless, except towards the north, where are groves of poplar. Through the centre runs the river, its course marked by green bushes.' The situation of the plain seems to agree with the movements recorded in 1 Mac. exceedingly well. *Beth Zabdai*, to which allusion is sometimes made in the Rabbinic writings, and which some have connected with this place, has been shown by Kohut (*Aruch Completum*, ii. 68) to belong to a different region. D. S. MARGOLIOUTH.

---

* It is sometimes difficult to be certain whether the same name in different passages refers to one or to more persons.

* So also GENEALOGY, VII.^{b} 4, and in *Encyc. Bibl.* Hogg, art. 'Ephraim,' 12, and Hervey quoted by Hogg. The present writer arrived at this view independently.

ZABADEAS (Ζαβαδαίας, AV Zabadaias), 1 Es 9^{35} = Zabad, Ezr 10^{43}.

ZABBAI (זַבַּי).—**1.** One of the descendants of Bebai who had married a foreign wife, Ezr 10^{28} (BA *Ζαβού*, Luc. *Ζαβούθ*); called in 1 Es 9^{29} **Jozabdus.** **2.** Father of Baruch who assisted in the rebuilding of the wall, Neh 3^{20} (BA *Ζαβού*, ℵ *Ζαβρού*, Luc. *Ῥαββαι*). The *Ḳĕrê* has, perhaps rightly, זַכַּי **Zaccai**, a name which occurs in Ezr 2^{9} (B *Ζακχού*, A $^{\text{vid}}$ *Ζακχάν*, Luc. *Ζακχαίας*) = Neh 7^{14} (Bℵ *Ζαθού*, A *Ζακχούρ*, Luc. *Ζακχαιάς*), and is the origin of the ZACCHÆUS of 2 Mac 10^{19} and the NT.

ZABBUD (*Kĕthîbh* זבוד, *Ḳĕrê* זַכּוּר *Zaccur*; B. om., A *Ζαβούδ*, *i.e.* זָבוּד [cf. 1 K 4^{5}], Luc. *Ζακχούρ*).—An exile who returned with Ezra, Ezr 8^{14}. In 1 Es 8^{40} וְזַכּוּר is apparently corrupted into ISTALCURUS.

ZABDEUS (*Ζαβδαῖος*), 1 Es 9^{21} = Zebadiah of the sons of Immer, Ezr 10^{20}.

ZABDI (זַבְדִּי? 'gift of Jah,' or perh. 'my gift,' or 'gift to me'; NT *Ζεβεδαῖος*, ZEBEDEE).—**1.** The grandfather of Achan, Jos 7$^{1.17.18}$ (B *Ζαμβρεί*, A *Ζαβρί*, *Ζαμβρί*, Luc. *Ζαβδ(ε)ί*), called in 1 Ch 2^{6} **Zimri** (B *Ζαμβρεί*, A *Ζαμβρί*). **2.** A Benjamite, 1 Ch 8^{19} (B *Ζαβδεί*, A *Ζαβδί*, Luc. *Ζεβδί*). **3.** An officer of David, 1 Ch 27^{27} (B *Ζαχρεί*, A and Luc. *Ζαβδί*). **4.** A Levite, Neh 11^{17} (B om., A *Ζεχρί*, Luc. *Ζεχρεί*); but read probably זִכְרִי **Zichri**, as in ‖ 1 Ch 9^{15}.

ZABDIEL (זַבְדִּיאֵל 'my gift is El').—**1.** Father of one of David's officers, 1 Ch 27^{2} (BA *Ζαβδειήλ*, Luc. *Ζαβδιήλ*). **2.** A prominent official, overseer of 128 'mighty men of valour' in Nehemiah's time, Neh 11^{14} (B *Βαδιήλ*, A *Ζοχριήλ*, Luc. *Ζεχριήλ*). **3.** An Arabian who put Alexander Balas to death and sent his head to Ptolemy, 1 Mac 11^{17} (*Ζαβδιήλ*), Jos. *Ant.* XIII. iv. 8 (*Ζάβειλος*).

ZABUD (זָבוּד 'bestowed').—The son of Nathan, 'priest' and 'king's friend' (see art. PRIESTS AND LEVITES, p. 73), 1 K 4^{5} (B *Ζαβούθ*, A *Ζαββούθ*, Luc. *Ζαχούρ*, *i.e.* זָכוּר).

ZACCAI.—See ZABBAI.

ZACCHÆUS (*Ζακχαῖος*), the same name as Zaccai ('pure') in the OT (Ezr 2^{9}, Neh 7^{14}).—**1.** The publican. All that we know of him from the Bible is to be found in Lk 19$^{1-10}$. He was a Jew,* and a chief official amongst the publicans in and about Jericho, where a considerable amount of revenue was raised from the palm-groves and balsam (Joseph. *Ant.* XV. iv. 2). Zacchæus had therefore great opportunities for growing rich. He was a man of short stature. Anxious to see Jesus, he climbed up into a sycomore tree † to be above the throng that surrounded our Lord. On coming to the place, Jesus called to him to come down, and invited Himself to his house. This delighted Zacchæus, though the bystanders murmured at the choice of lodging which our Lord had made. He declared his anxiety to be liberal to the poor, and to make fourfold restitution to any whom he had wronged. His wish to do right won from Christ the declaration: 'To-day is salvation come to this house, forasmuch as he also is a son of Abraham. For the Son of man came to seek and to save that which was lost.' In the *Clementine Homilies* (iii. 63), Zacchæus, after being companion of St. Peter, is made by him bishop of Cæsarea. By 'Prædestinatus' he is said to have combated the errors of Valentinus and Ptolemæus (a disciple of Valentinus),‡ though this is chronologically impossible. There is no early authority for making Zacchæus a bishop at all. A Zacchæus is mentioned by the Talmud as living at Jericho, the father of the celebrated Rabbi Jochanan ben-Zachai.

2. An officer of Judas Maccabæus, 2 Mac 10^{19}.

H. A. REDPATH.

ZACCUR (זַכּוּר).—**1.** A Reubenite, Nu 13$^{4\,(5)}$ (B *Ζακχύρ*, A *Ζαχρού*, Luc. *Ζαγχούρ*). **2.** A Simeonite, 1 Ch 4^{25} (B om., A *Ζακχούρ*, Luc. *Ζαχούρ*). **3.** A Merarite, 1 Ch 24^{27} (*Ζακχούρ*). **4.** An Asaphite, 1 Ch 25^{2} (B *Σακχούς*, A *Ζακχούρ*) ^{10} (B *Ζαχχούθ*, A *Ζακχούρ*), Neh 12^{35} (*Ζακχούρ*). **5.** One of those who assisted Nehemiah to rebuild the wall, Neh 3^{2} (B *Ζαβαούρ*, A and Luc. *Ζακχούρ*). **6.** One of those who sealed the covenant, Neh 10^{12} (B *Ζαχώρ*, A *Ζακχώρ*, Luc. *Ζακχούρ*), prob. same as mentioned in 13^{13} (BA *Ζακχούρ*, Luc. *Ζακχούρ*). **7.** Ezr 8^{14} *Ḳĕrê*. See ZABBUD.

ZACHARIAH (*Ζαχαρίας*, whence AV *Zacharias*).—In His denunciation of the Pharisees and the guilty nation of the Jews, our Lord declares that the innocent blood of the prophets is to be required of them, 'from the blood of Abel the righteous unto the blood of Zachariah the son of Barachiah, whom ye slew between the sanctuary and the altar' (Mt 23^{35}, cf. the ‖ Lk 11^{51}). The reference is almost certainly to the murder of Zechariah (see ZECHARIAH, No. 11) recorded in 2 Ch 24$^{20-22}$. This is far more likely than the view held by some, that the Zachariah intended is the father of John the Baptist (see ZACHARIAS), who, according to Origen (*Com. in Matt.*), was killed in the temple. The reason why Jesus fixes upon a murder in the time of king Joash (*c.* 840-800 B.C.) is probably because the Books of Chronicles already in our Lord's day came last in the Canon of the OT. 'It was equivalent to an appeal, in Christian ears, to the whole range of the Bible from Genesis to Revelation' (Ryle, *Canon of the OT*, p. 141).

Some difficulty is occasioned by the designation 'son of Barachiah.' The Zechariah of 2 Chron. was the son of the high priest Jehoiada. The only 'Zechariah the son of Berechiah' known to us is the prophet who was contemporary with

---

* Tertullian (*adv. Marc.* iv. 37. 1) says that he was a Gentile. This is contradicted by the 'son of Abraham' of Lk 19^{9}.

† Not the tree commonly called sycomore, but one with fig-like fruits and leaves like those of the mulberry tree.

‡ See Harnack, *Geschichte der altchristlichen Litteratur*, vol. i p. 791.

Haggai (cf. Zec 1^{1}). There may be a confusion with him on the part of the evangelist Matthew [Luke omits the designation 'son of Barachiah'] or of a glossator.*

ZACHARIAS (Ζαχαρίας).—**1.** 1 Es 1^{8}=Zechariah, one of 'the rulers of the house of God' in Josiah's reign, 2 Ch 35^{8}. **2.** In 1 Es 1^{15} (LXX ^{14}) Zech. stands in place of Heman, the singer of David's time, in the parallel passage 2 Ch 35^{15}. **3.** 1 Es 6^{1} 7^{3} the prophet Zechariah. **4.** 1 Es 8^{30} = Zechariah of the sons of Parosh, Ezr 8^{3}. **5.** 1 Es 8^{37} (B Ζαχαριαί) = Zechariah of the sons of Bebai, Ezr 8^{11}. **6.** 1 Es 8^{44} (LXX ^{43}) = Zechariah, one of the 'principal men and men of understanding' with whom Ezra consulted, Ezr 8^{16}. **7.** 1 Es 9^{27} = Zechariah of the sons of Elam, Ezr 10^{26}. **8.** 1 Es 9^{44}=Zechariah, one of those who stood upon Ezra's left hand at the reading of the Law, Neh 8^{4}. **9.** 1 Mac 5$^{18.\,56}$ Father of Joseph, a leader in the Maccabæan war under Judas Maccabæus. **10.** Lk 1^{5} etc. Father of John the Baptist. See following article.

ZACHARIAS (Ζαχαρίας).—Father of John the Baptist (Lk 1^{5} etc. 3^{2}). He was a priest of the course of ABIJAH, one of the twenty-four courses into which from the time of the Chronicler at least (1 Ch 24$^{7-18}$) the families of the priests that had returned from Babylon were divided (see Schürer, *HJP* II. i. 216, 219). The course of Abijah was the eighth of these courses, and had now been brought up for its week's service in the temple. The lot for that particular day's service (see Edersheim, *The Temple*, p. 129 ff.) had fallen to the house of Zacharias, and to Zacharias himself the duty of offering incense in the Holy Place. While performing this service he had a vision, and the Angel of the Lord announced that his aged wife should have a son, who should be called John, and be the forerunner of the Messiah. Asking a sign he was struck dumb, and recovered speech only after having the child named John at his circumcision. The Song of Praise which is put in his mouth, the *Benedictus* (Lk 1$^{67-79}$), celebrates in prophetic strains the glorious fulfilment of Israel's Messianic hope. With the song he drops completely out of the pages of canonical Scripture.

ZACHARY (*Zacharias*), 2 Es 1^{40}.—The prophet Zechariah.

ZADOK.—**1.** The most important of the many persons who bore this name was the founder of the leading branch of the priesthood in Jerusalem. We have no reliable information concerning his origin or his early history. He comes before us first in a list of David's officers, where we are told that 'Zadok the son of Ahitub, and Ahimelech the son of Abiathar, were priests' (2 S 8^{17}).

The text of this verse is obviously corrupt. Ahimelech was murdered at Nob, and his son Abiathar was David's attendant and priest to the end of his reign. If Ahitub, in our passage, is the priest mentioned in 1 S 14^{3} he can hardly have been Zadok's father, for we are certainly meant to understand that Zadok did not belong to the descendants of Eli (1 S 2^{35}, 1 K 2^{27}). Comparing 1 S 22^{20} it would seem that 2 S 8^{17} should run: 'Abiathar the son of Ahimelech, the son of Ahitub, and Zadok, were priests.'

Zadok and Abiathar appear again when David fled from Jerusalem before Absalom. They purposed accompanying him and taking with them the ark, but the king bade them return with it to the city, watch the course of events, and send him news (2 S 15$^{24\text{ff.}}$).

According to the Vulg. (*O videns*) and many modern versions, he addresses Zadok as a seer. 'Art thou not a seer?' (AV and RV text 2 S 15^{27}). But the Heb. will not bear this rendering, and it is difficult to be content with any pointing or translation of it. The LXX רְאוּ (Ἴδετε) is better. Wellhausen (*Text der Bb. Sam.* p. 177) proposes to read הַכֹּהֵן הָרֹאשׁ for הַכֹּהֵן הֲרוֹאֶה: if the two words are a late insertion this would be an improvement. In any case, there is no reason for believing that Zadok bore the title of 'seer.'

At the close of David's reign Abiathar joined the party of Adonijah (1 K 1^{7}), but Zadok gave in his adhesion to Solomon (v.^{8}), and was ordered by the king to anoint him (v.^{34}). When Solomon had made sure of his position he deposed Abiathar from the priestly office, 'and Zadok the priest did the king put in the room of Abiathar.' This event has influenced the earlier narratives in Samuel, where Zadok is from the first put before Abiathar.

There can be no doubt that the descendants of Zadok continued during many centuries to take the lead amongst the priests of the temple. The Deuteronomic reform raised them to an even higher position than they had occupied previously, for it denied the legitimacy of all sacrifices offered elsewhere than at Jerusalem, and thus brought the provincial priesthood into discredit. Ezekiel went further. To him the sons of Zadok were the only legitimate priests (40^{46} 43^{19} 44^{15} 48^{11}); the rest of the Levites, because of their unfaithfulness, were to be degraded, nothing but the menial work of the sanctuary being left in their hands (44$^{10-14}$).

The Chronicler's accounts require separate treatment. 1 Ch 12^{28} states that amongst 'the heads of them that were armed for war, which came to David to Hebron, to turn the kingdom of Saul to him,' was 'Zadok, a young man mighty of valour, and of his father's house twenty and two captains.' As he is said to have been of the house of Aaron, we cannot wonder that Josephus (*Ant.* VII. ii. 2) identifies him with the priest. But the narrative as a whole is conceived in a totally different spirit from those in Samuel, and the details do not command our credence. The numbers alone are sufficient to condemn it. Equally unsatisfactory are the genealogical lists in which Zadok's descent from Eleazar is traced (1 Ch 6$^{4-15.\,50-53}$ 24^{3}). Their object is to make out that the Zadokite priests belonged to the elder branch of Aaron's descendants, and the descendants of Eli to the younger branch of Ithamar. The most cursory inspection reveals their artificial construction and their unreliableness. The utmost we can gather from the Chronicler is the fact that after the return from the Exile some families which traced no connexion with Zadok managed to vindicate their right to minister at the altar (1 Ch 24$^{3.\,4}$), but that his representatives were both more numerous and more highly placed (1 Ch 24$^{3.\,4}$ 27^{17}; 1 S 2$^{33.\,36}$ points in the same direction). See, further, art. PRIESTS AND LEVITES.

The MT vocalization צָדוֹק, is probably mistaken. The LXX frequently has Σαδδούκ a transliteration of צַדּוּק. From Σαδδούκ was derived Σαδδουκαῖος, although it cannot be unhesitatingly affirmed that the SADDUCEES took their name immediately from the original Zadok. There can, however, be no doubt as to their close connexion with the priestly aristocracy.

2. In 2 K 15^{33}, 2 Ch 27^{1}, we are told that Jotham succeeded Uzziah, his father, and that his mother's name was Jerusha, the daughter of Zadok. In the statements concerning the accession of a king it is not usual to give the maternal grandfather's name; possibly, therefore, Jotham's grandfather was a person of considerable importance, not improbably a priest.—**3.** Neh 3^{4} mentions a Zadok, son of Baana (בַּעֲנָא), as one of Nehemiah's willing helpers in rebuilding the city wall. His father seems to be mentioned as one of those who came to Jerusalem with Zerubbabel, Ezr 2^{2}, Neh 7^{7}.—**4.** Zadok, the son of Immer, Neh 3^{29}, repaired the wall 'over against his own house,' on the east side of the city, near the horse-gate. We have no means of deciding positively whether he is to be identified with the bearer of the same name in a later passage of the book. But there is no conclusive reason against the identification. Zadok 'the scribe' is appointed by Nehemiah to be one of the 'treasurers over the treasuries' (Neh 13^{13}). He would seem to have been a priest. Shelemiah the priest and himself are distinguished from the Levites. Ezra's example shows that the priest may also be the scribe. In this case Zadok must have been the head of 'the children of Immer.'—**5.** Zadok is distinguished from the priests as one of 'the chiefs of the people' who sealed the covenant (Neh 10^{21}).—**6.** 1 Ch 6^{12}, compared with Ezr 7^{2} and Neh 11^{11}, appears to refer to a high priest of the name of Zadok later than the founder of the line. But it is impossible to rely on these lists, and, in any event, nothing is known of the man.

---

* A Zechariah 'the son of *Jeberechiah*' is mentioned in Is 8^{2}, but it is quite unlikely that he was thought of in Mt 23^{35}.

Mt 1^{14} mentions a SADOC (*Σαδώκ*) as one of the progenitors of Joseph, the husband of Mary. Josephus (*Ant.* XVIII. i. 1) states that one Zadok, a Pharisee, assisted Judas of Galilee (Ac 5^{37}) in rousing the people against the 'enrolment' under Quirinius (Lk 2^{1}). Jost (*Gesch. des Judenthums*, ii. 29) refers to a Zadok who is mentioned in the Talmud as having fasted forty years, until the destruction of Jerusalem. He propounds a theological puzzle first to Rabbi Joshua and next to Rabban Gamaliel, who give him discordant answers. Thereupon Joshua is publicly rebuked and put to shame by Gamaliel (*Bech.* 36*a*).

J. TAYLOR.

ZAHAM (זָהַם).—A son of Rehoboam, 2 Ch 11^{19} (B Ῥοολλάμ, A Ζαλάμ, Luc. *Ζαάμ*).

ZAIN (ז).—The seventh letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 7th part, each verse of which begins with this letter. It is transliterated in this Dictionary by *z*.

ZAIR (צָעִיר).—According to the MT of 2 K 8^{21}, Joram, in the course of his campaign against Edom, 'passed over to Zair' (B *εἰς Ζειώρ*, A om.). In the parall. passage 2 Ch 21^{9} the Heb. is 'passed over with his princes' (עִם־שָׂרָיו; LXX *μετὰ τῶν ἀρχόντων*), which may be confidently pronounced to be a corruption of the text in Kings. The latter itself is unfortunately not certain. No place of the name of *Ẓa'ir* being mentioned elsewhere, it has been conjectured that *Ẓo'ar* (Ewald, *et al.*) or *Se'ir* (cf. Vulg. *Seira*) should be read. The latter, however, is somewhat vague, and against the claims of *Ẓo'ar* may be urged the LXX *Σειώρ*, whereas that name is elsewhere reproduced by *Σηγώρ* (cf. Buhl, *Edom.* 65, who also objects to Conder's suggested identification of Ẓa'ir with *ez-Zuwēra* S.E. of the Dead Sea).

ZALAPH (צָלָף; B Σελέ, A and Luc. Σελέφ).—The father of Hanun, who assisted in repairing the wall, Neh 3^{30} [the text is a little suspicious, 'the *sixth* son' being a somewhat peculiar note, which, however, is supported by the VSS].

ZALMON (צַלְמוֹן; Σελμών; *Salmon*).—**1.** The place mentioned in Ps 68^{14} is considered by some commentators to be the same as Mount Zalmon (Jg 9^{48})—the hill, near Shechem, on which Abimelech and his people cut down boughs to set 'the hold' of the house of El-berith on fire. There is, however, nothing in Ps 68 to lead to the belief that the Psalmist intended to refer to an underfeature of Mount Gerizim, which is mentioned in the OT only in connexion with an incident that had no influence on the history of the Israelites. The central idea of the psalm is the selection of Zion as the abode of God, in preference to Sinai whence the Law was given, and to 'the mountain of Bashan' which had looked down upon the memorable overthrow of Og and his army. The earlier verses contain a retrospective glance at the journey of the Israelites from Sinai onwards, through the desert, under the immediate leading and guidance of God, and their triumphant occupation of Canaan after vanquishing all their enemies. In this victorious progress, one of the most striking incidents was the complete overthrow of Og, near Edrei, on the plains of Bashan,—a victory which long lingered in the national memory (Ps 135^{11} 136^{20}),—and Zalmon should probably be looked for in that region. Some suppose that Zalmon means 'darkness,' and connect it with the 'darkly' wooded hill near Shechem, but this meaning would be equally applicable to the basalts and volcanic hills of Bashan. Zalmon may have been a portion of Bashan, or one of the summits of *Jebel Hauran*, or Mount Hermon. (In Jg 9^{48} the LXX reads ὄρος Ἑρμών for Mount Zalmon). The allusion to the snow is supposed by some to refer to ground white with the bones of Canaanites slain in battle; but this is rather straining the meaning. Possibly the words refer to an actual fall of snow in Zalmon during the battle with Og.

2. One of David's heroes, 2 S 23^{28}. See ILAI.

C. W. WILSON.

ZALMONAH (צַלְמֹנָה, Σελμονά).—The station in the journeyings of the children of Israel, following Mt. Hor, in the itinerary of Nu 33, and mentioned there only in vv.$^{41.\,42}$. Nothing is known as to its position. It must have been in the neighbourhood of Punon, the station following; and, if the identification in art. PUNON be accepted, its site would be approximately determined.

The Gr. rendering is identical with that of Hashmonah, as has been noticed in art. HASHMONAH; but the same rendering also occurs for Azmon of Nu 34^{5} in A, Ἀσελμωνά in F, and in AF of Nu 33^{29} for Hashmonah. Ewald's proposed modification of the text, which would separate Mt. Hor from Zalmonah by inserting vv.$^{36b\text{-}41a}$ after Hashmonah, has been given in art. EXODUS, vol. i. p. 805^{b}.

A. T. CHAPMAN.

ZALMUNNA.—See ZEBAH.

ZAMBRI (B *Ζαμβρεί*, A *Ζαμβρίς*, AV Zambis), 1 Es 9^{34} = Amariah, Ezr 10^{42}.

ZAMOTH (*Ζαμόθ*), 1 Es 9^{28} = Zattu, Ezr 10^{27}.

ZAMZUMMIM (זַמְזֻמִּים; LXX *Ζοχομμιν*, A *Ζομζομμειν*, F *Ζομμειν*).—In the archæological notice, Dt $2^{20\text{-}23}$, said (v.^{20}) to have been the name given by the Ammonites to the 'Rephaim,' who once inhabited their land, but had afterwards been expelled by them,—a people 'great and many and tall, like the Anaḳim' (comp. the similar note in vv.$^{10.\,11}$ respecting the 'Emim,' the prehistoric occupants of the territory possessed afterwards by Moab, and in v.^{12} respecting the Ḥorites, the original occupants of Edom). The REPHAIM were a people, reputed to have been of giant stature, who left remains or memories of themselves in different parts of Palestine,—cf. *e.g.* the 'Vale of Rephaim' Jos 15^{8} *al.* S.W. of Jerus., and the description of Og, king of Bashan, as 'of the remnant of the Rephaim,' also 2 S $21^{16.\,18.\,20.\,22}$ RV; and the Ammonites called those Rephaim who, in prehistoric times, had inhabited their own territory by the name 'Zamzummim.' This is all that is known about them. As regards the name, *zamzamah* in Arab. is *a distant and confused sound*, and *zizîm* is the *low hum of the Jinn* heard in the desert at night (Lane, 1248 f.), whence W. R. Smith (*ap.* Driver on Dt 2^{20}) thinks with Schwally that the name meant properly *whisperers, murmurers*, and denoted the spirits (cf. Is 8^{19}) of the old giants, which 'were still thought to haunt the ruins and deserts of East Canaan.' But of course this is only a conjecture: we do not *know* that the root *zamzama*, with its Arabic meaning, was in use in Ammonitish. Cf. ZUZIM.

S. R. DRIVER.

ZANOAH (זָנוֹחַ).—**1.** A town in the Shephēlah, Jos 15^{34} (B *Τανώ*, A and Luc. *Ζανώ*), Neh 3^{13} (BA

Ζανώ, Luc. *Ζανών*) 11^{30} (BA om., ℵ$^{\text{c. a mg inf.}}$ *Ζανῶε*, Luc. *Ζανώ*), 1 Ch 4^{18} (BA *Ζανών*, Luc. *Ζανῶε*). In the last cited passage Jekuthiel is said to have been the 'father' of Zanoah. The place, it is generally agreed, is the modern *Zanu'a*, S.E. of Zoreah (Robinson, *BRP*^{2} ii. 61). 2. A place in the mountains, Jos 15^{56} (B *Ζακαναείμ* [combining זָנוֹחַ and the following הַקָּיִן], A *Ζανώ*, Luc. *Ζανού*), possibly *Zânûta* S.W. of Hebron (*SWP* iii. 404), although Dillm. objects that this is too far south.

ZAPHENATH-PANEAH (צָפְנַת פַּעְנֵחַ, *Ψονθομφανήχ*).—The name given by Pharaoh to Joseph (Gn 41^{45}). Far-fetched attempts of the ancients to explain it by Hebrew have found no favour amongst modern commentators, the name being evidently intended for Egyptian. In 1886 Krall connected it with a well-known Egyptian type of name (*zd*+divine name+*e*-*f* *'nḥ*) meaning 'Said Amon (Bast, Mont, etc.), he liveth,' and in subsequent years Steindorff established its identity more closely (*Zeitschrift für Ægyptische Spr. u. Alterthumskunde*, 1889, 41, 1892, 50). The Massoretic vocalization of the name is wrong: so also are the Greek forms in the LXX and elsewhere. But the consonants in the Hebrew text are a precise transliteration of those in *ϫⲉ-ⲡⲛⲉⲧ-ⲉϥ-ⲱⲛϧ, which would be approximately the pronunciation of a hieroglyphic name * 'Said God, he liveth.' A Greek mummy-label of the Roman age preserves an example of the same formation Καμεντεβωνχ, where Μωνθ (shortened to Μεντ-) is the divinity (Steindorff, *l.c.*). This type of personal name grew extremely common in the period of the Deltaic dynasties (22nd–26th): earlier, it is extremely rare, and has not yet been traced before the end of the 20th dynasty. Probably many details in the story of Joseph date from the 26th dynasty (B.C. 666–525), there being much intercourse between Egypt and Palestine at that period. The compound with *p ntr* 'The God' (ⲡⲛⲟⲩⲧⲉ shortened to ⲡⲛⲉⲧ-) has not yet been found on Egyptian monuments: it is probably a monotheistic touch added by a Hebrew familiar with Egypt and the Egyptian language. F. LL. GRIFFITH.

ZAPHON (צָפוֹן 'north').—A city E. of Jordan, assigned to Gad, Jos 13^{27} (B *Σαφάν*, A and Luc. *Σαφών*). It is named also in Jg 12^1, where צָפוֹנָה should be rendered 'to Zaphon' (RVm) instead of 'northward' (AV and RV). LXX in the latter passage: B, translating, *εἰς βορρᾶν*; A and Luc., not recognizing the ה *locale*, have, respectively, *Κεφεινά* and *Σεφηνά*. Eusebius and Jerome (*OS*^{2} 219, 75; 91, 26) mention an Amathus 21 miles south of Pella, and the same place is referred to by Josephus (*BJ* I. iv. 2 [if the text be correct]) as the strongest fortress on the Jordan, and as the seat of one of the *synedria* instituted by Gabinius (*Ant.* XIV. v. 4). This is the modern *'Amāteh*, a little north of the Jabbok, at the mouth of Wādy er-Rugeib. There appears to be no reason (in spite of Buhl, *GAP*, 259) to doubt the Talmudic tradition that Amathus represented the ancient Ẓaphon (see Neubauer, *Géog. du Talm.* 249).

Ẓaphon is probably connected with צִפְיוֹן **Ẓiphion** (Gn 46^{16}), or (more correctly) צְפוֹן **Ẓĕphon**, with gentilic name **Ẓephonites** (Nu 26^{15}; LXX *Σαφών*, *Σαφων(ε)ί*), described as a 'son' of Gad.

ZARAIAS (*Ζαραίας*).—**1.** (A *Ζαρέας*, AV Zacharias) 1 Es 5^8=Seraiah, Ezr 2^2; Azariah, Neh 7^7. **2.** 1 Es 8^2 (B om.), one of the ancestors of Ezra, called Zerahiah, Ezr 7^3, and Arna, 2 Es 1^2. **3.** 1 Es 8^{31}= Zerahiah, the father of Eliehoenai, Ezr 8^4. **4.** 1 Es 8^{34}=Zebadiah, son of Michael, Ezr 8^8.

ZARAKES (B *Ζάριος*, A *Ζαράκης*, AV Zaraces), 1 Es 1^{38} (LXX ^{36}). He is there called brother of Joaḳim or Jehoiaḳim, king of Judah, and is said to have been brought up out of Egypt by him.—The name apparently is a corruption, through confusion of ד and ר, of Ẓedeḳiah, who was a brother of Jehoiaḳim, 2 K 24^{17}. The verse of 1 Es. is entirely different from the corresponding passage in 2 Ch 36^{4b}.

ZARDEUS (B *Ζεραλίας*, A *Ζαρδαίας*, AV Sardeus), 1 Es 9^{28}=Aziza, Ezr 10^{27}.

ZAREPHATH (צָרְפַת; LXX and NT *Σάρεπτα* [A in 1 K 17^9 *Σεφθά*]).—The Arab. village of *Ṣarafend* lies on a promontory about eight miles south of Ẓidon. On the shore in front of it are the scattered remains of what must have been a considerable town, the Zarephath or **Sarepta** of the Bible. This was possibly also Misrephoth-maim of Jos 11^8 13^6 [but see MISREPHOTH-MAIM]. Zarephath originally belonged to Ẓidon (1 K 17^9), but passed into the possession of Tyre after the assistance rendered by the fleet of Ẓidon to Shalmaneser IV. in B.C. 722 in his abortive attempt to capture insular Tyre. In Lk 4^{26} it is again called a city of Sidon (RV 'in the land of Sidon'). Zarephath is included in the list of towns captured by Sennacherib when he invaded Phœnicia in B.C. 701. It was the town in which Elijah lodged during the years of famine (1 K 17^{8-24}). In the middle of the present ruins, by the shore, stands a shrine of St. George, occupying the place of the Crusaders' Chapel, which was built on the traditional site of Elijah's upper room. The rewarded faith of the Gentile woman of Sarepta was recalled by Christ in the synagogue of Nazareth, and the allusion gave deep offence to His hearers (Lk 4^{26}). Here may have lived the Syro-Phœnician woman whose faith was greatly commended by Christ, and whose daughter was healed by Him (Mt 15^{21-28}, Mk 7^{24-30}).

G. M. MACKIE.

ZARETHAN (צָרְתָן).—When the Jordan was divided, the waters rose up in a heap 'at ADAM, the city that is beside Zarethan' (Jos 3^{16}, LXX om.). One of Solomon's commissariat officers had in his district 'all Bethshean which is beside Ẓarethan, beneath Jezreel' (1 K 4^{12}, LXX om.). The bronze castings for the temple were made in the Jordan district 'at the ford of Adamah [reading, with Moore, במעברת (ה)אדמה for MT במעבה ה׳ (AV and RV 'in the clay ground')] between Succoth and Ẓarethan' (1 K 7^{46}). In the parallel passage 2 Ch 4^{17} the name appears as **Ẓerēdah** צְרֵדָה (B corruptly *'Αναμεσιρδάθαι* [? = *ἀνὰ μέσον Σιρ.*], A *ἀνὰ μέσον Σαδαθά*, Luc. *Σαριδαθά*), which is named in 1 K 11^{26} (B and Luc. *Σαρειρά*, A *Σαριδά*) as the birthplace of Jeroboam, and in Jg 7^{22} [where read צְרֵדָה Ẓeredah for צְרֵרָה **Ẓerērah**; B *Γαραγαθά*, A om., Luc. *καὶ ἦν συνηγμένη*] in connexion with the flight of the Midianite host.

Ẓarethan or Ẓeredah cannot be precisely located, but must be sought in the vicinity of *ed-Dāmieh* (the city of Adam of Jos 3^{16}). The proposal (van de Velde, Knobel, *et al.*) to identify with *Ḳarn Ṣarṭabeh*, the great landmark of the Jordan Valley, must be rejected on phonetic and other grounds (see Dillm. *Jos. ad loc.*; Moore, *Judges*, 212 f.; Kittel, *Könige*, 34; Buhl, *GAP* 181).

J. A. SELBIE.

ZATHOES (*Ζαθοής*, AV Zathoe), 1 Es 8^{32}, probably stands for Zattu. The name does not appear in the Heb. of the corresponding passage Ezr 8^5, which should be corrected by 1 Es. so as to run 'Of the sons of Zattu, Shecaniah the son of Jahaziel.'

ZATHUI (B *Ζατόν*, A *Ζαθθουί*), 1 Es 5^{12}=Zattu, Ezr 2^8, Neh 7^{13}; called also Zathoes, 1 Es 8^{32}.

ZATTU (זַתּוּא).—The name of a family of exiles that returned, Ezr 2^{8} (B *Ζαθουά*, A and Luc. *Ζαθθουά*) = Neh 7^{13} (B *Ζαθουιά*, A *Ζαθθουά*): several members of this family had married foreign wives, Ezr 10^{27} (B *Ζαθουιά*, A *Ζαθουά*, Luc. *Ζαθθουά*); its head sealed the covenant, Neh $10^{14\,(15)}$ (B *Ζαθουιά*, A *Ζαθθουιά*, Luc. *Ζαθθαίας*). The name of this family has dropped out of the Heb. text of Ezr 8^{5}; see SHECANIAH, No. 2.

ZAZA (זָזָא).—A Jerahmeelite, 1 Ch 2^{33} (B *Ὀζάμ*, A *Ὀζαζά*, Luc. *Ζηιζά*). The initial Ὀ of BA is due to taking the ו of MT וזזא as part of the name, and not as the particle = 'and.'

ZEALOT.—See CANANÆAN.

ZEBADIAH (זְבַדְיָה and זְבַדְיָהוּ 'J" hath bestowed'; cf. the names יְהוֹזָבָד and זַבְדִּיאֵל).—**1. 2.** Two Benjamites, 1 Ch 8^{15} (B *Ἀζαβαβιά*, A *Ἀζαβαδιά*, Luc. *Ζαβαδιά*) ^{17} (BA *Ζαβαδιά*). **3.** One of those who joined David at Ẓiklag, 1 Ch 12^{7} (B *Ζαβιδιά*, A *Ζαβαδιά*). **4.** One of David's officers, son of Asahel, 1 Ch 27^{7} (B *Ἀβδείας*, A *Ζαβδίας*, Luc. *Ζαβδαίας*). **5.** An exile who returned with Ezra's second caravan, Ezr 8^{8} (*Ζαβδειά*, A *Ζαβδίας*, Luc. *Ζαβδίας*); called in 1 Es 8^{34} **Zaraias.** **6.** A priest, of the sons of Immer, who had married a foreign wife, Ezr 10^{20} (B *Ζαβδειά*, A *Ζαβδιά*, Luc. *Ζαβδιάς*); called in 1 Es 9^{21} **Zabdeus.** **7.** A Korahite, 1 Ch 26^{2} (B *Ζαχαρίας*, A and Luc. *Ζαβαδίας*). **8.** One of the Levites sent by Jehoshaphat to teach in the cities of Judah, 2 Ch 17^{8} (B *Ζαβδείας*, A *Ζαβδίας*). **9.** An officer of king Jehoshaphat, entrusted with judicial functions, 2 Ch 19^{11} (B *Ζαβδείας*, A *Ζαβδίας*, Luc. *Ζαβαδαίας*).

ZEBAH and **ZALMUNNA** (זֶבַח 'victim,' צַלְמֻנָּע 'shade, *i.e.* protection, withheld'; *Ζέβεε*, *Σελμανά*; Jg $8^{4\text{-}21}$, Ps 83^{11}).—The narrative of Gideon's pursuit of these two Midianite kings (Jg $8^{4\text{-}21}$) cannot be a continuation of the foregoing verses (7^{23}–8^{3}); it must be derived from another source, attached abruptly, and with the loss of its opening verses, to the story of the defeat of Midian. So far from a victory having been just won, it seems such a remote possibility that the men of Succoth and Penuel treat Gideon with derision as he passes them on the track of the two kings ($8^{6.\,8}$). The kings were returning to their country, laden with spoil ($8^{24\text{ff.}}$); they were not in flight, and had no thought of being pursued (8^{11}), otherwise they would have used the advantage which their camels (8^{26}) gave them to effect their escape. We gather, in fact, from this narrative ($8^{4\text{-}21}$) that Gideon's expedition against Zebah and Ẓalmunna was not part of the general campaign against Midian, but a private enterprise of personal revenge. On one of their raids, probably on this very one from which they were returning, the two Arab chieftains had murdered Gideon's brethren at Tabor, doubtless a place near Ophrah (8^{18}). To Gideon, as next of kin, fell the duty of avenging their blood. Collecting 300 of his clan, he followed the enemy across the Jordan, attacked them unexpectedly at Karkor, captured the two kings, and, after exhibiting them as his prisoners to the men of Succoth, carried them back in triumph, probably to his home at Ophrah (Moore). There he slew them with his own hand, when his young son refused to be their executioner, the two kings meeting their fate with barbaric courage. The execution was a religious act as well as an act of blood-revenge, and may well have taken place before the altar (Smend, *AT Religionsgeschichte*, 128). Human victims were similarly sacrificed after the return from a victorious campaign (Jg $11^{30\text{f.}\,39}$), or as the chief portion of the spoil (1 S 15^{33}). W. R. Smith, (*RS* 397 n.) compares the choice of Gideon's young son as executioner of the kings with the choice of 'young men' or 'lads' as sacrificers (Ex 24^{5}), and illustrates from the custom of the Saracens, who charged lads with the execution of their captives. The pronunciation of the names Zebah and Ẓalmunna represents merely a popular etymology, which gave a contemptuous meaning, 'victim,' 'protection withheld,' to the names of the kings. The first syllable of Ẓalmunna may be the name of a deity *Ẓalm*, found in Aramaic inscriptions from Teima (*CIS* pars. II. cxiii, cxiv), perhaps also in the Phœnician *Ẓadam* (*Ẓalam*) - *ba'al* (*CIS* i. cxxxii), called in Greek *Σαλαμβώ*, or *-ας*; see Hoffmann, *ZA* xi. 244 f. On the other hand, the names may be merely symbolic, and not the actual names of the two kings (so Nöldeke, *Die Amalekiter*, 9 n., and Stade, *GVI* i. 190).

G. A. COOKE.

ZEBEDEE (*Ζεβεδαῖος*; Heb. זַבְדִּי 'gift of J",' or, more properly, Aram. זַבְדַּי; raising the question why the name is not spelt *Ζαβδαῖος*, as in the OT [1 Es 9^{21} etc.], but *Ζεβεδ-*. On Jewish bearers of this name see Jastrow, *Dict.* 377, where also a local name בֵּית זַבְדִּין, 'probably in Galilee,' is mentioned).—The father of the apostles James and John (Mt 4^{21}) and the husband of Salome (Mt 27^{56}, Mk 15^{40}). Zebedee followed the occupation of fisherman on the Sea of Galilee, and was apparently in easy circumstances, to judge from the mention of his 'boat with the hired servants' (Mk 1^{20}). This is also borne out by the facts that his wife was one of the pious women who afterwards ministered to the Lord of their substance (Mt $27^{55.\,56}$, Lk $8^{2.\,3}$); and that his son John was personally known to the high priest (Jn 18^{16}), and had the means of providing for the mother of Jesus (Jn 19^{27}). Zebedee himself comes before us directly only in connexion with the call of his sons; and, from his raising no objection, it has been conjectured that he himself was a disciple of John the Baptist, as his sons certainly were, and by him had been taught to regard Jesus as the Messiah. Whether he ever became an active follower of Jesus it is impossible to say. The subsequent silence of Scripture regarding him would incline one to think not, unless this silence is to be explained by Zebedee's death soon after his sons' call.

According to Barhebræus (on Mt 10^{2}) and the *Book of the Bee*, the sons of Zebedee belonged to the tribe of Zebulun; according to the *Gospel of the Twelve Apostles* (ed. Harris, p. 26), to the tribe of Issachar.

G. MILLIGAN.

ZEBIDAH (so RV, following *Kĕthîbh* זְבִידָה; AV follows *Ḳĕrê* זְבוּדָה **Zebudah**).—The daughter of Pedaiah of Rumah, and mother of king Jehoiaḳim, 2 K 23^{36} [MT omits in ‖ 2 Ch 36^{5}]. In Kings the LXX has: B *Ἰελλὰ θυγάτηρ Ἐδεὶλ ἐκ Κρουμά*, A *Ειελδὰφ θυγάτηρ Ειεδδιλὰ ἐκ Ῥυμά*; in 2 Chron.: AB *Ζε(κ)χωρὰ θυγάτηρ Νηρείου ἐκ Ῥαμά*; Luc. has in both passages *Ἀμιτὰλ θυγάτηρ Ἰερεμίου* [confusing with Zedeḳiah's mother, 24^{18}].

ZEBINA (זְבִינָא).—One of the sons of Nebo who had married a foreign wife, Ezr 10^{43} (B *Ζανβινά*, A om., ℵ *Ζαμβεινά*, Luc. *Ζεβενεί*). See ZABAD, No. 6.

ZEBOIIM.—One of the five Cities of the Plain, Gn 10^{19} (צְבֹיִם) $14^{2.\,8}$, Dt $29^{23\,(22)}$ (*Kĕth.* in all צביים, *Ḳĕrê* צְבוֹיִם), Hos 11^{8} (*Kĕth.* צבאים; *Ḳĕrê* צְבוֹיִם, the א being regarded as quiescent; AV and RV here **Zeboim**). The LXX has uniformly *Σεβω(ε)ίμ* [but in Dt $29^{23\,(22)}$ AF *Σεβωείν*]. According to Böhme (on Neh 1–6, p. 3) the word is punctuated in MT upon the analogy of צְבֹעִים 'hyænas,' and so as to avoid suggesting צְבָיִם, צְבָיִים, or צְבָאִים 'gazelles.'

The site has not been identified. Upon the general question of the situation of the five Cities of the Plain see art. ZOAR.

ZEBOIM.—1. 'The ravine of Ẓebōʿim' (גֵּי הַצְּבֹעִים 'ravine of the hyænas'; BA *Γαὶ τὴν Σαμεὶν*, Luc. *Σαβαὶν*) is named in 1 S 13^{18} in describing the route followed by one of the bands of Philistine marauders. It is prob. the *Wādy el-Ḳelt* or one of its branches (Buhl, *GAP* 98; G. A. Smith, *HGHL* 291 n. 1). The name *Wādy abû dabâʿ* ('Hyæna gorge') is still applied to a ravine in this neighbourhood, though perhaps not to the identical one referred to in 1 Samuel. The same locality appears to be referred to in the Ẓeboim (BA om., ℵ$^{c. a}$ *Σεβοείμ*, Luc. *Σεβωεὶν*) of Neh 11^{34}. **2.** Hos 11^{8}. See ZEBOIIM.

ZEBUL (זְבֻל; *Ζεβούλ*, = 'height,' 'high dwelling' (?), perhaps shortened from '(God's) dwelling' or from (Baal)-zebul).—Jg $9^{28. 30. 36. 38. 41}$, Abimelech's officer (*paḳîd*) and governor (*sar*) of Shechem. By his loyalty and resource he dealt successfully with an insurrection against his master's authority in Shechem. It was an insurrection of Shechemites against Abimelech, who was only half a Shechemite by birth and had usurped his position (so Moore, *Judges* 255 ff., whose arguments are convincing). The interpretation of 9^{28} is uncertain; Moore reads 'served' for 'serve ye' (עָבְדוּ for עִבְדוּ), and explains, 'Abimelech and Zebul were formerly the servants of Shechem; why then should Shechemites serve them now?' Others take the insurrection to have been one of Israelites against Shechemites (*e.g.* Wellhausen, *Composition* 353 f.; Robertson Smith, *ThT* xx. 1886, 195–198); but this does not agree well with the rest of the narrative. See, further, ABIMELECH, No. 3.

G. A. COOKE.

ZEBULUN (זְבוּלוּן, זְבֻלֻן, זְבֻלוּן; *Ζαβουλών*, *Zabulon*).—The first and second forms of the name in Heb. are used interchangeably; the third occurs only in Jg 1^{30}. Two explanations of the name are given in Gn $30^{19 (20)}$. In the first (from E) Leah exclaims זְבָדַנִי אֱלֹהִים אֹתִי זֵבֶד טוֹב 'God has gifted me with a good gift,' ד of זבד being made equivalent to ל. In the second (from J) she cries, הַפַּעַם יִזְבְּלֵנִי אִישִׁי 'this time my husband will dwell (lie) by me,' *Zebulun* receiving a meaning like 'neighbour' or 'borderer' (Dillmann). From an Assyr. root the meaning 'will exalt (esteem) me' has been suggested, and Delitzsch (*Genesis*, *in loc.*) points out that this agrees with the LXX rendering *αἱρετιεῖ*; it seems doubtful, however, whether *zabâlu* means more than *to carry* or *bear* (not *to lift up*).

Zebulun appears in the lists of Jacob's sons, and as the ancestor of the tribe (Gn 46^{14}, Nu 26^{26}). An old Jewish tradition says he was the first of the five brethren presented by Joseph to Pharaoh (Targ. pseudo-Jon. on Gn 47^{2}). So far as our records go, the man and his life are wrapped in obscurity. The chief tribal families are three, at the head of which stand Zebulun's three sons: Sered, Elon, and Jahleel, said to have been born in Canaan before the settlement in Egypt (Gn 46^{14}).

In the desert journey Zeb. was placed with Issachar in the camp of Judah, eastward of the tabernacle. These marched in the van, under the standard of Judah (Nu $2^{7. 8}$). The tribe then numbered 57,400 men capable of bearing arms, and the headman or 'prince' was Eliab, son of Helon (Nu $1^{9. 30}$ 2^{7}). Gaddiel, son of Sodi, represented Zeb. among the spies (Nu 13^{10}). At Shittim, after the camp had been devastated by the plague, the warriors of Zeb. are given at 60,500 (Nu 26^{27}). Elizaphan, son of Parnach, acted with the representatives of the other tribes in the division of the land (Nu 34^{25}). At Shechem, Zeb. the youngest son of Leah, and Reuben, who had fallen from honour, are placed with the sons of the handmaids, over against the other six sons of Rachel and Leah, to make equal division of the tribes (Dt 27^{13}). Zeb. earned no special distinction either under Moses in the wilderness, or under Joshua during the Conquest. In the second division of territory the lot of Zeb. came up third (Jos 19^{10}), and there fell to him a stretch of country, richly diversified, with sylvan vale, fruitful plain, and breezy height.

The boundaries of Zeb. cannot now be traced with any certainty. As described in Jos 19^{10-16} it marched with Issachar on the S., Naphtali on the E. and N.E., and Asher on the W. and N.W. The eastern boundary probably ran from Tabor, along the W. border of Naphtali, as far north as *Kefr Anān* (Hannathon); turning westward, it skirted the district of *er-Rāmeh*, reaching the eastern border of Asher down the vale of *ʿAbilîn*, in which lies *Jafāt*, which some identify with Iphtah-el, or down *Wady el-Ḳurn*, further to the north (Conder): thence it passed southward to the lip of Kishon, opposite *Tell Kaimūn* (Jokneam). We can hardly even guess at the southern boundary. Chisloth-tabor, or Chesulloth (*Iksāl*), and Daberath (*Debūrieh*) seem to be given to Zeb. in v.^{12}; but in v.^{19} the former, and in 21^{28} the latter, are assigned to Issachar. Tabor, possibly the city on the mountain, 1 Ch 6^{77} places in the land of Zebulun. If *Debūrieh* belonged to Issachar, this would mean possession of at least part of the mountain, perhaps the western and southern slopes. If the two tribes shared the mountain, this may be alluded to in Dt 33^{19}. It is the most striking feature in the landscape, and round it sacred associations from of old were sure to gather. Other identifications proposed are precarious, and, if established, would produce a very peculiar border-line. *Tell Shadūd* may be identified with Sarid, by the substitution of *d* for *r*. In that case *Maʿlul* cannot be Marala, as it lies not westward, but a little east of north from *Tell Shadūd*; and not only the change of *r* to *l*, but also the intrusion of *ʿain* before *lamed*, must be accounted for. Again, it is difficult to conceive the line running from *Tell Shadūd* past *Iksāl* to *Debūrieh*, and then doubling back upon *Yafa*, as the identification of this last with Japhia would require. The authority for locating Gath-hepher at *el-Meshed* is very slender, and the name, which is of some antiquity, is against it. The line indicated for the western border of Naphtali seems to throw the boundary of Zeb. further to the east; so also the identification of Nahalal with *ʿAin Mahil.*

The Blessing of Jacob (Gn 49^{13}), which dates from the time of the Judges, or at latest not after Solomon, apparently gives Zeb. access to the sea. 'Zebulun, towards the strand of the sea he settles, he himself towards the strand of the ships, and his rear to, or towards, Ẓidon' (Dillm.); this is supported by Josephus (*Ant.* v. i. 22; *BJ* III. iii. 1). The boundaries between the tribes and the land held by the Canaanites must have varied from time to time, and possibly then Zeb. held an approach to the shore, perhaps through the gorge of Kishon and along the base of Carmel. But the words may mean only that the sea was near and easily reached; that Zeb. bordered on the coast, *i.e.* the coast-lands, and not the sea itself. Delitzsch translates, 'Zebulun, near to the coast of the sea shall he dwell, yea he, near to the coast of the ships, and his side leans on Ẓidon.' The reference to Ẓidon is obscure: Zeb. never approached that city. Possibly the name of their chief city is given to the rich coast-lands, including Acre, from which the Phœnicians were never driven out (Jg 1^{31}). The much later writer in Joshua (P) knows nothing of any 'outgoing' of the territory to the Mediterranean. 'The way of the sea' (Is 9^{1}), the great highway of commerce from north and east to the harbour at Acre, which passed through a large part of his land, and brought Zeb. into contact with the trade of the world, would itself enable him to 'suck the treasures of the sea' (Dt 33^{19}).

In Zeb. four cities were given to the Levites—Jokneam, Kartah, Dimnah (Dillm. and others read Rimmon), and Nahalal (Jos 21$^{34.35}$). Of these, Kitron (identical with Kartah [see art. KARTAH]) and Nahalal (probably *'Ain Mahil*) remained in the hands of the Canaanites, and so could not be occupied by the Levites (Jg 1^{30}). In 1 Ch 6^{77} [Heb. ^{62}] only Rimmono (Rummaneh) and Tabor are named, the latter corresponding with no name in the former list.

What is said of the territory of Naphtali (see art. NAPHTALI) applies generally to Zeb., although the mountains of Naphtali north and north-east rise to a much greater height. *Jebel Kaukāb* (1850 ft.) is a prominent feature of the western landscape, and *Jebel es-Sîkh*, N.W. of Nazareth, crowned by *Neby Sa'în*, commands one of the finest and most comprehensive views in N. Palestine. The Plain of Asochis, *el-Baṭṭauf*, is not so large as Esdraelon, but is equally rich and fruitful. Olive groves flourish in the valleys, and most villages have orchards or vineyards, protected by cactus hedges.

Only one judge is mentioned as rising in Zebulun, viz. ELON, who judged Israel ten years (Jg 12$^{11.12}$). But the tribe seems always to have produced men of warlike energy and enterprise. 'Marched . . . from Zeb. those who carry the muster-master's staff' (Jg 5^{14}; 'officers who had charge of the enumeration and enrolment of troops' [Moore]). Called by Barak to the conflict with Sisera (Jg 4$^{6.10}$), their patriotic devotion and prowess are specially celebrated in Deborah's song (Jg 5$^{14.18}$). Gideon summoned them to the strife with Midian (Jg 6^{35}). To David at Hebron came from Zeb. 50,000 men of war 'who were not of double heart' (1 Ch 12^{33}); nor were gifts lacking from the produce of well-cultivated land (*ib.* 12^{40}). Under David the headman of the tribe was Ishmaiah, son of Obadiah (1 Ch 27^{19}). In response to Hezekiah's invitation, despite the scoffing of others, some from Zeb. humbled themselves and went to Jerusalem, where, although not 'cleansed according to the purification of the sanctuary,' they were welcomed and allowed to eat the passover (2 Ch 30$^{10.11.18.19}$). Doubtless, Zeb. shared the fate of Naphtali when, along with other districts, Galilee was carried into captivity by Tiglath-pileser (2 K 15^{29}, cf. Is 9^{1}).

The peasant farmers of Zeb. lent strength to the Jewish army in the war of independence, and their soil witnessed some of the fiercest encounters. Jotapata (*Jefat*) made a heroic defence against the Romans (*BJ* VII.). Sepphoris became the centre of Roman administration in the district (*Ant.* XVIII. ii. 1; *BJ* III. ii. 4). Here for a time were the headquarters of the Jewish Rabbis before they settled in Tiberias (Jost, *Judenthum*, ii. 16 ff.). Through the territory of Zeb. from the springs at Sepphoris to the hill of *Ḥaṭṭîn*, the Crusaders marched to their overthrow at the hands of Saladin. It is the chief glory of Zeb. that it afforded the infant Saviour a safe asylum; that on its breezy uplands, in the free atmosphere of the north, His frame grew to maturity, and mind and heart were prepared for His mighty task.

Members of this tribe are called **Zebulunites** (הַזְּבוּלֹנִי, *Ζαβουλών*, *Zabulon*, Nu 26^{27}). The title הַזְּבוּלֹנִי 'the Zebulunite,' is also applied to Elon the judge (Jg 12$^{11.12}$). W. EWING.

ZECHARIAH (זְכַרְיָהוּ and זְכַרְיָה; *Ζαχαριά* and *-ίας*).—**1.** Brother of Ner and uncle of Saul (1 Ch 9^{37}), one of the ten sons of Jeiel or Jehiel, patriarch of Gibeon in Benjamin. He is called **Zecher** in 1 Ch 8^{31}. **2.** A Levite, one of the sons of Korah, firstborn son of Meshelemiah (1 Ch 9^{21} 26$^{2.14}$). **3.** A Levite, whose place was among the brethren of the second degree under the chief singers Heman, Asaph, and Ethan (1 Ch 15$^{18.20}$). **4.** A priest in the time of David (1 Ch 15^{24}), one of the seven appointed to blow a trumpet before the ark. **5.** A Levite, of the family of Kohath (1 Ch 24^{25}). **6.** A Levite, of the family of Merari (1 Ch 26^{11}). **7.** Father of Iddo (1 Ch 27^{21}). **8.** One of the princes of Judah in the days of Jehoshaphat (2 Ch 17^{7}). **9.** A Levite, one of the sons of Asaph (2 Ch 20^{14}). **10.** Son of Jehoshaphat (2 Ch 21^{2}), to whom, with his brethren, his father gave large gifts of silver and gold, together with certain fenced cities. Along with the other sons of the king he was slain by his brother Jehoram on his accession to the throne. **11.** Son of Jehoiada the priest (2 Ch 24^{20}). After Jehoiada's death, Joash, who had yielded to the evil counsels of his princes, was privy to the conspiracy against Zech., because he reproved the idolaters and announced God's judgment against them. He was stoned with stones at the commandment of the king in the court of the house of the Lord. His dying words, 'The Lord look upon it and require it,' were long remembered. See also ZACHARIAH. **12.** A prophet, living in the earlier part of Uzziah's reign, *i.e.* before the middle of the 8th cent., about B.C. 770, who exercised a powerful influence for good upon the king (2 Ch 26^{5}). He is described as having 'understanding in the vision of God,' or giving 'instruction in the fear of God.' **13.** Son of Jeroboam II., king of Israel (2 K 14^{29} 15$^{8-12}$). It would seem that his father's death had been succeeded by a period of confusion, and probably the interval of at least ten years between the father's death and the son's succession had been spent in incessant conflicts between rival claimants of the throne. Jeroboam died in the twenty-seventh year of Uzziah, and Zech. succeeded in the thirty-eighth year of that monarch's reign (2 K 15^{8}). It may very well be that Zech. was a brave soldier and a capable ruler like his father, but all that the sacred historian records of him is that, in respect of character and moral conduct, he followed his fathers in evil-doing. He did that which was evil in the sight of the Lord, as his fathers had done; he departed not from the sins of Jeroboam the son of Nebat, wherewith he made Israel to sin. After a reign of six months he was slain by a conspirator Shallum, who himself survived only one month. With Zech. ended the dynasty of Jehu, according to the word of the Lord (2 K 10^{30}), 'thy sons of the fourth generation shall sit on the throne of Israel.' **14.** A man of high repute in Isaiah's day (Is 8^{2}). When faithful witnesses were required to attest a solemn prophetic roll, this Zech. was chosen along with Uriah the priest. He is described as son of Jeberechiah, and may possibly be the same as the Asaphite mentioned in 2 Ch 29^{13}, as Delitzsch suggests (see No. **16**). Diestel (in Schenkel, v. 130) would identify him with the prophet of Uzziah's time (see No. **12**); but this cannot be, for the prophet referred to evidently died in the earlier years of Uzziah's reign, whereas this Zech. is represented as living in the days of Ahaz. Riehm suggests his identification with the father of Hezekiah's mother (No. **15**). **15.** The father of Abi or Abijah, the mother of king Hezekiah (2 K 18^{2}, 2 Ch 29^{1}). Murphy thinks he may be identified with the prophet mentioned in 2 Ch 26^{5}; but this is extremely improbable. **16.** A reforming Asaphite under Hezekiah (2 Ch 29^{13}), who took part in the cleansing of the house of the Lord. **17.** Head of a house of the

Reubenites (1 Ch 5^{7}), one of the brethren of Beerah, who as one of the princes of the Reubenites was taken away captive into Assyria by Tiglath-pileser in the days of Pekah king of Israel, about B.C. 734. **18.** A Levite, one of the sons of Kohath (2 Ch 34^{12}), in the days of Josiah. In the work of repairing the temple, about B.C. 620, this Zech. was one of the overseers. **19.** One of the rulers of the temple under Josiah (2 Ch 35^{8}). As Hilkiah mentioned immediately before was chief priest, Zech. was probably second priest (כֹּהֵן הַמִּשְׁנֶה, like Zephaniah in Jer 52^{24}, 2 K 25^{18}). He is also named in 1 Es 1^{8}. See ZACHARIAS, 1. **20.** The prophet. See next article. **21.** One of the family of Parosh or Phoros, who accompanied Ezra from Babylon to Jerusalem in B.C. 458 (Ezr 8^{3}, 1 Es 8^{30}). **22.** Son of Bebai (Ezr 8^{11}), leader of the twenty-eight sons of Bebai who returned to Jerusalem with Ezra. **23.** One of the chief men with whom Ezra consulted at the river Ahava or Theras near Babylon (Ezr 8^{16}. See also 1 Es 8^{44}). **24.** A descendant of Elam, one of the people who had taken foreign wives, and who undertook under Ezra's reformation to put them away (Ezr 10^{26}). See also 1 Es 9^{27}. **25.** One of the descendants of Perez (Pharez), son of Judah, whose descendant, Athaiah, was one of the heads of the children of Judah settled in Jerusalem after the return from Babylon (Neh 11^{4}). **26.** Called the son of the Shilonite (Neh 11^{5}), a descendant of Shelah, son of Judah, whose descendant, Maaseiah, was one of the heads of the children of Judah settled in Jerusalem after the return from the Exile. **27.** Son of Pashhur, a priest and courtier under Zedekiah, whose descendant, Adaiah, was one of the priests settled in Jerusalem under Nehemiah (Neh 11^{12}). **28.** An Asaphite, son of Jonathan, who, 'with musical instruments of David, the man of God,' took part with Ezra in giving thanks at the dedication of the wall of Jerusalem (Neh 12^{35}). **29.** A priest, one of the blowers of trumpets at the dedication of the wall of Jerusalem, who took part in that thanksgiving service (Neh 12^{41}).

J. MACPHERSON.

ZECHARIAH, BOOK OF.—

i. The genuine prophecies of Zechariah (chs. 1-8).
ii. The activity and significance of the prophet.
Literature.
iii. Chs. 9-14: (1) Contents; (2) Relation of the different parts to one another; (3) Date of the various components; (4) Religious and theological value of these chapters.
Literature.

i. THE GENUINE PROPHECIES OF ZECHARIAH (CHS. 1-8). — The Book of Zechariah includes within it passages belonging to very different dates and proceeding from different hands. The superscriptions that appear in 9^{1} and 12^{1} divide the book into two larger parts: (1) chs. 1-8, (2) chs. 9-14.

For Zechariah, the contemporary of Haggai, who is named in 1^{1}, all that has to be taken into account is chs. 1-8, which fall into three divisions: (*a*) 1^{1-6} a call to repentance, based upon an allusion to the impenitence of the fathers and the consequent judgment that overtook them. They and the prophets are gone, but God's word still abides in force.—(*b*) 1^{7}–6^{9} the nocturnal visions of Zechariah, with an appendix 6^{10-15}. In eight visions, which are explained to him on each occasion by the *angelus interpres*, the prophet gives, as it were, a compendium of the eschatological hopes that animated him. The exposition of these is followed up by the direction in $6^{10\text{ff.}}$ to him to take of the silver and gold brought by the deputies of the Babylonian Jews, and to have a crown made for the *Ẓemaḥ, i.e.* for Zerubbabel. This crown is then to be laid up in the temple as a memorial of those deputies. Side by side with Zerubbabel is to be Joshua as priest, and peaceful relations are to subsist between the two. Then shall the peoples come from far and help to build the temple of Jahweh. (The text of this passage has not come down to us intact, but has obviously undergone revision in order to obscure the difference between these hopes and the actual history. By aid of the LXX the original text may be reconstructed).—(*c*) Chs. 7. 8. Taking occasion from the question addressed to the priests and prophets whether the fast-days observed during the Exile were still to be kept up, the prophet points to the impending Messianic time, for which a moral reformation is the indispensable prerequisite. Then shall the fast-days become joyous festivals, when men from all peoples shall join themselves to the Jews in their pilgrimages to Jahweh, because they have heard that God has fixed His dwelling-place with them.

ii. THE ACTIVITY AND SIGNIFICANCE OF THE PROPHET.—According to $1^{1.7}$, Zechariah was a son of Berechiah and a grandson of 'Iddo, the latter of whom is mentioned as the head of a priestly family which returned from the Exile (Neh 12^{4}). Zechariah will thus have been presumably somewhat young when he began his prophetical work amongst his people. We are told in 1^{1} that he came forward, like Haggai, in the second year of Darius (Hystaspis), but two months later than that prophet; he continued to labour till the 7th month of the fourth year (cf. 7^{1}). In this way his whole activity would appear to have been confined to rather less than two years. The political background is the same as in Haggai, namely, the violent commotions which the accession of Darius produced in the north-eastern portion of his empire. A feeling of profound depression had laid hold of the community at Jerusalem; Jahweh, it was felt, had not yet had compassion upon His people, He yet remained far from them. Zechariah strives to reanimate the hopes of his co-religionists, and to rekindle faith in the time of consummation, which will speedily set in; and it would appear that he was at least partially successful (cf. $7^{1\text{ff.}}$). An indispensable condition of the arrival of the Messianic era is the building of the temple; for as the commencement of the judgment formerly showed itself when the glory of Jahweh was seen by Ezekiel (cf. ch. 10) to forsake the temple, so upon the day when Jahweh once more makes His abode with His people all the distress of the time shall come to an end; in short, this dwelling of Jahweh in the temple is the *sine qua non* of the dawn of the Messianic age (cf. 8^{15}). Hence Zechariah, like Haggai, concentrates all his energies upon the task of inducing the people to undertake the work of building the temple. It is from this point of view that one can understand Zechariah's view of the priesthood as the security for the coming of the *Ẓemaḥ, i.e.* the Messianic King (cf. $3^{8\text{ff.}}$).—Zechariah's endeavour to reanimate the hopes of his contemporaries explains also the central place which Messianic prophecy occupies in his book. The whole of the nocturnal visions turn essentially upon the Messianic expectations of the time, and in ch. 8 as well he has regard to these, so that from this book we can construct a pretty complete picture of the Messianic hopes that were then entertained. The central figure is the Messianic King, whom Zechariah, with reference to Jer 23^{5} (33^{15}), calls the *Ẓemaḥ* and identifies with Zerubbabel, although a redactor, who had regard to the actually existing relations, has sought to substitute the high priest Joshua for Zerubbabel. It is true, indeed, that even with Zechariah himself the high priest holds a highly significant place: he represents the community before Jahweh, and has at all times free access to Him. Cf. also the articles EZRA-NEHEMIAH, HAGGAI, and ZERUBBABEL.

In Zechariah, as in Haggai, we note the disappearance of immediate prophetic inspiration. Connected with this is the circumstance that the message is communicated to the prophet by the angel of Jahweh (cf. Ezk $40^{3\mathrm{ff.}}$), and that his visions are no longer the outcome of intuition but rather of deliberate reflexion. Hence the *angelus interpres* is a standing figure in them. Side by side with the *angelus interpres* we have the *mal'akh Jahweh* and the *Saṭan*, the latter of whom also is thus obviously to be thought of as included among the messengers of God. The greater prominence thus assumed by angels is the result of the more transcendental character to which the idea of God has attained: Jahweh is One who is enthroned on high above men, and whose dealings with them must be through the medium of angels. Here for the first time we encounter *ha-saṭan*, still indeed as an appellative. It is not till 1 Ch 21 that it attains the character of a proper name. The Book of Job appears, in its idea of the Saṭan, to occupy a position intermediate between these other two. See, further, the article SATAN, above, p. 408^{b}. —Not without significance, perhaps, for further development is the conception here met with of Sin as an independently existing power. Personified as a woman, she is carried off to the land of Shinar, *i.e.* the land of destruction (cf. $5^{1\mathrm{ff.}}$). This last designation is considered, indeed, to include not only Shinar, but the whole heathen world; in Zechariah, as in Haggai, the way is paved for the notion so clearly defined in Daniel of the kingdom of God and the kingdoms of the world. Here the opposition is not yet sharply marked; here, partly as an after-effect of Deutero-Isaianic ideas, but partly also as a consequence of a vivid consciousness of being the bearers of the true religion and of being 'righteous,' in contrast with the 'ungodly Gentiles' (cf. 1^{15} 2^{12}), we meet with the thought that from all peoples those seeking for salvation shall flock to Jerusalem and dwell there, and that Jahweh will own them as His people (cf. $2^{4\mathrm{ff.}}$ $8^{20\mathrm{ff.}}$).

iii. CHAPTERS 9-14.—(1) *Contents.*—Ch. 9 opens with the announcement of judgment upon Damascus, Tyre, Zidon, and the Philistines. Jahweh Himself protects Jerusalem and its inhabitants. Jerusalem is to be the seat of the Messianic King, who will enter the city riding upon an ass, the animal of peace. For He works not with secular resources, but by His word puts an end to the strife among the nations. For the sake of the blood covenant Jahweh brings back the captives of Zion. Judah and Ephraim, together with Zion, are to be the weapons wherewith He subdues the sons of Javan. Then will Jahweh feed His people like a flock in His land which is so good and fair.—After a short interlude, in which the Israelites are called on to ask rain from Jahweh, instead of turning to teraphim and soothsayers ($10^{1.\,2}$), comes 10^{3}–11^{3}: Jahweh threatens the shepherds and the goats; He removes them, and native leaders put themselves at the head of Judah, which with Jahweh's help overcomes those that ride upon horses. But Jahweh will have pity on the house of Joseph and will bring them back, so that they shall be His as if He had never cast them off. From Egypt and Assyria He will bring them back to Gilead and the Lebanon district, but the land will not suffice for them. Jahweh will be their strength, and in His name shall they boast. But the cedars of Lebanon and the oaks of Bashan shall howl because the forest is destroyed, the shepherds bewail the loss of pasturage, the lions roar because the glory of the Jordan Valley is gone. — In $11^{4\text{-}17}$ we have a narrative of what has occurred in recent times; the prophet is to put the contents of his preaching in pictorial form, as it were, before the eye. He receives the commission to take the place of the worthless shepherds in feeding the sheep. He took the two staves 'Graciousness' and 'Union,' in order to represent in a way the principles by which he meant to be guided. In like manner he cut off the three shepherds in one month. But soon he became disgusted with the sheep, and they abhorred him. Therefore he broke the two staves, and now received the commission to act the part of a foolish shepherd, for such an one Jahweh is to set over them by way of punishment. The conclusion of this threatening of 11^{17} is supplied by $13^{7\text{-}9}$: Jahweh will smite the shepherd, so that the sheep shall be scattered.—12^{1}–13^{5} form a whole: the heathen, and with them Judah, besiege Jerusalem, but from Judah judgment goes forth upon the heathen, while Jerusalem itself remains peacefully in its place. Jahweh has at first helped the Judahites, that the pride of the house of David and of the inhabitants of Jerusalem might not become too great. Then Jahweh protects Jerusalem, the heathen who are moving against her are destroyed by Him. Then shall the inhabitants of Jerusalem look back to him whom they once pierced, and they lament over him as one does over an only son.* Then Jahweh opens for the house of David and its inhabitants a fountain for purification, then He roots out the names of the idols, and destroys the prophets, and expels the spirit of uncleanness out of the land.—Ch. 14 begins once more with a reference to an attack by the nations upon Jerusalem; the city is taken, the houses destroyed, half of the inhabitants go into captivity. Then Jahweh appears for her defence, treads upon the Mt. of Olives, which divides under His feet, and the other half of the inhabitants make their escape through the new valley thus formed. There is no more interchange of light and darkness, of heat and cold, but one day. Living waters flow from Jerusalem eastwards and westwards. Jahweh rules as king over the whole earth. The flesh of the peoples who fight against Jerusalem shall moulder away while they are yet alive, but the remnant shall all come to Jerusalem to worship Jahweh and to keep the Feast of Tabernacles.

(2) *Relation of the different parts to one another.* —In seeking to answer this question, the circumstance must be kept in mind that in these chapters events are frequently described not in their actual chronological order, but the final result emerges first, and the description follows of the way in which God brings about this result. Taking this into account, it will be seen that there is no occasion, with Rubinkam, to separate $9^{1\text{-}10}$ from vv.$^{11\mathrm{ff.}}$; the latter verses supply an account of the incidents that precede the advent of the peaceful King. On the other hand, $10^{1.\,2}$ has a very loose connexion with ch. 9. $10^{3\mathrm{ff.}}$ might be from the same hand as ch. 9; in the latter there was only a passing allusion to the return of the captives, in $10^{3\mathrm{ff.}}$ this has the central place; as in $9^{1\mathrm{ff.}}$ Syria is the subject of Divine judgment, so here it is אַשּׁר, which in late Hebrew stands for Syria.

It is very questionable, however, whether $11^{4\text{-}17}$ and $13^{7\text{-}9}$ are from the same hand as chs. 9 and 10. No decisive grounds can be alleged in favour of identity of authorship; on the contrary, there is a marked diversity in so far as it is only at 11^{17}, which has its continuation in $13^{7\text{-}9}$, that the outlook into the future begins.—Ch. 12 is not, as Cornill (*Einleitung*^{3}, p. 203) maintains, the necessary complement of $11^{4\text{ff.}}$; in fact, the striking difference of diction makes it impossible to ascribe both chapters to the same hand. Seeing, further, that ch. 13 is undoubtedly closely bound up with ch. 12, a material objection to Cornill's opinion emerges. In ch. 13 the writer holds in abhorrence those who make a public claim to be prophets; Jahweh will make an end of such, just as He sweeps idolatry and the spirit of uncleanness out of the land. On the other hand, in $11^{4\text{ff.}}$ the prophet in his experiences is to represent in a way the conduct of the people, and the 'Canaanites (traffickers) of the flock' [reading כְּנַעֲנֵי הַצֹּאן for 'כֵּן עֲנִיֵּי ה], who watch his conduct, are to recognize that it is the word of Jahweh that determines his action. We cannot assent to Rubinkam's separation of $13^{1\text{-}6}$ from ch. 12, which is justified neither by the language nor the contents; the features in the picture of the last days mentioned in $13^{1\text{ff.}}$ complete the picture of ch. 12.

---

* For the text of this passage, and the use made of it in Jn 19^{37}, see art. QUOTATIONS, p. 184^{b}.

On the other hand, ch. 14 must certainly be assigned to another pen than 12^1–13^6. According to ch. 12, the destructive judgment is executed upon the heathen before Jerusalem, while the city itself stands fast; but, according to ch. 14, Jerusalem is captured by the heathen, the houses destroyed, etc. According to 13^1, a fountain is opened for the house of David and the inhabitants of Jerusalem for the purpose of purification, whereas the fountain of 14^8 obviously serves different ends altogether. As little can we think of a connexion of ch. 14 with chs. 9 and 10, as is plain from the opposition between 14^{14} and 9^{10}.

The result of our examination is that we have the following independent pieces: (i.) 9. ($10^{1\text{f.}}$) 10^3–11^3; (ii.) $11^{4\text{-}17}$ $13^{7\text{-}9}$; (iii.) 12^1–13^6; (iv.) ch. 14.

(3) *Date of the various components.*—(i.) 9. ($10^{1\text{f.}}$) 10^3–11^3. Of decisive weight for fixing the date is 9^{13}, where the בְּנֵי יָוָן ('sons of Greece') are named as the principal enemies of the people of Jahweh. The place here assigned to the Greeks carries us to the time subsequent to Alexander the Great. This conclusion is not opposed by $10^{10\text{f.}}$, where Asshur and Egypt are mentioned, for, as was noted above, אַשּׁוּר became in later days a name for Syria. It is from this same point of view that $9^{1\text{f.}}$ becomes for the first time intelligible: the word of Jahweh is directed against the land of Ḥadrach and Damascus, *i.e.* against the empire of the Seleucids. Thus also we understand certain other features in the picture of the future: the gracious favour shown to Ephraim and the turning again of her captivity, as well as her reunion with Judah, all this has come, since the time of Ezekiel, to be a fixed point in the eschatology of the prophets. The figure of the Messianic King is not opposed to the above date, for it is only an apparent identity that subsists between $9^{1\text{ff.}}$ and Is $9^{3\text{ff.}}$ $11^{1\text{ff.}}$. As a matter of fact, this King is quite passive, His form almost disappears, to make room for that of a *homo spiritualis*. Characteristic of the same period are passages like 9^7, where the return to Jahweh finds expression partly in the observance of Levitical laws about food, a notion utterly impossible in the pre-exilic period. A more precise dating for these chapters is unattainable, on account of a lack of clear allusions to the historical situation.

(ii.) $11^{4\text{-}17}$ $13^{7\text{-}9}$. This section contains allusions to certain contemporary occurrences, but they are unintelligible to us, partly owing to the probably defective text that has come down to us, but partly also to our very inadequate information regarding considerable periods of the post-exilic history. This alone may be regarded as beyond doubt, that we are pointed to a time after the Exile: what is said in 11^{16} about the shepherds, as well as the similar expressions in v.^{9}, can be understood only in the light of their dependence on Ezk 34. The shepherds are to be understood as the native authorities, especially the high priest. It is of the latter that we must understand the רֹעִי of 11^{17} and the גֶּבֶר עֲמִיתִי of 13^7,—he is, as it were, Jahweh's companion; קֹנֵיהֶן and מֹכְרֵיהֶן (11^5) must be foreign rulers, who are hence fittingly called כְּנַעֲנֵי הַצֹּאן ($11^{7.\,11}$). Wellhausen is inclined to see in $11^{4\text{ff.}}$ a reflexion of the incidents in the last decade before the outbreak of the Maccabæan revolt, which witnessed rapid and violent changes of the high priesthood.

(iii.) 12^1–13^6 bears, throughout, the post-exilic stamp. (*a*) The campaign of the heathen against Jerusalem is dependent upon Ezk 38 f. The thought that Jahweh in the first instance helps Judah, lest Jerusalem may exalt herself yet more, cannot be properly understood at any period earlier than that at which Jerusalem had become the rallying-point for the Diaspora of the whole Jewish world, and when the glory of the city and her temple was reflected also upon her rulers and her inhabitants.—(*b*) 13^1, too, points to dependence on Ezekiel, although his viewpoint has been transformed under the influence of notions of the Levitical period, as these find expression in the custom described in Nu 19.—(*c*) We are pointed to the later post-exilic period by the juxtaposition of בֵּית דָּוִד and בֵּית לֵוִי ($12^{12\text{f.}}$), which would have been an impossibility in pre-exilic times. And the whole description in $12^{11\text{ff.}}$ carries us to a time after the Exile.—(*d*) A late date is also indicated by the hostility breathed in $13^{2\text{ff.}}$ against prophecy, *i.e.* against those who come forward publicly, clothed in a hairy mantle. The place of these had been taken by anonymous and pseudonymous prophetical authorship. Our chapters lie upon the line of development, whose culmination is indicated in views like those expressed in 1 Mac 4^{46} 9^{27} 14^{41}, cf. *Sanhed.* 11*a*.

(iv.) Ch. 14 likewise belongs to later post-exilic times. (*a*) This chapter also is dependent on Ezk 38 f. It is true that the thought of the latter is transformed in quite a peculiar fashion, without our being able to recognize the motive for the change, but this cannot prevent our admitting the dependence which is unmistakably present in $14^{8\text{ff.}}$.—(*b*) In 14^{11} we are probably carried to the period after Malachi, for this verse is dependent on Mal 3^{24}; it is probable, moreover, that v.^{9} is in conscious opposition to Mal $1^{11\text{ff.}}$—(*c*) It is only during the later post-exilic period, when the Jewish Diaspora went on pilgrimage to Jerusalem from all parts of the world to hold the festivals, that we can understand the thought expressed here (v.^{16}) that the converted heathen proclaim their conversion by a pilgrimage to Jerusalem to keep the Feast of Tabernacles.—(*d*) It is only during the same period that the notion of holiness expressed in v.^{20} is intelligible, a notion which once more shows the influence of Ezekiel.

(4) *Religious and theological value of these chapters.*—We stand no longer upon the ground of prophecy properly so called, but of anonymous eschatological writing. Certain stereotyped features of eschatology recur. The writers are very strongly influenced by ancient prophecy; for the most part by its religious rather than by its ethical contents. Ethical features indeed recede far behind religious. Very marked is the influence of the Levitical period. The Messianic King still appears, it is true, in $9^{9\text{f.}}$, but He is a comparatively otiose figure which might be left out without damaging the connexion. He is no longer the leader in the conflict against enemies, but exclu-

sively Prince of Peace, with an extremely passive character. The conception of the final King had at this time assumed a pale cast, that it might be able to take on other colours, namely those of the priest and the prophet.—Highly significant is the conception of the Kingdom of God as embracing the whole world. Jahweh is King over all the earth, and, as He is one, His worship is also one (cf. 14^{9}). But this universalism has a strong Levitical colouring, as is shown especially by the closing verses of ch. 14 with their weighty emphasis upon the purity of the theocracy. The ordering of everything on the basis of the dominion of holiness, in other words the supremacy of the Law,—this is the end of the process of development.

Eckardt, it is true, maintains that the spiritual uniqueness of Deutero-Zechariah consists in the freedom with which he extends the theocratic universalism over the whole religious situation of his time. From passages like 14^{9} 13^{2} 9^{1} Eckardt draws the conclusion that, according to Deutero-Zechariah, the heathen world unconsciously worships Jahweh in the person of its own gods, that in its ceaseless gropings and strivings it seeks Him without any clear notion of what it is doing. Deutero-Zechariah, he holds, goes beyond Mal 1^{11} and Is 26^{13}; for while Malachi exhibits a view which, carried to its logical conclusion, must end in syncretism and indifferentism, and while Is 26^{13}, on the other hand, shows a large-heartedness which might readily be abused to cover cowardly subservience and denial of the truth, Deutero-Zechariah in his universalism has avoided these errors. So far from seeing in idolatry only a readily excusable error in calculation, he considers that heathenism must be overcome in the most terrible conflict. Eckardt admits that the views of Deutero-Zechariah have a Levitical tinge, but urges that his universalism is not brought to a stand by the wall of the Law, but breaks through it whenever it presents itself as an obstacle. Ch. 14, it is true, lays great stress upon Levitical purity, but it is clear from the context, especially from the closing words of v.^{21}, that for the writer the building up of the Kingdom of God culminates in piety of soul, just as the Levitical purity of the last days passes over into inward purity. Nay, from 14^{19}, where he renders חַטָּאת by 'sin-offering,' Eckardt draws the conclusion that the particularistic narrow-mindedness of the laws about atonement is then to be overcome by the universalism of Divine grace, for there shall be a *ḥaṭṭāth* even for the peoples who defiantly refuse to join in the prescribed pilgrimage to Jerusalem.

An accurate unprejudiced exegesis, however, shows these contentions of Eckardt to be irreconcilable with the text. In view of the condition of things described in 14^{16-19}, how can the statement that there shall be no more a Canaanite in the house of Jahweh be made to justify the inference that 'the building up of the Kingdom of God shall be founded on piety of soul'? Or how can 14^{9} 'Jahweh's name shall be one' give rise to the notion that at present Jahweh is worshipped under a variety of names? In any case no support to this notion is given by 9^{1}, which cannot mean that the eyes of the heathen world are turned towards Jahweh. 9^{7} alone would suffice to turn the scale against Eckardt, for in this verse the conversion of the Philistines is to evidence itself (1) by their eating no more of *εἰδωλόθυτα*, and (2) by their submitting to the Levitical laws about food, 'for Jahweh removes the abomination between their teeth.' It is beyond question also that in 9^{6} we have not a promise, in contrast with Dt 23^{2}, but a threatening, as the context shows. Eckardt's view is thus shown to be untenable on exegetical grounds.

W. NOWACK.

ZECHER (זֶכֶר).—A son of Jehiel the 'father' of Gibeon, 1 Ch 8^{31} (B Ζαχούρ, A Ζακχούρ, Luc. Ζεχρί); called in 9^{37} **Zechariah.**

ZECHRIAS (B Ζεχρίας, A Ἐζερίας, AV *Ezerias*), 1 Es 8^{1}.—Azariah, a priest in the line of Ezra, Ezr 7^{1}.

ZEDAD (צְדָד [the name occurs only with ה *locale*, צְדָדָה]).—One of the points mentioned in defining the Northern border of the Promised Land in Nu 34^{8}, and again in Ezekiel's ideal picture, Ezk 47^{15}. The reading is uncertain, the Sam. having in Numbers צרדה; LXX in Numbers, B and Luc. Σαράδακ, A Σαδάδακ, F Σάδδακ; in Ezekiel, BA Σελδαμμά. If the reading צדד is followed, the site is unknown; for, as Dillmann points out, the *Ṣadad*, on the road from Riblah to Ḳaryaten (accepted by Wetzstein, Mühlau, Furrer, *et al.*), is much too far to the east and north. If we read צרד, as we should probably do, the place may perhaps be identified (so van Kasteren, *RB*, 1895, p. 30) with *Khirbet Ṣerādā*, N. of Abil, E. of Merj 'Ajûn, towards Hermon.

ZEDEKIAH (צִדְקִיָּהוּ, צִדְקִיָּה only in 1 K 22^{11}, Jer 27^{12} 28^{1} 29^{3} 'righteousness of J″'; LXX Σεδεκιά, Σεδεκίας, Σεδεκιού; Vulg. *Sedecias*).—1. Son of Chenaanah, and one of Ahab's four hundred court prophets (1 K $22^{11.\ 24.\ 25}$, 2 Ch $18^{10.\ 23.\ 24}$). When Jehoshaphat demanded that a prophet of J″ should be consulted about the proposed expedition to Ramoth-gilead, Zedekiah came forward in that character in order to forestall Micaiah ben-Imlah. He produced horns of iron and apparently presented them to Ahab as from J″, with a Divine commission: 'Thus saith the LORD, With these shalt thou push the Syrians, until they be consumed.' He maintained his attitude in the presence of Micaiah, and ventured to insinuate a doubt as to the source of the inspiration of the latter: 'Which way went the spirit of the LORD from me to speak unto thee?' The sharp retort in which Micaiah reaffirmed the coming defeat of Israel does not seem to have weakened the infatuation of the two kings. The lying spirit prevailed.

Josephus (*Ant.* VIII. xv. 4) embellishes this story, and transposes the incidents of it. He puts a speech to Ahab into Zedekiah's mouth, in which he tries to prove Micaiah to be a false prophet because of his disagreement with Elijah as to the place of Ahab's future death, and concludes by proposing a practical test: 'When struck by me, let him injure my hand as Jadaos dried up the right hand of king Jeroboam when he wished to arrest him.' Zedekiah then smites Micaiah, and as nothing happens to him, Ahab is convinced. The incident of the iron horns follows.

2. A prophet, one of the captives deported to Babylon with Jehoiachin. He and another, named Ahab, are denounced by Jeremiah (29^{21-23}) for gross immorality as well as for falsely prophesying a speedy restoration from Babylon. It was probably their action as political agitators that brought on them the cruel punishment of being roasted in the fire by order of Nebuchadrezzar. Jeremiah

prophesied that their fate would be proverbial. Zedekiah was son of MAASEIAH, who is probably to be identified with the priest whose son, 'the second priest' Zephaniah, was put to death at Riblah by Nebuchadrezzar (2 K $25^{18ff.}$). **3.** Son of Hananiah, one of the princes in the reign of Jehoiakim (Jer 36^{12}).

4. The last king of Judah (SEDEKIAS in 1 Es 1^{46}, Bar 1^{8}). He was the youngest son of Josiah and full brother of Jehoahaz (2 K 23^{31} 24^{18}; in Jos. *Ant.* x. vii. 2, 'Jehoiakim' is a blunder for 'Jehoahaz'). In 1 Ch 3^{15} his name precedes that of SHALLUM or JEHOAHAZ, perhaps on account of the latter's insignificance, while in the following verse and in 2 Ch 36^{10} he is represented as son of Jehoiakim, perhaps as having been his successor. These variations are instructive as showing the degree of inaccuracy which may exist in biblical genealogies. The direct account of this reign is contained in 2 K 24^{17}–25^{7}, Jer 39^{1-7} 52^{1-11}, 2 Ch 36^{10-21}. Considerable light is also thrown on this period by the prophetical writings of Jeremiah and Ezekiel, especially the narrative portions of Jeremiah which are here enumerated in their chronological order: chs. 24. 27. (Gr. 34.) 28. (35.) 29. (36.) 21. 37. (44.) 34. (41.) 38. (45.) 39^{15-18} (46^{15-18}) 32. (39.) 33. (40.) 39^{1-14} (46^{1-3}). There is, in fact, more contemporary material available for the construction of the history of this reign than of that of any other Hebrew monarch; yet there are few of which there is so little definite to record.

Zedekiah's eleven years' occupancy of the throne was but the last sigh of the expiring Davidic dynasty, one episode in the struggle of Egypt and Babylon for the mastery. The king himself was a weak man in a false position. As a private citizen he might have had an inoffensive and respectable career, for he was of an amiable disposition and religiously inclined, but in the Davidic vine he was 'no strong rod to be a sceptre to rule' (Ezk 19^{14}). Josephus in one passage (*Ant.* x. vii. 5) credits him with χρηστότης καὶ δικαιοσύνη. This is sufficiently evidenced in his dealings with Jeremiah. On two occasions we read of formal deputations from the king to the prophet (Jer 21^{1} 37^{3}), 'Inquire, I pray thee, of the LORD for us,' 'Pray now unto the LORD our God for us'; and when this State recognition was no longer possible, Zedekiah proved the sincerity of his own personal convictions in secret consultations (Jer 37^{17} 38^{16}). It is noteworthy, too, that the only occasions on which we read of Zedekiah's exerting his authority are when he mitigated the rigour of Jeremiah's imprisonment (37^{21}) and sanctioned his deliverance from the miry dungeon (38^{10}), see also Jer 38^{16}; and so it was promised to him, in marked contrast with the fate of Jehoiakim (Jer $22^{18.19}$), that he should die in peace and be buried as a king (Jer $34^{4.5}$). Jeremiah, in fact, never adopts a harsh tone when speaking of him. Others also felt the same personal attraction. They looked back on him as 'the breath of our nostrils, the anointed of the Lord . . . of whom we said, Under his shadow we shall live among the nations' (La 4^{20}). On the other hand, Ezekiel, whose moral and political judgment was uninfluenced by personal contact with the king, speaks of Zedekiah in terms of unqualified censure. He is the 'deadly wounded wicked one.' The prophetic sentence of deposition anticipates the act of man (Ezk 21^{25-27}). Ezekiel, in fact, is at one with the pro-Egyptian party in regarding Jehoiachin as *de jure* king. He dates his visions not by the years of Zedekiah's reign, but by those of king Jehoiachin's captivity. On other grounds it is difficult to avoid feeling sympathy with the pro-Egyptian party in Jerusalem. In comparison, indeed, with the exiles in Babylon, they were as bad figs, 'very bad, that cannot be eaten, they are so bad' (Jer 24, see also Ezk 5^{4} 11^{15-18} 14^{22} 22. 33^{24-26}), but their patriotism was sincere if perverted, while Zedekiah's throne rested upon a renunciation of national ambitions. This is clearly marked in the words of Ezekiel ($17^{13.14}$), 'The king of Babylon . . . took of the seed royal and made a covenant with him; he also brought him under an oath, and took away the mighty of the land: that the kingdom might be base, that it might not lift itself up, but that by keeping of his covenant it might stand.' In other words, it was Nebuchadrezzar's policy to reduce the Jewish nation to impotence and at the same time attach it to himself by motives of self-interest, and thus control the powerful fortress of Jerusalem. Josephus (*Ant.* x. vii. 1) gives the terms of the oath under which Zedekiah was brought: 'That he would surely guard the country for him, and neither make any political changes nor favour the Egyptians.' Accordingly, the hopes of the national party centred round Jehoiachin, whom they hoped to restore to the throne (Jer 28^{4}). Zedekiah's disloyalty, therefore, was directly against his own personal interests; but he was quite passive in the hands of the man or faction that happened to be nearest to him at the time; as Josephus says (*Ant.* x. vii. 2), 'As long as he heard the prophet speaking these things, he believed him and agreed to everything as true, and believed that it would be to his advantage; but then his friends used to corrupt him and draw him away from the suggestions of the prophet to whatever course they wished.' We have here an echo of the taunt-song which Jeremiah (38^{22}) puts into the mouth of the women of the royal harem: 'Thy familiar friends have set thee on, and have prevailed over thee: now that thy feet are sunk in the mire, they are turned away back.' 'The princes' to whom allusion is here made, seem in this reign to have usurped most of the executive power. They tried and sentenced Jeremiah on a charge of desertion (Jer 37^{14}). They reduced the king to abject terror (37^{17} 38^{25}). There was truth as well as pathos in the words with which he surrendered his best friend to them: 'The king is not he that can do anything against you' (38^{5}). In a ruler such weakness is the greatest crime, and in the case of Zedekiah it was aggravated by the fact that 'the princes' for the most part belonged to the pro-Egyptian party to which Jeremiah and Ezekiel (Jos. *Ant.* x. vii. 2) were opposed, and which encouraged the idolatrous reaction which followed on the death of Josiah. That reaction was now in full force (see Ezk 8 and 11). And yet it is not so much for abetting false or irregular worship that the prophets condemn Zedekiah as for breach of faith. The oath of fealty which he made to Nebuchadrezzar struck men as being of a peculiarly binding nature. He 'made him swear by God' (2 Ch 36^{13}) and place his hand under his thigh (Ezk 17^{18}). The lofty and stern morality of the Hebrew prophets did not palliate Zedekiah's subsequent violation of this solemn promise on the ground that it had been made to a heathen. On the contrary, 'Thus saith the Lord God: As I live, surely *mine* oath that he hath despised, and *my* covenant that he hath broken, I will even bring it upon his own head' (Ezk 17^{19}). The new name *Zedekiah* which he now received in place of *Mattaniah*, in token of vassalage, very possibly has reference to the righteousness of J″ which was appealed to on this occasion; and this again may well be 'the circumstantial origin' of the Messianic aspirations after the Shoot of the Davidic stock whose name is 'J″ is our righteousness' (Jer $23^{5.6}$).

It is difficult to say how long Zedekiah remained negatively loyal to the Chaldæans, but in his fourth year (B.C. 590) his allegiance was so far questionable that the rulers of Edom, Moab, Ammon, Tyre, and Sidon (Jer 27^{2}), incited thereto by their prophets and diviners, were emboldened to send envoys to Jerusalem in order to induce Zedekiah to join a league for the purpose of throwing off the Babylonian yoke. The prophets and diviners of Israel, too, both in Jerusalem and Babylon, were fomenting a similar agitation, uttering definite predictions that 'shortly' (Jer 27^{16}), 'within two full years' (Jer 28^{3}), would all the vessels of the LORD'S house and Jeconiah himself be restored to their native land. The silver vessels which Zedekiah is said (Bar 1^{8}) to have made to take the place of the gold ones served to emphasize the national humiliation. It seems to us unaccountable that the peoples of Syria could have had such provincial imaginations, so little sense of proportion, as to expect the speedy fall of the empire of Nebuchadrezzar. On the other hand, it must be remembered that the rise of Chaldæa was of very recent date, the sudden collapse of Nineveh must have made anything seem possible, and belief in the inexhaustible resources of Egypt was a tradition in the East. The prestige of centuries dies hard. In opposition to such men as Hananiah and Shemaiah at Jerusalem (Jer 28^{1} 29^{24}), and Ahab and Zedekiah at Babylon (Jer 29^{22}), Jeremiah as chief prophet of the pro-Chaldæan party declared that resistance to Nebuchadrezzar was premature, futile, and suicidal, since supremacy had been assured by God to Babylon for 70 years.

With characteristic energy Nebuchadrezzar at once set about crushing the incipient revolt. He made examples of the agitators at Babylon, 'roasting them in the fire' (Jer 29^{22}), and at the same time apparently sent to demand explanations from his vassal at Jerusalem. It is possible that the mission of Elasah and Gemariah (Jer 29^{3}) to Babylon should be referred to this date; in any case Zedekiah's personal attendance was required, and he journeyed to Babylon before the close of his fourth year, accompanied by a leading member of the pro-Chaldæan party, Seraiah (Jer 51^{59}). There is no reason to doubt the sincerity of the protests of loyalty which Zedekiah doubtless made at this time. He had, in fact, everything to lose by the defeat of Chaldæa, but he counted for nothing in the struggle of factions at Jerusalem, which continued as before, intense, sordid, monotonous. In his fifth year Ezekiel (1^{2} 4$^{1ff.}$) sees the fate of Jerusalem to be inevitable. The dominant party had an infatuated confidence in the impregnability of their fortress, 'This city is the caldron, and we be the flesh' (Ezk 11^{3}); and as it was hopeless to expect any help from the exiles in Babylon, these latter—the real depositaries of the Messianic hope—came to be regarded as outcasts: 'Get you far from the LORD; unto us is this land given for a possession' (Ezk 11^{15}). This was the state of feeling in Jerusalem in the sixth year of the reign.

Psammetichus II., who died in 589, was succeeded on the throne of Egypt by his brother Apries (Uahibri), and Zedekiah was induced to 'send his ambassadors into Egypt that they might give him horses and much people' (Ezk 17^{15}). Edom, Moab, and Philistia now held back, but Judah committed itself to an alliance with Tyre (Ezk 26^{7} 29^{18}), Ammon, and Egypt against Babylon. This took place, according to Josephus (*Ant.* X. vii. 3), at the close of Zedekiah's eighth year; but the prophecy of Ezekiel (21) in which reference is made to it seems to be dated (20^{1}) in his seventh year. In any case it was not until his ninth year, the tenth day of the tenth month, that the Chaldæan army actually invested Jerusalem. The delay is easily accounted for. At the time when war was actually declared, Nebuchadrezzar was probably engaged in reducing Elam or Susiana (Jer 49$^{34-39}$), and when he did turn his attention to the Egyptian coalition he was uncertain whether he should first attack Ammon or Judah (Ezk 21$^{20ff.}$). Finally, he established himself at Riblah, whence he despatched expeditions against Tyre and Jerusalem respectively. The division sent against Zedekiah, before settling down around the capital, reduced the smaller fortresses of Judah; Lachish and Azekah alone held out (Jer 34^{7}). It was a day never to be forgotten (2 K 25^{1}, Jer 39^{1} 52^{4}, Ezk 24^{2}, Zec 8^{18}). Some, the king himself included, at last recognized the fact that deliverance from this danger would be a miracle comparable to one of the LORD'S wondrous works of old time (Jer 21^{2}). The general alarm, indeed, was such as to cause a religious revival, one feature of which was a renewal, with the patriarchal ceremonial (Jer 34$^{8.18}$), of the covenant, and in particular a solemn engagement was made by all the people that they would in future observe the law as to the manumission of slaves (Ex 21^{2}, Dt 15^{12}). Their zeal for this enactment may have been quickened by a desire to increase the number of defenders of the city.

Meanwhile the Egyptian army, commanded by Apries in person, was advancing from the south to the relief of his ally (Jos. *Ant.* X. vii. 3), and captured Gaza, and compelled the Chaldæans to raise the siege of Jerusalem. Josephus (*l.c.*) states that the two armies met in a pitched battle, and that the Egyptians were put to flight and driven out of all Syria. From Jer 37^{7} we should infer no more than that Pharaoh was forced to retreat to his own land. The Chaldæan army had no sooner withdrawn than the base people of Jerusalem broke faith with their slaves and reduced them to bondage again—a step which called forth an indignant protest from the prophet (Jer 34$^{13ff.}$). Meanwhile there were constant desertions to the Chaldæan army (Jer 37^{13} 38^{19} 39^{9} 52^{15}), caused at least in some measure by the predictions of Jeremiah. The burden of his utterances during the siege was that the city and all its contents was doomed, but that individual deserters would save their own lives (21^{9} 38$^{2.17}$). We cannot wonder then that the anti-Chaldæan party regarded him as a dangerous traitor (38^{4}), and viewed with suspicion his relations with the king. In fact, after he had been sentenced to imprisonment, Zedekiah could only see him by stealth (37^{17} 38^{16}).

The relieving force having been completely repulsed, the besiegers once more closed round the doomed city. Josephus displayed a true historical spirit in describing the siege in the light of his own experiences. It must have been an almost exact counterpart, in the desperate courage and the horrors of it, to the siege under Titus. There were the same circles of forts to keep the blockade, the battering-rams against the gates, the 'mounts' built high to overtop the city walls (2 K 25^{1}, Jer 32^{24}, Ezk 4^{2} 17^{17} 21^{22} 26$^{8.9}$), while the besieged strained all their powers of mind and body to erect counter works, destroying even the royal palace to find building material (Jer 33^{4}). But deadlier than the missiles of the Chaldæans were the pestilence and the famine (Jer 21$^{6.7.9}$ 32^{36} 34^{17} 38$^{2.9}$, La 5^{10}, Ezk 5$^{12.16.17}$, Bar 2^{25}), with the supreme horror of cannibalism (Jer 19^{9}, La 2$^{19-22}$ 4^{10}, Ezk 5^{10}). The city yielded at last to famine (Jer 52^{6}), and on the ninth day of the fourth month, in the eleventh year of Zedekiah's reign, about midnight the six generals who had been conducting the siege entered through a breach and sat in grim state in the middle temple gate (Jer 39^{3}; Jos. *Ant.* X. viii. 2; cf. Ezk 9^{2}).

In the confusion that followed, Zedekiah with his household and most of the surviving defenders of the city broke through the cordon of the besiegers; they were betrayed, however, by some of the deserters, and had only succeeded in reaching the plains of Jericho when they were overtaken. The unfortunate king was conveyed to Riblah to the presence of Nebuchadrezzar, who 'spake with him of judgment,' taxing him, according to Josephus, with perjury and ingratitude. With a refinement of cruelty his eyes were put out, but not until he had seen the slaughter of his children.

Josephus calls attention to the remarkable manner in which the fate of Zedekiah fulfilled two apparently discrepant prophecies of Jeremiah and Ezekiel respectively. 'Thine eyes shall behold the eyes of the king of Babylon, and he shall speak with thee mouth to mouth, and thou shalt go to Babylon' (Jer 34^{3}), and 'I will bring him to Babylon, to the land of the Chaldæans; yet shall he not see it, though he shall die there' (Ezk 12^{13}).

In all probability, Zedekiah did not long survive his misfortunes. We hear no more of him. The hope of Israel henceforth centres round the more innocent captive, his nephew Jeconiah (2 K 25^{27}).

5. A 'prince' who 'sealed unto the covenant' at Nehemiah's reformation (Neh 10^{1}).

N. J. D. WHITE.

ZEEB.—See OREB.

ZELA(H). — A Benjamite city, Jos 18^{28} (צֵלַע, LXX om.), where was the family burying-place of Saul (2 S 21^{14} צֵלָע [here RV needlessly confuses by writing Zela*h*], LXX ἐν τῇ πλευρᾷ [taking it for צלע 'side']). Its site has not been discovered.

ZELEK (צֶלֶק).—An Ammonite, one of David's heroes, 2 S 23^{37} (B Ἐλειέ, A Σβλεγί, Luc. Σαλαάδ) = 1 Ch 11^{39} (B Σέλη, A Σέλληκ).

ZELOPHEHAD (צְלָפְחָד).—A Manassite who died during the wilderness journeyings, leaving no male issue. His five daughters successfully asserted their claim to the inheritance of their father (Nu 26^{33} 27^{1-7} 36^{2-12}, Jos 17^{3}, 1 Ch 7^{15}). See vol. ii. pp. 129^{b} and 341^{b}. The LXX readings are: B Σαλπαάδ except in 1 Ch 7^{15} Σαπφαάδ; A Σαλπαάδ except in Jos 17^{3} Σαλφαάδ (*bis*).

ZELZAH.—In 1 S 10^{2} Samuel tells Saul: 'When thou art departed from me to-day, then thou shalt find two men by Rachel's sepulchre in the border of Benjamin בצלצח.' The last word is rendered by AV and RV 'at Zelzah.' But there are grave reasons for suspecting the correctness of this. No place of such a name is known to us, nor should we expect any further definition after the specific mention of 'Rachel's sepulchre.' The LXX translates by ἀλλομένους μεγάλα 'leaping mightily' (Ew. 'in grosser Eile'); ἀλλομένους = צָלְחִים (v.^{6}). But, as Driver points out, though צלח על may mean (metaphorically) *leap upon*, we are not justified in attributing to צלח absolutely the sense of *leaping*. Moreover, μεγάλα as an adverb does not occur elsewhere in the LXX, and Wellh. is doubtless right in regarding it as simply a Heb. word written in Greek letters and transformed into something significant in Greek (for other instances of a similar kind see Driver, *Text of Sam.* 60 n.). He himself takes ἀλλομένους μεγάλα to be doublets which have arisen from the words ἐν Σηλὼμ ἐν Βακαλάθ which are found in several MSS after the word Βενιαμείν. See, more fully, his *Text d. Bücher Sam.* 73 f.; and cf. Driver and Löhr, who take practically the same view of the passage.

ZEMARAIM (צְמָרַיִם).—A city of Benjamin, apparently in the vicinity of Bethel, Jos 18^{22} (B Σαρά, A Σεμρίμ, Luc. Σαμαρείμ). It prob. gave its name to Mt. Zemaraim (הַר צ׳, τὸ ὄρος Σομορών), in the hill-country of Ephraim, 2 Ch 13^{4}, from which the Chronicler makes Abijah harangue Jeroboam and his army. It is generally identified with *es-Sumra* to the north of Jericho (*PEF Mem.* iii. 174, 212 f.; Buhl, *GAP* 180, *et al.*); but Dillm. (*Jos. ad loc.*) doubts the correctness of this, holding that the place (see Berth. on 2 Ch 13^{4}) ought to be sought to the *south* of Bethel, and not far to the *east* where *es-Sumra* lies.

ZEMARITE (צְמָרִי).—Name of a tribe said to be one of the sons of Canaan and placed between Arvad and Hamath, Gn 10^{18} = 1 Ch 1^{16} (A Σαμαραῖος, E [in Gen.] Σαμαρεῖος). The name seems akin to Zemaraim of Jos 18^{22}. The Arabian geographers mention several places with similar names; but the juxtaposition of this name with Arvad suggests comparison with Ṣumur of the Tel el-Amarna tablets, in which the two names figure more than once side by side. So 150. 59 (ed. Winckler): 'The people of Arvad have made a treaty to take away Tyre; Tyre they could not conquer, but Ṣumur they did conquer.' From 81. 13 it appears to have been a port, and is identified by Winckler with Botrys. In the fragmentary narrative contained in these tablets it appears to have been repeatedly taken, destroyed, and rebuilt. A place named Simyra, considerably to the north of Botrys, is mentioned by the classical geographers (Strabo, XVI. ii. 12; Pliny, *HN* v. 77; Ptol. V. xv. 4), and was supposed by Michaelis to retain a trace of the name given in Genesis (so also Schrader, *KAT*^{2} 105; Dillm. *Gen. ad loc.*, *et al.*).

D. S. MARGOLIOUTH.

ZEMIRAH (זְמִירָה).—A son of Becher, 1 Ch 7^{8} (B Ἀμαρίας, A Ζαμαρίας, Luc. Ζαμαριά).

ZENAN.—See ZAANAN.

ZENAS (Ζηνᾶς).—In Tit 3^{13} St. Paul exhorts Titus to bring or, more probably, send forward (πρόπεμψον) on their journey Zenas and Apollos with great care (σπουδαίως), that nothing may be wanting to them, and describes Zenas as τὸν νομικόν, *i.e.* 'the lawyer.' This may mean a lawyer in the secular sense, but more probably one skilled in the Jewish law (cf. Lk 7^{30} 11^{45} 14^{3}). Just above, the same word is used about disputes concerning the Law (Tit 3^{9} 'But avoid . . . strivings about the law, μάχας νομικάς').

A. C. HEADLAM.

ZEPHANIAH.—1. The prophet. See ZEPHANIAH, BOOK OF, where also the name is discussed. 2. A Kohathite, mentioned among the ancestors of Heman the singer (1 Ch 6^{36}). 3. Son of Maaseiah the priest in Jerusalem in the time of Zedekiah the king and Jeremiah the prophet. He belonged to the court party opposed to making any terms with Babylon, and inclined to trust to the help of Egypt. Though thus opposed to the policy of Jeremiah, he showed a good disposition towards the prophet by letting him see the letter which he had received from Shemaiah in which Zeph. was urged to stop every *mad* prophet, and was called in question for not having rebuked Jeremiah for prophesying that the Babylonian captivity would continue (Jer $29^{25.29}$). He was sent by Zedekiah to Jeremiah to ask of the Lord through His prophet deliverance from Nebuchadnezzar, and carried back God's message to the king. He was then sent again to inquire as to the proposed league with Egypt (Jer 21^{1} 37^{3}). As next in rank to Seraiah, grandson of Hilkiah (1 Ch 6^{14}), Zeph. is called *second priest*, כֹּהֵן (הַ)מִּשְׁנֶה (2 K 25^{18}). On the occasion of the final overthrow of Jerusalem by Nebuzaradan, in B.C. 587, Zeph. was taken, along with Seraiah and others, down to the king of Babylon at Riblah, and was there put to death. 4. The father of one Josiah, into whose house in

Jerusalem the messengers from the Jews remaining in Babylon went (Zec $6^{10.\,14}$). As this occurred some sixty-seven years after the death of the son of Maaseiah, there is not much probability in the suggestion that he may be identical with the father of Josiah. It is not, however, by any means impossible. J. MACPHERSON.

ZEPHANIAH, APOCALYPSE OF.—A Jewish apocryphon, probably similar in contents to the *Ascension of Isaiah.* It is named in each of the two lists of OT apocrypha that have come down to us, viz. the Stichometry of Nicephorus, and an anonymous list found in Codex Coislinianus, and three other codices (Schürer, *HJP* II. iii. 125 ff.). The only extract known is given by Clemens Alex. in his *Stromata,* v. xi. 77, where, after quoting from Moses, Euripides, and Plato to the effect that true worship does not require material temples, he says: 'Are not these (sayings) like those of Zephaniah the prophet? "And the spirit of the Lord took me and brought me up into the fifth heaven and showed me angels called lords . . . dwelling in temples of salvation and singing praise to God, ineffable, most high."' The occupants of the fifth heaven are named also in *Ascension of Isaiah,* $4^{32\text{ff.}}$; *Slav. Enoch,* 18^{1}; *Testaments,* Levi, iii. 3; *Chagigah,* 12*b.*

Fragments of a Christianized Coptic recension of the *Apocalypse of Zephaniah* were discovered at Akhmim and published by S. Bouriant in *Mém. de la mission archéol. au Caire,* 1885. A Germ. translation by Stern appeared in the *Ztschr. f. ägyp. Sprache,* etc., 1886, p. 115 ff.; and the same fragments, with additions, and along with a fairly complete Coptic recension of the *Apocalypse of Elias,* have been edited by Steindorff in *TU.* The question of how much belongs to the *Apocalypse of Zephaniah* and how much ought to be assigned to an unidentified Apocalypse, is not yet settled (cf. James in *Encyc. Bibl.* i. 256).

LITERATURE.—Fabricius, *Cod. pseudepigr. VT* i. 1140 f.; Dillm. in *PRE*^{2} xii. 360; Zöckler, *Apokr. d. AT* 440; Schürer, *GJV*^{3} iii. 271 f.; Harnack, *Gesch. d. altchrist. Litt.* i. 854, ii. 1, 572 f.; Bousset, *Der Antichrist,* 1895, pp. 54–57.

ZEPHANIAH, BOOK OF.—

i. The Writer.
ii. Contents of the Book.
iii. Date and Unity.
iv. Literary Characteristics, Condition of Text, etc.
v. Religious Value.
Literature.

i. THE WRITER.—The title of the book reads: 'The word of the LORD, which came unto Zephaniah, the son of Cushi, the son of Gedaliah, the son of Amariah, the son of Hezekiah, in the days of Josiah, the son of Amon, king of Judah.' The name *Zephaniah* (צְפַנְיָה, LXX Σοφονίας; cf. the name צפנבעל in No. 107 of the Phœn. inscriptions in *CIS*) means 'he whom J" has hidden *or* protected,' and is borne in the OT by three men (see art. ZEPHANIAH) besides the author of the prophecy before us. It has plausibly been inferred that the Ḥezeḳiah named in the title is the Judæan monarch of that name (so Hitzig, followed by most moderns). This would account for the genealogy of Zephaniah being carried back four generations, whereas the usual practice in the case of the prophets is to name only their father (cf. Is 1^{1} 'Isaiah the son of Amoz,' Jer 1^{1} 'Jeremiah the son of Hilkiah,' Ezk 1^{3} 'Ezekiel the son of Buzi,' Jl 1^{1} 'Joel the son of Pethuel'). No argument against this conclusion can be drawn from the absence of the title 'king of Judah' after Ḥezeḳiah's name. This title could have been inserted only somewhat awkwardly, seeing that it had to be appended also to Josiah's name, and may have been felt to be unnecessary in the case of so well-known a name as that of Ḥezeḳiah. Zephaniah's great-grandfather, Amariah, will thus have been a younger brother of king Manasseh, and no difficulty in the way of Zephaniah's being a contemporary of Josiah is occasioned by the circumstance that the succession Ḥezeḳiah—Manasseh—Amon—Josiah appears to contain a generation fewer than Ḥezeḳiah—Amariah—Gedaliah—Cushi—Zephaniah. For we learn from 2 K $21^{1.\,19}$ that Manasseh was 45 years old when his son Amon was born, a date at which his brother Amariah might easily have had a grandson (Cushi). Zephaniah may thus have been as old as, or even older than, Josiah. If the prophet belonged to the royal family, all the greater interest attaches to his strictures upon 'the princes and the king's sons' ($1^{8.\,9}$). He was, clearly enough, a dweller in Jerusalem (note his familiarity with the various localities of the city, the Fish Gate, the Second Quarter, the MAKTESH [$1^{10.\,11}$], and esp. the words in 1^{4} 'I will cut off the remnant of Baal *from this place*').

ii. CONTENTS OF THE BOOK.—The prophecy falls into two unequal divisions, the first and larger of these being occupied with threatenings, the second with promises.

A. *The Threatening,* 1^{2}–3^{7}.

A destructive judgment, universal in its scope, is proclaimed in terms which recall those that heralded the approach of the Deluge (Gn 6^{7}; cf. also Hos 4^{3} and Ezk 38^{19}); man and beast, the fowls of the heaven and the fishes of the sea, the stumbling-blocks with the wicked, are to be cut off ($1^{2.\,3}$).

The word מַכְשֵׁלוֹת in v.^{3} is doubtful. In its only other occurrence (in the sing. מַכְשֵׁלָה Is 3^{6}) it means 'overthrown mass,' 'ruin,' which of course does not suit here; and even the rendering 'stumbling-blocks' (*i.e.* idols; cf. the use of the cognate מִכְשׁוֹל in Ezk $14^{3.\,4.\,7}$) is hardly appropriate to the context. Schwally would emend וְכִשַּׁלְתִּי [G. A. Smith prefers Hiph. וְהִכְשַׁלְתִּי] 'and I will cause (the wicked) to stumble' (cf. v.^{17} 'they shall walk like blind men'). LXX reads *καὶ ἀσθενήσουσιν οἱ ἀσεβεῖς* (=וְכָשְׁלוּ הָרְשָׁעִים). Wellh. and Now. (cf. Davidson) regard the words הַמַּכְשֵׁלוֹת אֶת־הָרְשָׁעִים as an interpolation of a late glossator, who missed a definite allusion to the sweeping away of idols in the general destruction.

In particular this judgment will overtake idolaters and syncretists in Judah and Jerusalem (vv.$^{4-6}$). The 'day of the Lord' (on this conception see the references in art. OBADIAH, vol. iii. p. 578^{a}) is at hand; He has prepared a sacrificial feast (cf. Is 13^{3} 34^{6}, Jer 46^{10}, Ezk 39^{17}), where the victims are the people of Judah, and to this the instruments of His vengeance (prob. the Scythian hordes; see below under 'Date') as 'sanctified' guests (cf. 1 S 16^{5} 20^{26}) are invited (v.^{7}). From the royal house downwards all classes are guilty, and shall share in the terrors of that day (vv.$^{8-11}$).

Nowack's transposition of v.^{9b} and v.^{8b} ('I will punish the princes and the king's sons, who fill their master's house with violence and deceit; and I will punish all who leap over the threshold, and all who clothe themselves with foreign apparel') is perhaps somewhat arbitrary, but it is attractive. As the clauses stand, the 'leaping over the threshold' is connected in such a way with the 'filling of their master's house with violence and deceit,' as to amount to a charging of the royal princes with housebreaking. Perhaps the prophet means to bring such a charge against them (Davidson, *et al.*); but, on the other hand, there is much to be said in favour of the supposition that what he has in view is their imitation of a foreign (? Philistine [see art. CHERETHITES, vol. i. p. 377^{a}]) custom of leaping over the threshold in entering a house. Upon Nowack's arrangement of the clauses, this habit and the aping of foreign manners in dress fall into line with one another.

In that day Jahweh will search Jerusalem with lanterns (cf. for the figure Lk 15^{8}), and hunt from their hiding-places (cf. Am 9^{3}) the men who are now sunk in religious indifferentism and who say, 'The Lord will not do good, neither will he do evil' (v.^{12}; cf. Ps 10^{4} 14^{1} etc., and, for the proverbial expression, Is 41^{23}, Jer 10^{5}). The utter ruin and the war alarms of that day are further described in vv.$^{14-18}$.

Then in 2$^{1-3}$ the prophet turns to his countrymen with an appeal yet to seek the LORD, if perchance they may be hid in the day of His fierce anger, when the Philistines (vv.$^{4-7}$), Moab and Ammon (vv.$^{8-11}$), Cush (v.^{12}), and Assyria (vv.$^{13-15}$) shall be overwhelmed.

There is no sufficient ground for Wellhausen's supposition that in 2^{1} the situation and tone are somewhat different from those of ch. 1, a difference due to the choice of the coast road by the Scythian host, and a consequent anticipation on the part of the prophet that Judah might, after all, escape the storm.

Vv.$^{4-7}$ and $^{12-15}$ are in the *ḳinah* measure (see LAMENTATIONS, vol. iii. p. 20$^{\text{b}}$, and POETRY, above, p. 5), although the rhythm is, now at least, in several instances imperfect.

In 3$^{1-7}$ Jerusalem is once more the subject of denunciation, as the rebellious, polluted, oppressing city, whose princes, judges, prophets, priests, are all alike unfaithful to their duty, and whose inhabitants have failed utterly to learn the lesson God meant to teach them by His judgments upon the nations. V.^{8} appears to form the connecting link between the Threatening and—

B. *The Promise*, 3$^{9-20}$.

The faithful in Jerusalem are to wait till the judgment is accomplished, when all peoples shall be brought to serve the LORD with one consent (vv.$^{9.10}$). Israel's sinfulness and pride shall be no more, they shall trust in the name of the LORD and shall dwell safely (vv.$^{11-13}$). The book closes with a triumphant call to the people to rejoice in the LORD who dwells in their midst, and who gives to them a high and honourable place amongst the nations (vv.$^{14-20}$).

The general sense of these closing verses is clear, but there is some uncertainty as to details, as the text is in several places more or less corrupt (see below, § iv.).

iii. DATE AND UNITY.—1. The title of the book assigns the prophecy, as we have seen, to the days of king Josiah. So far as ch. 1 is concerned, the correctness of this date is almost universally admitted, even by those who do not regard the title as an original part of the book.

The only important exception is Ed. König (*Einleit. in d. AT* 352 f.), who would assign the prophecy to the period of reaction that followed the death of Josiah (B.C. 608). But, while much in the book would suit such a date, there is one circumstance which appears sufficient to condemn König's view, namely the absence of any censure upon *the king* in 1^{8}. This is suitable in the case of Josiah but not of Jehoiaḳim (see G. A. Smith, *Twelve Prophets*, ii. 39 f.).

But the reign of Josiah (B.C. 639–608) is crossed by an important dividing line in the year 621, the date of the reformation on the basis of the Deuteronomic law-book. On which side of this line does our prophecy naturally range itself? We have no hesitation in reaching the conclusion that the description of the idolatrous practices in 1$^{4-6}$ and of the whole religious, moral, and social condition of things in 1$^{8.9.12}$ (not to speak of 3^{1} etc.), points to a period prior to the year 621. This opinion, which is the prevailing one among scholars (of moderns it may suffice to name A. B. Davidson, Driver, G. A. Smith, Wellhausen, Nowack, Cornill, Budde, Strack), is opposed for various reasons by Delitzsch (in *PRE*^{2}), Kleinert (in Lange's *Bibelwerk*), and Schulz (*Com.* 1892), who would date the prophecy subsequent to the reforms of B.C. 621.

The argument for a late date, which is drawn from supposed echoes of Deuteronomy (*e.g.* Zeph 1$^{13.15.17}$ compared with Dt 28$^{29.30}$), need not detain us, for it is weak in the extreme. Nor can any great weight be laid upon the expression 'the *remnant* of Baal' in 1^{4}, as if this were an allusion to the survival of Baal-worship after the drastic measures adopted against it by Josiah in 621. For (*a*) it is possible that the original text was 'the *names* [שמות instead of שְׁאָר; LXX τὰ ὀνόματα] of Baal'; cf. Hos 2^{17} 'I will take away the names of the Baalim out of her mouth,' and Zec 13^{2} 'I will cut off the names of the idols out of the land.' Or (*b*) שְׁאָר may be taken in the sense of 'the rest'= 'every vestige,' so that the meaning will be 'I will wholly root out Baal-worship,' 'I will cut it off till not a trace of it is left' (cf. Is 14^{22} 'I will cut off from Babylon name and remnant'); so A. B. Davidson, Wellhausen, Nowack. Probably the same sense should be attributed to the שְׁאֵרִית of Am 1^{8} and the אַחֲרִית of Am 4^{12} 9^{1}. Or (*c*), even if the expression be taken in its narrowest sense, the 'remnant of Baal' may refer to the Baal-worship which survived the reforms which, if we can trust the Chronicler (2 Ch 34$^{3\text{f.}}$), Josiah had undertaken six years previously. Besides, as A. B. Davidson points out, *Baal* may stand here for any kind of false worship, even that which is nominally offered to Jahweh. On the CHEMARIM see article under that title.

A difficulty in the way of assigning the prophecy to the earlier part of Josiah's reign has been felt owing to the mention of 'the king's sons' in 1^{8}, seeing that it is impossible that Josiah, who could not have been much over 21 years of age at the time (cf. 2 K 21$^{1.3}$), could have had sons capable of perpetrating the outrages attributed to them in v.^{9}. But here again (*a*) it is not unlikely that the LXX ὁ οἶκος τοῦ βασιλέως [*i.e.* בֵּית הַמֶּלֶךְ instead of בְּנֵי הַמֶּלֶךְ] has preserved the original reading—'the king's *house*.' Or (*b*) 'the king's sons' may mean simply members of the royal family (who had a king, but not necessarily the reigning king, among their ancestors); cf. 1 K 22$^{2\text{b}}$, 2 K 11^{2}, Jer 36^{26} [see Hitzig-Graf] 38^{6}. Owing to the youth of the king, his relatives at court would have all the freer scope for their malpractices.

The early date for which we are contending is further supported by the prophet's allusions to an approaching foe, whom he does not name, but who is with much probability identified by most moderns with the Scythians, whose incursions are referred to by Herodotus (i. 102 ff.), and who probably passed along the Philistine seaboard, *c.* 626 B.C. [This explanation is in every way preferable to that of Schwally, who supposes the foe to be *Egypt* (see A. B. Davidson, p. 98, for a conclusive refutation of Schwally)]. These Scythian hordes appear also to have been the subject of Jer 4^{6}–6^{30} in its *original* form, and to have suggested the imagery of Ezk 38$^{4\text{ff.}}$. In the year 626 Josiah would be 21 years of age, and Ẓephaniah possibly a little older. The latter and Jeremiah probably began their prophetic activity in one and the same year (626).

The present position of the book, both in MT and LXX, between Ḥabakkuk and Ḥaggai proves nothing, for the arrangement of the Twelve is in other instances (*e.g.* JOEL and OBADIAH) demonstrably unchronological. The proper place of our book is between Nahum and Ḥabakkuk.

2. While ch. 1, with the possible exception of a few expressions which may have found their way from the margin into the text, is universally attributed to Ẓephaniah, and dated by the great majority of scholars within the first half of Josiah's reign, there are considerable differences of opinion as to the unity and the date of the rest of the book.

Kuenen (§ 78. 5–8) accepted the genuineness of all but 3$^{14-20}$, which, on account, chiefly, of differences both in tone and situation from the rest of the prophecy, he was inclined to make post-exilic (*c.* 536 B.C.). He defended 2$^{1-3.11}$ against Stade (*GVI* i. 644 n. 3), who denied to Ẓephaniah also the whole of ch. 3.—Wellhausen (followed pretty closely by Nowack) is suspicious of 2$^{2.3}$, he rejects vv.$^{8-11}$, and treats ch. 3 as a later supplement, added in two stages, vv.$^{1-7}$ and vv.$^{8-20}$, upon the analogy of Mic 1$^{1-6}$ and vv.$^{7-20}$.—Budde (followed by Cornill, *Einleit.*^{3} § 35. 3 [contrast his more conservative position in ^{2} § 31. 3]) would admit 2$^{1-3}$ 3$^{1-5.7.8.6}$ [in this order] $^{11-13}$ as in harmony with Ẓephaniah's situation and a suitable sequel to ch. 1; he rejects the whole of 2^{4-15} mainly because Israel appears in these verses as the victim instead of as the perpetrator of wrong (the conception in ch. 1); $3^{9.\ 10}$ are excluded as breaking the connexion between v.^{8} and v.^{11}, while vv.$^{14-20}$ are declared to be a later lyrical epilogue to vv.$^{11-13}$.—Schwally allows to Zephaniah nothing outside ch. 1 except 2^{13-15} and possibly 2^{1-4}, holding 2^{5-12} to be exilic and ch. 3 post-exilic. He concedes, however, that 3^{1-7} 'may be' Zephaniah's.—G. A. Smith accepts the whole of ch. 2 except vv.$^{8-10}$ (the oracle against Moab and Ammon, which is suspicious for reasons noted below) and v.^{11} which breaks the connexion between v.^{7} and v.^{12}. In 3^{1-13} he considers vv.$^{9.\ 10}$ to be 'obviously an intrusion,' while v.^{8} should possibly precede v.^{6}, as Budde proposes. He has no doubt about attributing vv.$^{14-20}$ to the end of the Exile or the period after the Return.—Driver remarks that 2^{11} seems to be out of place, and that 3^{14-20} is somewhat doubtful, although even here, the picture being of course an imaginative one, 'the question remains whether it is sufficiently clear that it was beyond the power of Zephaniah's imagination to construct it' (*LOT*^{6} 342 f., where the author adds a reference to his discussion on Mic 7^{7-20}).—Davidson considers it quite possible that 2^{4-15} has in various places been expanded, but defends the genuineness of ch. 2 as a whole. He allows that 3^{10} should possibly be omitted, but otherwise vv.$^{1-13}$ appear to him to be genuine, although they might suggest that the passage was later than ch. 1. Towards vv.$^{14-20}$ he holds the same attitude as Kuenen, recognizing in them quite a different situation from that of the rest of the book.—König would apparently accept the whole book as genuine, with the exception of that part of the title which refers the prophecy to the days of Josiah.

As to ch. 2, there will be little question that Schwally, in arguing against the genuineness of vv.$^{1-3}$, built too much upon the occurrence of ענו and ענוה in v.^{3} (cf. the criticisms of Bacher, Budde, and Davidson). Yet there is force in the remark of Nowack, that while the *word* ענו occurs in the older literature (Nu 12^{3} [E], Am 8^{4}, Is 11^{4}), the *notion* has not yet assumed there that ethico-religious stamp which it bears in Zeph 2^{3}, and for which we must look for parallels to the later Psalms. No doubt, as an argument this is 'rather precarious' (Davidson, p. 101); but an instinctive feeling may be stronger than logic, and we confess that, like Wellh. and Nowack, we 'cannot repress a doubt' of the genuineness at least of v.^{3}, which with its 'Seek ye the LORD, ye meek of the earth,' 'seek righteousness, seek meekness,' has a decidedly late ring to our ears.

The objections taken to 2^{4-15} in general are singularly pointless (see Davidson or G. A. Smith), but vv.$^{8-11}$ can hardly be defended. The oracle against Moab and Ammon (vv.$^{8-10}$) denounces these peoples for an attitude towards Judah which seems out of place in Josiah's reign; their territories were not on the line of the Scythian invasion of Egypt *via* Philistia [but see, as bearing on this argument, Davidson, p. 99]; and, further, the verses are not, like those that precede and that follow, in the *ķînah* measure. This last circumstance tells very strongly against their originality. Then v.^{11}, if it belongs to Zephaniah at all, is certainly out of place. The omission of these four verses gives a good connexion between v.^{7} and v.^{12}.

It may be held with some confidence that 3^{14-20} emanates from the period of the Return. Its entire difference of tone from ch. 1 and from the opening verses of ch. 3 is unmistakable. The language reminds us of Deutero-Isaiah, and the eschatology of Ezekiel. Like Am 9^{11-15} and Mic 7^{7-20}, the verses were probably introduced into their present place to relieve a sombre background, this having been only imperfectly accomplished in the instance before us by vv.$^{11-13}$. In all probability vv.$^{9.\ 10}$, which interrupt the connexion and spoil the antithesis between v.^{8} and v.^{11}, should also be assigned to the same or a similarly late hand. There does not appear to be any adequate ground of suspicion against the rest of ch. 3, making due allowance, of course, for textual corruptions (see next section).

iv. LITERARY CHARACTERISTICS, CONDITION OF TEXT, etc.—The style of Zephaniah is, upon the whole, clear and forcible; several of his figures are striking (*e.g.* 1^{12} 'I will search Jerusalem with lanterns,'[*] *ib.* 'the men that are thickened upon their lees,' v.^{17} 'they shall walk like blind men'). Powerful and awe-inspiring is his description of the day of the Lord in 1^{15-18}, whose opening words in the Vulg. *Dies iræ, dies illa,* commence also the well-known hymn of Thomas of Celano. We have a passage of exquisite beauty in 3^{11-13}. It is true, as Davidson points out, that, as compared with Nahum's description of the destruction of Nineveh, Zephaniah's prophecy of the same event is somewhat general and lacks the power of the other prophet's impassioned oratory; but this difference may be due partly to the fact that the picture in the one case is painted from the imagination, and in the other is the work of one who had beheld the kind of scenes he depicts. To a considerable extent Zephaniah borrows from his predecessors, esp. from Isaiah and Amos (cf. $1^{2.\ 3}$ with Hos 4^{3}; the description of the day of the Lord with Is 2^{19-21}, Am $2^{2.\ 14}$ 5^{20}; 1^{13b} with Am 5^{11}; 1^{18b} with Is 10^{23} 28^{22}; 2^{4-15} with Am 1^{3}–2^{3}).

There are traces in Zephaniah of the phenomena that characterize late Hebrew. It is partly, indeed, on account of some of these marks that Wellh. doubts the genuineness of 3^{1-7} (note נגאלה and יונה in v.^{1}, חוצות in sense of *fields* in v.^{6}, פקד על in sense of *command* in v.^{7}). For further instances see G. A. Smith, ii. 37 n. 1, who also gives on the preceding page a list of rare grammatical forms and phrases found in this book. Of *hapax legomena* may be noted נטיל in 1^{11}, נְוֹת and כְּרֹת (?) in 2^{6}, ממשק and מכרה in 2^{9}, ארזה (?) in 2^{14}, מֹרָא (=מָרָה) in 3^{1}, גָּרַם (Qal) in 3^{3}, בוגדות (if correct; see Ges.-Kautzsch, § 124*e*) in 3^{4}, נצדו in 3^{6}, עָתָר (different from Ezk 8^{11}) and פוץ (?) in 3^{10}. See also 2^{1a}, v.^{b} RV (Aram.).

The *text* of Zephaniah is, unfortunately, in several places in rather a corrupt condition, and contains some suspicious words: in some cases, however, it can be corrected with the help of the LXX, and in others Wellh. and others have made plausible emendations (*e.g.* in $1^{5.\ 18b}$ $2^{1.\ 2.\ 6.\ 7.\ 14}$ $3^{7.\ 8}$), though naturally uncertainties still remain. For particulars we must refer to G. A. Smith, *Twelve Prophets* (ii. 35–37, 56–74), or, more fully, to Nowack's Commentary.

v. RELIGIOUS VALUE.—The abiding value of the Book of Zephaniah rests mainly upon three foundations: (*a*) the profoundly earnest moral tone of the prophet, with his deep sense of the sin of injustice and oppression, and inflexible demand for purity of heart and conduct; (*b*) his doctrine of the disciplinary value of suffering. God's judgments are meant to humble and chasten Israel, and when she has learned this lesson she trusts in God alone ($3^{7.\ 11-13}$). In vv.$^{9.\ 10}$, a later addition to the book, the same principle is applied to the heathen. Their lips are purified (הפך here in the same sense as in 1 S 10^{9}) by suffering, so that they become fit to call upon the name of the LORD. (*c*) The wide outlook of the prophet's philosophy of history, his doctrine of Divine Providence. The apparently irresponsible Scythians come upon the scene at the moment God needs their presence; the various nations are overtaken by the Divine judgment, in order that God's purpose may be accomplished of blessing not only the Jewish people but the whole world.

A universalism akin to that expressed in Jn $4^{21ff.}$ has sometimes been attributed to Zephaniah upon the ground of 2^{11} ('men shall worship him, *every one from his place*') $3^{9.\ 10}$; but in the first-named passage the words we have italicised are of uncertain meaning (but see Davidson), and all three passages lie under strong suspicion of belonging to a later age than that of Zephaniah.

It may be added that the Book of Zephaniah is one of those from which the figure of the Messianic king is entirely absent. The standpoint of the prophet was indeed such as almost necessarily to preclude the appearance of any such conception.

---

[*] This verse gave rise to the mediæval pictures of St. Zephaniah carrying a lantern in his left hand.

LITERATURE.—Driver, *LOT* ^{6} (1897), pp. 340-343; Wildeboer, *Litt. d. A.T.* (1895) pp. 189–193; the *Einleitungen* of Cornill ^{3} (§ 35. 3), Ed. König (1893), pp. 352-354; Strack ^{5} (1898), p. 109 f.; Baudissin (1901), pp. 550-555.

ZEPHATH (צְפַת; B and Luc. Σεφέκ, A Σεφέρ).—See HORMAH, and add to the Literature there Dillm. on Nu 14^{45} and Moore on Jg 1^{17}.

ZEPHATHAH.—According to MT of 2 Ch $14^{10\,(9)}$ Asa joined battle with ZERAH the Cushite in the valley of Zephathah (גֵּיא צְפָתָה) at Mareshah. No such place is known to us elsewhere in OT, and it is not unlikely that the LXX κατὰ βορρᾶν [*i.e.* בַּגַּיְא צָפֹנָה instead of בְּגֵיא צְפָתָה Μαρεισης, 'to the north of Mareshah,' has preserved the original reading.

ZEPHI, ZEPHO.—A son of Eliphaz, and one of the 'dukes' of Edom, Gn $36^{11.\,15}$ (צְפוֹ Zepho, LXX Σωφάρ) = 1 Ch 1^{36} (צְפִי Zephi, BA Σωφάρ, Luc. Σεπφουή). It is impossible to decide between the claims of the two forms of the name, nor can its ethnological signification be determined.

ZEPHON, ZEPHONITE.—See ZAPHON.

ZER (צֵר).—A 'fenced' city of Naphtali, Jos 19^{35}. It follows Ziddim (properly *Haẓẓiddim* [with art.]). The LXX tr. v.^{35} καὶ αἱ πόλεις τειχήρεις τῶν Τυρίων [*i.e.* הצרים], Τύρος [*i.e.* צֹר], κ.τ.λ., but it is difficult to suppose that this can be correct. Haẓẓiddim may be the modern *Ḥaṭṭin*, near *Ḳarn Ḥaṭṭin*, N.W. of Tiberias (so Talm.; see Neubauer, p. 207). The identity of Ẓer is quite uncertain. Conjectures as to the site are noted in Dillm. *Jos. ad loc.*

ZERAH (זֶרַח; LXX Ζάρα, Ζάρε; Mt 1^3 Ζαρά).—**1.** One of the sons of Reuel, the son of Esau by his Canaanitish, or Ishmaelite, wife, Basemath (Gn $36^{13.\,17}$, 1 Ch 1^{37}). The name appears again as that of the father of Jobab, one of the early kings of Edom (Gn 36^{33}, 1 Ch 1^{44}). **2.** The younger born of the twin sons of Judah by Tamar his daughter-in-law. The peculiar circumstances of his birth are made to account for his name (Gn 38^{30} [J]). He gives his name to the Zerahites (Nu 26^{20}). Of this family was Achan the son of Zabdi (Ζαμβρεί, LXX Jos 7^1; Zimri, 1 Ch 2^6), who took of the spoil of Ai contrary to the Divine command. Zerah's sons are mentioned 1 Ch 9^6, and Pethahiah (Neh 11^{24}) is one of his descendants. He finds a place along with PEREZ his twin brother in the genealogy of our Lord (Mt 1^3). **3.** A son of Simeon, and the founder of a family of **Zerahites** within that tribe (Nu 26^{13}, 1 Ch 4^{24}); called also **Zohar** (Gn 46^{10}, Ex 6^{15}). **4.** A Levite name, borne by a Gershonite (1 Ch 6^{21}) and by a Kohathite (1 Ch 6^{41}). **5.** The name of the Cushite (2 Ch $14^{9\text{-}15}$) who invaded Judah in the reign of Asa (*c.* 911–871 B.C.), and suffered a disastrous defeat at Mareshah in the south-west of the land.

The invasion of Judah by Zerah the Cushite is unknown to secular history, and rests solely upon the authority of the Chronicler. This circumstance, together with the fact that the name of Zerah the Cushite does not appear in any list of the kings of Egypt, has led Wellhausen (*History of Israel*, p. 207), Stade, and others to pronounce the narrative unhistorical. It is, they say, an invention conceived for the purpose of making the historical overthrow of Rehoboam into a triumph on the part of his descendant: it had its origin at the time when Cushites ruled in Egypt, and transferred a condition of affairs which was true of a later time to the days of Asa. But this is an excess of historical scepticism. There is nothing in the inscriptions inconsistent with the narrative of the Chronicler.* 'There is so little known,' says Wiedemann (*Geschichte von Alt. Ägypten*, p. 155), 'from the time of Osorkon I. that it cannot be considered beyond the bounds of probability for an Ethiopian invader to have made himself master of the Nile Valley for a time in his reign, and for him and not Osorkon I. to be the Zerah of the Chronicler.' Zerah was identified by Champollion (*Précis du Système hiéroglyphique* ^{2}, pp. 257–262) with Osorkon I., the second king of the 22nd dynasty; and the identification has been accepted by Ewald and others. The discovery of M. Naville in the ruins of Bubastis (*Bubastis*, pp. 50, 51 f.; Sayce, *HCM* p. 363) goes rather to connect the invasion with Osorkon II., who is made to declare on a monument that 'the Upper and Lower Rutennu have been thrown under his feet.' This would show that Osorkon II. had been engaged in a campaign in Palestine, which is designated Upper Rutennu in the geographical language of Egypt. Hommel (*AHT* p. 315 n.; cf. Ball, *Light from the East*, p. 82) thinks that Zerah and his Cushites were from South Arabia, a view which is favoured by the character of the spoils,—tents, sheep, and camels,—as well as by the very name Zerah, which resembles Zirrikh or Dhirrih, a royal name in the newly-found Sabæan inscriptions. This view is favoured, too, by the designation of the people as 'Αμαζονεῖς in the LXX (2 Ch 14^{15}), which may be compared with the *bânu Mazin*, the Ma'din of the same inscription.†

LITERATURE.—In addition to references given above see Sayce, *Egypt of the Hebrews*, p. 111; Maspero, *Struggle of the Nations*, p. 774; McCurdy, *HPM* i. 259; Herzog, *PRE* ^{2} xvii. 473.

T. NICOL.

ZERAHIAH (זְרַחְיָה 'J" hath arisen *or* shined,' cf. Sab. דרחאל).—**1.** A priest, an ancestor of Ezra, 1 Ch $6^{6\,bis.\,51}$ [Heb. 5^{32} 6^{36}], Ezr 7^4 (B in all Ζαραιά; A Ζαραίας, Ζαρίας, Ζαραιά). **2.** The father of Eliehoenai, Ezr 8^4 (B Ζαρειά, A Ζαραιά).

ZERED (זֶרֶד).—The torrent-valley (*naḥal*) of Zered is named in the itinerary of Israel's journeyings, Nu 21^{12} (B Ζάρετ, A Ζάρε, Luc. Ζάρεθ), immediately prior to their crossing of the Arnon, and in Dt 2^{13} as the point that marked the close of the 38 years' wanderings. It is probably either the *Sail Sa'ideh* (Knobel), the principal confluent of the Arnon from the S.E. (Burckhardt, *Syrien*, 633), or the *Wādy Kerak* (Ges., Hitz., Keil, Dillm., G. A. Smith, Buhl). The objection to the *Wādy el-Aḥsâ* (Wetzstein in Del. *Genesis* ^{4}, 567 f.; Tristram, *Land of Moab*, 49 f.) is that this *wādy* must have formed the S. boundary of Moab on the side of Edom, whereas Iye-abarim, the station *before* the crossing of the Zered, is shown by Nu 21^{11} to have been in the wilderness to the E. of Moab (see Driver, *Deut.* 38).

ZEREDAH, ZERERAH.—See ZARETHAN.

ZERESH (זֶרֶשׁ; B Ζωσαρά, A Σωσαρά).—The wife of HAMAN, Est $5^{10.\,14}$ 6^{13}. Jensen (see Wildeboer, 'Esther' in *Kurzer Hdcom.* p. 173) compares the Elamite goddess *Kiriša* or *Giriša* (suggesting to read גרש). The explanations of the name from the Persian are doubtful.

ZERETH (צֶרֶת).—A Judahite, 1 Ch 4^7 (B Ἄρεθ, A Σάρεθ, Luc. Σάρηθ).

ZERETH-SHAHAR (צֶרֶת הַשַּׁחַר).—A Reubenite town, Jos 13^{19} (B Σεραδὰ καὶ Σειων, A Σὰρθ καὶ Σιώρ). Its site has not been identified, although in the vicinity of *Mkaur* (Machærus) the hot springs *es-Ṣara* and the volcanic mountain *Hammat es-Ṣara* may contain reminiscences of the ancient name (Buhl, *GAP* 268).

---

* Of course his numbers (580,000 men in Asa's army, 1,000,000 in Zerah's) are, as frequently happens, incredibly large.

† See, however, the criticism of this hypothesis of Hommel's in Ed. König's *Fünf neue arab. Landschaftsnamen*, 1902, pp. 53–57

ZERI.—See Izri.

ZEROR (צְרוֹר).—An ancestor of Saul, 1 S 9^{1} (BA 'Αρέδ, Luc. Σαρά).

ZERUAH (צְרוּעָה). — The mother of Jeroboam, 1 K 11^{26} (B and Luc. om., A Σαρουά) 12^{24b} (BA Σαρεισά, B* 'Αρειρά). In the latter passage, which is an addition of the LXX, it is further stated that she was a harlot (πόρνη).

ZERUBBABEL (זְרֻבָּבֶל; LXX and NT Ζοροβάβελ, **Zorobabel**).—

The etymology and the meaning of the name are doubtful. It is often taken as = Heb. זְרוּעַ בָּבֶל 'begotten of (*i.e.* in) Babylon'; but proper names with a passive participle as one element are scarcely, if at all, found in Hebrew, though frequent enough in Assyrian (Gray, *HPN* 201, n. 1; Driver, *Text of Sam.* 14; Nestle, *Marginalien*, 7 f.). The same objection applies to the explanation זְרוּי בָּבֶל 'dispersed of Babylon'; while philology and the fitness of things are both opposed to van Hoonacker's (*Zorobabel*, 44 f.) explanation זְרַב בָּבֶל 'crush Babylon.' Upon the whole, we should perhaps accept the view of Ed. Meyer (*Entstehung des Judenthums*, p. v) who makes it a Bab.-Assyr. name and punctuates *Zêru-Babel* = 'seed *or* offspring of Babylon.' The name is said to occur in Bab. documents as *Zêr Babili* (Strassmaier, *Inschr. von Nabonid.* 113, l. 13, *Inschr. von Darius*, 138, l. 2, 297, l. 2).

Zerubbabel played an important part in connexion with the return of the Jews from exile. Of Davidic descent, he is generally called the son of **Shealtiel** or **Salathiel** (Ezr $3^{2.8}$, Hag 1^{1}, Mt 1^{12} etc.), who was one of the sons of Jehoiachin, the captive king of Judah (1 Ch 3^{17}). In one passage, 1 Ch 3^{19}, the MT (perhaps by a textual error; the LXX has Σαλαθιήλ) makes him the son of Pedaiah, who was Shealtiel's brother. He probably came to Jerusalem along with the first band of exiles, under the leadership of Sheshbaẓẓar, who is not to be identified with him, and who may have been his uncle, the Shenaẓẓar of 1 Ch 3^{18}. See article Sheshbazzar, p. 493.

In direct opposition to Ezr 3^{7} and 4^{3} (the latter of which has, without any warrant, been set down as an interpolation)* it is contended by de Saulcy and others that Zerub. came to Jerusalem not under Cyrus, but in the second year of Darius Hystaspis; and appeal is made, in support of this opinion, to 1 Es 3–5^{6} and Jos. *Ant.* xi. iii. These last two authorities are indeed but one, for the Jewish historian simply follows, with modifications of his own, the narrative of 1 Esdras. As to 1 Esdras itself, it is possible that it has sometimes preserved a true reading where this has been lost by the MT (see Esdras, vol. i. p. 759^{b}), and hence where the narrative is parallel with the Heb. Ezra we may occasionally get help from it, but it is more than questionable whether we ought to attach weight to its testimony as to facts where it contradicts the canonical book. As a specimen of the hopeless confusion that reigns in 1 Esdras, we may adduce the position occupied by 2^{15-25} (= Ezr 4^{6-23}), which is more out of place than even in the Heb. edition, while the independent narrative in 3–5^{6} introduces Darius Hystaspis as if he for the first time gave the exiles permission to return, although this has already in $2^{1ff.}$ been traced to Cyrus. This section (3–5^{6}) is not translated from the Hebrew, but is either a free composition of the author or borrowed by him from a Greek source. Its hero Zerub. is introduced as one of the bodyguard of Darius Hystaspis, who as a recompense for the skill with which he had conducted an argument (about the relative power of Wine, the King, Woman, and Truth) received permission from the king to return to Jerusalem and to build the temple. The details of this story are no doubt apocryphal, but it is possible that a substratum of truth underlies it,—Zerub. may have headed an embassy to Darius to invoke his aid against the Samaritans and other opponents of the Jews (cf. Jos. *Ant.* xi. iv. 9).

According to Ezr 3–4^{5} (narrative of the Chronicler), Zerubbabel, along with Jeshua the high priest and others, soon after their arrival in Jerusalem (in the seventh month) set up an altar for burnt-offerings, kept the Feast of Tabernacles, and took steps for the rebuilding of the temple, whose foundation was laid in the second month of the second year of their arrival, amidst ceremonies which the Chronicler describes in his characteristic fashion (3^{1-13}). Owing, however, to the opposition of 'the adversaries of Judah and Benjamin,' this act was followed by seventeen years of inactivity, until, in the second year of Darius (B.C. 520), and largely owing to the stimulus supplied by the prophets Haggai and Zechariah, the work was resumed in earnest (Ezr 5^{1}). A new delay, occasioned by the suspicions of Tattenai, 'governor on this side the river,' and others, was ended by an appeal to Darius himself, who ordered that the work should be allowed to proceed ($6^{1ff.}$). The temple was finished and dedicated four years later ($6^{15f.}$).

(*a*) There has been much discussion as to the date when the foundation of the temple was really laid. In Ezr $3^{8f.}$ this is distinctly asserted to have been done by Zerub. and Jeshua in the second year after their arrival in Palestine (*i.e.* 537). On the other hand, it certainly appears from Ezr 5^{2}, Hag $1^{14f.}$ 2^{15-18}, Zec 8^{9}, that the foundation was not laid till seventeen years later (520).* The discrepancy may be removed by the suggestion of Driver (*LOT* ^{6} 547) that the ceremony of Ezr 3^{8} was of so purely *formal* a character that Haggai could afford to ignore it. It is quite conceivable that the fulfilment of the project formed in 537 had to be postponed till 520, for, not to speak of the opposition of the Samaritans (Ezr $4^{1f.}$), the character of Cambyses (529–522), the successor of Cyrus, and notably his expedition to Egypt (527), would be unfavourable to the prosecution of the building. Others (see Literature below) prefer to suppose that the Chronicler, for obvious reasons, antedated the laying of the foundation by over fifteen years, while on the other hand he did substantial justice to the real course of events by representing the work of building as not seriously taken in hand till the second year of Darius.

(*b*) A more serious question is raised by Havet ('La modernité des prophètes' in *Revue des deux mondes*, 1889, p. 799 ff.), Imbert (*Le temple reconstruit par Zorobabel*, 1888), and Howorth (*Academy*, 1893), who contend that the Darius of Ezr $4^{5.24}$ is not Darius Hystaspis (522–485), as we have hitherto taken for granted, but Darius Nothus (424–404). The rebuilding of the temple is thus brought down a whole century (422 instead of 520). The strongest argument in support of this theory is the mention in Ezr $4^{6.7}$ of Ahasuerus (*i.e.* Xerxes) and Artaxerxes (Longimanus) in such a way as apparently to imply that Darius of 4^{24} is Nothus. But it has long been suspected (cf. Driver, *LOT* ^{6} 547 f.; Cornill, *Einleit.* ^{2} 268) that the section Ezr 4^{6-23} is out of place and should follow ch. 6. It really refers to events that happened in the time of Nehemiah, and describes opposition to the rebuilding, not of the *temple* but of the *city and walls.* How the Chronicler came to insert this section where he did, is a question we will not undertake to answer; but that even he was capable of supposing that a century elapsed between 4^{1}, when Zerub. and Jeshua stand at the head of the community, and 5^{1}, when under their directions the building of the temple is pushed on, is inconceivable.

The only other reason for identifying Darius with Nothus is found in Ezr 6^{14} 'according to the decree of Cyrus and Darius *and Artaxerxes* king of Persia.' But it is abundantly evident from the context that *Artaxerxes* is here an interpolation due to *prolepsis* on the part of a scribe who had in his mind the services rendered to the Jews by that monarch in the time of Ezra and Nehemiah. The identity of the Darius of Ezr 4^{24} with Hystaspis is further evident from Zec $1^{7.12}$, where the 70 years must date from either 597 or 586, and in either case 70 (a round number) will bring us to the reign of this king. Apart from any other consideration, is it credible that a whole century would have been suffered to elapse between the Return and the rebuilding of the temple, seeing that the latter institution had since Josiah's reforms assumed such importance? The Chronicler could not in his narrative allow seventeen years, not to speak of a century, to pass before steps were taken to restore the building, hence perhaps his statement that the foundations were laid shortly after the Return, and about the same time as the altar was re-erected. So clearly does Imbert perceive the force of these considerations, that he admits that shortly after the Return a temple was built *by Sheshbaẓẓar*, which was afterwards destroyed, when or by whom we are not told, and then finally came Zerub., a contemporary of Darius Nothus, and restored it. Imbert most arbitrarily alters the text of Ezr 6^{14} so as to read 'Darius *the son of* Artaxerxes' instead of 'Darius *and* Artaxerxes.' The latter, as in Ezr 4, is held to be Longimanus, who, according to Imbert, is distinguished from Mnemon (under whom he places the activity of Ezra and Nehemiah) by having his name written אַרְתַּחְשַׁשְׂתָּא, while the latter monarch appears as אַרְתַּחְשַׁסְתָּא. (This is pure fancy; the interchange of שׁ and ס is so common as to be a very precarious foundation for an argument of any weight). Imbert is even able to tell us that the Book of Ezra originally contained an account of the building and the destruction of Sheshbaẓẓar's temple, but that a later generation suppressed this, supplying its place by the list of names in Ezr 2, which was borrowed from Neh 7. It is needless to say that for all this there is not the slightest historical evidence.

---

* Howorth (*Academy*, 1893, p. 174 f.) is wrong in asserting that the first four verses of Ezr 4 are not found in the parallel passage in 1 Esdras. Strangely enough, Sayce (*HCM* 543) falls into the same mistake. As a matter of fact, Ezr 4^{1-4} = 1 Es 5^{63-68}.

* Van Hoonacker (*Zorobabel*, 63 ff., *Nouvelles Études*, 105 ff.) labours hard, but it seems to us unsuccessfully, to put a different interpretation on the language of Haggai and Zechariah.

The Darius, then, with whom Zerub. was contemporary, was beyond all reasonable doubt Darius Hystaspis.

How long Zerub. occupied a position subordinate to Sheshbaẓẓar we do not know, but in the beginning of the reign of Darius he was *peḥah* or governor of Judah (Hag $1^{1.14}$ etc.). His history subsequent to the building of the temple is involved in hopeless obscurity. He is not named even in connexion with the dedication (Ezr $6^{15ff.}$). A Jewish tradition relates that he returned to Babylon and died there. It is possible that Darius, after the troubles that broke out during his reign, may have preferred to have a scion of the ancient dynasty of Israel under his eye rather than run the risk of his presence in Judæa stimulating projects for the restoration of the Davidic monarchy. Of the sons of Zerub. (1 Ch $3^{19f.}$) we know absolutely nothing. Zerub. is mentioned in Sir 49^{11} in 'the praise of famous men.'

In recent years new interest has been given to the personality of Zerubbabel by the extremely able and ingenious work of Sellin, *Serubbabel: ein Beitrag zur Gesch. der messian. Erwartung und der Entstehung des Judenthums*, 1898. Sellin seeks to make out that, at the instigation of the prophets Haggai and Zechariah (cf. Hag 2^{23}, Zech 4^{9} $8^{9ff.}$), Zerub. was actually raised to the throne of Judah, and the Messianic kingdom thus set up, but that he was soon overthrown by the Persians and put to death. The martyr king was even supposed by Sellin to be the suffering Servant of Is 53. The evidence in support of these conclusions is very skilfully marshalled, but one has a feeling that fancy plays too large a part in Sellin's reconstruction of the post-exilic history, and, so far as the argument rests upon Is 53 and kindred passages, it will have no weight with those (and their number is increasing) who refuse to see in the Servant an *individual* instead of a *collective* sense (cf. esp. Ed. König, *The Exiles' Book of Consolation*, 1899, and Budde, *Die sogenannten Ebed-Jahwe-Lieder*, 1900). [The identification of the Servant with Zerubbabel is abandoned by Sellin in his *Studien zur Entstehungsgesch. der jüd. Gemeinde nach dem Bab. Exil*, 1901].

The investigations of Professor Kosters led him to conclusions which, if accepted, involve a complete recasting of the traditional opinions about the Return from exile, and the influence of that event upon Israel's subsequent history. Founding partly on the undoubted fact that a great many Judahites were never carried into exile at all, Kosters contended that the temple was rebuilt, not by the returned exiles, but by the people of the land (at the generally accepted date 520–516). While Driver and Ryle are satisfied that the Chronicler gives in Ezr $3^{8\text{-}13}$ a substantially correct account of what transpired, Cheyne accepts Kosters' results. He agrees, indeed, with Wildeboer, that Kosters went too far in denying that any exiles at all returned at the accession of Cyrus, but is of opinion that the real Return was not till that headed by Ezra at Nehemiah's *second* visit (432). The story of the Return and the building of the temple as told by the Chronicler is, upon Kosters' theory, constructed with a view to glorifying the *gôla* (exiles) at the expense of the *'am-hā'āreẓ* (people of the land). Zerubbabel and Jeshua may have done all that is recorded of them, but they need never have been in Babylon at all. Kosters' conclusions have been combated, especially by Wellh., Ed. Meyer, and van Hoonacker (see Literature below), from different points of view, and it may be safely asserted that, if it has been the fashion to attribute too much to the *gôla* and too little to the remnant of Judah, the brilliant Leyden professor went to the opposite extreme.

LITERATURE.—Kuenen, *De chronologie van het Perzische tijdvak*, 1890 [*Gesam. Abhandl.* 212 ff.]; de Saulcy, *Étude chronol. des livres d'Esd. et Neh.* 1868; Imbert, *Le temple reconst. par Zorob.* 1888; Stade, *GVI* (1888), ii. 98 ff.; Driver, *LOT*^{6} (1897), p. 545 ff.; Ryle, *Ezra and Nehemiah* (Camb. Bible), 1893; Howorth, 'Real character and importance of 1 Esdras' in *Academy*, 1893, pp. 13, 60, 106, 174, 326, 524, see also *PSBA* xxiii, 147, 305; A. van Hoonacker, *Zorobabel et le second temple*, 1892; Wellhausen, *IJG*^{3} (1897), p. 157 ff.; Schürer, *GJV*^{3} (1898), ii. 327 ff. [*HJP* II. iii. 177 ff.]; P. Hay Hunter, *After the Exile* (1890), i. 50 f., 156 f., 219 f.; C. C. Torrey, *The Composition and Hist. Value of Ezr.-Neh.* 1896; Sayce, *HCM* 539 ff.; Schrader, 'Die Dauer des zweiten Tempelbaues,' in *SK*, 1867, pp. 460–504 (the first notable attack on the historicity of Ezr 3; Schrader's view has been adopted by Kuenen, Stade, Marti, Ryssel, König, and many others). Kosters' epoch-making work, *Het herstel van Israël in het Perzische tijdvak*, 1894, was criticised by Wellhausen, upon the whole adversely (though he concedes a good deal to him), in *GGN* (1895, No. 2, 'Die Rückkehr der Juden aus dem bab. Exil' [to which Kosters replied in *ThT*, 1895, p. 549 ff.]), and has met with much more uncompromising opposition from van Hoonacker (*Nouvelles Études sur la restauration juive*, 1896, cf. also his art. 'The Return of the Jews under Cyrus,' in *Expos. Times*, viii. [1897] 351 ff.), and Ed. Meyer (*Entstehung des Judenthums*, 1896; Meyer was severely criticised by Wellh. in *GGA*, 1897, p. 89 ff., and replied in a pamphlet, 'Julius Wellhausen und meine Schrift *Die Entstehung des Judenthums*,' the controversy turning especially upon the genuineness of the documents professedly quoted by the Chronicler, which is affirmed by Meyer against Kosters and Wellhausen). As was noted above, Kosters' conclusions have been largely accepted by Wildeboer, *Lit. d. AT*, 411 f., 419 f., and Cheyne, *Introd. to Isaiah*, xxxiii–xxxix, *JRL* 5 ff.

J. A. SELBIE.

ZERUIAH (צְרוּיָה, in 2 S 14^{1} 16^{10} 23^{37} צְרֻיָה; LXX Σαρουειά and Σαρουιά; *Saruia*).—The mother of David's officers, Abishai, Joab, and Asahel. Her husband's name is never mentioned, and the three heroes are always referred to as 'the sons of Zeruiah' (once in 1 Sam., 13 times in 2 Sam., 3 times in 1 Kings, and 7 times in 1 Chronicles). This fact may simply imply that Zeruiah's husband died early and was forgotten; or it may signify that the mother of these famous men was herself so remarkable a woman that her husband's name was comparatively unworthy of preservation; or it may be an interesting relic of the ancient custom of tracing kinship through the female line.

In the genealogy given in 1 Ch 2, Zeruiah and Abigail are mentioned as sisters of the sons of Jesse (2^{16}). The expression seems to imply that they were not daughters of Jesse, and in 2 S 17^{25} one of the two, Abigail, is called the daughter of Nahash. On this passage Stanley bases the conjecture that Jesse's wife was the mother of Zeruiah and Abigail by a previous marriage with Nahash, king of the Ammonites; but Budde prefers to emend נָחָשׁ into יִשַׁי (Jesse). See NAHASH.

J. STRACHAN.

ZETHAM (זֵיתָם).—A Gershonite Levite, 1 Ch 23^{8} (B Ζεθόμ, A Ζαιθόμ) 26^{22} (B Ζεθόμ, A Ζοθόμ, Luc. in both passages Ζηθάν).

ZETHAN (זֵיתָן).—A Benjamite, 1 Ch 7^{10} (B Ζαιθάν, A Ἠθάν, Luc. Ζηθά).

ZETHAR (זֵתַר).—A eunuch of king Ahasuerus, Est 1^{10} (BA Ἀβαταζά). The Heb. form of the name is compared by Oppert (*Esther*, 25) with Pers. *zaitar*, 'conqueror.'

ZIA (זִיעַ).—A Gadite, 1 Ch 5^{13} (BA Ζοῦε, Luc. Ζέα).

ZIBA (צִיבָא, צִבָא in 2 S 16^{4}; B Σειβά, A Σιβά, and in 2 S $16^{1.2.3.4}$ Σιββά; *Siba*).—A servant or slave (עֶבֶד) of the house of Saul (2 S 9^{2}). The Philistine invasion, which was so fatal to his master's house, probably gave him his liberty (cf. Jos. *Ant.* VII. v. 5), and he comes on the scene at the head of a household of his own, consisting of 15 sons and 20 slaves (2 S 9^{10}). He is consulted by David, who wishes for Jonathan's sake to show kindness to any surviving representative of the house of Saul, and informs the king of the existence of MEPHIBOSHETH, Jonathan's lame son, in the obscurity of Lo-debar (2 S 9$^{3.4}$). When David thereupon receives Mephibosheth into his own house as a permanent guest, and confers upon him the estate which had belonged to Saul, Ziba is appointed Mephibosheth's land-steward (2 S 9$^{9.10}$). At a later period, Ziba dexterously turns Absalom's rebellion and Mephibosheth's weakness to his personal account. To display his own loyalty, he fetches David a large supply of provisions during the latter's flight across the Mount of Olives, and at the same time, apparently without any grounds, accuses his master of having gone over to the enemy in the hope of obtaining the kingdom of Saul. For this sinister service Ziba is rewarded with a grant of all Mephibosheth's property (2 S 16$^{1-4}$). When the rebellion is stamped out, and the king returns to Jerusalem, Mephibosheth is able to rebut the false charges made against him by his treacherous servant. The king might justly punish Ziba, but in the hour of victory he is in a conciliatory mood. If Ziba has not been faithful to his master, he has at any rate been loyal and serviceable to his king. David accordingly contents himself with restoring half the property of Saul to Mephibosheth and confirming Ziba in the possession of the other half (2 S 19$^{24-30}$). J. STRACHAN.

ZIBEON (צִבְעוֹן).—Gn 36$^{2.14.20.24.29}$, 1 Ch 1$^{38.40}$ (*Σεβεγών* except 1 Ch 1^{38} A *Σεβετών*). See ANAH.

ZIBIA (צִבְיָא).—A Benjamite, 1 Ch 8^{9} (B *Ἰεβιά*, A *Σεβιά*, Luc. *Σαβιά*). This and the name Zibiah may be connected with צְבִי, fem. צְבִיָּה 'gazelle,' as totem.

ZIBIAH (צִבְיָה).—The mother of Joash of Judah, 2 K 12$^{1(2)}$=2 Ch 24^{1} (BA *Ἀβιά*). See also ZIBIA.

ZICHRI (זִכְרִי).—**1.** A grandson of Kohath, Ex 6^{21} (B *Ζεχρεί*, A *Ζεχρί*), misspelt in modern edd. of AV *Zithri*, although ed. of 1611 has correctly *Zichri*. **2. 3. 4. 5.** Four Benjamites, 1 Ch 8^{19} (B *Ζαχρεί*, A *Ζεχρί*), v.^{23} (B *Ζεχρεί*, A *Ζοχρί*), v.^{27} (B *Ζαχρεί*, A *Ζεχρί*), Neh 11^{9} (B *Ζεχρεί*, A *Ζεχρί*, and so in the next three occurrences). **6.** An Asaphite, 1 Ch 9^{15} ‖ Neh 11^{17} (see ZABDI, No. 4). **7.** A descendant of Eliezer, 1 Ch 26^{25}. **8.** A Reubenite, 1 Ch 27^{16}. **9.** A Judahite, 2 Ch 17^{16} (B *Ζαρεί*, A *Ζαχρί*). **10.** Father of a captain in Jehoiada's time, 2 Ch 23^{1} (B *Ζαχαριά*, A *Ζαχαρίας*). **11.** A mighty man of Ephraim, 2 Ch 28^{7} (B *Ἐζεκρεί*, A *Ἐζεκρί*, Luc. *Ζαχαρίας*). **12.** A priest in the days of Joiaḳim, Neh 12^{17} (Bא*A om., א$^{\text{c. a mg inf}}$ *Ζεχρεί*, Luc. *Ζαχαρίας*).

ZIDDIM.—See ZER.

ZIDON (צִידוֹן and צִידֹן; *Σ(ε)ιδών*, Arab. *Ṣaîda*).—The ancient city of Ẓidon lay 20 miles to the S. of Berytus (Beyrout), and about the same distance to the N. of its great rival Tyre. It was situated behind a small promontory, and, like Tyre and Jaffa, owed its maritime existence and commercial prosperity to a ledge of rock lying off a short distance from the shore. In the case of Ẓidon, this reef, with its detached islets rounding the N. side of the promontory, presented half a mile of breakwater, and afforded an excellent protection to its shipping. On the S. side of the promontory there was another harbour, more capacious, but less sheltered. The section of Phœnician plain belonging to Ẓidon stretched from the river Tamyras, Arab. *Damûr*, half-way between Ẓidon and Berytus, down to Ẓarephath, 8 miles S. of Ẓidon.

i. EARLY ASCENDENCY.—Ẓidon is considered to have been the most ancient of the Phœnician cities. On her coins she claims to be the mother of Hippo, Citium, and Tyre, and the name of Ẓidon is mentioned in the Egyptian records as far back as B.C. 1500. It is referred to as a city in Gn 10^{19}, and Josephus (*Ant.* I. x. 2) states that it received its name from the eldest son of Canaan (Gn 10^{15}). According to another derivation it owed its name, like Bethsaida of Galilee, to the fishing carried on in its waters. This is in agreement with the allusion to Ẓidon in Anast. *Pap.* i. to the effect that the fish at Ẓidon were as numerous as grains of sand. Ẓidon appears to have taken the lead in the development of industrial exchange among both the civilized and barbarous nations bordering on the middle and eastern divisions of the Mediterranean. In this way the vessels of Tyre on their longer and more perilous voyages still continued to be spoken of as vessels of Ẓidonian commerce. When the Phœnician traffic in cloth, brass, slaves, etc., is referred to in the Homeric poems, it is to Ẓidon, not Tyre, that reference is made (*Il.* vi. 290, xviii. 743; *Od.* iv. 618, xiv. 272–285, xvi. 117, 402, 404). Vergil (*Æn.* i. 446) in the same way calls Dido Ẓidonian, though he mentions Tyrian colonists, and gives his hero a Tyrian steersman, Palinurus. It may have been in this sense, as referring to the general protectorate of Ẓidon, that it is spoken of in Gn 49^{13} as reaching down to the border of Zebulun. This early pre-eminence of Ẓidon continued from the time of Egyptian decline after Ramses II. down to the unsuccessful conflict with the Philistines (B.C. 1252), provoked by the seizure of Dôr as a dyeing station. For an account of the colonial expansion of the Phœnicians see art. PHŒNICIA.

ii. POLITICAL HISTORY.—The public fortunes of Ẓidon were closely connected with those of Arvad and Tyre. These and the other Phœnician cities, although constantly attacked by one or other of their powerful military neighbours, seldom united under any leadership for the welfare of all. The town of Tripoli is said to have been occupied by residents originally belonging to three separate Phœnician towns, and to have been named from their three permanently separate quarters. They sometimes, however, combined against one of their own cities, as when Alexander sailed down upon devoted Tyre with a fleet of over 200 vessels, chiefly Phœnician, collected from the ports of Ẓidon, Cyprus, and Rhodes. One reason for such independence was that each town was nominally under the protection of its own deity, who, as his name, Ba'al-Ẓidon, 'Lord of Ẓidon,' or Melḳarth, 'King of the city,' implied, was expected to defend its rights and promote its fortunes. In the case of Tyre and Ẓidon, commercial jealousy also had an important influence.

(1) *Ẓidon under Assyria.*—Ẓidon came into relationship with Assyria by acknowledging the suzerainty of Ashur-bani-pal in B.C. 877. This position of nominal dependence, with permission to trade with Assyria, soon changed into a more exacting tributary relationship under Shalmaneser II. and Tiglath-pileser, and led to open rebellion in the reign of Shalmaneser IV. (B.C. 727), and to the complete subjugation of the country by Sennacherib in B.C. 701. About B.C. 676 Esarhaddon conquered Ẓidon, and, after beheading its king, 'Abd-Melḳarth, demolishing the citadel and palace, and killing most of the inhabitants, transported the remainder of the population to Assyria, and called the town 'Ir-Esarhaddon ('city of Esarhaddon').

(2) *Ẓidon under Babylon.*—The authority of

Assyria came to an end with the Scythian invasion (B.C. 630–610) and the attack of the Medes in the year 606. The interval of respite gave the Phœnicians an opportunity of consulting for their own better protection against Babylon and Egypt, and at this time Ẓidon and the other cities agreed to follow the leadership of Tyre (Ezk 27^{8}). The alliance seems to have extended beyond the coast towns to Edom, Moab, and Ammon; and Jeremiah was instructed to give the LORD'S message to the deputation sent to Jerusalem (Jer 27^{3}). When Pharaoh-neco marched out of Egypt to invade Mesopotamia in B.C. 608, king Josiah of Jerusalem, in fidelity to the cause of Babylon, endeavoured to arrest him, and lost his life in doing so. Soon after, when in 605, at the great battle of Carchemish, Nebuchadnezzar defeated Neco, Phœnicia was overrun and laid waste by the savage soldiery of Babylon. So cruel was their treatment of the conquered cities that the yoke of Egypt seemed light in comparison, and in 598 they all rebelled, including Judæa. Another invasion followed, with its attendant sufferings. Judæa hastened to submit (2 K 24$^{1.12}$, 2 Ch 36^{6}), but Tyre justified the hegemony committed to her by enduring a long siege, submitting to Nebuchadnezzar in 585. By this humbling of Tyre (Ezk 28), Ẓidon was brought once more to the front, and maintained her position as chief of the cities till the overthrow of the Bab. kingdom by the Persians under Cyrus in 538.

(3) *Ẓidon under Persia, Greece, and Rome.*—A period of rest was enjoyed during the reign of Cyrus (B.C. 540–529). Afterwards the Phœnician cities were required to pay a light annual tax, and on demand to supply transport ships and war vessels to the king of Persia. They were allowed to have their own kings and administration, and their condition was much better than it had been under the Assyrians and Babylonians. In B.C. 351, as the power of Persia began to wane, Ẓidon took the lead in organizing a Phœnician revolt against Artaxerxes Ochus, king of Persia. In the punitive invasion that followed, Ẓidon was captured and reduced to ashes, as many as 40,000 perishing in the flames (Diod. Siculus, xvi. 40–44).

After the battle of Issus (B.C. 333), Ẓidon, with the other cities of Phœnicia, except Tyre, surrendered to Alexander, and Ẓidon contributed a large contingent of vessels to assist Alexander in his attack on the insular fortress. During the confusion that followed the death of Alexander, Ẓidon was at different times under Egyptian and Seleucid rule until, in A.D. 198, it passed to the latter, and became rapidly Hellenized. A school of Philosophy sprang up at Ẓidon, to which was added the school of Law and Jurisprudence transferred from Berytus after the earthquake there in A.D. 551. Under the Romans Ẓidon enjoyed, along with Tyre, the rights of a free city, having its own magistrates and municipal government. During the 12th and 13th cents. it was frequently taken and retaken by the Crusaders and the Saracens.

The modern Arabic town of 10,000 inhabitants lies along the shore of the N. harbour, with its ancient wall, crowded houses, narrow streets, and shaded bazaars. The gardens adjoining the town are irrigated from the river Awâly (Bostrenus), which enters the sea two miles N. of Ẓidon. These gardens are covered with fruit-trees, chiefly orange, and in early spring, when the dark foliage is variegated with fragrant blossom and golden fruit, and the banks of the water channels are beautiful with violets, Ẓidon may still claim the epithet of the Greek poet Dionysius, who called her *ἀνθεμόεσσα*, 'the flowery city.' In these gardens pillars and blocks of carved stone and ancient coins are continually being found. In 1855 the tomb of king Eshmunazar, probably of the 3rd cent. B.C., was discovered. A few years ago a much larger and more important discovery was made of a subterranean burial chamber, with side-rooms containing ornamental sarcophagi, one of which was at first pronounced that of Alexander the Great.

iii. BIBLE ALLUSIONS.—Except during the time of friendly contact produced by the building of the temple (1 Ch 22^{4}), and its restoration in the time of Ezra (Ezr 3^{7}), the general tone of reference to Ẓidon is that of hostility. 'Great Ẓidon' was on the border of the portion assigned to Asher (Jos 19^{28}), but the Ẓidonians remained unconquered, and proved a source of danger and temptation to Israel (Jos 13^{6}, Jg 1^{31} 3^{3} 10^{6}). They are mentioned with Amalek and Midian as having aggressively oppressed Israel (Jg 10^{12}, where perhaps Phœnicians in general are meant). The marriage of Ahab with the Ẓidonian Jezebel is denounced as a sin surpassing that of Jeroboam (1 K 16^{31}). The Ẓidonians are held up to abhorrence as having sought to make merchandise of captured Israelites, and of using the sacred vessels of the Lord at their heathen shrines (Jl 3^{5}). Ẓidon, with the other world powers, is to drink the cup of the Lord's fury (Jer 25^{22}), and it is seen lying cast away and forgotten along with its companions in oppression, Asshur, Elam, and Egypt (Ezk 32^{30}). Ẓidonians were among the multitudes who went forth to hear Christ (Mk 3^{8}), and the sin of Tyre and Ẓidon is made to compare favourably with that of the impervious cities of Galilee (Mt 11$^{21.22}$, Lk 10$^{13.14}$). The Syro-Phœnician woman whose daughter was healed came from the coasts of Tyre and Ẓidon (Mt 15$^{21-28}$, Mk 7$^{24-30}$), and Jesus, after this miracle, passed through Ẓidon (Mk 7^{31}). Ẓidon again appears with Tyre in the conciliatory interview with Herod in A.D. 44 (Ac 12^{20}), and, finally, was visited by St. Paul on his voyage to Rome (Ac 27^{3}).

Ẓidonians (צִידוֹנִים, or, more commonly, צִידֹנִים; *Σιδώνιοι, Φοίνικες*).—From originally meaning the inhabitants of the city of Ẓidon (1 K 11$^{5.33}$, 2 K 23^{13}) the name came to be applied generally to all the cities of the same race, being thus = Phœnician.

LITERATURE.—Kenrick, *Phœnicia*; Rawlinson, *Hist. of Phœnicia*; Thomson, *Land and the Book*.

G. M. MACKIE.

ZIHA (צִיחָא, in Neh 7^{46} צִחָא).—The name of a family of Nethinim, Ezr 2^{43} (B *Σουθιά*, A *Σουαά*, Luc. *Σουδδαεί*) = Neh 7^{46} (Bℵ *Σηά*, A$^{\text{vid}}$ *Οἰαά*, Luc. *Σουλαί*), Neh 11^{21} (Bℵ*A om., ℵ$^{\text{c. a mg inf}}$ *Σιάλ*).

ZIKLAG (צִקְלַג, in 1 Ch 12$^{1.20}$ צִיקְלַג; B *Σεκελάκ* except Jos 19^{5} 1 S 27$^{6\ bis}$ *Σικελάκ*, 1 Ch 4^{30} *Ὠκλά*, 12^{1} *Σωκλά*, v.^{20} *Σωγλάμ*; A *Σικελάγ* except Jos 19^{5} *Σεκελά*).—A Judahite (Jos 15^{31}) or Simeonite (19^{5}, 1 Ch 4^{30}) town, which, in the time of Saul, was in Philistine hands and was assigned to David as his headquarters by ACHISH (1 S 27^{6}, 2 S 1^{1} 4^{10}, 1 Ch 12$^{1.20}$). It was plundered by the Amalekites during the absence of David, who, however, overtook and defeated the marauders (1 S 30$^{1-26}$); see art. DAVID, vol. i. p. 560. It is mentioned as inhabited by Judahites after the Captivity, Neh 11^{28}.

The site of Ẓiklag has not been identified with certainty. The most probable of the sites proposed appears to be the ruin *Zuheilîka*, discovered by Conder and Kitchener in 1877, lying E.S.E. from Gaza. This ruin occupies three low hills, and is at a distance of about 4 miles N. of *Wādy es-Sherî'a* (prob. the Besor of 1 S 30$^{9.10.21}$). This identification is favoured by Mühlau (in Riehm's *HWB*^{2} 1866^{b}), Buhl (*GAP* 185), Dillm. (*Jos.* 527, where other less probable suggestions are mentioned), *et al.*

J. A. SELBIE.

ZILLAH (צִלָּה, *Σελλά*).—One of LAMECH'S two wives, Gn 4$^{19.22.23}$. See ADAH, No. 1.

ZILLETHAI (צִלְּתַי).—**1.** The name of a Benjamite family, 1 Ch 8^{20} (B Σαλθεί, A Σαλεί, Luc. Σελαθί). **2.** A Manassite who joined David at Ẓiḳlag, 1 Ch 12^{20} (Bℵ Σεμαθεί, A Γαλαθί, Luc. Σιλαθά).

ZILPAH (זִלְפָּה).—A slave-girl given to Leah by Laban, Gn 29^{24} (P), and by her to Jacob as a concubine, 30^{9} (J); the mother of Gad and Asher, vv.$^{10-13}$ (J), 35^{26} 37^{2} 46^{18} (all P). The LXX (A) has *Ζελφά* throughout.

ZIMMAH (זִמָּה).—The name of a family of Gershonite Levites, 1 Ch $6^{20\,(5)}$ (B and Luc. *Ζεμμά*, A *Ζαμμά*) v.$^{42\,(27)}$ (B *Ζαμμάμ*, A *Ζαμμά*, Luc. *Ζεμμά*), 2 Ch 29^{12} (BA *Ζεμμάθ*, Luc. *Ζεμμά*).

ZIMRAN (זִמְרָן).—A son of Abraham and Ḳeṭurah, Gn 25^{2} (A*E *Ζεβράν*, A^{a} *Ζεμβράν*, D^{sil} *Ζομβράν*) =1 Ch 1^{32} (B *Ζεμβράν*, A *Ζεμράν*). The ethnological signification of the word is doubtful. Possibly Knobel is right in connecting it with the *Ζαβράμ* of Ptolemy (VI. vii. 5), W. of Mecca, on the Red Sea. We may perhaps compare also the ZIMRI of Jer 25^{25}. The name is derived from זֶמֶר, 'mountain-sheep *or* -goat,' this animal having doubtless been the totem of the clan.

ZIMRI (זִמְרִי 'mountain-sheep' [see Gray, *HPN* p. 97, note 2]; Bℵ *Ζαμβρεί*, AF *Ζαμβρί*; in 1 Ch 8^{36} A *Ζαμρί*; Vulg. *Zambri*, but in Chron. *Zamri*).—**1.** A prince of the tribe of Simeon, son of Salu (Nu 25^{6-14} [P], 1 Mac 2^{26}). While the congregation of Israel in general were expressing repentance for having joined in the impure worship of Baal-peor, Zimri shamelessly and ostentatiously continued in it. This outrage fired the zeal of Phinehas, who followed him and his partner into the alcove (קֻבָּה) and slew them both. **2.** Son of Zerah, and grandfather or ancestor of Achan (1 Ch 2^{6}, which also represents him as brother of the four sages who are mentioned in 1 K 4^{31}). He is called **Zabdi** in Jos 7^{1}. **3.** A Benjamite, lineal descendant of Saul (1 Ch 8^{36} 9^{42}). **4.** King of Israel (1 K 16^{9-20}). He had been captain of half the chariots under Elah, and made use of his position to conspire against his master, whom he assassinated while the latter was drunk. Even amongst the series of deeds of violence that ushered in the constant changes of dynasty in the Northern Kingdom this act of Zimri seemed peculiarly atrocious. 'Is it peace, thou Zimri, thy master's murderer?' was the bitter taunt flung down by Jezebel at Jehu as he entered the gate of Jezreel (2 K 9^{31}). And in the formula which closes the narrative of the reign the historian specially notes 'the treason that he wrought' (v.^{20}). Zimri's *coup d'état* apparently had no general support, the people following either Omri or Tibni, and his brief reign of seven days only enabled him to accomplish the extirpation of the family of Baasha, which had been predicted by Jehu the son of Hanani (v.^{3}). The distance between Gibbethon and Tirzah leads us to infer that Omri must have marched at once on the capital, and that he met with scarcely any resistance. Zimri perished in the ashes of the royal palace to which he had himself set fire. **5.** 'All the kings of Zimri' are mentioned in the same verse, Jer 25^{25} (Gr. 32^{11}) with those of Elam and the Medes as amongst those who were to drink the cup of the fury of the LORD. There is considerable doubt as to what place is meant, or even as to the genuineness of the phrase. It is omitted in LXX (BℵA), but Aquila seems to have read it. Delitzsch thinks that a place called Namri in the inscriptions of Shalmaneser II., and situated in northwest Babylonia, is referred to; but Schrader (*COT* ii. 107) discredits this opinion, without suggesting any rival theory.
N. J. D. WHITE.

ZIN (צִן; *Σείν*, *Σίν*; *Sin*), Nu 13^{21} 20^{1} 27^{14} 33^{36} $34^{3.\,4}$, Dt 32^{51}, Jos $15^{1.\,3}$.—A region passed through by the Israelites in their journeyings. The most exact indication of its position is given in Nu 34 and Jos 15. These passages (in which the boundary of Judah is traced in almost identical terms) refer to 'the wilderness of Zin' in v.^{1} of both, and further describe the boundary thus: '. . . and pass on to Zin' (Nu v.^{4} . . . '[. . . and passed along to Zin (Jos v.^{3}) . . .] . . . to Kadesh-barnea'). The Hebrew is identical in both passages וְעָבַר צִנָּה, but the *nun* is without *dagesh* in Numbers.

These are the only places where the word Zin occurs by itself, and it seems to denote a place or limited area from which the region round about was named 'the wilderness* of Zin,' the expression which occurs in all the remaining passages cited above.

In Nu 13^{21} 'the wilderness of Zin' is named as the southern limit from which the spies began to search the land. In Nu 33^{36} it is given as one of the stations in the journeyings. The brief note, 'the same is Kadesh,' serves to explain the following verse ('And they journeyed from Kadesh' . . .). Nu 20^{1} records the arrival of the children of Israel 'in the wilderness of Zin' in the first month [the year is not stated], and the following vv.$^{2-13}$ relate the events which took place at Meribah. The remaining two passages, Nu 27 and Dt 32, which are duplicates, refer to the punishment of Moses for his offence at 'the waters of Meribah of Kadesh in the wilderness of Zin.'

Hence it may be inferred (*a*) that the Wilderness of Ẓin formed part of the southern boundary of Judah at its eastern end towards the Dead Sea; (*b*) that Ḳadesh was included within its limits. A reference to art. PARAN leads to the further conclusion that the wilderness of Paran must have been adjacent to that of Ẓin, so that Ḳadesh was regarded as in either territory.

The LXX and Vulg. render both Ṣin and Ẓin by Σίν, Σείν, *Sin*; but in Nu 34^{4}, Jos 15^{3} the LXX B renders צנה by Ἔννακ; AF Σεέννακ in Numbers, A Σεννά in Joshua. Vulg. has *Senna* in Numbers, *Sina* in Joshua. The close similarity between the events recorded in Ex 17 and Nu 20 (noticed in art. MERIBAH), and other points of resemblance between occurrences before and after Sinai, suggest a further question whether Ṣin and Ẓin, the Ṣin of the pre-Sinai and the Ẓin of the post-Sinai narrative, may be variations developed in the course of tradition. Both names are found only in the Hexateuch, and there is no geographical indication of later times to guide us. The hypothesis does not appear improbable, but the narrative in its present form indicates two regions bearing different names. On the supposition of a Sinai to the E. of the Arabah, these two 'wildernesses' would be much closer together than on the traditional hypothesis.
A. T. CHAPMAN.

ZINA.—See ZIZA.

ZION (צִיּוֹן; B Σειών, but Σιών in Am 1^{2} and in 28 places in the Psalms; A Σιών, but in Is 1^{8} 2^{3}, Jer 26^{18}, La 2^{4}, Jl $2^{1.\,15}$, and in 6 places in the Psalms Σειών, and in Ca 3^{11}, Is 31^{9}, Jer 8^{19} Σιώ; in Ca 3^{11} B omits. In Apoc. and NT Σιών, *Sion*, where the AV, following the Greek, has *Sion*, the RV *Zion*).—The stronghold (מְצֻדָה) of Ẓion was the castle, or acropolis, of the 'city of the Jebusites' (Jg 19^{11}); see art. JEBUS. Its position must have been one of great natural strength, for it was regarded by its garrison and its inhabitants as impregnable, and when David laid siege to it he was received with taunts and jeers (2 S $5^{6.\,8}$, 1 Ch 11^{5}; cf. Jos. *Ant.* VII. iii. 1). 'Nevertheless, David took the stronghold of Zion, the same is the city of David . . . and David dwelt in the stronghold and called it the city of David. And he built round about from Millo and inward' (2 S 5^{7-9}, 1 Ch 11^{5-8}). In two other passages (1 K 8^{1}, 2 Ch 5^{2}) Ẓion is directly identified with the city of David by the expression 'the city of David which is Zion.' Within the city walls David built a palace (2 S 5^{11}, Neh 12^{37}), round which were gathered the houses of his warriors (2 S 11^{2}); and pitched a tent for the ark of Jahweh (2 S 6^{12-17}, 1 Ch 15^{29} 16^{1}). Before his death, David purchased the threshing-floor of Araunah the Jebusite, upon which was erected, afterwards, the altar of the temple (2 S $24^{18.\,25}$, 1 Ch $21^{18.\,26}$); and when he died he was buried in the city of David (1 K 2^{10}, Neh 3^{16}).

---

* For the meaning of 'wilderness' see art. JESHIMON.

The exact position of the stronghold within the later Jerusalem is one of the most important of the disputed points connected with the topography of the Holy City. In the article JERUSALEM it is shown that the ancient city stood on two spurs, or hills, separated from each other by a deep ravine. The western and higher spur is identified by Christian tradition with Ẓion; on the eastern and lower the temple was built. The western spur is broad-backed, and, so far as its original form is known, there is no broken ground or conspicuous feature upon it that would naturally be selected as the site of a castle such as those usually erected for the protection of an ancient hill-town. Moreover, there is no spring; and when, at a later date, the spur was covered with houses, this deficiency had to be met by the construction of reservoirs and aqueducts. The earliest settlement at Jerusalem cannot therefore be placed on the western spur. The eastern spur, on the other hand, is, for the most part, a narrow ridge of rock, upon which there are good natural positions for the construction of a hill-fort or castle. One such position is that which was occupied by the Macedonian Akra and the Herodian Antonia; another is the point, south of the present Ḥaram esh-Sherif, at which the Tyropœon ravine most closely approaches the valley of the Kidron. In that valley, at the foot of the eastern slope of the spur, rises the only true spring at or near Jerusalem—GIHON, now the Fountain of the Virgin.

The evolution of Jerusalem cannot have differed greatly from that of other ancient cities. The earliest settlement would naturally have been on the eastern spur, and it probably consisted of a village on the slopes above the spring, with a small fort on higher ground to which the people could fly on the approach of an enemy.

By about B.C. 1400 Jerusalem had become, according to the Tel el-Amarna letters, the fortified capital of a small district; and such it appears to have been when the Hebrews entered Palestine. The natural disadvantages of its position for trade, and the scarcity of fertile land in its vicinity, were against rapid growth; and there is no reason to suppose that, when taken by David, it was larger than other hill-towns in Palestine, or that it had spread beyond the limits of the eastern spur. The topographical argument in favour of placing the stronghold of Ẓion on this spur rather than on the western, is supported by the historical notices.

The temple area, which is now enclosed by the walls of the Ḥaram esh-Sherif, was *above* the city of David, and was not regarded as forming part of it (1 K $8^{1.\,4}$,[*] 2 Ch $5^{2.\,5}$; cf. 2 S 24^{18}). And the statements of Nehemiah ($3^{15.\,16}$ 12^{37}, cf. 2^{14}), which place the stairs of the city of David, the palace of David, and his tomb between the pool of Shelah (SILOAM) and the temple, absolutely exclude the western spur as a possible site for the city of David. With this, too, agree the identification by Micah (4^{8}) of the 'tower of the flock' with 'the Ophel of the daughter of Zion'; the references in Ezekiel ($43^{7.\,8}$) to the proximity of the royal palace and sepulchres to the temple; and the apparent connexion of Ẓion and the temple in Ps $78^{68.\,69}$ and Jer 50^{28}. Perhaps also there may be an allusion to the relative positions of Ẓion and the temple in Ps 48^{2} 'Mount Ẓion, *on* the sides of the north, the city of the great King.' Throughout the OT there are passages which have no meaning, if Ẓion and the temple hill were two separate topographical features. Ẓion is the holy hill or mountain (Ps 2^{6}, Jl 2^{1}), the chosen habitation of Jahweh (Ps 9^{11} 74^{2} 76^{2} 84^{7} 132^{13}, Is 8^{18} 60^{14}, Jer 8^{19}, Jl $3^{17.\,21}$, Zec 8^{3}). There He manifests Himself (Ps 14^{7} 20^{2} 53^{6} 128^{5} 134^{3}, Am 1^{2}); and there He must be worshipped and praised (Ps $65^{1.\,2}$, Jer 31^{6}, Jl $2^{1.\,15}$). Hence Mount Ẓion, the intangible mount, the city of the living God, is employed in the NT as the type of heaven (He $12^{18.\,22}$, Rev 14^{1}). At the same time the name Ẓion is given, in some instances, to the whole city (Ps 126^{1} 146^{10}, Is 1^{27} 10^{24}, La 1^{4}; cf. the common expression 'daughters of Zion'); and in others it is mentioned as if it were a separate quarter of Jerusalem (2 K 19^{31}, Ps 51^{18}, Is 30^{19} 64^{10}, Jer 26^{18}, Jl 3^{16}, Am 1^{2}, Mic 3^{12}, Zec 1^{17}; cf. the distinction between Jerusalem and the quarter in which the kings were buried in 2 Ch 28^{27}).

In 1 Maccabees, written *c.* B.C. 100 by some one who was well acquainted with the localities, Ẓion is identified with the temple hill ($4^{37.\,38}$ 5^{54} 7^{33} etc.), and so it is in 1 Es 8^{81}, 2 Es 5^{25}, Sir 24^{10}, and Jth 9^{13}. Josephus, who does not mention Ẓion, says (*Ant.* VII. iii. 1) that David took the lower city and the Akra (both of which he elsewhere places on the eastern spur), and (iii. 2) that, after driving the Jebusites out of the Akra, David rebuilt Jerusalem, called it the city of David, and dwelt in it.[*] The Rabbis,[†] without exception, place the temple on Ẓion, and Origen distinctly states (*in Joan.* $4^{19.\,20}$) that the Jews did so in his day. Eusebius (*in Is.* 22^{1}) and Jerome apparently (*in Is.* 1^{21} 22^{1}) take the same view; but elsewhere they identify Ẓion with the western spur, and in this agree with the Bordeaux Pilgrim (*Itin. Hieros.*). From the 4th cent. onwards Ẓion is always identified with the south part of the western spur. This identification first appears after the official recovery of Golgotha, and it possibly owes its origin to the feeling that, without a Ẓion, the 'New Jerusalem' of Constantine would be incomplete and inferior in sanctity to the 'Old Jerusalem' with its temple on the lower ground to the east.

The identification of Ẓion with the eastern spur satisfies the topographical conditions and the historical evidence until the 4th cent. A.D. But the spur is now so completely covered with deep rubbish that its original form is unknown, and the exact position of the stronghold can be determined only by extensive excavations. The fort was probably small, for its builders could have had in view only the protection of the spring and the little town on the slopes above it. Lightfoot (*Op.* i. 553, ii. 187), Fergusson (*Essay on the ancient topog. of Jerus.* p. 55 ff., 1847), and a few other writers, place Ẓion immediately north of the temple; but, if the words of 1 K $8^{1.\,4}$ (cf. 2 S $24^{18.\,19}$) are to be taken literally, it must have been to the south of the Holy Place of the Jews. In this direction, on a site so situated as to command the spring, it has been placed by Birch (*PEFSt.* 1878, pp. 129, 178), Stade (*GVI* i.

---

[*] Notice here 'bring *up*': so regularly in OT people go *up* from the palace to the temple (Jer 26^{10}), and *down* in the opposite direction (2 K 11^{19}, Jer 22^{1} 36^{12}). If, however, the palace had been on the western spur (2520-50 ft.), the temple (2440 ft.) would have been *below* it.

[*] Josephus adds (iii. 2) that David took possession of the Upper City, which he called (*BJ* v. iv. 1) the fortress (φρούριον), and joined the Akra to it. This possibly refers to the first enclosure of the western spur, which David may well have undertaken towards the close of his reign, when the development of trade had greatly enriched the kingdom.

[†] Some of the copper coins struck during the war of Vespasian and the rebellion in Hadrian's reign bear the legends *Lig'ullath Zion*, 'Deliverance of Zion,' and *Chêruth Z.*, 'Emancipation of Zion.' See art. MONEY, vol. iii. p. 431.

315 f.), Robertson Smith (art. 'Jerusalem' in *Encyc. Brit.*^{9} 1881), Sayce (*PEFSt*, 1883), von Alten (*ZDPV* ii. 18 ff., iii. 116 ff.), Klaiber (*ZDPV* iii. 189 ff., iv. 18 ff.), Guthe (*ZDPV* v. 271 ff., 1883), G. A. Smith (in *Encyc. Bibl.* 2418), and the majority of recent authorities. Guthe (*l.c.*) believed that his excavations proved the existence of a wide, deep ditch or hollow, cut through the hill, in a N.W. direction, from the Virgin's Fount to the Tyropœon Valley. But his excavations were not complete, and the view that he found the ditch of the stronghold must be accepted with reserve.

The identification of Ẓion with the *western* spur is accepted by Reland, Robinson, Ritter, Williams, de Vogüé, Stanley, Conder, and others; but, as will have been seen, it is exceedingly difficult to reconcile with the statements of the OT.

The following view may be suggested. When David took Jerusalem it was a hill-town on the south part of the eastern spur, with a small castle or acropolis, called Ẓion, situated at a convenient spot to the south of the present Ḥaram esh-Sherif. After David's capture of the city he at once commenced to rebuild and strengthen its fortifications, especially those of the stronghold and Millo.[*] Towards the end of his reign, when a period of great prosperity had set in, he commenced the enclosure of the western spur; and his work on both spurs was continued by Solomon (1 K $9^{15.\,24}$[†] 11^{27}), Ḥezekiah (2 Ch 32^5; cf. Is 22^9), and Manasseh, who 'built an outer wall to the city of David, on the west side of Gihon in the valley'[‡] (2 Ch 33^{14}). The stronghold of Ẓion became the city of David, and this name was soon extended to the town at the south end of the spur. When the town spread northward, Ẓion was connected with the central part of the spur, on which lay the royal buildings and, adjoining them on the north, at the top of the hill, the temple area; and so it became a sacred name for the spot upon which the temple, the dwelling-place of Jahweh, stood. Afterwards, the name was frequently applied by prophets and poets to the temple enclosure, to the eastern spur, and to the holy city of Jerusalem.

In the time of Hadrian there was, according to Epiphanius (*de Mens. et Pond.* xv.), a small church on the western spur, which marked the site of the house—that of the mother of Mark—at which the apostles met after the Ascension. This church, apparently the same as that called by Cyril of Jerusalem the 'Church of the Apostles,' became in later years the basilica of holy Ẓion, or the 'Mother Church' on Ẓion. This tradition now attaches to the church of the Syrian monastery, which claims to be the oldest ecclesiastical establishment at Jerusalem. There was also a Church of St. Peter, or 'House of Caiaphas,' which is mentioned in the 5th cent. as being distinct from that of Ẓion (*Brev.*; Theodosius, *De loc. sanct.*; see discussion in *Antoninus Martyr*, App. ii. P. P. Text Series, vol. ii.). C. W. WILSON.

ZIOR (צִיעֹר).—A town in the hill-country of Judah, Jos 15^{54} (B Σώρθ, A Σιώρ). It is prob. to be identified with the modern village *Sa'ir*, about 6 miles N.N.E. of Hebron. A pretended grave of Esau is shown at the place, the origin of this tradition being probably the similarity of the names *Sa'ir* and *Se'ir* (see Mühlau in Riehm's *HWB*^{2} 1871^a; Guérin, *Judée*, iii. 150 f.; *PEF Mem.* iii. 309, 379; Buhl, *GAP* 158). The Ẓior of Jos 15^{54} can have nothing to do with the Σιώρ (Sior) of Eusebius and Jerome (*OS*^{2} 293, 19, 20; 151, 1–3), which is described as between Ælia (Jerusalem) and Eleutheropolis (Beit Jibrin).

ZIPH (זִיף).—**1.** A son of Jehallelel, 1 Ch 4^{16} (B Ἀμηαχεί, A Ζιφαί, Luc. Ζίφ). **2.** A city of Southern Judah, Jos 15^{24} (B om., A Ἰθναζίφ [combining *Ziph* and the preceding *Ithnan*], Luc. Ζείφ). Its site has not been recovered. **3.** A city in the hill-country of Judah, Jos 15^{55} (B Ὀζείβ, A and Luc. Ζίφ), cf. 1 Ch 2^{42} (Ζείφ); fortified by Rehoboam, 2 Ch 11^8 (B Ζείβ, A Ζείφ, Luc. Ζίφ). The wilderness of Ziph (מִדְבַּר זִיף) was one of the refuges of David (see vol. i. p. 564^b) when fleeing from Saul, 1 S $23^{14.\,15.\,24}$ $26^{2\,bis}$. The gentilic name Ziphites (זִפִים and זִיפִים; LXX Ζ(ε)ιφαῖοι) occurs in 1 S $23^{19.\,24\,\text{[LXX only]}}$ 26^1, Ps 54 $^{\text{title}}$. Ziph is the modern *Tell Zîf*, S.E. of Hebron (Robinson, *BRP*^{2} i. 492, 498; Guérin, *Judée*, iii. 159 ff.; G. A. Smith, *HGHL* 306 n.; Buhl, *GAP* 163). Jerome (*OS*^{2} 159, 14) misstates its distance from Hebron as 8 M.P., whereas it is under 5 (Roman) miles (Robinson).

ZIPHAH (זִיפָה).—A son of Jerahmeel, 1 Ch 4^{16} (B Ζαφά, A Ζαιφά, Luc. Ζιφά).

ZIPHION.—See ZAPHON. **ZIPHRON.**—See SIBRAIM.

ZIPPOR (צִפּוֹר, twice [Nu 22^{10} 23^{18}] צִפֹּר).—Father of BALAK king of Moab, Nu $22^{2.\,4.\,10.\,16}$ 23^{18}, Jos 24^9, Jg 11^{25} (all Σεπφώρ). The name, which doubtless in this case and in that of **Ẓipporah** has a totemistie significance, means 'sparrow.'

ZIPPORAH (צִפֹּרָה; Σεπφώρα).—One of the daughters of the priest of Midian, Ex $2^{21.\,22}$ (J), wife of Moses and mother of Gershom. According to 18^2 (E) she had another son.[*] For the part played by her in connexion with the circumcision of Gershom, $4^{24\text{ff.}}$ (J), see art. CIRCUMCISION, vol. i. p. 443^a. Ẓipporah, who was a Midianitess, cannot of course be the 'Cushite woman' (see vol. iii. p. 442^b note †) of Nu 12^1. On the name *Ẓipporah* see preceding article.

ZIV.—See art. TIME, p. 765^a.

ZIZ.—The ascent (AV wrongly 'cliff') of Ẓiẓ (מַעֲלֵה הַצִּיץ; BA ἡ ἀνάβασις Ἀσαὲ, Luc. . . . Ἀσισά) is only once mentioned in the Bible (2 Ch 20^{16}), and is generally classed among unidentified sites. The context, however, leaves no doubt in the mind of the present writer as regards identification. It is the ascent to a cliff, rising above the plain of the Dead Sea near En-gedi on the edge of the tableland or wilderness of Judæa (see EN-GEDI). Conder says of this spot: 'On the south are the wolds of the Negeb plateau, with the plains of Beersheba beyond. On the east is the "Solitude," with white peaks and cones of chalk, and deep and narrow watercourses, terminated by the great pointed cliff of Ziz, above Engedi, and by the precipices over the Dead Sea, 2000 ft. high' (*Tent-Work in Palestine*, p. 244). The gorge lying at its base offers one of the few ways of ascent from the western shore of the Dead Sea to the tableland of Judæa, and, on the occasion in connexion with which Ẓiẓ is mentioned, was selected by the hosts of Ammon, Moab, and Edom for a combined attack on the kingdom of Judah in the reign of Jehoshaphat. The attack, however, in answer to prayer, proved disastrous to the invaders (cf. *HGHL* 272).

E. HULL.

ZIZA (זִיזָא).—**1.** A Simeonite chief who took part in the raid on Gedor, 1 Ch 4^{37} (B and Luc. om.,

---

[*] See art. MILLO, and cf. Stade, *GVI* i. 343.

[†] [This passage shows that the palace was higher than, and therefore to the north of, the 'city of David.'—ED.].

[‡] This wall was built apparently to give more efficient protection to the passage leading to the Virgin's Fount, which was discovered by Sir C. Warren.

[*] The 'sons' of MT in Ex 4^{20} is from the hand of a redactor. See art. MOSES, vol. iii. p. 439^a note †.

A Ζουζά). 2. A son of Rehoboam, 2 Ch 11^{20} (B Ζειζά, A Ζιζά).

ZIZAH (זִיזָה).—A Gershonite Levite, 1 Ch 23^{11}. The name, prob. by a copyist's error, appears in v.^{10} as Zina (זִינָא). LXX has in both verses Ζιζά. One Heb. MS, cited by Kennicott, also reads זִיזָה in v.^{10}.

ZOAN (צֹעַן, Τάνις, Tanis. The Coptic *Jani* resembles the Hebrew and the Arabic *Sān*, but a Christian Coptic MS, containing a list of bishops, bears witness to the Greek pronunciation with *T*. [Amelineau, *Géographie de l'Égypte*, 1893, p. 413 f.]).—A city of Egypt which the LXX by their rendering identify with the city known to the Greeks as Tanis. It is described by Greek writers as a 'great city' (Strabo, *Meineke*, c. 802; Stephanus Byzant. in his list of cities), and the branch of the Nile on which it was situated was called from it the Tanaitic mouth. The city declined in importance when the river which flowed by it ceased to be a main waterway; and the surrounding country, which in ancient times was rich pasture ground, is now salt marsh and lake. An insignificant collection of dwellings (known as Sān on the Muiz canal), chiefly inhabited by fishermen who ply their trade on the neighbouring lake Menzaleh, marks the site of this once flourishing city. But widely scattered around are ruins which bear witness to its former greatness. From very early times it was a centre of worship, and successive dynasties enriched the city with costly buildings and obelisks which (such is the opinion of those who have explored the site) equalled, perhaps in some respects surpassed, many of the temples which have been more fortunately preserved.

The references to this city in Is. and Ezk. are in accord with the testimony of the monuments and of Greek writers. Isaiah (19$^{11.\,13}$ 30^{4}) describes it as the abode of princes and counsellors, and Ezekiel (30^{14}) includes it in a list of the principal cities doomed to destruction. The note in Nu 13^{22} that 'Hebron was built seven years before Zoan in Egypt,' opens up a wide field of conjecture, but yields little by way of certain inference. Hebron was regarded as an ancient city, existing in the time of Abraham, and the note implies that Zoan also was an ancient city, built before the migration of the Hebrews into Egypt; but whether anything more (such as community of origin) is suggested by the comparison is doubtful. The question of most interest to the biblical student in connexion with Zoan is: Was this city, already flourishing when Israel came into Egypt, in any way connected with their sojourn there? It is known that in Exodus the name Zoan does not occur. Rameses is mentioned (Ex 12^{37}) as the place from which the children of Israel set out on their journeyings. But in Ps 78, which recounts the wonders which God had wrought for Israel, 'the field of Zoan' is twice mentioned (vv.$^{12.\,43}$) as the scene of the plagues. The Psalmist may have used this expression as a poetical parallelism to 'the land of Egypt,' just as Isaiah places the 'princes of Zoan' in parallelism with the 'counsellors of Pharaoh,' and the only inference to be drawn from the passage is that the Psalmist knew Zoan as a very important city. It is possible that the use of Zoan may be due to a tradition not elsewhere preserved. Ebers (*Durch Gosen zum Sinai*, p. 498) gives an inscription in which the words 'the field of Zoan' occur.

Brugsch asserts that Ramses II. transferred his court to Zoan, strengthened its fortifications and founded a new temple city; that the place was called Pi Ramessu, the city of Ramses, and that the new Pharaoh who 'knew not Joseph' *can be no other* than Ramses II. (*Egypt under the Pharaohs*, ii, 94, 96, 99). These statements if accepted go far towards locating the children of Israel at the time of their departure. But Egyptologists do not agree in interpreting the monumental evidence. In the articles PITHOM and RAMESES will be found the opinions of Naville and others who are not prepared to adopt Brugsch's identification. This at least may be said of the site now occupied by Sān. Its position on the Nile, in or near to what was the land of Goshen, its known antiquity and importance, mark it out as a residence of the Pharaohs and a probable dwelling-place of Israel in bondage.

A. T. CHAPMAN.

ZOAR (צֹעַר, צוֹעַר; LXX usually Σηγωρ, but Gn 13^{10} Ζογορα, Jer 48^{34} Ζογορ; Vulg. always *Segor*; Jos Ζοαρα and Ζοωρ).—The name of one of the 'cities of the Plain' (or Oval; Heb. *Kikkār*: see PLAIN, 4), near the Dead Sea, mentioned in Gn 13^{10} 14$^{2.\,8}$ (where its former name is said to have been *Bela'* בֶּלַע), 19^{22} (where its name is explained, by a popular etymology, as signifying 'littleness,' and it is said to have been spared, on account of its smallness, at the time when the other 'cities of the *Kikkār*' were destroyed), vv.$^{23.\,30}$, Dt 34^{3} (in Moses' view from Pisgah: 'and the *Kikkār*, the plain [*biḳ'ah*; PLAIN, 3] of Jericho, as far as Ẓo'ar'), and as a city of Moab, Is 15^{5}, Jer 48^{4} (read prob. with LXX [ἀναγγείλατε εἰς Ζογορα], Ew., Graf, *al.* 'make a cry to be heard *unto Ẓo'ar*), v.^{34}.

These are all the biblical notices of Ẓo'ar. Though no place bearing the name is at present known, it is, however, mentioned repeatedly by post-bibl. writers, down to the Middle Ages, as an important place lying at the S. end of the Dead Sea. Jos. says that it was still called Ζοωρ in his day (*Ant.* I. xi. 4), and states that the Dead Sea extended—as the context implies, from *Jericho*—for 580 stadia 'as far as Zoara [μέχρι Ζοαρων] of Arabia' (*BJ* IV. viii. 4). Euseb. (*Onom.* 261) says that the Dead Sea lay between Jericho and Zoora; and states (231, *s.v.* Βαλα) that it had a Roman garrison, and that the balsam and the palm still grew there, testifying to the ancient fertility of the locality. Ptolemy (v. 17. 5) speaks of it as belonging to Arabia Petræa; Steph. of Byz. calls it a κώμη μεγάλη ἢ φρούριον; in the ecclesiastical *Notitiæ* it is mentioned as an episcopal see in Palæstina Tertia, which was represented at the Council of Chalcedon, A.D. 451 (Reland, *Palæst.* 215, 217, 223, 226, 1065; cf. 230). Under the name Ẓughar (Zughar, Sughar, Suḳar) it is often mentioned by the mediæval Arabic geographers (see Tuch, *Genesis*^{2}, 280 f.; or, more fully, Guy le Strange, *Pal. under the Moslems*, 1890, 286–92) as situated one degree S. of Jericho (Abul-feda), at the 'end of the Dead Sea,' in a hot and unhealthy valley, but nevertheless an important commercial centre, capital of the province of esh-Sherâh or Edom (p. 39), a station on the great trade route between the Gulf of 'Aḳabah and Jericho, two days' journey from the latter place, and famous for its dates and indigo (cf. *HGHL* 506 f.).* From its proximity to Ẓo'ar, the Dead Sea is often called by these writers the 'Lake of Zughar.' The Crusaders also mention 'Segor' (cf. the Vulg. above) as pleasantly situated, with many palm trees, so that it was even called by them 'Villa Palmarum' and 'Palmer' (cf. Knob. on Gn 19$^{20-22}$ [fuller than Dillm.]; Rob. *BRP* ii. 517–9).

As regards the *precise* position of Ẓo'ar, it was argued by Robinson (*l.c.*) that the notices of Jos. and Eus., though they implied that Ẓo'ar was *near* the S. end of the Dead Sea, did not necessarily fix it *at* that end; and that as Jerome (on Is 15^{5}) says that Luḥith was between Areopolis and Ẓoʿar, the most natural site for it would be (see the maps) at *el-Mezraʿa*, in the midst of a verdant stretch of woodland and pasture-ground behind the barren promontory el-Lisān, just where the Wādy Kerak, flowing down from above the old citadel of Kerak, fertilizes the soil on the E. side of the Dead Sea.* The same site was adopted by Tuch (*l.c.* 281 f.). Wetzstein, however, in an important Excursus on Ẓoʿar at the end of Delitzsch's *Genesis*^{4} (1872), p. 564 ff., pointed out that it was not consistent with the *data*: the mediæval Ẓoʿar was one of the six stations on the usual caravan-route from Aila (Elath) by Hebron to Jerus.: it was two days' journey from Aila to Ghamr el-ʿArabah, two more to Ẓoʿar, and two more to Hebron: el-Mezraʿa, as a glance at the map will at once show, is entirely out of the line of this route (for Tuch was in error in supposing that it passed along the *E.* side of the Dead Sea and crossed the Jordan by Jericho: no road is possible along the E. side of the Sea); nor would the steep and narrow W. Kerak be, as Tuch supposed, a practicable route for Baldwin's army to take when marching to the relief of Kerak, for a handful of men could have effectually barred its progress (cf. Tristram, *Moab*, 65, 67–9, esp. 68). Fulcherius, moreover, accompanied Baldwin on an expedition from Jerus. to Petra, passing Hebron and Ẓoʿar on the way; but again, if Ẓoʿar was at el-Mezraʿa, it would have taken them strangely out of their course. Accordingly Wetzstein supposes with great plausibility that Ẓoʿar lay near the S.E. corner of the Dead Sea, in the verdant and tropically-wooded oasis, some 6 miles long by 1–3 broad (see Tristram's Map, and pp. 329 f., 333 f., *Moab*, 46 f., 50–52; Rob. ii. 113; Grove in Smith, *DB* iii. 1182, § 26; Gautier, *Autour de la Mer Morte*, 1901, p. 52 f.), fertilized by the waters of the Wādy el-Aḥsâ ('the W. of the sand-wells'), flowing down from the S.E., and called now, from the high and smooth sandstone-range rising up behind it, the *Ghôr eṣ-Ṣāfiyeh* ('the Hollow of the Smooth (cliff)'). And an Arabic authority (Dimashki, *c.* 1300), *ap.* le Strange (p. 292), expressly places Zughar here. In the curious mosaic map of Pal., also, discovered in 1896 in a basilica at Mêdebah in Moab, and belonging probably to the 5th or 6th cent. A.D., ΒΑΛΑΚ [LXX for *Belaʿ*] Η ΚΑΙ ΖΟΟΡΑ, with a palm-tree beside it, is placed clearly at the S.E. corner of the Dead Sea.†

---

* Le Strange shows very clearly that Merrill (*East of Jord.* 233) is in error in saying that the Arab. geographers place Zughar at the *N.* end of the Sea.

On the *South* of the Dead Sea the character of the soil is very different: there is here a large saline morass, *es-Sebkha* (above, p. 512^a note*), some 6 miles broad and 10 long, bounded on the N. half of its W. side by the cliffs of rock-salt called *Jebel Usdum* (vol. i. p. 575^b, iii. 152), consisting of fine mud brought down by the wādys on the S.W. and S. and mingled with drainings of the Jebel Usdum: this is entirely destitute of vegetation, and only passable with danger and difficulty (see descriptions in Rob. ii. 112; Tristram, *Land of Isr.* 326–9; Gautier, *op. cit.* 48–52). The Wādy Ghurundel divides the Sebkha from the Ghôr eṣ-Ṣāfiyeh.

At present there is nothing in the Ghôr eṣ-Ṣāfiyeh but a wretched village of reed huts, enclosed by a reed stockade, with camps round about, inhabited by Bedawis (Tristram, 330; Gautier, 53 f., with views, 48, 56); and Wetzstein (p. 568 f.) thinks that, from the climate, there could never have been a much more substantial place here; but he points to a castle which may well have been the site of the φρούριον mentioned in ancient times; and perhaps the ancient Ẓoʿar stood in a higher and more healthy situation than the actual floor of the Ghôr (cf. the two ruins to the S.E. a little way up the W. el-Aḥsâ [Tristram, *Moab*, 46–49]).

The usually accepted site of both Ẓoʿar and of the other 'cities of the *Kikkār*' has been at the S. end of the Dead Sea; but it was argued by Mr. (afterwards Sir G.) Grove in Smith's *DB*, *s.v.* 'Zoar,' that they were at the *North* end of the Sea; and this view has been followed since by Tristram (*L. of Isr.* 354 ff.), Conder (*Tent-Work*, 154, 207 f., 210), and other English writers (cf. above, arts. GOMORRAH and SODOM). The principal grounds upon which it is supported are (1) that in Gn 13^{10} Lot is said to have seen from near Bethel (v.^{3}) 'all the *Kikkār* of Jordan,' and afterwards to have dwelt in the 'cities of the *Kikkār*,' whereas the S. end of the Dead Sea is not visible from near Bethel, and a plain situated there would not naturally be called the 'Plain of Jordan'; (2) that the S. end of the Dead Sea is not visible from Nebo, as it is implied in Dt 34^3 (quoted above) that Ẓoʿar was; (3) that Gn 14^7, which states that Chedorlaʿomer, coming up from the S., after smiting the Amalekites in Ḥazăẓon-tamar (=En-gedi, 2 Ch 20^2), proceeded to the Vale of Siddim, implies that this vale, and consequently the cities of the *Kikkār* (which were near it), were at the N. end of the Sea. It is true, the language of Gn $13^{10.\,11a.\,12b}$ does not seem to suggest that the narrator (J) pictured the part of the *Kikkār*, to which Lot would naturally descend from Bethel, as separated from Sodom by the Dead Sea, with practically no passage along either shore: on the other hand, this conclusion is not *necessary*; the narrative may well be condensed, and Lot may not then and there have directly 'moved his tent as far as Sodom.' The evidence that the *post*-bibl. Ẓoʿar was at the S. end of the Dead Sea clearly cannot be resisted: and in the case of what must anciently have been a well-known place, it seems scarcely likely that the Ẓoʿar of Josephus was on a different site from the biblical Ẓoʿar. Further, as regards (1), *Kikkār* does not mean 'Plain,' but 'Round,' and it may thus have been applied to the entire basin in which both the lower Jordan and the Dead Sea lay, the '*Kikkār* of the Jordan' (Gn $13^{10.\,11}$, 1 K 7^{46}) being in particular the part of it including the lower course of the Jordan: in Gn 13^{10}, also, it is not said that Lot saw the exact part of the *Kikkār* in which the cities were (for 'all' must be an exaggeration, even if the cities were at the N. end of the Dead Sea, since only a part of the plain there is discernible from near Bethel); (2) the view described in Dt $34^{1\text{-}3}$ includes many points (as Dan) not actually visible from Nebo (Thomson, *L. and B.* iii. 653), and v.^{3} implies naturally that Ẓoʿar was at some distance off, not a place at the foot of Nebo (*Tell Shaghûr*, Conder, *Heth and Moab*^{3}, p. 154 f., 6 m. N.E. of the Dead Sea, in spite of the facts that Shaghûr does not correspond phonetically to Ẓoʿar, and that Tell Shaghûr is not distinguishable from Rās Ṣiāghāh, *ib.* p. 137); (3) the route from En-gedi to the N. end of the Dead Sea, whether inland (across a succession of steep wādis: Rob. i. 526–32) or along the coast (by wading or clambering round promontories: Rob. i. 506 *n.*; Tristram, *Land of Isr.* 252, 274, 278, 284 f.), is much more impracticable for an army than that to its S. end: according to others also, Hazazon-tamar is not En-ged at all, but the Tamar of Ezk 47^{19} 48^{29}, a village on the road between Elath and Hebron (*Onom.* 210), perhaps (Rob. ii. 202) *Kurnub*, 22 m. S.W. of the S. end of the Dead Sea.

And, in fact, there are biblical *data* which, when considered carefully, appear to support the S. site. To say nothing of Dt 34^3, just referred to, it is observable that Ẓoʿar is always spoken of as a *Moabite* town, and never claimed as an Israelite or (Jos $13^{15\text{-}21}$) Reubenite town, as it naturally would be if it lay at the N. end of the Sea; Ezk. also (16^{46}) describes Sodom as being on the 'right' (*i.e.* the south) of Jerus. (Samaria being on its 'left,' or north), which shows that he did not picture it at the N. end of the sea (which is due E. of Jerusalem). The S. site is accepted by the great majority of recent authorities, as Knob., Del., Keil, Dillm. (on Gn 19^{20}), Riehm, *HWB*; Socin, *ZDPV*, 1880, p. 81; Buhl, *Geogr.* 271 f., 274; G. A. Smith, *Expos.*, Dec. 1896, p. 413, *HGHL* 678 (cf. 505–8); Clermont-Ganneau, *PEFSt*, 1886, p. 20; Blanckenhorn, *ZDPV*, 1896, p. 54f. (who gives further particulars).

On the singular argument by which Hommel (*AHT* 195–8) seeks to show that Belaʿ (Gn $14^{2.\,8}$) is mentioned in Assyr. under the name *Malkâ*, *Malgu*, etc., see Johns (in the *Expositor*, Aug. 1898, pp. 158–60), who shows that it rests upon a series of misreadings and misunderstandings.

The site of Ẓoʿar carries with it the site of the other 'cities of the *Kikkār*,' which (Gn 19) may have formed a group by themselves, but cannot have been at any great distance from Ẓoʿar. Provided, therefore, it may be assumed (see SIDDIM, VALE OF) that in Abraham's time what is now the shallow S. part of the Dead Sea was the 'Vale of Siddim,' and the morass es-Sebkha a fertile plain (like the present Ghôr eṣ-Ṣāfiyeh), it may reasonably be supposed that the other four cities were situated on this plain; an earthquake, however, took place, producing on the one hand an eruption of petroleum, which, igniting, destroyed the four cities (Tristram, *L. of Isr.* 353 f.; Dawson, *Egypt and Syria*, p. 125 ff.), and on the other hand a subsidence of the soil, which caused the 'Vale of Siddim' to be covered by the waters of the Dead Sea, and the plain on which the four cities were situated to become the saline morass, now called es-Sebkha (cf. the descriptions of the site of the overthrown cities, Dt 29^{23}, Zeph 2^{9}; Is 13^{20}, Jer 49^{18} $=50^{40}$).

---

* Tristram, *Moab*, 60, 64. The map at the end of Tristram's *Land of Israel* shows very distinctly the different fertile spots on the shores of the Dead Sea. The elevations will be best learned from G. A. Smith's large *Topogr. and Phys. Map of Pal.*

S. R. DRIVER.

ZOBAH (צוֹבָא or צוֹבָה; Σουβά [A in 2 S 8^{12} and ℵ in 1 Ch 19^{6} Σωβά).—One of the numerous kingdoms into which the Aramæans on the north and north-east of Palestine were divided. Apart from the short notice of the wars of Saul (1 S 14^{47}), which is probably the work of a later editor (see SAMUEL, I. AND II.), the first mention of Zobah or **Aram-zobah** occurs in the reign of David in connexion with his war against Hanun, king of the Ammonites (2 S $8^{3f.}$ $10^{1ff.}$). In the fuller and more accurate account of this campaign, given in 2 S $10^{1f.}$, it is stated that the Ammonites hired the Syrians (or Aramæans) of BETH-REHOB and of Zobah, together with Ish-tob, king of Maacah,[*] to assist them in repelling the expected invasion of the Israelites. Despite this important reinforcement, the Ammonites failed to withstand the Israelites under Joab and Abishai, and both they and their allies were forced to take refuge in flight. The Aramæans, however, seem to have realized that a wider issue than that of the temporary support of Ammon was involved in their struggle with the newly developed kingdom of Israel; for, owing to the enforced inactivity of the two great empires of Egypt and Assyria, it was obvious that the supremacy (for the time being) over northern Palestine would rest with the stronger of the two rival dynasties of Aram and Israel. Hence we find Hadadezer, king of Zobah, making further and more strenuous efforts to overwhelm the Israelite kingdom. To this end he assembled all the forces at his command, and with the aid of the powerful kingdom of Damascus (following 2 S 8^{5} rather than 10^{16}: see below) again took the field. The opposing armies met at Helam; but the Israelites, this time under the command of David himself, once more proved victorious, and compelled the Syrians to accept terms of peace. It would appear from 1 K $11^{23f.}$ that this battle had an important bearing on the history of Syria; for, according to the notice there preserved, a certain Rezon, son of Eliada, took advantage of the defeat of Hadadezer to desert. Accompanied by a troop of men he fled to Damascus, where he set up a kingdom, and became 'an adversary to Israel all the days of Solomon.'

It cannot be denied that, at first sight, the impression of Zobah conveyed by the biblical narrative is that of a large and powerful kingdom in the north of Palestine, exercising sovereign sway over all the Aramæan tribes. Hence the majority of scholars, until recently, have placed it vaguely between Damascus and Hamath, the nearest approach to a definite site being that of Nöldeke, who assigns it to the neighbourhood of Emesa. As regards its *site*, this impression is confirmed by the Assyrian monuments (Schrader, *KGF* p. 122, *KAT*² p. 182 f., art. 'Zobah' in Riehm's *HWB*; Fr. Del. *Par.* p. 279 f.); but the idea of its *importance* seems to be derived very largely from the fact that (according to the present text of 2 S 10^{16}, cf. 8^{3}) Hadadezer, king of Zobah, exercised control over the distant Aramæan tribes living 'beyond the River.' But a comparison of the two accounts of David's wars with the Ammonites and the Aramæans (2 S 8 and 10) shows clearly that the account given in 2 S 8^{3-8} is mainly the work of a later editor, who probably also substituted the phrase 'that were beyond the River' (10^{16}) for the original 'of Damascus'[*] (on the relation of $10^{1f.}$ to ch. 8 see SAMUEL, I. AND II., p. 390). On the ground of its importance, therefore, and of the extent of influence, there is no need to place Zobah so far north as the kingdom (or city) of that name mentioned in the Assyrian tribute—or geographical lists (see above). Moreover, a closer examination of the history of the two campaigns makes it more probable that Zobah lay considerably further south. The order in which the Aramæan tribes are mentioned in 2 S $10^{6f.}$ (Beth-rehob, Zobah, Maacah) is decidedly against the northern theory, for both Beth-rehob and Maacah lay to the S. or S.W. of Damascus, and apparently their territories bordered on that of Ammon: we should expect, therefore, to find the kingdom of Zobah in the same neighbourhood. Hence Winckler (*Gesch. Isr.* p. 137 f.) is no doubt right in identifying Zobah, or Aram-zobah, not with the Assyrian Ṣubiti (or Ṣubutu) lying to the N. of Damascus, but with the place of the same name, S. of Damascus and in the neighbourhood of the Haurân, mentioned by Assurbanipal in the account of his campaign against the Arabian king Jauta (Rassam-Cylinder, vol. vii. ll. 110–112; see *KIB* ii. p. 217). Winckler (p. 141 f.) is inclined to go even further and to identify Zobah with Beth-rehob, but the evidence which he adduces is scarcely convincing.

It is possible that the editor who is responsible for 2 S 8^{3-8} confused the two Zobahs, for the two cities of Zobah which he mentions, Berothai (=Berothah, Ezk 47^{16}) and Betah (1 Ch 18^{8} TIBHATH, probably the modern *Tebah*), were situated N. of Damascus. In addition to the authorities cited, see also Tompkins in *PEFSt*, April 1885, pp. 108 f., 113.

J. F. STENNING.

ZOBEBAH (צֹבֵבָה).—A Judahite, 1 Ch 4^{8} (B Σαβαθά, A Σωβηθά, Luc. Σαβηβά).

ZOHAR (צֹחַר).—**1.** Father of Ephron the Hittite, Gn 23^{8} 25^{9} (Σάαρ). **2.** The name of a Simeonite family, Gn 46^{10} (A Σάαρ, *D* Σάαλ), Ex 6^{15} (Σάαρ); called in Nu 26^{13} and 1 Ch 4^{24} **Zerah** (in former, BA Ζάρα; in latter, B Ζάρες, A Ζάραε, Luc. Ζάρα). **3.** The name of a Judahite family, according to the *Ḳĕrê* of 1 Ch 4^{7} (וְצֹחַר 'and Zohar,' which was followed in AV of 1611). The *Kĕthîbh* is יצחר which in modern edd. of AV appears as 'Jezoar' (an incorrect transliteration of יְצֹחַר) and in RV as 'Izhar' (*i.e.* יִצְחָר).

ZOHELETH, THE STONE (אֶבֶן הַזֹּחֶלֶת 'the serpent's stone'; B Λιθὴ τοῦ Ζωελεθεί, A τὸν λίθον τοῦ Ζωέλεθ).—The spot at which Adonijah prepared a sacrificial feast for all those who supported his claims to the throne of David (1 K 1^{9}). The stone was doubtless a *maẓẓēbā*, and marked the site of an old Canaanite sanctuary. In ancient times 'living water' was regarded as inhabited by *jinn*, usually in the form of a serpent or dragon; cf. 'the dragon's well' (Neh 2^{13}): hence such water was itself sacred, and the source whence it issued usually became the site of a temple (see W. R. Smith, *RS*^{2} 170 f.). The actual position of the stone is somewhat uncertain, and depends on the identification of En-rogel; the name seems to have been preserved in the modern *ez-Zehwéleh* (see art. EN-ROGEL and the authorities there cited). Wellhausen (*Skizzen*, iii. 171) suggests that the name Zoheleth may be connected with the Arabic *Zuḥal* = Saturn. J. F. STENNING.

---

[*] 2 S 10^{6}. Read as Wellhausen and Klostermann—וְאֶת־מֶלֶךְ מַעֲכָה אֶת־אִישׁ טוֹב וְעִמּוֹ 'and the king of Maacah, Ish-tob, and with him (12,000 men),' omitting the awkward 'with a thousand men.' In the parallel passage (1 Ch $19^{6f.}$), the Chronicler gives the sum-total as 32,000 men (*i.e.* 20,000+12,000): he obviously, therefore, did not include the extra thousand (see Klosterm. *ad loc.*).

[*] This seems more prob. than the substitution of 'Damascus' for 'beyond the River,' which was suggested in SAMUEL, I. AND II.; see also Budde, *Richter u. Sam.* p. 250, note 3. Winckler, *Gesch. Israel's*, p. 137 f., indeed, rejects the whole of 10^{14-19a} as redactional, arguing with some force that v.^{19b} really forms the conclusion to vv.$^{6-14}$; but, with the exception of the phrase 'beyond the River,' there seems no justification for doubting the genuineness of the passage.

ZOHETH (זוֹחֵת).—A descendant of Judah, 1 Ch 4^{20} (B Ζωάν, A Ζωχάθ, Luc. Ζαώθ).

ZOOLOGY.—See NATURAL HISTORY.

ZOPHAH (צוֹפַח).—An Asherite, 1 Ch 7^{35} (B Σωχάθ, A Σωφάρ, Luc. Σουφά) ^{36} (B Σωφάς, A Σωφά, Luc. Σουφά).

ZOPHAI (צוֹפַי).—An ancestor of Samuel, 1 Ch $6^{26\,(11)}$ (Σουφ(ε)ί) = ZUPH of v.$^{35\,(20)}$ and 1 S 1^1.

ZOPHAR (צוֹפַר, Σωφάρ).—The third in order of Job's three friends, described in the LXX as 'king of the Minæans' (Job 2^{11}). Probably the chief of a tribe on the borders of Idumæa.

ZOPHIM.—The 'field of Ẓophim' (שְׂדֵה צֹפִים, LXX εἰς ἀγροῦ σκοπιάν) was one of the spots to which Balaḳ took Balaam to view Israel, Nu 23^{14} (JE). It is questionable whether we have here a proper name; the Heb. expression means literally 'field of viewers *or* lookers out' (note the addition 'to the top of Pisgah'). Such 'places of watching' (מצפה) were naturally situated frequently on the tops of hills (see MIZPAH, vol. iii. p. 400^a). On the impossible combination *Ramathaim-ẓophim* of 1 S 1^1 see art. RAMAH, p. 198^a.

ZORAH (צָרְעָה; BA Σαραά, with the following exceptions: B in Jos 15^{33} om., 19^{41} Σαράθ, Jg 13^2 Σαράλ; A in Jg 13^{25} Σαρά, 18^2 Ἀραά; in Neh 11^{29} Bℵ* A om., ℵ$^{c.\,a}$ Σαραά, Luc. Σαρά).—A town allotted to Judah, according to Jos 15^{33}; but elsewhere spoken of as Danite, Jos 19^{41}, Jg $18^{2.\,8.\,11}$ (coupled with ESHTAOL); specially noted as the home of SAMSON, Jg $13^{2.\,25}$, who was buried between Ẓorah and Eshtaol, 16^{31}. It was fortified by Rehoboam, 2 Ch 11^{10}, and is mentioned in Neh 11^{29} as peopled by Judahites after the Captivity. The gentilic name **Zorathites** (הַצָּרְעָתִי) occurs in 1 Ch 2^{53} (οἱ Σαραθαῖοι) 4^2 (B ὁ Ἀραθεί, A ὁ Σαραθί, Luc. Σαλαθιήλ) and prob. 2^{54} (where read Zorathites הַצָּרְעָתִי for **Zorites** הַצָּרְעִי; B ὁ Ἡσαρσεί, A ὁ Ἡσαραεί, Luc. ὁ Σαραθί). In the latter verse the name *Manaḥathites* (Manoaḥites) is a reminiscence of Manoaḥ the father of Samson.

Ẓorah is the modern *Ṣur'ah* on the northern side of *Wādy eṣ-Ṣurar* (the Valley of Soreḳ) opposite *'Ain Shems* (Beth-shemesh), which lies on the southern side. This corresponds with the statement of Eusebius (*OS*^{2} 293, 29) that it was 10 miles from Eleutheropolis on the road to Nicopolis. It is mentioned under the name *Zarâa* in the *Travels of a Mohar* (Sayce, *HCM* 344), and as *Zarkha* in the Tel el-Amarna letters (Winckler, No. 173; Petrie, No. 265) as attacked by the Khabiri.

LITERATURE.—Robinson, *BRP*^{2} iii. 153; Guérin, *Judée*, ii. 15 ff.; Baedeker, *Pal.*^{3} 163; G. A. Smith, *HGHL* 218; Buhl, *GAP* 90, 195. J. A. SELBIE.

ZORITES.—See ZORAH.

ZOROASTRIANISM.—An account of the ancient religion of Iran, the religion of the Parsis at the present day, finds its place in a Bible Dictionary, not because of direct references to it in the Bible which need elucidation,—for these are exceedingly few,—but because of the widely-held opinion that some of the most important later developments of Judaism were profoundly affected by contact with Persian beliefs. The developments in question affect Angelology, Demonology, and the doctrine of the Resurrection. In the present article only that will be described which directly concerns the parallel phenomena in the religion of Israel.

1. The *Mazdayasna* ('worship of Mazda') is variously known as Mazdeism, Zoroastrianism, or Parsism. Its basis is the worship of a supreme deity, *Ahura Mazdāh*, or *Ormazd* ('the Lord Wisdom'), beneath whom stand six highly abstract archangels called *Amshaspands* (*Amesha Spenta*, 'immortal holy ones'), and a large number of angels (*yazata*), who are mostly nature-powers dethroned from the divine position they held in the days when the ancestors of Iranian and Indian tribes lived together as one people. The sacred book of the religion, the *Avesta*,* contains some ancient hymns which appear to come from *Zarathushtra*, called by the Greeks Ζωροάστρης. He is probably to be regarded as a real person, the reformer to whom may plausibly be assigned the monotheistic doctrine of the religion, and the philosophic system which attempts to solve the problem of Evil. This system involves an evil spirit, *Angra Mainyu*, or *Ahriman* ('destructive spirit'), who with his hosts of demons (*daēva*) presides over all evil things in the world and wages war with Ahura and the good creation, till the time when evil will be finally destroyed. Among the most powerful of the good spirits are the '*fravashis* of the pious.' A *fravashi* is part of a man's identity, dwelling in heaven but powerful to aid on earth. It belongs to good men past, present, and to come. It shares the fortunes of its earthly counterpart, when a living man; and if that man becomes evil, it apparently ceases as a *fravashi* to be. The good Zoroastrian had a code of simple and generally high-toned morality to observe, hampered by a complicated and often extremely foolish ritual, which is probably to be laid to the account of alien priests who fastened on the religion during the later Achæmenian reigns. After death, the pious receive a blissful immortality with Ahura in the 'House of Song,' while the *daēva*-worshippers are condemned to torment in the 'House of the Lie.' Ultimately the world is to be renewed under *Saoshyant* ('one who shall save'—a being miraculously descended from Zoroaster), after purification by the 'ordeal of molten metal,' which will consume all that is evil.

2. Such is, in the barest outline, the faith of Zoroastrianism. The only other preliminary left for us to determine here is the date at which this system had penetrated countries inhabited by Jews. It is obvious that if Judaism owed any of its eschatology, or its doctrine of angels and demons, to this foreign influence, Zoroastrianism must have been firmly established in Babylonia or Media before the Book of Daniel was written, and presumably generations before. The date of the Avesta is a warmly disputed question; but for our present purpose this matters little, for the doctrines which find parallels in Judaism are universally admitted to be early, on the witness of classical writers, from Herodotus downwards. That

---

* Its main divisions are the *Yasna* (abbreviated *Ys*), which includes the oldest part, the *Gāthās*, or hymns; the *Yashts* (*Yt*), hymns in honour of old nature powers; and the *Vendīdād* (*Vd*), the Leviticus of Parsism. Many of the most important of the 'Rabbinic' writings of Parsism are translated by Dr. E. W. West in the *Sacred Books of the East* (*SBE*). In this series also is found the best translation of the Avesta itself, by Darmesteter and Mills.

these doctrines were prevalent 'in the cities of the Medes,' and other regions inhabited by Israelites during and after the Exile, may also be regarded as certain. Moreover, it is fair to argue that the Jews would be predisposed to look favourably on the religion of their liberator Cyrus. (That the early Achæmenian kings did hold what may be fairly described as Zoroastrian faith, may be assumed as probable, though not at all certain.) At present we have to show how far the Zoroastrian and the later Jewish systems coincide, and examine what reason there is for assuming that foreign influence affected the development of Judaism. Before discussing this question, we may deal with the few passages of the Bible and Apocrypha in which direct allusion is made to Zoroastrian institutions.

3. There are two allusions in the Prophets which have caused no little difficulty, since both of them refer to pre-exilic times. In Jer $39^{3.\,13}$ RAB-MAG appears to be the Babylonian title of an official head of a sacred caste, like the Magian *ὀνειροπόλοι* of Astyages in Hdt. i. 108. By itself this passage is not decisive: Tiele (*Religionsgesch.* ii. 110 f.) would deny the connexion of the Rab-mag with Median Magi, and make him no religious officer at all.[*] Tiele has not dealt with the very remarkable passage, Ezk $8^{16ff.}$, which creates a strong presumption that there were Magi outside Zoroastrianism, whose influence was felt at Jerusalem before the Exile. The prophet sees sundry 'abominations' in the temple, the worst of which are sun-worshippers who 'put the branch to their nose.' This 'branch,' despite Gunkel, must be the *barsom*, or 'bundle of fine tamarisk boughs' (Strabo, xv. 3. 14), which the Parsi priest of to-day holds up to his face at worship. Now, if this were 'a distinctively Persian rite' (Davidson, *in loc.*), it would be 'hardly probable at so early a date in Israel.' But it is only Magian, and not Persian at all. It belongs to the mass of ritual which the Magi contrived to graft long after this time upon the Mazdayasna, hitherto almost destitute of ceremonies and priestly rites. If, then, this characteristically Magian rite has penetrated as far as Jerusalem in the 7th cent. B.C., it is no longer 'improbable' (Tiele) that these famous medicine-men should have 'come from Media to Babylon.' On the contrary, their success at Jerusalem is more easily explained if they had already a footing at Babylon.

4. The presence of Parsism in *Tobit* is so clear that we may fairly discuss it at this point. That *'Ασμόδαῖος* (B *'Ασμόδαυς*) is *Aēshma daēva*, 'the demon Wrath,'[†] has been generally accepted, though no very successful attempt has been made to account for this and other Parsi traits in a Jewish romance. A key to the character of the book may perhaps be found in the recognition of a Median folklore story which a Jewish author has adapted: see the details of this theory worked out in a paper by the present writer in *Expos. Times*, March 1900. The following will be included among the features of the original story. (1) The scene is in Media, a meeting-place of Iranian and Semitic, and especially in 'Zoroastrian Ragha' (*'Ράγαι τῆς Μηδίας*, 9^5 ℵ). (2) The demon Aēshma, as is natural in a popular story, has enlarged his functions to include 'Lust, hard by Hate,' his Avestan attribute. His opponent in the Median original would be Sraosha, the angel 'Obedience,' whom Parsism sets in special antagonism to Angra Mainyu's arch-fiend Aēshma. Behind him doubtless stands the 'grateful dead man' of the folk-tale, found widely in the East,[*] on which Hans Andersen based his *Travelling Companion.* Raphael therefore is ultimately substituted for the dead man of To 2^7. (3) The extraordinary emphasis laid on the duty of burying the dead strongly recalls the Vendidad, and it seems clear that the Jewish adapter has simply substituted burial for the Parsi 'Tower of Silence,' on which the vultures strip the bones. Great merit is accumulated when the faithful Parsi, with a companion,—it is mortal sin to do it alone,—removes a corpse thither from polluting the sacred earth. In the original, therefore, the prototypes of Tobit and Tobias must have done this pious work together. Moreover, a *dog* was necessary, that his glance might exorcise the corruption fiend.[†] Hence the entirely otiose and un-Jewish dog which survives in To 6^2 (ℵ) and 5^{17} 11^4 (B). In addition to this, there is a clear reference in 4^{17} (B) to the *draona*, the 'corpse-cake.'[‡] (4) There seem very clear allusions (see 6^{12}, and note the attempt at explanation in ℵ: also cf. 3^{15} and 3^{17}) to the idea of the merit of marriage with near kin. Now this, in the form of first-cousin-marriage, has always been prominent in Parsism.[§] The Magi went further, and made themselves notorious in antiquity by their vehement preaching of incestuous unions, to which they attributed extraordinary virtue. In the Median *Tobit* no doubt Raguel and the hero were brothers, so that 7^4 (ℵ) may be taken literally. (5) The charm by which Tobit's blindness is healed is very much like one found in the Shâh Nâmeh of Firdausi; see the story in Atkinson's epitome (Chandos Classics), p. 106. The parallel suggests that in the Median story the blindness may have been caused by demons' enchantment; the fish in 6^2 looks also like a demon. (6) In 8^3 (ℵ, the original text clearly) the demon flies *ἄνω εἰς τὰ μέρη Αἰγύπτου.* That the original Aramaic[‖] מצרים was a blunder for מזנדרן was suggested by Kohut,[¶] and in spite of Nöldeke's objection seems highly probable. Mâzindarân was especially the land of sorcery; and on Mt. Dimâvand therein (cf. *ἄνω* in 8^3) the hero Thraētaona 'bound' (*συνεπόδισεν αὐτὸν καὶ ἐπέδησεν*, *ib.*) the old serpent Azhi Dahâka. (7) The seven angels of 12^{15} may in the original have been the Amshaspands, who are often made seven by the addition either of Ahura Mazda or of Sraosha. If this is so—and it is not really necessary—we have the only distinctively *Zoroastrian* feature in Tobit; the rest are probably Magian, and may well antedate the Zoroastrian reform. But, of course, we have no means of dating the original story. It is noteworthy that there is practically no eschatology in the book; if its original was untouched by Zoroastrianism proper, this would be natural. It follows that we cannot rely much on *Tobit* as a channel for Parsi influences on Judaism. The utmost, therefore, that the book teaches us is that Israelites dwelling in Media were not strongly prejudiced against their neighbours (cf. 14^4), nor perhaps impervious to their religion.

5. To the category of direct references belongs, according to general belief, the story of the MAGI

---

[*] He compares the Assyr. *maḫ* 'great,' so that the word would mean 'prince'; cf. שָׂרֵי in Jer. *l.c.* But is this distinctive enough, where other classes of officers are mentioned side by side with him?

[†] The translation 'covetous or lustful,' given above under ASMODÆUS, is based only on an assumed etymology, and finds no support in Parsi texts. Note that the two words have become one, the Avesta here, as in *Ahura Mazdāh* and *Angra Mainyu*, keeping them separate.

[*] See a close parallel in F. H. Groome's *Gypsy Folk-Tales*, No. 1. In his note he gives a list of parallels elsewhere. Add Hinton Knowles, *Folk-Tales of Kashmir*, p. 40. A folk-tale closely connected with *Tobit* may be seen in *The Story of Aḥikar* (ed. Harris, Lewis, and Conybeare).

in Mt 2. The assumption that the name is strictly used is as old as the early Syriac commentators on Matt.,[*] but it is curious that there is so little corroborative evidence. Discussion here is hampered by the necessity of assuming the investigation of Magianism in general. The difficulty lies in the very limited attestation which the most authentic sources of orthodox Parsism give to the connexion of the stars with *fravashis*. We have a very striking identification of stars with representative spirits of a community in Rev 1^{20}. Meanwhile, we may note that although the Avesta and the Pahlavi scriptures but faintly encourage this association, there is a remarkably strong consensus of tradition connecting the Magi with star-lore. It is a side of their activity which would naturally be strengthened by connexion with Babylon (see § 3, above). The extent to which these Magi were orthodox Zoroastrians must remain doubtful. It seems fair to assume that the star did for them represent the *fravashi* of a great one just born. If we insist on Avestan doctrine, that star must have been a brilliant new star, and not a planet, for these were considered malign; there seem, however, to be traces of an opposite view, so that this need not be decisive against Kepler's theory. The question remains why they expected a *king*, and a *king of the Jews*; a prophet or 'saviour' (*saoshyant*) would seem a more natural idea. It is possible that we may fall back on the oneiromancy traditionally associated with the Magi[†] (cf. Mt 2^{12}), and suppose that they interpreted the meaning of this new star by the help of an unrecorded dream. It must be noted, however, that both dreams and star-lore are extra-Avestan, though not inconsistent developments of the system as we know it. It is only provisionally that we may cherish the belief that the earliest Gentile homage to the Lord Christ was paid by priests of the lofty religion which in earlier times was perhaps privileged to stimulate within Judaism the growth of the doctrine of the Resurrection.

6. Such are the biblical passages in which direct allusion to Parsism may be traced or reasonably suspected; sundry more doubtful examples may be left to the end of this article. We pass on to a much more important question. It being granted that during and after the Exile great numbers of Jews were living in Mazdayasnian countries, have we reason to believe that the development of certain doctrines among these Jews was stimulated by what they knew of corresponding doctrines in Parsism, and that in this way the history of doctrine in Judaism was vitally affected? The essential parts of our problem may be stated in terms of Ac 23^{8}, where (if we may include demons under 'spirits') the Sadducees represent the older Judaism, the Pharisees the newer, which arose after the Jews came in contact with Parsism. *Post hoc*, obviously: is it also *propter hoc*? A detailed examination of Parsism will show the marked likeness between the two religions in respect of eschatology and spirit-lore. Is this coincidence, or has one religion affected the other? If the latter, which is the debtor, or is the obligation mutual? Finally, if foreign influence on Judaism is to be postulated, have the claims of Babylon or Hellas a prior right to be heard? The last question is rather beyond our present range; but we may at least plead that Parsism is incomparably nearer to the faith of Israel than any other religion can pretend to be, and that its influence is antecedently more likely to have been felt. The case for the independent development of Judaism may be seen in the articles on ESCHATOLOGY, ANGEL, and DEMON. But weighty authorities bespeak at least respectful hearing for the theory that the development of Jewish doctrine was stimulated by the knowledge of a creed which contained full-grown dogma that within Judaism was only in germ.[*] It is natural to assume that gratitude to the Persians as their deliverers, to whom the Jews owed the protection which made the birth of the Jewish Church possible, may have predisposed them in favour of religious ideas wherein thinkers could recognize what was latent in their own faith.

7. In *Eschatology* one ground of hesitation to accept a measure of Parsi influence has been the doubt whether the Resurrection is a truly ancient doctrine in Parsism.[†] The doubt is entirely groundless: the mere fact that Darmesteter himself, the great champion of a late date for the Avesta, acknowledges the Resurrection as a doctrine of Achæmenian antiquity, might silence questioning. The important differences between Parsi eschatology and the various systems which struggled for recognition among the Jews during the last centuries B.C. are drawn out by Charles, *Eschat.* p. 135 f. These divergences are fatal to any theory of *borrowing*, but they do not affect the assertion that the Jewish belief 'can hardly have developed without Persian stimulus' (Cheyne). It is generally conceded that OT passages speaking of an individual resurrection do not appear until a period when Persian stimulus is historically possible, when the knowledge that the Persians held this belief could encourage thoughtful Jews to develop their own doctrine in a thoroughly Jewish form. In this case the foreign influence would show itself by the absorption of details, minor doctrines or illustrations of doctrine. Now these are forthcoming, if not beyond dispute in individual cases, yet to an extent making coincidence improbable. Among these are the following.[‡] Is $24^{21f.}$ is allowed by Charles, a hostile witness (*Eschat.* pp. 116 n., 159), to show probable traces of Parsism: the imprisonment of evil powers before their final punishment may be compared with Bund. 3^{26} (*SBE* v. 19), which seems to represent an Avestan picture of war in heaven, followed by the binding of the fiend, as in the Apocalypse. In Is 65^{17} 66^{22} a new heaven and earth, following the final judgment and destruction of evil, is parallel with the *frashō-kereti*, 'renewing,' which in Parsism follows the 'ordeal of molten metal' (§ 1). This last, the *ayō-khshusta*, somewhat resembles the figure of Mal 3^{2} 4^{1}. The four periods in Daniel have a very close parallel in the Pahlavi *Bahman Yasht* (*SBE* v. 193); but in this very late work it seems more reasonable to assume indebtedness to the Bible, as on p. 197 there is an apparent imitation of Lk $16^{19ff.}$, and on p. 203 of Mic 7^{6}.[§] A characteristic of Parsism from the first is, however, recognizable in the new manner of looking upon general human history, and in the reckoning of millennia, which became prominent in apocalyptic. Parsi phraseology has been found (Cheyne, *OP* 440) in Is 26^{19}, where the 'dew of lights' is compared with 'the illimitable, self-created lights' of 'the Best

[*] See Gottheil, 'References to Zoroaster' in the *Drisler Classical Studies*, pp. 24–51.

[†] *e.g.* in Hdt. i. 107.

[*] See Kuenen, *Rel. of Isr.* iii. 32 ff.; Grätz, *Hist. of Jews*, i. 441 ff.; Ewald, *OT and NT Theol.* pp. 72–78; Nöldeke in Geiger's *Zeitschr.* x. 233 ff.; Renan, *Hist. Isr.* iv. 156; King, *The Gnostics* ^{2}, p. 120; Bousset, *ThLZ* xxiv. 513; and esp. Cheyne, *JRL* 257 ff., *Nineteenth Cent.* for Dec. 1891, etc.

[†] So, among others, Schultz, *OT Theol.* i. 330; Schwally, *Leben n. d. Tode*, § 38. The latter observes that only two Avestan passages are quoted for the doctrine. He ignores the witness of Theopompus. Jackson (*JAOS* xv., lix.) adds *Ys* 30^{7}, a Gathic text.

[‡] The word *paradise* is not included among these, because it has developed its theological meaning entirely on Jewish soil. The Avestan *pairidaēza*, equated by Spiegel, is a ἅπ. λεγ., equivalent in meaning to its congener περίτειχος.

[§] P. 211 (§ 54) has a less decided resemblance to Rev 12^{12}.

World of the blest, shining, all illuminated' (*Vd* 19^{36}); but this does not illustrate the *dew*, for which Schwally rightly denies comparison with the *Haoma*.* A more hopeful parallel may be seen when we note the Parsi view of the Dawn as a daily parable of the Resurrection—an idea witnessed in Vedic India by the phrase making the dawn the 'banner of immortality' (*Rgveda*, iii. 61. 3): for Parsism see Darmesteter, *Ormazd et Ahriman*, p. 239. There seems no adequate reason to deny the possibility of this conception in Psalms of the Persian period; and in Ps 49^{14} 17^{15} its presence is highly probable. The LXX, as Cheyne observes, shows the doctrine of the Resurrection unmistakably, as in Is 26^{19}, Job 19^{26}, Ps 1^{5} 65 (title). Passing on to the Apocrypha, *Enoch* shows some decidedly Parsi traits: note the transformed heaven and earth ($45^{4.5}$), and the mountain of God's throne set in the *south* (18), compared with *Secrets of Enoch* 10, where a hell is placed in the *north*,—this connotation of north and south is exceedingly common in Parsi books. The Slavonic *Enoch* is notable as an early witness for the idea of seven heavens (see HEAVEN), which appears in late Parsi books,† but not in the Avesta, where there are four. In the Apocalypse, which seems to have assimilated not a little Parsism, presumably through earlier Jewish apocalyptic, we have the millennium, the binding and subsequent destruction of the 'old serpent' (see § 4 (6)), the assault of Satan on heaven and his casting down to earth (cf. *SBE* v. 19), the blasting of a third part of the sky (*ib.* 164 and 17), all of which can be more or less illustrated from Parsi sources: closer still are the parallels which may be seen in some late Parsi writings described by West, *ib.* lviii f. It is not till the Talmudic period that we get direct imitations without that thorough assimilation which makes all the comparisons hitherto noted individually disputable: for Talmudic-Parsic eschatology see Kohut in *ZDMG* xxi. 552-591. One interesting example may be quoted, as it has been used to illustrate Jn 11,—the adoption by the Rabbis of the Avestan doctrine that the departing soul hovers three days near the corpse and takes its flight on the fourth.‡

8. In *Angelology* the influence of Parsism was also confined to subsidiary points, but is more marked. A tradition is preserved in the Jerusalem Talmud (*Rosh-hashana*, p. 56) that 'the names of the angels came up with them from Babylon,' which may be taken as meaning 'from the Exile' in general. This coincides with the fact that the practice of naming angels, and placing them in an ordered hierarchy, does not appear before the Return. Except, perhaps, in the case of a few Talmudic angels,§ no parallels are to be expected between Hebraic names and Persian originals. As before, we are at most to postulate Persian stimulus behind the remarkable contrast between the impersonal angels of early Jahvism and the individualized and ordered celestial beings of Daniel, Zechariah, and the NT—still more of the Apocrypha.‖ The 'seven spirits' of Rev 1^{4} 8^{2} En $90^{21f.}$ ¶ (? cf. Zec 3^{9} 4^{2} and the 'watchers' of Dn 4^{17}) may be linked with the Amshaspands by their appearing first in Tobit (12^{15}): the sacred number would recommend the idea, and the Jews probably met with it in a form they would approve, with Sraosha (Raphael's prototype in Tobit) making up the seven, instead of the Deity himself (see § 4 (7)). There is exceedingly good reason for regarding as Parsic the national angels ('princes') of Dn $10^{13.20}$ 12^{1}, the decisive argument being that *Israel* has an angel other than J″ (contrast Sir 17^{17}). This makes a strong case for recognizing here the *fravashi*—a doctrine the more likely to be assimilated in that it had a (less developed) analogue in Babylonian religion. In the Apocalypse the conception comes out in the 'angels' of the churches. The *fravashi* of a nation or community is a conception found in three Avestan passages: see Mills' version of *Ys* 17^{18} (*SBE* xxxi. 259). The two NT allusions (Mt 18^{10}, Ac 12^{15}) confirm the doctrine of *fravashis* for individuals; but that the doctrine, whatever its origin, is completely assimilated may be seen from the apparent fact that the nation has its *fravashi* long before the individual. The latter may indeed have been developed out of the former, just as in the doctrine of the Resurrection. In Parsism, of course, the individual came first. The *yazatas* are fairly paralleled by genii in Enoch 61^{10} 69^{22}, and in the Apocalypse by angels who watch over waters (16^{5}, cf. Anâhita), fire (14^{18}, Parsi Âtare), sun (19^{17}, Hvare), wind (7^{1}, Vâta). In all these parallels, however, we find the Parsi suggestion, if such there be, thoroughly assimilated. The *fravashi* is no longer a being necessarily good, but becomes a complete spiritual counterpart of the nation (Daniel) or the church (Apocalypse), and capable therefore of declension and punishment.* Similarly, the 'angels' of the little ones are nearest the throne (Mt 18^{10}), because representing those who have not learned to sin. The study of St. Paul's attitude to these doctrines is instructive in more ways than one.† He accepts an elaborate ranking of spirits. The air, as in Parsism, is made the arena of strife between good and evil angels:‡ the spirit world is a reflex of the earthly in the inextricable mixture of contending powers. But he accepts these beliefs only as enhancing the supremacy of Christ: cf. He 1^{4} 2^{5}, Rev 22^{9}. Like Zoroaster, centuries earlier, he found his contemporaries in danger of a virtual polytheism (cf. Col 2^{18}), and set them free by magnifying the one Divine Being whose transcendence made worship of mere angels impossible. In doing this, Zoroaster simply tried to ignore the deities of the faith he reformed, with the result that after his death they came back like a flood, losing little in position by their formal subordination, as angels, to Ahura Mazda. St. Paul was able to accept fearlessly the angelology he found, while greatly lessening its importance, and achieving a permanent success in raising Christ to an unapproachable height above the spirit world.

9. Much of what has been said can be repeated for *Demonology*. It would be absurd to think of Satan and his angels as borrowed from Angra Mainyu and the *daēvas*. The Semites had demons enough of their own, and the Satan doctrine in Parsism and in Judaism developed in very different ways. We may still believe that the ranking of demons and the elevation of one spirit to their head may have been stimulated by Parsism. There are native forces which largely account for the difference between earlier and later Jahvism in this respect; but when we find the Jews, after historical contact with Persians, advancing to a position

* The Indian *Soma*—the juice of a sacred plant, endowed in Veda and Avesta with miraculous qualities.

† Kohut, *N.Y. Independent*, Jan. 11, 1894. For other Parsic traits in this *Enoch* see Charles's ed. p. 74.

‡ The doctrine was probably taken from Parsism, but it is found elsewhere: Dr. J. G. Frazer quotes it from modern Greece and from Calabria.

§ Kohut (*Angelol.* pp. 43-45) has one or two plausible equations.

‖ For Philo, see Siegfried, *Philo*, p. 141.

¶ Charles notes here that the 'seven first white ones' come from the Amshaspands.

* Cf. Weber, *Jüd. Theol.*^{2} p. 170 f.; also Söderblom in *Rev. Hist. Rel.* xl. 266 ff.: on the whole subject see the writer's paper, 'It is his Angel,' in *JTS*, 1902.

† See Beyschlag, *NT Theol.* ii. 100 ff. Mazdeism had probably mixed with indigenous cults in Cilicia (see *Rev. Hist. Rel.* xxxvi. 261), so that St. Paul may have been acquainted with it in youth.

‡ Against this view of Eph 2^{2} see Findlay (in *Expos. Bible*), p. 103. He observes that the Rabbis regarded the atmosphere as Satan's abode—'a notion foreign to Scripture.' They, at any rate, may well have got the notion from Parsism.

more and more like theirs, it is hard to suppose the movement entirely independent. Stave well shows that the teaching of the Prophets, especially Deutero-Isaiah, tended to an absolute denial of existence to heathen deities; yet as early as 2 Ch 28^{23} the gods of Damascus are real, and before long they and other foreign gods are firmly established as demons. The striking contrast between this development and that towards which the Prophets led is explained satisfactorily by the *daēvas* of Parsism, who were to some extent themselves the deities of hostile tribes. The earlier history of Jewish and Parsi demonology may differ widely; but the doctrine of the NT might be broadly enunciated in terms which would accurately describe Zoroaster's own teaching, while that of the Talmud has much in common with accretions found in the Vendidad and the Pahlavi patristics. In both NT and Gathas, Evil is a lying and murderous spirit, which in the beginning chose evil thoughts, words, and deeds, and which has ever since the Fall[*] tempted mankind, with the aid of fiends who afflict the bodies and souls of men. In both, men are called to join in the strife which shall end with the destruction of Evil in hell. Could we believe that a pure Gathic religion was ever preached within the Jews' hearing, the historical connexion of the two systems would be almost indisputable. But the very corruptions of later Parsism must have helped to recommend it to the popular Jewish mind, which was equally in bondage to the fear of evil spirits and the foolish ritual that pretended to control them. It is noteworthy that Judaism deliberately forsook suggestions from its earlier writings—the Serpent of Gn 3 and Azazel in Lv 16—when it formed a new demonology with 'the Satan' as prince of evil. We naturally seek a foreign body whose attraction has drawn it from its proper course. Without pursuing this subject in detail, we may note in conclusion that in the Apocalypse, where parallels with Parsism (however explained) are especially numerous, there is a deep-seated connexion of thought in the characteristic balancing of the heavenly and the infernal—*e.g.* the devil, the beast, and the false prophet as the 'anti-trinity of hell' (see Milligan, *Baird Lecture*, p. 110 ff.). It seems reasonable to suppose that the author would readily make use of imagery from a system so subtly resembling his own. There is significance then in the identification of the Serpent of Gn 3 with Satan (12^9), whose binding and subsequent destruction is narrated in striking accordance with the Parsi story of Azhi Dahāka (above, § 4 (6)). We may perhaps fairly add that Azhi Dahāka is especially connected with Babylon,[†] a coincidence which might be claimed as no mere accident—the less so as in the Pahlavi *Bahman Yasht* (*SBE* v. 234) we find the serpent Azhi, in his brief release before his final destruction, swallowing 'one-third of mankind, cattle, sheep, and other creatures of Auharmazd.' The obvious parallels in the Apocalypse are only discounted by the impossibility of proving that the Pahlavi translator is here faithful to his original Avestan text, now lost. (See above, § 7).

10. The question of Parsi influences upon the ESSENES is raised by Lightfoot's dissertation (in Comm. on *Col.* pp. 387–389). He accepts (like Hilgenfeld) links with Parsism in (1) dualism, (2) sun-worship, (3) angelolatry, (4) magic, (5) striving after purity. Other points might be plausibly added, such as their white garments, the value set on truth, their devotion to agriculture, etc. (Their unbloody offerings must not be counted here, for Mazdeism has always had a sacrifice of flesh, as well as the libation and the Haoma offering). It must be allowed that there is little really distinctive here, except the sun-worship—the one point in which Cheyne (who in other respects endorses Lightfoot's view) thinks Josephus inaccurate.[*] Moreover, there was Magian sun-worship which was not Zoroastrian, as in Ezk $8^{16f.}$ (see § 3, above). Essene dualism seems to owe nothing to that of the Vendidad, which has no philosophical theory of the inherent evil of matter and no trace of asceticism. The most conspicuous features in the picture Josephus draws are alien from the spirit of Parsism. In their psychology and eschatology one or two surface parallels are neutralized by deep-seated divergences. Thus in Mazdeism the pre-existent souls (*fravashis*) came to earth voluntarily, to join in the warfare against evil, not ἴυγγί τινι φυσικῇ κατασπώμεναι. And in denying the Resurrection in favour of the immortality of the soul, the Essenes betray affinity with Hellenistic Judaism (especially the Book of Wisdom): note that Grätz and Montet trace the latter doctrine to Neoplatonism, recognizing Parsi influence only in the former. Unless Josephus (*Wars*, II. viii. 11) is entirely drawing on imagination, we must admit, with Söderblom, that Greek influence is demonstrable in their paradise beyond the sea, while the solitary Parsi feature, the hell ζοφώδης καὶ χειμέριος, is not sufficient to support an argument.

11. Sundry miscellaneous comparisons may be mentioned, and among them those given by Darmesteter in his attempt to prove that Parsism borrowed from Judaism. (1) Philo's Λόγος (mostly Neoplatonic) originates Vohu Manah ('the Good Mind'). (2) The enactments of Pentateuchal and Avestan law are regularly introduced with the formula, '(God) saith to (the lawgiver).' (3) Ahura creates the world in six periods—heaven, water, earth, plants, animals, man.[†] (4) Mankind in the Avesta descends from one couple, and the name *Mashya* signifies 'man,'[‡] like אָדָם. (5) Sin begins with the first man. (6) Ahura bids king Yima collect in a subterranean palace the finest types of the human race, animals, and vegetables. When three destructive winters have depopulated the earth, this 'Var' shall open and re-people it with a higher race.[§] (7) Yima's successor has three sons, between whom the world is parted as among the sons of Noah. (8) Zarathushtra holds converse with Ahura on a mountain before promulgating the Law. (9) Zarathushtra had three precursors in his religion, as Moses had the three patriarchs. (10) The Avesta, like the OT, is divided into Law, Prophecy, and Miscellaneous Literature. Darmesteter tries to show that these parallels must be interpreted by Parsi borrowing. As he has convinced no one, the point need not be argued. It is enough to say that (1) the really Avestan elements in these comparisons are demonstrably far too old to have been borrowed; (2) some features may come from Babylonian or even Accadian antiquity, influencing Hebrew and Parsi alike; (3) most of the parallels are obviously fortuitous, proving nothing even when presented apart from a setting which greatly modifies the resemblance. That some of the later parts of the Avesta (and, *a fortiori*, Pahlavi writings) may have been influenced by Judaism is likely enough. Thus Horn[‖] thinks that the Fall is late in Parsism and due to the Hebrew, also that the virgin-birth of Saoshyant[¶] owes something to Is 7^{14}. Sundry biblical and Talmudic

[§] See Geldner's tr. of *Vd* $2^{21ff.}$ in Usener, *Sintflutsagen*, p. 208 ff.; Cheyne (*Encyc. Bibl.* *s.v.* 'Deluge') remarks that it seems influenced by the Hebrew.

[‖] 'Med. u. Pers.' p. 330 (in Hellwald, *Kulturgesch.* pt. 5).

[¶] This is a good example of a parallel made plausible by selective description: the Parsi story is a most extravagant marvel, to be classed with the miraculous births described in Hartland's *Legend of Perseus*, i. 133 ff.

parallels may be seen in Kohut, *JQR* ii. 223 ff. and iii. 231 ff. The period of the Babylonian Talmud seems to have brought a closer contact with Parsism. But these later contacts lie outside our range, as also does the Parsi heresy of Mani—if such it really be.[*]

12. The Book of *Esther* might reasonably be expected to show traces of Persian religion. But though strong Persian influence is betrayed by the loan-words (see Scheftelowitz, *Arisches im AT*), we cannot with certainty fix on anything of value for the questions we are discussing here. The Persian origin of the Feast of PURIM, which has received new importance from the theory of J. G. Frazer (*Golden Bough*^{2}, iii. 150-198), is examined elsewhere. An attempt has lately been made by H. Winckler[†] to find the names of the Amshaspands Vohumanah and Ameretāt in those of Haman and Hammedatha. It appears probable that these two archangels' names underlie the *'Ωμανοῦ καὶ 'Αναδάτου* (? *'Αμαρδάτου*), *Περσικῶν δαιμόνων* of Strabo (p. 512): it is clear that the names only have been borrowed in this Pontic appropriation, so that we need not consider the character of the Avestan originals. If the book really starts from an old story celebrating the victory of native Babylonian gods, Marduk and Ishtar, over the foreign divinities answering to 'Vashti' and 'Haman,' we should have to treat it as a composition essentially parallel with *Tobit*, as explained in § 4, above, that is, as a tale whose original significance was unknown to or ignored by a Jewish adapter writing with purposes of his own. In that case Jensen's identification of Haman and Vashti as *Elamite* deities is clearly preferable to Winckler's, which demands that *Persian* deities should suffer humiliation. But the whole theory will have to reckon with the explanation of all these names from Persian alone, as set forth in the new work of Scheftelowitz named above.

13. Two further comparisons may be added from the various suggestions of Prof. Cheyne. The later Jewish practice of prayer at dawn was, he thinks, prompted by Parsi usage—a point which would be hard to prove. He draws an interesting parallel between the 'Wisdom' of OT sapiential books and the *āsna khratu*, 'heavenly wisdom (?),' of the Avesta. But even if this translation were safe, the conception is almost isolated in the Avesta, and it would be better to compare the Amshaspand Vohumanah, a personification strikingly resembling the Wisdom with whom J″ created the world. His rising up to welcome the soul of the good man as it enters *Garō demāna* is in agreement with Wisdom's *φιλανθρωπία*. The sex of the impersonation answers to another Amshaspand, Armaiti, the 'daughter of Ahura.' It is obviously impossible to assert, or to deny, that the one conception springs out of the other, or owes something to it, so long as the dates of the several literatures permit association.

14. To the foregoing, more or less plausible, contacts may be added one which has been rather too ingeniously pleaded by a scholar of great learning, but without meeting with much acceptance. In *ZDMG* xxx. 716 ff. Rabbi A. Kohut tried to prove an 'anti-Parsic bias' in Deutero-Isaiah. It will be enough in general to refer to the criticism by de Harlez in *Rev. d. questions historiques*, April 1877. One passage, however, cannot be so summarily set aside. In Is 45^{7} commentators since Saadya have seen a polemic against Persian dualism, a view from which the most recent writers have begun to recoil. If we are to recognize an allusion to some foreign dualistic ideas, it is more probably Magian doctrine than anything we could suppose held by Cyrus. It happens that in the Gathas (*Ys* 44^{5}) we find Ahura addressed as 'the artificer of light and darkness, sleep and waking, dawn, noon, and night.' A yet more important parallel is the imprecation in Darius' great inscription (*Beh.* 4$^{78-80}$), 'may Auramazda slay thee . . . and whatever thou shalt do, may Auramazda destroy that for thee.' It is clear therefore that even in the reign of Darius, Persian religion could have used the language of Is 45^{7}, merely substituting Auramazda's name for that of J″. The idea, therefore, of a veiled polemic against Cyrus' religion must be abandoned.

15. The student will have realized from the foregoing paragraphs that it is no easy task to sum up in the case before us, and that a verdict of 'not proven' is about as much as we can expect in the present state of our knowledge. The difficulty is one which confronts us everywhere in the study of ancient religions in Western Asia, in which certain ideas seem to float about with a freedom that vetoes almost any attempt to fix their parentage. The general independence of Israel's religious development has certainly come out more clearly from the investigation. Of the Hebraists hardly any will allow more than a trifling weight to Persian influence, and even Prof. Cheyne speaks in his latest utterances with more hesitation than he did.[*] On the Iranian side an able and exhaustive examination has been made in the new work on eschatology by Söderblom (named below), whose results are almost entirely unfavourable to the doctrine of Persian elements in Judaism. He notes how unlike anything in Judaism is the Avestan hell, a place of cold and stench and poison, not of fire—which was, of course, too sacred an element to be applied thus: on the other hand, the underground Hades, divided into two parts, for pious souls and sinners, is essentially Greek. He would allow no genuine contacts of Judaism and Parsism until a late epoch. Thus he compares with 1 Th 4^{15} the passage in *Yt* 19, where through the work of Saoshyant the world is renewed, the dead arise, and the living are endowed with immortality (p. 224). If this is supposed to be more than an accidental parallel, we may place it with the Pauline passages in § 8, above. Söderblom remarks on the uniqueness of the conception in 2 P 3$^{5ff.}$, of the earth brought out of water and reserved for fire: this aspect of the future is essentially an Indo-Germanic idea, being found in India, Iran, Greece, Gaul, and Iceland (p. 204). In sharp contrast to this adaptation of a nature myth he sets the purely poetical and spiritual conception of Deutero-Isaiah as to the 'new heaven and new earth' (p. 285). Looking back upon the narrow range of the parallels noted in § 7, we shall probably do well to allow Persian influence in Eschatology only some weight in stimulating what was none the less a native growth in Judaism. It may, however, have prompted the sudden change from a Resurrection of the Just (with some conspicuous sinners) to a Universal Resurrection: so Bousset, with a half consent from Söderblom (p. 317). The presence of Persian ideas in the Apocalypse can hardly be denied; and they can be reasonably explained from the adoption of Zoroastrian imagery in earlier apocalyptic.[†] In Angelology and Demonology we

---

[*] So Darmesteter and Jackson: Söderblom denies (*Rev. Hist. Rel.* xl. 427 ff.). See Harnack, *Hist. of Dogma*, iii. 330.

[†] In his *Altoriental. Forsch.*, 3rd series, I. i. (1901). On Omanos see Jensen, *Hittiter u. Armenier*, p. 181; on Hammedatha, *ib.* p. 204 n.

[*] Cf. his language in *Kohut Studies* (1896), and various notes in the *Enc. Bibl.*

[†] It is curious that Mazdeism so entirely failed to penetrate Western Asia Minor (Cumont, *Myst. de Mithra*, 273). Otherwise we should have naturally thought of Ephesus as a place where such ideas would be in the air.

seem justified in regarding the foreign influence as present in the elaborate ordering and ranking of spirits. In the former we have a very probable Zoroastrian feature in the 'representative angels'; while in the latter we may assign to the same cause the breaches of continuity (1) in the abandonment of earlier ideas, like Azazel and the Serpent, in favour of the Satan; (2) in the changed view of the gods of the nations, who were at first treated as real gods, then became 'nothings,' and finally developed into demons. It is an interesting result of these concessions, if allowed, that the New Testament is very much more concerned with them than the Old.

LITERATURE.—The fullest discussion will be found in Stave, *Über den Einfluss des Parsismus auf das Judentum* (1898: see summary of it in *Crit. Rev.* July 1900, p. 323 ff., and an important review in *Rev. Hist. Rel.* xl. 266 f., by Söderblom); Cheyne, *OP* 394–452, *Expos. Times*, ii. 202, 224, 248 ff., *Enc. Bibl. s.v.* 'Angel,' and in *Kohut Studies* (1896). The relations between Parsism and Rabbinic Judaism were examined by Schorr in his Hebrew periodical *He-Ḥaluz*, vii and viii (1865) [not seen], who was closely followed by Kohut, *Jüd. Angelol. u. Dämonol.* (1866). The question is well discussed from the Biblical standpoint by M. Nicolas, *Des Doctrines Religieuses des Juifs* (1860). See also Kohut in *ZDMG* xxi. 552 ff., xxv. 59 ff.; Geiger in his *Jüd. Zeitschr.* iv. 72 ff., x. 113 ff.; Schwally, *Leben nach d. Tode*, p. 149 ff.; Moulton in *Thinker*, i. 401 ff., ii. 308, 490 ff., *Expos. Times*, ix. 352 ff., *Crit. Rev.* vi. 8–14, x. 99–106; Söderblom, 'La Vie Future d'après le Mazdéisme' (*Ann. du Musée Guimet*, 1901), esp. pp. 301–321. Too late for use came E. Böklen's *Die Verwandtschaft der jüd.-chr. mit der pars. Eschatologie* (1902), a very full, if somewhat uncritical, collection of parallels.

J. H. MOULTON.

ZOROBABEL.—See ZERUBBABEL.

ZORZELLEUS (B *Φαηζελδαῖος*, A *Ζορζέλλεος*, AV *Berzelus*), 1 Es 5^{38}. See BARZILLAI.—A daughter of his, named Augia, is mentioned as married to Addus, the ancestor of a priestly family, who could not trace their genealogy at the return under Zerubbabel. The same change of the initial letter occurs in the LXX of Ezr 2^{61} (B *Ζαρβελθεί*, A *Ζερβελλαί*; but in the same verse B *Βερζελλαεί*, A *-ί*).

ZUAR (צוּעָר).—Father of Nethanel the head of the tribe of Simeon, Nu 1^8 2^5 $7^{18.23}$ 10^{15} (all *Σωγάρ*).

ZUPH (צוּף).—**1.** An ancestor of Elkanah and Samuel, 1 S 1^1 (B *ἐν Νασεὶβ* [reading בנצוף for בן־צוף], A *Σούπ*, Luc. *Σώφ*), 1 Ch $6^{35\ (20)}$ (*Ḳĕrê*; the *Ḳĕthîbh* has צִיף **Ziph**; BA *Σούφ*, Luc. *Σουφί*), called in v.$^{26\ (11)}$ **Zophai.** 2. The land of Zuph (אֶרֶץ צוּף; B *ἡ Σείφ*, A *ἡ γῆ Σείφ*, Luc. *ἡ γῆ Σιφά*), 1 S 9^5, probably derived its name from having been originally settled by the family of Ẓuph (Driver, *Text of Sam.* 2). The gentilic name **Zuphite** (צוּפִי) probably underlies the name *Ramathaim-ẓophim* of 1 S 1^1 (see art. RAMAH, p. 198^a). Neither the *Sôba* of Robinson (*BRP*^{2} ii. 18 ff.) nor any other known site can be said to contain any certain trace of the name Ẓuph.

ZUR (צוּר 'rock').—**1.** A Midianite prince slain by the Israelites (Nu 31^8). His daughter COZBI was killed, along with the Simeonite ZIMRI, by Phinehas (25^{15}). In Jos 13^{21} he is described as one of the (allied or vassal) princes of Siḥon (נְסִיכֵי סִיחוֹן); but this note is due to a harmonizing redactor (see Dillm. *ad loc.*). 2. The name of a Gibeonite family settled at Jerusalem, 1 Ch 8^{30} (B and Luc. *Σούρ*, A *Ἰσούρ* [*i.e.* וְצוּר 'and Zur']), 9^{36} (BA *Ἰσείρ* [*i.e.* וצור], Luc. *Σούρ*).

ZURIEL (צוּרִיאֵל 'my rock is El').—A Merarite chief, Nu 3^{35} (*Σουριήλ*). On the precarious inferences which have been drawn by Hommel from the composition and meaning of this and the names *Ẓurishaddai*, *Pedahẓur*, and *Eliẓur*, see art. ROCK, p. 290.

ZURISHADDAI (צוּרִישַׁדָּי 'my rock is Shaddai *or* the Almighty').—Father of Shelumiel the chief of the tribe of Simeon, Nu 1^6 (B *Σουρεισαδαί*, AF *Σουρισαδαί*) 2^{12} BA *Σουρισαδαί*, F *Σουρισαδαεί*) $7^{36.\ 41}$ 10^{19} (LXX in all three *Σουρισαδαί*). On the name see reference under ZURIEL.

ZUZIM (הַזּוּזִים; LXX *ἔθνη ἰσχυρά*,—confusing with הָעִזִּים or עִזּוּזִים; Symm. *Ζοιζομμειν*; Pesh. עשינא (pl.) 'the mighty'; Vulg. *Zuzim*).—In Gn 14^5 one of the prehistoric peoples whom Chedorla'omer is said to have smitten on his expedition against the kings of the Pentapolis, described as resident in 'Hām' (which see), and mentioned between the 'Repha-im' of ASHTEROTH-KARNAIM (in Bashan) and the 'Emim' (Dt $2^{10f.}$) of the region occupied afterwards by Moab. The locality indicated corresponds to what was afterwards the territory of the Ammonites, which is said in Dt 2^{20} to have been occupied originally by the ZAMZUMMIM; and hence it has often been supposed that the two names were in some way or another different designations of the same people,—a scribal error having found its way into one of the two passages, or the old prehistoric name having become modified in form in the course of oral transmission. In Babylonian *m* and *w* are represented by the same characters; and hence Sayce (*HCM* 160 f.; *Expos. Times*, viii. 463) very ingeniously explained the difference by the conjecture that in Dt 2^{20} the name appears as it was actually pronounced,—or at least nearly so (*Zuzim* for *ZaWZĕWim*), while in Gn 14^5 it appears as it was written by a scribe who was translating from a Bab. document (*ZaMZĕMim*), and did not know what the true pronunciation was. However, before this theory can be accepted, better proof is needed than has hitherto been produced that Gn 14 was really translated from a Bab. original; the strongly Hebraic style and colouring of the chapter do not favour the supposition. Whether the name is in any way connected with that of *Ziza*, a place 10 m. S.E. of Ḥeshbon, and 20 m. S. of Rabbath-ammon, a military station in Roman times, mentioned also in the Middle Ages (see Dillm.), and still possessing remains of massive forts and other indications of its former importance (Tristram, *Moab*, 182–190), must be left an open question.

A
Dictionary of the Bible

EXTRA VOLUME

CONTAINING ARTICLES, INDEXES, AND MAPS

PREFACE

THIS EXTRA VOLUME of the DICTIONARY OF THE BIBLE contains thirty-seven Articles, six Indexes, and four Maps. A word will be sufficient on each of these parts of its Contents.

I. THE ARTICLES

Those who have kept in touch with the study of the Bible in recent years will understand why it has been found necessary to prepare an Extra Volume. Discoveries have been made which have an important bearing on the interpretation of both the Old Testament and the New. It is enough to name the three articles which stand first in the alphabetical list given below—AGRAPHA, APOCRYPHAL GOSPELS, and CODE OF ḪAMMURABI. A Dictionary of the Bible cannot ignore such discoveries. But they do not form part of the Contents of the Bible; nor do they deal directly with its Language or its Literature; so that they are not likely to be looked for in the alphabetical order of words in the Dictionary. The best way seemed to be to gather them into an Extra Volume.

Other articles will be found in this volume, for reasons which will be readily understood and appreciated. Some of them, like the article on the Sermon on the Mount, with which the volume opens, might have taken their place in the alphabetical order of the Dictionary. But they have not usually been so included, and it was felt that the Extra Volume would give more prominence to their special character and importance.

II. THE INDEXES

The Indexes have been prepared with great care. They are full, and yet it will be found that every item in them has been carefully selected and described.

The INDEX OF TEXTS contains all the passages of Scripture upon which there is any note of consequence in the Dictionary; and, again, the most important notes are distinguished by their authors' names. Further, it sometimes happens that a text is quoted in support or illustration of some argument: when such a quotation throws significant light upon the text itself, it is included in the Index.

The INDEX OF SUBJECTS contains the titles of all the articles in the Dictionary, including the Extra Volume. It also refers to a great many other topics which are dealt with in the course of the work. When the subject of an article comes up for treatment in other places, and a reference is made to these places, then the *first* reference in the Index is always to the article itself. Thus—ITHAMAR, ii. 519^a; i. 6^b; ii. 123^a; iv. 89^b—the second volume is mentioned before the first because in it falls the article under its own title; there is also some account of Ithamar in the article on Abiathar in vol. i. p. 6^b, as well as in the other places noted. When the article is of some length the name of the author is given. His name is not repeated under the same heading, so that references without a name attached are to be ascribed to the first author mentioned.

The *cross-references* in the Index of Subjects are always to other parts of the Index itself. Words which occur only in the Apocrypha are marked 'Ap.' or 'Apoc.': as Dabria (Ap.).

III. THE MAPS

The maps are intended to illustrate the articles on ROADS AND TRAVEL. These articles will be of great service to the student of either Testament, and the maps will add to the value of the articles. But they have been prepared so as to be complete maps of the countries they cover, the Roads which are marked on them being additional to the information which such maps usually contain. They have been prepared under the direct supervision of Professor Buhl (for the Old Testament) and Professor Ramsay (for the New), who have spared no pains to make them accurate and up to date.

And now the work on this Dictionary of the Bible is at an end. The Editor has been assisted by the same friends as before and with the same readiness, and he heartily thanks them all. He is also grateful for the way in which the four volumes already published have been received.

LIST OF ABBREVIATIONS

I. General

Alex. = Alexandrian.
Apoc. = Apocalypse.
Apocr. = Apocrypha.
Aq. = Aquila.
Arab. = Arabic.
Aram. = Aramaic.
Assyr. = Assyrian.
Bab. = Babylonian.
c. = *circa*, about.
Can. = Canaanite.
cf. = compare.
ct. = contrast.
D = Deuteronomist.
E = Elohist.
edd. = editions or editors.
Egyp. = Egyptian.
Eng. = English.
Eth. = Ethiopic.
f. = and following verse or page: as Ac $10^{34\text{f.}}$
ff. = and following verses or pages: as Mt $11^{28\text{ff.}}$
Gr. = Greek.
H = Law of Holiness.
Heb. = Hebrew.
Hel. = Hellenistic.
Hex. = Hexateuch.
Isr. = Israelite.
J = Jahwist.
J″ = Jehovah.
Jerus. = Jerusalem.
Jos. = Josephus.
LXX = Septuagint.
MSS = Manuscripts.
MT = Massoretic Text.
n. = note.
NT = New Testament.
Onk. = Onkelos.
OT = Old Testament.
P = Priestly Narrative.
Pal. = Palestine, Palestinian.
Pent. = Pentateuch.
Pers. = Persian.
Phil. = Philistine.
Phœn. = Phœnician.
Pr. Bk. = Prayer Book.
R = Redactor.
Rom. = Roman.
Sam. = Samaritan.
Sem. = Semitic.
Sept. = Septuagint.
Sin. = Sinaitic.
Symm. = Symmachus.
Syr. = Syriac.
Talm. = Talmud.
Targ. = Targum.
Theod. = Theodotion.
TR = Textus Receptus.
tr. = translate or translation.
VSS = Versions.
Vulg. = Vulgate.
WH = Westcott and Hort's text.

II. Books of the Bible

Old Testament.

Gn = Genesis.
Ex = Exodus.
Lv = Leviticus.
Nu = Numbers.
Dt = Deuteronomy.
Jos = Joshua.
Jg = Judges.
Ru = Ruth.
1 S, 2 S = 1 and 2 Samuel.
1 K, 2 K = 1 and 2 Kings.
1 Ch, 2 Ch = 1 and 2 Chronicles.
Ezr = Ezra.
Neh = Nehemiah.
Est = Esther.
Job.
Ps = Psalms.
Pr = Proverbs.
Ec = Ecclesiastes.
Ca = Canticles.
Is = Isaiah.
Jer = Jeremiah.
La = Lamentations.
Ezk = Ezekiel.
Dn = Daniel.
Hos = Hosea.
Jl = Joel.
Am = Amos.
Ob = Obadiah.
Jon = Jonah.
Mic = Micah.
Nah = Nahum.
Hab = Habakkuk.
Zeph = Zephaniah.
Hag = Haggai.
Zec = Zechariah.
Mal = Malachi.

Apocrypha.

1 Es, 2 Es = 1 and 2 Esdras.
To = Tobit.
Jth = Judith.
Ad. Est = Additions to Esther.
Wis = Wisdom.
Sir = Sirach or Ecclesiasticus.
Bar = Baruch.
Three = Song of the Three Children.
Sus = Susanna.
Bel = Bel and the Dragon.
Pr. Man = Prayer of Manasses.
1 Mac, 2 Mac = 1 and 2 Maccabees.

New Testament.

Mt = Matthew.
Mk = Mark.
Lk = Luke.
Jn = John.
Ac = Acts.
Ro = Romans.
1 Co, 2 Co = 1 and 2 Corinthians.
Gal = Galatians.
Eph = Ephesians.
Ph = Philippians.
Col = Colossians.
1 Th, 2 Th = 1 and 2 Thessalonians.
1 Ti, 2 Ti = 1 and 2 Timothy.
Tit = Titus.
Philem = Philemon.
He = Hebrews.
Ja = James.
1 P, 2 P = 1 and 2 Peter.
1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Jude.
Rev = Revelation.

III. English Versions

Wyc. = Wyclif's Bible (NT *c.* 1380, OT *c.* 1382, Purvey's Revision *c.* 1388).
Tind. = Tindale's NT 1526 and 1534, Pent. 1530.
Cov. = Coverdale's Bible 1535.
Matt. or Rog. = Matthew's (*i.e.* prob. Rogers') Bible 1537.
Cran. or Great = Cranmer's 'Great' Bible 1539.
Tav. = Taverner's Bible 1539.
Gen. = Geneva NT 1557, Bible 1560.
Bish. = Bishops' Bible 1568.
Tom. = Tomson's NT 1576.
Rhem. = Rhemish NT 1582.
Dou. = Douay OT 1609.
AV = Authorized Version 1611.
AVm = Authorized Version margin.
RV = Revised Version NT 1881, OT 1885.
RVm = Revised Version margin.
EV = Auth. and Rev. Versions.

IV. For the Literature

AHT = Ancient Hebrew Tradition.
AJSL = American Journal of Sem. Lang. and Literature.
AJTh = American Journal of Theology.
AT = Altes Testament.
BL = Bampton Lecture.
BM = British Museum.
BRP = Biblical Researches in Palestine.
CIG = Corpus Inscriptionum Græcarum.
CIL = Corpus Inscriptionum Latinarum.
CIS = Corpus Inscriptionum Semiticarum.
COT = Cuneiform Inscriptions and the OT.
DB = Dictionary of the Bible.
EHH = Early History of the Hebrews.
GAP = Geographie des alten Palästina.
GGA = Göttingische Gelehrte Anzeigen.
GGN = Nachrichten der königl. Gesellschaft der Wissenschaften zu Göttingen.
GJV = Geschichte des Jüdischen Volkes.
GVI = Geschichte des Volkes Israel.
HCM = Higher Criticism and the Monuments.
HE = Historia Ecclesiastica.
HGHL = Historical Geog. of Holy Land.
HI = History of Israel.
HJP = History of the Jewish People.
HPM = History, Prophecy, and the Monuments.
HPN = Hebrew Proper Names.
IJG = Israelitische und Jüdische Geschichte.
JBL = Journal of Biblical Literature.
JDTh = Jahrbücher für deutsche Theologie.
JQR = Jewish Quarterly Review.
JRAS = Journal of the Royal Asiatic Society.
JRL = Jewish Religious Life after the Exile.
JThSt = Journal of Theological Studies.
KAT = Die Keilinschriften und das Alte Test.
KGF = Keilinschriften u. Geschichtsforschung.
KIB = Keilinschriftliche Bibliothek.
LCBl = Literarisches Centralblatt.
LOT = Introd. to the Literature of the Old Test.
NHWB = Neuhebräisches Wörterbuch.
NTZG = Neutestamentliche Zeitgeschichte.
ON = Otium Norvicense.
OP = Origin of the Psalter.
OTJC = The Old Test. in the Jewish Church.
PB = Polychrome Bible.
PEF = Palestine Exploration Fund.
PEFSt = Quarterly Statement of the same.
PSBA = Proceedings of Soc. of Bibl. Archæology.
PRE = Real-Encyclopädie für protest. Theologie und Kirche.
QPB = Queen's Printers' Bible.
RB = Revue Biblique.
REJ = Revue des Études Juives.
RP = Records of the Past.
RS = Religion of the Semites.
SBOT = Sacred Books of Old Test.
SK = Studien und Kritiken.
SP = Sinai and Palestine.
SWP = Memoirs of the Survey of W. Palestine.
ThL or *ThLZ* = Theol. Literaturzeitung.
ThT = Theol. Tijdschrift.
TS = Texts and Studies.
TSBA = Transactions of Soc. of Bibl. Archæology.
TU = Texte und Untersuchungen.
WAI = Western Asiatic Inscriptions.
WZKM = Wiener Zeitschrift für Kunde des Morgenlandes.
ZA = Zeitschrift für Assyriologie.
ZAW or *ZATW* = Zeitschrift für die Alttest. Wissenschaft.
ZDMG = Zeitschrift der Deutschen Morgenländischen Gesellschaft.
ZDPV = Zeitschrift des Deutschen Palästina-Vereins.
ZKSF = Zeitschrift für Keilschriftforschung.
ZKW = Zeitschrift für kirchliche Wissenschaft.
ZNTW = Zeitschrift für die Neutest. Wissenschaft.

A small superior number designates the particular edition of the work referred to: as *KAT*^{2}, *LOT*^{6}.

DICTIONARY OF THE BIBLE

EXTRA VOLUME

SERMON ON THE MOUNT.—

- i. Origin and Transmission.
  - 1. Historicity of the Discourse.
  - 2. Circumstances of its Delivery.
  - 3. Transmission and Translation.
  - 4. Relative Authenticity of the two Accounts.
  - 5. Present State of the Text.
- ii. Interpretation.
  - 1. Popular, Gnomic, and Figurative Style.
  - 2. Effect of the Translation into Greek.
  - 3. Theme of the Discourse and its Development.
  - 4. The Chief Problems of Interpretation.
    - *a.* The Beatitudes.
    - *b.* The World Mission.
    - *c.* Relation to the Old Testament.
    - *d.* Inner Righteousness.
    - *e.* Unselfishness and Forgiveness.
    - *f.* Universal Love.
    - *g.* Religious Worship.
    - *h.* The Lord's Prayer.
    - *i.* Devotion to the Kingdom.
    - *j.* The Treatment of Others.
    - *k.* The Duty of Righteousness.
  - 5. The Relation of the Sermon on the Mount to the Teaching of Jesus as a whole.
- Literature.

The message of Jesus to men contained in the Sermon on the Mount can be essentially understood, and is valid and useful, apart from the historical, literary, and exegetical questions concerning it which are now receiving so much attention, and which tend to overshadow the real significance and power of His teaching. There are problems still unsolved regarding the origin and transmission of the discourse, problems also regarding the interpretation and application of some of its utterances; but the truth, the preaching, and the living of the Gospel have not to wait upon the results of such investigations. The words of Jesus in this Sermon present an ideal of human life, founded upon religious truth and ethical principles, which has been and is intuitively recognized as the highest standard of life yet conceived, or even as the ultimate standard to which mankind can and must attain. They need not so much to be explained by men as to be appreciated, accepted, and lived by them. A sufficient understanding of the Sermon was not meant to be the possession of the few only. In this teaching Jesus aimed at being universally intelligible; and He was so, for through the Christian centuries the kind of life which He here describes has been the guiding star of civilization. If misconceptions as to the origin and interpretation of the discourse have at times arisen, out of imperfect historical knowledge and limited ethical and spiritual insight, these will gradually disappear before a better knowledge and a clearer vision.

i. *ORIGIN AND TRANSMISSION.*—The historical and literary criticism of the Gospels, which has attracted the labours of many eminent scholars in the past three generations, is by no means finished. Yet some important conclusions have been reached regarding the origin and preservation of the NT records of Jesus' life. To this field of investigation belong the introductory questions concerning the Sermon on the Mount. Was there, in fact, such a discourse? If so, what were the circumstances of its delivery? How were the accounts of the discourse affected by the processes of transmission and translation? And what is the condition of the text of the discourse as we now have it?

1. HISTORICITY OF THE DISCOURSE.—It is the prevailing opinion among NT scholars that in Mt 5–7 we have an account of a discourse actually delivered by Jesus, the theme and substance of which are here preserved.* It is entirely consistent with this view, and is by the majority held in conjunction with it, that the account as it stands in the First Gospel is not coextensive with the discourse originally given by Jesus. Probably not all of the Sermon is contained in Matthew's report, but only excerpts or a digest; for there is no reason to think that means were at hand for reporting the discourse *verbatim* and entire; Jesus seems not to have cared that His discourses should be so preserved; He was accustomed to teach the people *at length* when a multitude was with Him,† while the matter given in Matthew could easily be spoken in twenty minutes; and one would think it faulty pedagogical method to present a series of striking sayings, full of meaning and difficult for the hearers offhand to grasp, without connecting with each germinal saying a more explicit and concrete teaching to illustrate and apply it.

Conversely also, the Matthæan report of the Sermon probably contains some matter which did not form a part of the original discourse. Certain sections of Mt 5–7 are less evidently connected than the others with the specific theme of the Sermon and its development, *e.g.* $5^{25.\,26.\,31.\,32}$ $6^{7\text{-}15}$ $7^{6.\,7\text{-}11.\,22\text{f.}}$. With regard to these and other passages the possibility of their belonging to the actual Sermon cannot be denied, but the probability is felt by most scholars to be against some or all of them. This view is strongly confirmed by the fact that we find parallels to these sections elsewhere in the Gospels, in other settings which in some cases commend themselves as original. It is difficult to conceive that Luke, or any one else, would break up a discourse of Jesus which had been handed down so fully as in Mt 5–7 and scatter the fragments as in the Third Gospel.[*] And, finally, it has become recognized that the First Gospel arranges its teaching material into topical groups;[†] all of the four Gospels exhibit the results of this process, but the First Gospel more than the others.

---

* So Origen, Augustine, Chrysostom, Luther, Tholuck, Meyer, Keim, Achelis, Edersheim, Godet, Bruce, Broadus, Kübel, Nösgen, Feine, Steinmeyer, Wendt, Sanday, Plummer, B. Weiss, H. Weiss, Grawert, Burkitt, Bartlet, Bacon, and many others.

† See Mk $4^{1f. 33}$ $6^{34f.}$

There have been, and are to-day, a number of eminent scholars who regard the Sermon as a compilation throughout, holding that no such discourse was really delivered by Jesus, and that the alleged occasion of it was a well-meant fiction of tradition or of the Evangelists.[*] According to this hypothesis, the material grouped under the title of a mountain discourse to His disciples came from various occasions in the ministry which were no longer remembered. The compilation was made for the practical use of the early Christians, to furnish them with a manual of Christian conduct.[†] But this is to press the theory of compilation to an extreme. It is not an impossible view, and would not entail serious consequences, since it does not deny the authenticity of the sayings; but it must be counted less probable. The examination of the great teaching masses in Matthew seems to show that the briefer sayings were generally grouped with the historical remains of some great discourses, whose approximate position in the ministry and whose circumstances were not wholly forgotten. The main portion of the Sermon, contained in Mt 5^{3}–6^{18}, is (with the exception of certain verses) so closely woven as theme and exposition that it cannot well be denied historical unity and occasion. Jesus must logically have given such teaching as the Sermon presents, in the earlier Galilæan ministry to which the Gospels assign this teaching; and we know that He was accustomed to speak long and connectedly to His hearers. It is therefore probable enough that at least this much of a digest of one of Jesus' most important and impressive discourses should have been preserved.

2. CIRCUMSTANCES OF ITS DELIVERY.—The occasion on which the Sermon was given appears to be clearly indicated by Lk $6^{12\text{-}20}$, which makes it follow closely upon the appointment of the twelve apostles.[‡] The Gospel of Matthew agrees with that of Luke in locating the Sermon on the Mount in the first half of Jesus' ministry in Galilee, although Matthew places it somewhat nearer to the beginning of that period.[§] There is good

---

[*] See Heinrici, *Bergpredigt*, i. 49 f. It is obviously true that Jesus taught the same truths and principles on various occasions to different individuals, and in doing so may have at times repeated some of His sayings in quite the same, or nearly the same, words. Such repetition may *sometimes* serve to explain the several forms in which similar sayings have been handed down. But it cannot be used as a universal resolvent of the mass of variations. This stock argument of the apologetic harmonists proceeds upon the assumption that Jesus' words *must* have been transmitted in every case precisely as He uttered them. But the assumption is unwarranted, and the phenomena of variation abundantly and decisively disprove it. Nearly all NT scholars now agree that the differences which appear in parallel passages of our Gospels are due chiefly to the vicissitudes of transmission and translation. The Gospel teaching did not consist of a set of formulæ, to be learned and repeated *verbatim.*

[†] See Godet, *Collection of the Four Gospels, and the Gospel of Matthew*, p. 131 ff.; Wendt, *Lehre Jesu*, i. 52, 84, 106, 185; Wernle, *Synopt. Frage*, pp. 61–80; Weizsäcker, *Apost. Zeitalter*^{2}, pp. 369–393 [Eng. tr. ii. 33–62]; Jülicher, *Einleitung i. d. NT*, p. 195: Heinrici, *Bergpredigt*, i. 8 f.; B. Weiss, *Meyer-Komm. ü. d. Mattevgm. in loc.*; H. Holtzmann, *Hand-Comm. ü. d. Synoptiker, in loc.* The discourses of Mt 5–7. 10. 13. 18. 23. 24. 25 are compilations in the sense that to the historical nucleus of each discourse there has been joined some matter upon the same or a kindred subject which originally belonged to other historical connexions. Thus Mt 10 contains as a nucleus some instruction which Jesus gave the Twelve when He sent them out on their trial mission ($10^{5\text{-}15}$); but to this section there has been added material from another occasion ($10^{16\text{-}42}$, esp. $^{17\text{-}23}$), when Jesus in the latter part of His ministry was preparing His disciples for the work they must do after His departure. The first Christians found it practically convenient to have the mission teaching grouped together. Mt 13 contains a collection of Jesus' parables upon the nature and development of the kingdom of God. The collection is not found in the corresponding passages Mk 4 and Lk 8. It is quite unlikely that Jesus would make up a discourse of these seven parables (Mt $13^{1\text{-}9.\,24\text{-}30.\,31\text{f.}\,33.\,44.\,45\text{f.}\,47\text{-}50}$). If the disciples did not understand the first parable until it was explained to them privately (Mk 4^{10}), it would be of little use to add six others no more intelligible. But the chapter itself, by the two breaks at v.^{10} and vv.$^{34\text{-}36}$, shows that it is a compilation; vv.$^{3.\,53}$, which *seem* to make all that intervenes a connected discourse, is the editorial device for giving unity and vividness to the teaching. It is probable that the parable of the Sower was given on some occasion (vv.$^{1\text{-}3}$) in Jesus' Galilæan ministry, accompanied by explicit teaching along the same line. On other occasions the other parables were given: then, their original setting having been lost, all seven were topically grouped by the early Christians for practical instruction. Mt 18 contains a collection of teachings from various occasions, grouped about the nucleus of an original discourse (cf. Mk $9^{33\text{-}50}$) concerning the relations and duties of the Twelve and the community life of the first disciples. Mt 23 is a collection of sayings from different parts of the ministry (cf. Mk $12^{38\text{-}40}$, Lk $11^{37\text{-}52}$ $13^{34\text{f.}}$ $20^{45\text{-}47}$), in which Jesus condemned certain acts and characteristics of the Pharisees. The nucleus is apparently in vv.$^{1\text{-}12}$; seven woes (the complete number) are here grouped together as were the seven parables of ch. 13. Mt 24 exhibits the same topical arrangement of material (cf. Lk $12^{39\text{-}46}$ $17^{22\text{-}37}$ 21). And in Mt 21. 22 and 25 appear similar compilations of related teaching. It is probable that the author of the present Gospel of Matthew found this material grouped in this way, although he may bave carried the process farther, and have unified these groups by editorial retouching. If, then, the First Gospel has several discourses, consisting in each case of the nucleus of some original sermon augmented by kindred material from other occasions, it becomes quite probable that the discourse in Mt 5–7 is of a similar construction. The added matter is just as valuable and trustworthy as the nucleus matter, being equally the authentic utterances of Jesus.

[*] So Calvin, Baur, Neander, Bleek, Pott, Semler, Strauss, Kuinöl, Wieseler, H. Holtzmann, Weizsäcker, Jülicher, Heinrici, Ibbeken, Hawkins, Schmiedel.

[†] Weizsäcker, *Apost. Zeitalter*^{2} (1892), p. 380 f. [Eng. tr. ii. 46 f.]: 'The discourse, as Matthew has adopted it, was in fact a kind of code, but such as originated in and was designed for the Church. . . . The nucleus consists of a few long main sections, $5^{21\text{-}48}$ $6^{1\text{-}18.\,19\text{-}34}$. . . . The commandments in these three sections together form a sort of primer, which was, however, first composed by the combination of these didactic pieces, whose original independence is at once apparent from the parallel sections of Luke's Gospel. . . . The evangelist put on an introduction, $5^{3\text{-}12.\,13\text{-}16}$, and an appendix, $7^{1\text{-}29}$, to fit the whole to the historical situation which he gave it.' H. Holtzmann, *Hand-Comm. ü. d. Synoptiker*, p. 99: 'Probably the discourse was constructed by the evangelist himself out of written and oral sources, with the primary purpose of furnishing an order of life for the new Church.' Heinrici, *Bergpredigt*, i. 39: 'The Sermon on the Mount of Matthew seems to be a free composition of a speech of Jesus from certain genuine sayings of His, which were in part already grouped together, in part in circulation as single sayings.' Similarly Jülicher, *Einleitung i. d. NT*^{3} (1901), p. 232; Hawkins, *Horæ Synopticæ* (1899), pp. 131–135; Schmiedel, *Encyc. Bibl.* vol. ii. col. 1886.

[‡] The corresponding passage in Mark is $3^{13\text{-}19}$, but the Sermon is not found at that point nor elsewhere in the Second Gospel. There is no indication at Mk 3^{19} that a discourse followed historically.

[§] Too much has often been made of the difference between Matthew and Luke regarding the position to which the Sermon is assigned by each. Matthew places after the Sermon, in chs. 8. 9. $12^{1\text{-}21}$, some matter which Luke places before the Sermon in 4^{31}–6^{11}; but this section contains only incidents, miracles, and brief teachings, which, even if they are all in their proper places in Luke (and Mark, which corresponds), would not require more than a few weeks of time. Matthew does not record the appointment of the Twelve, but first mentions them as apostles in ch. 10 in connexion with their mission. Nor does Matthew represent the Sermon as Jesus' *first* teaching, since he distinctly relates before the discourse ($4^{23\text{f.}}$) that 'Jesus went about in all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of disease and all manner of sickness among the people. And the report of him went forth into all Syria' (*i.e.* throughout Jewish territory). The earlier work and teaching are compressed rather than ignored, and the words are given more prominence than the deeds. A compilation of representative teaching by Jesus in chs. 5–7 is followed by a compilation of representative deeds of Jesus in chs. 8. 9.

reason to think that they are sufficiently correct. The contents of the discourse, as clearly as its position in the Gospels, mark it as a part of His Galilæan teaching,—not, indeed, the first instruction Jesus gave, but of the kind fitted for receptive hearers who had gained some acquaintance with Him, and had by skilful preparation on His part become ready for a general presentation of His religio-ethical ideas. To find Jesus giving one of His most significant discourses in connexion with the appointment of the twelve apostles is altogether what one might expect. That appointment was a great event in His ministry. It marked the stage when His popular success required Him to choose and train some men to assist Him in His work (Mk 3^{14}); and it behoved Him also, since the storm of opposition was gathering on the horizon (Mk 2^{1}–3^{6}, cf. Mt 23^{29-39}), to prepare these men to carry forward His work after He should lay down His life at Jerusalem.

The Sermon is not, however, addressed exclusively or specifically to the newly-appointed apostles. It contains no trace of esoteric teaching. There is no portion of the discourse which does not pertain equally to all of Jesus' followers, present and future. The internal evidence of the Sermon, therefore, sustains the correctness of the Evangelists' statements (Mt $7^{28.\,29}$, Lk 7^{1}) that Jesus spoke directly and inclusively to the people who thronged Him at this time.* The multitude was a *disciple* multitude in the sense that many were professed followers of Jesus, many were contemplating discipleship, and all were favourably disposed towards Him, listening with interest to His teaching. The Sermon contains no direct polemic against opponents, but an appeal to all to adopt and to attain a higher type of righteousness than that which was conventionally taught them by the scribes.

The exact time, *i.e.* the year, month, and day, at which the Sermon was given cannot be determined. There is no agreement among scholars as to either the duration or the calendar dates of Jesus' public ministry.† But on any chronological hypothesis the discourse stands about half-way between the beginning of Jesus' public work and His crucifixion.

The Sermon was spoken in Galilee, the scene of the main ministry of Jesus (cf. Mt 4^{23-25}, Lk 6^{17}). If there is an indication in Mt 8^{5}, Lk 7^{1} that the place of the event was near Capernaum, the precise locality would not even then be defined, since the site of Capernaum itself is in dispute. The mountain referred to in Mt 5^{1} 8^{1}, Lk 6^{12} is not named and cannot be identified.‡ We may suppose, however, that the scene of the Sermon was in the region to the west of the lake, not far distant from the thickly-populated shore.

3. Transmission and Translation.—We seem to have in Mt 5–7, Lk 6^{20-49} two accounts of the Sermon; they differ somewhat in setting, verbal expression, and content, but are nevertheless essentially one discourse.* Both Gospels assign the Sermon to the earlier Galilæan ministry. The circumstances of the discourse are similar—the mountain, the representative multitude, the healings, the address to disciples. The theme of the discourse is the same in each—the true righteousness. The development of the theme is similar—a characterization of this righteousness, with specific teaching as to how it is to affect thought and conduct, and an exhortation to men to live in this way. Each account begins with the Beatitudes, and closes with the injunction to *do* God's will as revealed in Jesus' teaching, enforced by the parable of the Two House-builders. And, finally, nearly the whole of Luke's discourse is contained in Matthew's.

---

* That the discourse was addressed to the multitude is the view of Achelis, Bleek, Bruce, Godet, Meyer, Nösgen, and others. That it was addressed to close disciples, but overheard by the multitude to whom it did not directly pertain, is held by Tholuck, B. Weiss, Grawert, and others. Burton and Bacon maintain that the discourse was spoken only to an inner circle of followers. But these hypotheses presuppose a sharper line between disciples (Mt 5^{1}, Lk 6^{20}) and general followers of Jesus than Jesus Himself indicates in the Sermon, or than can otherwise be made out at this stage of the public ministry. The use of the second personal form by Luke cannot be adduced as evidence that Jesus was speaking only to a close circle of disciples; it was equally applicable to a large company. Matthew's account also has the second personal form after 5^{3-10}. Yet both Evangelists have statements (Mt 5^{1} 7^{28}, Lk 6^{19} 7^{1}) to the effect that Jesus addressed His teaching to the multitudes at this time; and it is not clear that these statements are mere literary features, without historical value. The discourse contains positively nothing to indicate that Jesus was speaking only to a small, inner circle of His followers.

† See artt. Chronology of NT, vol. i., and Jesus Christ, vol. ii.; also art. 'Chronology of NT' in *Encyclopædia Biblica*, vol. i.; and Literature cited in connexion.

‡ Four views are now current concerning this 'mountain': (1) Latin tradition identifies it with *Karn Ḥaṭṭîn*; the theory is accepted by Stanley (*SP* p. 368 f.), and also by Plummer and H. Weiss. This Latin tradition did not arise until the 13th cent., and is quite unknown to the Eastern Church, so that it cannot have been more than a plausible guess. The location and features of *Karn Ḥaṭṭîn* correspond sufficiently well with the history; but there are a number of other hills along the western shore of the lake which are also suitable (Robinson, *BRP* iii. 487). (2) Some specific mountain is referred to, and was known to the early Christians as the scene of the discourse, but its identity became lost from the Gospel tradition. So Tholuck, Meyer, Keil, Kübel, Achelis, Andrews. (3) The phrase τὸ ὄρος designates not a particular hill or mountain peak, but the range of tableland rising to the west of the Sea of Galilee; and the site of the event is not more specifically designated. The Jews used three leading terms to distinguish the surface features of their territory—'mountain,' 'plain,' and 'valley': of these designations the first is understood to have referred to the tableland, whether broken into isolated peaks or not (cf. Gn $19^{17.\,19.\,30}$ $31^{23.\,25}$ $36^{8.\,9}$, Mt 14^{23} 15^{29}, Mk 6^{46}, Lk 9^{28}, Jn 6^{3}). Therefore τὸ ὄρος would in any particular instance refer to the high land—whether tableland or peak—in the vicinity of the event. This view also leaves the site of the Sermon undetermined. So Bleek, Robinson, Ebrard, Thomson, Edersheim, Broadus, Bruce, Nösgen, Stewart, B. Weiss, Bacon. (4) Those who regard the Sermon as a mosaic only, resting upon no particular discourse, but made up of material gathered from many connexions (see names in footnote above), perforce look upon 'the mountain' as a part of the artificial scenery which the compiler of the Sermon arranged about it to give verisimilitude to the whole. Of these four views one may adopt the second or the third, but between these two it is difficult to choose.

The accounts in Mt 5^{1} 8^{1}, Lk $6^{12.\,17}$, which describe the setting of the Sermon, both make mention of the mountain, but are not in agreement concerning it. Matthew locates the entire scene upon the mountain; Jesus and His disciples ascend it, apparently by His deliberate choice, to speak and to hear the Sermon; when it is finished they descend. According to the Third Gospel, Jesus goes up the mountain to spend the night in solitary prayer (cf. Lk 9^{28}, Jn $6^{3.\,15}$); when it is day He calls His disciples to Him, and appoints the Twelve; afterwards He comes down from the mountain to the multitude which had gathered on a level place below, where He heals many, and later delivers the discourse. The well-meant harmonistic efforts expended upon these passages do not seem convincing. But the discrepancy is neither sufficient to remove the datum of a mountain in connexion with the discourse, nor, in face of strong evidence for their identity, to force the conclusion that the reports of Matthew and Luke represent two separate and distinct discourses with different settings.

* This is the almost unanimous opinion of scholars: Tatian (*Diatessaron*), Origen, Jerome, Chrysostom, Euthymius, Theophylact, Luther, Calvin, Maldonatus, Meyer, Bengel, Neander, Schleiermacher, Stier, Ewald, Wieseler, Keim, Keil, Köstlin, Robinson, Ellicott, Schneckenburger, Hilgenfeld, Edersheim, Godet, Tholuck, Tischendorf, Achelis, Andrews, Beyschlag, Broadus, Farrar, Feine, Schanz, Sanday, Steinmeyer, Sieffert, de Wette, Wendt, H. Weiss, B. Weiss, Bruce, Burton, Heinrici, H. Holtzmann, Ibbeken, Jülicher, Kübel, Nösgen, Wernle, Bacon, and many others. The theory of two separate discourses was advocated for apologetic purposes by Augustine, and, following him, by St. Gregory and certain minor Rom. Cath. writers, as, recently, Azibert (*Revue Biblique*, 1894). A few modern Protestant writers also have taken this view, as Greswell, Lange, Plumptre, and, most recently, Plummer (*Comm. on Luke* [1896], p. 177).

The arrangement of the material in Tatian's *Diatessaron* (see Hill, *Earliest Life of Christ, being the Diatessaron of Tatian* [1894], pp. 73–84), which combines the Matthew and Luke accounts, is thus: Mt 5^{1a} Lk 6^{13b-17} [Mk $3^{14.\,15}$] Mt 5^{2} = Lk 6^{20a} Mt 5^{3-10} Lk 6^{22a} Mt $5^{11b.\,12}$ Lk 6^{24-27a} Mt 5^{14-16} [Mk $4^{22.\,23}$] Mt 5^{17-25a} [Lk 12^{58b}] Mt 5^{25c-42} Lk $6^{30b.\,31}$ Mt 5^{43-46a} Lk 6^{32b-36} Mt $5^{47.\,48}$ Mt 6^{1-8} [Lk $11^{1b.\,2a}$] Mt 6^{9b-18} [Lk $12^{32.\,33a}$] Mt 6^{19-23} [Lk $11^{35.\,36}$] Mt 6^{24-27} [Lk 12^{26}] Mt 6^{28b-31} [Lk 12^{29b}] Mt 6^{32-34} Mt 7^{1} = Lk 6^{37b} Lk 6^{38} [Mk $4^{24b.\,25}$] Lk 6^{39-42} Mt 7^{6} [Lk 11^{5-13}] Mt 7^{12-16a} Lk 6^{44} Mt $7^{17.\,18}$ Lk 6^{45} Mt 7^{19-23} Lk $6^{47.\,48a}$ Mt 7^{25}–8^{1}.

The relation of the contents of the two accounts can be shown in a table :—

Mt 5^{3}	=Lk 6^{20}	Mt $7^{1.\,2}$	=Lk $6^{37.\,38b}$
$5^{4.\,6}$	= 6^{21}	7^{3-5}	= $6^{41.\,42}$
$5^{11.\,12}$	= $6^{22.\,23}$	7^{12}	= 6^{31}
$5^{39.\,40.\,42}$	= $6^{29.\,30}$	$7^{16.\,17}$	= $6^{43.\,44}$
5^{44-48}	= $6^{27.\,28.\,32-36}$	7^{21}	= 6^{46}
6^{1-34} has no parallel in Lk 6^{20-49}		7^{24-27}	= 6^{47-49}

Matthew's account has 107 verses, Luke's account 29. Of Luke's 29 verses, 23½ find a parallel in the Matthæan account, where they are arranged as 26 verses. There is no parallel in Mt 5–7 for Lk $6^{24-26.\,38a.\,39.\,40.\,45}$.[*] Of Matthew's remaining 81 verses, 34 find a parallel in Luke outside of ch. 6 (in chs. 11–14. 16)[†] as follows :[‡]—

Mt 5^{13}	=Lk $14^{34.\,35}$	Mt $6^{22.\,23}$	=Lk 11^{34-36}
5^{15}	= 11^{33} (8^{16})	6^{24}	= 16^{13}
5^{18}	= 16^{17}	6^{25-33}	= 12^{22-31}
$5^{25.\,26}$	= $12^{58.\,59}$	7^{7-11}	= 11^{9-13}
5^{32}	= 16^{18}	$7^{13.\,14}$	= 13^{24}
6^{9-13}	= 11^{2-4}	7^{23}	= 13^{27}
6^{19-21}	= $12^{33.\,34}$		

This leaves 47 verses of the Matthæan discourse which have no parallel in the Third Gospel: Mt $5^{5.\,7-10.\,14.\,16.\,17.\,19-24.\,27-31.\,33-38.\,41.\,43}$ $6^{1-8.\,14-18.\,34}$ $7^{6.\,15.\,18-20.\,22}$. That is, four-ninths of the Sermon in Matthew is peculiar to that Gospel.[§]

These phenomena of the comparative contents of the two accounts of the Sermon present a complex and difficult problem, and compel one to investigate the history of this discourse from the time of its utterance until it took its present twofold form in our First and Third Gospels.

Another important feature of these two reports of the Sermon, and one which must be investigated in conjunction with the problem of content, is the remarkable variation in wording—in the literary expression of the same ideas. Sometimes this variation is slight, as in :[‖]—

Mt 7^{2b}.	Lk 6^{38b}.
καὶ ἐν ᾧ μέτρῳ μετρεῖτε μετρηθήσεται ὑμῖν.	*ᾧ γὰρ μέτρῳ μετρεῖτε ἀντιμετρηθήσεται ὑμῖν.*

Mt 7^{3-5}.	Lk $6^{41.\,42}$.
[3] *τί δὲ βλέπεις τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου, τὴν δὲ ἐν τῷ σῷ ὀφθαλμῷ δοκὸν οὐ κατανοεῖς;* [4] *ἢ πῶς ἐρεῖς τῷ ἀδελφῷ σου Ἄφες ἐκβάλω τὸ κάρφος ἐκ τοῦ ὀφθαλμοῦ σου, καὶ ἰδοὺ ἡ δοκὸς ἐν τῷ ὀφθαλμῷ σοῦ;* [5] *ὑποκριτά, ἔκβαλε πρῶτον ἐκ τοῦ ὀφθαλμοῦ σοῦ τὴν δοκόν, καὶ τότε διαβλέψεις ἐκβαλεῖν τὸ κάρφος ἐκ τοῦ ὀφθαλμοῦ τοῦ ἀδελφοῦ σου.*	[41] *τί δὲ βλέπεις τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου, τὴν δὲ δοκὸν τὴν ἐν τῷ ἰδίῳ ὀφθαλμῷ οὐ κατανοεῖς;* [42] *πῶς δύνασαι λέγειν τῷ ἀδελφῷ σου Ἀδελφέ, ἄφες ἐκβάλω τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ σου, αὐτὸς τὴν ἐν τῷ ὀφθαλμῷ σοῦ δοκὸν οὐ βλέπων; ὑποκριτά, ἔκβαλε πρῶτον τὴν δοκὸν ἐκ τοῦ ὀφθαλμοῦ σοῦ, καὶ τότε διαβλέψεις τὸ κάρφος τὸ ἐν τῷ ὀφθαλμῷ τοῦ ἀδελφοῦ σου ἐκβαλεῖν.*

Similarly compare Mt 6^{24}=Lk 16^{13} and Mt $7^{7.\,8}$=Lk $11^{9.\,10}$. In these four passages there is almost complete verbal agreement—not quite, however—which must be explained. And the four sayings are widely scattered in Luke as compared with Matthew.

But such close verbal agreement is exceptional. In all the other parallel passages the variation in literary form is great, as in :—

Mt $5^{39.\,40}$.	Lk 6^{29}.
[39] *Ἐγὼ δὲ λέγω ὑμῖν μὴ ἀντιστῆναι τῷ πονηρῷ· ἀλλ' ὅστις σε ῥαπίζει εἰς τὴν δεξιὰν σιαγόνα [σου], στρέψον αὐτῷ καὶ τὴν ἄλλην·* [40] *καὶ τῷ θέλοντί σοι κριθῆναι καὶ τὸν χιτῶνά σου λαβεῖν, ἄφες αὐτῷ καὶ τὸ ἱμάτιον.*	*τῷ τύπτοντί σε ἐπὶ τὴν σιαγόνα πάρεχε καὶ τὴν ἄλλην, καὶ ἀπὸ τοῦ αἴροντός σου τὸ ἱμάτιον καὶ τὸν χιτῶνα μὴ κωλύσῃς.*

Mt 7^{12}.	Lk 6^{31}.
Πάντα οὖν ὅσα ἐὰν θέλητε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, οὕτως καὶ ὑμεῖς ποιεῖτε αὐτοῖς· οὕτως γάρ ἐστιν ὁ νόμος καὶ οἱ προφῆται.	*καὶ καθὼς θέλετε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, ποιεῖτε αὐτοῖς ὁμοίως.*

Mt 7^{24-27}.	Lk 6^{47-49}.
[24] *Πᾶς οὖν ὅστις ἀκούει μου τοὺς λόγους [τούτους] καὶ ποιεῖ αὐτούς, ὁμοιωθήσεται ἀνδρὶ φρονίμῳ, ὅστις ᾠκοδόμησεν αὐτοῦ τὴν οἰκίαν ἐπὶ τὴν πέτραν.* [25] *καὶ κατέβη ἡ βροχὴ καὶ ἦλθαν οἱ ποταμοὶ καὶ ἔπνευσαν οἱ ἄνεμοι καὶ προσέπεσαν τῇ οἰκίᾳ ἐκείνῃ, καὶ οὐκ ἔπεσεν, τεθεμελίωτο γὰρ ἐπὶ τὴν πέτραν.* [26] *καὶ πᾶς ὁ ἀκούων μου τοὺς λόγους τούτους καὶ μὴ ποιῶν αὐτοὺς ὁμοιωθήσεται ἀνδρὶ μωρῷ, ὅστις ᾠκοδόμησεν αὐτοῦ τὴν οἰκίαν ἐπὶ τὴν ἄμμον.* [27] *καὶ κατέβη ἡ βροχὴ καὶ ἦλθαν οἱ ποταμοὶ καὶ ἔπνευσαν οἱ ἄνεμοι καὶ προσέκοψαν τῇ οἰκίᾳ ἐκείνῃ, καὶ ἔπεσεν, καὶ ἦν ἡ πτῶσις αὐτῆς μεγάλη.*	[47] *Πᾶς ὁ ἐρχόμενος πρός με καὶ ἀκούων μου τῶν λόγων καὶ ποιῶν αὐτούς, ὑποδείξω ὑμῖν τίνι ἐστὶν ὅμοιος·* [48] *ὅμοιός ἐστιν ἀνθρώπῳ οἰκοδομοῦντι οἰκίαν, ὃς ἔσκαψεν καὶ ἐβάθυνεν καὶ ἔθηκεν θεμέλιον ἐπὶ τὴν πέτραν· πλημμύρης δὲ γενομένης προσέρηξεν ὁ ποταμὸς τῇ οἰκίᾳ ἐκείνῃ, καὶ οὐκ ἴσχυσεν σαλεῦσαι αὐτὴν διὰ τὸ καλῶς οἰκοδομῆσθαι αὐτήν.* [49] *ὁ δὲ ἀκούσας καὶ μὴ ποιήσας ὅμοιός ἐστιν ἀνθρώπῳ οἰκοδομήσαντι οἰκίαν ἐπὶ τὴν γῆν χωρὶς θεμελίου, ᾗ προσέρηξεν ὁ ποταμός, καὶ εὐθὺς συνέπεσεν, καὶ ἐγένετο τὸ ῥῆγμα τῆς οἰκίας ἐκείνης μέγα.*

Similarly compare Mt $5^{44.\,45}$ = Lk 6^{35}, Mt $7^{1.\,2a}$ = Lk 6^{37}, Mt $7^{16.\,17}$ = Lk $6^{43.\,44}$; and also Mt 5^{15}=Lk 11^{33}, Mt 5^{18} = Lk 16^{17}, Mt $5^{25.\,26}$ = Lk $12^{58.\,59}$, Mt 6^{19-21} = Lk $12^{33.\,34}$, Mt 6^{25-33} = Lk 12^{22-31}.

In some passages the wording of Matthew is so different from that of Luke that a difference even of the thought results, or seems to result:—

---

[*] But there are parallels for two or three of these passages elsewhere in Matthew, thus: Lk 6^{39}=Mt 15^{14b}, Lk 6^{45}=Mt 12^{35}; and with Lk 6^{40a} compare Mt 10^{24} (Jn 13^{16} 15^{20a}).

[†] These chapters belong to the somewhat clearly marked middle third of Luke's Gospel (10^{25}–18^{34}), which consists mainly of discourse material. It is commonly known as the 'Peræan section,' because its position in this book is between the final departure of Jesus from Galilee (Lk 9^{51}–10^{20}) and His public entrance into Jerusalem (Lk 18^{35}–19^{46}). During this period Jesus perhaps spent some days or weeks in Peræa (Mt 19^{1}=Mk 10^{1}, Lk 13^{31}, Jn 10^{40}), and some of the material in Lk 10–18 may belong to that period, as $12^{1-12.\,35-59}$ $13^{1-9.\,22-30.\,31-35}$ 17^{20-37} 18^{1-8}. But the main contents of these chapters (Lk 11^{1-36} 12^{13-34} 13^{10-21} 14. 15. 16. 17^{1-10} 18^{9-34}) quite surely belong to the Galilæan ministry, because (1) this is indicated by various allusions in the chapters themselves, *e.g.* 11^{29-32} (cf. Mt 12^{39-42}), $13^{10.\,17.\,18-21}$ (cf. Mt $13^{31.\,32}$), 14^{25-35}; (2) the subject of most of this teaching is more suitable to that period; (3) it is altogether unlikely that Jesus would have left so large and so important a portion of His general teaching till the last weeks of His ministry. Luke had for these chapters (10–18) a special source, probably a document of some extent, which contained most valuable teaching; but the settings of the teaching had been largely lost, and he therefore put these passages, with other unattached material from the *Logia* and other sources, into this middle, mixed section of his book,—in fact, what else could he do? The material was too important to omit, and he was too conscientious a historical author to create scenes for the several pieces.

[‡] In the case of three of these passages there are parallels in Mark also: Mt 5^{13}=Mk 9^{50}=Lk $14^{34.\,35}$, Mt 5^{15}=Mk 4^{21}=Lk 11^{33} (and 8^{16}), Mt 5^{32}=Mk 10^{11}=Lk 16^{18}. There is but one sentence which is put by both Matthew and Luke into the Sermon that has a parallel in Mark, namely, Mt 7^{2b}=Mk 4^{24b}=Lk 6^{38c}; and this saying is of the gnomic type, so that it may have been repeated on various occasions by Jesus. Consequently one is inclined to say that the portion of the Sermon common to Matthew and Luke is not found in Mark. And of the matter in Matthew's Sermon which is found in Luke outside of the Sermon, or not found in Luke at all, Mark has parallels perhaps for five verses,—the three just indicated, and the two named in the following footnote,—so that the Second Gospel scarcely knows of this teaching material which the First and Third Gospels make so prominent.

[§] Except, perhaps, Mt $5^{29.\,30}$=Mk $9^{43.\,47}$, Mt $6^{14.\,15}$=Mk 11^{25}. It is worth observing that three passages of the Matthew Sermon have parallels within the First Gospel itself: Mt $5^{29.\,30}$=Mt $18^{8.\,9}$, Mt 5^{32}=Mt 19^{9}, Mt 7^{18}=Mt 12^{33}.

[‖] The Greek text here used is that of Westcott and Hort.

Mt $5^{3.\,4.\,6}$.	Lk $6^{20.\,21}$.
[3] *Μακάριοι οἱ πτωχοὶ τῷ πνεύματι, ὅτι αὐτῶν ἐστὶν ἡ βασιλεία τῶν οὐρανῶν.*	[20] *Μακάριοι οἱ πτωχοί, ὅτι ὑμετέρα ἐστὶν ἡ βασιλεία τοῦ θεοῦ.*
[4] *μακάριοι οἱ πενθοῦντες, ὅτι αὐτοὶ παρακληθήσονται.*	[21b] *μακάριοι οἱ κλαίοντες νῦν, ὅτι γελάσετε.*
[6] *μακάριοι οἱ πεινῶντες καὶ διψῶντες τὴν δικαιοσύνην, ὅτι αὐτοὶ χορτασθήσονται.*	[21a] *μακάριοι οἱ πεινῶντες νῦν, ὅτι χορτασθήσεσθε.*

Mt 5^{48}.	Lk 6^{36}.
Εσεσθε οὖν ὑμεῖς τέλειοι ὡς ὁ πατὴρ ὑμῶν ὁ οὐράνιος τέλειός ἐστιν.	*Γίνεσθε οἰκτίρμονες καθὼς ὁ πατὴρ ὑμῶν οἰκτίρμων ἐστίν.*

Mt $6^{9\text{-}13}$.	Lk $11^{2\text{-}4}$.
[9] Πάτερ *ἡμῶν ὁ ἐν τοῖς οὐρανοῖς·*	[2] Πάτερ,
ἁγιασθήτω τὸ ὄνομά σου,	*ἁγιασθήτω τὸ ὄνομά σου·*
[10] *ἐλθάτω ἡ βασιλεία σου,*	*ἐλθάτω ἡ βασιλεία σου·*
γενηθήτω τὸ θέλημά σου, *ὡς ἐν οὐρανῷ καὶ ἐπὶ γῆς·*	
[11] *τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον* *δὸς ἡμῖν σήμερον·*	[3] *τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον* *δίδου ἡμῖν τὸ καθ' ἡμέραν·*
[12] *καὶ ἄφες ἡμῖν τὰ ὀφειλήματα ἡμῶν,* *ὡς καὶ ἡμεῖς ἀφήκαμεν τοῖς ὀφειλέταις ἡμῶν·*	[4] *καὶ ἄφες ἡμῖν τὰς ἁμαρτίας ἡμῶν,* *καὶ γὰρ αὐτοὶ ἀφίομεν παντὶ ὀφείλοντι ἡμῖν·*
[13] *καὶ μὴ εἰσενέγκῃς ἡμᾶς εἰς πειρασμόν,* *ἀλλὰ ῥῦσαι ἡμᾶς ἀπὸ τοῦ πονηροῦ.*	*καὶ μὴ εἰσενέγκῃς ἡμᾶς εἰς πειρασμόν.*

Similarly compare Mt 5^{32} = Lk 16^{18} (= Mk 10^{11}= Mt 19^{9}) and Mt 7^{11}=Lk 11^{13}. The corresponding context or setting of each pair of these parallel sayings, or as regards the Lord's Prayer the nature of the case (see below, ii. 4 *h* (2)), indicates that however variant the words have become in transmission, they started from the same utterances of Jesus. The parallel records run the entire gamut of variation from close verbal similarity to wide verbal divergence, and in a few cases even to difference of idea itself.

Now the explanation of these striking phenomena of content, form, and substance in the Sermon of Matthew and Luke is to be found in the history of the transmission of this material during the years *c.* 29–85 A.D. This section of history is one part of the great 'Synoptic problem.'* While many elements of this problem are still in dispute, certain fundamental facts pertaining to it now seem well established.

(1) Jesus habitually taught in Aramaic, not in Greek.† The thorough and deliberate discussion of this question seems to have reached a settled conclusion.‡ We were all eager to believe that these very Greek words of our Gospels came directly from Jesus' lips; yet historical investigation shows that they are but a translation from the original utterances. While the theories of Resch, Marshall, Dalman, Blass, E. A. Abbott, and others as to a primitive Aramaic or Hebrew Gospel are uncertain, it is clear that the Memorabilia of Jesus were originally and for some years in the Aramaic language. The Aramaic vocabulary, syntax, and influence can everywhere be seen through the Greek of the Gospels, like the earlier text in a palimpsest manuscript.

(2) Jesus' more important teachings were marked and remembered from the time they were spoken. It is not too much to suppose that He impressed certain teachings—not their form, but their substance—upon His disciples. From day to day, therefore, during Jesus' public ministry, His followers were gathering and pondering His utterances, holding them in memory and repeating them to one another nearly or quite in Jesus' own words. After His death and resurrection His followers treasured these sayings of their Master's, studied them, preached them, and faithfully taught them to all who came into the Christian brotherhood (cf. Ac 2^{42}). The story of Jesus' life, His deeds and His words, was the guide of every individual Christian, of every Christian community, and of the entire Christian movement. What He had taught was the staple matter of all Christian instruction and worship, and was everywhere regarded as the norm of Christianity. And of all that Jesus had taught there was nothing more prominent, vital, and practical—indeed nothing more generally revered and used—than the teaching contained in the Sermon on the Mount.

(3) It is also certain that, for years after Jesus had given His teaching, it was circulated and transmitted by word of mouth. Jesus Himself wrote nothing, nor did His disciples until long after. Both these facts were due to the Jewish custom of the time. The teaching of the Rabbis in Jesus' day was entirely oral—only their sacred books, the Old Testament, might be written; therefore the pupils of the Rabbis heard and memorized their teaching. Out of this custom arose a special qualification for, and efficiency in, oral instruction and oral transmission among the Jews. To men of this nation and country Jesus' sayings were given, and by them preserved. It cannot, of course, be supposed that Jesus insisted upon *forms of words*; He was neither a literalist nor a verbalist. Therefore His disciples did not place undue emphasis upon the *ipsissima verba* of His teaching. But so perfectly worded were the most significant of His shorter sayings—many of which can be seen in this discourse—that they would persist in their original form. For the remainder of the teaching an exact verbal transmission was unlikely, and the evidence shows that it did not so happen.

(4) After fifteen or twenty years (*c.* 45–50 A.D.) Christianity began to reach out into the great Roman world by the labours of the Apostle Paul and many others; and it became necessary to translate the Gospel story into Greek, since the non-Palestinian Jews and the Gentiles did not know Aramaic—the language in which the story had arisen, and had thus far been handed down. That this translation took place 50–80 A.D. is proved by our present Greek Gospels and the early disappearance of all Aramaic Gospel documents. Now there is every reason to think that this translation of the Memorabilia of Jesus was a *process* rather than an act. The data do not permit us to think of one formal, authoritative translation, comprising the whole Gospel story, and passing directly into the use of all the Greek-speaking Christians. Rather there were numerous persons in various places and at different times who translated portions—the *same* as well as different portions—of the story from the Aramaic into Greek. These individual and fragmentary translations were characterized by various degrees of literalness, differing vocabulary and syntax, loss of original colouring, obscuration of shades of meaning, interpretative modifications and expansions, varying success in reproducing the original ideas, and some adaptation of the sayings (by way of selection, arrangement, and altered expression) to the practical needs of the Churches for whom the respective translations happened to be made. Then these various translations, at first located at the chief centres of the Christian movement, passed into general circulation, and acted and reacted upon each other, mixing the phenomena of the several translations. The features just described can all of them be traced in our two Gospel records of the Sermon on the Mount.

(5) It is now generally understood * that, after fifteen or twenty years of circulating and transmitting the utterances of Jesus by word of mouth, the Gospel Memorabilia were gradually put into writing. We have in Eusebius (*HE* iii. 39. 16) the important testimony of Papias, which is regarded by most scholars as trustworthy, that the Apostle Matthew composed (*συνετάξατο*, *al. συνεγράψατο*, cf. Lk 1^{1} *ἀνατάξασθαι*) a collection of the sayings (*Λόγια*) of Jesus, in the Hebrew (*i.e.* the Aramaic?) language. If Papias' statement, and the common interpretation of it as a written account, are correct, then we have a distinct witness that there was a written record of Jesus' teaching, which we may assign to *c.* 50 A.D. That it was in Aramaic(?) shows an adoption of writing, even by the Palestinian Christians, as a

---

* In the extensive and highly important literature upon this subject is to be sought the presentation and treatment of the matters outlined in the following paragraphs. See the art. GOSPELS, vol. ii., and literature there cited; also art. 'Gospels' by Sanday in Smith's *DB^2*, and by E. A. Abbott and Schmiedel in *Encyclopædia Biblica*, vol. ii.; also Wernle, *Synopt. Frage* (1899); Wendt, *Lehre Jesu*, 1 Th. (1886); B. Weiss, *Matthäusevangelium* (1876); H. Holtzmann, *Synopt. Evangelien* (1863); Weizsäcker, *Untersuchungen ü. d. evangelische Geschichte* (1864, 2nd ed. 1901); Wright, *Composition of the Four Gospels* (1890); Hawkins, *Horæ Synopticæ* (1899); Burkitt, *Two Lectures on the Gospels* (1901).

† It is not unlikely that Jesus knew some Greek, for many Greek-speaking Gentiles lived in Galilee, and that language must have been used not a little in such a hive of commerce as Capernaum was. Jesus' work, however, was exclusively among the Jews, and there is no conclusive evidence that He knew or spoke Greek at all; even His trial before Pilate cannot prove this, as Pilate must have been accustomed to use an interpreter in treating with the Sanhedrin. See O. Holtzmann, *Leben Jesu* (1901), p. 22.

‡ That Jesus taught in Greek has been ably argued by Roberts (*Greek the Language of Christ and His Apostles*, 1888) and by T. K. Abbott (*Essays chiefly on the Original Texts of the OT and NT*, 1891, ch. 5). The contrary, that Jesus taught in Aramaic, has been shown by Neubauer, *Studia Biblica*, i. 39–74 (1885); A. Meyer, *Jesu Muttersprache* (1896); Zahn, *Einleitung i. d. NT*, i. 1–51 (1897); Dalman, *Worte Jesu*, i. 1–72 (1898): see also art. LANGUAGE OF THE NEW TESTAMENT, vol. iii.

* Although there still remain a few earnest advocates of an exclusively oral tradition.

means of collecting, circulating, and preserving the Memorabilia of Jesus. But whether Papias' statement is correct or incorrect, it is practically certain that when the Gentiles received the story of Jesus they committed it to writing, for they were not accustomed to the oral transmission of extended material. This change of oral to written records was informal, unauthorized, and gradual, like the translation already described. But it is probable that soon after 50 A.D. there were many written portions of the Gospel Memorabilia in existence and use. These documents then grew in number and extent until after twenty to fifty years our canonical Gospels absorbed them and became recognized as the final records of Jesus' ministry (cf. Lk 1^{1-4}). There are also indications that the oral tradition continued along with the written tradition through the whole period until our Gospels were composed (and indeed afterwards also), and furnished a larger or smaller amount of the material which went into them.

The history here sketched of the transmission of the entire Gospel story is at the same time the history of the transmission of the Sermon on the Mount, which was one of the most valuable sections of the Memorabilia of Jesus. The whole process has left its marks upon our two accounts of the Sermon, for to it are to be attributed in the main the difference of setting, content, arrangement, variety of literary expression, and divergence of thought. But the fundamental agreement of the two accounts, which shows them to be reports of the same historical discourse, has not been seriously obscured in transmission.

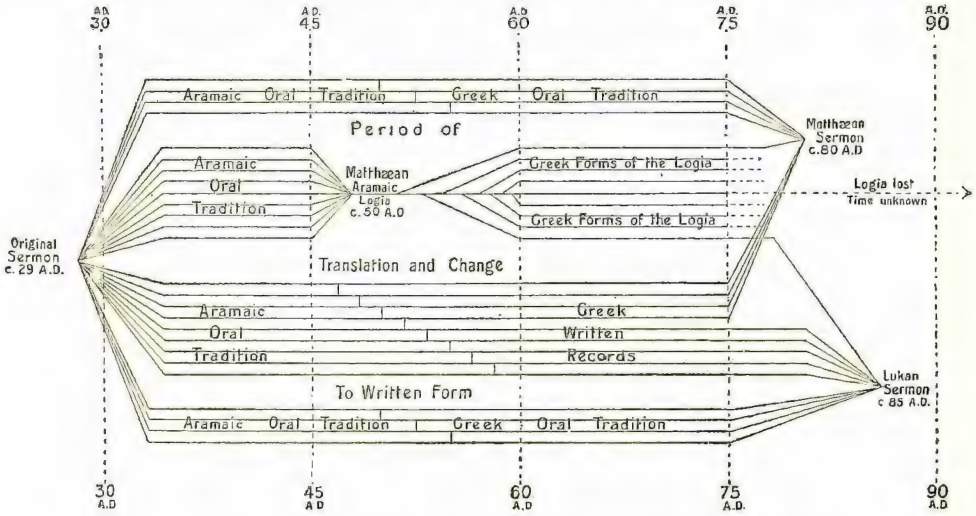

Diagram to Illustrate the Transmission of the Sermon on the Mount.

When one attempts to trace more in detail the particular history of the Sermon on the Mount during the years *c.* 29–85 A.D., one comes upon many perplexing problems about which at present there is no agreement. Opinions ventured in this sphere can only be tentative and modest.

(1) It seems probable that the Matthæan *Logia* was used in a Greek form, indeed in differing Greek forms, by both the First and the Third Evangelists.* If the same Greek form of the *Logia* was used by both, the one or the other (or perhaps both) has introduced a remarkable series of changes in content, arrangement, and wording which it would be difficult to explain. A much more probable supposition is that the Matthæan *Logia* was *variously translated into Greek*,† in whole or in part, by different persons and in several localities: then these complete or fragmentary translations had each its own history for about 30 years, during which they experienced the vicissitudes of transmission. When the First and Third Evangelists came to prepare their Gospels in *c.* 80–85 A.D. there were in circulation and use these various Greek forms of the Matthæan *Logia*. The two authors adopted different forms, according to the usage of the locality in which each wrote, or, less likely, according to their judgment of which form was best historically.

(2) In addition to this basal *Logian* source of both our accounts of the Sermon, there were probably other lines of transmission of the discourse in both oral and written tradition. Many disciples had heard the Sermon when Jesus gave it, and for years afterwards had told of it. There must thus have grown up variant reports—one used in one church or circle of churches, and another in another. These further reports also are likely to have been handed down, and some of them may well have come under the notice of the two Evangelists in composing their Gospels.* How much influence such outside sources had upon their reports it would be difficult to determine—perhaps it was considerable.

(3) We need to allow for a fair amount of editorial selection, arrangement, adaptation, and revision on the part of our two authors. Luke (1^{1-4}) has given us important information concerning his material, purpose, and method; and the First Evangelist probably wrote under similar conditions. As they gathered their sources, they found themselves in possession of three classes of sayings from Jesus—(*a*) brief sayings still joined to specific events of His ministry, and which they could in part arrange in their right order; (*b*) the remains

* See Wendt, *Lehre Jesu*, i. 52, 53; Jülicher, *Einleitung i. d. NT*^{3}, p. 219; Wernle, *Synopt. Frage*, pp. 79, 80; Hawkins, *Horæ Synopticæ* (1899), pp. 88–92; J. Weiss, *Predigt Jesu vom Reiche Gottes*^{2} (1900), pp. 179–182. That the same Greek form of the *Logia* was used by both the First and Third Evangelists is maintained by O. Holtzmann, *Leben Jesu* (1901), pp. 22–24.

† See Feine, *Jahrb. f. Protest. Theologie*, 1885, p. 1 ff.

* The First Gospel of our NT Canon is neither the Matthæan *Logia* itself, which was in Aramaic (Eusebius, *HE* iii. 39. 16), nor is it an immediate translation of that *Logia*, since it does not contain the inevitable indications of a translated work. The Greek Gospel of Matthew is rather a combination of the *Logia* in some mediate Greek form with the Gospel of Mark, plus the addition of various portions and characteristics which did not belong to either of the original books. However, because it substantially incorporated the *Logia*, it continued to bear the Apostle's name. The author of the enlarged Greek edition of the original Matthew work is unknown. On this matter see the works on NT Introduction by B. Weiss, H. Holtzmann, Jülicher, Zahn, Salmon, and others; also Commentaries on the Gospel of Matthew.

of certain of Jesus' greatest discourses, containing the theme and some of the essential matter belonging thereto; these also could generally be assigned to their proper places in the history; (*c*) small sections of teaching or single sayings, the original connexion of which was no longer known; these would be inserted here and there in the narrative without particular attachment, or would be associated with the nuclei of the great discourses wherever the subject of the one was similar to that of the other. Such compilation would produce the phenomena of extraneous material which we find in both accounts of the Sermon, as well as in other discourse sections of both Gospels. When the material of his Gospel had been arranged satisfactorily by the author, it remained for him to adjust the several parts to each other, to smooth over the joints by his literary skill, and in various ways to give the book a unity and finish such as an author would desire for his work.

(4) In view of the fact that the Gospels were written for the *practical* use of the Christians in their life and worship, the Evangelists felt at liberty to make such a selection and presentation of the Gospel facts and teachings as would be most acceptable and useful to the circles of Christians for whom their books were prepared. Each Gospel therefore has a marked individuality. Matthew, in accordance with his purpose, dwells at length upon the relation of Jesus and His message to the Hebrew Scriptures and the current Judaism. But Luke, or his source, with a Gentile public in mind, passes over this material in the main and presents the Gospel in its universal aspects as a spiritual and altruistic religion for all men. These characteristics of the First and Third Gospels appear strikingly in their respective accounts of the Sermon on the Mount.

The accompanying diagram aims at giving some suggestion of the general course of transmission of the Sermon, and of the kind of sources which each Evangelist may have had before him in preparing his report of the discourse.

4. RELATIVE AUTHENTICITY OF THE TWO ACCOUNTS.—Proceeding now upon the view which has been elaborated, that the two discourses contained in Mt 5–7 and Lk 6^{20-49} are variant reports of one historical Sermon on the Mount, it becomes an important consideration which of the two reproduces the Sermon with the greater completeness and accuracy. The question is as to their *relative* excellence, for the phenomena of the accounts and the vicissitudes of transmission show that neither the First nor the Third Gospel has *perfectly* reproduced the content and wording of the original discourse.

In content, Matthew has much more than Luke of that material which is commonly recognized as having been an essential portion of the Sermon, namely, Mt 5^{3-48} $6^{1-7.\ 16-18}$; compare with this Lk $6^{20-23.\ 27-36}$. Luke or his source omitted most of this section, apparently on the ground that it was inapplicable to the Gentiles, for whom the account was prepared.* This omission was perhaps justifiable for the practical purpose of a Gospel, although innumerable Gentiles ever since Luke's day have preferred the Sermon of the First Gospel, as we now do; but however that may be, from a historical point of view such an extensive omission could leave only a seriously incomplete account of the discourse. The further section of the Matthæan discourse (6^{19-34}) may or may not have been a part of the historical Sermon; opinion is quite evenly divided upon this point, and there seems no conclusive evidence either way. The fact that Luke places this material in 12^{22-31}, where it has a topical connexion with what precedes it (12^{13-21}), suggests another occasion, although that occasion is not chronologically located by Luke. On the other hand, if the theme of the Sermon is found in the Beatitudes rather than in the verses Mt 5^{17-20}, this passage, which inculcates devotion to the Kingdom and trust in God, is germane, and marks the discourse as more than an anti-Pharisaic manifesto. For the present, at least, one may prefer to regard this section as belonging to the Sermon. In this case Luke's account of the Sermon, which contains nothing of this portion, is again strikingly incomplete.* The final section of the Matthæan discourse (7^{1-27}) has been preserved with some fulness by Luke (6^{37-49}), varying less than the two preceding sections from the Matthæan account. It will appear farther on, that in both the Matthæan and Lukan reports there are some brief extraneous passages which cannot have been in the original Sermon, such as Mt $5^{25.\ 26.\ 31.\ 32}$ 6^{7-15} $7^{6-11.\ 22.\ 23}$, Lk $6^{23-26.\ 38a.\ 39.\ 40.\ 45}$. But in this kind of variation the two reports have both expanded the historical discourse. Considering the relative contents of the Sermon in Matthew and Luke, there can be no doubt (even waiving the question of Mt 6^{19-34}) that the First Gospel presents a much more complete account of the Sermon than that presented by the Third Gospel.†

---

* So B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 163; Wendt, *Lehre Jesu*, i. 58; Plummer, *Comm. on Luke*, p. 183; Wernle, *Synopt. Frage*, p. 62; Bacon, *Sermon on the Mount* (1902), pp. 36–39; and most other scholars.

* It seems impossible to suppose that Luke could have had before him the Sermon in the form in which it now appears in the First Gospel. This is also the opinion of Wernle (*Synopt. Frage*, p. 80), Bartlet (art. MATTHEW in vol. iii.), O. Holtzmann, (*Leben Jesu*, 1901, p. 21), and of Heinrici (*Bergpredigt*, i. 10). Heinrici says the two reports of Matthew and Luke 'are reconstructions of a discourse restored independently by Matthew and Luke rather than in dependence upon one another or upon the same written source.' The Evangelists have re-worked their material, but that alone cannot explain the phenomena of the two accounts. Would Luke have deliberately broken up a collection of teachings so usefully grouped as in the Matthæan accounts, and have scattered them so unreasonably through seven chapters of his own work? On the other hand, the First Evangelist might, so far as the Sermon is concerned, have had Luke's account before him. His own report was surely better than Luke's, and so would not be altered into conformity with the latter. The general phenomena of the two Gospels, however, are against this particular interrelation, and the prevailing opinion assigns Matthew's Gospel to a somewhat earlier date than Luke's.

† It is a somewhat difficult matter to explain the absence of the Sermon from the Gospels of Mark and John. The only parallels in Mark to any of the Sermon material are Mk $4^{21.\ 24}$ $9^{43.\ 47.\ 50}$ 10^{11} 11^{25}; in John, 13^{16} (15^{20}). And these sayings are only *possible* parallels, *i.e.* they need not have come into the Gospel of Mark from accounts of the Sermon. The opinion of Ewald, H. Holtzmann, Keim, and Wittichen, that Mark originally contained the Sermon, but that it has disappeared from the canonical work, cannot be accepted. Feine (*Jahrb. f. Protest. Theologie*, 1885, p. 4), is right in holding that Mark did not use the sources which, containing variant accounts of the discourse, were used by Matthew and Luke independently. It seems quite certain, however, that Mark could not have been ignorant of the Sermon. If that discourse did not appear in his sources, oral and written, it must have been because he voluntarily limited those sources. The Sermon was altogether too highly valued and too widely used in the Apostolic age to have escaped any careful compiler of the Gospel Memorabilia. This would be esp. true of Mark, who, if common opinion is correct, had an ultimate Petrine base for much of his material. Is it imaginable that Peter did not give the Sermon a prominent place in his teaching? Surely Mark must have known the Sermon. Why, then, did he omit it from his Gospel? A plausible explanation, which may be the true one, is this:—

When Mark wrote his Gospel, about 65–70 A.D., the Matthæan *Logia* (in various Greek forms) was in general use; this *Logia* passed over the narrative material of the story of Jesus, and consisted mainly of a collection of Jesus' discourses and shorter sayings; it included the Sermon, although in what precise form it is very difficult to determine—probably not that in which it appears in either of our canonical Gospels. Now Mark's Gospel, in striking contrast, reports mainly the acts and events of Jesus' public ministry, giving much less attention to the teaching (the longest sections of discourse material are in 2^{18-22} 3^{23-30} 4^{1-32} 6^{8-13} 7^{6-23} 8^{34-38} $9^{1.\ 39-50}$ $10^{24-31.\ 38-45}$ 11^{23-25} 12. 13). Perhaps Mark wished to put into more complete and permanent transmission that other side of the Gospel story which was neglected in the *Logia*. If so, it was unnecessary for him to repeat the Sermon and certain other discourse elements of that work, since he wrote to complete the

In wording, a like verdict of superior excellence falls to the Gospel of Matthew. Since both Gospels contain the discourse in Greek, therefore in translation we cannot find in either of them the *ipsissima verba* of Jesus (except for the few Aramaic words transliterated, as in Mt 5^{22}). But when we ask which Gospel has more accurately transmuted into Greek the ideas that Jesus expressed in Aramaic, which has more faithfully interpreted His meaning in this teaching, there are many indications that Matthew gives the better record. A complete study of the parallels in the two accounts of the Sermon shows that in almost every instance there is a greater authenticity in the Matthæan account; of this a few illustrations will suffice. (1) The first Beatitude is variously worded (Mt 5^{3} *μακάριοι οἱ πτωχοὶ τῷ πνεύματι*; Lk 6^{20} *μακάριοι οἱ πτωχοί*). It is perhaps true that the Lukan form corresponds more nearly to the Aramaic utterance of Jesus, which may not have had a term corresponding to Matthew's *τῷ πνεύματι*; the important consideration, however, is as to the idea rather than the form. In the Lukan Beatitude, material poverty is intended, as is shown conclusively by the converse woe in 6^{24} *οὐαὶ ὑμῖν τοῖς πλουσίοις* (woe could not be pronounced upon those who were spiritually rich). But in the Matthæan Beatitude the ambiguous term *πτωχοί*—corresponding to the OT עֲנָוִים (Ps 69^{33}, Is 61^{1}) and אֶבְיוֹנִים (Ps 109^{16}, Is 14^{30}), and standing in the LXX for those Hebrew words (see art. POOR in vol. iv.), with a primary moral and spiritual import—is made explicit for the moral and spiritual signification by the addition of the phrase *τῷ πνεύματι*, to protect the Beatitude from the material interpretation which had made its impress upon Luke's source. Thus Matthew has preserved Jesus' original meaning of the first Beatitude (perhaps at the expense of its form); of course it is the meaning rather than the form that is of value. (2) In Mt 5^{45-48}=Lk 6^{32-36} there are many indications of the secondary character of Luke's material: Mt 5^{43} does not appear; the idea of lending (Lk $6^{34.35}$) is a disturbing importation; instead of *τελῶναι* Luke has *ἁμαρτωλοί*; Mt 5^{45a} is given in a non-Jewish form—*ἔσεσθε υἱοὶ Ὑψίστου* instead of *ὅπως γένησθε υἱοὶ τοῦ πατρὸς ὑμῶν τοῦ ἐν οὐρανοῖς*; Mt 5^{45b} does not appear, nor the term *οἱ ἐθνικοί* of Mt 5^{47}; and the reminiscence of Dt 18^{13} in Mt 5^{48} *ἔσεσθε . . . τέλειοι* is replaced by a non-Jewish and much weaker *γίνεσθε οἰκτίρμονες*. That is to say, Luke's account lacks the Palestinian setting, the local colour, the Jewish phrases, and the OT allusions, besides introducing an extraneous practical element. (3) A similar practical addition or expansion of Mt 7^{2b} may be seen in Lk 6^{38a}; a true teaching, but foreign to the context. Similarly Lk 6^{45}. (4) In the Mt 7^{12} and Lk 6^{31} forms of the 'Golden Rule' (quoted above), the Matthæan wording approves itself as being a better reproduction of what we may understand Jesus to have said; the Matthæan phrase *οὗτος γάρ ἐστιν ὁ νόμος καὶ οἱ προφῆται* is absent from the Lukan account on the constant principle of expunging Jewish elements. (5) The same principle explains the significant difference of wording in Mt 7^{21} (*οὐ πᾶς ὁ λέγων μοι Κύριε κύριε εἰσελεύσεται εἰς τὴν βασιλείαν τῶν οὐρανῶν, ἀλλ' ὁ ποιῶν τὸ θέλημα τοῦ πατρός μου τοῦ ἐν τοῖς οὐρανοῖς*)=Lk 6^{46} (*τί δέ με καλεῖτε Κύριε κύριε, καὶ οὐ ποιεῖτε ἃ λέγω ;*). (6) It is obvious in a comparison of the Matthæan and Lukan accounts (quoted above) of the closing parable of the Sermon that the Palestinian colour and the vivid picturesqueness of the story as given in the First Gospel do not appear in the commonplace, secondary expressions of the Third. (7) To these six illustrations from the parallel reports of the Sermon must be added the twofold account of the Lord's Prayer (Mt 6^{9-13}=Lk 11^{2-4}), which is discussed below (under ii. 4 *h*), and most strikingly shows the relative merits of the Matthæan and Lukan reports of Jesus' teaching. It is not to be denied that the Matthæan form may be somewhat expanded from the original Aramaic; but this has to do with form rather than with substance, and the expansion is in the interest of the true interpretation of the Prayer. Here, also, we note (see the two accounts quoted above) the absence from Luke of the Jewish phrases which speak of God as in heaven, and of His 'will' as supreme. The comprehensive and deeply ethical and spiritual term *ὀφειλήματα* of Matthew is replaced in Luke by the conventional term *ἁμαρτίας*. And the petition for deliverance from evil, a characteristically Jewish conception, is expunged.

It cannot be doubted that the strong Jewish element and Palestinian colour of Matthew's discourse actually pervaded Jesus' teaching as originally given. Jesus was a Jew, and spoke to Jews only; His language and His ideas were therefore Jewish and adapted to Jews. There is no room for a theory that this feature was a subsequent artificial transfusion of Judaism into the teaching of Jesus. But it is easy to see how just this feature was eliminated from His teaching in the course of the Gentile mission. The Gentiles neither understood nor liked the Jews, with their peculiar notions and exclusive ways. In order, therefore, to make the Gospel acceptable to them, the Christian missionaries thought it necessary to *universalize* the language of Jesus. This has clearly been done in the case of Luke's account of the Sermon, possibly by himself,* but more likely by a long process of elimination, through which the material had passed on the Gentile field whence Luke drew his sources for the Third Gospel. It is possible that portions of the original Sermon which were too strongly Jewish to remain in that position found their way into Luke's Gospel apart from that discourse, and with the Jewish colouring removed. Perhaps this is the explanation of the variant position of Mt 6^{19-34}=Lk 12^{22-31}, since the same kind of elimination of the Jewish element is apparent here, *e.g.* *τὰ πετεινὰ τοῦ οὐρανοῦ* is replaced by *τοὺς κόρακας*; *ὁ πατὴρ ὑμῶν ὁ οὐράνιος* is replaced by *ὁ θεός*, note the peculiar addition in Lk 12^{26}; *τὰ ἔθνη* is replaced by *πάντα τὰ ἔθνη τοῦ κόσμου* (a clear

---

current record of Christ's life, not to produce a new Gospel which should antiquate and supersede the *Logia*. This appears also in the fact that the present Greek Matthew combines probably the Matthæan *Logia* with the Gospel of Mark (plus some additional matter) into a quite extensive account of the life of Christ. What makes this theory somewhat unsatisfactory is the fact that no small amount of Jesus' sayings actually contained in Mark's Gospel was in all probability present in the *Logia*, *e.g.* Mk 4^{1-20} 8^{34-38} $9^{1.39-50}$ 12; but perhaps an explanation for this can be found. At any rate, the problem of Mark's omission of the Sermon cannot yet be considered solved.

As for the absence of the Sermon from the Gospel of John, the entire character of that book offers a probable reason for its omission. The author has distinctly chosen not to reproduce Synoptic material, but to make a Gospel with different contents, and setting forth Gospel truth in a different way. That he passes over the Sermon is, therefore, not at all due to his ignorance of the discourse, but to his motive, according to which he passes over *all* the Synoptic discourses (Mt 5–7. 10. 13. 18. 21–25, Lk 6. 10–21), and most of the narrative matter as well. Nor did he, in passing by all this, wish his readers to regard that part of the Gospel story as unhistorical or unessential. He chose to treat a particular phase of Christ's life and personality—what he probably considered the highest phase. This Gospel was designed to illumine, not to supersede, the others

* Bacon, *Sermon on the Mount* (1902), p. 109 f., says: 'It was indeed, from the standpoint of the historian of Jesus' life and teaching, a disastrous, almost incredible mutilation to leave out, as our Third Evangelist has done, all the negative side of the teaching, and give nothing but the commandment of ministering love toward all. We can scarcely understand that the five great interpretative antitheses of the new law of conduct toward men *versus* the old [Mt 5^{21-48}], and the three corresponding antitheses on duty toward God [Mt 6^{1-18}], could have been dropped in one form of even the oral tradition'; but the Third Evangelist has done this in order to 'concentrate the teaching upon the simple affirmation of the law of love.'

alteration to remove the disparaging reference to the Gentiles' love for material wealth and power); again, the absence of *ὁ οὐράνιος* in Lk 12^{30}; and the absence of *τὴν δικαιοσύνην αὐτοῦ* (a technical Jewish term) from Lk 12^{31}. There would seem, therefore, to be no room for question that, historically considered, the Sermon as given by Matthew is of much greater authenticity than the Sermon of Luke, since it has better preserved the actual contents of the historical discourse, its theme and development, its Jewish elements, its Palestinian colour, and the true interpretation of its sayings; and, in addition to these merits, the Matthæan account has a Greek style of higher literary skill and finish. In this preference for the Matthæan report of the Sermon nearly all scholars are now agreed.*

But this relative superiority of the account in the First Gospel does not mean its *absolute* authenticity. This account is still but a series of excerpts from the historical Sermon, marred by the incidents of long transmission, showing the inevitable effects of the process of translation, and containing certain passages which originally belonged to other occasions (see below). Even in some cases we are uncertain whether the ideas themselves of Jesus are not misrepresented by the wording of Mt 5-7. Two instances about which there has been much dispute may be mentioned. In Mt $5^{18.19}$ the peculiar tone of Jewish literalness has led many scholars to postulate a Judaistic-Christian colouring of Jesus' words in these verses, since they seem quite foreign to His anti-literal utterances and spirit. Every explanation of them as coming in just this sense from Jesus is beset with difficulties, and fails to satisfy completely (see under ii. 4 *c*). Again, in Mt 5^{32} we find a most significant addition to the teaching of Jesus concerning divorce. This saying probably belongs to the occasion with which it is associated in Mt 19^{3-12}, where it is repeated. In both the Matthæan instances we have the exceptive phrase *παρεκτὸς λόγου πορνείας* (*μὴ ἐπὶ πορνείᾳ*), which is not found in the other Synoptic parallels, Mk 10^{11}, Lk 16^{18}. A serious question is involved concerning the permissibility of divorce. The phrase is rejected as a later interpolation by many of the best modern scholars (see under ii. 4 *d*).

But if we cannot think of the Sermon in Matthew as presenting an absolutely authentic account of that historical discourse, we may yet feel much certainty that it contains many essential teachings from that discourse with substantial trustworthiness. In the Evangelists' reports of the Sermon we have not complete historical accuracy, but practical adequacy.

5. PRESENT TEXT OF THE DISCOURSE.—The text of the Sermon as it finally took form in the First and Third Gospels has come down to us through the centuries with less variation than might have been expected; it is in excellent condition. The number of variations is not many hundred, and few of them are of special importance. The Textus Receptus of the 16th cent. (and therefore the AV of 1611 A.D.), compared with the text given us by the great uncials of the 4th-6th cents., shows here as elsewhere numerous elements of assimilation, emendation, revision, and variation; but these have been excluded in the critical texts of the modern editors, Westcott and Hort, Tischendorf, the English Revisers, and others. The most conspicuous changes are the dropping out of words and phrases which have been imported into the text of one Gospel to assimilate its readings to the text of the other, and the literary 'improvements' which the scribes have introduced. The variations which are of importance for interpretation will be treated in their respective places below.

ii. *INTERPRETATION.*—All study of the origin and transmission of the Sermon on the Mount is but a preparation for its interpretation, just as all study of its interpretation is but a preparation for its practice. Both lines of preparation are essential if the teaching is to be understood historically and comprehensively, and is to be applied truly and thoroughly. Surely the untrained English reader can find through the Sermon the spiritual assurance and strength which he needs, and an ideal of life which can determine his conduct in the limited sphere in which he thinks and acts; the gospel is for all, and essentially intelligible to all, rather than the exclusive possession of the educated few (as is the case with intellectual systems of theology, philosophy, ethics, and the like). But when the Sermon is used—as it can and should be used—to illumine the great problems of religion, of morals, and of society, every resource of spiritual capacity, mental ability, and the acquisition of learning should be brought to bear upon this supreme teaching of Christ, in order that it may exert its due and proper influence upon the world.

1. POPULAR, GNOMIC, AND FIGURATIVE STYLE.—Interpretation must take full account of the literary style in which Jesus chose to express Himself. That style, as seen in the Sermon on the Mount and throughout the Synoptic Gospels, was distinctly popular and Oriental. Too often Jesus' teaching has been handled as though it were a systematic, scientific treatise on theology and ethics, whose expressions were fittingly to be subjected to laboratory test, each element to be exactly determined by finely-graduated measuring-rod or delicate weighing-scales. No greater mistake could be made, and the results so obtained must be hopelessly incorrect and perverse. Microscopic analysis is a radically wrong process to be applied to Jesus' teachings. For He chose to deal with the masses, and His ideas were expressed in language which they could hear and consider. If at times He disputed with the learned men of His nation, and in doing so in part adopted their dialectical method (see the Johannine discourses), still this was not His main interest or His chief field of work. The common people were open-minded and receptive: to them, therefore, He addressed His teaching. It was to the Galilæans that He gave Himself and His message, while in Jerusalem and elsewhere He had to defend both against the hostile leaders.

As He taught the multitudes, in their synagogues, upon the highways, along the seashore, and on the hillsides of Galilee, He put His religious truths and ethical principles into concrete popular sayings, contrasting His ideal of life in many simple ways with the conventional notions and practices, and illustrating His teaching from the ordinary avocations, experiences, and environment of His hearers.* Entirely free from scholasticism and intellectualism, He did not tell the how and why of things, nor present scientific definitions, nor deal in abstractions; but with Divine wisdom and skill He taught those things which it is essential for all men to know. The religious facts and truths which He presented form the foundation of Christian theology, and His instruction concerning human conduct must lie at the root of any true system of ethics; but He did not teach these subjects in the manner of the ancient or modern schools. He put His ideas in such a way as to make His knowledge universal. He spoke with a simplicity, insight, and fervour which would appeal to all serious listeners.

---

* The constant preference shown by H. Holtzmann, Wendt, and a few others for the Lukan account of the Sermon as against that of Matthew is, in view of these considerations, a mistake. It is not a true historical criticism to eliminate from the records of Jesus' teaching as much as possible of the characteristic Jewish element, or to give the place of honour to the briefer and more fragmentary of two parallel accounts.

* One reading should be given to the Sermon in Mt 5-7 with no other intent than to note Jesus' remarkably fine and abundant allusions to things around Him—religious practices, ethical conceptions, commerce, industries, agriculture, animals, plants, home life, house furnishings, civic institutions, social customs, the conduct of men, human needs, fortune, and misfortune. His observation and appreciation of everything was unequalled, and the relative valuation which He placed upon things was the true norm of all subsequent judgment. No poet—not even Shakespeare—has seen so clearly, felt so truly, or pictured so perfectly the hearts and lives of men.

It was a part of Jesus' method to use all kinds of *figurative* language. That was natural to Him as an Oriental, and by no other means could He have reached the Orientals who formed His audiences. Similes, metaphors, all kinds of illustrations, parables, hyperbolical expressions, were constantly upon His lips.* We have constantly to be on our guard against interpreting literally what He has spoken figuratively.† The Sermon presents the true righteousness, the ideal human life, popularly and practically portrayed and enjoined. To treat this teaching as scientific ethics is to produce confusion. But to draw from it the essential principles of ethics is to find light and peace for mankind.

Many of Jesus' utterances, especially in this discourse, are of the gnomic type in poetic form—a style so effective in the Wisdom literature of the OT and Apocrypha. The wise men of Hebrew history, particularly after the Babylonian exile, put into this attractive literary dress their crystallization of experience, their philosophy of life, their instruction for conduct and practical affairs. This was a favourite style of teaching with the Jews—a fact that was at once the cause and the motive for Jesus' adoption of it. As a literary mode of expression, Jesus used the gnome, as He used the parable, with consummate art.‡ Even the translation of these sayings into a radically different language has not destroyed their literary finish, rhythm, and symmetry, *e.g.* the Beatitudes, the Lord's Prayer, and many other passages in Mt 5–7. The simplicity, lucidity, and energy of Jesus' utterances mask the art with which they were fashioned. Not that we are to conceive of Jesus as *labouring* over His literary productions to bring them to perfection, but that ideal thought intuitively found ideal expression. Jesus' supreme interest was assuredly not in mere letters, but in the truth He taught. Yet this included the vital lodgment of the truth in the minds and hearts of men, and to this end the language in which He clothed His teaching was of great importance. The uniqueness of Jesus manifests itself in the ability to present His teaching acceptably and effectively, as well as in His perfect insight into the truth itself.

But not only was Jesus the true successor of the OT sage. The Hebrew prophets also gave their messages in remarkably fine literary form, as in the Psalms, Isaiah, and Amos. And the prophetic utterances of Jesus, too, were clothed in language full of beauty, fire, and force. Indeed, Jesus was more a prophet than a sage.* He taught not so much as a philosopher of this life; rather, as a seer who has a vision of a higher life which is to be produced in men. Jesus' earnestness and tempered zeal in His teaching were more persuasive and searching than the fervour of any preceding prophet of truth and righteousness. In the Sermon on the Mount He showed men the ideal life, but that was not all—He strenuously urged them to attain it. They must forthwith *do* the will of God which He had made plain to them (Mt 7^{21-27}). Active love, self-denial, and service He fixed as absolute requirements for those who would be members of the kingdom of God. In these utterances the voice of the true prophet is heard proclaiming God's will and demanding that 'justice roll down as waters, and righteousness as an everflowing stream' (Am 5^{24}). Jesus was both wise man and prophet, but greater than either and greater than both; and never greater than in the Sermon on the Mount, where He immeasurably surpassed every lawgiver, seer, and sage. It is with this supreme appreciation of Jesus and His teaching that one should enter upon the specific interpretation of His words in Mt 5–7 and the Lukan parallels.

2. EFFECT OF THE TRANSLATION INTO GREEK.—In view of the fact that we have Jesus' words only in a translation (the original of which has probably passed out of existence), it will be always a wise proceeding to attempt to reproduce the Aramaic form of the words of Jesus which have come down to us only in Greek. By this process, even though success in it can be only partial, an atmosphere for interpretation is obtained, and shades of meaning are disclosed which would otherwise escape us. Unless we get back into the Semitic world to which Jesus belonged and in which He worked, we can never completely understand Him or His teaching. It is therefore a proper and useful undertaking upon which a number of excellent scholars are now engaged,† to restore by conjecture the original Aramaic of Jesus' words. Some of the results already reached are of importance, and still greater things may be expected of it in the future. It is likely that to some extent the variant vocabulary in the Greek of parallel Gospel passages can be explained as the result of translation, a single Aramaic term being represented in the several translations by two or more synonymous Greek words.

A thorough study of the Septuagint in close comparison with the Hebrew text, showing how translators actually put Hebrew into Greek, gives a valuable insight into method, and furnishes criteria for judging of the Aramaic original behind the Greek of our Gospels. Various degrees of literal and free rendering of the Aramaic can be seen in our two accounts of the Sermon on the Mount. Sometimes the translators have been unable to find exact Greek equivalents for the Aramaic words; sometimes they have imperfectly comprehended, and therefore have failed exactly to reproduce, the Semitic ideas; sometimes they have placed a current interpretation upon Jesus' sayings; sometimes they have expanded the sayings as they put them into Greek to remove ambiguity, or to improve the literary form. These and other inevitable phenomena of translation appear in this discourse of the First and Third Gospels, and must be adequately dealt with in an exposition of its contents.

---

* Metaphorically, Jesus calls the disciples the salt of the earth and the light of the world (Mt $5^{13.14}$). Symbolically, He commands the plucking out of the right eye (5^{29}). Figuratively, He speaks of the mote and beam (7^{3-5}), of the pearls before swine (7^{6}), of the narrow way ($7^{13.14}$), of the false prophets (7^{15}), of the tree and its fruits (7^{16-20}). He gives the parable of the Two House-builders (7^{24-27}). And most difficult of all to interpret correctly, we have His hyperbolical utterances, in which He says more than He means, setting forth a principle rather than a rule of conduct, and leaving its application to the judgment of men. Such are the four famous 'non-resistance' injunctions (5^{39-42}), and the sayings concerning the secrecy of benevolence (6^{3}), prayer in the closet only (6^{6}), anxiety for the necessaries of life ($6^{25.34}$), answers to prayer ($7^{7f.}$), and the 'Golden Rule' (7^{12}).

† See Wendt, *Lehre Jesu*, ii. 74–112; Tholuck, *Bergrede*^{5}, p. 109 ff. [Eng. tr. p. 165 f.].

‡ See Heinrici, *Bergpredigt*, i. 19–26; Kent, *Wise Men of Ancient Israel*^{2} (1899), pp. 176–201; Briggs, 'The Wisdom of Jesus the Messiah' in *Expository Times*, 1897, viii. 393–8, 452–5, 492–6, ix. 69–75. Dr. Briggs says: 'Jesus put His wisdom in this poetic form for the reason that Wisdom had been given in the artistic form of gnomic poetry for centuries, and was so used in His time. If He was to use such Wisdom, He must use its forms. Jesus uses its stereotyped forms, and uses them with such extraordinary freshness, fertility, and vigour that His Wisdom transcends all others in its artistic expression' (viii. 395).

† See Resch, *Logia Jesu* (1898), who endeavours to reconstruct in Hebrew the Matthæan *Logia*, which he regards as the primary source for the material of the Synoptic Gospels; suggestive for this study is his reconstruction of the Sermon on the Mount, pp. 19–29. Further, Marshall, artt. in *Expositor* (1891–2); Dalman, *Worte Jesu*, i. (1898); E. A. Abbott, *Clue: A Guide through Greek to Hebrew Scripture* (1900); Nestle, *SK* (1896).

3. THEME OF THE DISCOURSE AND ITS DEVELOPMENT.—It is the unanimous opinion of all students of the Sermon on the Mount (whether they regard its contents as original or compiled), that the discourse as it appears in Mt 5–7 and Lk 6^{20-49} has a real unity, presenting a definite theme and developing it logically and effectively. If an actual discourse of Jesus constitutes the nucleus of these accounts, the unity of the Sermon is original with Jesus, notwithstanding the presence of certain extraneous material in the Gospel reports. But, even on the supposition that there was no historical Sermon, still the unity of this discourse in Matthew and Luke remains, and is to be attributed to the sources used by the Evangelists, or to the Evangelists themselves. We have seen good reason, however, for holding that the Sermon, as it comes down to us, rests upon a real event and contains excerpts from a great discourse of Jesus, whose theme and development are here preserved. What the theme is must be carefully considered. There are differing shades of opinion and various statements on this point. The crucial question seems to be: Is the theme of the discourse to be found in the Beatitudes (Mt 5^{3-12}= Lk 6^{20-23}) or in the verses about the fulfilment of the Law (Mt 5^{17-20})?

If the theme lies in Mt 5^{17-20}, as is maintained by some,[*] several conclusions must follow. (1) The Beatitudes, given both in Matthew and in Luke as the beginning of the discourse, are extraneous matter brought in from some other connexion, or are merely introductory, containing no essential element of the discourse. (2) The account in Luke omits the very verses of the discourse which contain the theme, since Mt 5^{17-20} has no parallel in Lk 6^{20-49}; yet Luke's discourse *has* a theme, and an excellent one, in the promulgation of a perfect life of patience, trust, love, service, and obedience. (3) To find the theme in Mt 5^{17-20} is to make the discourse an apologetical one, in which Jesus was defending Himself against the charge of destroying the OT Law. What follows, however, in 5^{21-48} is not at all in accordance with this conception, for Jesus' teaching in these verses abrogates the OT Law in some points, and in other points supersedes it by a higher ideal of thought and conduct; in other words, He is here showing how little rather than how much He has in common with that legal system—He criticises rather than defends it. (4) Or, the theme in Mt 5^{17-20} may call for a polemical discourse in condemnation of the perverse Pharisaic interpretation of the OT Law. But the occasion of this discourse did not suggest or make appropriate a polemic against Pharisaic conceptions any more than a defence of Himself against Pharisaic charges. If we can trust Luke to have given us the substantially correct setting of the Sermon, it was an address to the Galilæan multitude who followed Jesus, eager to hear His words, well disposed towards Him, and many of them already His professed disciples. Jesus had just formally chosen twelve men to assist Him in His work, which was now assuming the character and proportions of a new religious movement. At this juncture a discourse of a *negative* quality, apologetical or polemical, would have been unsuitable and unwise. The occasion called for a positive, comprehensive setting forth of what this new religious movement aimed to accomplish, for what it practically stood. (5) Finally, to take the theme from Mt 5^{17-20} makes it impossible to find any place in the discourse for the greater part of the material contained in Mt 5–7, since the great sections 5^{3-16} 6^{19-34} 7^{1-27} have no logical relation to a defence against the charge of destroying the OT Law, or a polemic against the Pharisaic interpretation of it.

These considerations point strongly towards another theme for the Sermon. Where should one look for that theme but in the first section, in the Beatitudes themselves? They present the ideal life in character and conduct, the true righteousness over against current shallow and perverse conceptions of righteousness. This, then, is the true theme of the Sermon on the Mount, because: (1) It stands, where the theme should, at the head of the discourse. (2) It is the theme which both Matthew and Luke fix for the discourse, and the only theme which is common to both accounts of the Sermon.[*] (3) This theme *includes* the section about the Law, Mt 5^{17-20}, with the Jewish allusions contained in its logical development in 5^{21-48} 6^{1-18}, as one of several elements in the discourse, which therefore Luke or his source can omit without radically changing the thought of the Sermon. In this feature of the section the ideal life of Jesus' conception is painted against the background of the Pharisaic conception; and not with an apologetical or polemical purpose, but as an effective mode of positive instruction. When the Gospel story was shorn of this local colouring to make it suitable for the Gentiles, the essential, universal elements of the teaching were extracted and used; compare Lk 6^{27-36} with Mt 5^{21-48}. (4) This theme is appropriate to the occasion described by Luke. There is abundant probability that Jesus, at some middle point in the Galilæan ministry, after careful preparation of the people, and to a general company of His followers, would undertake to set forth somewhat specifically and comprehensively the kind of men and women for whom the kingdom of God called; what it meant in actual life to become a member of that kingdom; the kind of righteousness which God required as contrasted with the current scribal teaching. This would be a definite theme for a great discourse. It would logically involve a characterization of ideal character and conduct; a comparison of this ideal with the ideal commonly held among them; some illustrations of how this ideal character and conduct would manifest themselves in one's attitude towards God, self, and fellow-men; and, lastly, earnest injunctions to the actual attainment of this ideal. This is what we have in the Sermon on the Mount. And there is in the public ministry of Jesus no occasion so suitable for just such a discourse as that of the appointment of the apostles, with which event Luke associates the Sermon.

Certain scholars hold that this general theme of the ideal life, or the true righteousness, unifies the whole contents of Mt 5–7 so that *every verse* finds a place in its development. On this view the Sermon contains no extraneous material, is in no degree a compilation, but, on the contrary, came from Jesus exactly in its present contents and arrangement.[†] It does not need to be said that we should all like to think of the Sermon in this way, if it were possible. But in the judgment of the great majority of NT scholars* two facts are decisive against this hypothesis. (1) Particular verses in the two accounts have no logical connexion with the theme of the discourse and its development, *e.g.* Mt $5^{25.\,26.\,31.\,32}$ 6^{7-15} $7^{6-11.\,22.\,23}$, Lk $6^{24-26.\,38a.\,39.\,40.\,45}$. It does not meet the point to reply that, since the Gospel reports contain only excerpts from the Sermon, abrupt transitions are to be expected. That is true, as we may see at Mt $5^{12.\,16.\,48}$ $6^{18.\,34}$, Lk $6^{26.\,31.\,42}$. But in these cases it is possible to discover a thought relation in the contiguous sections, although the sections are not smoothly joined to one another. In the former class of passages, however, it is difficult to see any logical relation to the theme and discourse as a whole. If now it be said that thought connexion need not exist throughout the contents, this is to attribute to Jesus a mosaic of sayings instead of a discourse, which seems very unlikely. (2) The second fact to be mentioned is still more certain. Most of the material in Matthew which appears to be extraneous to the discourse has parallels in Luke's Gospel *outside* of his Sermon (see table of parallel passages above). Now, if Matthew has right places for these verses, Luke has wrong ones. But can it be considered probable that the Sermon should have been preserved so complete as Matthew's account in one line of transmission, and should have become so disintegrated as Luke's account in another? Would not Luke, who had 'traced the course of all things accurately from the first' (Lk 1^{3}), have discovered and obtained for his book this far superior account of the Sermon? Again, the original historical setting of some of these extraneous passages in Mt 5–7 is fixed by Luke as not in the Sermon but elsewhere. The Lord's Prayer is shown by Lk 11^{1-4} to have been given by Jesus on another occasion in response to a specific request from His disciples. The true place of the divorce teaching (Mt $5^{31.\,32}$) is established by Matthew's own Gospel, in Mt 19^{3-9} = Mk 10^{2-12}, where it is germane to the occasion, while in the Sermon it interrupts the movement of the discourse.† Similarly, the parable of the blind guiding the blind, Lk 6^{39}, belongs more likely to the position assigned it in Mt 15^{14}.

---

[*] H. Holtzmann, Ibbeken, B. Weiss, Wendt.

[*] Luke's form of the Beatitudes does not show this as clearly as Matthew's, but the subsequent material of Luke's discourse leaves no doubt that the original import of them was the same as of those of the First Gospel. On other grounds also it appears that the Lukan interpretation of the Beatitudes (placed upon them probably not by the Evangelist but by his source) is seriously misconceived.

[†] So Stier, Morison, Keil, Kübel, Steinmeyer, H. Weiss, Broadus, Grawert.

There are, then, some passages in Mt 5–7 and Lk 6^{20-49} which did not historically form a part of the Sermon on the Mount, but which by a process of compilation (either in transmission or as the work of the Evangelists) have become associated with it. But one cannot be sure just how much extraneous matter is present in these reports, and the question is more difficult in Matthew than in Luke. There is much difference of opinion as to the amount of compilation, even among those who are best qualified to judge. It may be best to indicate three grades of the material: that which probably belonged to the original discourse, that about which there is uncertainty (accompanied by an interrogation-point in the table), and that which must be considered foreign addition (marked by enclosing brackets). The table that follows is intended to show the general opinion of scholars rather than any individual opinion.

In a problem so important as this of the theme and content of the Sermon on the Mount, attention must be given to the opinions of many scholars. A brief conspectus of these opinions follows, arranged in two groups: those who hold that the discourse of Mt 5–7 is a perfect and original whole, and those who regard as extraneous a smaller or larger portion of these chapters.

Morison thinks Mt 5–7 a complete unit, given by Jesus to 'the constantly increasing multitude of such as took Him to be the long promised Messiah, and who wished to be instructed by Him as to what they should do in connection with the inauguration and establishment of His kingdom' (*Comm. on Matthew*, new ed. 1884, p. 57).—Broadus maintains that the discourse was given exactly as in the First Gospel, and that in it Jesus 'sets forth the characteristics of those who are to be subjects of this reign [of heaven] and share the privileges connected with it, and urges upon them various duties. In particular He clearly exhibits the relation of His teachings to the moral law, in order to correct any notion that He proposed to set the law aside, or to relax its rigour, when, on the contrary, He came to inculcate not merely an external, but a deeply spiritual morality' (*Comm. on Matthew*, 1886, pp. 83, 84).—Steinmeyer assumes that the Sermon as it appears in Matthew 'came from Jesus in this order and in these words . . . Righteousness is the glittering thread which clearly runs through the whole discourse from the beginning to the end; this is the idea which constitutes its unity' (*Die Rede des Herrn auf dem Berge*, 1885, pp. 10, 20). He makes a threefold division of the contents: the longing for righteousness, ch. 5; the striving for righteousness, ch. 6; the attainment of righteousness, ch. 7.*—Hugo Weiss also defends the integrity of Matthew's discourse, and considers it as 'a necessary strand in the development of the Messianic movement. . . . [It contains] a characterization of the Messianic kingdom and of the duties of its members against a background of Jewish and Gentile conceptions of the world, teaching and practice' (*Die Bergpredigt Christi*, 1892, pp. 2, 3).—Nösgen theoretically admits the possibility of the presence of some extraneous verses in Mt 5–7, but he does not as a matter of fact discover any. He thinks that in the discourse Jesus, as the fulfiller of the Law and the Prophets, aims to set forth the moral conditions of obtaining membership in the Messianic kingdom which is at hand (*Das Evangelium nach Matthäus*², 1897, p. 54).—Plummer holds that Luke's Sermon is a different one from Matthew's, though Luke has dropped out of his account the long section Mt 5^{17}–6^{18} as inapplicable to his readers. And as to the theme, 'the main point in Matthew is the contrast between the legal righteousness and the true righteousness;† in Luke the main point is that true righteousness is love' (*Comm. on Luke*, 1896, p. 183).—Grawert is the latest defender of the complete unity of Mt 5–7 (*Die Bergpredigt nach Matthäus*, 1900). The proof of this integrity is developed on a new line: the Beatitudes as given by Matthew constitute the key to the whole discourse, each Beatitude corresponding to a particular section of these chapters and forming its epitome. He thinks that for this reason the Beatitudes must have stood originally at the close of the Sermon instead of at the beginning, so that Mt 5^{13-16} was the proper prologue to the Sermon (pp. 5–8). The eight Beatitudes as they now stand in Matthew are in inverse order as compared with the material of the discourse, thus: $5^{10}=5^{11-16}$, $5^{9}=5^{17-26}$, $5^{8}=5^{27-37}$, $5^{7}=5^{38-48}$, $5^{6}=6^{1-34}$, $5^{5}=7^{1.\,2}$, $5^{4}=7^{3-5(6)}$, $5^{3}=7^{7-11}$ (p. 66). The purpose of the Sermon was 'the consolidation of the disciple-group. By this we mean the inner and outer separation of the disciples from their former Jewish past, and the establishment of their new position on the basis of their relation to the Lord, and in their actual outer connexion with Him as His followers and future messengers of the Kingdom of Heaven' (p. 18). But the discourse has a double character, for it also 'indicates the point at which Jesus steps forth from His former reserve with respect to the ever-increasing hostility of the Pharisees and scribes, and engages in open war against them' (p. 18). It was this that made the picking out and the union of the disciples a necessity. The occasion of the Sermon, as of the appointment of the Twelve with which it was immediately connected, was the daily increasing labours of the Pharisees against

* Calvin, Baur, Strauss, Neander, Tholuck, Wieseler, Kuinöl, Bleek, Keim, Weizsäcker, Godet, Meyer, Bruce, H. Holtzmann, Nösgen, Achelis, Wendt, B. Weiss, Ibbeken, Wernle, Jülicher, Heinrici, Sanday, Bartlet, Bacon, and many others.

† The parallel passage in Luke is at 16^{18}, but this verse and the preceding one are both unattached in this position, which indicates that they are dislocated; 16^{17} belongs to the original Sermon, but this determines nothing for 16^{18}, which stands in no logical relation to it.

* Steinmeyer's analysis is entirely formal—it does not characterize the material. The whole treatment is shallow, uncritical, and disappointing.

† From Plummer's view of Luke's discourse it seems fair to conclude that he would hold Matthew's discourse to be practically original as it stands. If so, this statement of the theme of Mt 5–7 is unsatisfactory, since the Jewish contrast appears only in 5^{17-48} $6^{1-6.\,16-18}$ 7^{1-5}, less than one-half of the whole Sermon. But this conception of the Sermon is also shown to be inadequate by the fact that it lacks the breadth, point, and positiveness which the circumstances of the Sermon on the Mount required.

Jesus and their persecution of His followers, which called out a public manifesto from Jesus and a positive resistance (p. 33). He makes five divisions of the Sermon: 5^{17-37} 5^{38-48} 6^{1-18} 6^{19-34} 7^{1-11}; the introduction is 5^{11-16}, and the conclusion 7^{12-27}, while the Beatitudes 5^{3-10} form a *résumé* of the whole teaching.[*]

The compilation view, which sees in the discourses of Matthew and Luke a larger or smaller quantity of extraneous sayings, is held by the great majority of scholars, who can be represented here by quotations from but a few. Some members of this class have the same large idea of the theme of the Sermon on the Mount as the seven just named. Godet (*Collection of the Four Gospels, and the Gospel of Matthew*, 1899, p. 135) says that 'the report of this discourse in Matthew is a work of a composite order, in which have been combined many heterogeneous elements; but this does not deny that there was really a great discourse of Jesus.' The passages which he thinks belonged originally to other connexions are Mt $5^{7-12.\ 25.\ 26.\ 29-32}$ $6^{7-15.\ 19-34}$ $7^{(6).\ 7-14.\ 21-23}$ (pp. 132–134). The purpose of the Sermon was 'the installation of the true people of God on the earth by the proclamation of the only righteousness conformable to the holy nature of God, which should characterize the true members of His people, in opposition to the formal righteousness inculcated by the traditional teaching and the example of the doctors. This righteousness, far from being contrary to the law, is the very fulfilment of it, since the meaning of the law has been falsified by those who call themselves its interpreters' (p. 135).—B. Weiss (*Meyer-Komm. ü. d. Mattevgm.* 1898) holds that a primitive *Logian* account of the Sermon was essentially shortened by Luke but largely expanded by Matthew. 'If we remove the additions of our Evangelist, we get the form of an original discourse which may well be substantially the Sermon of Jesus, by reason of its unity of thought, its certain prologue 5^{1-12} and epilogue 7^{13-27}, its highly important theme 5^{17-20}, with the exposition in twice three antitheses against the scribal interpretation of the law $5^{21f.\ 27f.\ 31f.\ 33-37.\ 38-42.\ 43-48}$; also in twice three antitheses against the practices of the Pharisees $6^{1-4.\ 5f.\ 16-18}$ $7^{1f.\ 3-5.\ 12}$, with their genuine reflexion of the conditions of the time' (p. 163). Therefore the extraneous matter in the Matthæan account is $5^{13-16.\ 23-26.\ 29.\ 30}$ $6^{7-15.\ 19-34}$ 7^{6-11}. In the discourse 'clearly the opposition to the prevailing teaching of the law and the Pharisaic practice of righteousness form the leading point of view and historical motive' (p. 164).—Tholuck (*Die Bergrede Christi*^{5}, 1872 [Eng. tr. from ed.^{4}, 1860]) thinks that there is some indication of compilation, as perhaps Mt $5^{25.\ 26.\ 29.\ 30}$ 6^{7-15} 7^{1-11} (p. 22), but hesitates to pronounce against any specific passages; he defends the Matthæan position of the Lord's Prayer 6^{7-15} and of the important section 6^{19-34}. Jesus' purpose in the Sermon was 'to exhibit Himself as the fulfiller of the law, and to enunciate the Magna Charta of His new kingdom.[†] . . . To exhibit the new economy of the kingdom of God as the truest fulfilment of the old; in this the condemnation of the superficial religion of Pharisaic Judaism was of course implied' (pp. 14, 15). The Sermon must have contained throughout a strictly progressive train of thought, but this disappears in Mt 6^{19}–7^{11} by the fault of the Evangelist.—Bruce (*Expositor's Greek Testament*, vol. i. 1897) presents a novel theory: the material in Mt 5–7 is a literary assemblage of various teachings given during a period of instruction. It is supposed that the Beatitudes were given on one day, teaching concerning prayer on another day, warning against covetousness on a third day, and so forth. 'As these chapters stand, the various parts cohere and sympathize wonderfully, so as to present the appearance of a unity' (pp. 94, 95).—Achelis (*Die Bergpredigt*, 1875) holds that 'the speech of Mt 5–7 is to be regarded as a work of compilation, in which the genuine Sermon of Jesus was combined with sections from other discourses into a new unity' (p. 491). The portion Mt 5^{3}–6^{18} is the actual nucleus of the Sermon, and 7^{13-27} was the actual close; but the entire portion 6^{19}–7^{12} consists of extraneous matter brought in here from other connexions (p. 400). In this great discourse Jesus 'set before His disciples the norm and the essence of the righteousness of the Kingdom of Heaven' (p. 321).—Wendt (*Die Lehre Jesu*, vol. i. 1886) regards the speech as in part a compilation, the foreign passages being Mt $5^{13-16.\ 26.\ 27.\ 29b.\ 30}$ $6^{7-15.\ 19-34}$ $7^{6-11.\ 19.\ 20.\ 22.\ 23}$.—Feine (*Jahrb. f. Protest. Theologie*, 1885, pp. 1–85) holds firmly to a historical discourse, and regards the Matthew account as the more authentic, but separates as extraneous matter Mt $5^{11-16.\ 18f.\ 23-26.\ 29-32}$ $6^{7-15.\ 19-34}$ $7^{6-11.\ 13f.\ 19f.\ 22f.}$ (p. 84). The theme of the Sermon is the true righteousness as against the current Pharisaic conception and practice of righteousness (p. 35).—Bacon (*Sermon on the Mount*, 1902) argues stoutly for an actual discourse of Jesus, and defends the account of the First Gospel as the more complete. The portions which did not originally belong to the Sermon are Mt $5^{5.\ 7-10.\ 13-16.\ 18.\ 23-26.\ 29f.}$ $6^{7-15.\ 19-34}$ $7^{6-11.\ 13-17.\ 19-23}$. He calls the Sermon 'the discourse on the Higher Righteousness' (p. x), and thinks it 'worthy to be called the new Torah of the Kingdom of God' (p. 35).

H. Holtzmann (*Hand-Comm. u. d. Synoptiker*^{2}, 1892) thinks the speech is a work of compilation *in toto* by the Evangelist, whose aim was to furnish an order of life for the new Church (p. 99). The theme of the entire discourse is in his opinion to be found in Mt 5^{17-20} (p. 103).—Weizsäcker (*Apost. Zeitalter*^{2}, 1891) also regards the Sermon as a collection by the Evangelist of passages adapted to the instruction of the primitive Church (p. 378 f.).—Heinrici (*Die Bergpredigt*, vol. i. 1900) similarly views Matthew's discourse as a free composition from scattered authentic sayings (pp. 10, 39). As to the theme of the Sermon, 'the whole appears as the Magna Charta of true discipleship to Jesus' (p. 13).—Ibbeken (*Die Bergpredigt Jesu*^{2}, 1890) offers a striking view which calls for careful consideration. According to him, the First Gospel was designed throughout to show a close parallelism between the events of Israel's history and the events of Jesus' life, as may be seen in the Evangelist's treatment of the Infancy Narrative (chs. 1. 2), the Baptism (ch. 3), and the Temptation (ch. 4). Then when the author comes to the Sermon (chs. 5–7) he provides for Jesus a multitude explicitly described (4^{25}) as representative of all the Hebrew territory, drawing significantly the parallelism between the giving of the Law on Sinai and the second giving of the Law by Jesus on 'the mount of Beatitudes' (cf. Mt 5^{1} 7^{28} with Ex 19^{3} $24^{9.\ 13}$). The contents and arrangement of the Sermon also correspond, Ihbeken thinks, with the Sinai law-giving. There are four chief sections of the Matthæan account: 5^{3-48} concerning ethical perfection (the Beatitudes corresponding to the Ten Commandments), 6^{1-18} concerning piety, 6^{19-34} concerning the highest good, 7^{1-12} concerning the judging of members of the Kingdom of Heaven; then follows an epilogue 7^{13-27} containing earnest warnings and admonitions to faithful obedience to this new law (pp. 1–11). He declines to decide whether this parallelism between the old and the new law-giving was drawn by Jesus Himself or only by the Evangelist: 'however many may be the grounds for thinking that the speech was first put together out of the Matthæan Aramaic *Logia* by the author of the First Gospel, the *possibility* remains that Jesus Himself gave the discourse in this form and on this occasion. . . . It seems to me to be unnecessary for the understanding of the Sermon to determine whether Jesus Himself actually gave it in this form, at this time and place, or whether the material of it was first gathered together by Matthew out of scattered single sayings and arranged in this way' (pp. 5, 6).[*]

But granting, as seems necessary, that the Sermon on the Mount, as it comes down to us in twofold form, is in some degree a compilation, though with the nucleus of a historical discourse, it is yet possible to recognize that the material as it stands in Matthew and Luke has a kind of unity, by the consonance of all Jesus' religious-ethical teaching, and by the intelligent grouping of the additional matter within the framework of the actual address. And considering that in those sections of the discourse which are original we have mere excerpts from the whole, only a small part of all that Jesus said in that epoch-making discourse, we can still feel confident that in these verses the theme of the Sermon is before us, and many of the essential ideas—a sufficient number to show the main development of the theme by Jesus. If an

---

[*] Grawert's theory is composed of two parts which are not interdependent. (1) His analysis of the discourse, parcelling out a number of verses to each Beatitude as its epitome, is artificial and reaches absurdity when it is forced to make 'Blessed are they that mourn' (5^{4}) the epitome of the saying about the mote and the beam (7^{3-5}). Certainly the Beatitudes contain the essential ideas of the Sermon, which are developed, made concrete, and illustrated by the teaching which follows. But no such absolute connexion between the Beatitudes and the contents of the discourse can be shown as shall guarantee that *every verse* of Mt 5–7 was a part of the original Sermon. Not only this, but he has entirely ignored the phenomena of Luke's parallel account and the distribution of much of Matthew's discourse through chs. 10–14. 16 of the Third Gospel. (2) The conception which Grawert has of the theme, occasion, and purpose of the Sermon might as readily be held in conjunction with a mild compilation theory, and unquestionably contains a great deal of truth. The main objection to it is that it presses to an extreme the idea of the Pharisaic opposition to Jesus and His followers *at this stage* of the ministry, and postulates a much sharper separation between the Christian and the Jewish adherents than was then at all probable.

[†] A similar view concerning the theme of the Sermon is held by Baur, Neander, Delitzsch, Ebrard, Ewald, Meyer, Köstlin, and Hilgenfeld.

[*] Logically, however, Ibbeken is driven to a belief in the entire compilation of the Matthæan discourse, and he seems to acknowledge this on p. 5. It is impossible to agree with him that it makes no difference for the interpretation of the Sermon whether the parallelism is from Jesus or from the Evangelist. But his observation is a true one, often noted (see H. Holtzmann, *op. cit.* p. 99; Godet, *op. cit.* p. 131), that the First Evangelist delights in arranging parallels between the events of Hebrew history and the events of Jesus' life. In this interest and occupation he probably represented a large school of primitive Jewish Christians. It is quite likely that he and they found deep significance in comparing the law-giving by Moses with that by Christ. There is clearly an important truth in the parallelism; Jesus came to create a second great epoch as Moses had created a first, and He gave to men a Gospel which superseded the legal system (see Bacon, *Sermon on the Mount*, pp. 8 f., 26, 36). But the artificial and dramatic devices for indicating the parallelism, which Ibbeken supposes, are hardly to be attributed to Jesus, and it is even doubtful whether the Evangelist intended them to be implied in his narrative. The circumstances and description of the giving of the Sermon are fairly simple and have verisimilitude.

analysis of the Sermon on the Mount is, properly speaking, excluded by the facts just mentioned, we can at least construct an outline of the discourse as given to us by the Evangelists.*

THE SERMON ON THE MOUNT

AS RECORDED BY MATTHEW AND LUKE.

Theme: The Ideal Life:† Its Characteristics, Mission, and Outworkings, and the Duty of attaining it.

A. The Ideal Life described, Mt 5^{1-16}, Lk 6^{20-26}.
  (*a*) its characteristics, Mt 5^{1-12}, Lk 6^{20-26}.
  (*b*) its mission, Mt 5^{13-16}.
B. Its Relation to the Earlier Hebrew Ideal, Mt 5^{17-20}.
C. The Outworkings of the Ideal Life, Mt 5^{21}–7^{12}, Lk 6^{27-42}.
  (*a*) in deeds and motives, Mt 5^{21-48}, Lk $6^{27-30.\ 32-36}$.
  (*b*) in real religious worship, Mt 6^{1-18}.
  (*c*) in trust and self-devotion, Mt 6^{19-34}.
  (*d*) in treatment of others, Mt 7^{1-12}, Lk $6^{31.\ 37-42}$.
D. The Duty of living the Ideal Life, Mt 7^{13-27}, Lk 6^{43-49}.

4. THE CHIEF PROBLEMS OF INTERPRETATION.—It is an interesting evidence of the relativity of language, and of the large subjective element in all interpretation, that Jesus' words in the Sermon have been variously understood in the Christian centuries. Men have found in them what they were prepared to find, by reason of their political ideas, their social environment, their philosophical theories, their theological beliefs, their moral character, and their spiritual aspirations. Nor can we hope to escape similar contemporary influences when we attempt an interpretation. But in three important respects the expositor of to-day is in a more favourable position than his predecessors for getting at the true interpretation of Jesus' teaching: (1) the prolonged, able, and thorough historical investigation of the four Gospels during the 19th cent. has given us a new knowledge and wisdom in determining the origin and the first meaning of Jesus' words; (2) the present high development of the science of ethics—both individual and social ethics—has enabled us as never before to understand and to appreciate Jesus' teaching in the Sermon; (3) the modern change of emphasis from a Christianity of right belief to a Christianity of right character and right social service has brought us nearer to Christ, and has made us both able and willing to learn from Him.

Space here permits only a brief, general treatment of the interpretation of the material contained in Mt 5–7, Lk 6^{20-49}.

a. The Beatitudes.—Mt 5^{3-12}=Lk $6^{20-23\ (24-26)}$. In a discourse whose one purpose was to describe and to enjoin the true righteousness, it was altogether appropriate that the Divine ideal for men should be characterized at the outset. Jesus presented this ideal in a most significant way; not in a re-enactment of the Ten Commandments of Moses—which His people for centuries had regarded as embodying the will of God for man; nor in a new table of commandments to take the place of the old: but in a series of sayings which pronounce the highest blessings upon those who aspire to the best kind of life. 'Blessed are the poor in spirit, the mourners, the meek, those who hunger and thirst after righteousness, the merciful, the pure in heart, the peacemakers, those who are persecuted for righteousness' sake.'

This beatitude type of utterance was not new upon Jesus' lips, for it appears abundantly in the OT.* But Jesus made the Beatitude His own (as He made the Parable His own), and constantly used it as a mode of expression which carried the idea of love rather than of exaction, the idea of persuasion rather than of force, the idea of God's blessing and assistance to His children whom He tenderly leads and exalts.† When in the 5th cent. B.C. the legal element in the Hebrew Scriptures had become the chief interest of the nation, there followed logically the dominance of the legal idea of God, according to which He was an austere lawgiver and judge, demanding under severe penalties an exact obedience to His statutes, regarding men as slaves to be driven to their tasks or to be punished if they failed. The higher conception of God which is expressed in the Psalms and the Prophetical Writings was for centuries sadly obscured by this supremacy of legalism. It fell to Jesus, as one part of His mission, to restore the former better idea of God as a loving Father who cares for, comforts, guides, and blesses His children.‡

When, therefore, Jesus sets at the beginning of the Sermon these Beatitudes, He does so with the profound intention of revealing at once the spirit and the substance of the Gospel. Man is not made subservient to an external law forced upon him from without, but is made responsive to a creative light and power within. The criterion by which God judges him is not primarily a standard of external performance, but a standard of internal purpose and aspiration, of which external performance is in due time a necessary outworking. This fact is seen in the Beatitudes, whose description of the ideal of human life pertains to the fundamental nature of a person and concerns all men equally. Jesus furnishes here a universal ideal and a universal criterion. Not only did He describe the ideal in words; He also illustrated it in His own life.§ According to Jesus' teaching and example, a man's success or failure is to be judged not by the amount of money he can accumulate, or by the amount of social distinction he can command, or by the extent of his intellectual or official achievements; but rather by the essential character which he fashions within himself, and by the service which he renders to his fellow-men. In the Beatitudes Jesus calls men away from the superficial tests and standards which so commonly prevail, to a criterion which concerns the real nature of man, is equally just to all, and stands in relation not alone to the few years of a man's present existence, but to the whole of his eternal career. In no respect was the Judaism of Jesus' day more perverse, and perhaps in no respect has error been more perpetuated, than in the maintenance of superficial tests of righteousness and of success (cf. Lk 18^{9-14}, the parable of the Pharisee and the Publican). The Gospel of Christ was, in the 1st cent. A.D., the rebuke and the correction of this condition; and that Gospel needs, as much now as then, to be established in the world. In no words of Jesus has His essential teaching concerning the ideal of humanity been so simply and clearly epitomized as in the Beatitudes of Mt 5^{3-12}. The man, woman, or child who sincerely, persistently aspires and strives to attain to the character and to perform the service described in the Beatitudes, will not fail of Christianity either in knowledge or achievement.*

---

* The entire material of Mt 5–7 and Lk 6^{20-49} is included in this outline, since the passages regarded by the present writer as extraneous would not, if removed, essentially alter what is here given. That Mt $5^{25.\ 26.\ 31.\ 32}$ 6^{7-15} $7^{6-11.\ 22.\ 23}$, Lk $6^{24-26.\ 38a.\ 39.\ 40.\ 45}$ can be best explained as belonging originally to other connexions seems quite clear; but Mt $5^{13-16.\ 29.\ 30}$ 6^{19-34} 7^{12-20}, Lk $6^{31.\ 43.\ 44}$ are here left uncertain.

† Or, The True Righteousness. The former phrase is given the preference here because 'righteousness' (δικαιοσύνη) is a technical term of theology, and is seldom used outside of the vocabulary of religion. In Jesus' day also it was a technical Jewish term. While it occurs five times in Matthew's account of the Sermon ($5^{6.\ 10.\ 20}$ $6^{1.\ 33}$), it is wholly absent from Luke's account. Nor does it appear in Luke's Gospel except at 1^{75}, nor in John except at $16^{8.\ 10}$; and in Mark not at all. This indicates that the term was largely displaced among Gentile Christians by the non-technical terms 'love' (ἀγάπη) and 'mercy' (ἔλεος). St. Paul's constant use of the term (δικαιοσύνη) continued its theological designation.

* See particularly Ps 41^{1} 65^{4} 84^{5-7} 89^{15} $119^{1.\ 2}$ $128^{1.\ 2}$, Pr $8^{32.\ 34}$, Is 30^{18} 32^{20} 56^{2}, Dn 12^{12}; also 1 S 26^{25}, 1 K 8^{15}, Ps 28^{6} 68^{19} $72^{18.\ 19}$ 118^{26}, Jer 17^{7}. The idea 'Blessed' is expressed in the Hebrew OT (see also Sir $14^{1.\ 2.\ 20}$ $25^{8.\ 9}$ 26^{1} 28^{19} 48^{11} 50^{28}) by two different words, אַשְׁרֵי and בָּרוּךְ. The former is a noun in construct case from the root אָשַׁר meaning 'to go straight, to advance, to prosper.' אַשְׁרֵי is in OT usage nearly confined to the Psalms, where it appears nineteen times (elsewhere seven times). It is always rendered in the LXX by μακάριος, which in classical meaning was quite akin to this Hebrew word (see Heinrici, *Bergpredigt*, i. 27). בָּרוּךְ, Qal pass. ptcp. of בָּרַךְ meaning 'to bless' occurs fifteen times in the Psalms, and frequently (twenty-two times) elsewhere. It is always rendered in the LXX by εὐλογητός or εὐλογημένος, never by μακάριος. In the Psalms without exception, and predominantly elsewhere, it is used with reference to God as the object of the blessing, 'Blessed be the Lord God of Israel.' The NT uses both μακάριος and εὐλογητός (-μένος), and after the prevailing practice of the LXX, for μακάριος is used of men and εὐλογητός (-μένος) of God as recipient. אַשְׁרֵי denotes a status of true well-being, due to right thoughts and right conduct, the harmony of a man with his God. בָּרוּךְ when referring to men as recipients denotes some special blessing bestowed by God and coming upon one from without. It is a fair inference from these data that Jesus used אַשְׁרֵי rather than בָּרוּךְ, and the Greek translators of His words did well to follow the LXX in rendering this by μακάριος. The point is of some importance for determining the exact meaning of Jesus when He uses this term in His Beatitudes. In the 'Blessings and Cursings' of Dt 27. 28 the terms are בָּרוּךְ and אָרוּר, rendered in the LXX by εὐλογημένος and ἐπικατάρατος. The Greek word for 'Woe' in the Woe passages of the Gospels is οὐαί.

† 'Like as a father pitieth his children, so the Lord pitieth them that fear him,' Ps 103^{13}. See also Dt 8^{5} 32^{6}, Is 1^{2} 63^{16}, Mal 1^{6} 2^{10}.

‡ Cf. especially Wendt, *Lehre Jesu*, ii. 139–160 (Eng. tr. i. 184–209); G. B. Stevens, *Bibl. Theol. of the NT*, pp. 65–75.

§ Gore, *Sermon on the Mount*, pp. 15, 16: 'The character which we here find described [in the Beatitudes] is beyond all

Whether all the Beatitudes which now appear in Mt 5^{3-12} originally stood at the beginning of the Sermon cannot be affirmed with certainty. The fact that the parallel section in Lk 6^{20-23} presents but four Beatitudes, suggests that the four additional Beatitudes in Matthew (the meek, merciful, pure in heart, peacemakers) may not have belonged historically to this connexion, but possibly were a part of the composite material which came later to be associated with the historical nucleus of the Sermon.† Even on this theory these four Beatitudes would be authentic utterances of Jesus. And since on many occasions He used the beatitude form of expression, the theory is by no means impossible that the eight Beatitudes of Matthew are a compilation. Yet there are good reasons for the contrary opinion, that they constitute an original unit: (1) the absence of four of the eight Beatitudes from the Lukan account can be explained as a part of the drastic treatment which Luke's material had received in course of transmission. The materialistic import which has been forced upon the four Beatitudes in Lk 6^{20-23} gives evidence of such treatment. Since the other four Beatitudes of Mt $5^{5.7-9}$ will by no means admit of a materialistic interpretation, it is not improbable that for this reason they dropped out of the narrative in that line of transmission. (2) The Third Gospel has not in any connexion recorded these four Matthæan Beatitudes; neither does the Second Gospel have them. So that as the First Gospel has them only in this connexion, no other setting is suggested for them. (3) Their truth is quite too searching and sublime to allow us to regard them as a later creation. They must have come from Jesus. And He must have given them in some significant connexion, such as the Sermon. (4) These four Beatitudes are necessary to the connexion in which they stand in Mt 5^{3-12}, since without them the ideal of life which the Beatitudes seem designed to characterize would be essentially incomplete and ineffective. If, as has been argued above, the Beatitudes of Matthew present the theme of the Sermon, and in a way epitomize all that the following discourse contains, one cannot well suppose that the four Beatitudes found only in the Matthæan account were absent from the original group.

As to the number of Beatitudes in Mt 5^{3-12} there is difference of opinion. It is customary to count them as either seven or eight, and prevailingly the latter.* Of the first seven, in vv $^{3-9}$, there is little question: the disagreement relates to the enumeration of vv.$^{10-12}$, whether they should be counted into the group at all; or if counted, whether they contain more than one additional Beatitude. The occurrence of the word 'Blessed' (*μακάριος*) is not generally regarded as determining the number of the Beatitudes, for it appears nine times (vv.$^{3-11}$); instead, the enumeration is by subject-matter—since vv.$^{10-12}$ all treat of persecution for righteousness' sake, they are counted as one Beatitude.† Then is the teaching concerning persecution for righteousness' sake to be classed with the preceding seven ideas as fundamental to ideal manhood, so that these verses present an eighth Beatitude? Such classification seems preferable, and it is strongly supported by the fact that Luke also gives this teaching concerning persecution in his account as the closing Beatitude. Exact correspondence of idea and form among the eight Beatitudes is not to be required.

The order in which the eight Beatitudes of Mt 5^{3-12} stand in relation to one another does not appear to be a closely wrought one, such that any other arrangement would have been illogical. They do not seem to present an ascending, climactic order.‡ Nos. 1 and 4 pertain to the longing for God and righteousness, Nos. 2 and 8 pertain to patient endurance and spiritual growth under affliction and persecution, Nos. 3, 5, 6, 7 pertain to the outworkings in character and service of the internal righteousness. The desire for righteousness, of course, precedes the achievement of righteousness, so that Nos. 1 and 4 should precede Nos. 5, 6, 7; but logically the place of Nos. 2 and 3 seems to be after No. 4. This transposition is made in Luke's account, where the two Beatitudes of desire ($6^{20.\ 21a}$) precede the other two ($6^{21b.\ 22.\ 23}$). If this order of the Beatitudes has the semblance of originality, it may be that Matthew's Beatitudes were rearranged in transmission. It scarcely seems necessary,

---

question nothing else than our Lord's own character put into words, the human character of our Lord corresponding always in flawless perfection with the teaching which He gave. Here are two reasons why our Lord's teaching is capable of universal and individual application: (1) because it is not made up of detailed commandments, but is the description of a character which, in its principles, can be apprehended and embodied in all circumstances; (2) because it is not only a description in words, but a description set side by side with a living example.'

* Harnack, *Das Wesen des Christentums*, 1901, p. 47 [Eng. tr. p. 74], says: 'Should we be threatened with doubts as to what He [Jesus] meant, we must steep ourselves again and again in the Beatitudes of the Sermon on the Mount. They contain His ethics and His religion, united at the root, and freed from all external and particularistic elements.'

† So Resch, Wendt, H. Holtzmann, Adeney (*Expositor*, 5th ser. vol. ii.), O. Holtzmann (*Leben Jesu*, 1901, p. 186 f.), and Bacon (*Sermon on the Mount*, p. 129). J. Weiss (*Predigt Jesu* ², pp. 127, 187) excludes the three Beatitudes of Mt 5^{7-9}. Klöpper, *Zeitschr. f. wiss. Theol.* 1894, thinks that the eight Beatitudes were originally scattered through the Sermon, but were collected and placed at the beginning by the First Evangelist; an improbable supposition.

* The number of Beatitudes is counted as seven by Ewald, Hilgenfeld, Köstlin, Lange, Meyer, Nösgen, Steinmeyer, B. Weiss. The arguments for this view are that Mt 5^{10-12} does not really co-ordinate with vv.$^{3-11}$ to make an eighth Beatitude, that Matthew has an intentional parallel to his Beatitudes in the seven Woes of ch. 23, and that probability is in favour of the sacred and frequent number seven being used instead of eight. Bacon (*Sermon on the Mount*, p. 127) counts seven Beatitudes by regarding Mt 5^{5} as a marginal gloss interpolated from Ps 37^{11}. The Beatitudes are counted as eight by Achelis, Bleek, Feine, Hahn, Heinrici, Ibbeken (although he holds that they correspond closely to the Ten Commandments), Keil, Keim, Kübel, Tholuck, H. Weiss, Weizsäcker, and many others. Delitzsch (*Neue Untersuchungen*, p. 76) enumerated them as ten, to complete their parallelism with the Ten Commandments; but this view has found little acceptance.

† Since v.^{10} and vv.$^{11.\ 12}$ have a common theme and are actual duplicates, it may be that the one or the other passage is not original in this connexion. The Beatitudes had originally a short form, and were probably of about equal length. Given one of these passages at this point, the other might easily have become topically associated with it. That this has happened is further suggested by the fact that while v.^{10} is given in the third personal form, like the other Beatitudes in Matthew, vv.$^{11.\ 12}$ are given in the second personal form, like the Beatitudes of Luke. Achelis and B. Weiss, however, regard all three verses as original, saying that at v.^{11} Jesus turns to speak directly to His disciples. Whether, on the former theory, v.^{10} would be the extraneous passage or vv.$^{11.\ 12}$ (so Feine, Hilgenfeld, Weizsäcker, J. Weiss), it is difficult to decide. H. Holtzmann thinks all three verses foreign to the connexion. But the unity of the eight Beatitudes is not affected by the question of duplicate material in these verses.

‡ Most commentators endeavour to show a special meaning and significance in the Matthæan arrangement of the several Beatitudes. Tholuck, *Bergrede* ⁵, p. 56 f. (Eng. tr. p. 64 f.): 'These eight Beatitudes are arranged in an ethical order. The first four are of a negative character. They express the state of spiritual desire which belongs to the indispensable conditions of participation in the Kingdom of God. The next three following are positive: they set forth what attributes of character are required in the members of that Kingdom. The eighth shows how the world will treat the members of the Kingdom.' However, 'the progression among the qualities pronounced blessed is not to be regarded as of such a nature that each stage excludes the rest; or that, in advancing to another, the former are left behind.' Achelis, *Bergpredigt*, pp. 73–75, classifies the first four Beatitudes as pertaining to the desire for salvation, the second four as pertaining to the possession of it; he further subclassifies them also. H. Weiss, *Bergpredigt*, pp. 9, 23, regards the first four as passive, the second four as active. Feine, *Jahrb. f. Protest. Theol.* 1885, thinks the eight Beatitudes make four neatly-fitting pairs. Ibbeken, *Bergpredigt* ², p. 19, says that the effort to find a close logical order in the Beatitudes as they stand has been unsuccessful. Heinrici, *Bergpredigt*, i. 28, thinks that if they had been arranged logically, according to their inner relation, the order would have been Nos. 1, 4, 6, 3, 5, 7, 2, 8. It is scarcely necessary to say that the idea that in their present arrangement the Beatitudes indicate the several consecutive stages of normal Christian growth is a purely fanciful one.

however, to suppose that Jesus insisted upon a particular succession of them.*

Of much more importance is the question whether Matthew or Luke presents the more authentic form of the Beatitudes. The difference between them is of two kinds: (1) Luke gives the Beatitudes in the second person, in the form of direct address; while Matthew has them in the third person, in the form of a general statement (see a similar phenomenon in Mt 3^{17} =Lk 3^{22}). An examination of Jesus' other Beatitudes recorded elsewhere in the Gospels indicates that He used both forms, and apparently without preference for either. The OT Beatitudes are in the third personal form. But since Matthew agrees with Luke in giving the remainder of the discourse (from 5^{11} onwards) in the second person, some scholars hold that the Beatitudes themselves were originally of this form.† On the other hand, a change to the second person in the Lukan account might arise from the materialistic interpretation which has been cast over the Beatitudes and Woes in this Gospel. The change would make the Beatitudes personal and specific to his hearers, instead of general and universal as in Matthew. (2) The wording of the same Beatitudes is in some respects strikingly different in the two accounts. Concerning the first Beatitude (as suggested above, i. 4), it seems probable that Matthew's form of it, while conveying more explicitly Jesus' meaning, has been expanded in transmission by the addition of τῷ πνεύματι, the original Aramaic form of the utterance being shorter, as in Luke.‡ The fourth Beatitude (Luke's second) presents a somewhat similar case; when Matthew says, 'Blessed are they that hunger and thirst after righteousness,' it is possible or even probable that Jesus' words were shorter (as suggested by the Lukan form) by the implication rather than the expression of the idea contained in τὴν δικαιοσύνην, perhaps also of that contained in the διψῶντες. These words, too, may have been added to prevent a materialistic misinterpretation. Since the idea of hungering spiritually was common in the OT, Jesus may have used the οἱ πεινῶντες alone with that meaning, the additions being made later to remove all ambiguity. In the second Beatitude (Luke's third) the πενθοῦντες of Matthew and the κλαίοντες of Luke are probably two varying Greek words employed to translate one Aramaic word; the former is the better in this context, since it carries a deeper, finer meaning. The double occurrence of νῦν in Lk 6^{21} is an obvious importation. In regard to the eighth Beatitude (Luke's fourth), concerning patient endurance and spiritual growth under persecution, one notices that Luke has no parallel to the first of the two duplicate forms in which Mt 5^{10} gives it; instead, Lk $6^{22.23}$=Mt $5^{11.12}$. A comparison of these passages shows general thought agreement, but much difference in wording; nor can there be any doubt that the Lukan form of the Beatitude is secondary (consider especially $6^{22b.23b}$).

The Gospel of Luke contains, in addition to its four Beatitudes and in immediate sequence upon them, four corresponding Woes. With these Woes an increasing difficulty has been felt; many scholars have come to regard them either as so modified in transmission that they no longer represent Jesus' spirit, or as a free traditional expansion of the four Beatitudes, and therefore unauthentic. Four chief objections are made to them: (1) These Woes find no parallel in the Matthæan account, nor elsewhere in any of the Gospels. Jesus used the Woe type of expression (cf. Mt 11^{21} 18^{7} 23^{13-36}, Lk 10^{11-15} 11^{37-52}) against those who had long and deliberately refused Him and His message; but these four Woes of Lk 6^{24-26} are found only in this passage. If Jesus gave them at this time, they have failed to be preserved in the longer and better of the two reports of the discourse which have come down to us. (2) These Woes have a crass material import. Each of the four Woes gives the converse of each of the four Beatitudes, in the same order, and fixes upon them a materialistic sense. 'Blessed are ye poor!' conversely, 'Woe unto you that are rich!'; therefore only economic poverty and wealth are meant, since spiritual riches cannot be deprecated. 'Blessed are ye that hunger now!' conversely, 'Woe unto you, ye that are full now!'; therefore the 'hungry' are those in physical need of food, for the spiritually 'full' are not doomed to eternal spiritual privation. Also the third and fourth Woes are harsh in their terms, shallow and external in their conceptions. The exaltation of material poverty and distress which thus appears in Luke's Beatitudes and Woes can be seen also in other parts of his Gospel (see the account of the rich young man, Lk 18^{18-30}; the parable of the Rich Fool, Lk $12^{16-21.33}$; the parable of Dives and Lazarus, Lk 16^{19-31}, cf. 1^{53}).* The Evangelist probably is not responsible for these views; rather they had already impressed themselves upon the material which constituted the sources for his Gospel. They represent a strong sentiment in the first century, which grew out of a false contempt for the earthly life and an exaggeration of Jesus' teaching about riches. (3) These Woes are out of character with Jesus. He never condemned wealth as such; what He condemned was that a man should permit wealth to be his supreme purpose and his master. On this subject Jesus taught much, and with profound insight into the true relation of men with things; from Him we must learn the real aim of living and the proper use of the material world about us.† It is difficult, if not impossible, to bring the tone and import of these Woes into accord with Jesus' spirit, conceptions, and method. (4) These Woes are inappropriate to the Sermon. This discourse was given to a large company of people who had been attracted to Jesus by His words and His works; many of them were His professed followers, all of them were well disposed towards Him. The occasion was not suitable for violent language and condemnatory pronouncements. Jesus used the Woe type of utterance for His final judgments against those who rejected their Messiah; but here He is in the midst of His Galilæan ministry, the people hear Him gladly, and the enmity of His opponents has not yet reached its final stage. In view of these four considerations, the full authenticity of the four Woes in Lk 6^{24-26} must be counted an open historical question. If they are not authentic as they stand, they may represent in a modified form actual Woes spoken by Jesus in another connexion during the closing months of His work. Or, if they cannot be attributed to Jesus at all, they will be explained as free expansion in transmission, due to a desire to intensify the teaching against earthly goods. The verses may then have been constructed on the pattern of the 'Blessings and Cursings' of the Old Covenant (Dt 27. 28), or still more likely on the pattern of the great Prophetic utterance (Is 5). Such an expansion should not be charged to Luke himself, but to the line of tradition from which he drew his material.‡

The blessedness which Jesus in His Beatitudes affirms of men who attain to the character and perform the service therein described, belongs both to the present and to the future. In one aspect it is eschatological: the endless future of such men is assured as one of perfect happiness, glory, and communion with God. Since Jewish hopes and expectations were largely eschatological, Jesus met them on this ground. But the blessedness which Jesus promised belonged also, and primarily, to the present life; in His teaching Jesus constantly kept the present life clearly and strongly to the front. Jesus' Beatitudes, just as the Beatitudes of the

---

* The reversal of the order of the second and third Beatitudes of Matthew which is found in Codex D, 33, Syr cur and a few other early text witnesses, was adopted into the text by Lachmann, Tischendorf, and Tregelles; Achelis approves it, and H. Holtzmann thinks it may be the true reading. It is rejected, however, by Tholuck, Westcott and Hort, Nestle, and B. Weiss. The transposition may have been due to the close OT association of the two ideas of 'poor' and 'meek' (the LXX renders the Hebrew עֲנָוִים by both πτωχοί Ps 69^{33} and πραεῖς Ps 37^{11}); or it may have been merely fortuitous.

† Similarly Wendt, *Lehre Jesu*, i. 56; Bacon, *Sermon on the Mount*, p. 126.

‡ So Klöpper, *Zeitschr. f. wiss. Theol.* 1894; Kabisch, *SK*, 1896; J. Weiss, *Predigt Jesu*², p. 182 f.; Schmiedel, *Encycl. Bibl.* vol. ii. col. 1855; Heinrici, *Bergpredigt*, i. 29, who says: 'An effort to exclude all misinterpretation is seen in the phrases of closer definition, τῷ πνεύματι (v.^{3}), τὴν δικαιοσύνην (v.^{6}), τῇ καρδίᾳ (v.^{8}), and ἕνεκεν δικαιοσύνης (v.^{10}). These additions mar the parallelism. They cannot be explained except as expansions of the original made in the process of translating Jesus' words into Greek.' Similarly Bacon, *op. cit.* p. 127 f. The preservation of the precise meaning of the Beatitudes was of the first importance, and to Greek-speaking Christians they would not have been quite clear in their original brevity, for they would not have understood the terms 'poor' and 'hungry' to have a meaning primarily spiritual. The addition of these phrases removed all ambiguity.

* For this view see Campbell, *Critical Studies in St. Luke's Gospel* (1891), ch. 2; Rogge, *Der irdische Besitz im NT* (1897), pp. 9–68; Peabody, *Jesus Christ and the Social Question* (1901), pp. 190–201; Schmiedel in *Encycl. Bibl.* vol. ii. col. 1841; Cone, *Rich and Poor in the NT* (1902), pp. 118–142; and J. Weiss, *Predigt Jesu vom Reiche Gottes*² (1900), p. 182 f., who says: 'There can no longer be any doubt that Luke [in his Beatitudes] aims to draw a sharp contrast between the different external social conditions; his Beatitudes contain nothing of an ethical or religious element.'

† Mathews, *Social Teaching of Jesus*, ch. 6; Peabody, *op. cit.* ch. 4; Rogge, *op. cit.* pp. 1–68.

‡ The authenticity of the Woes in Lk 6^{24-26} is defended by Wendt, *Lehre Jesu*, ii. 168 f.; Bacon, *Sermon on the Mount*, p. 126; O. Holtzmann, *Leben Jesu*, p. 187; and by Plummer, *Comm. on Luke*, p. 181 f., who says: 'There is no evidence that these were not part of the original discourse. Assuming that Matthew and Luke report the same discourse, Matthew may have omitted them. But they may have been spoken on some other occasion.' On the other hand, many reject them. Tholuck, *Bergrede*⁵, p. 54 (Eng. tr. p. 62): 'Unquestionably, these Woes must be regarded as an expansion of the thought by the recorder of the narrative.' H. Holtzmann, *Synoptiker*, p. 102: 'The Woes of Luke were constructed for the purpose of strengthening and explaining [the Beatitudes] according to the model of Dt 27^{15-26}, Is 5^{8-23}, and not without a remembrance of Jer 5^{31}, Mic 2^{11}.' Similarly B. Weiss, Feine (*Jahrb. f. Protest. Theol.* 1885, p. 15 f.), Wernle (*Synoptische Frage*, p. 62), Schleiermacher, Strauss. F. H. Woods, *Expos. Times*, 1893, p. 256, says: The first Christians 'aimed at giving the general sense rather than the exact words. We can easily understand, *e.g.*, an early preacher so repeating the Beatitudes as to give them in what may be called a negative as well as a positive form; especially when by so doing he would be making a more exact parallel between the blessings and cursings of the old law and the blessings and cursings of the new law. Such a modification of Christ's language might arise in course of time quite unconsciously, when we remember how often so striking a portion of our Lord's teaching must have been repeated to catechumens.'

Psalms, have to do first of all with present well-being. The term *μακάριος* appears in this connexion, as always,* to refer to that condition of true well-being which results from committing one's self wholly to God, with the purpose of living according to His will; it connotes also the effect produced by this status, namely, the peace and joy arising from the consciousness of God's approval and blessing, and the feeling that one's present and future well-being is assured. The conception of blessedness in Mt $5^{3\text{-}12}$ is not essentially different from that which the OT at its best had already presented, but Jesus perfected and exalted the idea of blessedness, setting it before men with a new attractiveness and power. That Jesus' Beatitudes re-echo the highest ideals and promises of the Psalms and of the Prophets has been frequently and truly noted; both the conceptions and the phrases stand in the closest relation to the OT. In the Beatitudes, as everywhere in His teaching, Jesus was building upon the foundation of the Hebrew religion, fulfilling it, *i.e.* perfecting it and establishing it.

The Beatitudes consist each of two phrases: the one expresses the condition, the other the result; the one states the character or service to be attained, the other the blessedness of attaining it. In neither portion of the sayings are the phrases used by Jesus new ones; on the contrary, they are taken up by Him from the OT and current Jewish terminology, and turned to good account in His own teaching, receiving from Him a larger, higher import. Thus the phrases the 'poor,' the 'mourners,' the 'meek,' the 'hungering and thirsting,' the 'merciful,' the 'pure in heart,' the 'peacemakers,' the 'persecuted,' are staple conceptions and terms of the OT and of the Judaism of Jesus' day. And the same thing is true of those ideas and phrases which constitute the second members of the Beatitudes, the 'Kingdom of Heaven,' the 'comfort of the afflicted,' the 'entering into possession of the earth,' the 'satisfaction of longing for righteousness and truth,' the 'seeing God,' and the 'becoming sons of God.'† Jesus' use of OT and current religious terminology served to form an essential connexion between His hearers and Himself; but He did not use it as a mere matter of expedience, a pedagogical device to gain the attention and confidence of His hearers; rather He used it because He found an essential unity between His own ideas and those of the Hebrew prophets. These phrases in their highest meaning were rooted in fundamental spiritual needs, realities, and aspirations such as Jesus came to satisfy, to proclaim, and to fulfil.

The Beatitudes present each a special idea, but they are not mutually exclusive. An organic unity binds them all together, and they interlace with one another. Like so many facets of a diamond, they present the ideal life in eight different aspects, they indicate the several characteristics which make up the whole. The specific meaning of each of the Beatitudes must be carefully determined, in order that we may apprehend correctly the ideal of Jesus for men which they embody.

(1) 'Blessed are the poor in spirit: for theirs is the kingdom of heaven.'‡ The phrase 'the poor' (*πτωχοί* = עֲנִיִּים and אֶבְיוֹנִים) was a current one among the Jews, arising in the OT period and bearing a somewhat technical meaning (see art. POOR in vol. iv.). It designated that class, generally in humble circumstances, who lived the higher life, fixing their thought upon God and seeking His spiritual blessings, instead of living in a worldly way, to accumulate property and to attain social distinction and political power; they were in the world, but not of it; they were the faithful and righteous ones whom God could approve and bless.* It seems probable, since Jesus in the Beatitudes has taken up many current Jewish phrases to put upon them His own interpretation, that He here used the phrase 'the poor' in the sense of, and with regard to, the current conception of it. In that case the words 'in spirit,' which in Matthew are associated with the phrase, but not in Luke, may be an expansion of the original utterance made in the Greek for the purpose of protecting Jesus' words from a material misinterpretation.† The *τῷ πνεύματι* would, then, although a later addition, preserve the original meaning of Jesus; as it stands, it limits *οἱ πτωχοί* (not *μακάριοι*) as a phrase of closer definition,‡ like 'the pure in heart' of Mt 5^8 and the 'lowly in heart' of Mt 11^{29}; cf. also Mk 8^{12}, 1 Co 7^{34}. It fixes the sphere in which the poverty is predicated. Jesus means, not that spiritual poverty is in itself a good thing, but that the man who has a deep sense of his spiritual deficiency and dependence upon God will turn to Him, and will then receive the spiritual blessings which he needs. Therefore the phrase 'the poor in spirit' designates an internal rather than an external condition, a moral and spiritual rather than an economic status.§

---

* See the discussion of the term in the footnote * on p. 14^b.

† Tholuck, *Bergrede*^{5}, p. 59 (Eng. tr. p. 66): 'There can be no doubt—and this should be carefully noted—that all the ideas which meet us here in the Sermon on the Mount, those of the Kingdom of God, the righteousness of that Kingdom, the poor in spirit, the pure in heart, seeing God, etc., were no new ideas, but well-known ones, of which Christ only revealed the deepest meaning.' The passages of the OT in which these ideas are found will he indicated below.

‡ Mt 5^3 *μακάριοι οἱ πτωχοὶ τῷ πνεύματι, ὅτι αὐτῶν ἐστιν ἡ βασιλεία τῶν οὐρανῶν*; Lk 6^{20} *μακάριοι οἱ πτωχοί, ὅτι ὑμετέρα ἐστὶν ἡ βασιλεία τοῦ θεοῦ.* The Gospel of Matthew usually, though not always, employs the phrase *ἡ βασιλεία τῶν οὐρανῶν*, while all the other Gospels and the other books of the NT use *ἡ βασιλεία τοῦ θεοῦ.* Did Jesus use both phrases in their Aramaic equivalents? If so, did the two phrases mean different things? Or was only one of the phrases used by Jesus, the other being of a different origin? If so, which was Jesus' phrase? These questions have been variously answered. The majority of scholars, however, are of the opinion that the two phrases are identical in meaning, that Jesus was accustomed to use both of them, and that His more frequent term was 'the Kingdom of God.' (See esp. O. Holtzmann, *Leben Jesu*, pp. 124–126). The other phrase, 'the Kingdom of Heaven,' is to be explained as arising out of the fallacious reverence for the name of God which characterized the Jewish people and led them to use circumlocutions instead of speaking the name itself. Jesus, however, did not share this superstitious regard for the name of God; on the contrary, he spoke of God constantly. The First Gospel adopted the phrase, 'the Kingdom of Heaven,' which probably was in general use among Jewish Christians, in order to be more acceptable to the Jewish readers for whom it was intended. On the other hand, in the Second and Third Gospels, and elsewhere, the phrase 'the Kingdom of God' occurs, since this universal use of terms was more acceptable to the great body of Gentile Christians for whom and among whom most of our NT books were written.

* So Ps $9^{12.18}$ $10^{2.9.12}$ 12^5 40^{17} 69^{29} $72^{2.4.12.13}$ $82^{2\text{-}4}$ 86^1 109^{22} 113^7, Is 61^1 (cf. Lk 4^{18}) 66^2. See Achelis, *Bergpredigt*, p. 7 f.; Kabisch, *SK*, 1896; Klöpper, *Zeitschr. f. wiss. Theol.* 1894; Wellhausen, *Israelitische u. Jüdische Geschichte*^{3}, 1897, ch. 15; Rahlfs, עָנִי *und* עָנָו *in den Psalmen*, 1892; J. Weiss, *Predigt Jesu vom Reiche Gottes*^{2}, 1900, pp. 183–185; Driver, art. POOR in vol. iv., who argues for Rahlfs' distinction between עָנִי (poor, needy) and עָנָו (humble towards God).

† It is obvious that when Jesus' words came into the hands of the Gentiles, who were not familiar with the history, literature, ideas, and religious terminology of the Jews, there would be great danger of His words being misunderstood. The first Beatitude, for instance, was likely to be misinterpreted, because the term 'poor' was used by the Gentiles only in a material sense, not with an ethico-religious content. It was therefore necessary to add the words 'in spirit,' in order that Jesus' meaning might not be misunderstood. Modern English usage of the term 'poor' is also economic instead of religious, and therefore we also need the words 'in spirit' to guard against misinterpretation.

‡ So H. Holtzmann, Ibbeken, Kabisch, Klöpper, Tholuck, B. Weiss. The *πνεύματι* does not refer to the Holy Spirit, as maintained by Achelis (*Bergpredigt*, p. 5); so that the phrase 'the poor in spirit' does not mean 'the poor through the Holy Spirit,' nor 'the poor by the Holy Spirit,' nor 'the poor in the possession of the Holy Spirit.' Rather, the *πνεύματι* refers to the spiritual nature of the man himself.

§ So the best of the ancient commentators, Origen, Chrysostom, Augustine, Theophylact, and nearly all modern scholars. Tholuck, *Bergrede*^{5}, p. 63 f. (Eng. tr. p. 70 f.): 'a consciousness of poverty in the blessings of salvation. . . . The idea of

This is in accordance with the tone of the whole group of Beatitudes, for they present an ideal of character and service in its essential elements; while external conditions, the possession or lack of property, are not essential. The Beatitudes and Woes, as given by Luke, speak only of material want and misery; [*] but that is a perversion of Jesus' teaching as recorded in Matthew. It is intelligible how the more spiritual teaching might have been coarsened in transmission, under the influence of strongly held false theories concerning a man's relation to the material world, to the form which Luke derived from his sources; but how could the reverse have happened? Who could subsequently have perfected Jesus' teaching by creating the lofty spiritual conceptions contained in Mt 5^{3-12}? [*]

Jesus wished to establish, as the first principle of the better life, that true well-being is not reckoned in earthly goods, or obtained by them; on the contrary, ideal manhood and womanhood come through complete self-committal to God, drawing from Him our spiritual sustenance, making His will our will, and finding in His supreme purpose the only object of our lives. Of such men, and of such alone, can it be said that the Kingdom of God is theirs. He would turn men away from the customary material standard of well-being to the pursuit of the highest good, where one's external conditions become a matter of comparative indifference. Those are blessed who, instead of being self-seeking and self-sufficient, strive earnestly for that communion and co-operation with God which will enable them to realize the highest type of character and to perform the highest kind of service. The conditions of possessing the Kingdom are not external but internal, not material but spiritual. Poor and rich may alike possess it. The poor have it, not as a reward or a recompense for their poverty, but because they set their hearts on things which are above; and the rich have the Kingdom for the same reason, inasmuch as they use their material possessions for the spread of righteousness, truth, joy, and peace.

The second clauses of the Beatitudes respectively express the results of realizing the character or performing the service described in the first clauses. They are promised blessings which correspond to current longings, and are worded in the fixed phrases by which those longings had of old found expression. These blessings, although varied in form, are kindred in meaning; they promise not so much a number of different things, as they convey the idea in various ways that the entire good of which God is the creator and provider will come to those who sincerely seek it in the way He appoints. [†] 'The Kingdom of God' was a phrase which had long been used to express all conceivable good, to sum up the longings of the devout souls of Israel. Jesus therefore tells them how they may obtain all their desire. And the possession of the Kingdom is not a thing of the far distant future, but of the immediate present: 'theirs is the Kingdom of Heaven.' The Kingdom of God, while it has its consummation in the future, was an existing reality when Jesus spoke; and its blessings were available at once for those who would comply with the conditions of receiving them. [‡]

(2) 'Blessed are they that mourn: for they shall be comforted.' [§] Here, also, Jesus has taken up an OT phrase, which may be seen in Is 61^{1-3} ('to

---

physical poverty is here carried over into the sphere of poverty of spirit, . . . those poor are pronounced blessed who are sensible of their spiritual poverty.' Kabisch, *SK*, 1896, says that the τῷ πνεύματι is added 'in order to remove the poverty into the realm of the religious sense.' Klöpper, *Zeitschr. f. wiss. Theol.* 1894, holds that there is no reference in the Beatitude of Matthew to the poor in social position; rather they are the poor in spiritual things, those who in opposition to the wise and understanding (Mt 11^{25}) are characterized as 'babes' or 'little children' (Mt 18^{3}); dissatisfied with the traditional wisdom of the scribes, they long for direct Divine instruction. J. Weiss, *Predigt Jesu vom Reiche Gottes*^{2}, 1900, pp. 130–132: 'They are called "poor" . . . not because they have no money, but because, as the עַם הָאָרֶץ, they have no religious, and therefore no social, standing. They do not belong to the righteous, pious class, but are shunned by them like the lepers. . . . They could not and would not conform to the conventional standard of piety. But what was to hinder them from pouring out their heart before their God in their inner chamber? They live as children of God in a true simplicity, naïve and unassuming, without great joy over their condition; because it has been so deeply impressed upon them that they never can attain the true righteousness according to the Pharisaic ideal. . . . They do not realize that they already have, what is precious in God's sight, τὸ πραῢ καὶ ἡσύχιον πνεῦμα (1 P 3^{4}). They do not see that God, in his mysterious wisdom, has chosen to pass by the wise and the learned in order to reveal salvation to just such νήπιοι as they (cf. Lk 10^{21}, Mt 18^{1-4}).'—It is true that a materialistic interpretation of the first Beatitude prevailed in the early and middle Christian centuries, whereby voluntary poverty was pronounced blessed; and this view is still taken by Roman Catholic commentators, as Hugo Weiss, *Bergpredigt*, p. 10. The Lukan form of the Beatitudes arose out of and gave a foundation for this false attitude towards material things. But the whole notion of asceticism is wrong: Jesus neither taught nor practised it; He did not regard material poverty and physical misery as in themselves meritorious. It cannot be said that the poorer men are, the better they are; not even when the poverty is voluntary. Jesus did not require the abandonment of wealth, except in specific cases where it formed an insuperable obstacle to spiritual well-being; what He did require was the supremacy of the spiritual life and the right use of material things.

[*] So O. Holtzmann, *Leben Jesu*, 1901, p. 186 f. Similarly Plummer, *Comm. on Luke*, p. 179: 'In the four [Beatitudes] that Luke gives, the more spiritual words which occur in Matthew are omitted, and the blessings are assigned to more external conditions. Actual poverty, sorrow, and hunger are declared to be blessed (as being opportunities for the exercise of internal virtues); and this doctrine is emphasized by the corresponding Woes pronounced upon wealth, jollity, and fulness of bread (as being sources of temptation).' Here the materialistic tone of the Lukan Beatitudes is recognized, but the writer has avoided the problem of adjusting the two accounts of the Beatitudes to each other by regarding them as two distinct utterances on different occasions; this is to ignore the facts and data of the Synoptic problem. Wendt, *Lehre Jesu*, ii. 167 f., thinks that the economic poor are meant: 'Because this salvation of eternal life offers an incomparably rich return for all troubles of the earthly life, Jesus can at the beginning of His discourse concerning the true righteousness pronounce blessed the poor, the hungry, the mourning, the persecuted, because of their future participation in the heavenly blessedness of the Kingdom of God. His meaning here is not that in earthly poverty and unhappiness as such lies the ground for their longing for the future salvation of the Kingdom of God; still less in the following Woes against the rich, the satisfied, the laughing, and the praised, does He present earthly happiness as in itself the ground for the future loss of salvation. He intends only to affirm with the greatest emphasis that all future salvation is the single true and full salvation, in comparison with which the earthly unhappiness is insignificant and earthly happiness is not really such. Consequently he declares that those very persons who from the world's point of view are counted miserable are the truly happy ones because of the part which awaits them in that future salvation.' Wendt holds that the Lukan form of the Beatitudes, together with the Woes, is authentic as against the Matthew report, and can therefore give this interpretation; but if the Beatitudes of Matthew are the more authentic report, then Jesus' teaching at this point must be understood as presented by them—and they give a very different set of ideas. Kabisch, *SK*, 1896, interprets: 'Blessed are those who have freed their minds from the earthly wealth: for theirs is instead the heavenly wealth. . . . The absence of earthly goods and happiness is placed in the foreground, here [in Matthew] as in Luke; but not as there that accidental poverty must be blessed, only that voluntary, quiet and meek poverty will be blessed. . . . I regard the Lukan form [of the first Beatitude] as the more original, but at the same time hold that the First Evangelist in his added phrase has come nearer to the actual meaning of Jesus than the Third Evangelist, who with Ebionitic tendency has interpreted the words of the Lord which lent themselves to this apparent condemnation of all material possessions, as well as other words concerning the Kingdom, in a similar way.'

[*] Yet O. Holtzmann, *Leben Jesu* (1901), p. 186 f., holds that just this change was made.

[†] So Kabisch, *SK*, 1896; Ibbeken, *Bergpredigt*^{2}, p. 19. Tholuck, *Bergrede*^{5}, p. 57 (Eng. tr. p. 64), says: 'If we consider the substance of the several promises, we shall find that they are all essentially identical, and that the difference is merely rhetorical; formally, they correspond to the thing desired or possessed, but each of them really comprises all spiritual blessings.'

[‡] Upon the meaning and use of the term 'Kingdom of God' in Jesus' teaching, see esp. Wendt, *Lehre Jesu*, ii. 293–328.

[§] Mt 5^{4} μακάριοι οἱ πενθοῦντες, ὅτι αὐτοὶ παρακληθήσονται; Lk 6^{21b} μακάριοι οἱ κλαίοντες νῦν, ὅτι γελάσετε. The Lukan form is secondary, and its harsh, superficial tone is unsatisfactory. Compare with it Ja 4^{9}.

comfort all that mourn,' אֲבֵלִים) and Ps $126^{5.6}$. The term 'mourning' (πενθοῦντες) is so general a one that it is difficult to determine precisely its scope. The early commentators inclined to regard it as the sorrow of penitence for sin (cf. 2 Co 1^{4} 7^{10}), while others think of it as the sorrow which comes from afflictions, adversities, and persecutions.* There seems no sufficient reason why the term should not be understood here in the inclusive sense, to designate all those experiences of life—internal or external, physical, mental, or spiritual,—which bring sadness and sorrow to men. The world is full of mourning; no one escapes the anguish of pain, disappointment, bereavement, and conflict with sin. And men have always longed for a better day, when this mourning shall be no more. It was one element of the Messianic hope that with the advent of that glorious Divine Kingdom complete comfort and consolation for the world's sorrows would be given to God's faithful ones, Is 61^{2}; cf. Lk 2^{25} 4^{18}. Jesus gave the assurance that this hope would be realized. The Apocalyptist has repeated with thrilling joy the promise: 'And he shall wipe away every tear from their eyes; and death shall be no more; neither shall there be mourning, nor crying, nor pain any more: the first things are passed away' (Rev 21^{4}).

Although the promise of comfort is in the Beatitude expressed in the future tense, its bestowment is not to be regarded as exclusively eschatological. As the Kingdom was present among men at the time when Jesus spoke these words, so the comfort of the Kingdom was already a present reality and available to all. Not that all mourning was then to cease,—that stage belongs to the future consummation of the Kingdom,—but that Jesus brought a true consolation for all sorrow, in the knowledge that God is a loving Father who does all things well, and that all men, like the Son Himself, are perfected through suffering (He 5^{8} 12^{3-11}). Rest and peace came to the world in and through Christ (Mt $11^{28.29}$, Jn $14^{1.27}$ 16^{33}).

(3) 'Blessed are the meek: for they shall inherit the earth.'† The idea is that of Ps 37^{11} 'the meek shall inherit the earth,'‡ and the LXX renders עֲנָוִים by πραεῖς. Meekness is an OT ideal, and is closely related to that of the 'poor,' which Jesus had already taken up in the first Beatitude. This same Hebrew word is rendered in the English VSS now by the one word, now by the other; also אֶבְיוֹנִים, commonly translated 'poor,' is sometimes translated 'meek' (cf. Is 61^{1} in RV text and margin, and see Lk 4^{18}). In Is 66^{2} the term עָנִי is associated with נְכֵה־רוּחַ and חָרֵד עַל־דְּבָרִי, where the three ideas seem closely akin: 'To this man will I look, to him that is poor and of a contrite spirit, and that trembleth at my word.' Cf. also Ps 25^{9-13}, Pr 16^{19}. The OT conception of meekness seems therefore to concern a man's attitude towards God rather than towards other men. The opposite of this meekness is pride and arrogance towards God, and such men He will bring to nought, Ps 75^{4-7} 94^{2-4}. It is primarily His attitude towards God which Jesus has in mind when He says, 'Take my yoke upon you, and learn of me; for I am meek and lowly in heart: and ye shall find rest unto your souls' (Mt 11^{29}). And the 'meek' who in the third Beatitude are pronounced blessed are those who live in trustful submission to God, seeking to know and to do His will; humility rather than self-assumption and pride characterizes them. Compare also the parable of the Pharisee and the Publican, Lk 18^{9-14}. They become a part of the great world, and are fellow-labourers with God in His great purposes, instead of being ends in themselves and isolated elements in the Divine system. They do not thereby lose their identity and their importance; instead, by complete self-committal to God, they find the perfect realization of themselves, and achieve a personality of greatest influence in the universe.

A necessary outworking of this meekness towards God is a quality of gentleness, forgiveness, and self-abnegation in a man's relations to his fellow-men. This is the conception which St. Paul seems to have had of the meekness of Jesus, 2 Co 10^{1} (cf. also Eph 4^{2}, Ja 3^{17}, 1 P 3^{4}); and it is the meaning which the earlier interpreters found in this Beatitude, since they paid more heed to the classical Greek usage of πραεῖς than to the Hebrew conception of עָנִי. The Greeks had scarcely an idea of that humility of man towards God which formed so true and striking an element in the religion of Israel.

When Jesus promised that the meek 'shall inherit the earth,' He adopted the popular phrase of the Hebrew covenant conception, which was then in use among the more deeply religious as a symbolic expression to denote all those good things which were to come with the Messianic kingdom.* The material and ephemeral elements of this hope Jesus passed by; but the spiritual content of it, the inspiring expectation that God would triumph over the world in the persons of His faithful and obedient servants among men, He reaffirmed. Nor did Jesus conceive that this supremacy of the meek on the earth would be solely eschatological and catastrophic; quite the reverse, for the growth of the Kingdom was to be gradual (Mk 4^{26-32}), and the dominance of the world by meekness and humility is progressively realized. Men of such character become increasingly influential and successful; the Divine ideal is making its way among men. Every passing year marks real advance towards the supremacy of the people of God.†

(4) 'Blessed are they that hunger and thirst after righteousness: for they shall be filled.'‡ The

---

* For the former view, Clem. Alex., Chrysostom, Jerome, and recently Achelis; for the latter view, Augustine, Luther, Calvin, and recently Ibbeken. B. Weiss holds that it is impossible to tell whether the one or the other idea is intended or both. Tholuck, *Bergrede*^{5}, p. 73 (Eng. tr. p. 79), says: 'The mourning spoken of is the sorrow of penitence immediately flowing from a felt poverty of spirit. . . . This penitential grief is not, however, to be regarded as confined to the period of conversion, but ought to be viewed as a continuous condition of the soul.'

† Mt 5^{5} μακάριοι οἱ πραεῖς, ὅτι αὐτοὶ κληρονομήσουσιν τὴν γῆν. Luke has no parallel.

‡ Bacon, *Sermon on the Mount*, pp. 116, 127, holds that this Beatitude was not given by Jesus, but 'is a mere scribal gloss, a marginal addition from Ps 37^{11}, which has crept in after v.^{3} in some manuscripts, after v.^{4} in others.' This is a possible, but not a likely, hypothesis.

* The phrase יָרַשׁ אֶת־הָאָרֶץ arose in a literal sense, with reference to the inheritance of the Promised Land of Canaan by the Israelites; cf. Gn 15^{7}, Dt 4^{38}, Jos 14^{9}. After the Israelites had come into possession of Canaan, the conception was enlarged, and the phrase became figuratively used to designate an anticipated material, moral and spiritual supremacy of the people of God on the earth, as in Ps 37, esp. vv.$^{9.11}$, already quoted, and in Ps 25^{9-13} 'The meek will he guide in judgment, and the meek will he teach his way. . . . His soul shall dwell at ease, and his seed shall inherit the land.' See also Is 60^{21}, Dn 7^{27}; and in the NT the idea can be seen in Mt 25^{34}, Mk 12^{7}, Ro 4^{13}, Gal 3^{18}, Rev $5^{9.10}$.

† Tholuck, *Bergrede*, p. 78 (Eng. tr. p. 83): 'In this promise humility and meekness are by him pronounced to be the truly world-conquering principle, with reference to their ultimate victory in the history of the future.' B. Weiss thinks this idea lies very remote from the passage, and describes the meek as 'those quiet sufferers who, trusting in God, bear, without bitterness or a feeling of revenge, the abuse of those who afflict and persecute them. The painful consciousness of their own shortcomings makes them humble when they are treated unjustly by others.' Certainly this teaching is germane to Jesus (Mt 5^{39}), but it comes under the eighth Beatitude rather than under the third.

‡ Mt 5^{6} μακάριοι οἱ πεινῶντες καὶ διψῶντες τὴν δικαιοσύνην, ὅτι αὐτοὶ χορτασθήσονται. Lk 6^{21a} μακάριοι οἱ πεινῶντες νῦν, ὅτι χορτασθήσεσθε. It may be that the original saying was shorter than that which appears in Matthew's Greek form, the τὴν δικ. or even καὶ διψ. τὴν δικ. being possibly an expansion; but it seems sufficiently clear that in any case the Matthew account preserves the true idea, and that the material tone of Luke's Beatitude (compare his corresponding Woe, 6^{25}) is a later perversion of Jesus' utterance.

terms ‘hunger’ and ‘thirst,’ representing the fundamental physical necessities, had been of old used symbolically to denote intense spiritual longing, cf. Is 49^{10} $55^{1.2}$ 65^{13}, Am 8^{11}, Ps $34^{9.10}$ 42^{1} (and in the NT see Jn 6^{35} 7^{37}, Rev $22^{1.2}$); *χορτάζομαι* also was used figuratively of spiritual supply, Ps 17^{15} 107^{9}. Of the meaning of this Beatitude there can be no doubt. The righteousness which men are to seek is that righteousness which the entire Sermon is designed to elucidate and to enjoin. Those who earnestly desire it are pronounced blessed, because it is theirs; every one who sincerely wills to have righteousness obtains it (Rev 22^{17}). Righteousness was the technical Jewish term to connote that quality and quantity of character and conduct which God requires of men, and which it is the one aim of life to attain. It was Jesus' mission to correct and to perfect men's conception of righteousness, and to inspire them to its actual realization. In this Beatitude He speaks of the blessedness of those who long for righteousness, while in the other Beatitudes and throughout the discourse He shows them what true righteousness is, and how it is to be obtained. Since righteousness consists in right character and service, it cannot be externally bestowed,[*] but must be achieved, by each individual, with the help of God through Christ. And its achievement is a process of growth into the likeness of our Divine Example. It is the glory of the Gospel that to every desirous soul is promised the attainment of God's ideal for him and membership in the eternal Kingdom of the sons of God.

(5) ‘Blessed are the merciful: for they shall obtain mercy.’[†] It is probably by intention that this Beatitude stands immediately after the one concerning righteousness, for in both OT and NT the two ideas of righteousness and mercy are correlative:[‡] Mic 6^{8} ‘He hath showed thee, O man, what is good; and what doth the Lord require of thee, but to do justly, and to love mercy, and to walk humbly with thy God?’ (cf. also Ps 18^{24-26}, Is 58^{1-11}); Mt 23^{23} ‘Woe unto you, scribes and Pharisees, hypocrites! for ye tithe mint and anise and cummin, and have left undone the weightier matters of the law, judgment [*i.e.* justice[§]], and mercy, and faith.’ There is no righteousness without mercy, whether of God or man. One of the most frequent OT ideas is that God is merciful towards men, and one of its most frequent injunctions is that men must be likewise merciful towards one another. Jesus re-established both teachings, and gave them great prominence in His instruction. Mercy is twofold: subjective and objective. Subjectively, mercy requires that a man shall be loving and forgiving towards all; not revengeful nor cherishing ill-will; not thinking evil of others (Mt 18^{21-35}, 1 Co 13^{4-7}, Eph 4^{32}). Objectively, mercy requires that a man shall show deep, inexhaustible sympathy with all his fellows, manifesting itself in unremitting, helpful service, and in a loving considerateness towards all (Mt 5^{43-48} 9^{10-13} 12^{7} 25^{31-46}, Lk 10^{25-37} 16^{19-31}, Ro 12^{9-21}, Gal $5^{22.23}$, Col 3^{12-14}, 1 Jn 3^{14-18}). It is striking that in the Beatitudes no specific mention is made of *love*, although love (towards God and man) is proclaimed by Jesus as the sum of all duty (Mt 22^{34-40}, cf. Ro 13^{8-10}, Gal 5^{14}). And farther on in the Sermon, at Mt 5^{43-48}, the duty of love is explicitly taught. But the fact is, that although the term ‘love’ does not appear in the Beatitudes, yet the idea of love underlies every one of them. Roughly grouped, the first four concern love to God, the last four love to men. All that the eight Beatitudes contain is but an application of the principle of love to the most important aspects of life, formulating more specifically what love requires in the essential experience and relations of human existence.

The mercy of God precedes the mercy of men, and is its prototype. Inasmuch as God is merciful towards men, He rightly requires that men shall be merciful towards one another. In the parable of the Unmerciful Servant this is most impressively taught, Mt 18^{21-35}. And as the last verse of the passage sets forth, unless men show mercy in their relations to each other, God cannot ultimately deal mercifully with them; cf. also Mt 6^{12-15}, Mk 11^{25}, Eph 4^{32}, Ja 2^{13}. This is not retaliation on God's part. If it seems severe, it is yet a necessary provision to the end that love may triumph in His world. If love is to transform all and to reign supreme, then what is unloving must disappear.

(6) ‘Blessed are the pure in heart: for they shall see God.’[*] The phrase ‘pure in heart’ occurs in Ps 73^{1} (בָּרֵי לֵבָב, LXX *τοῖς εὐθέσι τῇ καρδίᾳ*) and in Ps 24^{4} (בַּר לֵבָב, LXX *καθαρὸς τῇ καρδίᾳ*); cf. also Ps 51^{10}. In the NT the phrase is only twice used (1 Ti 1^{5}, 2 Ti 2^{22}), although the thought is all-pervasive. The term *καρδία*, corresponding to the Hebrew לֵב and in the NT deriving its signification therefrom, denotes the essential personality, the inner central self, where all feeling, thought, and action originate.[†] In its dative form here it indicates the sphere in which the purity is predicated, like *τῷ πνεύματι* in the first Beatitude. By ‘purity of heart’ is meant that profound sincerity and uprightness of thought and feeling which produces an honest, clean, holy life in all its elements and relations. It does not need to be said that this condition of things can exist only where the individual is committed, body and soul, to the love and obedience of God, and regards all men as his brethren and himself as a sacred trust. Jesus has in mind the superficial standards of goodness which prevailed in His day. The rich young man had kept all the commandments from his youth, and yet his heart was set upon his material possessions (Mk 10^{17-31}); the Pharisees outwardly appeared righteous unto men, but within they were full of hypocrisy and iniquity (Mt 23^{25-28}). Against such shallow, false conceptions of right living, Jesus most emphatically sets the duty of real righteousness, of purifying the fountain of a man's life in order that what flows from it may indeed be pure.

That the ‘pure in heart’ ‘shall see God’ is an essential result of their character, not a mere unrelated reward for their goodness. Nor is this seeing of God a solely eschatological event; for, while the perfect vision of Him belongs to the future, there is a present vision which increases day by day with the growth of the pure in heart. Seeing God is, of course, not a physical process, but a spiritual one; it is to enter into full communion with Him, to be spiritually in His immediate presence and to be at rest there, to share directly His favour, joy, and blessings. The phrase to 'see God' arose in ancient Hebrew usage out of the fact that men counted it a supreme privilege to come into the presence of an earthly king (1 K 10^{8}, Est 1^{14}); * how much more would it mean to come into the presence of the King of kings! The hope of such a vision of God grew with the development of the Hebrew religious conceptions, and became the rapturous aspiration of the OT saints (Ps 11^{7} 'the upright shall behold his face'; 17^{15} 'As for me, I shall behold thy face in righteousness; I shall be satisfied, when I awake, with thy likeness'). In the NT also the aspiration, now become a certainty, reappears (1 Jn 3^{2} 'we shall see him even as he is'; He 12^{14}, Rev 22^{4}); the veil of the temple has been rent in twain (Mt 27^{51}), for in and through Christ men have immediate access to God. This standing in the very presence of God, this direct communion with Him and direct responsibility to Him, is more than a theological theory—it is an actual and essential fact of the utmost practical significance. God is not an absentee ruler, who can be dealt with only through intermediaries; on the contrary, those who love Him live in His presence, rest in His care, receive His blessings, and participate in His joy.

---

[*] Neither in this passage nor elsewhere does Jesus use the term ‘righteousness’ in the forensic sense to which St. Paul gave currency. That God does, in His love and mercy, pardon and receive every man who in and through Christ sets himself seriously towards the Divine ideal, is abundantly taught by Jesus; but He does not use this term to denote that idea. So nearly all commentators. Achelis, *Bergpredigt*, p. 22: ‘The words indicate that high degree of longing which rests upon the certainty that the object of the longing is essential to life, that without it life would become death. Righteousness is the object of such desire; what is meant by it is that moral condition which is in accordance with God's will.’ B. Weiss defines the righteousness here referred to as that ‘righteousness which corresponds to the norm of the Divine will, the highest good of every true Israelite, upon the possession of which depends the certainty of God's good pleasure and the participation in all the promises. The Kingdom of God proclaimed by Jesus offers men this good in an abundance which will satisfy all longings, bring full contentment, and fill them with righteousness. For in the Kingdom of God, and only there,—though there with the greatest of certainty,—will the ideal of righteousness be actually realized.’

[†] Mt 5^{7} *μακάριοι οἱ ἐλεήμονες, ὅτι αὐτοὶ ἐλεηθήσονται.* Luke has no parallel.

[‡] So closely connected are the two ideas that the Heb. צְדָקָה, which more commonly should be and is represented in the LXX by *δικαιοσύνη*, is at times translated by *ἐλεημοσύνη*; cf. Dt 6^{25} 24^{13}, Ps 24^{5} 33^{5} 103^{6}, Is 1^{27}. In the Sermon passage Mt 6^{1} *ἐλεημοσύνην* appears as a variant reading of *δικαιοσύνην*; the former, however, is not strongly attested (EL against ℵBD), and is accepted by few scholars.

[§] So H. Holtzmann, B. Weiss, Wendt; cf. Ps 33^{5}.

[*] Mt 5^{8} *μακάριοι οἱ καθαροὶ τῇ καρδίᾳ, ὅτι αὐτοὶ τὸν θεὸν ὄψονται.* Luke has no parallel.

[†] See Wendt, *Lehre Jesu*, ii. 116–121; Cremer, *Bibl.-Theol. Wörterbuch*[7] (1892), *in loc.*; art. HEART in vol. ii.

(7) 'Blessed are the peacemakers: for they shall be called sons of God.'† The term *εἰρηνοποιός* occurs in the LXX form of Pr 10^{10}, and the thought is present also in Pr 12^{20}. But 'peace' was not so common an OT idea as those dealt with in the previous Beatitudes. Some have maintained that the meaning of *εἰρην.* in this passage is exclusively passive, *i.e.* 'peaceable.' But the mass of interpreters find a larger meaning, which includes this while containing also an active element—to make peace.‡ Certainly Jesus' idea here is comprehensive; He has in mind to commend and to inculcate the spread of peace—all kinds of peace—among men (cf. He 12^{14}, Ja 3^{18}). In this He is the great leader and example, Mt 11^{29}, Jn 14^{27} (the paradox, Mt 10^{34}), Eph $2^{13\text{-}18}$, Col 1^{20} 3^{15}; for God is the God of Peace, Ro 15^{13}, 2 Co 13^{11}, Ph $4^{7.9}$, 1 Th 5^{23}, He 13^{20}, who sent peace to the earth in Christ, Lk $2^{13.14}$. Peace between God and men was proclaimed by Jesus, and peace between men and their fellow-men was enjoined. Peace therefore is the Christian ideal. Individual composure and social harmony are to be brought about by the concentration of all interests and forces on the achievement of the individual and social ideal as taught by Christ, and by the realization, within one's self and among all, of those Divine principles of concord and co-operation through which alone true peace can be obtained.

The peacemakers 'shall be called sons of God' because in this essential characteristic they are like Him, the God of Peace. The fact that the article does not accompany the *υἱοί* signifies that the designation is to be understood qualitatively. This idea of sonship as consisting in moral resemblance is of Hebrew origin, and is found in both Testaments; cf. esp. Mt 5^{45}, Rev 21^{7}. The expression 'called' sons of God is also a Hebraism, found frequently in the Book of Isaiah; its special function here seems to be to emphasize the fact of sonship (cf. Mt 5^{19}, 1 Jn 3^{1}) as something not only true, but recognized to be true.

(8) 'Blessed are they that have been persecuted for righteousness' sake: for theirs is the kingdom of heaven. Blessed are ye when men shall reproach you, and persecute you, and say all manner of evil against you falsely, for my sake. Rejoice and be exceeding glad, for great is your reward in heaven: for so persecuted they the prophets which were before you.' * Although the essence and purpose of the gospel was peace, nevertheless those who enjoyed and endeavoured to spread this peace in the world would incur reproach and abuse from their fellow-men. The OT does not supply passages similar in form to this Beatitude, but the Hebrews had no lack of experience in persecution for righteousness' sake, and the conception is developed with marvellous insight and feeling in Is 40–66. In the NT it is an ever-present idea —the sufferings of the OT saints are recalled (He $11^{33\text{-}40}$), Jesus lives and dies a martyr to this principle, He predicted persecution for His followers (Mt $5^{10\text{-}12}$, Jn 16^{2}), and this persecution actually befell them (Jn 9^{22}, Ac 5^{41} $8^{1\text{-}3}$, 1 P 3^{14} $4^{14\text{-}16}$). The primitive Christians bravely endured and faithfully preached when they were despised, ostracized, punished, and maliciously slandered.†

* On the 'vision of God' as held by Philo, see Schürer, *Geschichte d. Jüdischen Volkes* ^{3} (1898), vol. iii. p. 561.

† Mt 5^{9} *μακάριοι οἱ εἰρηνοποιοί, ὅτι [αὐτοὶ] υἱοὶ θεοῦ κληθήσονται.* Luke has no parallel.

‡ For the passive sense only, Grotius, Socinus, Wetstein, and recently Ibbeken, *Bergpredigt* ^{2}, p. 43. For an active meaning also, Luther, Meyer, Tholuck, Bleek, Achelis, H. Holtzmann, B. Weiss, and the RV. Others incorrectly regard the 'peace' mentioned as that obtained by the atoning work of Christ; so Chrysostom, Stier.

* Mt $5^{10\text{-}12}$ *μακάριοι οἱ δεδιωγμένοι ἕνεκεν δικαιοσύνης, ὅτι αὐτῶν ἐστιν ἡ βασιλεία τῶν οὐρανῶν. μακάριοί ἐστε ὅταν ὀνειδίσωσιν ὑμᾶς καὶ διώξωσιν καὶ εἴπωσιν πᾶν πονηρὸν καθ' ὑμῶν ψευδόμενοι ἕνεκεν ἐμοῦ. χαίρετε καὶ ἀγαλλιᾶσθε, ὅτι ὁ μισθὸς ὑμῶν πολὺς ἐν τοῖς οὐρανοῖς· οὕτως γὰρ ἐδίωξαν τοὺς προφήτας τοὺς πρὸ ὑμῶν.* Lk $6^{22.23}$ *μακάριοί ἐστε ὅταν μισήσωσιν ὑμᾶς οἱ ἄνθρωποι, καὶ ὅταν ἀφορίσωσιν ὑμᾶς καὶ ὀνειδισωσιν καὶ ἐκβάλωσιν τὸ ὄνομα ὑμῶν ὡς πονηρὸν ἕνεκα τοῦ υἱοῦ τοῦ ἀνθρώπου. χάρητε ἐν ἐκείνῃ τῇ ἡμέρᾳ καὶ σκιρτήσατε· ἰδοὺ γὰρ ὁ μισθὸς ὑμῶν πολὺς ἐν τῷ οὐρανῷ· κατὰ τὰ αὐτὰ γὰρ ἐποίουν τοῖς προφήταις οἱ πατέρες αὐτῶν.* With regard to these two reports of what must be regarded as a single utterance, two things are to be said: (1) the corresponding Lukan Beatitude $6^{22.23}$ is parallel not to Mt 5^{10}, but to Mt $5^{11.12}$. It is suggested above that 5^{10} and $5^{11.12}$ may be duplicates, the one or the other passage appearing here through the process of compilation. Since one feature of the Beatitudes was their brief, striking form (like the Ten Commandments of the OT), the original eighth Beatitude must have contained few words, and 5^{10} is closely parallel in form to the preceding seven Beatitudes; both of which things favour its originality. In Luke also the last Beatitude is very long compared with the others. Perhaps, therefore, Mt $5^{11.12}$ and Lk $6^{22.23}$ are varying words from one historical saying, introduced here by a transmitting or editorial hand because of their close similarity in thought to that of the eighth Beatitude. Or another view would be that Mt $5^{11.12}$ is an expansion of the idea contained in Mt 5^{10} by Jesus Himself (or possibly by some subsequent Christian teacher when the persecutions actually came upon the Christians); for the essential thought of the three verses is the same, the general conception of persecution in v.^{10} being expanded in vv.$^{11.12}$ into the specific ideas of verbal abuse, hostile acts, and false reports. (2) The Lukan form of this Beatitude is in several respects secondary in character, *i.e.* it shows greater departure than Matthew's from the probable original form of the utterance. These modifications arose out of a freer handling in transmission, a partial conformity to the new Gentile field in which the material circulated, and a greater yielding to the influence of the actual events of persecution in the Apostolic age. The term *μισήσωσιν* is used in a characteristic Lukan way, cf. Lk 14^{26} 16^{13} 21^{17}. The *ἐκβάλωσιν τὸ ὄνομα ὑμῶν ὡς πονηρόν*, as also the *ἀφώρισεν*, refer to the excommunication of the Christians as heretics from the synagogues and other Jewish relationships—things which actually happened, but which the Matthæan passage does not specifically predict. The *ἕνεκεν ἐμοῦ* of Matthew is more original than the *ἕνεκα τοῦ υἱοῦ τοῦ ἀνθρώπου* of Luke. Lk 6^{23}, first clause, seems modified. And Lk 6^{23}, last clause, shows various secondary elements, due to the denationalizing of the material. These phenomena are constant throughout Luke's Gospel as compared with Matthew's.

† The *ψευδόμενοι* of Mt 5^{11} is attested by ℵBCE and the majority of witnesses; it is omitted by D and certain other witnesses of the 'Western' text. The word is therefore commonly accepted here. But if the new claims for the 'Western' type of text have good foundation, it is not impossible that this *ψευδόμενοι* is, in the terminology of Westcott-Hort, a 'Western non-interpolation.' Jesus, of course, implied the thought which

And in this conduct they were richly blessed—not by the persecutions, but through them; for Jesus, of course, did not mean that persecutions are essential to the development of the ideal life, but only that, where outward circumstances are such as to induce them, they are blessed who steadfastly and joyfully glorify the Gospel. The *ἕνεκεν δικαιοσύνης* of Mt 5^{10} and the *ἕνεκεν ἐμοῦ* of the following verse are synonymous. The persecutions which would afflict Jesus' disciples were to be met in carrying forward the work which He had begun; if they lived as He lived, and taught as He taught, they would experience the same treatment as He had received (Jn 7^{7} $15^{18.\,19}$ 17^{14}). Had He not been a true successor of the OT prophets in suffering for righteousness' sake (Mt 5^{12} $23^{29\text{-}30}$)? With the advancing centuries the kind of persecution directed against Christianity has changed, and the amount has lessened; but Christian people can never expect to be free from misinterpretation, ridicule, and abuse until all men become devoted to the righteousness and truth for which Christianity stands. And this Beatitude promises the highest blessings to those who in trust, patience, and forgiveness uphold the Gospel, and allow the persecution to fulfil its own true mission in their lives and in the Church (He $12^{5\text{-}11}$).

These promised highest blessings are denoted here by the term 'the Kingdom of Heaven,' so that in the eighth Beatitude Jesus has returned to the promise which accompanied the first Beatitude. This conception of the Kingdom of Heaven is the inclusive one, since it comprises all conceivable good and brings absolute well-being. The phrase 'great is your reward in heaven,' which appears in Mt 5^{12}=Lk 6^{23}, is practically one in meaning with that of Mt 5^{10} 'for theirs is the Kingdom of Heaven.'* The term 'reward' (*μισθός*) was taken over into the Gospel from the commercial, *quid pro quo* terminology of legal Judaism; its legalistic designation had therefore to disappear, and now it was a term to express those gracious spiritual blessings which are at hand and in store for the true children of God. In this Beatitude, then, is promised 'the Kingdom of Heaven' and 'great reward,' but not the Kingdom of Heaven *plus* some additional reward, since the Kingdom itself contains all the good which men can receive.

b. The World Mission.—Mt $5^{13\text{-}16}$ (cf. Lk 11^{33} $14^{34.\,35}$).† The connexion of these verses with those which precede is close. Men of such character and conduct as Mt $5^{3\text{-}9}$ has described will assuredly meet with opposition and calumny, Mt $5^{10\text{-}12}$; but they must not on this account go into hiding—rather must they stand forth, endure persecution, and uphold the Gospel standard in the world, Mt $5^{13\text{-}16}$. Salt is a preservative element, light is a life-giving one;‡ both were current figurative terms for spiritual realities. Men who appreciate the Divine ideal of life which Jesus has presented in the Beatitudes, and who strive to attain it, are God's chosen instruments for the realization of His purpose in the world. They are to live and to work among men, where their character and their deeds may exert their full, true influence. The Christian is not permitted either to withdraw himself from the world, or to live an isolated, unprofessed religious life in the world. He must not only himself be good and do good; he must also help others into the appreciation and the attainment of the same ideal. Salvation is not merely individual; it is social as well. Until Christians do the most and the best they can with themselves and for all others, they are not faithful to the mission which Jesus has laid upon all of His followers, and the consummation of God's Kingdom is in so far delayed.

c. Relation to the Old Testament.—Mt $5^{17\text{-}20}$ (cf. Lk 16^{17}). The logical relation of these verses to what precedes is clear: Jesus has set forth the new Gospel norm of life ($5^{3\text{-}12}$), and has enjoined His followers to live this life openly before the world ($5^{13\text{-}16}$); now He proceeds to show the relation of this new Gospel norm to the Hebrew norm of life which in the OT had come down through the centuries and now held the field among His countrymen. Since Jesus' ideal differed so much from the current scribal standard (as any one could see), the question easily arose—not only among His opponents, the religious leaders of the day, but also among those who 'heard him gladly'—whether this revelation of God's will by Jesus was a wholly new revelation superseding that made by Moses and the Prophets. Jesus gave the answer to this question when He said, 'Think not that I came to destroy the law or the prophets: I came not to destroy, but to fulfil.'*

---

it contains, but it was quite superfluous to express it, and its expression disturbs the proper emphasis in the saying. The word is much more likely to have been added later (as a practically useful expansion) than to have been excluded.

* On the NT term 'reward' see B. Weiss, *Bibl. Theologie des NT*⁶ (1895), § 32; Tholuck, *Bergrede*⁵, pp. 99–101 [Eng. tr. p. 101 f.]; Achelis, *Bergpredigt*, pp. 52–55.

† This section is regarded as not belonging to the original Sermon by Feine, H. Holtzmann, B. Weiss, Wendt, Bartlet, Bacon; it is defended by Achelis, Meyer, Tholuck, and most commentators. If the theme of the discourse is comprehensive, as maintained above, these verses supply a logical and useful portion of the whole treatment given it.

‡ The exact function of salt which Jesus had here in mind is somewhat uncertain: was it its quality to save from decay, as in 2 K $2^{19.\,20}$ (so Meyer, B. Weiss), or its quality as a pleasing condiment, as in Job 6^{6}, Col 4^{6} (so Bleek, H. Holtzmann), or its ritual function as developed in the ancient sacrificial system, cf. Mk $9^{49.\,50}$ (so Achelis, Keil, Tholuck, *Bergrede*⁵, pp. 102–106 [Eng. tr. pp. 105–109])? The second of these views is perhaps too shallow for this passage, and the third too complex, too erudite; it seems a simpler and stronger utterance when the salt is conceived in its fundamental property of a preservative. The other metaphor, light, is one of the most common religious expressions, cf. esp. Is 42^{6} 49^{6} $60^{1.\,2}$, Jn $1^{4.\,5.\,9}$ 8^{12} $12^{35.\,46}$, Eph 5^{8}, Ph 2^{15}, 1 Th 5^{5}. The phrase of v.^{16} *τὸ φῶς ὑμῶν*, means either 'the light which is intrusted to you,' viz. the Gospel (so H. Holtzmann, B. Weiss), or 'the light which you are,' as in v.^{14}.

* Mt 5^{17} *μη νομίσητε ὅτι ἦλθον καταλῦσαι τὸν νόμον ἢ τοὺς προφήτας· οὐκ ἦλθον καταλῦσαι ἀλλὰ πληρῶσαι.* The customary phrase, *ὁ νόμος καὶ οἱ προφῆται*, is a phrase which arises from the Jewish designation of the OT literature, the *νόμος* designating the first five books, the *προφῆται* the remainder; while the whole phrase denotes the OT in its entirety and its unity. It is noticeable that in Mt 5^{17} we have the disjunctive particle *ἤ* instead of the usual *καί* in this phrase. The variation is probably intentional, introduced in order to suggest that the Law and the Prophets were distinct portions of the OT, and that a different attitude might be assumed by the same person towards the two divisions—He might abrogate either one without the other, but He wishes to abrogate neither (so Tholuck, Meyer, Ibbeken, Bruce, Wendt, B. Weiss).

While Jesus mentions 'the Prophets' in 5^{17}, He does not again refer to them throughout the whole following section, $5^{18\text{-}48}$. All that He goes on to say pertains to the Law; He does not present any similar illustrations of how the teaching of the Prophets is to be perfected. This silence concerning the Prophets is explained in different ways. Achelis (*Bergpredigt*, p. 79) thinks that if what He said was true of the Law, that He came not to destroy but to fulfil, *a fortiori* it was true of the Prophets. The more common explanation is that He passed by the Prophets in the remainder of His teaching at this point because He was much more in accord with them, and because the contemporaneous religious teachers paid so little attention to the Prophets that He did not come seriously into conflict with them concerning the prophetic teaching. Recently Professor Briggs (*Expos. Times*, viii. 398) has argued that Mt 5^{17} as given by Jesus stood, 'Think not that I came to destroy the law: I came not to destroy but to fulfil,' for 'the Evangelist added "the Prophets" in order to make the statement refer to the whole OT. This addition destroys the measure of the line, and has nothing in the context of this discourse or in the experience of Jesus to justify it. He was constantly charged with violating the Law, but nowhere with destroying the Prophets.' Bacon takes a similar view (*Sermon on the Mount*, pp. 87, 176). This hypothesis is worthy of consideration. The words *ἢ τοὺς προφήτας* might easily have been introduced subsequently to round out the original utterance of Jesus, for of course He did come to fulfil both Law and Prophets; even though on this historical occasion He had spoken only of the Law, His attitude towards which was liable to be misunderstood and needed careful explanation. The material contained in the First Gospel has perhaps been retouched at several points to show Jesus as the fulfiller of the entire OT, and especially of the Prophets; the

Jesus' constant warfare during His ministry was not so much against the OT standard of life in itself as against the interpretation of the OT standard which was held and taught in His day. For hundreds of years the priests and scribes had been busily engaged with the legal literature of their religion. These labours had resulted in an elaboration and externalization of the Law; so that when Jesus came the current Jewish teaching was in some respects extremely perverse: (1) it largely ignored the Prophetic portion of the OT, which was the very soul of the Hebrew history and Bible; (2) it exalted legalism until Judaism had become a system of precepts for the performance of an innumerable series of great and small duties which few could know and none could fully obey; (3) it so externalized the Law that religion came to consist chiefly in the observance of minute ceremonial performances, while the internal, spontaneous, and genuinely spiritual elements of the Law were neglected or ignored. Against this scribal abuse of the OT, Jesus had on many occasions to assert himself, and He did so with vehemence. He would not keep their fasts (Mk 2^{18}); He would not observe the Sabbath according to their code (Mt 12^{1-14}, Mk 2^{23}-3^{6}, Jn 5^{16-18}); He denounced, with a true prophetic insight and indignation, their whole legislation regarding the ceremonially clean and unclean (Mt 15^{1-20}, Mk 7^{1-23}, cf. Is 1^{10-17}, Mic 6^{6-8}); He continually associated with the sinful and the despised who did not keep the Law, in order to do them good (Mk $2^{16.17}$). Such an attitude on Jesus' part towards the teaching of the scribes and Pharisees was involved in His introduction of a higher standard. In this attitude He was not, in fact, opposing the OT; rather, He was defending it against the false interpretation which had become current. Nevertheless, and quite naturally, the Jewish leaders identified their conception of the OT with the OT itself—how could they be mistaken about it? Therefore Jesus was a traitor to the religion, the history, and the literature of the race; He richly merited a traitor's death. It seemed to them logical and conclusive, because in their bigotry they regarded their own ideas and interpretations as heaven-penetrating and infallible. To be sure, Jesus' teaching went much deeper than the mere removal of the rubbish which had accumulated about the OT during the preceding centuries; His work did not consist solely in re-establishing the OT as it came from the hands of its makers. But had the Jews been true to the OT in the breadth and height of its teaching, they would have welcomed Jesus instead of rejecting Him; they would have been prepared to appreciate and to receive the fuller revelation of God's will which He brought into the world.

That His Gospel was a fuller revelation, Jesus made abundantly plain. He did not re-enact the Ten Commandments, but only re-established the principles which underlay them (Mt 22^{34-40}). He abrogated such provisions and implications of the Law as were adapted only to the earlier stages of civilization, thus: mere external conformity to statutes regarding moral conduct, Mt $5^{21-24.27.28}$; divorce, $5^{31.32}$; the use of oaths, 5^{33-37}; the practice of retaliation, 5^{38-40}; the pride of race, which made men despise other nations, 5^{43-48}. In these matters, which He dealt with as specimen cases, Jesus revealed an attitude, a method, and certain principles which He intended to be applied to the OT throughout.[*] He did not repudiate the past, He did not even break with the best which the past had produced; He only developed and perfected the high ideal of life which had found embodiment in the Hebrew Bible. He did not set the seal of absolute duty and truth upon all that the lawgivers and prophets had taught, but He took up and reaffirmed the essential ethical principles and religious ideas which the Hebrew lawgivers had endeavoured to formulate and the Hebrew prophets had endeavoured to instil into the lives of men. That Jesus regarded His own revelation of the will of God as immeasurably superior to that contained in the OT is most strikingly expressed when He says, 'Verily I say unto you, Among them that are born of women there hath not arisen a greater than John the Baptist; yet he that is but little in the kingdom of heaven is greater than he' (Mt 11^{11}, cf. also Mt 13^{17}). To the same effect is Mk $2^{21.22}$ 'No man seweth a piece of undressed cloth on an old garment; else that which should fill it up taketh from it, the new from the old, and a worse rent is made. And no man putteth new wine into old wine-skins; else the wine will burst the skins, and the wine perisheth, and the skins.' Full of a similar meaning, also, is Jesus' parabolic statement in Mt 13^{52} 'Every scribe who hath been made a disciple to the kingdom of heaven is like unto a man that is a householder, which bringeth forth out of his treasure things new and old.'[†]

When, therefore, Jesus says, 'I came not to destroy, but to fulfil' (Mt 5^{17}), He places in our hands the key to His relation to the OT,[‡] and bids us see the continuity of God's purpose among men, the eternity of right and truth, and the absolute certainty that the Divine ideal is to develop and triumph in the world. In these words is comprised all that Jesus was, and did, and taught; they describe His mission. And He felt Himself competent to perform this mighty work, this manifestation of God to men, because He knew Himself to be chosen by God and qualified by Him for the conveyance of this revelation. Since He was superior to all previous revealers of God, He was capable of passing judgment upon their teachings; He was appointed to pronounce what elements in those teachings were of permanent and what of transient value. And it was also His mission to unify, to perfect, and to establish the whole sum of religious and ethical ideas among men. For this service He had the

---

phrase 'the law and the prophets' is a favourite one in Matthew, compare 7^{12} with Lk 6^{31}; 22^{40} with Mk 12^{31}, Lk 10^{28}. But to this argument it may be replied that the Gospels of Mark and Luke, being written for use among the Gentiles, incorporated tradition from which many of the distinctly Jewish elements and phrases actually employed by Jesus had been removed in the interest of a universal Gospel.

[*] Jesus attacked existing ideas, practices, and institutions only to the extent absolutely necessary for the establishment of His gospel. Many of the evils and wrongs of society He did not attempt to correct, many of the current misconceptions He left for subsequent teachers to remove. His purpose was to transform mankind, not to produce a social or political revolution, and He saw most truly that this transformation was a process for which abundant time must be allowed (Mt $13^{24.33}$, Mk 4^{26-29}). His work was not destructive but constructive, not negative but positive, as all true work for the world is. Progress involves the putting aside of old bottles for new, the correction of false ideas and practices, the clearing away of spurious accretions, the defeat of those who counsel stagnation; but no one who follows Jesus' example in advancing the Kingdom will labour exclusively, or even primarily, to overthrow the false; rather will he lovingly and trustfully devote himself to the establishment of what is true. There is a radical difference between a critical and a helpful attitude in one's work for the world.

[†] On the interpretation of Mt 13^{52} see particularly Wendt, *Lehre Jesu*, ii. 349.

[‡] St. Paul's conception of the relation between the Law and the Gospel is the same as that of Jesus, as may be seen in the Epistles to the Romans and Galatians. In Ro 3^{31} St. Paul claims not to annul but to establish the Law; not in form and letter, but in substance and spirit. This is to acknowledge the great law of progress, or development, in the universe. An acorn fulfils its mission not by remaining an acorn, but by growing into an oak. A child fulfils its mission not by remaining a child, but by becoming a man. So the OT Law was fulfilled and established not by continuing in literal force when men were ready for something better, but by becoming in due time through Christ a perfected revelation (cf. Gal $4^{4.5}$), adapted to the higher needs and possibilities of mankind. On the attitude of Jesus and St. Paul towards the Law, see esp. art. LAW IN THE NT in vol. iii.

Divine ideal within Himself, and needed no external criterion.

So that there seems no room for a difference of opinion as to what Jesus meant by saying that He came to 'fulfil' the Law and the Prophets. He could not have meant that He would secure the literal accomplishment of everything hoped for and promised in the OT, as though the OT simply presented a programme which it was His mission to carry out. Nor could He have meant that He would secure the complete, literal observance and performance of all that is commanded in the Law and the Prophets. He neither did nor attempted to do the one thing or the other. If His Jewish hearers might at first understand Him to promise that in 'fulfilling' the Law and the Prophets He would reaffirm their authority, and render and secure absolute obedience thereto, He yet explicitly and emphatically provided against such a misconstruction of His words by what He immediately adds in vv.$^{18-48}$. Jesus could only have meant that He came to 'fulfil' the Law and the Prophets by first perfecting them and then accomplishing them.*

In accordance with this view of Jesus' thought in Mt 5^{17} must be interpreted His words in Mt $5^{18.19}$. The former, v.^{18}, seems to say: I affirm most emphatically that to the end of time † the OT Law, and every portion of that Law, shall remain and shall be actually and completely realized. The latter, v.^{19}, seems to say: The minute observance and inculcation of this OT Law, in every statute and in every detail, is literally and strictly required of every member of the Kingdom of Heaven.‡ Now neither of these statements could have been made by Jesus; they are diametrically opposed to both His teaching and His practice. The OT Law, as a system and as a code, He distinctly set aside, to supersede it with a Gospel dispensation. It was the spirit, not the letter, of the Law which Jesus approved and continued; the high conceptions of God and man and the noble principles of moral obligation which are taught in the OT, Jesus reaffirmed as true and perpetuated for ever. Do these verses then contain some inconsistent elements, or can their apparent inconsistencies be explained away? The commentators have commonly been satisfied with thinking that these difficult statements in vv.$^{18.19}$ could in some manner be harmonized with Jesus' other teaching and His general attitude towards the OT. Some have attempted to show how the Law in every branch and in all its minutiæ was fulfilled in Christ;* others have maintained that Jesus had reference to the Law only on its ethical side and in general, the ceremonial and predictive elements in the Law being passed over;† and still others, having regard to Jesus' frequent use of hyperbolical language, have held that these verses contain hyperbolical statements, the hyperbole being used not to deceive, but to impress the truth he wished to convey.‡ But an increasing number of scholars have come to question the precise authenticity of the utterances as they stand reported in Mt $5^{18.19}$.* The wording of them presents the rabbinical conception of the Law as eternally and literally valid;† the formulæ used are those of the rabbinical phraseology. The statements themselves are too likely to be misunderstood and to mislead the hearers. The hyperbole is too much in the direction of the literalism which He was strenuously opposing.

---

* This is now the generally accepted interpretation. Tholuck, *Bergrede*^{5}, pp. 124, 126 [Eng. tr. pp. 125, 127]: 'So Christ has come to perfect, to fill up with religious knowledge and life, all that in the OT revelation existed only in outline. . . . That the fulfilling was merely an external supplementing or improvement of the Law cannot be admitted' (see Tholuck's entire discussion of Mt 5^{17}, pp. 113–131 [Eng. tr. pp. 115–131]). Bruce, *Expositor's Greek Testament*, i. 104: 'He brings in a law of the spirit which cancels the law of the letter, a kingdom which realizes the prophetic ideals while setting aside the crude details of their conception of the Messianic time.' B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 102: 'He comes not at all to undo or to abrogate; his mission is a positive one, to provide a new [revelation of the will of God], in which he will bring to perfection all God's revelations and plans of salvation.' Feine, *Jahrb. f. Protest. Theol.* 1885: 'Thus he says that no essential difference exists between the OT revelation and his message of the Kingdom, but that there is a close continuity between them; true religion, presented as an ideal in the OT, is now realized, and the Gospel is the fulfilment of the OT prophecy.' Wendt, *Lehre Jesu*, ii. 338 f.: 'He would say that he recognizes in the Law and the Prophets a true revelation of the will of God, and consequently he does not feel called upon to annul its value for others. But at the same time he would affirm that he could not leave just as it stood the presentation given by the Law and the Prophets of this earlier revelation of God's will, and that he would not explain and confirm that revelation in the detailed manner of the scribal teaching; but that instead he would perfect that revelation, so that the OT presentation of the will of God would find its ideal expression' (see Wendt's entire discussion, pp. 333–351). Similarly also Luther, Meyer, Hilgenfeld, Achelis, Bacon, and many others. H. Holtzmann, *Comm. ü. d. Synoptiker*, p. 104, says, concerning Mt 5^{17}: 'It is open to question whether during the public life of Jesus so radical an interpretation of His mission could have been formulated, either in the positive sense (cf. Ro 10^4) or in the negative sense.'

† The phrase ἕως ἂν παρέλθῃ ὁ οὐρανὸς καὶ ἡ γῆ does not define a *terminus ad quem*, but means 'for ever,' in the sense that He has no pronouncement to make as to a time when the Law shall be no longer valid. So Luther, Calvin, Meyer, Tholuck, Ibbeken, Bruce, B. Weiss; a contrary opinion by Achelis, *Bergpredigt*, p. 84, and Lechler, *SK* 1854. The former view is supported also by the parallel saying in Lk 16^{17} εὐκοπώτερον δέ ἐστιν τὸν οὐρανὸν καὶ τὴν γῆν παρελθεῖν ἢ τοῦ νόμου μίαν κεραίαν πεσεῖν (on this passage and its relation to Mt 5^{18} see esp. Feine, *Jahrb. f. Protest. Theol.* 1885, pp. 31–35). B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 104, says that in the phrase 'till heaven and earth pass away' Jesus 'does not indicate a point after which the Law shall no longer be in existence, but [this] is only a popular expression (cf. Job 14^{12}) for the permanent authority of the Law. Since Jesus is speaking of what shall take place in the present world-era, he states that the Law can never pass away. But of a continuation of the Law beyond the last world-catastrophe, as referred to in Mt 24^{35}, nothing is here said.' The second phrase ἕως ἂν πάντα γένηται is parallel to the ἕως ἂν παρέλθῃ ὁ οὐρανὸς καὶ ἡ γῆ, and in meaning can only be synonymous with it.

‡ Concerning the interpretation of the phrase ὃς ἐὰν οὖν λύσῃ μίαν τῶν ἐντολῶν τούτων τῶν ἐλαχίστων, B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 105, says: 'The phrase "one of the least of these commandments" refers not to the Pharisaic distinction between small and great commands; since Jesus has in v.^{18} denied that there was any such distinction in fact, the reference can only be to such commands as seem less important to superficial observation. But these also stand in real organic union with the ideal contents of the whole.' On the contrary, Achelis, *Bergpredigt*, p. 91: 'It is Jesus himself who here makes the distinction between great and small commandments, and in so far he recognized the Pharisaic (later rabbinic) distinction which was the object of their ardent efforts in spite of their tendency to regard unessential things as essential.' The difficulty of regarding the words of this verse as coming from Jesus in just their present form is great. He did make a distinction in values and obligations, cf. Mt 23^{23} 'Woe unto you, ye scribes and Pharisees, hypocrites! for ye tithe mint and anise and cummin, and have left undone the weightier matters of the law, judgment, and mercy, and faith: but these ye ought to have done, and not to have left the other undone'; see also Mt 22^{37-40}.

* See particularly Tholuck, *Bergrede*^{5}, pp. 142–146 [Eng. tr. pp. 141–144], who holds that 'more than the moral law is included here, as the expression ἰῶτα ἓν ἢ μία κεραία shows; while v.^{19} indicates that the fulfilment here spoken of extends to all the ἐντολαί. To limit the meaning of the verse to the ethical law is accordingly inadmissible. . . . The Redeemer can have spoken of the necessity of a fulfilment of the ritual law only in its pedagogical and typical symbolical character.' This fulfilment was accomplished 'in His own sacrificial death, in which the shadowy outline of the OT sacrifices was filled up, and their idea realized (He 10^1).' Similarly, 'the idea of the theocracy is realized in the Church; of the priesthood, in the Christian people; the passover, in the Lord's Supper; circumcision, in baptism; the command to avoid the dead and the ceremonially unclean, in avoiding the morally dead and unclean,' etc.

† Achelis, *Bergpredigt*, p. 78 f.: 'The reference here is not to the Law in respect of its typical prophetic element (*e.g.* the law of sacrifice), nor to the Prophets in respect of their predictions concerning the Messianic future; but to the Law and the Prophets in so far as they, corresponding to the new demands and promises of Jesus in the first section of the Sermon, embrace the codified demands and promises current in Israel.' Ibbeken, *Bergpredigt*^{2}, pp. 54, 56: 'That he is thinking here (v.^{18}) especially of the Ten Commandments, which in the Hebrew original had a very much shorter form than in the modern translations, is evident when he says that not a jot or tittle shall pass away; of these short commands at least, not the smallest part could be taken away. . . . The whole difficulty which is felt in this verse (v.^{19}) arises from taking the expression "the law and the prophets" too literally, as though Jesus had intended to say that not the slightest detail of the Mosaic law, including the ritual law, should pass away. If he meant this, then his later life and especially his attitude toward the Sabbath law were entirely inconsistent with his words. But the phrase "the law and the prophets" is to be understood here in a much narrower sense, as signifying only the existing legal order of the common moral life, an interpretation which is placed beyond doubt by the repetition of this phrase in Mt 7^{12}. For if he can say, "All things therefore whatsoever ye would that men should do unto you, even so do ye also unto them: for this is the law and the prophets," then it cannot be denied that in 5^{18} he refers only to those commands of the law by means of which the legal order of the common society of men is maintained.' Burton and Mathews, *Constructive Studies in the Life of Christ*, p. 101 f.: 'It is evidently the moral teachings of both Law and Prophets that Jesus is speaking of, not the predictions. . . . Jesus declares his devotion to the Law, and its permanence in the new Kingdom. This Jesus could do, although he disregarded or disapproved certain statutes of the Law (for example, respecting fasting, Mk $2^{19.20}$; clean and unclean meats, Mk 7^{17-19}; and divorce, Mt 19^{7-9}), because he identified the Law with its great principle of love (Mt 7^{12} 22^{37-40}). This was to him *the Law and the Prophets*, and individual statutes were of value and of permanent authority only in so far as they embodied and expressed this central principle. This was just the opposite position from that which the Pharisees took. They gave all heed to the statutes as authoritative in themselves, and lost sight of the principles. Hence the conflict between them and Jesus.'

‡ The figurative language should therefore be interpreted qualitatively, not quantitatively. So apparently, though not

It is not necessary to suppose, nor is it at all probable, that Mt $5^{18.19}$ was a free composition of a subsequent period. The two verses seem to have a real nucleus of something said by Jesus on this occasion. But a certain Jewish-Christian colouring they may have received in transmission. Jesus may well have used some strong expressions in this connexion, for the purpose of affirming the Divine character and the essential correctness of the OT revelation, and of impressing the duty of members of the Kingdom which He was establishing to recognize and preserve the truth thus intrusted to them. And these words of Jesus, already more conservative than He was accustomed to use in His general teaching, may, through the processes of transmission and translation, have taken on a still more conservative tone than He had given them. When it is remembered that for 15 or 20 years after Jesus' death the primitive disciples had no other conception of the OT than that it was literally and completely in force, Jesus' teaching being only supplementary thereto, it is not difficult to see how these words which dealt with that matter assumed a form and interpretation in accordance with the disciples' conceptions of the relation of the New to the Old Dispensation. In such a transformation of Jesus' words and meaning there would be no intention to misrepresent Him, but rather a conscious purpose to make more definite what they at that time conceived Him to have meant by these utterances. What these verses now say is inconsistent with Jesus' other teaching and with His practice regarding the OT Law; but it is consistent with the primitive Apostolic teaching and practice of the Law, which maintained the former Jewish position, ignoring for a time that constant and significant portion of Jesus' teaching and conduct which was against the literal authority and the permanent observance of the OT.

In the following verse, Mt 5^{20}, we are again on firm ground. Jesus assures His hearers that the current conception and attainment of righteousness, as taught and practised by the scribes and Pharisees, was entirely insufficient—not enough to admit one to the Kingdom of Heaven.‡ Instead, therefore, of abrogating or diminishing religious requirements, as they charged against Him, He was, in fact, demanding of men a great deal more than they demanded, with all their boasted devotion to the Law. What the character of the Pharisees' righteousness was can be seen in Mt 23^{1-33}, Lk 11^{37-52} $16^{14.15.19-31}$ 18^{9-14}; their painful shallowness and perversity, in comparison with what they would have been had they lived faithful to the OT teaching, need not here be described. In vv.$^{17-19}$ Jesus has explained the relation of His Gospel norm to that of the Law and the Prophets. In v.^{20} He has contrasted His ideal standard of life with that of the Pharisees. And now in the verses which follow, vv.$^{21-48}$, He illustrates how both the OT and the Pharisaic norms fall short of that Divine ideal for men which He has come to establish in the world. As generally enumerated, these illustrations are six in number, concerning: (1) anger, vv.$^{21-26}$; (2) social purity, vv.$^{27-30}$; (3) divorce, vv.$^{31.32}$; (4) oaths, vv.$^{33-37}$; (5) retaliation, vv$^{38-42}$; (6) love for all, vv.$^{43-48}$. They illuminate the field of social relations between men by showing what principles are to determine their feelings and their conduct towards one another. These principles we may for convenience designate as the principle of inner righteousness, the principle of unselfishness and forgiveness, and the principle of universal love; although the first comprises really the second and third also.

d. Inner Righteousness.—Mt 5^{21-37} (cf. Lk $12^{58.59}$ 16^{18}). The essential difference between the OT system and the Gospel is that between an external code forced upon one from without and an internal life which first develops character and then manifests itself in conduct. The OT Law told what a man must do and must not do, mainly the latter; although it contemplated right motives, it did not generally formulate them or effect them. A man might 'keep all the commandments from his youth up,' and yet lack some essential element of righteousness (Mk 10^{17-22}). If it is true that for the childhood of the race an external system of conduct is alone suitable and possible, if a child must be dealt with on the basis of precepts until knowledge, judgment, and conscience qualify him for a basis of principles, the reason for the radical difference between the OT and the NT becomes clear: they belong to different stages of human development. And St. Paul is right in saying that 'when the fulness of time came, God sent forth his Son' (Gal 4^4). The OT was really and properly superseded by the Gospel, which enjoined life by principle, internal as well as external righteousness, true character as well as good conduct, right thinking and right feeling as the source of all that one is and does.

Consequently, Jesus in His teaching, recorded in these vv.$^{21-48}$, does not need to distinguish between the OT and the scribal interpretation or elaboration of it, because His teaching supersedes both* and furnishes the one true and sufficient guide to life. The scribes and Pharisees, to be sure, misunderstood the Law and neglected the Prophets, whereby their religious ideas and practices fell far short of the OT standard. Sometimes Jesus tried to make His contemporaries realize this; cf. Mt $15^{3.6}$, Jn 5^{45}. But Jesus did not re-enact the Hebrew Bible, even though it was better than Pharisaism. It was His mission to perfect the Law and the Prophets. He therefore let the OT stand as a monument of previous Divine revelation and earlier human development, giving in its stead

---

clearly, B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 104: the jot and tittle 'signify in the concrete-plastic form of Jesus' expression every part of the Law, however small. . . . That Jesus has in mind here only the moral law, not the ceremonial law, is an untenable view. He includes the whole Law, and contemplates an antitypical fulfilment of the ceremonial element in it.' With Weiss agree Tholuck, Achelis, Feine, H. Holtzmann, and others, that a distinction of moral and ceremonial portions in the Law, which could be separately and might be differently viewed, is an entirely modern one, unrecognized by Jesus and His contemporaries.

* So Baur, Strauss, Keim, Wittichen, Köstlin, Weizsäcker, Hilgenfeld, Feine, H. Holtzmann, Schmiedel. Holtzmann, *Comm. ü. d. Synoptiker*, p. 106, regards the three verses, vv.$^{17-19}$, as an answer of the Evangelist to the Pauline anti-legalism. Feine, *Jahrb. f. Protest. Theol.* 1885, pp. 26–35, argues at length that vv.$^{18.19}$ cannot be authentic, but must be Jewish-Christian additions. Bacon, *Sermon on the Mount*, pp. 133–138, rejects v.^{18}, but thinks that v.^{19} can be explained here as it stands.

† The Jews of Jesus' day conceived the Law to be the Divinely revealed will of Jehovah, made known to Moses for the permanent guidance of the people; it could not therefore change or pass away. So Tholuck, H. Holtzmann, B. Weiss (against Meyer, who on the basis of Jer 31^{31} thought that the Jews looked for a new law). See also Bar 4^1, To 1^6; Philo, *Vita Mosis*, ii. 656; Josephus, *contra Apionem*, ii. 38. *Bereshith R.* 10. 1 reads: 'Everything has its end, the heaven and earth have their end; only one thing is excepted which has no end, and that is the Law.' *Shemoth R.* 6: 'Not a letter shall be abolished from the Law for ever.' *Midrash Ḳoheleth*, 71. 4: '[The Law] shall remain in perpetuity for ever and ever.'

‡ It is difficult to understand how the words of Mt $23^{2.3}$ can be authentic just as they stand. How could Jesus command the people to render complete obedience to the teachings of the scribes and Pharisees ('All things whatsoever they bid you, these do and observe')? Their teaching was certainly better than their practice, but both were essentially defective and perverse. Jesus characterized the scribes and Pharisees as 'blind,' Mt 13^{13} $23^{17.19}$; His whole mission was concerned with the establishment of an anti-Pharisaic ideal of belief and conduct. So that we seem to have in Mt $23^{2.3}$, as in Mt $5^{18.19}$, a certain false colouring of Jesus' language, the modification of His words in transmission to express an ultra-conservative Jewish-Christian conception.

* This is the only possible view, notwithstanding Tholuck's elaborate argument, *Bergrede*^{5}, pp. 156–164 [Eng. tr. pp. 154–159], to prove that Jesus did not offer any 'correction of the Mosaic Law,' as He taught only that 'the righteousness of His disciples must go beyond—*not the Mosaic Law, but the legal religion of its representatives*' (his italics). That the righteousness of His disciples must exceed the righteousness of the scribes and Pharisees, Jesus has distinctly said in Mt 5^{20}; but that their righteousness need not exceed that commanded by the Mosaic Law, is a statement which Jesus is not reported to have made. Nor could He have consistently so taught, since He came to fulfil the OT, not by re-enacting it but by perfecting it—which is Tholuck's own view when he is interpreting Mt 5^{17}.

a fuller and better revelation adapted to a higher stage of the world's progress. Now and then Jesus had occasion to attest the absolute truth and permanent value of much which the OT contained; but these things He regarded as true and valuable, not because He found them in the OT, but because He knew of Himself that they were so. He set up an ideal of religious belief and conduct which was not put together out of the OT (however many resemblances there may have been), or dependent upon the OT for its truth and authority, but was His own creation, resting on the separate foundation of His own immediate perception of Divine truth and human duty. Jesus was not a mere restorer of a former revelation, but a new authority in the field of religion and ethics, the bearer of a new revelation of God to men. This is the explanation of His words, 'But I say unto you' (vv.$^{22. 28. 32. 34. 39. 44}$). And this is what the people recognized when they testified that 'he taught them as one having authority, and not as the scribes' (Mt 7^{29}).

Jesus' ideal of human brotherhood is first illustrated by an exposition of the principle which lay behind the Sixth Commandment, 'Thou shalt not kill.' In this Commandment the act of murder was explicitly forbidden, and the Jews conscientiously abstained from murder; they kept the letter of the precept. But there existed also the spirit of the Commandment, the principle on which it was founded, that brethren should not hate one another; for it was out of hatred that murder came. Since the Commandment did not explicitly forbid hatred, men had allowed themselves to cherish anger, hatred, and contempt against others without regarding themselves as disobedient to the Law. Jesus set over against this notion the emphatic teaching that all feelings of anger and hate are in themselves sinful, whether or not they take effect in acts of violence; they fall under the condemnation and punishment of God, since His Kingdom cannot fully come until all men love one another.* And for that reason He adds in vv.$^{23. 24}$ that no act of worship, however sacred (such as they understood the offerings in the temple to be*), was acceptable to God when the formal worshipper cherished ill-will against any fellow-man. The real brotherhood is a paramount religious obligation.

It is doubtful whether vv.$^{25. 26}$ are original in this connexion.† Neither does the setting of the parallel passage in Lk 12$^{58. 59}$ seem to be the historical one. The saying is figurative, and may be interpreted in either of two ways: (1) it may teach that a man must put away all hatred of others, and be brotherly towards them, in order that he may be qualified to receive God's forgiveness, so Mt 5^{7} 6$^{14. 15}$ 18$^{21-35}$, Lk 7$^{36-50}$; or (2) it may teach that such banishment of ill-will is a matter of common prudence, in order that a man may get on well in his social relations (this in addition to the truth already stated in vv.$^{21-24}$ that the putting away of hatred was also a Divine command to men).‡ Either interpretation contains truth, and has a general bearing upon the subject here under discussion in the Sermon.

The second illustration which Jesus uses, vv.$^{27. 28}$, for inculcating true righteousness in human relations is the Seventh Commandment (Ex 20^{14}, Dt 5^{18}). This statute forbade the violation of the marriage union. It was supplemented by the Tenth Commandment (Ex 20^{17}, Dt 5^{21}), which forbade a man to desire another's wife. The two commands together went far towards preserving the peace and purity of the home. Jesus, however, set His own teaching in sharp contrast with even this high teaching of the Seventh Commandment, forbidding a man to look with lustful eyes upon a woman. His demand exceeds that of the OT in two respects: (1) it insists not only upon abstention from the act, but upon the repression of all wrong thought and desire (in this going much deeper than even the Tenth Commandment); (2) it forbids impure thoughts and desires on the part of any one. For while γυναῖκα and ἐμοίχευσεν (v.^{28}) might be taken in a limited sense as referring only to those who are married, it is inconceivable that Jesus could have given a different standard for the unmarried; and it is altogether probable that, in setting out the principle and ideal of social purity, He had in mind the whole society in which this principle and ideal must be realized. A narrow interpretation, which would limit His teaching exclusively to what would be wrong for a married man to do or think, would be contrary to Jesus' method and intention. Social purity is an equal obligation of men and women, of married and unmarried. And Jesus clearly had in mind to establish by this teaching the absolute necessity for the Kingdom of pure social thought and conduct on the part of every member.§

---

* With οὐ φονεύσεις (v.^{21}) compare LXX of Ex 20^{13}, Dt 5^{17}. ἠκούσατε (v.^{24}) refers to the reading and exposition of the OT in the synagogues. τοῖς ἀρχαίοις (v.^{21}) is a dative of indirect object, as nearly all scholars (against Ewald, Keim) now hold = 'to the ancients,' *i.e.* to those who first received the Mosaic Law (so Bleek, Tholuck, Achelis), or to both those who first received it and also subsequent generations (so B. Weiss). κρίσει (v.^{21}) refers to the official trial and condemnation of the murderer by the appropriate Jewish court; the punishment was death, Ex 21^{12}, Lv 24^{17}, Dt 17$^{8-12}$. ὀργιζόμενος (v.^{22}) does not include or deny 'righteous indignation,' which has its proper place, cf. Mt 3^{7}, Mk 3^{5}, Eph 4^{26}. εἰκῆ, which is read in v.^{22} by Text. Recept., is not found in אB, and is rejected by modern editors and commentators as a superfluous and weakening expansion. ἀδελφῷ (v.^{22}) means any and every person, as in 5^{24} 7$^{3. 4. 5}$ 18$^{15. 21}$. The threefold characterization of hatred and punishment in v.^{22} seems to be cumulative: anger unexpressed, anger expressing itself in contemptuous epithet (ῥακά = רֵיקָא), and anger expressing itself in a term which implies at once lack of sense, character, and piety (μωρέ = נָבָל 1 S 25^{25}, Ps 14^{1}, or מוֹרֶה Nu 20^{24}, Dt 21$^{18-21}$); while the κρίσει refers to the local Jewish courts (Dt 16^{18}, Mt 10^{17}), the συνεδρίῳ to the supreme SANHEDRIN in Jerusalem, and the τὴν γέενναν τοῦ πυρός to the Divine judgment and its consequences. It is important to consider, however, that Jesus has used this triple, cumulative form of expression, not for the purpose of distinguishing grades of guilt in hatred, or of indicating how nicely punishment is meted out in accordance with desert, but to make as emphatic as possible His teaching that all hatred is sinful and destructive, for which reason it can have no place among the members of God's Kingdom. So that the detailed interpretation of Mt 5^{22} is more a matter of historical interest than of practical importance. Bacon, *Sermon on the Mount*, pp. 88 f., 139, 177, adopts the reconstruction of v.$^{22f.}$ which was advocated by Peters (*Journal of Bib. Lit.* 1892), according to which he would read the passage: 'Ye have heard that it was said to the ancients, Thou shalt not kill, and whosoever killeth shall be amenable to judgment. But I say unto you, Whosoever is angry with his brother shall be amenable to judgment. [Moreover, it was said,] Whosoever shall call his brother scoundrel shall be amenable to the court. [But I say unto you,] Whosoever calleth him simpleton shall be amenable to the hell of fire'

* Jesus in speaking to Jews appealed, no doubt often (cf. Mt 6$^{5. 17}$ 7^{15} 10^{41} 18^{17}), to their reverence for the temple with its sacrificial system, and to their many religious ideas and customs. In doing so He did not signify that He shared all these ideas and practices with them. Jesus is not reported by the Gospels as ever offering a sacrifice or otherwise taking part in the customary temple worship (cf. Mt 12$^{6. 7}$); He went to the temple, but only to teach. Had the contrary been the case, the First Gospel could hardly have failed to tell of it, because this Gospel is interested to show how close Jesus brought Himself to the Jews of His day.

† They are regarded as compiled material by Neander, Wittichen, Feine, Godet, H. Holtzmann, Wendt, B. Weiss, Bacon; while all these scholars except Godet and Wendt regard vv.$^{23. 24}$ as also extraneous to the Sermon.

‡ For the former view, Jerome, Calvin, Luther, Bengel, and others; for the latter view, Chrysostom, Tholuck, Achelis, H. Holtzmann, B. Weiss, and others.

§ Jesus is not here attempting to define the relative sinfulness of lust and the performance of lust; it would be a perverse and false inference that the former is as bad as the latter, for the lustful look does not produce the fearful consequences which follow the lustful act. What Jesus means is, that the entertaining of impure thought and desire is in itself a heinous sin, quite as bad as men commonly supposed adultery itself to be.

The logical relation of vv.$^{29.\ 30}$ to the two preceding verses is not close, which has led some scholars to regard them as extraneous matter in this discourse. There are parallel sayings in Mt $18^{8.\ 9}$, Mk $9^{43.\ 47}$, but in both these places also the passage seems to be only partially relevant. The words are figurative and hyperbolical. Jesus means to say with great emphasis that no effort and no sacrifice[*] are to be considered too great for a man in his struggle to master his lower nature and to secure the supremacy of his higher, better self. Until a man brings his body into subjection to his spirit, he fails both individually and socially of what God requires of him (cf. 1 Co 6^{13-20}, Gal 5^{16-24}).

The teaching concerning divorce, contained in vv.$^{31.\ 32}$, appears also in connexion with a specific historical occasion in Mt 19^{3-9}=Mk 10^{1-12}, while the Lukan parallel 16^{18} is entirely unconnected. Not a few modern scholars have come to regard the later Matthæan setting as the original one, explaining $5^{31.\ 32}$ as an importation into the Sermon for the purpose of bringing Jesus' teaching about divorce into immediate connexion with His general ethical discourse, and also to place side by side what He taught concerning the closely related subjects of adultery and divorce.[†] This seems the more probable view, but the teaching is the same whether given in the Sermon on the Mount or under some other circumstances. Divorce was a subject of discussion in Jesus' day. The two rabbinical schools headed by Shammai and Hillel, interpreting Dt $24^{1.\ 2}$,[‡] promulgated different opinions concerning the proper grounds of divorce: the former school was more strict, allowing divorce only in case of adultery and other serious moral offences; the latter school allowed divorce on almost any pretext which the husband might indicate. Remarriage after divorce was considered proper by both schools.[§] It was therefore a matter of lively interest what attitude towards divorce would be assumed by the new Teacher, who was independent of both Hillel and Shammai, and had had no rabbinical training. The Pharisees undertook to discover Jesus' position by their question: 'Is it lawful for a man to put away his wife?' (so Mk 10^{2}, while Mt 19^{3} adds 'for every cause'). Jesus in reply (Mk $10^{3.\ 4}$) first directs their attention (if Mark's order is to be followed instead of Matthew's) to the OT teaching on the subject contained in Dt $24^{1.\ 2}$, where divorce and remarriage are allowed for good cause, the divorce being testified by a formal document. But then He goes on to show (Mk 10^{5-9}) that this permission of divorce was only a concession to a low moral stage of the people, that the Divine ideal of marriage as revealed in Gn $2^{23.\ 24}$ was an inseparable union of man and wife, both spiritually and physically.[‖] This ideal conception of marriage Jesus now solemnly reaffirms and promulgates as His own teaching.

According to Mk 10^{10-12} (cf. Mt 19^{9-12}) Jesus subsequently spoke further on the subject in private to His disciples, forbidding remarriage after divorce. This would be a corollary of His previous statement, for separation might not prevent ultimate realization of the marriage ideal between the husband and the wife, while remarriage would effectually prevent such a realization. Much uncertainty, however, exists as to just what Jesus said about remarriage.[*] The parallel passages to Mk 10^{10-12}, which appear in Mt 5^{32} 19^{9}, Lk 16^{18}, are in serious disagreement, and there is also difficulty in determining the best textual reading in some places. These variations indicate an agitation of the subject of divorce among the primitive Christians, and an attempt to formulate Jesus' ideal of marriage into practical rules of conduct for specific cases. The words of Jesus on remarriage, so variously reported, reflect the different views on the subject which were current among the Christians while our Gospels were in process of formation.

The fact seems to be, that Jesus in His teaching concerning marriage is dealing with the principle and the ideal of marriage, rather than enacting legal statutes in regard to it. The whole treatment of His words as marriage *legislation*, which began with His disciples and has continued to the present day, is a mistake, and has led to confusion, hardship, contradiction, and strife. Jesus here, as always, was setting forth the will of God for men in revealing the purpose and the Divine conception of the institution of marriage. He therefore establishes the ideal of marriage as a perfect, permanent union in body and spirit, and enjoins all the married to strive for the attainment of this ideal. He did not enter into the casuistry of the matter, but fixed the principle. How far in actual ecclesiastic or civic legislation, at any given period or place, the ideal can be practically formulated and demanded, He left for the decision of those upon whom the administration of such matters devolved. Marriage and divorce regulations, upon which the welfare of society so largely depends, must embody the Divine ideal to the fullest extent made possible by the stage of spiritual, moral, and social progress concerned. And Christian people must never fail to apply to themselves this Divine marriage ideal; however low the current conception of marriage may be, or whatever laxity the civic laws may permit, the disciples of Christ can never conduct themselves according to any standard but that set by Him. Not that they must regard His teaching as statutory and divorce as never permissible; but that the act of divorce would be a confession of complete failure to attain His ideal, so that the highest degree of effort, patience, endurance, and self-sacrifice should be used in order to accomplish the permanence and the perfection of a marriage union when undertaken. In addition, Christian people must uphold Jesus' marriage ideal in the world, striving by every means to secure its increasing recognition and realization in society at large. For only in these ways can the Kingdom of God fully come.

---

[*] The words are not to be understood literally, as though Jesus enjoined the mutilation of the body. Lust would not be removed by the destruction of the physical eye or hand. Nor do the eye and hand stand for specific kinds of evil desire. These concrete figurative utterances, as so frequently in Jesus' teaching, have only a general purpose to fix and impress one idea of moral duty.

[†] So Bleek, Olshausen, Köstlin, Godet, Feine, Ibbeken, H. Holtzmann. That the words belong to the Sermon is held by Meyer, Achelis, B. Weiss, Wendt, Bacon, and many others.

[‡] In Dt $24^{1.2}$ we read: 'When a man taketh a wife, and marrieth her, then it shall be, if she find no favour in his eyes, because he hath found some unseemly thing in her, that he shall write her a bill of divorcement, and give it in her hand, and send her out of his house. And when she is departed out of his house, she may go and be another man's wife.'

[§] On the Jewish marriage laws and practice see Josephus, *Ant.* IV. viii. 23; *Vita*, § 76. Also cf. Wünsche, *Erläuterung der Evangelien*, pp. 52–57; Edersheim, *Life and Times of Jesus the Messiah*, i. 352–354, ii. 332–334; Tholuck, *Bergrede*^{5}, pp. 227–234 [Eng. tr. pp. 217–221]; and art. MARRIAGE in vol. iii.

[‖] Tholuck, *Bergrede*^{5}, p. 239 [Eng. tr. p. 225], thus states the biblical idea of marriage: 'Marriage is a Divine institution, having for its aim to bring man and woman to an indissoluble unity of body and spirit, that they may thus mutually complement each other, and lay the foundation of a family.'

[*] In Mt 5^{32} 19^{9} there is a striking addition to the words of Jesus as recorded in Mk 10^{11}, Lk 16^{18}; cf. also 1 Co $7^{10.\ 11}$. This exceptive phrase παρεκτὸς λόγου πορνείας or μὴ ἐπὶ πορνείᾳ is taken to mean that in the case of adultery Jesus explicitly permitted the divorce and remarriage of the innocent party. But this Matthæan addition falls under suspicion for four reasons: (1) the Matthæan account 19^{3-9}, with which $5^{31.\ 32}$ is probably to be associated, is distinctly secondary and divergent from that of Mk 10^{1-12}; (2) this exceptive phrase is significantly absent from the accounts in Mark, Luke, and Paul; (3) the exception is of a statutory nature, while Jesus is establishing the principle and the ideal of marriage; (4) in accordance with Jesus' general teaching, adultery is not *in itself* a sufficient ground for divorce. Consequently, the opinion is becoming strongly supported that these words of the Matthew passages are a mollifying interpretation put upon Jesus' teaching by a generation or group of Christians who took His words as a new marriage legislation, and regarded the statute as intolerably severe (so Bleek, de Wette, Schneckenburger, Bruce, Heinrici, H. Weiss, H. Holtzmann, Wendt, Schmiedel, Bacon). In this case Mark and Luke unite in preserving Jesus' actual words, which laid down a principle and not a statute, leaving the application of this principle, as of others, to be worked out according to the possibilities of the circumstances in any given instance (cf. Mal 2^{14-16}). Similarly Bacon (*Sermon on the Mount*, pp. 117, 177 f.). Other scholars hold that the exceptive phrase in Matthew is an interpolation, but only states explicitly what was already implied as true in the nature of the case, that the act of adultery actually destroys the marriage union and is the divorce, instead of being merely a proper ground of divorce (so Meyer, Tholuck, E. Haupt, B. Weiss). But adultery cannot be *in itself* a proper ground for divorce on Gospel principles. In a case of adultery, divorce might be necessary if the offending party persisted in this evil conduct, wilfully regardless of all moral sense and duty. Suppose, however, that after the wrong had been done, the guilty party became truly repentant, and resolved upon a right life henceforth? The Gospel requires mercy rather than justice, love rather than revenge; forgiveness, patience, and long-suffering. The prophet Hosea, in his trying marriage relation, had discovered the Divine principle involved in such cases, and had recognized that in dealing lovingly and forgivingly with a wayward wife he was following God's own method with His wayward children; cf. also Jer 3^{1-15}. Jesus most impressively taught that love, gentleness, and forgiveness were to characterize the true Christian, even in a case of adultery; for He said to the adulteress: 'Neither do I condemn thee; go, sin no more.' Such teaching seemed to the early Church quite too lenient, so that this incident with its teaching failed to find a place in the Gospels until the 2nd cent., and then not a suitable one. Jesus' treatment of this woman has been lost sight of in the interpretation of His words concerning divorce. The hard spirit of vengeance has ruled men's thoughts rather than the forgiving spirit of love.

The next subject dealt with in the Sermon is the use of Oaths (Mt 5^{33-37}). The oath or vow was a frequent type of expression in all antiquity, and its use has diminished little with the passing of centuries. In its origin the oath was a solemn religious act, in which God—or some object sacred to Him or through Him—was invoked as a witness of the truth of an utterance or the sincerity of a promise, and as an avenger of falsehood and of non-fulfilment of the promise. The use of the oath and vow is recognized and approved in the OT (cf. Ex 22^{11}, Dt 6^{13} 10^{20}, Ps 63^{11}, Is 45^{23}, Jer 4^{2}, and He 6^{13-18}), and the commands concerning them look towards the preservation of their religious character and solemn function. This was the intent of the Third Commandment, 'Thou shalt not take the name of the Lord thy God in vain' (Ex 20^{7}, Dt 5^{11}), in which all misuse of the oath is forbidden, as where an oath is taken thoughtlessly or maliciously, or to cover falsehood.* In the same tenor are Lv 19^{12} 'Ye shall not swear by my name falsely, so that thou profane the name of thy God,' and Nu 30^{2} 'When a man voweth a vow unto the Lord, or sweareth an oath to bind his soul with a bond, he shall not break his word; he shall do according to all that proceedeth out of his mouth.'† The form of Jesus' expression in Mt 5^{33} takes up the substance, though not the exact form, of these OT teachings. The Jews of Jesus' day made most extravagant use of the oath, both in frequency and in variety; some oaths were regarded as binding and some as not binding, the difference of form being purely technical.‡

Christ denounced this casuistry as perverse in the extreme (Mt 23^{16-22}). And in this passage of the Sermon He has the intention of sweeping away the whole system of oaths as resting upon a false theory, namely, that a man might use two qualities of statement: one with the oath, which pledged him to truth or fulfilment; and one without the oath, which required neither truth nor fulfilment. As against this double-dealing and authorization of falsehood, Jesus demands that a man shall speak only the truth, and implies that an oath is not only unnecessary, but harmful. This interpretation of Mt 5^{33-37} is that of the early Fathers and of the majority of modern commentators.* We find the same teaching, with close similarity of words, in Ja 5^{12} 'But above all things, my brethren, swear not, neither by the heaven, nor by the earth, nor by any other oath: but let your yea be yea, and your nay, nay; that ye fall not under judgment.' That Jesus submitted to the high priest's oath at His trial (Mt $26^{63.64}$), as a matter of the moment's necessity, is in no way against this interpretation.† Jesus forbids oaths not as statutory legislation, so that the taking of an oath is sinful; but in principle, on the ground that a man is accountable to God for every utterance (Mt 12^{34-37}). He sets forth the ideal of truthfulness which is to be striven for and ultimately accomplished. A Christian can have no need of an oath. If in the present stage of civilization oaths are still necessary for civic purposes, then Christians must seek to establish a higher standard of honesty in speech, according to which a man's simple word will be the best possible guarantee of the truth and performance of what he says.

e. *Unselfishness and Forgiveness*.—Mt 5^{38-42} = Lk $6^{29.30}$. The OT Law did, in fact, provide that punishment should be in degree and kind, 'an eye for an eye, and a tooth for a tooth'; thus we read in Ex 21^{23-25} 'Thou shalt give life for life, eye for eye, tooth for tooth, hand for hand, foot for foot, burning for burning, wound for wound, stripe for stripe'; as also Lv 24^{17-21}, Dt 19^{16-21}.‡ This *lex talionis* was understood to apply to all relations of men. And not only that, for God Himself was believed to be retributive in His punishment, so that when men could not themselves execute the just penalty God could be appealed to for visiting retribution upon one's enemies; cf. Dt 23^{3-6} 25^{17-19}, Ps 35^{1-8} $41^{10.11}$ 58^{6-11} $68^{1.2}$ 69^{22-28} $78^{20.21.60-66}$ 109^{6-15}, Jer 17^{18} 18^{23}, La 3^{64-66}. This primitive conception and type of justice was probably required, at least in principle, by the conditions of the earliest civilization to which it ministered. When the modes of punishment subsequently changed, and penalties were executed no longer in kind but in some suitable equivalent, it still remained true that the punishment was meant to be retributive and equal to the crime. It is only in modern times that there has come in a new conception of punishment, according to which society is to be protected, not by avenging the wrong in kind or degree, but by reforming the evil-doer. This higher type of justice, based upon the principle of forbearance and helpfulness, also found recognition in Israel. The deeply spiritual saw that God's action was in love, mercy, and forgiveness, and they plead for a like principle of treatment among men; so Lv 19^{18} 'Thou shalt not take vengeance, nor bear any grudge against the children of thy people'; Dt 32^{35} 'Vengeance is mine, and recompense,' *i.e.* God's; Pr 20^{22} 'Say not, I will recompense evil: wait on the Lord, and he shall save thee'; cf.

‡ See Wünsche, *Erläuterung der Evangelien*, pp. 57–60, 288–292; Edersheim, *Life and Times of Jesus the Messiah*, ii. 17–21.

* So Justin, Irenæus, Clement Alex., Origen, Jerome, Augustine; of our own day, Meyer, Achelis, Bruce, B. Weiss, H. Weiss, and others; see esp. Wendt, *Lehre Jesu*, ii. 210–213 [Eng. tr. i. 269–273]. For the view that Jesus did not forbid all oaths, but only their misuse, thereby simply re-establishing the OT teaching, may be cited Luther, Calvin, Bengel, Stier, Ewald, Keim, Tholuck. H. Holtzmann holds that Mt 5^{33-37} is intended to forbid all oaths, but attributes this tone to the Essenic tendencies of the First Evangelist rather than to Jesus, whose purpose was only to rebuke the profusion and casuistry of the Pharisaic practice.

† St. Paul's use of the oath, 2 Co 1^{23} 11^{31}, Ro 1^{9}, Gal 1^{20}, 1 Th 2^{5}, and elsewhere, is simply a continuation of the OT and Jewish custom in its best use; the primitive Christians in this, as in many other respects, failed to rise at once to the appreciation and attainment of Jesus' ideal.

‡ Similarly the Ḫammurabi Code (*c.* 2250 B.C.), Nos. 196, 200.

also 2 K 6^{21-23}, La 3^{27-30}. But the love of retaliation, the zeal for executing vengeance, and the passion for seeing strict justice done without delay, held the field in both OT and NT times. And consequently, when Jesus came, He found little of the true spirit and service of brotherhood.

Against this false and hateful temper of men Jesus set His principle of unselfishness and forgiveness, following out the higher conception presented in the OT, and requiring that by this principle all men shall determine all their conduct towards one another. In order to make His meaning more explicit and clear, Jesus used four concrete illustrations (Mt 5^{39-42}), in them suggesting what kind of conduct would result from living by this principle. The illustrations, of course, are figurative, and are to be interpreted not literally but in their main idea.[*] A man is not to be thinking constantly of his own *rights*, as though the chief aim of his life was to avenge injustices and slights towards himself (v.^{39}); he must be willing to endure wrongs, to sacrifice his feelings and his possessions, in order to avoid trouble with others (v.^{40}); he must be ready to labour freely and unselfishly for the good of others, without expecting recompense (v.^{41}); he is not to be of a grasping, penurious disposition—rather he is to assist others in every reasonable way (v.^{42}).[†]

In this principle of forgiving love and unselfish service lies the essence of Jesus' ethical teaching;[‡] it has been well called 'the secret of Jesus.'[§] On this principle God acts towards men, and on this principle men must act towards one another. Jesus not only taught this standard of life, but He realized it in His ministry and in His death, thereby becoming the perfect example of human love and service. These are the qualities which make true brotherhood. One cannot for a moment suppose that Jesus, in setting forth this principle as the supreme guide in men's dealings with one another, had the intention of overthrowing the civic laws which society requires for its preservation and welfare; any such interpretation would reduce His sayings to absurdity. What He purposed was to make men recognize the wretchedness of a standard of conduct which rests upon the ideas of revenge and retaliation, of for ever insisting upon one's rights and one's dignity, of working only for one's self and never for others, of getting as much and giving as little as possible. Civic laws and private practice must accept this teaching of Jesus and embody it, not necessarily in the same way, but to the same end.[*]

---

[*] In Jn $18^{22.23}$ it can be seen that Jesus did not have in mind literal non-resistance, since He did not Himself practise it. That certain individuals (most recently Tolstoi) and sects (Anabaptists, Mennonites, Quakers) have taken these sayings literally, as statutes to be obeyed, is not to the credit either of their knowledge of the teaching of Jesus or of their own common-sense. Such literalism is the perversion of Jesus' method and intent, and is one of the worst enemies of the Gospel, for it holds up the teaching of Jesus to the ridicule of all sane, thinking men.

[†] In v.^{39} the τῷ πονηρῷ cannot be the Evil One (as thought by Chrysostom and Theophylact), for Jesus would have him for ever resisted; it might be regarded as a neuter noun, referring to evil in general (so Augustine, Luther, Calvin, Ewald, Achelis, Kübel); but probably the evil man is meant who offers the indignities and demands described; cf. πονηρούς in v.^{45} and Lk $6^{35.45}$ (so H. Holtzmann, Nösgen, B. Weiss). The δεξιὰν σιαγόνα of Mt 5^{39} is altered in Lk 6^{29} to simply τὴν σιαγόνα, since the first blow would naturally be given by the right hand upon the left cheek. In v.^{40} κριθῆναι means to bring a legal action against one (cf. 1 Co 6^{1}), in order to secure property of some kind from him. The χιτών (כְּתֹנֶת) was the common Oriental under-garment worn next the body, while the ἱμάτιον (בֶּגֶד, שִׂמְלָה) was the more costly and elegant tunic or over-garment (cf. art. DRESS); that is, if a man attempts to get from you by law a little property, give him much in order to avoid quarrel and litigation with him. In the Luke parallel (6^{29}) the idea of a lawsuit is replaced by that of a personal assault, in which case the outer garment would first be taken, after which the inner garment was to be offered. In v.^{41} the ἀγγαρεύσει (cf. B. Weiss, *Meyer-Komm. ü. d. Mattevgm. in loc.*) refers to official impressment for temporary service, a common practice in that day (Mt 27^{32}); Jesus uses it as a figure to teach that men must assist others by generously given and willing service. Luke does not have this verse, perhaps because it was liable to be misunderstood as literally referring to legal requisitions instead of figuratively to all social relations. In v.^{42} is added a fourth illustration which, because it is somewhat loosely joined to the preceding, and out of deference to the number 3, has been regarded by some scholars (Ewald, H. Holtzmann, Köstlin, Wittichen) as a remaining fragment of a separate section of this discourse, treating of the interpretation of the Eighth Commandment; they would therefore insert between v.^{41} and v.^{42} something like this, drawn from Ex 20^{15}, Dt 5^{19} $24^{12.13}$ ἠκούσατε, ὅτι ἐρρέθη· οὐ κλέψεις, ἀποδώσεις δὲ τὸ ἱμάτιον τῷ πτωχῷ· ἐγὼ δὲ λέγω ὑμῖν· τῷ αἰτοῦντι, etc. This explanation of v.^{42} has not, however, found general acceptance, being specifically rejected by Tholuck, Meyer, Feine, B. Weiss, and others; Luke has the saying in the same connexion as Matthew, and it joins well enough, logically, to vv.$^{38-41}$. The verse does not refer, at least directly, to the lending of money without requiring the payment of interest (so Feine, on the basis of Ex 22^{25-27}, Lv 25^{37}, Dt 15^{7} 23^{20}, against Tholuck, B. Weiss).

[‡] See esp. Harnack, *Das Wesen des Christentums*, 1901, pp. 45–47 [Eng. tr. pp. 70–74].

[§] Matt. Arnold, *Literature and Dogma*, p. 181 f. See also Mt 26^{49-54}, Mk 8^{31-37}, Lk $9^{54.55}$, and cf. Is 50^{6} 53^{1-12}. St. Paul also teaches with great emphasis the same forgiving and self-sacrificing principle of life (Ro 12^{17-21}, 1 Co 6^{1-8}, 1 Th 5^{15}; cf. also 1 P 3^{9}).

[*] Similarly Bacon, *Sermon on the Mount*, pp. 109–114: 'The Sermon is not legislative, as our First Evangelist seems to regard it, but prophetic. It does not enact, but interprets. It does not lay down rules, but opens up principles. . . . Matthew, as we have seen, is quite absorbed in the relation of the new *Torah* to the old. So much so that he fails to appreciate that his material is not really a series of new enactments, but in reality, just as Luke perceives, a simple application to the situation of that one principle which Jesus elsewhere enunciates more briefly; and not then as enacting something new, but as explaining the old [Mt 22^{35-40}].' Mt 5^{21-48} gives 'illustrations of the one *principle* which Jesus saw in "all the Law and the Prophets," and saw as well in all nature and history, that the divine calling is to ministering love and service—that and that alone.' Thayer, *Journal of Bibl. Lit.* 1900, p. 149: 'Jesus is not intent on giving precepts, but would lay emphasis on principles. The distinction between the two is most important. A precept is a direction respecting a given action; it is definite, precise, specific, fitting and belonging to particular cases. A principle, on the other hand, is comprehensive and fundamental; it prescribes, not particular actions, but a course of conduct. . . . A precept bids him do, a principle trains him to be; and so begets that inwardness and continuity which are essential to character.' B. Weiss, *Meyer-Komm. ü. d. Mattevgm. in loc.*: 'Jesus explains that His will, as He would have it fulfilled in the Kingdom of God, demands the forbearing, self-forgetful love which renounces all standing on one's rights and desire for retaliation. Jesus illustrates the general principle by concrete examples, which are not to be understood as literal commands to be obeyed, but as setting forth a general standard according to the main idea contained in them.' Tholuck, *Bergrede*^{5}, p. 291 [Eng. tr. pp. 269, 270]: 'The commands in vv.$^{39-42}$ are to be regarded as only concrete illustrations of the state of mind and heart required. . . . It is only the spirit of revenge that our Lord condemns, and therefore it is not inconsistent with His command to seek the protection of the law.' Burton and Mathews, *Constructive Studies in the Life of Christ*, p. 105: 'Some have undertaken to apply such sayings as "Resist not him that is evil," and "Give to him that asketh of thee," literally as fixed rules. But this is utterly to misinterpret Jesus. This whole discourse is a criticism of the Pharisees for making morality consist in a literal keeping of the rules of the OT. It is impossible to suppose that it simply imposes a new set of rules. Others, feeling that a literal obedience to these rules is impossible, if not also harmful, give up all attempt to obey the teachings of this discourse. Both are wrong. [Jesus teaches here] the *principle*, which we ought always to strive to follow. The single precepts are intended to correct the selfishness and narrowness that Jesus saw about Him, and to point out some of the ways in which the principle may be applied. They, too, are to be obeyed, always in spirit, and in letter when such an obedience is consistent with the principle. If a man would follow Jesus, he must not resist an enemy in a spirit of revenge; nor should he refuse to give to a beggar from a selfish motive. If he resist or withhold, he must do so because love, regard for the highest well-being of society in general, requires it.' Plummer, *Comm. on Luke*, p. 185: 'The four precepts here given ($6^{29.30}$) are startling. It is impossible for either governments or individuals to keep them. A State which endeavoured to shape its policy in exact accordance with them would soon cease to exist; and if individuals acted in strict obedience to them, society would be reduced to anarchy. Violence, robbery, and shameless exaction would be supreme. The inference is that *they are not precepts, but illustrations of principles.* They are in the form of rules; but as they cannot be kept as rules, we are compelled to look beyond the letter to the spirit which they embody. If Christ had given precepts which could be kept literally, we might easily have rested content with observing the letter, and have never penetrated to the spirit. What is the spirit? Among other things, this: that resistance of evil and refusal to part with our property must never be a personal matter; so far as we are concerned,

f. Universal Love.—Mt 5^{43-48} = Lk $6^{27.\,28.\,32-36}$. When Jesus begins this sixth paragraph illustrative of His statements in Mt 5^{17-20} with the words 'Ye have heard that it was said, Thou shalt love thy neighbour and hate thine enemy,' He is not quoting precisely any OT or extra-biblical utterance on record (cf. Sir 18^{13}). The clause 'Thou shalt love thy neighbour' is found in Lv 19^{18} 'Thou shalt not take vengeance, nor bear any grudge against the children of thy people, but thou shalt love thy neighbour as thyself.' But the further clause, 'and hate thine enemy,' while not appearing in that form, is really implied in the words 'the children of thy people,' which fixes a national limitation upon the teaching in the Leviticus passage. There was on the part of the Hebrews a profound contempt and disregard of other nationalities (cf. Dt 23^{3-6} 25^{17-19}, the Book of Jonah, esp. 3^{10}–4^{11}). So that the phrase 'hate thine enemy' justly characterized the prevailing OT conception of social duty (in spite of occasional efforts towards a larger idea, Ex $23^{4.\,5}$), the 'enemy' signifying any foreigner who did not enter into Hebrew practices, and the 'hatred' signifying their superior disdain for other peoples. The same hatred towards all Gentiles was felt by the stricter Jews of Jesus' day; and the Pharisaic pride and exclusiveness went so far as to include in the sphere of their hatred the lower classes among the Jews themselves who did not satisfactorily observe the Law (Jn 7^{49} 'This multitude which knoweth not the law are accursed').

When Jesus sets over against this national bigotry and caste spirit His own teaching, Mt 5^{44} 'Love your enemies, and pray for them that persecute you,' the term 'enemies' is to be understood in the most comprehensive and general sense of all who do not feel and act lovingly towards one. It no longer means 'foreigners,' for Jesus has removed all national barriers, making all men brethren (cf. Ac 17^{26}). To the primitive Christians the outstanding class of 'enemies' were those referred to by Jesus as their persecutors for the cause of Christ, as also in Mt 5^{10-12}. Jesus wishes to establish the principle of a universal love which would unite all men in a complete human brotherhood.* Every man is to love every other man, and to serve him so far as it lies in his power, with reasonable regard to all his duties. Barriers, castes, classes, distinctions of all kinds are removed, so that love and service are to be all-inclusive. When the scribe propounded to Jesus the question, 'Who is my neighbour?' He replied with the parable of the Good Samaritan (Lk 10^{25-37}), in which He set forth clearly and impressively that the 'neighbour' whom one is to love 'as himself' is any one and every one. And this love which Jesus enjoins is not to be of the self-seeking kind which is common in the world. There may be no real love, He says, in the exchanges of attention and courtesy which men are accustomed to make with one another, for it may proceed on a commercial, *quid pro quo* basis. The Gospel demands a different kind of relation between men which is not self-seeking, does not ask how much will be given in return, is bestowed freely without thought of recompense. And here appears the close logical relation between these verses and vv.$^{38-42}$, for vv.$^{43-48}$ carry forward to complete expression the thought which underlies the previous words.†

This kind of love, all-embracing, unremitting, realizing itself in both feeling and conduct, has its origin and perfect manifestation in God,‡ who cares for all men, however they treat Him. He sets the example of universal love and service, which Jesus reveals in His words and deeds. And men by following this example in their relations to one another become the 'sons' of God (Mt 5^{45}), because in essential respects they feel and act like Him. The sonship thus spoken of is a moral sonship, which is attained by choosing to be and do what is right, rather than a genetic sonship, which is inherent because God has made men in His own

---

we must be willing to suffer still more and to surrender still more. It is right to withstand and even to punish those who injure us; but in order to correct them and to protect society, not because of any personal animus. It is right also to withhold our possessions from those who without good reason ask for them; but in order to check idleness and effrontery, not because we are too fond of our possessions to part with them. So far as our personal feeling goes, we ought to be ready to offer the other cheek, and to give without desire of recovery whatever is demanded or taken from us. Love knows no limits but those which love itself imposes. When love resists or refuses, it is because compliance would be a violation of love, not because it would involve loss or suffering.' Gore, *Sermon on the Mount*, p. 103 f.: 'We may truly say that the Sermon gives us a social law for Christians. That is true in this sense: the Sermon gives us principles of action which every Christian must apply and reapply in his social conduct. But just because it embodies motives and principles and does not give legal enactments, it must appeal in the first instance to the individual, to his heart and conscience; and it is only as the character thus formed must set itself to remodel social life on a fresh basis, that the Sermon can become a social law for Christians. You cannot take any one of its prescriptions and apply it as a social law at once. You cannot take the maxim, "If a man smite thee on the one cheek, turn to him the other also," or, "If a man take away thy coat, let him have thy cloak also," and make it obligatory on Christians as a rule of external conduct, without upsetting the whole basis of society, and without ignoring a contrary maxim which our Lord gives us in another connexion. But each of the maxims can be taken to the heart and conscience of the individual, to become a principle of each man's own character and conduct, and then to reappear, retranslated into social action, according to the wisdom of the time, or the wisdom of the man, or the wisdom of the Church.'

It is difficult to understand how Dr. Sanday (art. JESUS CHRIST, vol. ii. p. 621) can say: 'The ethical ideal of Christianity is the ideal of a Church. It does not follow that it is also the ideal of the State. If we are to say the truth, we must admit that parts of it would become impracticable if they were transferred from the individual standing alone to governments or individuals representing society.' A similar view was advocated by the Bishop of Peterborough in the *Fortnightly Review*, Jan. 1890. This misconception of Jesus' teaching seems to arise out of a confusion of principles with precepts. Social ethics and individual ethics cannot rest upon different *principles*; but the principles of ethics will call for different outworkings in concrete cases of their application—and this will be as true for individuals as for society. The people acting collectively through their governing officials (the State) are required to act according to precisely the same ethical standard as when they are acting individually; namely, they are bound to obey the principles of forgiving kindness to all (Mt 5^{21-24}), of moral purity ($5^{27\text{f.}}$), of protection of marriage ($5^{31\text{f.}}$), of honesty in speech (5^{33-37}), of an absence of the revengeful spirit (5^{39}), of long-suffering (5^{40}), of helpfulness (5^{41}), of generosity (5^{42}), and of an all-embracing love (5^{43-48}). Can any one think that the State is not bound so to act?

* For the Biblical teaching concerning love, see esp. art. LOVE in vol. iii.

† Lk $6^{27.\,28.\,32-36}$ has a different order of the contents from that of Mt 5^{43-48}; if the Matthæan material were arranged in the same order, the verses would stand: $^{(43).\,44\,(39\text{-}42\;712).\,46.\,47.\,45.\,48}$; and Lk $6^{34.\,35\text{a}}$ is an addition or expansion for which Matthew has no parallel. It is not easy to determine which order is the more likely to have been original. The striking differences in the wording of the passages, however, indicate beyond a doubt that Luke's account is secondary, with much verbal modification: thus in vv.$^{27.\,28}$ expansions appear; in v.^{32} χάρις is found instead of μισθός as in Mt 5^{46}, a manifest dropping of a Jewish for a Gentile or universal term (though Luke has μισθός at 6^{35}); in the same and following verses, and for the same reason, Luke twice has ἁμαρτωλοί, once instead of οἱ τελῶναι, once instead of οἱ ἐθνικοί; in v.^{33} Luke has ἀγαθοποιῆτε instead of Matthew's ἀσπάσησθε, a Jewish custom; in v.^{35} Luke has υἱοὶ Ὑψίστου instead of Matthew's clearly more original υἱοὶ τοῦ πατρὸς ὑμῶν τοῦ ἐν οὐρανοῖς; in the same verse Luke reduces the fine Jewish words about God's making the sun rise and the rain fall to a commonplace Gentile phrase, χρηστός ἐστιν ἐπὶ τοὺς ἀχαρίστους καὶ πονηρούς; in v.^{36} Luke changes the imperatival future form ἔσεσθε, common in the LXX through the influence of the Hebrew, and occasionally found in the NT (*e.g.* Mt 5^{43} 6^{5} 22^{37-39}), to a better Greek form, the imperative γίνεσθε; he has also the less Jewish and less lofty οἰκτίρμονες instead of Matthew's significant τέλειοι; and again he has only ὁ πατὴρ ὑμῶν instead of Matthew's ὁ πατὴρ ὑμῶν ὁ οὐράνιος. These numerous and important variations in the two accounts of these verses leave no room for doubt that Matthew's form is much nearer to the historical words spoken by Jesus, and that the Third Gospel contains material which had undergone wide verbal divergence, partly perhaps in Luke's own hands, but mainly in the earlier Gentile transmission.

‡ So in the Johannine writings frequently, Jn 3^{16}, 1 Jn $4^{8.\,10.\,19}$; cf. also Ro 5^{5-8}.

image (Gn 1^{26}).* Jesus therefore commands men to be perfect in love as God is perfect in love,† setting before them an absolute ideal of social goodness; not that the ideal is at once attainable, but that towards its realization every man—and all men together—must strive, and in God's providence this striving will ultimately achieve success.

g. Religious Worship.—Mt $6^{1-6.\ 16-18}$ (no parallel in Lk).‡ The connexion of these verses with the historical Sermon cannot well be doubted; they follow in logical consecution upon the material contained in Mt 5^{3-48}, illustrating the true righteousness still further and on another side. The ideal life which was characterized in vv.$^{3-12}$, enjoined in vv.$^{13-20}$, and illustrated with regard to character and service in vv.$^{21-48}$, is further illustrated in these verses with regard to religious worship. Almsgiving, prayer, and fasting were, in the estimation of the Jews, three of the chief elements of religion, and received a disproportionate attention; while the three performances, really so different in importance, were regarded as about equally necessary and useful.§ In v.^{1}, which forms an introduction to the group, Jesus gives the key to the interpretation of the whole: * He does not pronounce against the acts themselves, but against the spirit and purpose which too often animated the doing of them. Religious worship, such as almsgiving (which the Jews rightly considered an act of worship), prayer and fasting, must never be performed ostentatiously, with the intent of securing a reputation for piety. It was mainly the proud, hypocritical Pharisees who were guilty of such motives in their worship; but the multitude of common people to whom Jesus was now speaking had been brought up to believe implicitly in the teaching and practice of the Pharisees, and were therefore in great danger of being corrupted by the Pharisaic example of ostentation, worldliness, and deceit.

Jesus will therefore warn them against these specific errors of their religious leaders, and in contrast exhibit the character of true religious worship. The three acts of almsgiving (vv.$^{2-4}$), prayer (vv.$^{5.\ 6}$), and fasting (vv.$^{16-18}$) are treated in a parallel way, the same thing being said of each in almost the same language. When they give money in the synagogues, or upon other occasions, for charitable objects, it is to be contributed solely for the benefit of others, with no purpose of obtaining a reputation of generosity for themselves (cf. Ac 5^{1-11}). Against almsgiving in itself He does not speak, but only of the motive behind it. The giving of money to assist others is, in fact, an act of worship to God, and a necessary element of all true righteousness. But such giving must be quietly done, without providing or even wishing that others may know of the fact or the amount, in order that one may receive credit therefor.† So also when men pray, as pray they must, their prayers are to be a genuine communing with God, instead of being designed to win the praise of men for a superior piety.‡ To counterfeit true spiritual communion with God is an intolerable profanation of religion. Jesus, of course, has no thought of forbidding prayer in public, but He will have only sincere prayers made, whether in public or private. And if they fast, as they were accustomed to do regularly and often, they are to observe the fast as a simple humiliation before God, not forced upon others for the purpose of gaining credit for exceptional devoutness.§ On another occasion

---

* On this sonship see Wendt, *Lehre Jesu*, ii. 145 f. In using the term 'Father' for expressing most completely His conception of God, Jesus thinks of the *family* as most characteristic of the relation between God and men. In the family the sons may be either true or false to their relation to their father; if they love, honour, and obey him they realize their sonship—they are sons indeed; if they disrespect him, disgrace him, and disregard his will they are not sons in the moral sense, for they repudiate their sonship. But the actual genetic sonship is none the less a fact, even if the sons will not acknowledge and exalt it. So in the relation of men to God; they do not in reality *become* His sons any more than He *becomes* their Father; this mutual essential relation exists from the first, for all men are His sons, and He is the Father of all. But the NT use of the term 'son' is generally a moral one, and those only are designated 'sons' who honour and realize their sonship. This does not deny the genetic, spiritual sonship, however, which the NT also teaches.

† The words of Jesus, 'ye shall be perfect,' can have only the imperative force, as in Lk 6^{36} (so Meyer, H. Holtzmann, B. Weiss, H. Weiss, Wendt, Blass, and nearly all); cf. Burton, *Moods and Tenses in NT Greek*, § 67. The whole v.^{48} is made up from OT language; *e.g.* Lv 19^{2} (LXX) reads, ἅγιοι ἔσεσθε, ὅτι ἅγιός εἰμι ἐγὼ κύριος ὁ θεὸς ὑμῶν; cf. also Lv 11^{44}, 1 P 1^{15}; and Dt 18^{13} (LXX) reads, τέλειος ἔσῃ ἐναντίον κυρίου τοῦ θεοῦ σου. But the thought of these similar OT passages, as their contexts show, is of levitical purity and national separateness, and it is therefore superficial as compared with the deep meaning which Jesus puts into the words. In Mt 5^{48} we have the closing verse of the short section vv.$^{43-48}$ concerning universal love (so Achelis, Bruce, Heinrici, H. Holtzmann, Tholuck, B. Weiss), not a general summary conclusion of the whole section vv.$^{21-48}$ (so Burton, Ibbeken, H. Weiss). The τέλειος refers only to perfection in love, not to the whole series of attributes which constitute the perfection of God in the theological sense, or to the comprehensive idea of human perfection. This love which Jesus establishes as the principle of the ideal life, to be felt and acted upon by every man towards every other man, cannot be understood as condoning the sins or imperfections in the character and service of others, but insists upon viewing men not as they are but as they may be and should be, and upon rendering them every assistance of sympathy, counsel, and help towards the attainment of the Divine ideal. It is thus that God has dealt with men, and we are to do likewise for one another.

‡ The account of the Sermon in Luke does not contain this section, probably for the same reason that no parallel appears for Mt 5^{17-37}, namely, because these passages are so saturated with Jewish phraseology, ideas, and customs as to be difficult of understanding for Gentile readers (so Feine, Wendt). Here also, as there, it is more likely that Luke's sources did not contain these sections than that Luke himself excised them.

§ The giving of alms was held to be a primary duty and a means of salvation, as seen already in the Apocrypha, To 4^{7-11} 12^{8-10} 14^{9-12}, Sir $4^{1.\ 2}$ 7^{10}, cf. also Ps 41^{1}, Is $58^{7.\ 10}$, Dn 4^{27}; there are also many striking Rabbinic sayings concerning the merit of almsgiving (see art. ALMSGIVING in vol. i.; Weber, *Jüdische Theologie*, pp. 285–288; Wünsche, *Erläuterung der Evangelien*, on Mt 6^{1-4}). The Greek word in use for the alms is ἐλεημοσύνη (the motive employed by metonomy for the thing), as here in v.^{2}, representing, perhaps, צְדָקָה; since this Heb. word meant primarily 'righteousness,' it came about that δικαιοσύνη might also have this special meaning, but that is not the sense in which δικ. is used here in v.^{1} (the textual variant at this point, ἐλεημοσύνη, is improbable on both external and internal evidence). Prayer was offered by the Jews thrice daily, at 9 A.M., at 12 noon, and at 3 P.M. (cf. Ac 3^{1}), and on three days in the week the people went to the synagogue for prayer. Liturgical forms of prayer were in use (cf. Lk 11^{2}, and Mishna, tractate *Berakhoth*), and they were recited at the proper time wherever one might be. Fasting was prescribed by the OT for the Day of Atonement (Lv 16^{29-34}), and was practised on other occasions also (Ex 34^{28}, 1 S 7^{6}, 2 S 12^{16}, Jer 36^{9}, Dn 10^{3}). The prophets sometimes spoke against it (Is 58^{3-8}, Jer 14^{12}, Zec 7^{5}), but it was a prevailing usage throughout the Hebrew history, cf. Jth 6^{8}, To 12^{8}. In the NT also the Pharisee is represented as boasting in his prayer, 'I fast twice in the week' (Lk 18^{12}), and the frequent fasts are mentioned in Mt 9^{14} (cf. art. FASTING in vol. i.). It is noticeable that Jesus has not joined with these three outstanding acts of Jewish worship the observance of the Sabbath, which stood in somewhat the same prominence; but elsewhere He dealt with that subject also (Mk 2^{23-28}), and on a similar principle.

* δικαιοσύνη is to be understood here in a comprehensive sense; it is a repetition of the δικ. of v.^{20}, now to be illustrated in acts of religious worship, and embraces alike almsgiving, prayer, and fasting.

† In v.^{2} σαλπίσῃς is a figurative term signifying ostentation. ὑποκριταί refers to the Pharisees; they were hypocrites because they wore a mask of piety over their selfish lives; cf. also Mt 23^{5-7}. συναγωγαῖς, ῥύμαις indicate that almsgiving was a part of the regular synagogue services, but that alms were also given upon the streets to those in need. The ἀμὴν λέγω ὑμῖν puts a special emphasis upon the fact that this almsgiving, when done out of vanity, had no real merit; cf. Lk 6^{24}. In v.^{3} the phrase, 'let not thy left hand know what thy right hand doeth,' is quite surely a current Semitic proverb to express secrecy.

‡ In v.^{5} ἔσεσθε is an imperatival future, as in Mt 5^{48}; the parallel verb in v.^{2} is an imperatival subjunctive, and in v.^{6} an imperative, the meaning being quite the same in each. The γωνίαις τῶν πλατειῶν were the four corners of street intersections, which were chosen as the most conspicuous place for the ostentatious prayers. ἑστῶτες indicates that prayers were customarily offered in a standing posture. The ταμεῖον, or, more frequently in the NT, ὑπερῷον, was the upper room of an Oriental house used for guests or for retirement to pray; see Ac 1^{13} $9^{37.\ 39}$ 20^{8}. With the language of v.^{6a} compare 2 K 4^{33}, Is 26^{20}.

§ In v.^{16} σκυθρωποί and ἀφανίζουσιν τὰ πρόσωπα refer to neglect of the customary care for the head, the unwashed face and

Jesus removed all obligation from His followers to observe the Pharisaic system of fasts, or to practise fasting except as it was the personal and spontaneous expression of inner feeling (cf. Mk 2^{18-22}). Here He teaches that when one fasts it must be a genuinely religious performance, free from all ostentation and selfish motives.

It is true, Jesus says, that those who turn these acts of religious worship to selfish account do secure their object; 'they have their reward' in the false reputation for generosity and piety which for a time they can win. But they cannot win God's approval, or secure any spiritual blessings. These things, which alone are worth while, belong only to those whose worship is sincere, who give and pray and fast with pure unselfish motives, for the good they can do their fellow-men and for their own spiritual growth. And the principle which Jesus here sets forth for these three acts of religious worship is to apply to every kind of religious observance. Sacred things are never to be turned to worldly account; everything we do in the name of religion, and for the sake of religion, must be untarnished by self-seeking ends and unholy purposes.[*]

h. The Lord's Prayer.—Mt 6^{7-15}=Lk 11^{1-4}. No words of Jesus which have come down to us are of greater significance or usefulness to mankind than this Prayer, which He taught His disciples, indicating as it does the true foundation, the true spirit, and the true substance of all prayer, prayer being our communion with God. A consideration of the Lord's Prayer will involve the following points: (1) the historical occasion on which the Prayer was given; (2) the original form of the Prayer as taught by Jesus; (3) the genetic relations of this Prayer to the OT, to Jewish prayers, and to the life of Christ; (4) the analysis and interpretation of its contents; (5) the right use of the Prayer.

(1) There is no portion of the Sermon as given by Matthew (chs. 5–7) which is so obviously an addition to the historical discourse as the section 6^{7-15} containing the Lord's Prayer. That these verses are extraneous matter, introduced here by the process of compilation, is now maintained by many scholars.[†] This fact appears in several ways: (*a*) Lk 11^{1} explicitly states that Jesus gave the Prayer to His disciples in response to an expressed wish on their part for a form of prayer, such as John the Baptist had given his disciples (the Jews were accustomed to many liturgical prayers). This statement, while it might be a mere literary setting of the Third Gospel, is probably a historical datum; and if historical, it points to another occasion than the Sermon for the presentation of the Prayer. (*b*) The precise time when the Prayer was given is not fixed by Luke, but it is assigned in a general way to the Peræan period, after the close of the Galilæan ministry. This is perhaps too late a position, since it was the example of John the Baptist's disciples which led Jesus' disciples to ask Him for a prayer; but this influence of John's upon Jesus' disciples is more likely to have been exercised before John's death, which came during Jesus' work in Galilee (Mk 6^{14-29}). If, then, the Lord's Prayer was given earlier than the Sermon, it would not have been given again as new teaching in that discourse; and if later, then it can stand in the Sermon only as a result of subsequent compilation. What seems to have happened is, that the original occasion of the giving of the Prayer was remembered (Lk 11^{1}), but the exact time at which it was given was forgotten; consequently each Evangelist, or his source, introduced the Prayer into his narrative where it was deemed suitable. (*c*) The Prayer, where it stands in the Sermon, clearly interrupts the movement of the discourse, and destroys the unity of the section into which it has been inserted. This is true not only of the Prayer, vv.$^{9-13}$, but also of the two verses preceding, vv.$^{7.\,8}$, and of the two verses following, vv.$^{14.\,15}$. The whole passage, vv.$^{7-15}$, does not pertain directly to the subject which Jesus is presenting in vv.$^{1-6.\,16-18}$, namely, the sin of ostentation and hypocrisy in acts of religious worship; and it mars the symmetry of Jesus' three illustrations about almsgiving, vv.$^{2-4}$; prayer, vv.$^{5.\,6}$; and fasting, vv.$^{16-18}$. Nevertheless, it is quite intelligible how these verses $^{7-15}$ were brought into this connexion by the compiling process. The Sermon was one of Jesus' most important discourses, and during the Apostolic age it was everywhere in use as a practical digest of His teaching. As the Sermon already contained some instruction about prayer, and the teaching on the same subject in vv.$^{7-15}$ was separated from its historical position, it came easily into association with vv.$^{5.\,6}$, where—although it was an extraneous element—it added to the completeness of the prayer instruction.

(2) It is in the highest degree improbable that the Lord's Prayer was given on two separate occasions—once in the Sermon in the form which Matthew reports, and again under other circumstances and in a different form as reported by Luke.[*] This would have been unnecessary; but still more, each of the two Gospels supposes that it reports the one and only giving of the Prayer. On the theory of repetition, why did Jesus present the Prayer in two forms so very different from each other? Having once given it in the fuller, smoother form of Mt 6^{9-13}, why should He subsequently repeat it in the shorter, cruder form of Lk 11^{2-4}? The reason for the postulation of two deliveries of the Lord's Prayer is the unwillingness of certain scholars to admit that Jesus' words could be so variantly transmitted (see the two Greek forms of the Prayer quoted in parallel columns on p. 5). Certainly it is not to be thought that Luke, with the Matthæan form of the Prayer before him, deliberately cut it down and changed it to the form contained in his Gospel; or that Matthew, with the Lukan form of the Prayer before him, deliberately enlarged and altered it into the form which the First Gospel presents. But the two forms may well be the respective results of two independent lines and processes of transmission. The Prayer as given by Jesus in Aramaic was briefly worded, as we may assume from the nature of the language and the Jewish custom, as well as from the original Hebrew 'Ten Words' and the Beatitudes. It is therefore not unlikely that the form of the Prayer given by Matthew is somewhat longer than the historical Aramaic form, for the purpose of producing a more perfect Greek

---

dishevelled hair being an Oriental sign of grief and abasement, cf. 2 S 12^{20}, Is 61^{3}, Dn 10^{3}, 1 Mac 3^{47}; that this is what is meant is seen in v.$^{17f.}$, where Jesus bids them give no external sign of their fasting.

[*] No one would seriously attempt to put these commands of Jesus into practice as precepts to be literally obeyed, so that all charity should be unorganized, and all prayers be absolutely private. Here, again, as in ch. 5, Jesus is dealing with principles only, and His illustrations are to be considered as illuminating the principles rather than as fixing statutes for literal observance.

[†] So Calvin, Strauss, Neander, Schleiermacher, Bleek, de Wette, Olshausen, Ewald, Ebrard, Meyer, Hanne, Godet, Kamphausen, Page, Feine, Sieffert, Bruce, Chase, Kübel, Weizsäcker, Wendt, H. Holtzmann, Bartlet, Heinrici, B. Weiss, Baljon, Nestle, Bacon. The Matthæan position of the Prayer is regarded as historical by Tholuck, Keil, Morison, Broadus, Achelis, Steinmeyer, H. Weiss, Nösgen, Plummer, Grawert, it being the opinion of most of them that the Lukan position is also historical, and therefore that the Prayer was given on two separate occasions by Jesus. Tholuck is undecided whether to prefer Matthew's position for the Prayer, or to hold that it was repeated.

[*] Yet this is maintained by Achelis, *Bergpredigt*, p. 297; Chase, *Lord's Prayer in the Early Church* (1891), p. 11, and by some others. Against this view, see Page, *Expositor*, 3rd ser. vol. vii. p. 433 ff.

translation. But in the main the differences which appear in the accounts of Matthew and Luke are due to the influences of independent translation from the Aramaic, and of handing down in practical Church use through fifty years of time. Neither account can be supposed to furnish a literal equivalent of the Prayer precisely as worded by Christ for His disciples.[*] Consequently it becomes a matter of importance to discover which of the two Gospel reports contains the more exact reproduction of the historical Prayer. The Church, with striking unanimity, from the 1st cent. to the present, has testified to the greater fidelity, dignity, and usableness of the recension in Mt 6^{9-13}; and this choice, as respects both quantity and quality, has been confirmed by the great majority of scholars.[†]

In order to consider in detail the differences which exist between the two accounts of the Lord's Prayer, it is necessary to make the comparison on the basis of the modern critical texts of the NT, such as Tischendorf's eighth edition and Westcott and Hort's text (with which the RV closely agrees). One notices first the exclusion of the doxology to the Prayer contained in the TR at Mt 6^{13} (and familiar to us through the AV): *ὅτι σοῦ ἐστιν ἡ βασιλεία καὶ ἡ δύναμις καὶ ἡ δόξα εἰς τοὺς αἰῶνας· ἀμήν.* This ending of the Prayer is not given in Luke, and the external evidence against its genuineness in Matthew is conclusive; so that its authenticity is no longer supposed.[‡] It grew up gradually in the 2nd cent. as a product of the Jewish custom of doxologies and responses, continued in the public services of the Christian Church; see esp. 1 Ch 29^{11-13}. The earliest mention of the liturgical use of the Prayer is in the *Teaching of the Twelve Apostles*, viii. 3, where the repetition of it three times daily is enjoined; and there is abundant Patristic evidence that this liturgical use rapidly increased. Readily, therefore, this doxology, which came to be used always at the close of the Prayer, found its way into the later exemplars of the NT text; and the fact that it appears in conjunction with Mt 6^{9-13} instead of Lk 11^{2-4} shows that it was the Matthæan form of the Prayer which the early Church adopted for its liturgy. The doxology is found in many of the secondary uncials, but is absent from ℵBD, the earlier versions, and the Patristic witnesses of the 2nd and 3rd cents. generally. Again, in numerous secondary and late witnesses of the text the fragmentary Lukan account of the Prayer is filled out and modified by the introduction of some or all of the elements peculiar to the Matthæan account; but these are manifest assimilations, and therefore have no textual standing in the Third Gospel.

Taking Mt 6^{9-13} and Lk 11^{2-4} thus according to the best Greek text, it appears that, after the address which is common to both, the Lukan account has five petitions, while the Matthæan account has six (or seven). The five parallel petitions are: (1) Hallowed be Thy name, (2) Thy Kingdom come, (3) Give us our daily bread, (4) Forgive us our debts (sins), and (5) Bring us not into temptation. To these Matthew adds, between (2) and (3), 'Thy will be done, as in heaven, so on earth,' which is clearly a new petition, and after (5) he adds, 'but deliver us from evil,' which may be a separate petition, but is more likely a fuller, reverse wording of the 'bring us not into temptation.'[*] Are these two additional clauses in Matthew authentic portions of the Lord's Prayer? The only denial of their authenticity has come from the few modern scholars who hold to the relative originality of the Lukan account here and elsewhere as against the longer Matthæan account, which they think was expanded and supplemented in transmission.[†] But Matthew's third petition, 'Thy will be done, as in heaven, so on earth,' brings into the Prayer one of Jesus' essential ideas and constant phrases (cf. Mt 7^{21} 12^{50} $26^{39.42}$, Jn 4^{34} 6^{38}); it is necessary to the literary structure of the Prayer, since it forms the third member of the first triplet of petitions; and while in a general way the same thought is expressed in the clause 'Thy kingdom come,' the Prayer needs this more definite statement of *how* the kingdom must be realized, what *men* must do to make the Kingdom come. It is not difficult to see why this petition was excluded from the Lukan form of the Prayer: the source from which Luke drew his account had passed through a Gentile line of transmission, in the course of which a large part of the characteristically Jewish element in the Gospel story was eliminated, as a detriment to the spread of the Gospel among the Gentiles. Its omission is therefore parallel to the omission of Mt 5^{17-37}, and much other material, from the Third Gospel.[‡] With regard to Matthew's other addition to the Lord's Prayer, the enlargement of the sixth petition by conjoining the phrase 'but deliver us from evil,' there is less argument for its authenticity; but its absence from Luke is readily explained in the manner just described, it is a characteristic Jewish conception entirely suitable to Jesus' thought and expression, and it fits in with the literary structure of the second triplet of petitions, since without it the sixth petition would not correspond in structure with the other two.

The phenomena of the parallelism in the wording of the several clauses which Matthew and Luke have in common are striking. The thought and the language of the two accounts agree precisely in the first, second, and sixth petitions (except that in the sixth Luke does not have the phrase *ἀλλὰ ῥῦσαι ἡμᾶς ἀπὸ τοῦ πονηροῦ*).[§] The third petition Luke does not have. In the remaining two petitions, the fourth and fifth, we find approximately the same ideas and words, but with some variation: thus the *δὸς ἡμῖν σήμερον* of Mt 6^{11} is paralleled in Lk 11^{3} by *δίδου ἡμῖν τὸ καθ' ἡμέραν*, the latter being an attempt to generalize and simplify the former; the *τὰ ὀφειλήματα* of Mt 6^{12} is paralleled in Lk 11^{4} by *τὰς ἁμαρτίας*, the latter being the substitution of an easy, well-known word for one full of significance but less common—that this substitution took place can be inferred from the *τῷ ὀφείλοντι* in the adjoined clause; and in the same petition the *ὡς καί* of Mt 6^{12} is paralleled in Lk 11^{4} by *καὶ γάρ*, which also is an obvious attempt to remove the possibility of a false *quid pro quo* interpretation. Very interesting also is the difference in the two accounts of the address of the Prayer; Lk 11^{2} gives only one word, *Πάτερ*, while Mt 6^{9} gives *Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς*. It is, of course, possible that the Lukan report is correct, but it certainly seems too familiar and abrupt for this solemn, lofty prayer; while Matthew's two attributives seem logical and important. The *ἡμῶν* indicates that the Prayer is a universal one for all who will pray to God. The *ὁ ἐν τοῖς οὐρανοῖς* is an OT conception (cf. Ps 2^{4} 115^{3}) which Jesus used (see passages below), because it was a customary Jewish expression full of religious meaning.[*] Its usual, though not entire, absence from Luke is best explained as due to the process already described by which the characteristic Jewish element was largely eliminated from the sources of the Third Gospel. In all these parallel passages, therefore, where Matthew and Luke give different readings for the clauses of the Prayer, the report of Matthew commends itself as possessed of a greater authenticity.[†] This confirms by historical tests the strong preference of the Church for the longer form of the Prayer as given in the First Gospel, a preference which rested primarily on spiritual and practical tests.

---

[*] It has been sufficiently argued above, under i. 3, that the entire phenomena of the primitive transmission of the Gospel material require us to recognize extensive verbal variation and occasional thought modification, such as appear in these parallel reports, throughout the narratives of the four Evangelists. There is a striking similarity between the Matthæan and Lukan accounts of the Beatitudes and their two accounts of the Lord's Prayer, and judgments arrived at concerning the features and merits of the one pair will be found to hold in general for the other pair also; the chief differences between the two forms of the Beatitudes and the two forms of the Lord's Prayer are due to similar causes operating on both.

[†] So Tholuck, Meyer, Feine, Bruce, H. Weiss, Plummer, B. Weiss, and many others; those also who think that Jesus gave the Prayer in two forms hold, almost without exception, that the form in Matthew is to be preferred. The modern scholars who regard the Lukan report as the more authentic (Bleek, Kamphausen, H. Holtzmann, Wendt, Bacon), seem to follow too rigid and exclusive a theory of literary criticism.

[‡] See Westcott and Hort, *New Testament in Greek*, vol. ii. Appendix; Scrivener, *Introd. to the Criticism of the New Testament* ^{4}, vol. ii. pp. 323–325; Chase, *Lord's Prayer in the Early Church*, pp. 168–176.

[*] Augustine (*Enchirid.* 116) regarded this phrase as a separate petition, making seven in all, and this became the standard Roman Catholic interpretation: it was adopted also by Luther, and is continued by Lutheran commentators. Among modern scholars there are many who accept this—some on traditional grounds (Kübel, Nösgen, H. Weiss), others on critical grounds (Bleek, Hilgenfeld, Ibbeken, Chase, v. d. Goltz). That the petitions are but six in number was held by Origen and Chrysostom, was adopted by Calvin, and has had the support in recent years of Tholuck (apparently), Bengel, Olshausen, Keim, Kuinöl, Meyer, Achelis, Feine, Hatch, Plummer, B. Weiss, Bruce, Hort, Nestle, and others.

[†] So Bleek, Kamphausen, H. Holtzmann, Wendt, Bacon.

[‡] Feine, *Jahrb. f. Protest. Theol.* 1885, thinks that Luke omitted the third petition because he considered that its idea was already contained in the first and second petitions, so that it was simply redundant. This is also the view of Kamphausen, *Das Gebet des Herrn*, p. 67. H. Holtzmann, *Hand-Comm. ü. d. Synoptiker, in loc.*, regards Luke's five petitions as original, designed to be counted on the fingers of one hand. O. Holtzmann, *Leben Jesu* (1901), p. 203, also maintains that the short form of Luke is original.

[§] The presence of this phrase in the text of Lk 11^4 in ACD and some other witnesses is to be explained as the result of a process of text assimilation with the Matthæan reading; it does not appear in ℵBL, the more important versions, or the earlier Patristic writings. Similar cases are the insertion in Lk 11^2 of

(3) When Jesus would condense His teaching into seven concise phrases (the address is an essential part of the Prayer), containing in Aramaic not fifty words, it became necessary for Him to embody His chief ideas about God and men in comprehensive phrases whose significance was already well understood by His followers. To introduce new phrases and new conceptions would have been to confuse those whom He wished to instruct. Consequently, the language and the ideas of the Lord's Prayer are closely related to the OT, where essential truth about God, and about the duty of men towards Him and towards one another, had in many respects been reached. Jesus' general teaching to His disciples previous to the giving of this Prayer had made known to them what He would have them understand by these OT conceptions and phrases.

Naturally, we find in Jewish prayers of a time contemporaneous with Jesus some phrases which are similar to those in the Lord's Prayer. Such parallels have been pointed out for the address and first two petitions; for the remaining four clauses there are no real parallels, although there are expressions with a certain similarity.[‡] Some of these Jewish prayer-formulas are subsequent in origin to the 1st cent. A.D., and may well have been influenced by the Christian Prayer. But there is no reason why Jewish prayers of Jesus' own time should not have contained some of the essential religious ideas which Jesus reaffirms, and in language which the OT had already made sacred. Such parallelisms furnish no proper basis for an attack upon the originality and authority of Jesus. His work was not to make a clean sweep of all existing religious conceptions and phraseology, as though the world had never had any vision of God, or truth, or goodness, or right; on the contrary, He came to show that the OT revelation was, in its best thought and teaching, a true, Divine revelation, which He would exalt and perfect (Mt 5^{17}, cf. He 1$^{1.\ 2}$). Jesus was not 'original' in the sense that He created a wholly new fabric of religious ideas, or introduced a wholly new set of religious terms; that kind of originality was made impossible by the fact that God was already in His world. Jesus' originality—and the term is not misapplied—consisted in His Divine ability to separate the true from the false, the permanent from the transient, the perfect from the imperfect; and then to carry forward the whole circle of ideas and practices to their ideal expression. The work of an artist is not to manufacture his paints, but to produce with them a perfect picture. Jesus' mission was to clarify and to perfect religious truth, to show the unity and perspective of its many elements, and to transform humanity by revealing the nature, the beauty, and the necessity of the ideal life.

One observes also with interest how the Lord's Prayer embodies the experiences of Jesus in His own personal and official life. His teaching grows out of and expresses His own religious perceptions and realizations, so that there is a vital unity, an instructive correspondence, between this Prayer and His experience.[*] He finds God to be His Father and their Father, the common Father of all, to whom prayer is to be addressed. He lives and works that God may be revered, that His Kingdom may come, and that His will may be perfectly done by men. He has experienced the truth that God cares for the physical needs of men, and it is their privilege to trust Him for these things. He knows and teaches that men are sinful, needing God's forgiveness; they also must show a forgiving spirit towards one another. He has Himself passed through severe temptations, praying for deliverance from them (cf. Mk 14$^{36.\ 38}$, Mt 4$^{1\text{-}11}$).[†] In giving this ideal Prayer to His disciples, Jesus does not necessarily imply that His experience is in no respect different from theirs, *e.g.* that there is no uniqueness in His relation to God, or in His character and career as regards sin. But He does mean that He has shared humanity with them, has lived through its experiences, has found the way to attain the human ideal, and will declare to them in His words and in Himself the secret of the true life.

(4) An analysis of the Lord's Prayer, accepting the Matthæan form as practically authentic, discloses a well-considered literary structure: there are seven clauses in all, the first containing the address, followed by two groups of petitions, three in each. Regard, therefore, is had to the sacred

---

Matthew's *γενηθήτω τὸ θέλημά σου ὡς ἐν οὐρανῷ καὶ ἐπὶ γῆς* (so ℵACD against BL, versions, and quotations), and *ἡμῶν ὁ ἐν τοῖς οὐρανοῖς* (so ACD against ℵBL, versions, and quotations). Modern text-critical authorities are agreed that these passages are interpolations in the Lukan text.

[*] Compare the later Jewish prayer-formula, אָבִינוּ שֶׁבַּשָּׁמַיִם; see Achelis, *Bergpredigt*, p. 229; Lightfoot, *Hor. Heb.* p. 299.

[‡] On this point see the older works of Möller, Augusti, Wetstein, Lightfoot, and Schöttgen; also, Achelis, *Bergpredigt*, p. 238 f.; B. Weiss, *Meyer-Komm. ü. d. Mattevgm.* p. 138; Plummer, art. LORD'S PRAYER in vol. iii.; Nestle, art. 'Lord's Prayer' in *Encycl. Bibl.* iii. 2821; Taylor, *Sayings of the Jewish Fathers*^{2} (1900), pp. 124-130; Dalman, *Worte Jesu*, i. 299-306; v. d. Goltz, *Das Gebet in der ältesten Christenheit* (1901), pp. 40-42.

[*] See v. d. Goltz, *op. cit.* pp. 1-53; Burton, 'The Personal Religion of Jesus' in *Biblical World*, vol. xiv. (1899), pp. 394-403.

[†] Chase, *Lord's Prayer in the Early Church* (1901), p. 104 f., notes, but exaggerates, the relation of the Lord's Prayer to the personal experiences of Jesus.

numbers 3 and 7, for the purpose of moulding perfectly the literary form of the Prayer.[*] The first group of petitions pertains to God—'Thy name,' 'Thy kingdom,' 'Thy will.' They express the most profound and comprehensive aspiration of men, that God may be all in all. Only when this is the supreme desire, can one offer the three petitions of the second group, which pertain to the needs of the individual life—'our daily bread,' 'our debts,' 'deliverance from temptation.' The several clauses would have been, in the original Aramaic, shorter and more nearly uniform in length than appears in a Greek translation. One cannot be certain whether the 'as in heaven, so on earth,' which follows the third petition, pertains to that alone, or equally to all the three petitions of the group.[†]

The address of the Prayer (*Πάτερ ἡμῶν ὁ ἐν τοῖς οὐρανοῖς*) introduces the term 'Father,' which was Jesus' prevailing and characteristic designation for God. It signified God's supremacy, authority, and power, but at the same time His love, patience, and care for men. The OT also has the term, but in the national sense, denoting God's relation to His covenant people; later there grew up the individual consciousness, and God came to be thought of as a personal Father to the worshipper.[‡] Jesus was accustomed to use this title for God in various ways:[§] often without any limiting attributive except the article, often also with a limiting 'my' or 'your'; but it is only in this passage, Mt 6^{9}, that Jesus is reported to have used the attributive 'our.' One might therefore infer that this 'our' is an unauthentic liturgical addition; but this inference is neither necessary nor satisfactory. 'Our Father' is a significant address, indicating at once the ground and the motive of prayer to Him, as well as the brotherhood of men under a common Father; the 'our' contributes an important element, therefore, to the address, and the occasion of its use is great enough to call for a special expression. It may be that the phrase 'Our Father' was oftener upon Jesus' lips than our Gospel records now show; the widening gulf which the disciples fixed between their ascended Lord and themselves might tend to the disuse of phrases which indicated that 'it behoved him in all things to be made like unto his brethren' (He 2^{17}). The second attributive to the *Πάτερ* in the clause of address, 'who art in heaven,' is a truly OT and Jewish phrase, which Jesus quite surely adopted and employed.[*] It expresses the transcendent position and character of God. In the pre-scientific age it was natural to assign God to a particular locality; the distant sky above the heads of men was logically chosen. But this local conception gradually retired before a growing sense of God's spiritual nature and omnipresence. With Jesus the phrase was a useful one (and we still find it so) to denote the separateness of God from men, His supermundane attributes, His absolute power and authority, His infinite character and qualities. Since the phrase meant these important things to the Jewish people of His day, and it was desirable that they should be in the mind of him who would pray to God, Jesus might well attach these words to His title of address in His model Prayer.[†]

The first petition (*ἁγιασθήτω τὸ ὄνομά σου*)[‡] expresses the devout wish of the worshipper in view of what, according to the address of the Prayer, he conceives God to be, namely, that God may be fully recognized, honoured, and revered by all. The English word 'hallow' is no longer in common use; it meant to 'treat as holy,' to revere. Thus it was a proper translation of *ἁγιάζειν* (Lat. *sanctificare*), which, together with *δοξάζειν*, was employed in the LXX to render the Hebrew forms הִקְדִּישׁ and קִדֵּשׁ.[§] Calvin, Kamphausen, and some others have understood that 'the name' in this petition was to be taken in the sense of the Third Commandment, which forbade the misuse of, and disrespect to, the title of God (so also Mt 5^{33-37}). This interpretation is true as far as it goes, but it is too restricted for so comprehensive a prayer as this. Rather, 'the name' is to be understood here in the Oriental sense, as a periphrasis for the Person Himself, as though it were said, 'May God receive due reverence.' To the Hebrew 'the name' stood for what the individual was who bore the name. God's name designated Him as He had made Himself known to men.[‖] Therefore the petition prays that God may be perfectly acknowledged by all men, so that all that He is and does may receive due honour, and that men may commit themselves to Him as their Father (cf. Ro 14^{11}, Eph 3^{14-19}).

The second petition (*ἐλθάτω ἡ βασιλεία σου*)[¶] expresses the wonderful Messianic Hope of the Hebrews; it was in substance the prayer which for centuries Israel had addressed to God.* Jesus bade them continue this prayer for the coming of the Kingdom of God, but taught them the true conception of what that Kingdom was, and how it was to be accomplished. The Kingdom of God was Jesus' constant and all-inclusive term to denote the individual and social good which would come to men when they would trust themselves to God's guidance and conform themselves to His ideal (Mt 6^{33}=Lk 12^{31}). In Jesus' conception the coming of the Kingdom was a process, a development through successive stages with a final consummation (Mk 4^{26-32}). He established the Kingdom among men (Lk $17^{20.21}$), His followers were to carry it forward (Mt $28^{19.20}$), and in due time He would bring about its complete realization (Mt 24. 25).† Our prayer, therefore, must be that God in His wisdom, power, and love may hasten the growth among men of righteousness, mercy, and peace; that the principles of the Gospel may prevail in individuals and in society as a whole, that humanity may become transformed into the likeness of Him who revealed to them the Divine ideal of God for His children.

---

[*] It is not to be said that the artistic literary structure of the Prayer is unworthy of Jesus, and must therefore be attributed to the Evangelist. On the contrary, Jesus designedly presented much of His teaching in metre and rhythm (see above, ii. 1). His marvellous literary power was exercised not for art's sake, but to make art serve the highest well-being of men; for ideal thought cannot fulfil its whole mission until it is ideally expressed. On the logical relation of the petitions, see Plummer, art. LORD'S PRAYER in vol. iii.

[†] Tholuck, *Bergrede*^{5}, p. 350 [Eng. tr. p. 328], notes that there are three elements which make up the address clause of the Prayer, and three elements which make up the doxology that came to be used at its close.

[‡] For the national sense cf. Dt 1^{31} 8^{5} 32^{6}, Ps 68^{5} 89^{26} 103^{13}, Is 1^{2} 9^{6} 63^{16} 64^{8}, Jer $3^{4.19}$, Hos 11^{1}, Mal 1^{6} 2^{10}; for the individual sense, Wis 2^{16} 14^{3}, Sir $23^{1.4}$, To 13^{4}, 3 Mac $6^{3.8}$.

[§] In the Gospel of Matthew the term 'Father' is frequent, and is generally accompanied by either 'my' or 'your' ('thy') in about equal proportion. The term occurs rarely in the Gospel of Mark. In the Gospel of Luke, also, there are relatively few instances of it. But the Fourth Gospel has it abundantly in the discourse sections, often with 'my,' but in the main only with the article, 'the Father.' A comparison of the occurrence of the term in parallel Synoptic passages raises the question as to how much confidence is to be placed upon the precise attributive reported in connexion with the title, or upon the occurrence of the title itself: thus in the group Mt 26^{39}=Mk 14^{36}=Lk 22^{42} we find 'O my Father,' 'Abba, Father' (the Aramaic word with its translation), and 'Father,' respectively; in Mt 5^{45}=Lk 6^{35}, Mt 10^{29}=Lk 12^{6}, Mt 10^{33}=Lk 12^{9}, the First Gospel has 'Father,' while the Third Gospel has 'Most High' and 'God'; in Mt 12^{50}=Mk 3^{35}=Lk 8^{21} the First Gospel has 'my Father which is in heaven,' while the Second and Third Gospels have simply 'God'; in Mt 20^{23}=Mk 10^{40} the Second Gospel strikingly lacks the words 'of my Father.' It seems probable that Jesus constantly used the title 'Father,' as the First and Fourth Gospels record; but that it had been largely suppressed or altered in the sources of the Second and Third Gospels, again for the reason that it was a characteristically Jewish designation.

[*] This is shown by the frequent occurrence of the phrase in the First Gospel, *e.g.* Mt $5^{16.45.48}$ $6^{1.14.26.32}$ $7^{11.21}$ $10^{32.33}$ 12^{50} 15^{13} 16^{17} $18^{10.14.19.35}$ 23^{9}; cf. also Mk $11^{25.26}$, Lk 11^{13}; its almost total absence from the Second and Third Gospels is another feature of the universalization of this material. For Jewish usage see *'Ābôth* v. 30; *Ṣôṭā* ix. 15; *Yômā* viii. 9; and Dalman, *Worte Jesu*, i. 150–159, 299–306. Wendt, *Lehre Jesu*, i. 62 f., can hardly be right in holding that this phrase is an addition in the Matthew passages, not to be attributed to Jesus.

[†] Whether the Prayer was originally given in Aramaic or Hebrew has been discussed, but without a certain conclusion. Chase is sure it was in Aramaic; see, further, Taylor, *Sayings of the Jewish Fathers*^{2} (1897), p. 176 f.

[‡] Compare the parallel clause in the Jewish synagogal prayer *Ḳaddish*: 'Magnificetur et sanctificetur nomen eius magnum in mundo' (Maimonides' translation); see Achelis, *Bergpredigt*, p. 238 f.

[§] See Ex 20^{8}, Lv 21^{8} 22^{32}, Nu 20^{12}, Dt 32^{51}, Is 29^{23}, Ezk 36^{23}; and in the NT, 1 P 3^{15}.

[‖] See Ps 5^{11} 9^{10}, Pr 18^{10}. So the peculiar phrase (still in religious use) 'for his name's sake,' Ps 23^{3} 25^{11} 31^{3} 79^{9}; cf. Achelis, *Bergpredigt*, pp. 240–243.

[¶] Compare here, also, the *Ḳaddish* parallel: 'Regnare faciat regnum suum.' Marcion, in his Lukan form of the Lord's Prayer, read as the second petition, not what we have here, but *δὸς ἡμῖν τὸ ἅγιον πνεῦμα*, or another form of the same, *ἐλθέτω τὸ ἅγιον πνεῦμά σου πρὸς ἡμᾶς*. The same thought in a more expanded form was known, as a feature of Luke's text, to Gregory of Nyssa and Maximus the Confessor; thus: *ἐλθέτω τὸ ἅγιον πνεῦμά σου ἐφ' ἡμᾶς καὶ καθαρισάτω ἡμᾶς* (cf. Westcott and Hort, *New Testament in Greek*, vol. ii. Appx.; Nestle, in *Encycl. Bibl.* iii. 2818). This petition for the Holy Spirit cannot be authentic in this connexion, for it has small attestation, is not suitable to the context, and is obviously a drastic substitution to bring into the Prayer a specific request for the Holy

The third petition (*γενηθήτω τὸ θέλημά σου, ὡς ἐν οὐρανῷ καὶ ἐπὶ γῆs*) was needed in the Prayer to guard the second petition against misinterpretation. It had become a prevalent misconception that the coming of God's Kingdom depended after all upon Himself, and that when He should choose to do so He could by His omnipotence bring that Kingdom into complete existence; so men had importuned God to become loving and forgiving towards them, and to grant to them the blessings which out of dissatisfaction or neglect He was withholding from them. Jesus makes that idea impossible when He gives this third petition, teaching that God's will must be absolutely done by all.‡ To do God's will, to accomplish His work, was the one purpose of Jesus' own life (Mt $26^{39.42}$, Jn 4^{34} 6^{38} 12^{27} 17^{4}), and He enjoined it upon all as the one comprehensive human obligation (Mt 7^{21}, Jn 7^{17}). Men must therefore co-operate with God in the realization of the Kingdom by making themselves, with God's help, what they should be, and by bringing in the true brotherhood of universal love and service.

The fourth petition§ pertains to the physical needs of men, upon which the spiritual life is dependent during this earthly stage of existence.* The conditions under which we live are created by God, He has full knowledge of them (Mt $6^{8.25-32}$), and He stands ready to supply what is necessary to human well-being (Mt 5^{45} 6^{33} 7^{11}). This providential bestowal comes, of course, not as a pure gratuity, but as a return for the honest, energetic labour of men. The 'bread' which is asked for in this Prayer is meant in the wider sense as referring to all necessary food; and by implication it certainly includes all those things which are essential to physical welfare. The petition contemplates only a simple, frugal life, enjoining trustfulness and contentment therein. In other words, the idea of the Prayer is that men are to ask God confidently for what they need; but only for what they really need, and only as they need it. The disciples of Jesus are to live trustfully in the present and for the present, without anxious concern as to the future (Mt 6^{34}). About this general interpretation of the fourth petition there can be no question. A difficulty exists, however, as to the precise force of *ἐπιούσιον*; since it is a *hapaxlegomenon*, we cannot determine its usage from other contexts; the Greek word most like it is *περιούσιος*, which appears first in the LXX. Recent scholars are largely in agreement that the word is derived somewhat irregularly from *ἐπί*+*εἶναι* in a fem. ptcp. form, signifying 'being unto,' 'pertaining to'; so that the prayer would be, 'Give us to-day the bread which pertains (to this day),' *i.e.* just so much as is needed for to-day to meet one's physical requirements (cf. Ja $2^{15.16}$).†

Spirit which Jesus had included only by implication. The prominence given to the Holy Spirit in the Apostolic age has left its impress upon the Lukan account of Jesus' words; cf. Mt 7^{11}=Lk 11^{13}, Mt 11^{25}=Lk 10^{21}, also Mt 10^{20}=Lk 12^{12}.

* See art. MESSIAH in vol. iii.; *Encycl. Bibl.*, art. 'Messiah'; also Goodspeed, *Israel's Messianic Hope* (1900).

† See art. KINGDOM OF GOD in vol. ii.; also Wendt, *Lehre Jesu*, ii. 293–325. The verbal form ἐλθάτω does not favour the idea that the coming of the Kingdom is continuous; which part of the verb was used in the original Aramaic can only be matter of conjecture—one would suppose a jussive imperfect, and this would have presented no difficulty. At any rate, this petition must be interpreted in the light of Jesus' entire teaching concerning the Kingdom. The Greek aorist here may be due to the idea held by all Christians in the Apostolic age, that the return of Christ was imminent, and that with His return He would bring the catastrophic consummation; this passage would then be one of a number in the Gospels which received an eschatological colouring in transmission, on account of the failure of the disciples to take completely Jesus' view of the nature and coming of the Kingdom.

‡ The conception that God's will is already perfectly done in heaven, by the angelic host, is at the same time an assurance and a model for the full realization of His will on earth among men. The angels are frequently mentioned both in the OT (Ps 91^{11} 103^{20}) and in the NT (Mt 18^{10} 24^{36} 26^{53}, Mk 8^{38} 12^{25} $13^{27.32}$, Lk $12^{8.9}$ 15^{10} 16^{22}, Jn 1^{51}, He $1^{4.14}$ $12^{22.23}$); on the Jewish angelology see art. ANGEL in vol. i.; *Encycl. Bibl.*, art. 'Angel'; also Edersheim, *Life and Times of Jesus the Messiah*, vol. ii. Appx.; Wendt, *Lehre Jesu*, ii. pp. 121–126.

§ Mt 6^{11} τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον δὸς ἡμῖν σήμερον; Lk 11^{3} τὸν ἄρτον ἡμῶν τὸν ἐπιούσιον δίδου ἡμῖν τὸ καθ' ἡμέραν. It is striking that the strange word ἐπιούσιον, which is found nowhere in all Greek literature outside of this passage (so Origen, *de Orat.* 27), should appear in both of these widely divergent accounts of the Lord's Prayer. The fact can be explained only by the hypothesis that these two Greek forms of the Prayer must have had a literary relation to one another in some stage of their transmission.

* Taylor, *Sayings of the Jewish Fathers* 2, p. 125, thinks that this petition contains an allusion to the giving of the manna, Ex 16^{4}; cf. Ps $78^{24\text{ff.}}$, Wis $16^{27\text{f.}}$, Jn 6^{32}.

† So Achelis, *Bergpredigt*, pp. 265–271; H. Holtzmann, *Hand-Comm. ü. d. Synoptiker*, p. 116; Kamphausen, *Das Gebet des Herrn*, p. 97 ff.; Leo Meyer in Kuhn's *Zeitschr. f. vergleich. Sprachforschung*, vii. 401 ff. (though he afterwards withdrew this opinion, in *Nachrichten d. kgl. Gesellschaft der Wissenschaften zu Göttingen*, 1886, p. 245 ff.); Tholuck, *Bergrede* 5, pp. 375–385 [Eng. tr. 341–353]; B. Weiss, *Meyer-Komm. ü. d. Matt-evgm.* p. 135 f.; Wendt, *Lehre Jesu*, ii. 239 f.; Taylor, *op. cit.* pp. 125–127, 178–186, 190 f.; as also Ewald, Nösgen, Bassett, and many others. A list of the older literature upon the subject may be seen in Tholuck, *loc. cit.* Other interpretations of the passage are: (1) that the derivation of ἐπιούσιον is from ἐπί+the noun οὐσία, which in philosophical usage signified 'subsistence,' 'existence'; therefore the petition would read, 'Give us to-day our bread for subsistence,' *i.e.* that bread which serves to maintain our physical existence. So Cremer, *Bibl.-Theol. Wörterbuch* 7, *in loc.*; also Origen, Chrysostom, Theophylact, Maldonatus, Bleek, Keil, Kuinöl, Kübel. This conception, however, seems forced, and too technically philosophical; nor is there any certain parallel instance of such a usage of οὐσία. It differs from the view adopted above in stating the end of the giving instead of the measure, for what purpose the bread is asked rather than the quantity of bread asked for. (2) That the derivation of ἐπιούσιον is from ἐπί+ἰέναι, and that with it is understood in sense a ἡμέρα (cf. Ac 16^{11} ἐπιούσῃ. 23^{11}, Pr 27^{1} LXX); it then means 'the coming day,' and the petition says, 'Give us to-day our bread for to-morrow.' So Lightfoot, *Fresh Revision of English N.T.* 3 (1891), Appx. I.; Schmiedel in Winer's *Grammatik d. NTlichen Sprachidioms* 8 (1894), pp. 136–138; also Grotius, Wetstein, Bengel, Fritzsche, Winer, Gore, Bruce, Meyer, Marshall, O. Holtzmann, and RVm. The difficulty with this temporal interpretation of ἐπιούσιον is that it contradicts the very idea of the petition as intended by Jesus: instead of having men pray for to-morrow's food, He would have them pray for to-day and trust for to-morrow. No other meaning can be derived from the passage Mt 6^{25-34}, ending with the words, 'Be not therefore anxious for the morrow; for the morrow will be anxious for itself. Sufficient unto the day is the evil thereof.' This temporal interpretation also throws an incongruous meaning into the Lukan form of the prayer, 'Give us every day the bread for the next day'; that would be a mechanical kind of Providence. (3) That the 'bread' for which this petition asks is to be understood spiritually, at least in its primary reference. This was the favourite interpretation among the Fathers of the early Christian centuries; it arose easily from the figurative use of 'bread' in Jn 6^{48-58}, and was suitable to the allegorical mode of the time. Augustine held the 'bread' to refer to three things, in an ascending scale of significance: (*a*) physically, actual food; (*b*) intellectually, the word of Christ; (*c*) spiritually, the Lord's Supper. For the

As περιούσιος means 'beyond what is necessary,' so ἐπιούσιον means 'exactly what is necessary.' This is the conception of supply which we find in Pr 30^8 'Feed me with the food that is needful for me.' There are similar Targumic and Talmudic expressions. The wording of the petition as given by Matthew is a specific request for a single occasion, understanding that the Prayer will be repeated as frequently as need arises, presumably each day;[*] while Luke's wording presents a general request for a constant supply: it would seem clear that the Matthæan form is of greater authenticity.

The fifth petition[†] concerns the present religious status of the man in relation to God. The worshipper is to measure himself against the Divine ideal of the highest, fullest self-development, and of complete love and service to God and one's fellow-men. He is to observe how far he has failed to meet the obligations placed upon him by God, and why he has failed to meet them. When a man has made this inventory of his physical, moral, and spiritual status, with a sincere repentance for all his transgressions and shortcomings, and with a supreme purpose to achieve the Divine ideal for men, he is ready to ask God's forgiveness in the words of this petition. Holding that God's will is the only law of life, and that His Kingdom is the only end of life, the worshipper needs God's forgiveness for his spiritual comfort and inspiration, in order that he may start anew each day towards the achievement of the ideal. It is in this fundamental and comprehensive sense that the term ὀφειλήματα is figuratively employed in this petition, including everything that we should be and do towards God, our fellow-men, and ourselves.[*] The second clause contains an explicit condition of this Prayer, that men must feel and exercise the same spirit of forgiveness towards one another which they wish God to show towards themselves. Jesus places these words in the petition, in order that men may be face to face with this condition whenever they pray to God for their own forgiveness. This principle of love as the basis of all human and Divine relations is a constant teaching of Jesus, and furnishes the key to the Sermon on the Mount, cf. esp. Mt $5^{7. 23f. 43-48}$; it is also most impressively set forth in the teaching and parable of Mt 18^{21-35}. In the Lord's Prayer as recorded by Matthew this idea is further strengthened by the two added verses, $6^{14. 15}$, with which Mk 11^{25} may be compared.[†] It is not to be understood that the ὡς καὶ which introduces Matthew's second clause signifies a *quid pro quo* kind of forgiveness on God's part, as though God forgave men only in a measure proportionate to their own forgiveness. The words might have this force (as in Mt 20^{14}, Rev 18^6), but it is not the only meaning for them (cf. Mt 18^{33}). Such a commercial idea is inconsistent with the method of God as abundantly shown in Jesus' teaching. God is in amount more loving and forgiving than men can be, but He requires that men also shall be loving and forgiving.[‡]

The sixth petition,[§] which closes the Lord's Prayer, provides for the moral and spiritual welfare of the individual in the future. As the fifth petition sought forgiveness for past failures to do God's will, so the sixth petition seeks His protection from future failures. The worshipper, conscious of his own weakness, puts his dependence upon God. He prays for deliverance from those situations in life where he will be liable to yield

---

spiritual meaning also stood Tertullian, Cyprian, Cyril of Jerusalem, Athanasius, Ambrose, and Jerome; and in modern times Delitzsch, Olshausen, Stier, M'Clellan. (4) That the ἐπιούσιον has a temporal signification referring merely to the day of the prayer. So the RV, 'Give us this day our daily bread,' and this is the wording in common use in Christendom to-day, made so by the popular translations of the Bible. It is redundant in expression, and its only merit is simplicity; for it lacks the profound meaning which inheres in the ἐπιούσιον as interpreted in the text above. Lately this view has been again defended by Nestle (*ZNTW*, 1900, pp. 250-252; *Encycl. Bibl.* iii. 2819 f.) on the basis of the reading אֲמִינָא (=continual), which is found in Syr cur at Mt 6^{11} and Lk 11^3, and in Syr sin at Lk 11^3, the Matthæan section being wanting; also in the Syriac *Acts of Thomas* (ed. Wright, p. 313). This אמין is said to be the regular Syriac word for the translation of the Heb. תָּמִיד; and Nestle has learned that a Jewish translation of the First Gospel into Hebrew, made in the 16th cent., rendered the ἐπιούσιον by תָּמִיד. He supposes, therefore, that the Greek ἐπιούσιον in the Lord's Prayer represents an original לֶחֶם הַתָּמִיד, and says that the translation 'our daily bread' is the best English translation of the Greek text. The difficulty with this interpretation is twofold: (*a*) it gives a purely tautological rendering, which is unlikely to have been original; (*b*) it altogether fails to account for the presence in the Greek text of this strange word ἐπιούσιον, which seems to have been created to express an intricate thought for which no current Greek word was suitable; but if the thought was so simple as 'continual' or 'daily,' there were several common expressions at hand to use (*e.g.* the τὸ καθ' ἡμέραν of Lk 11^3 19^{47}), and the LXX had already employed such (cf. Ex 5^{13} 16^5, Nu 4^{16}, Ps 67^{20}, Dn 1^5, 1 Mac 6^{57} 8^{15}); while the early Syriac reading may well be nothing more than a simplification of a difficult expression whose exact meaning had not been clearly conveyed by the ἐπιούσιον, and which in the circle of the translator was no longer understood. Chase, *Lord's Prayer in the Early Church* (1891), pp. 44–53, holds that the original form of the petition was, 'Give us our (or, the) bread of the day,' and suggests that the newly coined word ἐπιούσιον was later interpolated to meet liturgical exigencies in connexion with the use of the Lord's Prayer in the evening. With this reading the Prayer could be used in the morning, and would ask bread for that same day; or it could be used at night, and would ask bread for the morrow; however, the σήμερον so replaced did not in fact disappear, but remained in the text as a confusing redundancy. Chase's view is accepted by v. d. Goltz, *Das Gebet in der ältesten Christenheit* (1901), p. 49 f.

[*] B. Weiss, *op. cit.* p. 136, holds that the σήμερον in the Matthew form of the petition is a subsequent addition, bearing witness to the fact that the Prayer was assigned to daily use in the early Christian liturgy. That the Prayer was used daily, or oftener, in the earlier part of the 2nd cent., is established by the *Teaching of the Twelve Apostles* (viii. 3), and other witnesses; but it does not follow that the σήμερον of Mt 6^{11} is merely a product of that practice. There is no inherent reason why Jesus should not Himself have given the corresponding Aramaic word in this connexion. The Prayer was given to the disciples for regular use, because they wished some set form of prayer to recite in the common liturgical manner of the Jews (cf. Lk 11^1). The 'day' was a natural and convenient period of time (cf. Mt 6^{34}) for the repetition of the Prayer. Why should not Jesus have arranged the wording on that basis?

[†] Mt 6^{12} καὶ ἄφες ἡμῖν τὰ ὀφειλήματα ἡμῶν, ὡς καὶ ἡμεῖς ἀφήκαμεν τοῖς ὀφειλέταις ἡμῶν. Lk 11^{4a} καὶ ἄφες ἡμῖν τὰς ἁμαρτίας ἡμῶν, καὶ γὰρ αὐτοὶ ἀφίομεν παντὶ ὀφείλοντι ἡμῖν.

[*] In classical Greek, ὀφειλήματα was used generally of financial debts, and it was probably to avoid this ambiguity that Lk 11^4 reads ἁμαρτίας instead (originally Luke's account must have had ὀφειλήματα like Matthew's, as is seen by the ὀφείλοντι in the second clause; so Chase, *Lord's Prayer in the Early Church* (1891), p. 55, and Page, *Expositor*, 3rd ser. vol. vii. p. 437). But ὀφείλημα (and its kindred forms) is a frequent NT word for moral and spiritual obligation (Lk 17^{10}, Jn 13^{14}, Ro $15^{1. 27}$, Gal 5^3), although used also in the money sense (Mt 18^{28}, Lk 7^{41} 16^5, Ph ^{18}). Luke's ἁμαρτίας lacks the Aramaic colour, the strength and the comprehensiveness of the ὀφειλήματα. In the EV also the word 'debts' gives a deeper meaning when rightly understood than the word 'sins,' since the latter term tends in popular usage to signify only positive, flagrant wickedness. And still less satisfactory is the word 'trespasses,' given currency in this petition by the Episcopal Prayer-Book (apparently from Tindale [? by reading 'trespasses' from v.$^{14f.}$ into v.^{12}]); for it is not a proper translation of either ὀφειλήματα or ἁμαρτίας, and is the most limited in its scope of the three English words.

[†] Mt $6^{14. 15}$ has apparently found its way into the Sermon through its previous connexion with the Lord's Prayer. Whether it had its place historically in that connexion is uncertain. Mk 11^{25} has a different setting for the passage, but one due to topical association rather than to original position. There is nothing unlikely in the hypothesis that Jesus, after giving the Prayer, spoke in explanation of it, and that this fragment was a part thereof. In these two verses, as in Mk 11^{25}, παραπτώματα is used instead of ὀφειλήματα or ἁμαρτίας.

[‡] Luke's variant, καὶ γάρ, is distinctly intended to remove the possible misinterpretation that God forgives a man just to the extent that the man forgives others. But the Matthæan wording gives evidence of being a closer translation from the Aramaic. Another instance of Lukan modification is his ἀφίομεν in this clause instead of Matthew's ἀφήκαμεν, to give the petition a general character instead of the specific import of the original Prayer. It was noted that in the fourth petition changes were made for the same purpose, Luke having δίδου instead of δός, and τὸ καθ' ἡμέραν instead of σήμερον.

[§] Mt 6^{13} καὶ μὴ εἰσενέγκῃς ἡμᾶς εἰς πειρασμόν, ἀλλὰ ῥῦσαι ἡμᾶς ἀπὸ τοῦ πονηροῦ. Lk 11^{4b} καὶ μὴ εἰσενέγκῃς ἡμᾶς εἰς πειρασμόν. The first clause is the same in both accounts, while the second clause does not appear in Luke (see above).

to wrong or false influences. But inasmuch as men must undergo trials, and in them work out their own character and service, Jesus gives to this petition a second clause, which provides against necessary trials by asking for strength to come through them safely. We may then paraphrase the sixth petition of the Prayer in this way: 'Spare us as much as possible from all trials in which there is danger that we shall fail to do Thy will; but, so far as we must meet trials, give us the strength necessary to withstand the temptations to evil which are involved in them.'* It thus becomes clear that the second clause of the petition, 'but deliver us from evil,' is not a separate, seventh petition, but an essential element in the sixth, pertaining to those trials from which God cannot and should not deliver us. In them we pray Him to preserve us from falling. The 'evil' which is meant is, of course, moral and spiritual transgression or failure of doing God's will; and the context therefore makes it improbable that the τοῦ πονηροῦ should have been intended to refer concretely to the devil in person.† The term πειρασμός is used with a wide range in the NT, having both a neutral meaning (=trial) and a bad meaning (=malicious temptation).‡ Only in the former, neutral sense can God be spoken of as 'tempting' men, *i.e.* bringing them into situations which test their character and thus promote their growth. Such trials involve a possible lapse into evil, and must cause anxiety and apprehension; so that men may well fear them and pray for deliverance from them. Jesus said to His disciples, 'Watch and pray, that ye enter not into temptation: the spirit indeed is willing, but the flesh is weak' (Mk 14^{38}, cf. Ja $1^{13f.}$). But, since God brings these trials for the individual's good, He will never allow the tried person to fall into evil if he will commit himself wholly to God's guidance and care through the experience (cf. 1 Co 10^{13}, He 2^{18} $4^{15f.}$, Ja $1^{2-4.\ 12f.}$, 1 P $1^{6f.}$).

(5) The Lord's Prayer is thus seen to be an epitome of Jesus' teaching; it contains the essential ideas of God and human duty, expressed in the briefest, simplest, and most impressive words. The vital truths of the Gospel are presented in such a way that any and every man can grasp them, and can see them in their right perspective and relations.* Since the Prayer was intended for universal use, its meaning must be readily intelligible to all; it must be not intricate, but simple of interpretation. And the Lord's Prayer is adapted to every kind of Christian use. It is designed for repetition as it stands, both in private and in public devotions. It is also a pattern prayer, after which all prayer to God should be modelled. Here we learn what things are to be prayed for, how God's glory, Kingdom, and will take precedence of the individual's affairs, and in what spirit all prayer is to be made. The religious practice of Jesus' day too often regarded the virtue of a prayer as consisting in its recital, and measured its value by its length or repetition (cf. Ac 19^{34}). The Gospel of Matthew ($6^{7f.}$) has preserved in connexion with the Lord's Prayer some words of Jesus which were directed against this abuse. Since God knows what things are necessary for men, He does not need to be informed of them; and since He is a loving Father who cares for His children, He does not have to be importuned to give His blessings. These facts do not make prayer useless; on the contrary, real prayer is possible only on the basis of them. God never wished the empty repetition of prayer formulæ, which is a waste of time and strength; and it was an entire misconception of Him that He had to be coaxed into goodwill towards men, or solicited to supply their needs. Prayer, in Jesus' conception, is the loving, obedient and trustful communion of men with their Heavenly Father. It brings men comfort, joy, and peace; it reassures and strengthens them in all their labours and experiences; it brings them to know only God's will in their lives, and to seek only its full realization. As we learn to know God in the words and face of Christ, we pray more instead of less; prayer becomes a privilege instead of a duty. Indeed, to the true Christian, prayer is the atmosphere in which he lives. Instead of occasional periods or moments of prayer, the whole life becomes a prayer, so that we walk and talk with God. Into this perfect communion with God the Lord's Prayer leads us, voicing all our aspirations and petitions, when we come to appreciate its full significance.†

---

* Jesus' Gethsemane experience illuminates the words of this petition (cf. Mt 26^{36-46}, esp. v.^{39}). The Saviour is here face to face with the bitterest trial of His life; the attitude of the Jewish nation towards Him has come to be that of fixed and final rejection; the chosen people are ready to repudiate their Messiah with a violent death, and so to fail of fulfilling their Divine mission to the world (cf. Mt $23^{37.\ 38}$). Jesus in the garden feels that He cannot endure this; He is in agony that God should seem to allow it, and prays that He may be spared this trial—that there may be some other outcome of the situation; nevertheless, He has no other desire than that God's will should be done. The prayer of Jesus was answered not by a removal of the trial, but by a Divine reassurance, and an impartation of strength for its endurance (cf. Lk $22^{43f.}$, which gives an essentially correct idea, even if textually uncertain). One may also compare St. Paul's experience when he three times prayed for the removal of his 'thorn in the flesh'; God's reply to him was, 'My grace is sufficient for thee; for power is made perfect in weakness' (2 Co $12^{8.\ 9}$; cf. also 1 Co 10^{12}).

† The objection to taking the τοῦ πονηροῦ as a masculine (with Tertullian, Cyprian, Origen, Chrysostom, Theophylact, Calvin, Erasmus, Bengel, Meyer, Olshausen, Ebrard, Fritzsche, Hanne, Gore, H. Holtzmann, Lightfoot, Thayer, Plummer, Chase, v. d. Goltz, Nestle, and the RV) does not lie in the fact that the phrase could not be so used, for there are a number of clear NT cases where ὁ πονηρός refers concretely to the devil (cf. Mt $13^{19.\ 38}$, Eph 6^{16}, 1 Jn $2^{13f.}$ 3^{12} 5^{18}); nor in the meaning of the collocation ῥύεσθαι ἀπό τινος, which is used of both persons (Ro 15^{31}) and things (2 Ti 4^{18}); nor in an avoidance by Jesus of the current Jewish conception and terminology regarding the personal devil (cf Mt 4^{10} 12^{27} $13^{38f.}$, Lk 10^{18}, Jn 8^{44}), for, so far as we can discover, He did not give any new teaching on this point (cf. Wendt, *Lehre Jesu*, ii. 121–126). The objection lies rather in the thought of the petition itself, which cannot be, 'Bring us not into trial, but deliver us from the devil,' since this destroys all connexion between the two clauses, though the ἀλλά demands a connexion; nor, 'Bring us not into the temptation of the devil, but deliver us from the devil,' which is improbable tautology. So that some ancient and many modern scholars interpret the τοῦ πονηροῦ as a neuter (Augustine, Luther, Stier, Ewald, Keil, Nösgen, Tholuck, Alford, Burgon, Cook, M'Clellan, Achelis, Ibbeken, B. Weiss, Taylor, and others). This neuter use of τὸ πονηρόν to denote all moral and spiritual evil may be seen in Mt 5^{37}, Lk 6^{45}, Jn 17^{15}, Ro 12^{9}, 2 Th 3^{3}, 1 Jn 5^{19} (the RV is probably wrong in translating most of these as masculines); cf. also 2 Ti 4^{18}. On πονηρός -όν see Cremer, *Bibl.-Theol. Wörterbuch*^{7}, *in loc.*; Achelis, *Bergpredigt*, pp. 286–289; letters in the *Guardian* by Lightfoot (Sept. 7, 14, 21) and Cook (May 21, Nov. 26) (Lightfoot's letters appear in *Fresh Revision of the English N.T.*^{3}, 1891, Appx. II.); Chase, *Lord's Prayer in the Early Church* (1891), pp. 85–167; Hatch, *Essays in Biblical Greek* (1889), pp. 77–82. Taylor, *Sayings of the Jewish Fathers*^{2} (1897), pp. 37, 64, 128–130, 147–150, 191 f., takes the τοῦ πονηροῦ as referring to the יֵצֶר הָרָע, man's evil nature (Gn 8^{21} 'the imagination of man's heart is evil from his youth,' cf. Ja 1^{13-15}); see also Porter, 'The Yeçer Ha-ra',' in *Yale Biblical and Semitic Studies* (1901), pp. 93–156.

‡ On the NT usage of πειρασμός, see Cremer, *Bibl.-Theol. Wörterbuch*^{7}, *in loc.*; Tholuck, *Bergrede*^{5}, pp. 394–401 [Eng. tr. pp. 357–362]; Achelis, *Bergpredigt*, pp. 280–284; Mayor, *Comm. on James*, 1892, pp. 175–183.

* Similarly Harnack, *Das Wesen des Christentums*, 1901, p. 42 [Eng. tr. p. 65]: 'There is nothing in the Gospels that tells us more certainly what the Gospel is, and what sort of disposition and temper it produces, than the Lord's Prayer. With this Prayer we ought also to confront all those who disparage the Gospel as an ascetic or ecstatic or sociological pronouncement. It shows the Gospel to be the Fatherhood of God applied to the whole of life; to be an inner union with God's will and God's Kingdom, and a joyous certainty of the possession of eternal blessings and protection from evil.'

i. Devotion to the Kingdom.—Mt 6^{19-34} (cf. Lk $12^{33.34}$ 11^{34-36} 16^{13} 12^{22-31}). Nearly all of those scholars who regard the Sermon in the First Gospel as a composite production in whole or in part, look upon this section as extraneous to the original discourse, being brought in here from some other historical connexion.* Two arguments against its present position are offered: (*a*) the subject-matter of the section is thought by many to be remote from the theme of Mt 5^{17}–6^{18}; and (*b*) this material is found scattered in the Gospel of Luke, none of it appearing in his parallel discourse (6^{20-49}). To the first argument it may be replied (see above, ii. 3) that the theme of the Sermon does not lie in Mt 5^{17-20}, but is more general, pertaining to the true nature and duty of righteousness. So that Mt 5^{17}–6^{18}, while containing the longest section of the reported discourse, is by no means to be regarded as the only original matter in Matthew's account. There is an abrupt transition, to be sure, between Mt 6^{18} and 6^{19}; but this abruptness may be due to the fact that we have only extracts or a digest of the historical Sermon. Moreover, the teaching contained in Mt 6^{19-34} would seem to be germane—indeed essential—to a setting forth of the true righteousness; the ideal life must be free from material aims, divided efforts, and distracting anxieties. The second argument presents a greater difficulty, for Luke's arrangement of this material in other connexions must be explained. Concerning this it may be said that the Lukan Sermon had received severe treatment in transmission, as already frequently noted; perhaps the exclusion of this section was a part of that process. Also, that the position assigned to this material in the Third Gospel is surely not historical; it appears in the so-called 'Peræan section,' but such teaching as this belonged in all probability to the Galilæan ministry. Further, the Lukan settings of these verses show either no contextual relations, or only literary ones; they are not associated with specific, distinct events. Therefore, while the question must be counted an open one whether Mt 6^{19-34} belonged to the historical Sermon, good reasons are at hand for treating the section as original in this connexion.

The passage has a real unity of thought, to the effect that there is but one aim in life. This aim is the complete realization of the Kingdom of God, in which every man attains that character and performs that service which God requires. The idea thus finds its general statement in Mt 6^{33} 'Seek ye first his kingdom, and his righteousness; and all these things shall be added unto you.'† As Jesus had been teaching in Mt 5^{21-48} how the Divine ideal for men was to be worked out in the sphere of individual and social ethics, and in Mt 6^{1-18} in the sphere of religious worship, so in Mt 6^{19-34} He sets forth how this ideal demands an exclusive devotion to spiritual things — not that material things are to be ignored, but they are to be used only that they may contribute to the highest well-being of humanity. This teaching is developed in three paragraphs of the section vv.$^{19-21}$ vv.$^{22-24}$ vv.$^{25-34}$,* presenting three distinct phases of the subject of duty as regards earthly things: the one comprehensive aim of life must be spiritual, there must be no division of interests, and there must be no anxiety about the incidental things.

According to the teaching of vv.$^{19-21}$,† a man is not to devote himself to an accumulation of wealth for its own sake, or for selfish use. His time is not to be occupied with transient labours, social trivialities, vain displays, and empty talk. 'To lay up treasure in heaven' is to be and to do those things which are pleasing to God, to live nobly, purely, and helpfully. Jesus condemned in the strongest language the kind of life which seeks, first of all, for the gratification of greed and selfish ambition. When a certain man asked Jesus to assist him in securing some property, he rebuked him, and said to His hearers, 'Take heed, and keep yourselves from all covetousness; for a man's life consisteth not in the abundance of the things which he possesseth.' And He gave the significant parable of the Rich Fool, who must leave all his wealth at his death, adding, 'So is he that layeth up treasure for himself, and is not rich toward God' (Lk 12^{13-21}). To make material things the chief end of life is to reverse the true relation of body and spirit. Immortal spirit is the permanent, ultimate thing for which our lives are to be lived. The possession or the accumulation of wealth is not forbidden by Jesus (see above, ii. 4*a*), but He insists that wealth is a means, never an end; and that wealth must be conscientiously used for the highest good, or it becomes a curse to its owner (cf. Mk 10^{17-22}, Lk 16^{1-9}).‡ The right Christian attitude is not a despising of riches, but a true valuation and employment of them for human well-being. The ascetic life, the frivolous life, the indolent life, are

art. LORD'S PRAYER in vol. iii.; Nestle, art. 'Lord's Prayer' in *Encyclopædia Biblica*, vol. iii.; v. d. Goltz, *Das Gebet in der ältesten Christenheit* (1901), pp. 35–53; Maurice, *Sermons on the Lord's Prayer* (1870); Boardman, *Studies in the Model Prayer* (1879); Newman Hall, *The Lord's Prayer*^{2} (1889). Also, the Patristic treatment of the Prayer by Tertullian (*de Oratione*), Cyprian (*de Oratione Dominica*), and Origen (περὶ Εὐχῆς).

* So Feine, Godet, H. Holtzmann, B. Weiss, Wendt, Heinrici, Bacon, and others. Its Matthæan position is defended by Tholuck, Meyer, Keil, Morison, Broadus, Steinmeyer, H. Weiss, Nösgen, Grawert. Achelis regards the section as original here, with the exception of vv.$^{20.21.24}$; and other partition theories are offered.

† Mt 6^{33} ζητεῖτε δὲ πρῶτον τὴν βασιλείαν καὶ τὴν δικαιοσύνην αὐτοῦ, καὶ ταῦτα πάντα προστεθήσεται ὑμῖν. Lk 12^{31} πλὴν ζητεῖτε τὴν βασιλείαν αὐτοῦ, καὶ ταῦτα προστεθήσεται ὑμῖν. There is much textual variation as respects the wording of the Matthæan verse. It is difficult to determine the precise original form of this saying of Jesus. Bruce thinks it was simply 'Seek ye his kingdom,' all else in the present Greek forms being expansion for purposes of interpretation; but it seems probable that the second clause was also given, as bringing the saying more closely into relation with its context. The πλήν which introduces the Lukan form is an idiosyncrasy of the Third Gospel (cf. Lk $6^{24.35}$ *et al.*). Matthew's πάντα, in the second clause, is likely to have been an expansion. The πρῶτον of Matthew may belong to the original saying. On this supposition it cannot be understood to mean that there are two things to be sought for, one before the other; it is to be interpreted, not numerically, but qualitatively—there is just one thing to live for, the Kingdom; and the necessaries of physical existence should be trusted to God's providence. The πρῶτον has then disappeared from the Lukan form, perhaps because of its ambiguity and consequent danger of being misunderstood. Whether the historical saying had 'the kingdom,' or 'his kingdom,' or 'the kingdom of God,' all of which are attested, can only be matter of conjecture, and is unimportant. Lastly, Luke does not have the τὴν δικαιοσύνην which is given in this saying by Matthew (whose αὐτοῦ probably limits also the βασιλείαν as in RV). Perhaps it was dropped from the Lukan sources because it was a technical Jewish term; it has been noted above that δικαιοσύνη does not appear in Luke's Sermon, and in his Gospel only at 1^{75}. Or, its presence in Mt 6^{33} may be due to an expansion of the original saying, making a closer verbal connexion of the verse with the Sermon in Matthew (cf. $5^{6.10.20}$ 6^{1}). This would be a probable explanation of its presence on the theory that Mt 6^{19-34} has been imported into the Sermon in the course of transmission. But the τὴν δικαιοσύνην may also be original in this saying. If so, the 'righteousness' referred to is that actual perfect character and conduct on the part of men with which this whole discourse is concerned (so Tholuck, Achelis, B. Weiss); not a righteousness which God imparts to the believer (Meyer, Ibbeken), nor the righteousness of faith according to the Pauline forensic sense. It is thus the righteousness which God requires, that complete conformity to His will which brings in the consummated Kingdom of God.

* Feine thinks that vv.$^{22-24}$ are interpolated into this passage from another connexion; Achelis thinks the same of vv.$^{20.21.24}$, and B. Weiss of v.$^{22f.}$. These are possible views, but there is not much to substantiate them. Matthew's setting for these verses is as good as Luke's, or even better.

† Lk $12^{33f.}$ has the same thought, but the wording is characteristically different—the 'Sell that ye have and give alms' is a feature of the Third Gospel's exaltation of poverty, as in the Beatitudes and Woes (6^{20-26}). It is striking that the two accounts are in almost exact agreement on the essential utterance, 'Where your treasure is, there will your heart be also.' So Paul in Col 3^{2}.

‡ See Wendt, *Lehre Jesu*, ii. 163–168.

all alike wrong; no less wrong than the life of worldly pride and ambition. Poverty is not righteousness, nor is it even meritorious; men must be provident and self-supporting. The accumulation of material goods, when not carried on by dishonesty, oppression, or disregard of others' needs and rights, may minister to the highest welfare of one's fellow-men.

Still more specifically does Jesus say, in vv.$^{22-24}$,* that the Kingdom must be an exclusive aim. Using the physical eye, which illuminates the body, as a figure (cf. Ps 119^{18}, Mk 8^{18}, Lk 24^{31}), He says that the spiritual discernment must be kept clear in order that one may not go astray from the path of highest duty. A divided aim, which endeavours to combine spiritual and material interests, is impossible; one cannot strive for spiritual goods part of the time, and for earthly goods the other part. Special moments of lofty aspiration, of unselfishness, of generosity, come to almost every one; but in Jesus' thought these things will become habitual and supreme in the true Christian. Everything must be made subordinate and contributory to the attainment of righteousness and the realization of the Kingdom.

But what of our material needs—food, clothing, and shelter, means and opportunities for mental and spiritual growth? Must not life be largely a struggle for these earthly, transient things? To this fundamental problem of human existence Jesus gives an explicit answer in vv.$^{25-34}$.† It is that God knows these needs of men, and wills to provide for them (v.$^{32f.}$); men should depend upon and trust Him for those things necessary to life. If the Heavenly Father cares for the birds and the flowers, He will certainly care for His higher human creatures. Men, therefore, must not be anxious about these things; they must live trustingly for to-day, leaving to-morrow to God (v.^{34}). And so in the Lord's Prayer He taught them to pray, 'Give us this day the bread suited to our need.' Here again Jesus is setting forth a principle of life, not laying down a precept to be literally applied. No one could suppose Him to advocate a purely hand-to-mouth existence, like that of the animals; the higher well-being of the individual or the race could not be accomplished by such a manner of living. Common-sense supplies the interpretation that Jesus contemplates labour, prudence, and forethought for necessary material things; in general God provides, not the things themselves without effort on men's part, but the way by which with effort men can secure what they need. And it is no life of ease and luxury to which God calls us, but a working, frugal life. What Jesus wishes is that in it we should be free from the distraction and anxiety which come to those who will not put themselves wholly into God's hands and trust Him for everything. Each day as it comes is to be dealt with in the present, leaving the future with God: if we do our best to-day, God will take care of to-morrow (cf. Ro 8^{28}). Why should it not be so? God has a great purpose in the world, which men are to help Him to accomplish; assuredly, He will care for and assist those who accept their task and sincerely strive to perform it.

j. The Treatment of Others.—Mt. 7^{1-12}=Lk $6^{31.\,37-42}$ (cf. Lk 11^{9-13}). The main idea of this passage lies in vv.$^{1-5.\,12}$ (vv.$^{6.\,7-11}$ belonged originally to other connexions), and pertains to the right attitude and conduct towards our fellow-men. The verses, therefore, form a fourth section in Jesus' exposition of the true righteousness, co-ordinate with sections 5^{21-48} 6^{1-18} 6^{19-34}. Their teaching is twofold: men are not to be of a censorious disposition towards one another (vv.$^{1-5}$), and they are to show the same respect, kindness, and helpfulness to others which they themselves would like to receive (v.^{12}). The two teachings contained in vv.$^{6.\,7-11}$ are also of interest and importance, but they interrupt the sequence of thought in the Sermon. It is the view of many scholars that the 'Golden Rule' in v.^{12} follows logically upon vv.$^{1-5}$, and not only finishes this section, but in a way forms a closing utterance for the body of the discourse from 5^{21} onward, 7^{13-27} being in the nature of a hortatory conclusion.*

Mt 7^{1-5} finds its parallel in Lk 6^{37-42}, the two accounts showing the usual amount of similarity and variation.† While the Lukan context gives a somewhat different aspect to the teaching, the substance is the same. Jesus is here setting forth an essential principle of all true righteousness, on the recognition and practice of which depends the realization of the individual and social ideal. This principle requires that men shall not be critical, fault-finding, and flaw-picking in thought or conduct towards one another. The only right attitude is a full, penitent recognition of one's own weaknesses, limitations, failures, and transgressions, such as will keep a man humble, make him sympathetic for others, ready to overlook their faults, and to see their virtues. The duty of the Christian is to measure himself against the standard which Christ has set, and to judge himself severely with respect to his shortcomings, instead of making his own religious ideas and practices the criterion by which he judges and condemns others. A man is a 'hypocrite' (v.^{5}) when, professing a desire to increase goodness in the world, he assumes a censorious attitude towards the faults of others rather than undertakes the improvement of himself first. In the background of this teaching stands the proud, self-righteous Pharisee, with his odious contempt for all who were less punctilious than himself (cf. Mt $23^{4.23f.27f.}$, Lk 18^{9-14}, Jn 7^{47-49}). Jesus does not mean, of course, that the character and conduct of men should never be matter of criticism by their fellows; this would be to remove one of the most important aids to uprightness in practical experience. In the affairs of life it often becomes necessary for us to judge others, both privately and publicly. Jesus recognizes this fact when He says also in this same discourse, 'By their fruits ye shall know them' (7^{16}, cf. Mt 18^{15-17}). But the teaching, 'Judge not that ye be not judged,' pertains to that unloving, critical attitude of mind and heart which picks out and magnifies the faults, failures, and inconsistencies of others. This is not the spirit of human brotherhood, and the man who has it cannot himself anticipate a loving, forgiving treatment of himself by God.[*] It is not that God deals with men on a *quid pro quo* basis—that is not to be understood here any more than in the fifth petition of the Lord's Prayer (see above). But the man who does not come to love his fellow-men, and to treat them accordingly, can have no place in a heavenly Kingdom where love is supreme, and where ultimately it will be perfectly realized.

---

* The Lukan parallels 11^{34-36} 16^{13} again have the same thought as the Matthæan passage, but with much variation; except that in the verse about the 'two masters' there is a remarkable verbal agreement. The word 'mammon' is a transliteration from the Aramaic מָמוֹנָא, and signifies here the riches which have become an idol to be worshipped and served.

† Lk 12^{22-31} furnishes a parallel for Mt 6^{25-33}, but not for v.^{34}, which is found only here in the Gospels; there are good reasons for thinking that this verse belonged originally to the connexion in which it here appears. The phenomena of the parallel passages are as usual: striking likeness in certain clauses, but many important additions, omissions, and variations. Luke's account has obviously undergone adaptation for Gentile use, as seen in his 'ravens' where Matthew has 'the birds of the heaven,' 'God' and 'Father' where Matthew has 'heavenly Father,' 'nations of the world' where Matthew has 'nations'; and instead of Matthew's 'Be not anxious saying, What shall we eat?' Luke's account reads, 'Seek not what ye shall eat . . . neither be ye of doubtful mind.' The word ἡλικίαν in Mt 6^{27} is capable of two different interpretations, and commentators are divided between them. The RV translates, 'Which of you by being anxious [*i.e.* by giving the matter intense, anxious thought] can add one cubit to his stature?' Since this is the clear meaning of the word where it is found elsewhere in this Gospel, Lk 2^{52} 19^{3}, it has been so understood here by the Vulgate, Chrysostom, Augustine, Luther, Calvin, Bengel, Fritzsche, and others. But the cubit was 18 inches or more, which makes this interpretation seem highly improbable, as a very small amount in proportion to the whole is intended in this context. The word may mean 'age' (RVm); and it was not uncommon to think of life in terms of linear measure (cf. Ps 39^{5} 'Behold, thou hast made my days as handbreadths'; also Jn $9^{21.\,23}$, He 11^{11}). So that this is the meaning understood by Bleek, Tholuck, Meyer, Achelis, Feine, H. Weiss, Ibbeken, Thayer, B. Weiss, and most modern scholars.

* So Neander, Meyer, Kuinöl, Feine, H. Weiss, H. Holtzmann, B. Weiss, and others. Tholuck and Achelis regard v.^{12} as extraneous material in the Sermon, holding that it was probably the closing epitome of some other discourse; similarly Godet. But in Luke also the verse is given in the Sermon, which—together with the fact that logically it is entirely suitable thereto—makes a strong presumptive case that this was its historical connexion. The position in the Sermon which the verse has received in Luke (6^{31}, as though it stood at Mt 5^{42} instead of 7^{12}) is preferred by Bleek, Wendt, and Bacon, but such a displacement in the Matthæan account is not likely.

† In Mt $7^{1.\,2a}$=Lk 6^{37} we find a similar difference to that in Mt 6^{12} = Lk 11^{4}, the Lukan form avoiding the measure for measure idea which can be read into the Matthæan words; although both accounts strikingly agree in reporting the statement, 'With what measure ye mete, it shall be measured unto you' (Mt 7^{2b}=Lk 6^{38b}, cf. also Mk 4^{24}), a mode of treatment which can be predicated of God only in a qualitative sense, not quantitatively. Lk 6^{37} is in an expanded form, containing three clauses in synonymous parallelism, for the purpose of emphasis: Mt $7^{1.\,2a}$ produces the emphasis, but in a somewhat different way. But Lk 6^{38a} is surely an extraneous element in the Lukan account, an authentic and valuable teaching of Jesus regarding generosity coming from some other occasion than the Sermon. The figurative illustration of the particle in the eye, Mt 7^{3-5}= Lk $6^{41f.}$, is given in almost complete verbal agreement by the two reports (see them quoted above, under i. 3). Foreign also to the Sermon is Lk $6^{39.\,40}$. The first verse has its parallel in Mt 15^{14}, which is probably its true context, referring to the Pharisees; the second verse has a partial parallel in Mt 10^{24} (cf. Jn 13^{16}), and seems logically related there, but the saying may also have been spoken at some other time more in the Lukan form. With this teaching of Jesus about judgment may be compared Hillel's saying, 'Judge not thy neighbour until thou comest into his place.'

Mt 7^{6} presents a saying which is found only in this Gospel, and which stands in the Sermon only as a result of the compiling process.[†] It enjoins prudence and good judgment in the dissemination of the Gospel. Truth is sacred, and it must be carefully dealt with. There are wrong times as well as right times for trying to assist others religiously. The Gospel is to be offered only to the receptive, under suitable circumstances, else it will receive rebuff and indignity at unappreciative hands. The dogs and the swine, in the East the most despised of animals (cf. Mt 15^{26}, Lk $15^{15f.}$, Ph 3^{2}, 2 P 2^{22}), are used here to typify those men, whether Gentiles or Jews, who are devoted wholly to material things, and are indifferent to the higher spiritual realm for which God created them. The parallelism in this verse is for no other purpose than to make the teaching impressive, a literary method of which the Sermon contains numerous instances.

In Mt 7^{7-11}=Lk 11^{9-13} we have another section extraneous to the historical discourse, whose presence here seems fortuitous, since it stands in no topical association with its context.[*] The teaching herein contained is that God is ready and willing to give all His blessings to men, since He is a loving Father who provides—better than any human parent[†]—for His children. Men, therefore, are to feel free to pray to Him for all things. The thought is similar to that set forth in Mt 6^{25-34}; but there the attention was fixed upon the physical necessities, while here the thought is of all kinds of blessings, spiritual not less than material. The injunction to pray is thrice repeated, 'ask—seek—knock,' without difference of meaning in the several clauses, in order to produce great emphasis. Jesus promises absolutely that our prayers shall be answered by God; the obvious and necessary conditions can be easily supplied from His other teaching. Thus, all prayer must be made with the intent and in the spirit of the Lord's Prayer (Mt 6^{9-13}), for the sole purpose of the Kingdom (Mt 6^{33}), and with full submission to God's will (Mt $26^{39.42}$). Our petitions must permit God to answer them in the way which He knows to be best, and our trust in His wisdom, power, and love must be complete.

Mt 7^{12}=Lk 6^{31}, as already noted, closes this section of the Sermon, and in some sense constitutes the capstone of the whole discourse. The οὖν which introduces the verse (mistakenly dropped from ℵ*L) seems to mark this general relation. Matthew gives the saying in a fuller, more rounded form than Luke,[‡] and adds the clause, 'for this is the law and the prophets.'[§] The idea contained in this teaching is closely related to that of 'loving one's neighbour as one's self'; this idea was already formulated in the OT (Lv 19^{18}), and was pronounced by Jesus to be one of the two great commandments comprehending all human duty (Mt 22^{38-40}). St. Paul also followed his Master in the same teaching (Gal 5^{14}). Our verse has come to be known as the 'Golden Rule,' which marks the high place that it holds in the Gospel teaching. What it presents, however, is not a precept for literal application everywhere, but a principle for the determination of social conduct. It inculcates a spirit which men are to cultivate towards one another.* Jesus wishes by means of it to correct the mood of selfishness and contempt which obstructs the realization of a true human brotherhood. Men are prone to use their fellow-men as *tools* for their own comfort, advancement, or pleasure. Kant gave perfect expression to the higher idea when he wrote, 'So act as to treat humanity, whether in your own person or in that of another, in every case as an end, never as a means only.' It is still the rule rather than the exception that those men who, by reason of their wealth, social rank, or public office, are in a position to command others, abuse them by ignoring their personality, disregarding their rights, appropriating the fruits of their labour, withholding from them opportunities for attaining higher manhood, and in other ways treating them like machines or slaves. This condition of present society is essentially un-Christian, and is to be counteracted and transformed by the Gospel. For this achievement the 'Golden Rule' can be exceedingly useful, when applied as a principle, with the aid of a well-trained judgment and a consecrated common-sense. Let each man respect the individuality and observe the rights of every other man, let him honour and treat every other man as he in their places would wish to be honoured and treated, let him give such sympathy and assistance to others as he would himself like to receive. In this manner the 'Golden Rule' will be fulfilled.†

---

[*] It was thought by Augustine, Fritzsche, Kuinöl, and de Wette, that the return judgment of which this passage speaks is rendered by men, *i.e.* other men will judge you and measure back to you exactly as you judge and measure. This, however, can hardly be the meaning: it rather refers to the judgment of God upon men, both in the future Day of Judgment and in His present treatment of them; so the modern commentators generally.

[†] So Neander, Bleek, Tholuck(?), Kuinöl, Godet, Achelis, Feine, Wendt, B. Weiss, Bacon, and others. It is the view of Köstlin, Feine, Hilgenfeld, and H. Holtzmann, that this verse as it now appears is Judaized, to make it a polemic against the heathen (cf. above on Mt $5^{18f.}$); reference is made to the *Teaching of the Twelve Apostles*, ix. 5, which reads, 'But let no one eat or drink of your Eucharist except those who have been baptized into the name of the Lord. This was what the Lord referred to when He said "Give not that which is holy unto the dogs."' Ibbeken thinks the verse refers to the use by Christians of heathen tribunals, as in 1 Co 6^{1-4}. Neither of these views is required to explain this teaching, which has an excellent general sense and import.

[*] So Achelis, Feine, Godet, B. Weiss, Wendt, Bacon, and others. Futile efforts have been made by Chrysostom, Augustine, Luther, Stier, and Tholuck to find a logical relation of these verses to the verses which precede them. Feine, Weizsäcker, H. Holtzmann, and B. Weiss think that Luke has the original setting for the paragraph, which may be true; but it is also possible that in both Gospels this material is detached. In Luke, at any rate, it has received a topical association. A comparison of the two accounts shows practical identity of the first two verses in each: the second two verses in each account vary, but have the same thought; and Luke adds a third clause about the 'egg and the scorpion' (v.^{12}), perhaps to balance the threefold 'ask, seek, knock.' The last verse of each account (Mt 7^{11}=Lk 11^{13}) is quite the same, with two significant exceptions: (*a*) instead of Matthew's ἀγαθά Luke has πνεῦμα ἅγιον, which Tholuck, Achelis, and even Steinmeyer regard as a gloss, due to the prominence which the Holy Spirit, as the personification of all good things, attained in primitive Christian thought; (*b*) instead of Matthew's ὁ πατὴρ ὑμῶν ὁ ἐν τοῖς οὐρανοῖς, Luke has ὁ πατὴρ ὁ ἐξ οὐρανοῦ, a peculiar expression of which various explanations are given; see Feine, *Jahrb. f. Protest. Theol.* 1885, p. 74; Achelis, *Bergpredigt*, p. 386; H. Holtzmann, *Hand-Comm. ü. d. Synoptiker*, p. 125. The Lukan reading as it stands cannot be original. Some text-witnesses delete the second ὁ, but this is only a makeshift. Perhaps the ἐξ οὐρανοῦ came in under the influence of the πνεῦμα ἅγιον, to indicate the place from which the Spirit was given; and then, subsequently, the ἐξ οὐρανοῦ was imperfectly turned to account in connexion with the ὁ πατήρ.

[†] The phrase, 'if ye then, being evil' (πονηροί), contrasts men, in their imperfect, selfish, and sinful lives, with God, who is perfect in love and holiness. The argument is *a minore ad majus*: if limited love provides some good things, how much more will absolute love provide?

[‡] Mt 7^{12} πάντα οὖν ὅσα ἐὰν θέλητε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, οὕτως καὶ ὑμεῖς ποιεῖτε αὐτοῖς· οὕτως γάρ ἐστιν ὁ νόμος καὶ οἱ προφῆται. Lk 6^{31} καὶ καθὼς θέλετε ἵνα ποιῶσιν ὑμῖν οἱ ἄνθρωποι, ποιεῖτε αὐτοῖς ὁμοίως. It would be difficult to explain these two divergent forms as coming from a common Greek original; perhaps they represent two lines of transmission, arising from two different translations into Greek of the same brief Aramaic utterance. It is noticeable that in this verse, as in the Beatitudes, the Lord's Prayer, and other portions of the discourse, Matthew gives the sayings of Jesus in a fuller, finer literary form, which in every instance has commended itself to the Christian Church as the better expression of Jesus' thought and spirit.

[§] Luke's source did not contain this clause, perhaps for the usual reason that it was too Jewish. The case is the same in Lk 10^{25-28}=Mt 22^{33-40}=Mk 12^{28-31}, where Matthew's clause, 'On these two commandments hangeth the whole law and the prophets,' is entirely absent from Luke's account, and in Mark's account is differently worded, 'There is none other commandment greater than these.' It is not unlikely, therefore, that in this passage, as in many others, the more Jewish First Gospel

k. The Duty of Righteousness.—Mt 7^{13-27}=Lk 6^{43-49} (cf. Lk $13^{24. 27}$). The discourse which has set forth the Divine ideal of life, closes with strong exhortation for its attainment. Jesus solemnly enjoins the duty of righteousness. It is a strenuous undertaking, in which men must follow only trustworthy guides. And this righteousness does not consist in mere profession, but in actually being and doing what God wills.

It must remain a matter of doubt whether the two verses, Mt $7^{13. 14}$, belonged originally to the Sermon. The thought presented by them has no topical connexion with 7^{1-12}, but, on the view that 7^{13-27} is a concluding hortatory section, such a relation could not be required; while this thought is entirely suitable to a portion of the discourse setting forth the duty of righteousness. The only serious argument against the Matthæan position of the verses is that Luke seems to have them in another and an original setting, $13^{23. 24}$; perhaps it can be maintained in reply that these passages are not parallel, but belong to different occasions, and are rightly placed in each of the Gospels.* That the gospel demands are lofty, severe, and exclusive, so that to become a member of the Kingdom requires complete self-commitment and an unceasing struggle to attain the ideal, is what Jesus teaches in these verses. The 'small gate' and the 'narrow way' forcibly express this idea. The figure is perhaps drawn from the Oriental city, to which the Kingdom of God is sometimes likened (cf. He 11^{10} 12^{22}, Rev 21^{2}). The 'gate' signifies one's entrance into the Kingdom as present, and the 'way' signifies his earnest life thereafter.† Jesus' statement that 'few will find their way into the kingdom' is perhaps best explained out of the circumstances of His ministry, instead of being taken eschatologically as in Luke. It would then refer to the small number of real followers whom Jesus had secured as a result of His work—a fact which must have impressed the disciples, and for which they may well have sought an explanation from Him. His reply was thus along the line of His teaching about the growth of the Kingdom (Mt 13), that time was required to achieve numbers and maturity.‡ The parallel saying in Lk 13^{24}, which is made by its context (vv.$^{25-30}$) to refer to the number of persons ultimately to be saved, states—not that the whole number will be small, which

---

has better preserved the original saying of Jesus. Of course it cannot be denied as a possibility that the clause in Mt 7^{12} stands there as the product of an apologetic Judaistic retouching (as in Mt $5^{18f.}$), or by misplacement, or through liturgical usage. As for the meaning of Jesus' words in this connexion, the Golden Rule 'is the law and the prophets' in the sense that it states the principle on which the Law and the Prophets tried to build up a real human brotherhood (cf. Ro $13^{9f.}$, Gal 5^{14}). This is true, even though the Law and the Prophets did not fully accomplish their purpose, or even perfectly grasp the ideal towards which they were working. Jesus would emphasize the fact of the continuity of revelation, showing how the Divine ideal had preceded Himself in the world, and that the OT history and teaching were inspired by the same God and with essentially the same truth as constituted His own revelation. It is thus with deliberate intention that He closes the body of His discourse with this statement, which connects significantly with the words used to introduce the main argument, 'Think not that I came to destroy the law or the prophets: I came not to destroy, but to fulfil' (Mt 5^{17}).

* See esp. O. Holtzmann, *Leben Jesu* (1901), p. 189.

† Sayings similar to this of Mt 7^{12} are found in pre-Christian and post-Christian Jewish writings, and also among Greek, Roman, and Oriental peoples, showing that this principle of life was not first formulated, or exclusively formulated, by Jesus. This does not impugn Jesus' originality or authority, but indicates that truth and the desire for goodness are innate in man (cf. Ac 17^{22-31}). Jesus, however, so changed the wording of this principle as to give it a new force and sphere, for He stated it—not negatively, as it everywhere else appears—but *positively*, insisting upon that loving service to others which is peculiar to the Gospel. Legalism says, 'Thou shalt not' do this and that—a system of repression; the Gospel of Life says, 'Thou shalt' do countless good and helpful things—a system of development. The difference is like that between the false and the true child-nurture: the false method says constantly, 'Don't do this, don't do that'; the true method fills the child's mind with lovely and useful things to do, so that the child will grow in goodness and service. Jewish forms of the Golden Rule may be seen in To 4^{15} 'That which thou hatest, do to no one'; also in the saying attributed to Hillel, 'What thou hatest thyself, that do not thou to another: this is the whole of the law, all the rest is only comment upon it' (Bab. *Shab.* f. 31. 1). The non-Jewish forms are numerous; Isocrates wrote, "Ἃ πάσχοντες ὑφ᾽ ἑτέρων ὀργίζεσθε, ταῦτα τοῖς ἄλλοις μὴ ποιεῖτε; the Stoic maxim was, 'Quod tibi fieri non vis, alteri ne feceris'; and in Confucius we read, 'Do not to others what you would not wish done to yourself' (Legge, *Chinese Classics*, i. 191 f.). Other parallels have been collected by Wünsche and Wetstein. See literature cited in Taylor, *Sayings of the Jewish Fathers*^{2} (1897), p. 142 f.

* This is the view of Neander, Tholuck, Achelis, and all who defend the unity of Matthew's discourse; while Mt $7^{13. 14}$ is regarded as material extraneous to the Sermon by Feine, Godet, B. Weiss, and others. A comparison of the Matthæan and Lukan passages shows that Matthew as usual has the longer and more literary form, while Luke gives much the same idea in briefer form and different words. In the former the figures are the 'gate' and the 'way,' in the latter it is the 'door.' The final clause of each passage is strikingly varied: Matthew reads, καὶ ὀλίγοι εἰσὶν οἱ εὑρίσκοντες αὐτήν, while Luke reads, ὅτι πολλοί, λέγω ὑμῖν, ζητήσουσιν εἰσελθεῖν καὶ οὐκ ἰσχύουσιν. According to Luke, the statement was made by Jesus in reply to a specific request from some one, 'Lord, are they few that be saved?' and after the close of the Galilæan ministry when Jesus was journeying to Jerusalem. Then what follows in the Lukan account (13^{25-30}) makes this question refer to the Final Judgment. But in Matthew the saying does not appear to be eschatological; nor does the statement that 'there are few who find the narrow way' appear suitable to the Sermon, since at this time Jesus' ministry was meeting with large success—much more suitable would it have been after the disappointed withdrawal of the Galilæan multitude, when in sorrowful isolation and rejection Jesus was going up to Jerusalem for the cross. Luke's position of the saying may therefore be better than that of the First Gospel, while the original form and intent of the saying may have been better preserved by Matthew.

† ὅτι is read at the beginning of v.^{14} by nearly all modern editors and commentators, on the authority of ℵB and other important witnesses. τί, which is preferred by Lachmann, Tregelles, Meyer, and Achelis, has strong secondary attestation.

‡ Similarly Tholuck, Achelis, and others.

could not be true on any possible view of Jesus' teaching or of the world—but that 'many will fail.' If the saying is authentic in this form (it may have become modified when an eschatological meaning was read into it), Jesus is more likely to have intended it as a practical admonition than as an omniscient disclosure of the outcome of the Final Judgment. It is worthy of note that we find in Mt 7^{14} the significant term *ζωή* to denote the full, blessed existence which comes to him who does God's will. This word, so common in the Gospel of John (1^{4} 3$^{15f. 36}$ 5$^{24. 26. 29}$ 6$^{27. 33. 35. 51}$ 10^{10} *et al.*) occurs but rarely in this sense in the Synoptic Gospels (cf. Mt 19^{16}).

The next paragraph in the Sermon, as it appears in Mt 7$^{15-20}$=Lk 6$^{43-45}$, quite surely belongs as a whole to the historical discourse.[*] Since it is the duty of all men to attain righteousness, it becomes a matter of the utmost importance that men shall choose true teachers who will teach them what true righteousness is, and how it is to be attained. The false teachers[†] against whom He warns them are all those morally blind and unworthy individuals who assume to guide men into the Kingdom of God. Outstanding representatives of this class were those scribes and Pharisees of Jesus' day whom He described in the severe language of Mt 23; doubtless He had them in mind—blind guides (Mt 15^{14}) and hypocrites, unfit for the task which they performed of teaching the people religion.[‡] If this was the explicit and primary reference of Jesus' saying in v.^{15}, there is no reason why it should not implicitly refer to other incompetent and bad teachers such as appeared in the early years of Christianity. Any one who assumes to teach religion and morals without himself living the upright life comes within that class against which Jesus here gives warning. And whether they are bad or good, false or true teachers, can be known by their 'fruits,' *i.e.* by their character and their service. If they manifest the 'fruit of the Spirit' as St. Paul describes it in Gal 5$^{22-26}$, they will be trustworthy teachers and guides.[§]

That Jesus has in mind the practical manifestation of righteousness in thought and conduct is proved by the verse which immediately follows this paragraph, Mt 7^{21}, in which He says that only those persons shall enter the Kingdom of Heaven who *do* God's will. Jesus neither here nor elsewhere put the emphasis upon creed apart from character, which the Church has done from the 2nd cent. until our own. His aim was to make individual men and a human brotherhood, not a system of theology. Love, mercy, and peace, purity, trust, and helpfulness, were the tests of goodness which Jesus established (Mt 5^{3}–7^{12} 25$^{31-46}$). Inasmuch as He came for the express purpose of making God's will known, and in His words, deeds, and character did make God's will manifest to men, He can only mean that men must do and be what He has thus taught them. Luke's form of the saying 6^{46} is therefore equivalent to Matthew's, although so differently worded.[*] As was seen in considering the third petition of the Lord's Prayer, 'Thy will be done' (Mt 6^{10}), the will of God is the one thing to be accomplished; for this Jesus lived (Jn 6^{38}), and for this He would have us live (Mt 12^{50} 21$^{28-31}$). His statement that only such shall 'enter the Kingdom of Heaven' seems to be an intentional echo and return to the words of Mt 5^{20}.

The following two verses, Mt 7$^{22. 23}$, stand here in all probability as a result of compilation. Luke gives them in another connexion, which appears original (13$^{26f.}$); and since they refer to the Last Judgment, they belong, with Jesus' other eschatological teaching, to the closing months of His ministry. One needs only to consider carefully the time, circumstances, audience, and purpose of the Sermon to see that these verses present an idea, and sound a note, which do not belong to this occasion and discourse.[†] Nevertheless, they contain authentic teaching of Jesus, and teaching of profound meaning. The thought is analogous to that of Mt 7^{21} in affirming that nothing shall admit to the Kingdom but the actual attainment of righteousness (cf. Lk 10^{20}). The profession of Christianity, the preaching of Christianity, even the production of some good results for the Christian cause, shall not in themselves alone secure salvation, for the criterion of judgment in the great Judgment Day shall be a genuine realization of God's will in and through one's self. And Luke adds (13$^{28-30}$), what is germane to this connexion, that 'there are last which shall be first, and there are first which shall be last' (cf. Mt 8$^{11f.}$ 19^{30}); *i.e.* some who, like the Pharisees of Jesus' day, had had a great reputation for piety, and had been looked upon as models of righteousness, shall be shown to have been selfish, vain, and hypocritical, unworthy to enter the Kingdom of God; while other obscure and once despised persons shall find a welcome there (cf. Lk 18$^{9-14}$).[‡]

And, finally, the duty of righteousness is most impressively set forth at the close of the whole discourse by the parable of the Two House-builders (Mt 7$^{24-27}$=Lk 6$^{47-49}$).* That this piece belongs to the Sermon, and forms its remarkable conclusion (as the οὖν in v.^{24} suggests), can be considered certain. The parable follows logically upon v.^{21}, enlarging and enforcing the teaching therein. It is a saying of tremendous strength. The life which Jesus has depicted in the Sermon as the ideal life is wonderfully beautiful, inspiring, and attractive to every sincere soul. But men were likely to recognize and to reverence this ideal without achieving it, since that is the earnest and arduous labour of a lifetime. Hence Jesus meets them with the solemn affirmation that the duty of actually doing what He teaches is imperative; that it shall be of no avail for them to have listened to His words, if they do not straightway go and live the life which as God's will He has described to them.

---

[*] For v.^{15} there is no parallel in Luke, but there is no reason to question its authenticity, and it is not foreign to this connexion. For v.^{19} also there is no parallel in Luke; it may be a verbal reproduction of Mt 3^{10}, perhaps imported into this context in transmission because of the similarity of the figure and the theme, cf. Mt 15^{13}, Jn 15$^{2. 6}$ (so Feine, Wendt, and others). Again, v.^{20} is a repetition of v.^{16a}, perhaps therefore a subsequent expansion, resumptive of the main thought after the interpolation of v.^{19}. And, finally, Lk 6^{45} is clearly extraneous to the Sermon, having perhaps its historical setting at Mt 12$^{34f.}$ (so Feine against Wendt). The original portion of this paragraph may thus have been Mt 7$^{15-18}$=Lk 6$^{43f.}$. The two reports have the same idea in the same figure, but are peculiarly variant in manner of expression; it is not likely that they started from a common Greek translation.

[†] The term 'prophet' in both OT and NT denotes primarily the teacher of religious truth and duty, and has no other import in this passage.

[‡] So Tholuck, Achelis, Feine, Ibbeken, B. Weiss. The figure of wolves and sheep was a common one among a pastoral people (cf. Is 11^{6} 65^{25}, Mt 10^{16}, Jn 10^{12}, Ac 20^{29}), but only here in the Bible is found the idea of the wolf in sheep's clothing, as in Æsop's *Fables*.

[§] There was never any justification for the Roman Catholic view, adopted by Calvin and sometimes promulgated even by Luther, that the *καρποί* in these verses signified primarily, indeed exclusively, sound doctrines. It is, of course, true that those who teach false doctrines cannot be safe guides, but the Bible rightly interpreted is the criterion of sound doctrines, not the pronouncements of any ecclesiastical organization past, present, or future.

[*] Mt 7^{21} *Οὐ πᾶς ὁ λέγων μοι Κύριε κύριε εἰσελεύσεται εἰς τὴν βασιλείαν τῶν οὐρανῶν, ἀλλ’ ὁ ποιῶν τὸ θέλημα τοῦ πατρός μου τοῦ ἐν τοῖς οὐρανοῖς.* Lk 6^{46} *Τί δέ με καλεῖτε Κύριε κύριε, καὶ οὐ ποιεῖτε ἃ λέγω;*

[†] So Feine, Godet, Ibbeken, Weizsäcker, Wendt, and others. The parallel sayings, Mt 7$^{22f.}$=Lk 13$^{26f.}$, give the same idea, with wide divergence of expression. It may be true, as Ibbeken thinks, that the three acts named in Mt 7^{22} sound improbable on Jesus' lips (certainly they are foreign to the Sermon), and they may therefore reflect the experiences of the Apostolic age. But Lk 13^{26} 'We did eat and drink in thy presence, and thou didst teach in our streets,' is also not without difficulty, because so insipid and un-Jewish. The better explanation is that the Matthæan verses are authentic, but belong to the close of the ministry; while Lk 13^{26} has been universalized. In the second verse of each passage, Mt 7^{23}=Lk 13^{27}, there is identity of thought, with some variation of language. The phrase, 'Depart from me, ye that work iniquity,' is a quotation from Ps 6^{8} (cf. Mt 13$^{31f.}$ 25^{41}); its two Greek forms here, *ἀποχωρεῖτε ἀπ’ ἐμοῦ οἱ ἐργαζόμενοι τὴν ἀνομίαν* (Mt.) and *ἀπόστητε ἀπ’ ἐμοῦ, πάντες ἐργάται ἀδικίας* (Lk.), present an interesting minute problem of translation and transmission.

[‡] Mt 7$^{21-23}$ has a value also for determining the Christological conceptions of the Synoptic Gospels. See particularly Schlatter in *Greifswalder Studien* (1895), pp. 83–105. This passage is only one of a number where Jesus appears as claiming the Divine prerogative of Judge at the Final Judgment (Mt 25$^{31-46}$ 10$^{32f.}$ 11$^{27-30}$, Mk 8^{38}, Lk 20^{18}; cf. Jn 5^{27} 12^{48}, Ac 17^{31}, Ro 2^{16}, 2 Co 5^{10}), a function appropriate to the Messiah. It would require a radical treatment of the Gospel narratives to explain this idea of Jesus as Judge as an exaggerated Apostolic appreciation of Him. The uniqueness of Christ in mission, person, teaching, and career—in other words, His Divinity—cannot well be denied by a serious historical interpretation of the Gospels; and when this uniqueness is recognized, it is not difficult to admit Jesus' office as Judge.

5. THE RELATION OF THE SERMON ON THE MOUNT TO JESUS' TEACHING AS A WHOLE.—The teaching contained in the Sermon on the Mount was given in the middle portion of Jesus' Galilæan ministry, when enthusiastic multitudes were hearing Him and many followers attended Him. It was in this period that He gave the general teaching about the Kingdom of God—what it consisted in, what it brought to men, what it required of men, what relation He Himself sustained to it, and what its future was to be. The Sermon is an epitome of this general teaching, condensing the whole into a brief statement and exposition of the ideal of life, given for the practical purpose of a simple guide to right thought and conduct. It showed the multitude what He as a teacher of religion had to present as truth and duty, with which they could readily contrast their own and the current ideals.

Jesus confined His teaching entirely to the religio-ethical field; and in this field He dealt with essential truths, facts, and principles rather than with the speculative mysteries of the universe or with the casuistry of ethics. Consequently, He taught again and again the same things, to different persons, under different circumstances, and in different ways and lights. A close organic relation unites all Jesus' teachings, each involving the other, and all together illuminating the path of human existence. The Gospel was so brief and simple that it had not to be committed to writing like the philosophy and the ethics of the schools. Common men could comprehend and communicate Jesus' teaching. His was a universal message which all could grasp; it presented an ideal to which all could aspire and attain.

As has been abundantly seen, the Sermon on the Mount sets forth Jesus' conception of what men should be and do as members of the Kingdom which He came to establish in the world (not as a new movement entirely, but as giving higher content and greater impulse to a movement which God had inaugurated with the very creation of the human race). The true righteousness is determined by God; as He is the source of all life, so it is He who determines what that life shall be. Ethical obligations rest therefore upon religious truths. The ideal of a man's life is to be derived from God, and for its realization he is responsible to God. The aim of man's life is to achieve that personal character and service which fulfil the true manhood, after the pattern of Christ, and to advance as far as possible the real brotherhood of all men as sons of the one common Heavenly Father. The Kingdom of God in its Divine aspect is the purpose, love, and power of God which determine and accomplish this ideal condition; in its human collective aspect it is the company of those who have earnestly set about the realization, in themselves and among men, of this Divine ideal. So that Jesus can sum up all duty, individual and social, in the one injunction to 'Seek supremely the kingdom of God, and the righteousness which he wills' (Mt 6^{33}, Lk 12^{31}; cf. Mt 22$^{34-40}$). And this righteousness is primarily an internal characteristic; it is apprehended *within* the man. The religio-ethical ideal which God implants in every human heart must be heeded by each man, and his life must become conformed to it. Created by God in His own image, men must attain to God-likeness; and this attainment is, first of all, the recognition of and obedience to the ideal of life which God furnishes in the soul, moved and guided by the teaching and example of Jesus. Those persons will achieve perfect self-realization who enter into complete communion with God, hearing His voice, and doing His will as revealed within themselves and in and through Christ.

The absolute assurance of Jesus that He can reveal the will of God to men, and that this is His mission in the world, is a guarantee of the trustworthiness of His teaching. If the Sermon on the Mount contains few explicit statements concerning the person of Christ such as abound in the Fourth Gospel, it is none the less true that the implications of the discourse are equally high. The Divine personality, knowledge, and authority of Jesus are the foundation on which the discourse rests. The passages, Mt 5$^{11.\,17}$ 7$^{21-23}$, only state what all the teaching involves, that He who speaks these words is 'the Son of God' in the highest sense, sustaining to Him a unique relation, and rendering to men a unique service. The value of the Sermon cannot therefore be overestimated, and the historical study or critical treatment of this material should never dominate or obscure the fact that this teaching is a Divine revelation of the will of God for men which is forthwith to be accomplished upon the earth.

LITERATURE.—For the quotations from, and allusions to, the Sermon on the Mount in the extra-canonical Christian literature of the first three centuries, see esp. Resch, *Aussercanonische Paralleltexte z. d. Evangelien*, Teil 1 (1893), pp. 62–114; Teil 2 (1895), pp. 62–106. For ideas and expressions akin to those of the Sermon on the Mount in Rabbinic literature, see Weber, *Jüdische Theologie*^{2} (1897); Wünsche, *Neue Beiträge z. Erläuterung d. Evangelien aus Talmud u. Midrasch* (1878); Dalman, *Die Worte Jesu*, Bd. 1 (1898) [Eng. tr. 1902].

From the Patristic period the only specific separate treatment of the Sermon on the Mount is by Augustine, *de Sermone Domini in Monte* (*Op.*, ed. Bened. vol. iii.) [Eng. tr. in 'Nicene and Post-Nicene Fathers,' pp. 63]; it is an important work of interpretation, containing much that is of permanent value. Elsewhere in his writings Augustine dealt further with the Sermon, presenting in some respects different views. Trench collected all this material and prepared a digest of it, which he published under the title, *Exposition of the Sermon on the Mount, drawn from the Writings of St. Augustine* (3rd ed. rev. 1869). Useful also are the interpretations of Origen, *Comm. on Matthew* (*Op.*, ed. Lommatzsch, vols. iii. iv.); Jerome, *Comm. on Matthew* (*Op.*, ed. Vallarsi, vol. vii.); Chrysostom, *Homilies on Matthew* (*Op.*, ed. Montfaucon, vol. vii.); Hilarius Pictaviensis, *Comm. on Matthew* (*Op.*, ed. Oberthür, vol. vii.); the work of the Auctor *Operis Imperfecti*; and the very brief matter in the *Comm. on the Four Gospels* by Theophylact and Euthymius Zigabenus.

From the Reformation period the important interpretation by Luther is first to be named, *Comm. on Matthew* (*Works*, ed. Walch, vol. vii.); and after him, Calvin in his *Harmony of Matthew, Mark, and Luke* (*Works*, ed. 1835–1838, vols. i. ii.). The three Roman Catholic works of most value are the *Comm. on the Four Gospels* by Maldonatus, Jansenius, and Cornelius a Lapide. The extensive but unimportant post-Reformation literature can be seen in full in Tholuck, *Die Bergrede Christi*^{5}, pp. 30–40 [Eng. tr. pp. 41–49].

The Modern period has provided many works upon the Sermon on the Mount, some of them of great value. The standard work upon the subject for the past seventy years has been that of Tholuck, *Die Bergrede Christi* (1st ed. 1833; 5th ed. Gotha, 1872, pp. 484 [Eng. tr. from 4th Germ. ed., Edinburgh, 1860, pp. 443]), and this still remains the most valuable volume on the Sermon, although a portion of the contents is now antiquated. Next in extent and importance is the equally elaborate work of Achelis, *Die Bergpredigt* (Bielefeld, 1875, pp. 492). Other works of scientific character, but smaller dimensions, are: Feine, 'Die Texte der Bergpredigt bei Matthäus u. bei Lukas,' in *Jahrbücher für Protestantische Theologie*, 1885, pp. 1–85; Steinmeyer, *Die Rede des Herrn auf dem Berge* (Berlin, 1885, pp. 156); Ibbeken, *Die Bergpredigt Jesus* (2nd ed., Einbeck, 1890, pp. 216); Hugo Weiss (Rom. Cath.), *Die Bergpredigt Christi* (Freiburg, 1892, pp. 111); Grawert, *Die Bergpredigt nach Matthäus* (Marburg, 1900, pp. 77); Heinrici, *Die Bergpredigt, quellenkritisch untersucht* (Leipzig, 1900, pp. 81), and a second part dealing with the interpretation is promised; Bacon, *Sermon on the Mount* (New York, 1902, pp. 258).—Homiletic treatments of the Sermon are numerous in German, French, and English. An anonymous work, *Die Bergpredigt* (Gütersloh, 1881, pp. 48); Grüllich, *Die Bergpredigt des Herrn Jesu Christi* (Meissen, 1886, pp. 148); Harnisch, *Die Bergpredigt des Herrn* (Breslau, 1901, pp. 35); Kaiser, *Die Bergpredigt des Herrn* (Leipzig, 1901), pp. 521; Monneron, *Le Sermon sur la Montagne* (Lausanne, 1889, pp. 412); J. B. Bousset, *Le Sermon sur la Montagne* (Paris, 1900, pp. 150 [Eng. tr., New York, 1900, pp. 144]). The best English work is by C. Gore, *The Sermon on the Mount* (London, 1896, pp. 218); it contains much, however, that is only of local ecclesiastical interest; further, W. B. Carpenter, *The Great Charter of Christ* (London, 1895, pp. 300). Of special importance are the works of B. Weiss, *Meyer-Kommentar über das Matthäusevangelium* (Göttingen, 1898), and of H. Holtzmann, *Hand-Commentar über die Synoptiker* (3rd ed., Freiburg, 1900); other commentaries upon Matthew (Meyer, Morison, Keil, Broadus, Kübel, Bruce, *et al.*), Luke (Godet, Plummer), and both Matthew and Luke (Bengel, Bleek, Olshausen, Ewald, Fritzsche, Kuinöl, Nösgen, *et. al.*) are of varying usefulness.

---

* See the text of both passages quoted above under i. 3. The Lukan form of the parable is conspicuously secondary in character; the Jewish phraseology is largely removed, and the description is generalized so as to be adapted to any locality. Matthew, on the other hand, gives a faithful picture of the conditions of house-building in the wadis of Galilee. Again, also, the literary superiority belongs to the First Gospel.

Literature upon special portions and aspects of the Sermon has been cited in the footnotes. C. W. VOTAW.

Literature.

The Advent of Christ falls within the penultimate period of that era of Israelitish history which begins with the Return of the Jews from Babylon (B.C. 538) and ends with the Fall of Jerusalem (A.D. 70). From both an external and an internal point of view, this era marks a far-reaching transformation of the conditions of Jewish life. At the outset, Judæa, which was not quite the same in extent as the ancient kingdom of Judah, forms a small province of the Persian, and afterwards of the Greek Empire. The population, at first scanty and poor, gradually increases, and, under the orderly arrangements of the Law, attains to a certain measure of prosperity. But internal party-strife consumes its strength, and, under Antiochus Epiphanes, reaches such a height that this Seleucid monarch, in the pride of his Greek culture, but with political shortsightedness, forms the resolution of entirely rooting out the proper Jewish religion. This period of extreme danger is unexpectedly followed by a brilliant revival of the Jewish State, which recalls the flourishing period of pre-exilic history, and which struck the people themselves in this light. The nation shakes itself free from the foreign yoke, and the Hasmonæan princes not only become high priests, but finally assume the title of 'king.' This glory, however, is of short duration, and the Jewish people are rudely awakened from their dream. The internal dissensions that followed the death of queen Alexandra, hasten the intervention of the Romans, and lead to the conquest of Jerusalem by Pompey (B.C. 63). The Romans do not, however, destroy the Jewish State, but allow it to continue under a variety of changing forms, until at last the perpetual discontent of the Jews leads to the outbreak of the desperate war for freedom, which issued in the destruction of the State and the Temple.

From the spiritual point of view, this period marks the development of *Judaism* in opposition to the national life and the religion of the pre-exilic period. The deeper foundation of this is found in the remarkable recasting which the Jewish spirit underwent during the Exile. Nowhere else in the history of mankind is there an instance of a people being transformed in so wonderful and radical a fashion as the Jews in the course of their captivity in Babylon. They left Babylon a body whose true life lay not in the actual state of things, but in future expectations and in a world of cultus-notions created out of recollections of the past. To the actual world they sought to accommodate themselves upon certain abstract principles, and, when this attempt failed, they withdrew entirely into that spiritual world which was constructed wholly according to those dogmatic principles. They found their support in the Messianic expectation, for the sake of which they submitted to the burdensome prescriptions of the Law, which were intended to shield them from the heathen impurity of the world, and thereby render them worthy to hail the advent of the Messianic glory. Yet it is not to be overlooked, in this connexion, that the noblest spirits in the Jewish community, especially during the earlier periods of the post-exilic era, filled those outward forms with a rich inward content. There still survived in them the pure prophetic spirit, and the ideas created by men like Jeremiah and Deutero-Isaiah; nay, the writings which emanated from this period, such as the Psalms and the Book of Job, touch us almost more nearly than the writings of those prophets, because the ideas contained in them have found simpler expression and are less closely bound up with the historical form. But the conditions under which the Jews lived seldom permitted a lengthened enjoyment of this contemplative life. Not only were they disturbed in their rest by contact with the heathen world, but even amongst themselves there were men of a different disposition, whose recollections turned rather to their pre-exilic forefathers, and who, with a stronger sense of actualities, plunged vigorously into the relations of life, and sought to help themselves. Between them and the 'quiet in the land' there grew up an ever-increasing opposition, which may be regarded as the moving factor in the post-exilic history. Through these conflicts with opposition without and within, not only was the stricter Judaism disturbed, but it was driven also to the discussion of the great religious problems and to new developments. The fruits of these spiritual struggles may be seen in the entirely new conception of the state of man after death and in the transformation of the Messianic hope, which in the Apocalyptic literature seeks to free itself from national limitations and takes a start in the direction of universalism. It may be safely concluded that, in this movement, contact with foreign forms of thought was not without importance—primarily contact with Parsism, secondarily with the Greek world.

i. DISTRIBUTION OF THE JEWISH POPULATION IN THE HOLY LAND.—Leaving out of account meanwhile those Israelites who were scattered in various lands, the Jewish population was at first confined to *Judæa* proper, from which the Israelites derived their now universally current appellation (Gr. Ἰουδαῖοι, Germ. 'Juden,' Eng. 'Jews'). The land taken possession of by the returning exiles was considerably smaller in the southern direction than in pre-exilic times. Whereas formerly Beersheba was regarded as the southern limit, the part of Judæa that lay to the south had been taken possession of during the Exile by the Edomites, and the post-exilic community was at first far too weak to drive back the intruders.* The boundary between this New-Edom and Judæa was formed in the 2nd cent. B.C. by the town of Beth-ẓur, and this was, in all probability, approximately the division between the respective territories also at an earlier period. According to Neh 6^{2}, the original N.W. boundary appears to have been the Plain of Ono (*biḳ'ath 'Ōnō*, probably the modern *Kefr-'ânâ*). But at a later period the Samaritans, who lived at constant feud with the Jews, must have got possession of three places inhabited by Jews, namely Lydda, Ramathaim, and Aphærema (1 Mac 11^{34}). In the Maccabæan period, however, Judæa underwent considerable expansion. The three places just named were taken from the Samaritans and restored to the Jews as early as the time of Jonathan. Afterwards the boundary was extended still farther to the north, for, according to Josephus (*BJ* III. iii. 5; *Ant.* XIV. iii. 4), the N. boundary of Judæa ran by Borkaos (prob. the modern *Berkît*) in the hill-country and Koreæ (now *Ḳurâwa*) in the Jordan Valley. The country in the south inhabited by the Edomites, which now bore the name *Idumæa*, was conquered by John Hyrcanus. As it was originally Israelitish land, the inhabitants were compelled to adopt the Law and submit to circumcision. Accordingly, from that time onwards (in conformity with the prescription of Dt $23^{8f.}$), they were regarded as Jews, although they continue to be called Idumæans. That they also regarded themselves as genuine Jews is evident, for instance, from the words attributed to them by Josephus (*BJ* IV. iv. 4, *τῶν πατρίων ἱερῶν . . . τῆς κοινῆς πατρίδος*), but of course their foreign origin could not be wholly forgotten.† On the other hand, in the cities on the Mediterranean coast, which had only transitory periods of subjection to the Jews, the population was preponderatingly heathen, although considerable Jewish minorities existed in them. Only in Joppa (*Jaffa*) were the Jews in the majority, this city having continued after the death of Herod to be united with Judæa. During the war for freedom it played, accordingly, a prominent part, and had to be twice captured by the Romans (Jos. *Ant.* VII. xi. 4; *BJ* II. xviii. 10, III. ix. 2).

To the north of Judæa lay *Samaria*, which stretched as far as the Plain of Jezreel. The population of this district sprang partly from the ancient Israelites, but had received a strong intermixture through the heathen peoples who were settled here by the Assyrian conquerors (cf. 2 K $17^{24ff.}$). In course of time these heathen elements were absorbed by the Israelitish remnants, but the ill-will shown by the Samaritans towards the returning Jews kept the latter from ever forgetting the impure origin of their northern neighbours. Matters came to an open breach when the Samaritans built a temple of their own upon Mt. Gerizim, and thus renounced all connexion with the community at Jerusalem. It is true that they, equally with the Jews, acknowledged the Law, but the breach remained irreparable, and the Samaritans continued excluded from the further development of Judaism. The contempt of the Jews which found vent in the nickname 'Cuthæans' (Jos. *Ant.* IX. xiv. 3, XI. iv. 4, and in the Talmud), and which finds very sharp expression on the part even of the otherwise mild Ben Sira (Sir $50^{25f.}$ 'Two nations my soul abhorreth, and *the third is no people*: the inhabitants of Seir and Philistia, and *the foolish nation that dwelleth in Sichem*'), was repaid by the Samaritans with bitter hate. This manifested itself at times in the form of attacks upon the pilgrims journeying to Jerusalem, who, in consequence, frequently preferred to take the long roundabout way by the east of the Jordan (Lk 9^{52}, Mk 10^{1}; Jos. *Ant.* XX. vi. 1). The destruction of the Gerizim temple by John Hyrcanus made no change in these relations, but rather embittered the feelings of the Samaritans still more.

As to *Galilee*, we learn from 1 Mac 5 that in the course of the post-exilic period Jews had settled in it, but that during the first half of the 2nd cent. B.C. these were still so few that they could not hold their own against the heathen population, and were consequently brought by Simon to Jerusalem. It was not until the time of Aristobulus I., as Schürer (*GJV*³ i. 275 f.) was the first to prove, that this portion of the land and its inhabitants, regarding whose nationality we have unfortunately no more precise information, were compelled on the same ground as the Idumæans to adopt the Law (Jos. *Ant.* XIII. xi. 3). It is extremely probable, however, that there were further settlements of Jews of purer birth in these fertile districts, so that they became more completely Judaized. It is characteristic in this respect that Judith (8^{19}) speaks of 'our fathers,' *i.e.* the ancient Israelites. At the time of Christ the land of Galilee was essentially Jewish, and had its Pharisees and scribes (Lk 7^{36}, Mt 8^{19}), as well as its synagogues (Mt 12^{9}, Lk 4^{16} 7^{5}). The designation 'half-Jews' is never applied to the Galilæans as it is to the Idumæans.* It may be added that the Judaizing of Galilee embraced only the southern portion of it, for Ḳedesh, lying to the west of Lake Ḥûleh, marked the boundary between the land inhabited by Jews and the territory of the Tyrians.†

A similar condition of things prevailed also in the country to the *east of the Jordan*. Here, too, there had been numerous settlements of Jews, who, however, were so hard pressed by the heathen that Judas Maccabæus brought them to Jerusalem (1 Mac 5^{45}). But at a later period the middle portion of the trans-Jordanic tract was conquered by Alexander Jannæus, and the Law imposed upon its inhabitants for the same reason as in the case of the Idumæans (cf. Jos. *Ant.* XIII. xv. 4). As the boundaries of *Peræa* (עֵבֶר הַיַּרְדֵּן), the district inhabited by the Jews, Josephus gives: Pella on the north, Philadelphia on the east, and Machærus on the south. Considerable tracts, however, of the trans-Jordanic country belonged to the Hellenistic cities, which were specially numerous here, and in which the Jews constituted only a minority. Also in the northern portion (Batanæa, Gaulanitis, Auranitis, and Trachonitis) the population was half-heathen half-Jewish (Jos. *BJ* III. iii. 5 f.). But the Jewish element was strengthened by the Babylonian Jews whom Herod transplanted here in order to combat the plague of robbers (Jos. *Ant.* XVII. ii. 13).

The task which, since the time of Ezra, had been assigned to strict Jews—the task of maintaining a complete isolation from the heathen world—was thus an extremely difficult one; for not only were they surrounded on all sides by the heathen, but Hellenistic cities intruded as *enclaves* in the midst of the Jewish country itself. Moreover, the rapid development of commerce brought the Jews into close contact with foreigners, while, finally, the foreign rule naturally introduced many non-Jewish elements into the land. The attractive influence which Greek culture exercised over the Jews is shown by the history of events immediately preceding the Maccabæan era; and even the Hasmonæans who originally came forward to oppose the ethnicizing of the Jews, were afterwards increasingly attracted by Hellenism, so that Aristobulus I. actually received the surname of Φιλέλλην ('friend of the Greeks'). Herod the Great, too, in spite of his essentially barbarian nature, sought to pose as a patron of Greek culture, surrounded himself with Greek orators and writers, had his sons educated at Rome, and made his appearance as a pure Greek in the Hellenistic cities that were subject to him. Nay, even in Jerusalem, to the scandal of the Jews, he caused theatres, circuses, and other Greek buildings to be erected. The same course was pursued by his successors. Tiberias, for instance, was a city with a perfectly pronounced Greek stamp, which may account for the fact that Jesus never visited it. The maintaining of Jewish uniqueness unimpaired was, we repeat, a very difficult task; much more difficult in Palestine than for the Jews of the Diaspora, who found themselves in unequivocal opposition to their environment.

---

* On Neh $11^{25ff.}$ cf. now, above all, E. Meyer, *Entstehung des Judentums*, 106 f., 114 ff.

† Josephus says of Herod that, as an Idumæan, he was only half a Jew (*Ant.* XIV. xii. 2). On the other hand, when Agrippa I. once felt hurt by the epithet 'foreigner' in Dt 17^{15}, the people, whom he had gained over by his friendly offices, cried out, 'Thou art our brother' (Meg. *Ṣôṭā* vii. 8).

* Quite remarkable is the severe judgment on Galilee attributed to Joḥanan b. Zaccai (Jerus. *Shabbath* 15*d*): 'Galilee, Galilee, thou hatest the Law, therefore thou shalt yet find employment among robbers.'

† Cf. Buhl, *GAP* 72.

ii. LANGUAGES.—The language of the Jews who returned to Palestine from Babylon was *Old Hebrew*. But even during the Persian domination *Aramaic*, which was then the language of commerce and diplomacy, began to force its way among the Jews as with the neighbouring peoples. The earliest traces of this are found in the extracts in the Book of Ezra drawn from an Aramaic historical writing. The Book of Daniel, composed in the 2nd cent. B.C., is written partly in Aramaic. At the time of Christ the ordinary speech of the people had come to be Aramaic, as is evident not only from the New Testament, but from various cultus terms used by Josephus, and from statements contained in the older Jewish literature. The necessary consequence of this change was the custom of having the passages of Scripture which were read in the synagogue followed by an Aramaic translation—a custom which the Mishna presupposes as an ancient inheritance. The Aramaic spoken by the Jews was a dialect of the Western Aramaic, the pronunciation of which, moreover, differed somewhat in different parts of the country, varying again amongst the Samaritans as compared with the Jews.*

The Old Hebrew language yielded, however, only gradually to the Aramaic idiom, and, before it disappeared, it developed a final species, the so-called *New Hebrew*. Even after men had begun to write in Aramaic, Hebrew writings were still composed; *e.g.* the Book of Chronicles (*c.* 300 B.C.), the Book of Sirach (not long after 200), various Psalms belonging to the Maccabæan period, and the Book of Ecclesiastes. The Hasmonæan rulers, who above all laboured for a national reawakening, favoured the ancient speech, as the Hebrew legends on their coins show; and the First Book of Maccabees was unquestionably written in Hebrew. But the last remark applies also to the Psalms of Solomon, which emanated from the middle of the last century B.C., and to the Apocalypses of Baruch and Ezra, composed after the Fall of Jerusalem. Later still, Hebrew continued to be for long the language of teachers of the Law, so that the Mishna (2nd cent. A.D.) is composed in New Hebrew. It was only after the date last named that Hebrew ceased to be a living language, and subsequently played the same rôle as Latin did in the Middle Ages. See, further, Driver, *LOT*^{6} 503 ff.

Along with the idioms just discussed, we have to take into account, for NT times, also the *Greek* language. The factors we noticed as favouring the introduction of Greek culture paved the way also for the language of Greece. The clearest evidence of this is afforded by the very numerous Greek words adopted into the languages of the Jews. A few of these are found even in the Book of Daniel, notably such as are names of musical instruments (Driver, *l.c.* 501). In all probability אפריון of Ca 3^9 must also be considered Greek (=φορεῖον), and perhaps we should assign to the same category some other terms in the Song of Songs (*l.c.* 449 n.). In the Book of Ecclesiastes, again, we have Heb. renderings of Gr. forms of expression, such as עֲשׂוֹת טוֹב=εὖ πράττειν, תַּחַת הַשָּׁמֶשׁ=ὑφ' ἡλίῳ, etc. In the post-Biblical literature we encounter a large number of Greek loan-words, especially in the domain of political administration, or of commerce, or of public institutions.* It is characteristic, further, that, whereas on some of the later coins of the Hasmonæans we find Hebrew legends side by side with the Greek, the coins of the Herod family bear only Greek inscriptions. It may be held as certain that every Jew who made any claim to higher culture, and therefore in particular every one who was brought into contact with the court, understood and spoke Greek. Traders also must be assumed to have had a certain acquaintance with this tongue. And those Jews who lived in the immediate vicinity of districts where Greek was spoken would doubtless acquire the habit from their youth of using the Greek as well as the Aramaic language. But how far it was customary elsewhere to learn Greek, and how far the knowledge of this language had penetrated among the general body of the people, cannot be determined with certainty. According to *Ṣôṭā* ix. 14, during the war with Quietus [so read instead of 'with Titus'] in 115–117, it was forbidden that any one should teach his son Greek. From this we may infer that until then this had been a usual practice even within strict circles. It was also an important circumstance that Jerusalem, upon the occasion of the great festivals, was the rallying-point not only of the Palestinian Jews, but of those whose homes were in all other lands. Only a very small proportion of the latter can have been acquainted with Hebrew or Aramaic. And at times some of these, instead of returning to their homes, would settle in Jerusalem. It may also be supposed that the choice of the Alexandrian Jew, Boethus, to be high priest would draw a number of Alexandrians to Jerusalem (cf. Jos. *Ant.* XV. ix. 3). Special synagogues were built at Jerusalem for the use of those foreigners who did not understand the language of the country (Ac 6^9; Tos. *Megilla* iii. 6). Proselytes also would come from other lands to settle in Jerusalem. In this way some knowledge of Greek may be presumed to have been diffused in Judæa as well. In Jn $12^{20ff.}$ we hear of Greeks (Ἕλληνες, *i.e.* either Jews of the Diaspora [?] or proselytes) who asked Philip to introduce them to Jesus—a circumstance which implies that this disciple at least understood Greek. That the same was the case with Jesus Himself cannot be proved with complete certainty from His conversations with Pilate, for the services of an interpreter may have been utilized, although this is not expressly mentioned in the narrative. We may compare the occasion when Josephus (*BJ* V. ix. 2) represents Titus as delivering an address to the people of Jerusalem, although we learn afterwards (VI. ii. 5) that on such occasions he availed himself of the help of Josephus as interpreter. From the last cited passage it is evident, at all events, that the mass of the people in the Jewish capital did not understand Greek.[*]

---

* Cf. Mt 26^{73}; Dalman, *Grammatik des jüd.-pal. Aramäisch*, 43 ff., *Die Worte Jesu*, i. 64.

* As examples may be cited: אפרכא ἔπαρχος, בולי βουλή, סנהדרין συνέδριον, קטיגור κατήγωρ, פרוזבול προσβολή, קפילא κάπηλος, טימי τιμή, קטאלפטא κατὰ λεπτά, פנדקין πανδοκεῖον, בלני βαλανεῖον, דימוסין δημόσιον. Less numerous are the Latin loan-words, the majority of which, moreover, came in through the Greek: *e.g.* דיקומני *decumani*, דיסקיפילינה *disciplina*. Cf. S. Krauss, *Griechische und Lateinische Lehnwörter im Talmud, Midrasch und Targum*, 1–2 (1898–99).

iii. POLITICAL CONSTITUTION.—The Greek rule, under which the Jews were brought by Alexander the Great, did not in general press very heavily upon subject peoples, who were left in the enjoyment of no small measure of self-government. The foreign domination confined itself mainly to the taxation of the provinces. So high, however, were these taxes at times, and such was the rapacity of some of those entrusted with the collecting of them, that there was scope here for oppression enough. In the Ptolemaic period Josephus (*Ant.* XII. iv. 3) tells us that the imposts were farmed out to the highest bidder, who could then claim military aid in recovering them. In the Seleucid period, on the other hand, the taxes were collected by officers of the king (1 Mac 1^{29}). The internal administration, however, was in the hands of the native authorities, which meant for the Jews that henceforward, as before, they were governed by the high priest and the council associated with him (γερουσία, Jos. *Ant.* XII. iii. 3).[†] This council was originally an assembly of the heads of families (Neh 5^{17}); but, after the high priest obtained the right of presiding over it, it came to be composed increasingly of members of the temple aristocracy (see art. SANHEDRIN in vol. iv.). The succession of legitimate high priests (the 'anointed' of Dn $9^{23f.}$) was violently interrupted under Antiochus Epiphanes. But after the Hasmonæans by their valour and address had raised the Jewish people to the rank of a Power that had to be reckoned with politically, the Syrian king nominated Jonathan high priest, and thus ruler of the nation of the Jews. The grateful people afterwards handed over this dignity to the last of the Maccabee brothers as a hereditary prerogative: he was to take charge of the sanctuary, appoint the officials, etc., and in his name all instruments were to be executed (1 Mac $14^{41ff.}$). Through the conquests which the Hasmonæans succeeded in making, the sphere of authority of the high priests (or, as they soon came to call themselves, kings) and of the Sanhedrin was materially enlarged. An important epoch for the internal administration was the reign of queen Alexandra, under whom the *Pharisees* succeeded in gaining a footing in the Sanhedrin and an influence upon the legislation.

The independence of the country was brought to a sudden end by the conquests of Pompey. The Jews were henceforward under the Roman domination. The extent of the land was materially diminished by Pompey's withdrawing the numerous Hellenistic cities from Jewish rule. On the other hand, he left to Hyrcanus, as high priest, a certain measure of political authority, so that the conditions were practically the same as those that existed immediately before the war for freedom. But in the year 57 B.C. Gabinius deprived Hyrcanus of all political rule by dividing the whole country into five districts, whose principal cities stood in direct subordination to the Romans (Jos. *Ant.* XIV. v. 4; *BJ* I. viii. 5). Cæsar, however, in 47 restored to Hyrcanus his former power and gave him the title of 'ethnarch.' But the real ruler was not the weak Hyrcanus, but the crafty Idumæan Antipater, who was made Procurator of Judæa, and who succeeded in having his sons Phasael and Herod appointed *strategoi* of Jerusalem and Galilee. After the death of Antipater (B.C. 43), Antony named the two brothers 'tetrarchs,' a step whereby Hyrcanus was once more deprived of all secular power and became merely an ecclesiastical prince. The attack made by the Hasmonæan Antigonus, with the aid of the Parthians, cost Hyrcanus and Phasael their offices, but Herod escaped to Rome, where he was nominated king of the Jews. It was not until the year 37 that he succeeded in conquering his kingdom, but from that date onwards he reigned undisturbed till his death. His position was that of a *rex socius.* Such a king was entrusted with rule only personally: after his death it was left open to the Emperor to decide as to the future lot of the particular country. For this reason Herod required the permission of the Emperor to put his own son to death. Nor could a *rex socius* wage war on his own initiative or conclude treaties, and, if the Romans were engaged in war, he had to furnish auxiliary troops. His right to coin money was restricted, and included only coins of small value. Otherwise he was an independent ruler, levied the various imposts of the country, was the supreme judge within his own land, and could execute capital sentences. Alongside of Herod there was still the Sanhedrin, but its authority was now, of course, very limited. The high priest was its president, but the setting up of an independent kingly authority had practically stripped this office of all significance. The high priests were appointed and deposed by Herod in the most arbitrary fashion—a course of procedure quite contrary to the Law, which intended this office to be held for life and to be hereditary.

After the death of Herod, his kingdom was divided into three portions. Philip received, with the rank of tetrarch, the northern trans-Jordanic territory, over which he ruled till his death, in A.D. 37. Herod Antipas, likewise as tetrarch, had Galilee and Peræa assigned to him, but was deposed in 37. Archelaus had been destined to rule as tetrarch over Judæa and Samaria, but as early as the year 6 the Emperor deprived him of his land, which he united more closely with the Roman Empire. It was, however, subject only indirectly to the Imperial legate in Syria, having a governor of its own, a Roman *Procurator* (ἐπίτροπος, ἡγεμών) chosen from the knightly body, who attended to the administration except when any very special necessity called for the action of the legate. The Procurator resided at Cæsarea on the seacoast; but on the occasion of the great festivals, when the mood of the people was always most turbulent, he came to Jerusalem, where he took up his residence in the former palace of Herod on the west side of the city. The largest Roman garrison was stationed at Cæsarea; but smaller bodies of troops were quartered in various towns throughout the land—amongst others in Jerusalem, where they had their barracks in the temple citadel of Antonia. The troops consisted entirely of non-Jews, the Jewish population being, it would appear, exempt from military service.[*] The taxes were now assigned to the Imperial

[†] Büchler (*Die Tobiaden und Oniaden*, 1899) and H. Winckler (*Orient. Ltzg.* iii. 87 ff.) maintain that the pre-Maccabæan high priests had no political power; but their arguments are artificial and not convincing.

[*] Cf. Schürer, *GJV*^{3} i. 460.

fiscus, and were levied by the Procurator, the highest financial official, who in this work availed himself of the aid of the various *communes*. The duties, on the other hand, were farmed out at a fixed sum to private officials (*publicani*).* Both these 'publicans' and their subordinates were often of Jewish extraction (cf. *e.g.* Lk $19^{1\text{ff.}}$); on account of the inordinate greed and dishonesty that frequently characterized them, they were greatly hated and despised ('publicans and sinners,' Mt $9^{10\text{f.}}$ *et al.*). The taxation was probably connected with the division of the country into eleven toparchies, each with its capital. The Roman taxation of Judæa after the deposition of Archelaus led also in the year 7 to the visit of the legate Quirinius, for the purpose of having the inhabitants assessed.† Finally, the Procurator was the highest judicial authority in the land, and had to attend to all important lawsuits; in particular, no capital sentence could be executed without being confirmed by him. In such cases he had sometimes associated with him a council made up of Romans (*συμβούλιον*, Ac 25^{12}). In other respects the country enjoyed the right of self-government, which was exercised, as formerly, by the high priest and the Sanhedrin. Josephus (*Ant.* XX. 10) puts the matter very well when he says that the Jews, after they had had a monarchical, had now again an aristocratic constitution. But one essential and characteristic change was that the high priest was now appointed by the Roman Procurator. This condition of things underwent no interruption except when Agrippa I., under the title of king, gathered the whole land for a short time (41–44) under his sway. During this period the same arrangements were followed as under Herod the Great; the high priest, for instance, being appointed by the king. After Agrippa's death, not only Judæa, but the whole country of the Jews (with the exception of the districts to the east of the Jordan and in the north, which were assigned to Agrippa II.), came directly under the Roman sway. The constitution was now quite the same as in Judæa prior to Agrippa I., except that the Romans handed over the right of nominating the high priest first to Herod of Chalcis (44–48) and then to Agrippa II. The regular order of things came to an end with the outbreak of the final war for freedom. The land was divided into various districts, each under a ruler invested with dictatorial authority. But this organization gave way before the advance of the Romans. The last high priest, Phannias, was chosen by lot by the Zealots. He was a man of humble extraction, who had lived all his life in the country, so that he understood nothing of the office (Jos. *BJ* IV. iii. 8). After the Fall of Jerusalem, the relative independence of the Jews was gone for ever. The high priests disappeared along with the temple, and the Sanhedrin along with them. Henceforward the cohesion of the Jews was dependent solely upon those spiritual factors which lent such invincible strength to the Jews of the Diaspora and had been the real life-principle even of the Palestinian Jews—the Law and the Messianic hope.

From the foregoing sketch it will be evident that the whole of the properly Jewish administration throughout the period in question was concentrated in the high priest and the Sanhedrin (*γερουσία*, later *συνέδριον*, hence סנהדרין). The sway exercised by these authorities underwent change, however, in the course of time. It reached its culminating point under the Hasmonæans, when the high priest had become the ruler of an independent State. It was weakest under Herod, who left little room for other authorities beside him (cf. Jos. *Ant.* XIV. ix. 4). Those periods during which the Jews were under foreign rulers marked the normal stage of the power of these institutions. Originally, the jurisdiction of the high priest and the Sanhedrin extended only to Judæa. It was otherwise when the Hasmonæans enlarged the boundaries of the country, and it continued to be so during the following periods. But upon the partition of the land after the death of Herod, Judæa became once more the sphere of jurisdiction, the Samaritans being, of course, subject only to the Romans and not to the Jews, while in the other parts of the country the tetrarchs were the judicial heads (cf. Jos. *Ant.* XVIII. iv. 6, and the expression ἐπὶ ἡγεμόνας καὶ βασιλεῖς in Mt 10^{18}).

As to the functions of the *Sanhedrin*, there are a number of allusions which enable us to form a pretty clear conception. In conjunction with the high priest it was the representative of the nation to foreign nations and princes (1 Mac 11^{23} 12^{6} 13^{36}). It decided on measures for the fortification and defence of the land (1 Mac 12^{35}; Jos. *BJ* IV. iv. 3; cf. Jth 4^{8}). It granted dispensation in the matter of the sacred dues (Jth 11^{14}), and made arrangements for the organization of the *personnel* of the temple (Jos. *Ant.* XX. ix. 6). But, above all, it was the supreme court of justice, all important cases being brought before it, and the decision lying with it when the inferior courts were not agreed (cf. Mt 5^{22}, Ac 4^{15} 5^{21} 6^{12} 22^{30}, and the story of the Passion). In the earlier period no sentence of death could be carried out without the approval of the Sanhedrin (Jos. *Ant.* XIV. v. 3); but Herod, in order to make the Sanhedrin more pliable to his will, caused a number of its members to be put to death (*ib.* XIV. v. 4); and when at a later period he appealed to this court, his action would appear to have been more *pro forma* (*ib.* XV. vi. 2). Under the direct rule of the Romans, the Sanhedrin lost, as was noted above, the right of condemning to death (Jn 18^{31}; cf. Jos. *Ant.* XX. ix. 1, and Jerus. *Sanhedrin* i. 1). As long as the Jewish State subsisted, the head of the Sanhedrin was the high priest. This is clear from the concurrent testimonies of the NT and Josephus. The statements of the Talmud on this subject are based upon later theories, and cannot be brought either in whole or in part into harmony with the reality. Thus the high priest had, at all times, a certain juridical and also political authority in addition to the functions he exercised in connexion with the cultus. Even in later times the members of the Sanhedrin were chosen by preference from the leading priestly families, a special fondness being shown for those who had held the office of high priest. But, as has already been said, the Pharisees succeeded, under queen Alexandra, in making their way into the Sanhedrin, and in maintaining their position there, a minority though they were, in the times that followed.

iv. SOCIAL CONDITIONS.—The principal occupation of the Jews in the time of Christ, as in the earlier periods, was *agriculture*, with which cattle-breeding was generally combined. The Letter of Aristeas (107 ff.) properly emphasizes the fact that in Palestine the right relation was established between town and country, the land being fertile, yet in need of diligent culture, and thus requiring a dense population settled upon it, so that the great cities did not flourish here, as elsewhere, at the expense of the country population. 'The land,' says the author, 'is thickly planted with olives, covered with fields of grain and leguminous plants, rich in wine and honey; the other fruits and the dates cannot be numbered, while cattle of all kinds are there in abundance, as well as rich pasture land for them.' Especially fruitful was Galilee, where Jesus spent most of His life, and from which He borrowed the numerous country scenes that we encounter in His parables. A great many people found employment on the larger estates, there being numerous servants, maids, and officials of all kinds attached to the service of a single house (cf. Lk 12^{42} 16^{1}).* *Fishing* was a leading occupation in Galilee, being prosecuted in the teeming waters of the Lake of Gennesareth. We find allusions to this both in the Gospel narratives and in the words of Jesus (Mt $13^{47ff.}$, Lk 5^{10}; cf. also the reference in Mt $7^{9f.}$ to bread and *fish*, corresponding to bread and *flesh* elsewhere). After the Jews, under the Hasmonæans, gained access to the sea, they began to prosecute fishing in it as well. A variety of preparations were made from the fish that were caught, and these again played their part as articles of commerce.† See, further, art. FISHING in vol. ii. *Hunting* is said in the Talmud to have been prosecuted by some for a livelihood; the abundance of game in Palestine is shown by the history of Herod, who was an enthusiastic sportsman.‡

† Jos. *Ant.* XVIII. i. 1. On Lk $2^{1\text{-}5}$ cf., above all, Schürer, *l.c.* i. 508 ff.

An important source of income in post-exilic times was that derived from the work of the different *artisans*. Of the industry of some (builders, engravers, smiths, potters) we have a graphic picture in Sir 38; that of others is illustrated by the Talmudic writings.§ Ben Sira recognizes their importance (without them is no city built, and if they sojourn in a strange land, they need not hunger), but he considers them excluded from all higher spheres of activity, such, for instance, as the public service (v.$^{33f.}$). The later scribes held a sounder opinion on this subject, many of them, indeed, supporting themselves by manual labour.‖

Commerce took a great stride in the Greek period. Particularly after the Jews came into possession of Joppa and other seaport towns, they began to imitate zealously the example of their brethren of the Diaspora, and to take their share in the trade of the world. Palestine was favourably situated in this respect. Ancient caravan roads led through Galilee and Samaria to the coast, where the wares were shipped; Arab caravans brought the treasures of S. Arabia to the southern part of the land, from which they could in like manner be exported to the West. See, further, art. ROADS AND TRAVEL (IN OT), below, p. 369 f. The products of the fertile land, such as oil, grain, wine, flax, formed articles of export, which were exchanged for the products of Egypt and the Mediterranean lands. The Jews began to undertake long journeys by sea in order to enter into commercial relations with foreigners (Ps $107^{23ff.}$, Pr $7^{19f.}$, Sir 43^{24}). In Palestine there were both merchant princes and petty traders (Sir 26^{29}). The connexion between home-born and foreign Jews led also to a commencement being made in Palestine with those financial transactions for which the Jews of the Diaspora had developed such a turn, having found in Babylon an excellent training school.¶ Since such a condition of things was quite unknown to the traditional Law, and its enactments were felt to be hampering, Hillel devised the so-called '*prosbole*-rule,' whereby the legal prescription as to the cancelling of all debts every seven years was practically annulled (see, on this and on the Deuteronomic regulations as to the remission or suspension of debts, Driver, *Deut.* 178 ff.). The method of taking security was regulated very precisely, as the Talmudic writings show (cf. the Lexicons, *s.v.* אחריות). There were forms in which the names had merely to be inserted. According to Josephus (*BJ* II. xvii. 6), the bonds signed by debtors were kept in the public archives. As to the estimation in which mercantile occupations were held, Ben Sira speaks as disparagingly as he does of artisans. But at a later period things were otherwise, and both priests and teachers of the Law engaged in trade. For instance, Josephus (*Ant.* XX. ix. 2) tells us that the high priest Ananias was a great man of business; cf. Tos. *Tĕrûmôth*, where we read of the shop of a priest. We may also recall in this connexion the parables which Jesus borrows from commercial life (*e.g.* Mt $13^{45f.}$) The Essenes alone abjured on principle all contact with trade. See, further, art. TRADE in vol. iv. The increasing intercourse for trade purposes led, moreover, to other branches of industry. Thus *inns* sprang up along the much frequented roads, where the hosts had their charges for attending to travellers (cf. Lk $10^{34f.}$). The 'publicans' also, to whom the taxes were farmed out by the Romans or the native princes, were indebted to the growing commercial intercourse for their livelihood and for the wealth which they so often acquired.

How far the civil officials—the military do not come into consideration for reasons indicated above—received payment cannot be made out with certainty. In many cases their office may be assumed to have been an honorary one. This would be the case, for instance, with the elders of the community, the judges, the members of the Sanhedrin, etc. But, upon the generally accepted principle that the labourer is worthy of his hire,* it may probably be inferred that, if not the rulers of the synagogue and the collectors of alms (גבאי צדקה), yet at least the synagogue attendants (חזני הכנסת) had a salary. The same would probably hold good of the numerous officials attached to the court, who would be paid by the king. When we pass to the case of the priests and temple officials, we have precise information to go upon. The incomes of these were very considerable, and they increased with the increasing population and the growing wealth. The Levites were entitled to a tenth of the whole produce of the land, and had then to hand over a tenth of this to the priests (Nu $18^{25f.}$). Other dues besides, of all kinds and in some instances very considerable in amount, fell to the priests. In peaceful times all this was exactly regulated; for what Josephus (*Ant.* XX. viii. 8) relates of the high priests, that they sent their servants to the threshing-floors to seize the portion of the grain due to the priests, belongs to the latest period in the history of the Jewish State, when all legal relations were dissolved. Admittance to the priesthood or to the Levitical body was open to none but those who belonged to the tribe of Levi, and the members of the privileged caste watched over their prerogative with the utmost vigilance. Not only the priests in Palestine, but even the members of priestly families who lived in foreign lands, drew up exact genealogies whose correctness was examined at Jerusalem (Jos. *Vita*, 1; *c. Apion.* i. 7). In the matter of the revenues, however, account had to be taken merely of the priests who lived in the Holy Land, who were divided into twenty-four classes, of which each had to officiate for a single week, but as a rule only twice a year. Quite a number of priests lived constantly in Jerusalem, but there were also some who had their home in other towns of Judæa, or even in Galilee. According to the calculations, somewhat doubtful, indeed, of Büchler (*Die Priester und der Kultus im letzten Jahrzehnte des Jerus. Tempels*, 48 ff.), the total number of priests in the last days of Jewish history amounted to about 20,000, of whom some 5000 lived in Jerusalem.

‖ The characteristic saying of Simon b. Zoma, that when he looked on the crowd of humanity he felt impelled to thank God because He had formed them all to serve Him (*i.e.* to execute all His purposes), has reference not to the favoured body of the Wise, but to the division of labour amongst men (Jerus. *Berakhoth* 13*a*).

¶ It is very significant that To 1^{13} represents Achiacharus as 'purveyor' (*ἀγοραστής*) of a foreign king.

* Mt 10^{10}, 1 Co $9^{7ff.}$. A man engaged to accompany one on a journey received, according to To 5^{15}, not only travelling expenses but wages, and a present after the journey was ended.

Of payment of *teachers* there is no mention. According to *Shabbath* i. 3, it was the synagogue attendants that gave elementary instruction to children on the Sabbath. These would receive at most a salary for attending to their duties in general. In any case, the teachers of the Law and the scribes did not live by their work of teaching; on the contrary, if they were without means, they pursued some handicraft, or even engaged in trade, in order to gain a livelihood.—That *physicians* received a fee when their services were over is plain from such passages as Sir 38^{2}, and Midrash *'Ēkhā* on La 1^{5}.

The class of free citizens included also the *day-labourers*, who owned no land, and had no fixed employment, but hired out their labour daily (cf. the picturesque description in the parable of Mt $20^{1ff.}$). When, not long before the outbreak of the war for freedom, the temple was at last finished, Josephus (*Ant.* XX. ix. 7) tells us that more than 18,000 labourers were thrown out of work, that it was resolved to utilize the treasure of the temple in order to procure employment for them, and that they received their wages even if they had wrought only a single hour. See also art. WAGES, below, p. 358.

Quite different was the standing of the *slaves* proper, who enjoyed no personal freedom. Even Jews might fall into this condition, if, for instance, they could not pay their debts (cf. Mt 18^{25}), or had been guilty of theft. The Law, however, contained a series of enactments (see full discussion of these in Driver, *Deut.* 181 ff.) by which the slavery of a Jew had a time limit imposed upon it. By means of the combining method of exegesis, this period was shortened still more, namely when the year of Jubilee happened to fall within the six years' period of service.* But, as the year of Jubilee was not really observed, this enactment could have no practical consequence. On the other hand, the later teachers of the Law laid it down that a Jewish girl was to serve as a slave only till she reached the age of puberty.† It may further be assumed that, as the prosperity of the people increased, such cases would always be more rare, and that poor Jews would be saved from this fate by the ready benevolence of the people, coupled with the organized methods for the relief of the poor (the third tenth every three years, and the collecting of alms in the synagogues). The majority of slaves were, accordingly, without doubt, foreigners acquired by purchase.‡ See, further, art. SERVANT in vol. iv.

When we compare the condition of the Jews immediately after the Exile with that which prevailed in the time of Christ, a very important difference, as was above remarked, presents itself. Instead of the small, poverty-stricken population of Nehemiah's day, we see a numerous people, which with energy and industry can turn to good account the many sources of wealth that abound in their land. In spite of their longing for Messianic times, in spite of the unreality of their world of ideas, they displayed in real life much adroitness and a remarkable turn for business, so that their position had come to be one of great material well-being. The clearest evidence of their extraordinary energy is afforded by the circumstance that, although they were very heavily burdened with taxes, they were not reduced to poverty, but on the contrary continued to increase in wealth. The dues they had to pay were partly sacred and partly secular. The former were based upon the enactments of the Priests' Code (esp. Lv 2^{3} 6^{16-18} [Heb. $^{9-11}$] 7^{32-34}, Nu 18^{8-28}), with which certain prescriptions from Deuteronomy (14^{22-29} 18^{1-8})* were combined. The principal due was the Levites' tenth of all the produce of the soil, in the paying of which the most painful exactness was shown by strict Jews (cf. Mt 23^{23}). But before the tithing of the produce of the soil there was a twofold due deducted: the first-fruits of the 'seven kinds' (see Schürer, *GJV*³ ii. 249), viz. barley, wheat, grapes, figs, pomegranates, olives, and honey; and the *tĕrûmā*, which was not exactly measured, but was understood to be the fiftieth part (see Schürer, *l.c.* 249 f.) of all the fruit of field and tree. From the products which were then tithed there was taken (in addition to the tenth part paid to the priestly tribe) a *second* tenth,† which, however, was destined, along with the tenth of cattle (Lv $27^{32f.}$), for sacrificial feasts. But every three years a *third* tenth (the מעשׂר עני, the 'poor-tithe,' according to the Rabb. interpretation of Dt $14^{28f.}$; but see Driver, *l.c.* 170 n.) was deducted for the benefit of the poor. Further, the firstlings of all animals that might be offered in sacrifice were claimed as a due, while a sum of money had to be paid for firstborn children and the firstlings of unclean animals (Nu 18^{15-17}); not to speak of a firstlings' cake (the *ḥallā*) of coarse flour (Nu $15^{20f.}$, cf. Ro 11^{16}), and a part of the wool at the first shearing (Dt 18^{4}). Lastly, there were various occasional offerings that required to be brought. The annual temple poll-tax (Ex $30^{14f.}$, Mt 17^{24}), on the other hand, was not high (half a shekel for every adult male), and could not be felt except by the very poorest. See more fully, on the subject of this paragraph, Schürer, *GJV*³ ii. 243–262 [*HJP* II. i. 230–254].

In addition to these very considerable dues,‡ there were the secular taxes. After the Jews were freed from the Greek domination, which, from a financial point of view, was very burdensome, requiring a third part of grain and half the produce of fruit trees to be paid, the taxes passed to the Hasmonæans.§ When Herod afterwards became king, he obtained command of all the secular taxes of the country. According to Josephus (*Ant.* XV. ix. 1), these consisted mainly in the rendering of a certain proportion of the produce of the land, besides which the king levied a market toll on all that was sold in Jerusalem (*ib.* XVII. viii. 4). Herod's whole revenue, according to *Ant.* XVII. xi. 4 (with which, indeed, *BJ* II. vi. 3 does not agree), amounted to more than 900 talents (=£369,000) a year. The Jews complained bitterly of the amount of the taxes laid upon them, and alleged that it was only by bribing the king himself and his tax-collectors that it was possible to save oneself from injustice (*Ant.* XVII. xi. 2, cf. viii. 4). But of course we are not to lend too much credit to these complaints, especially as we learn that, after the great famine, Herod voluntarily granted the people remission of a third of the taxes (*Ant.* XV. x. 4). Herod's successors no doubt organized the matter of taxation upon the same lines as himself. Herod Antipas, who derived from his territories an annual revenue of 200 talents, had customs officials stationed on the frontiers (Mt 9[9]), to levy duties on imports and possibly also on exports. Agrippa, too, who for a short time had the whole land under his sway, would probably utilize the system of his predecessor. But during his reign not only was the market toll at Jerusalem abolished (see below), but the king, who was anxious to gain the affections of the Jews, remitted also the duty upon the houses of the capital (*Ant.* XIX. vi. 3). During the period that intervened between the deposition of Archelaus and the accession of Agrippa I., Judæa,* and, after Agrippa's death, the whole country, was taxed by the Romans, and the revenues passed into the Imperial *fiscus* (cf. Mt 22[21]). The taxes proper were levied by the Procurator, the commercial imposts were farmed out to private officials. The taxes consisted partly of a proportion of the produce of the soil, which was paid either in kind or in money, but they included also a poll-tax, which was levied even on women and slaves.† Vitellius remitted to the Jews the market toll that had to be paid at Jerusalem (*Ant.* XVIII. iv. 3); but in spite of this the taxes were very high, and were felt by the people to be extremely oppressive (Tac. *Ann.* ii. 42).

* Jos. *Ant.* IV. viii. 28; cf. Saalschütz, *Mosaisches Recht*, 713.

† Saalschütz, *l.c.* 817.

‡ With these foreign slaves they had generally, according to the Talmud, a great deal of trouble; cf. Zadok Kahn, *L'esclavage selon la Bible et le Talmud*, 1867, p. 173 f. For an earlier period, cf. Sir $33^{24ff.}$.

* On the irreconcilable conflict between these codes in certain particulars, see Driver, *Deut.* 169 f., 218 ff.

† Following the Rabb. interpretation of Dt 14^{22-27}, which held the tithe here prescribed to be distinct from, and in addition to, the tithe of Nu 18^{21-28}; but see Driver, *l.c.* 169 f.; Schürer, *l.c.* 246; and art. TITHE in vol. iv. p. 730.

‡ In the Sabbatical years all dues based upon the produce of the soil would of course be dispensed with (cf. Jos. *Ant.* XVII. xi. 6).

§ Regarding their system of taxing we know nothing except the few details contained in Josephus (*Ant.* XVII. x. 6; cf. Schürer, *GJV*³ i. 345). The people felt the taxation of Herod to be heavy in comparison with what had gone before (Jos. *ib.* XVII. xi. 2).

Taking all these dues together, we see that the material resources of this little nation were drawn upon to an extraordinary degree, and that none but a very energetic and temperately living people could have borne such burdens, and upon the whole even prospered under them. From the social point of view, the Jews must be reckoned among the more fortunate nations. As long as the foreign yoke was not too heavy and their religious susceptibilities were not offended, there prevailed amongst them a considerable degree of contentment and a healthy enjoyment of life (Sir 14[11. 14]), which at times might rise to hearty rejoicing, as we see, for instance, in the Song of Songs and the noisy celebration of the Feast of Tabernacles. No doubt there were social extremes, the one of wealth and luxury, the other of grinding poverty (cf. the parable of Dives and Lazarus), but the majority belonged to neither of these classes, and in peaceful times led a temperate and generally contented life.

v. PARTIES.—If the Jewish people was thus free from sharp social contrasts, there were opposing elements of another kind amongst them, which consumed their strength in the most dangerous fashion, and whose conflicts are the moving factors of the whole post-exilic history, until at last they brought about the destruction of the nation. The essential principle of this opposition is of a religious character, social and political principles play only a subordinate rôle in it.

What in pre-exilic times had been the wealthy secular nobility, became after the Exile the temple aristocracy: a privileged class to which a number of quite diverse circumstances gave a marked superiority. We have seen how, in consequence of the growing prosperity of the nation, the priests necessarily came into the possession of great wealth. At the same time the condition of things involved the passing of the relics of independence which were left to the Jews, into the hands of the high priest and his priestly coadjutors. In this way they were brought to interest themselves in actual politics, and thus were gradually forced into opposition to the strict party, whose ideal was complete political passivity and a confident expectation of Divine intervention. There were thus developed opposite religious principles, which by constant friction were always brought into sharper contrast. The 'pious' could not avoid looking upon their opponents with the same eyes as those with which the prophets had regarded the secular nobility of their day. The rich aristocracy were thought of as the ungodly, who believed not in God's help but in political devices often of a desperate nature; they were the unrighteous, who used their wealth and their influence with foreign nations to inflict all kinds of damage upon their opponents, the strict party. At the same time it would be a serious misunderstanding to reduce this opposition to a mechanical system, and to suppose, for instance, that all the priests belonged to the broader party. That there were even high priests who sympathized with the stricter tendency is sufficiently proved by the instance of Simon the Just, whose memory is still glorified in the later Pharisaic literature; and among the ordinary priests there were many who belonged to the 'pious.' Jewish history shows also that, among the priests who politically occupied the standpoint of the secular school, there were earnest men who were prepared to lose their life rather than neglect the duties assigned to them in connexion with the cultus (Jos. *Ant.* XIV. iv. 3). It would be equally wrong to suppose that the strict party represented an opposition to the temple cultus because this was in the hands of the temple aristocracy. That it was not so may be shown from the way in which Ben Sira, who himself belonged to the stricter school, exhorts his readers to honour the priests and to pay them their appointed dues (Sir 7[29ff.]). The correct view is simply that in the ranks of the temple aristocracy there was a party prepared to sacrifice the sacred uniqueness of Israel for the sake of worldly advantages, and that this disposition was so strongly developed that its representatives could not but appear to the strict school in the light of apostates.

The name under which in later times the adherents of the secular party meet us is *Sadducees*, properly members of the Jerusalem priesthood (from *Zadok*, 1 K 1[8], Ezk 40[46]). In opposition to them the *Pharisees* stand for the most uncompromising representatives of the stricter tendency. The name means properly 'those who *separate* themselves,' who keep at a distance from the ordinary unclean life and from all unclean persons (in contrast to the *'am hā-'āreẓ*, the common people, who were indifferent in matters of Levitical purity, etc.).

It was the elevation of the Maccabees that was responsible for the above-described opposition becoming a chronic malady. The Maccabees were originally allies of the stricter school, but, after they attained to the supreme power, they slipped over to the views of the temple aristocracy and thus came into conflict with the Pharisees. Above all, it was repugnant to the strict party that the Hasmonæans should confuse and corrupt the Messianic hopes. It is evident from the so-called First Book of Maccabees that the adherents of the Hasmonæan princes believed that these hopes had found a fulfilment in the persons of the latter. After they had conquered the whole land and assumed the royal title, it did indeed look as if the old Davidic kingdom had been raised up once more. The condemnation of this desecration of the Davidic throne and the sacred hopes meets us in the Psalms of Solomon ($17^{4ff.}$) and in a passage in the Book of Enoch (chs. 94 ff.); cf. also Assump. Mos. $6^{1ff.}$. The overthrow of the Maccabæan house cleared the air. The Sadducees were completely subjected under Herod, and had lost all influence. Under the Roman domination, the high priest, and with him the Sadducees, regained greater political importance (see above, p. 48), but they no longer played the principal part. When the war for freedom broke out, they sought at first to stifle the movement, and then, when they failed in this, to guide it. But the waves now ran so high that they quickly swept away this time-worn and enfeebled party. See, further, art. SADDUCEES in vol. iv.

---

* The Samaritans, who also came under the Roman sway, were relieved, according to *Ant.* XVII. xi. 4, of a third of the taxes, because they had taken no part in the revolt.

† Cf., further, Schürer, *GJV*³ i. 511.

The development of *Pharisaism* was very materially shaped by the Maccabæan period. Opposition to the Hasmonæans brought out its one-sided tendencies to the full, especially when, under Alexander Jannæus, things went so far as a civil war, in which the Pharisees were at first victorious, but afterwards beaten and cruelly punished. But it was a momentous circumstance that immediately thereafter, under queen Alexandra, they gained political power. They forced their way into the Sanhedrin, carried a number of their laws, and thus tasted the sweets of rule. Thereby their less estimable qualities were developed, and there arose among them those Pharisees with whom we make acquaintance in the Gospels. With them the external flourished at the expense of the internal; beneath their numerous religious exercises, such as fasting, ablutions, prayer, almsgiving, there was often concealed an impure, ambitious, haughty disposition, whose end and aim was to lord it over the crowd. Their renunciation of all interest in foreign politics was abundantly compensated by the influence they exercised over the people—an influence to which even the Sadducees had to bend (Jos. *Ant.* XVIII. i. 4). It may be added that it is not only the New Testament that describes the Pharisees in this way. The Assumption of Moses contains a passage ($7^{3ff.}$) of precisely similar import, which also refers without doubt to the Pharisees.* Of course there were exceptions among them, as we learn even from the New Testament; and the Psalms of Solomon, which emanated from Pharisaic circles, still contain much of the pure and noble piety which we encounter in the canonical Psalms. See, further, art. PHARISEES in vol. iii.

While the sharp opposition between the Sadducees and the Pharisees receded somewhat after the overthrow of the Hasmonæans, there grew up within Pharisaism itself opposing influences, which were destined to be still more dangerous to the life of the people. Although the Pharisees otherwise were identified with the quiet and passive waiting for the time of the Messiah, the enrolment of the Jewish people by Quirinius (see above, p. 49^{a}) gave birth to a new party, which in other respects agreed with the Pharisees, but regarded the struggle for freedom and the casting-off of the Roman yoke as a sacred duty. The founders of this party of *Zealots* (קנאין) were a man of Galilee, named Judas, and a Pharisee, Sadduk (cf. Jos. *Ant.* XVIII. i. 4). From the ranks of these patriots there came, during the last decades before the war for freedom, the utterly ruthless *Sicarii*, who, armed with a short dagger (*sica*), mingled with the crowd, especially on the great feast days, and selected their victims alike from among foreigners and from their fellow-countrymen (Jos. *Ant.* XX. viii. 10; *BJ* II. xvii. 6, etc.; Ac 21^{38}). Against wild offshoots like these the more sober-minded of the Pharisees came forward, and were thus at times led to go hand in hand with the Sadducees.

The theological points of difference between the Sadducees and the Pharisees, upon which Josephus lays so much stress, are merely particular illustrations of the above-described deeper contrasts. The spiritual development which had taken place in the stricter circles since the time of Antiochus Epiphanes, and the new conceptions which had been thus reached, were not shared by the Sadducees, who held conservatively to ancient tradition. Hence they rejected and ridiculed the doctrine of a resurrection — a circumstance from which we may infer that they did not accept the Book of Daniel.* In general, the present possessed more significance for them than the hope of Israel, which was the life-principle of the stricter party. Similar was the state of things with their rejection of the belief in spirits and angels. In the circles of the 'pious' there had also been a very pronounced development of the notions regarding these, which had its roots, indeed, in the earlier OT writings, but yet was so peculiarly influenced, partly by foreign conceptions, that strict conservatives were bound to reject it, especially if, like the Sadducees, they had positivist tendencies. When the Sadducees, again, laid stress upon the freedom of the will, this was connected with their political leanings as above described: in their polemic they would have in view not only the passivity of the 'pious,' but also the growing disposition to transfer the real sphere of history to the angel-world, and to convert history into a conflict between good and evil spirits, of which human history was only a reflexion. As to legal enactments, the Sadducees held strictly to the Law, and rejected the oral Torah of the Pharisees. It is, no doubt, also in this connexion that the controverted points mentioned in the Jewish literature come in, but these give no clear picture of the root-principle of the opposition.

The third, 'philosophical,' party, mentioned by Josephus generally along with the Pharisees and the Sadducees, namely the *Essenes*, belonged to an entirely different world. This was a small ascetic sect, permeated with mysticism, and holding some extremely strange notions, the origin of which is still an unsolved problem. From a social point of view, the community of goods was the most characteristic feature of their organization. They employed themselves in agriculture and various handicrafts, but would have absolutely nothing to do with commerce. At least the majority of them renounced marriage. They acknowledged the temple, and sent votive gifts to it, but rejected entirely animal sacrifice. They held the Law in very high esteem. They believed in the immortality of the soul, but did not teach the resurrection of the body, because they regarded connexion with the body as a species of bondage for the soul. The doctrine of angels played a great part in their system. Among their many peculiar customs, those which express a veneration for the sun are the most notable, because they show most clearly that we cannot completely account for this sect from Judaism itself. What is genuinely Jewish in their opinions and customs comes nearest to Pharisaism, but the differences are too great for Essenism to be set down as a degenerate offshoot from it. This small, peaceful body never probably had very much weight. See, further, art. ESSENES in vol. i.

---

* The authority followed by Josephus in *Ant.* XVII. ii. 4 knows of the Pharisees as *εἰς τὸ πολεμεῖν καὶ βλάπτειν ἐπηρμένοι.*

* Cf. Mt $22^{23ff.}$. On the question to what extent the Sadducees recognized the Torah alone as Holy Scripture, as several of the Church Fathers assert, see Schürer, *GJV*³ ii. 411 ff.

vi. EDUCATION AND CULTURE.—Regarding the education of Jewish children we have only scanty information. According to the Bab. Talmud (*Bābā bathrā*, 21*a*), Joshua b. Gamaliel (probably the high priest who held office A.D. 63–65) appointed teachers for boys in every province and every city, and children were brought to these when they were six or seven years of age. According to *Shabbath* i. 3, the synagogue attendant (*ḥazzān*) was required on Sabbath to teach children to read. Josephus (*c. Apion.* i. 12) and Philo (ed. Mangey, ii. 577) speak as if it was customary for the Jews, even as children, to learn the Law. But this can refer only to the circle of the scribes and the educated classes, and not to the mass of the people. For if children learned in the boys' school to read the Law, and if this accomplishment was general, it would have been superfluous to have the Hebrew text translated into Aramaic at the synagogue service (see above, p. 47^{a}). The latter custom was manifestly due to the circumstance that the common people no longer understood Hebrew. When, therefore, Jesus, the carpenter's son (Mt 13^{55}), was able to read and expound the Bible text (Lk $4^{16ff.}$), this would naturally strike the people as something unusual and excite their wonder. But it is impossible to decide with certainty how large the circles were that possessed rolls of the Law (1 Mac $1^{36f.}$). As little are we informed as to the number that were able to write, although it is evident that the growth of commerce and the increasing pursuit of a business life must have contributed largely to the spread of this accomplishment (Lk 16^{6}). There is no mention of any regular instruction of girls, a branch of education which was not enjoined in the Law.[*]

The higher education consisted in the stricter circles of a deeper study of the Law, especially the special enactments that had been orally transmitted. The student selected some eminent legal expert as his teacher. Thus, for instance, the two famous exegetes Judas and Matthias were very popular teachers of youth at the time of Herod the Great (Jos. *Ant.* XVII. vi. 2); the disciples of Hillel and Shammai formed two well-defined schools of interpreters of the Law. St. Paul studied at Jerusalem under Gamaliel (Ac 22^{3}), etc. After his course of instruction was complete, the disciple was reckoned among the Wise (חֲכָמִים), as opposed to the unlearned (הֶדְיוֹט, *i.e.* the Gr. *ἰδιώτης*).[†] Yet the detailed statements contained in the Talmudic writings as to the instruction in these higher schools (בָּתֵּי הַמִּדְרָשׁ), and as to the organization of teachers and pupils, are not to be transferred *simpliciter* to the time of Christ, for without doubt the conditions subsequent to the destruction of the State must have influenced the development of things.[‡]

But there were other circles in which the higher education had a somewhat different character, inclining more towards the worldly culture of the time, as was the case in great measure with the Hellenistic Jews. As a matter of course, it was the nobility and the courtiers that favoured this culture. A good example of such an education presents itself in the person of Josephus, a scion of the leading temple aristocracy, related on his mother's side to the Hasmonæan royal family. According to his own account (*Vita*, 2 f.), he commenced even as a child to read the Law, and speedily made such progress that, when a boy of fourteen, he used to be consulted by the leading priests on points of interpretation of the Law. At the age of sixteen he began to study carefully the tenets and maxims of the three sects—the Sadducees, the Pharisees, and the Essenes; nay, he even lived for three years with a rigid ascetic in the desert, in order to put also this conception of life to the proof. When nineteen years old he decided to cast in his lot with the Pharisaic party, but he studied, further, the Greek language and literature. He had such a command of Greek that in his twenty-sixth year he was able to travel to Rome, where he obtained access to the Empress, who treated him with great consideration. He tells us, however, regarding his attainments in Greek, that, while he had made a thorough study of the language, his Jewish usages had hampered him in acquiring an exact pronunciation of it. 'It is not our way to accord any great appreciation to those who have learned many languages . . . for this is an accomplishment of which slaves are as capable as freemen. But those alone are regarded as wise who thoroughly understand the laws, and can expound the Holy Scriptures' (*Ant.* XX. xii. 2). That Josephus had difficulty, further, in the use of Greek in writing, is evident from the circumstance that, in preparing his history of the Jewish war, he availed himself of the help of colleagues who were proficient in Greek (*c. Apion.* i. 9). But he not only devoted himself to the study of the language, but, as his writings show, had read a very considerable number of Greek authors, besides being acquainted in some measure with Greek philosophy. Here, then, we see how, in the case of a Palestinian Jew of good family, a strictly Jewish education might be combined with a Hellenizing tendency.[*]

As to the ordinary stage of culture among the Jews, this was in general conditioned by their acknowledged dependence upon the Holy Scriptures. Here lay hidden all the treasures of wisdom for those who knew how to dig them up. While the Hellenistic Jews were under the influence of Greek philosophy, and made frequent attempts to discover in the Scriptures the ideas of foreign wisdom, the native exegesis was based essentially upon the text itself, whose many secrets it was sought to penetrate by an acuteness which displayed itself in the form of ingenious combinations of passages of Scripture. Nothing had any value whose presence could not be demonstrated in the Law and in the Scriptures. And yet the world of ideas in which these men moved was not so completely uninfluenced by foreign culture as they themselves may have imagined. Several centuries of contact with Parsism had not passed without leaving clear traces.[†] As little were the Palestinian Jews able to shut themselves off from the influence of the Greek spirit, by whose effects they were everywhere surrounded, and whose traces may be largely observed in the Palestinian Midrash.[‡] Yet all this worked quietly and unconsciously, and did not lead to any essential transformation of the Palestinian culture.

As far as a knowledge of *history* was concerned, there was naturally a disposition to abide by the information contained in the Bible; whereas there were only broken reminiscences of the events of the post-Biblical period. In this respect, indeed, a man like Josephus forms an exception, but he is likewise an exception among his Palestinian fellow-countrymen, and his great work on the history of Israel was intended not for Jews but for the rest of the world.[*]

---

[*] Later Jews deduced from the word 'sons' in Dt 11^{19} that the Law did not require the instruction of daughters (Bacher, *Die Agada der Tannaiten*, ii. 372).

[†] On the other hand, the phrase עַם הָאָרֶץ 'people of the land' is used in opposition to *Pharisees*, who were not all scribes.

[‡] Cf. Weber, *Jüd. Theologie*^{2}, 1897, p 125 ff.

[*] On the other hand, when Rabbi Ishmael was asked whether it was allowable to learn Greek wisdom along with the Law, he replied (in allusion to the words 'by day and by night,' Jos 1^{8}, Ps 1^{2} etc.): 'Only if thou canst find a time which is neither day nor night' (Bacher, *Die Agada der Tannaiten*, i. 262).

[†] Cf. E. Stave, *Ueber den Einfluss des Parsismus auf das Judentum*, 1898; also the art. ZOROASTRIANISM by J. H. Moulton in vol. iv. The Babylonian influence contended for, especially by Gunkel, is still somewhat problematical, and its extent is in any case not yet demonstrated.

[‡] Cf. Freudenthal, *Hellenistiche Studien*, 1875, p. 66 ff.; Siegfried, *Philo von Alexandrien*, 283 ff.

Of an acquaintance with *natural science* we can scarcely speak. The Book of Enoch, it is true, occupies itself in detail with cosmological and astronomical secrets, and shows, amidst a multitude of fantastic notions, a knowledge of the twelve signs of the zodiac, the regular phases of the moon, the solar and lunar years, perhaps the 8-year cycle of the Greeks, the four intercalary days, and it contains also some geographical allusions (chs. 72 ff.). But this must be viewed as peculiar to a few writers, and not as the standard of the prevailing culture. At all events, in a letter of R. Gamaliel II.[†] the intercalating of 30 days into the current year is justified on the ground that the lambs are still small, and the crops not yet ripe. On the 30th day of each month the Sanhedrin met, and, if it was then announced to it that the moon-crescent was visible, the day was marked as holy, so that the preceding month had only 29 days counted to it. If the day was cloudy, the new moon was not reckoned to commence till the following day.[‡] Geographical knowledge was enlarged by the journeys of Jewish merchants, but yet was in general superficial and vague.[§]

Medicine was upon a primitive basis. The mild and sensible Ben Sira exhorts his readers not to despise the physician's help, since the Lord has created medicines out of the earth, which the apothecary knows how to mix and the physician how to apply (Sir $38^{1\text{ff.}}$). The healing powers of the various hot springs of Palestine had been discovered, and they were largely taken advantage of (Jos. *Vita*, 16; *Ant.* XVII. vi. 5). But the conception of diseases was still essentially a purely religious, or, in most instances, a superstitious one, so that in the treatment of them all kinds of magical methods took a prominent place. In general, the belief in magic played no mean rôle amongst the Jews, although it was forbidden in the Law. This was a sphere in which the Law was powerless to control the notions of men.[‖] See art. MAGIC in vol. iii.

It was only in the sphere of *religion* that the standard of popular education was high, and it was regarded as extremely important to see that this should be so. While the cultus was essentially the concern of the priests, there had been for long established all over the land synagogues, where religious instruction was attended to and the people acquired an acquaintance with the holy Scriptures (Ac 15^{21}). The synagogue building (בֵּית הַכְּנֶסֶת, *συναγωγή* or *προσευχή*) contained a press where the sacred writings were kept, and an elevated place where the reader stood. The service was introduced by repeating the passages Dt $6^{4\text{-}9.\ 11.\ 13\text{-}21}$, Nu $15^{37\text{-}41}$; then came a prayer spoken by a member of the congregation, to the accompaniment of the 'Amen' and other responses by the people. This was followed by the lesson from the Law, which was read by several members, preferably priests or Levites, and translated into Aramaic, verse by verse, by an interpreter (מְתוּרְגְּמָן). Next came the reading of a section from the Prophets, which was translated in the same way (Lk 4^{17}, Ac 13^{15}). To this reading there was attached a sermon, during the delivery of which the speaker was accustomed to sit, whereas the readers stood (Lk $4^{20\text{ff.}}$). The service closed with the benediction (Nu $6^{22\text{ff.}}$), which was pronounced by a priest. The principal service was that of Sabbath forenoon, but there were less elaborate services also on Sabbath afternoon and on some week days. Lastly, Divine service was celebrated on all feast days. In this way those of the people who felt that they formed a community had abundant opportunity given them of making acquaintance with the Scriptures and of receiving instruction and edification. It is worthy of note how in this matter there is a retrocession of any privileged class, the service being of quite a democratical character. Even if a preference was given to priests in the reading of the Scriptures, this function could be discharged by others as well, while the delivery of the address was open to any member of the congregation, or any qualified visitor who happened to be present (see art. SYNAGOGUE, vol. iv. p. 641^{b}).

The above account of things applies, properly speaking, only to the men. But if we would have a complete picture of the stage of culture among the Jews, we must face the question of how it stood with the women. There is a want of historical data here, but certain characteristic features come out. For instance, we learn from Josephus (*Ant.* XVII. ii. 4) that the Pharisees exercised great influence over women, a circumstance which proves that the latter felt an interest in party questions and themselves took sides. Thus even queen Alexandra allowed herself, contrary to all the traditions of the Hasmonæans, to be guided by the Pharisees. The Gospels show us how deep was the religious interest on the part of women, and how receptive they were to the teaching of Jesus. On the other hand, evidence of the slender culture of women is afforded by the circumstance that it was they especially that devoted themselves to magical arts, so that even women of noble birth were at times accused of sorcery.[*]

vii. ART AND LITERATURE.—With the Jews the first place among the fine arts is held by *music*, because this had entered into the service of religion. The temple musicians formed a guild, in which the technique and the understanding of the numerous technical expressions were hereditary, not being communicated to outsiders—a circumstance which explains why these expressions, when they occur in the Psalms, especially in their titles, were unintelligible to the Greek translators of the LXX.[†] The members of this guild, who were not at first (Ezr $10^{23\text{f.}}$, Neh $7^{1.\ 73}$) reckoned among the Levites, had been by the time of the Chronicler (1 Ch $6^{33\text{-}47}$) included in this class of temple officials, and shortly before the destruction of the State they obtained, by the aid of Agrippa II., the right of wearing the same linen garments as the priests—an innovation which, according to Josephus (*Ant.* XX. ix. 6), contributed to bring about the punishment of the people. The pieces that were sung were the Psalms of the Old Testament. The whole of these were not, indeed, adapted to this purpose (*e.g.* Ps 119), but in the case of a large proportion of them there is ancient testimony to their liturgical use. The Psalms were sung by the official singers, the people struck in only with certain responses. The singing was accompanied by harps, zithers, flutes, and cymbals, although, unfortunately, we are not informed as to the exact form of procedure either with the singing or the instrumental accompaniment.

---

[*] How inconsiderable were the historical recollections in the Rabbinical literature is shown in Dérenbourg's *Essai sur l'histoire, etc. de la Palestine*, 1867.

[†] To be found in Dalman's *Aramäische Dialektproben*, 1896, p. 3.

[‡] It was not until about 200 years after the destruction of Jerusalem that the Jews began to fix the new moon on astronomical grounds. See Riehm, *HWB* ii. 1094, and cf. art. NEW MOON in vol. iii. p. 522^{b}, and TIME in vol. iv. p. 764^{a}.

[†] Cf. Jacob in *ZATW* xvi. (1896) 171.

The trumpets blown by the priests would not belong to the orchestra proper, but would serve simply to mark fixed points in the service. How early the liturgical system was developed may be inferred partly from the statements of the Chronicler and partly from the very graphic description in Sir 50. But the Psalms were sung also outside the temple, especially at the Paschal meal in private houses (Mt 26[30]). Alongside of this sacred music there was also a secular species, which was used especially to accompany the popular dance (Mt 11[17]). The Israelites, in fact, had always been a music-loving people, with whom this exercise was resorted to on all occasions either of rejoicing or of mourning. The height to which popular poetry had risen among them is evident above all from the Song of Songs, which points back to the songs sung at wedding celebrations.

On the other hand, the *plastic arts* were completely forbidden to the Jews, in so far at least as they had to do with the representation of any living creature. When Pilate on one occasion, forgetting the consideration for Jewish scruples usually shown by the Procurators, caused standards emblazoned with pictures of the Emperor to be brought to Jerusalem, the popular feeling was so violently excited that after a while he ordered the offensive emblems to be removed (Jos. *Ant.* XVIII. iii. 1). The golden eagle which Herod had placed over one of the gates of the temple was an abomination to strict Jews, and a number of fanatics, upon the occasion of a false report of the king's death, tore it down—an act for which they were themselves punished with death (*ib.* XVII. vi. 2). Those of high rank, indeed, set themselves above the strict custom in such matters. The Hasmonæan queen Alexandra caused portraits of her children, Aristobulus and Mariamne, to be painted and sent to Antony (*ib.* XV. ii. 6). Agrippa I. had statues made of his daughters (*Ant.* XIX. xix. 1). In the non-Jewish cities both Herod and his successors played the part in general of decided patrons of Greek art. In Cæsarea on the coast, and in other towns, they caused temples and theatres to be erected. Nay, Jerusalem itself did not escape, for Herod had a theatre and a hippodrome constructed in it, to the great offence of the strict Jews. The same course was pursued by Herod Antipas at Tiberias, which assumed quite the stamp of a Greek city (see above, p. 47[a]). The Jews thus made acquaintance with Greek architecture mainly as an element in heathen civilization, and on this account the splendid pile of temple buildings at Jerusalem was not an unmixed source of joy to the strict party. That there were some Jews, however, who availed themselves of this art is shown by the sepulchral monuments in the Kidron valley, one of which, according to the inscription, belonged to a priestly family.

The Jewish *literature* that has come down to us from this period, with the single exception of the historical works of Josephus,[*] is composed in the interest of religion. Shortly before the Maccabæan era, the Book of Sirach, a collection of rules of conduct and *Ḥokhma* teachings, was written. From the Maccabee period itself we have the Book of Daniel, some of the canonical Psalms, and probably also the Book of Ecclesiastes, the beast-vision in the Book of Enoch (chs. 83–90), the First Book of Maccabees (*c.* 100 B.C.), the strongly anti-Hasmonæan passage Enoch 91–105, while the Psalms of Solomon belong to the time of the overthrow of the Hasmonæans. The rest of the Book of Enoch is also possibly all pre-Christian. The Assumption of Moses appears to have been composed shortly after the death of Herod the Great. On the other hand, neither of the two extremely important Apocalypses of Baruch and Ezra was composed till after the destruction of the Jewish State—that of Ezra under Domitian (A.D. 81–96), that of Baruch apparently somewhat earlier. There are, further, the legends of Tobit and Judith, the Book of Jubilees (a midrashic recension of Genesis), and the Martyrdom of Isaiah, which cannot be dated with certainty, but all belong to the period under consideration.

As regards the estimation in which this literature was held at the time, some writings, namely Daniel, Ecclesiastes, and the 'Maccabæan' Psalms, were received into the Canon of the Pharisees, which afterwards became the only authoritative one. The Book of Sirach was not, indeed, canonized, but enjoyed high esteem, and is not infrequently cited by the Talmudic teachers, so that even the original Hebrew text of this work survived, and has recently been recovered in large part. See art. SIRACH in vol. iv. The Psalms of Solomon emanated, beyond doubt, from the heart of the Pharisaic circle, and so frequently remind us of the canonical Psalms that it is a matter of surprise that their original text has completely disappeared. The rest of this literature, on the other hand, was afterwards disavowed by Palestinian Judaism, and hence we make acquaintance with it only in translations which circulated in Hellenistic circles. It is difficult on this account to say how these writings, above all the apocalyptic portions of them, were regarded at the time by the proper representatives of Judaism. The Apocalypse of Ezra itself claims to be a work of mystery to be read only by the initiated.[*] And the same is true, no doubt, in part of the other Apocalypses, with their many secrets.[†] On the other hand, they not only obtained currency among the Hellenistic Jews, but their world of thought comes in contact on the one side with the New Testament, and on the other, in spite of essential differences, with the late Jewish literature, in such an unmistakable fashion as to show that they must have been widely read. Even if it should be held that these coincidences are due, not to direct use of these writings, but to a common world of thought, with which the people were familiar and on which the literature in question also shows its dependence, our view of the then existing Judaism would have to be modified all the same; for then we should have to employ for its reconstruction not only the characteristic features of the official Torah study, in conjunction with the survival of the pure and inward spirit of the OT in some circles, but also the mystical sphere of ideas, with its descriptions of the world beyond and its numerous attempts to burst the barrier created by the national limitations of Judaism. Here we have a difficult task, but one that is of extreme importance for the correct appreciation of Christianity, and for the accomplishment of which the necessary preparations have only been commenced.[‡]

viii. THE JEWS OF THE DIASPORA.—As long as the existence of the post-exilic Jewish State in Palestine continued, the Jewish communities of the Diaspora were thrown into the shade by it. Nevertheless, developments and transformations took place amongst these, which were of the greatest significance both for Judaism itself and for Christianity. At the time of Christ there were Jewish communities in every considerable town of the world. Originally, the Jews had been forcibly transported to foreign lands: by the Assyrians and Babylonians to the Euphrates districts, by Artaxerxes Ochus to Hyrcania, etc.; or they had taken their flight abroad from fear of their enemies: so, for instance, those Jews who fled to Egypt after the murder of Gedaliah (2 K 25^{26}, Jer $41^{17\text{ff.}}$). But afterwards they migrated, in ever-increasing numbers, to various countries and settled there, partly, it may be, because they were dissatisfied with the conditions at home, partly because great material advantages were offered them in foreign parts. The chief centres were the Euphrates districts, Syria, and Egypt;[*] but there were also many Jews settled in the other Mediterranean lands, and it may be presumed that in NT times there was a large Jewish community in Rome. Of all the cities inhabited by Jews the most important was Alexandria, for here they were not only so numerous that two of the five districts of the city were called 'the Jewish,' but they came into contact here especially with the Hellenistic world of thought, and allowed themselves to be strongly influenced by it.

---

[*] The historical work of Josephus' contemporary, Justus of Tiberias, is lost.

[*] 2 Es 12[37f.] 'Write all this in a book, and put it in a secret place, and teach the wise of thy people, of whom thou art sure that they are able to comprehend and keep these secrets.'

[†] The Assumption of Moses appears to have originated in Zealot circles.

[‡] Cf., among others, Dalman, *Worte Jesu*, 1898 [Eng. tr. 1902]; Wellhausen, *Skizzen und Vorarbeiten*, vi. 225 ff.; Baldensperger, *Das Judentum als Vorstufe des Christentums*, 1900.

An essential factor in the life of the Jews of the Diaspora was the free exercise of their religion, which was allowed them in the time of the *Diadochi* and under the Roman domination. Things went best with them in places where they lived as an independent body with State recognition, whereas, in those lands or cities where they simply enjoyed equal rights of citizenship with others, they readily came into collision and conflict with the heathen population. Amongst their privileges must be reckoned also the possession of a jurisdiction and a coinage of their own. The latter in particular was of importance, for thus alone were they in a position to pay the poll-tax to Jerusalem. On other points the constitution and organization of Jewish communities differed in different countries.

The religious instruction of the Jews of the Diaspora was based, like that at home, upon the regular service of the synagogue, there being one or more synagogues wherever Jews were settled. In Hellenistic circles the Septuagint played the same part as the Hebrew text in the mother country, being without doubt used in the reading of the Scriptures, as acquaintance with Hebrew must have been rare on the part of Jews living abroad. See, further, art. DIASPORA in the present volume, p. 91 ff.

The Jewish-Hellenistic literature, owing not only to its being written in the Greek language, but to its being more or less interpenetrated with the Greek spirit, and its use of the Greek literary forms, has a different stamp from the Palestinian. Leaving out of account the Alexandrian expansions of some books of the OT, we may classify this literature under the three heads of History, Poetry, and Philosophy.

A number of writers treated the ancient Jewish *history* in a modernizing fashion, in order thereby to claim for it the interest of the foreign world of readers. In addition to some fragments, of which those of Eupolemus, owing to their peculiar syncretism, are the most notable, we have to mention here especially the *Antiquities* of Josephus, a work which for the reasons mentioned above must be assigned to the Hellenistic rather than to the Palestinian literature. Other authors made the immediate past the subject of their narratives. Thus the so-called Second Book of Maccabees is an extract from the extensive work of Jason of Cyrene on the Maccabæan rising. The most valuable of these writings is Josephus' account (*BJ*) of the great revolt of the Jews against the Romans, to which are attached certain portions of his autobiography. An ill-natured attack upon the Jews led Josephus, further, to compose an apologetic work (*c. Apion.*), having for its aim to exhibit the high antiquity of Judaism. To the class of literary forgeries belongs the so-called Letter of Aristeas, in which a Jewish author makes a heathen relate the story of the origin of the Septuagint. The same is the case with a 'tendency' recension of a work on the Jews by Hecatæus, the reviser of which put forth his composition under the name of the Greek historian.

As regards the employment of *poetry*, we have, first of all, the remarkable attempts to transfer the forms of the epos and the drama to the realm of Jewish history. There are, for instance, fragments of an epic presentation of the history of Jerusalem by a Philo, and a drama by an Ezekiel, whose subject is the Exodus. To the same category belong also the verses put by Jewish poets into the mouth of the ancient oracle-giving Sibyls, and which mark the apocalyptic tendency that was so prominent in Palestinian, but less so in Hellenistic, circles. See below, p. 66 ff.

Most important of all are the writings which are more or less influenced by Greek *philosophy*. The only independent Jewish thinker is Philo, who plays no unimportant rôle in the history of philosophy. The others assume an eclectic attitude towards the various Greek schools, and aim only at bringing their ideas into harmony with those of Judaism, several of them seeking at the same time to justify their dependence on Greek thinkers by maintaining that the latter originally borrowed from the Mosaic Law. The principal expedient to which these authors resort in order to harmonize the heterogeneous elements, is the allegorical interpretation of the Law and the Jewish history.[*] To this category belong the writings of Aristobulus (2nd cent. B.C.), of which only fragments are extant; the Stoicizing work on the authority of reason (the so-called Fourth Book of Maccabees); and the writings of Philo. A transition to this species of literature is exhibited by the Book of the Wisdom of Solomon, which, in spite of Gr. influence, still reminds us strongly of the Pal. *Hokhma* literature. Cf., further, artt. WISDOM in vol. iv., and PHILO, below, p. 197 ff.

LITERATURE (in addition to works on the history of Israel or of the Jews).—Schneckenburger, *Vorlesungen über neutest. Zeitgeschichte*, 1862; Hausrath, *Neutest. Zeitgeschichte*^{2}, 1873–77 [3rd ed. 1879 (Bd. i.)]; Wellhausen, *Die Pharisäer und Sadducäer*, 1874; Raphall, *Post-biblical History of the Jews*, 1856; Stapfer, *La Palestine au temps de Jésus-Christ*, 1885, *Les idées religieuses en Palestine à l'époque de Jésus-Christ*^{2}, 1878; Baumgarten, 'Der national-jüdische Hintergrund der neutest. Geschichte' (in *JDTh*, 1864–65); Wieseler, 'Beiträge zur neutest. Zeitgeschichte' (in *SK*, 1875); Langen, *Das Judenthum in Palästina zur Zeit Christi*, 1866; Edersheim, *The Life and Times of Jesus the Messiah*, 2 vols., 1883; Schürer, *GJV*^{3}, 3 vols. and Index vol., 1898-1902 [Eng. tr. (*HJP*) from 2nd ed.]; Holtzmann, *Neutest. Zeitgeschichte*, 1895. For a fuller Bibliography the reader may consult the work of Schürer.

FRANTS BUHL.

TALMUD.—The *Talmud* (תַּלְמוּד), meaning a 'teaching,' an 'inference,' or a 'doctrine,' is a term commonly applied to a collection of works embodying the Oral Law—תּוֹרָה שֶׁבְּעַל פֶּה, lit. 'the Torah by mouth'—handed down to the Jews by way of Tradition, in contradistinction to the Written Law —תּוֹרָה שֶׁבִּכְתָב, lit. 'the Torah in writing.' The origin of this Tradition is unknown: the common view of the mediæval authorities, claiming the same Mosaic authorship and high antiquity for it as for the Scriptures, is uncritical. But, as it is closely connected with the history and development of the hermeneutics of the Scriptures, its commencement may safely be dated back to the exilic period in which was first established the institution of the Synagogue, whose main function consisted in teaching and interpreting the word of God. The Hebrew term for 'interpretation' is *Midrāsh* (מִדְרָשׁ, cf. 2 Ch 13^{22}); and this term, like the Rab. term *Ḳabbālā* (קַבָּלָה, matter received by way of Tradition), which includes the Prophets and the Hagiographa, may likewise, perhaps, be applied to certain portions of the canonical writings, *e.g.* Chronicles. The prominent feature of the *Midrāsh*, however, as an instrument for enlarging upon and expanding the word of the Scriptures, is best discernible in the ancient Rab. productions, which, in spite of some hyperbolical expressions, provoked by heat of controversy, never seriously aspired to the dignity of Scripture. As a consequence, they for the most part properly kept apart text and interpretation, and thus clearly showed the process of expansion. The results gained by this method varied in their character with the nature of the Scripture passages, according as they were legal and ritual, or spiritual and homiletical. The former classes are comprised under the name *Hălākhā* (הֲלָכָה), signifying guidance, a rule of practice, a legal decision; and the term extends also to the usages, customs (*Minhāgîm* מִנְהָגִים), ordinances (*Tĕḳānôth* תְּקָנוֹת), and decrees (*Gĕzērôth* גְּזֵירוֹת), for which there is little or no authority in the Scriptures. The latter (spiritual and homiletical) are classified under the term *Haggādā* (הַגָּדָה, Aram. אַגָּדָה),[*] meaning a tale, a narrative, an explanation, a homily; and the term includes also the gnomic lore of the Rabbis, as well as stories and legends bearing upon the lives of post-biblical Jewish saints. Such topics as astronomy and astrology, medicine and magic, theosophy and mysticism, and similar subjects, falling mostly under the heading of folk-lore, pass as a rule also under the name of *Haggādā*.

---

[*] Philo estimates the number of Jews in Egypt at about a million (ed. Mangey, ii. 523).

[*] An interesting attempt to demonstrate the reasonableness of the laws about food is found in the Letter of Aristeas, 142 ff.

The schools active in this work of the interpretation and expansion of the Scriptures extend over many centuries, and are known under various designations, each designation marking in succession a different period.

i. The *Ṣôphĕrîm* (סוֹפְרִים), 'Scribes,' commencing with Ezra and going down to the Maccabæan period (450–100). Scarcely anything is known of their literary activity; the term 'Words of the *Ṣôphĕrîm*' (דִּבְרֵי כוֹפְרִים) is used indifferently by the Rabbis of *Hălākhôth* dating from various ages, and implying in most cases not the *authorship* of, but the *authority* for, certain given statements. Less vague are the Rab. references to the 'Men of the Great Assembly' (אַנְשֵׁי כְנֶסֶת הַגְּדוֹלָה) and 'their Remnant' (שְׁיָרֵי א׳ כנס׳ ה׳), thought by some scholars to be identical with the *Ṣôphĕrîm*, or at least to have formed the executive of the latter.[†] To these are attributed not only certain sayings, suggestive, among other things, of their teaching activity (as 'Raise many disciples,' M. *'Ābôth* i. 1), but also many ordinances and decrees, the most important of which are those bearing upon the arrangement and the completion of the Canon of the OT, the reading of the Law on certain days of the week, the fixing of the daily prayers (probably in six benedictions now embodied in the so-called Eighteen Benedictions, שְׁמוֹנֶה עֶשְׂרֵה), and the introduction of the saying of grace after meals. The custom of pouring libations of water at the Feast of Tabernacles, and going in procession round the altar with branches of willow trees, declared by some Rabbis to have been introduced by the prophets, as well as the so-called 'Laws unto Moses from Mount Sinai' (amounting to the number of forty-three, more than a third of which refer to the preparation of the phylacteries), may also have dated from those *ṣopheric* times, remoteness of assigned date pointing, as a rule, to the pre-Maccabæan period.[*]

ii. The *Zûgôth* (זוּגוֹת; Gr. ζυγόν), 'Pairs,' a name given to the leading teachers that flourished between the Maccabæan and the Herodian period (*c.* 150–30). Five such 'Pairs' are recorded in the Rab. literature, extending over 5 generations, and succeeding each other in the following order: 1. Joṣe b. Joezer of Ẓereda and Joṣe b. Johanan of Jerusalem; 2. Joshua b. Peraḥya and Nittai of Arbela; 3. Jehuda b. Ṭabbai and Shim'on b. Shetaḥ; 4. Shema'ya and 'Abṭalyon; 5. Hillel and Shammai.[†] According to tradition each 'Pair' represents the heads of the Sanhedrin of their age, the one whose name occurs first in the list serving in the capacity of *Nāsî* (נָשִׂיא), 'Prince *or* President' of the Sanhedrin, the other in that of *'Ab Bêth Dîn* (אַב בֵּית דִּין), 'Father of the House of Judgment,' or 'Vice-President.' This tradition is contested by many modern scholars as incompatible with the statements of Josephus and of the New Testament, according to which the high priest for the time being was *ex officio* the president of the Sanhedrin. But, whatever their particular function and title were, the existence of the 'Pairs' as the heads of a religious corporation to which the large bulk of the nation belonged, and which thus formed an important factor in the development of the Oral Law, cannot well be doubted.[‡] To them are attributed not only various *Haggadic* sayings (M. *'Ābôth* i. 4–15), but also *Halakhic* statements as well as certain ordinances and decrees. It was under the first 'Pair' (also called *'Eshkôlôth* אֶשְׁכּוֹלוֹת [? identical with the Gr. σχολή], a title that disappears with them) that, according to the testimony of the Rabbis, the first difference of opinion regarding the performance of certain religious practices occurred between the sages. The *Hălākhôth* attributed to Joṣe b. Joezer, the first named of this 'Pair,' as well as the ordinances and decrees ascribed to him and to his colleague of the first 'Pair,' were apparently composed in his age, the language of the *Hălākhôth* (Aramaic [M.

---

[*] See Bacher in *JQR* iv. 406 ff.

[†] See Weiss, *Dor Dor W'Dorshow*, i. p. 54; Kuenen in his essay, 'Über die Männer der grossen Synagoge' (occupying pp. 125-160 of the *Gesammelte Abhandlungen zur Biblischen Wissenschaft von A. Kuenen*, Freiburg and Leipzig, 1894), contests the existence of such an assembly (cf. also art. SYNAGOGUE [THE GREAT] in vol. iv., and the Literature cited at the end of that article); whilst D. Hoffmann (*Magazin für die Wissenschaft des Judentums*, x. 45 ff.) and S. Krauss (*JQR* x. 347 ff.) try to refute his argument. On the whole, the present writer is inclined to admit that there is an element of truth in this tradition regarding the Great Assembly. The Judaism which emerges suddenly after this nebulous period is essentially a product of the Synagogue. It is hard to see how it could ever have thriven under the care of the historical priests or the cosmopolitan *Ṣôphēr* of the moderns; and such a Synagogue would most naturally have developed under the auspices of an authority which acted in conformity with the spirit of the ordinances, decrees, and teachings attributed by the Rabbis to the men of the Great Assembly.

[*] See Weiss, *ib.* p. 66. The high priest Simon the Just (probably Simon I., *c.* 300 B.C.) is supposed to have belonged to this Remnant, but the saying recorded in his name is really *ṣopheric* in its character: 'On three things the world is stayed: on the Torah, and on the Worship, and on the bestowal of Kindnesses' (M. *'Ābôth* i. 2). Of his successor (2nd in the *ṣopheric* line), whose name Antigonos of Sokho shows already a marked Hellenistic influence, only the following saying is known: 'Be not as slaves that minister to the lord with a view to receive reward, but be as slaves that minister to the master without a view to receive reward' (M. *'Ābôth* i. 3). This saying, which has a certain Stoic savour about it, is supposed to have given rise to two heretical sects.

[†] See C. Taylor, *Sayings of the Jewish Fathers*^{2}, p. 14, note 9, for the chronology.

[‡] For Literature on this point, see Schürer, *GJV*^{3} ii. p. 188 ff. Of special importance are Kuenen, *l.c.* pp. 49–81; Hoffmann, *Die Präsidentur im Synedrium Mag.* v. 1878, pp. 94–99; and Jelski, *Die innere Einrichtung des grossen Synedrion*, etc. Wellhausen's *Die Pharisäer und Sadducäer* must be taken with great caution, as his command of the Rabbinic sources is imperfect.

'*Ēdûyyôth* viii. 4]) and the subject of the ordinances and decrees (Levitical purity) being both signs of antiquity. Shim'on b. Shetaḥ of the third 'Pair' is credited with having introduced several important reforms in various religious departments, whilst Shema'ya and 'Abṭalyon were called the 'Great Ones of the Generation' and the 'Great Interpreters' (דַּרְשָׁנִים גְּדוֹלִים). The most important 'Pair,' however, are Hillel (the Elder) and Shammai (the Elder), in whose names more *Hălākhôth* are recorded than of any other 'Pair'; they were also the founders of two great schools (*Beth Shammai*, *Beth Hillel*, בֵּית שַׁמַּאי, בֵּית הִלֵּל, 'the House *or* School of Shammai' and 'the House of Hillel') which continued the work of their masters for some generations. Hillel, a native of Babylon and (according to tradition) a descendant of the house of David, was particularly famous for his meekness and humble-mindedness. Among other things he is reported to have said, 'Be of the disciples of Aaron, loving peace and pursuing peace, loving thy fellow-creatures, and drawing them near to the Torah' (M. '*Ābôth* i. 12); whilst he also taught to a heathen, seeking admission into Judaism, 'What is hateful to thyself do not to thy fellow-man; this is the whole Torah, the rest is only commentary' (*Shabbath* 30*b*). Shammai's saying was, 'Make thy Torah a fixed thing, say little and do much, and receive every man with a cheerful countenance' (M. '*Ābôth* i. 15); but he was not particularly famous for his gentle temper. The most marked feature about these two leaders is their activity as interpreters of the Law and their application of the results of this interpretation to practice. Thus Shammai presses the words עַד רִדְתָּהּ ('until it be subdued,' Dt 20^{20}) to mean that the act of subduing a hostile place must not be interrupted even on account of any religious consideration, and thus he permits the continuing of a battle even on Sabbath (*Shabbath* 19*a*). Hillel, by subjecting the term בְּמוֹעֲדוֹ ('in its season,' Nu 9^2) to the interpretatory 'rule of analogy,' inferred from it the *Hălākhā* that the duty of sacrificing the Paschal lamb overrules all consideration of Sabbath, when the 14th of Nisan falls on the 7th day of the week (*Pěṣāḥîm* 66*a*).* Indeed it was Hillel who first framed the Rules of Interpretation, seven in number (Introduction to the *Tôrath Kōhănîm*), and which developed later into thirteen and more.

iii. The *Tannaim* (תַּנָּאִים), 'Teachers,' the name given to the authorities living during the first two centuries of the Christian era (*c.* 10–200), commencing with the schools of Shammai and Hillel and terminating with R. Jehuda the Patriarch, a great-grandson of Hillel. The period of the *Tannaim*, most of whom bear the title *Rabbi* (רַבִּי 'my Master,' but losing later its pronominal signification) or (more rarely) *Rabban* (רַבָּן 'Master'), may conveniently be divided into four successive generations, the principal men of which are—

First Generation (10–80).—The 'schools of Shammai and Hillel,' comprising many teachers whose names have not come down to us. The underlying principle dividing these schools on many important points is not known; but on the whole the school of Shammai may perhaps be characterized as staunch conservatives in their adherence to Tradition, who allowed little room for the play of interpretation, and were as a rule very rigorous in their decisions; whilst the school of Hillel, already described by the old Rabbis as 'pleasing and meek,' were more inclined to compromise in their teaching, greatly given to the developing of the *Midrash*, and in general less severe in their *Halakhic* dicta. The most important of those known by name are Rabban Gamaliel the Elder, and Rabban Joḥanan b. Zakkai, both of the school of Hillel. Gamaliel, a son (some say a grandson) of Hillel, is known for various reforms introduced by him, as well as for the part he took in the trial of the Apostle Paul (Ac 5^{34-39}); whilst Joḥanan was equally famous as one of the leaders of the peace party in the war against the Romans (66–70), and as the founder of the Academy of Jamnia, which became the centre of Jewish life and thought after the destruction of the temple.

Second Generation (90–130).—Rabban Gamaliel II., President of the Academy of Jamnia after the death of R. Joḥanan [having been rather autocratic in the treatment of his colleagues he was removed from his office for a time, but soon after restored to it]; R. 'Eliezer b. Jaḳob I., who was considered a great authority in traditions regarding the structure and the arrangement of the service in the temple; R. 'Eliezer b. Hyrḳanos, a brother-in-law of R. Gamaliel, and the head of a school in Lydda [though a disciple of R. Joḥanan b. Zakkai, of the school of Hillel, he cherished Shammaitic principles, which fact brought him into collision with the majority of his colleagues, and subsequently led to his excommunication]; R. Jehoshua b. Ḥananya, likewise a disciple of R. Joḥanan b. Zakkai, but unlike his colleague, R. 'Eliezer, with whom he had many controversies, of a humble and submissive disposition; R. 'Eliezer b. 'Aẓarya, who derived his pedigree from Ezra the Scribe, and who obtained the office of President of the Academy of Jamnia when R. Gamaliel was deposed. To the younger teachers of this generation belong R. Ṭarphon, of the school of Shammai (?), who had attended the service in the temple; R. Joṣe of Galilee, who had controversies with R. Ṭarphon and other *Tannaim*; R. Ishmael b. 'Elisha, best known for his thirteen Rules of Interpretation (see above). Together with other members of the Sanhedrin he emigrated from Jamnia to Usha, where he founded a school called after his name, to which various *Midrashim* are attributed. R. 'Aḳiba b. Joṣeph, a disciple of several older teachers of this generation, was master of most of the distinguished Rabbis of the next generation, and not less famous for his skill in systematizing the content of tradition than for his ingenious methods of interpretation, which enabled him to find a basis for all the enactments of the Oral Law in the Scriptures. This fact, together with the circumstance of his patriotic zeal and his martyr death in the Hadrianic persecutions (*c.* 130), made him the most famous of the *Tannaim*. To this generation belong also the older disciples of R. 'Aḳiba—Shim'on b. 'Azai and Shim'on b. Zoma—best known for their moralizing sayings and mystical tendencies (in the direction of a Jewish gnosis) which they shared with their master, but from which, unlike the latter, they did not escape without injury. 'The one gazed (into the chambers of heaven) and died, and the other gazed and was not in his mind.' Their contemporary 'Elisha b. 'Abuyah, also called 'Aḥer (the Other One), was less happy than these, for he 'gazed' and 'cut the branches,' that is, became an apostate.

Third Generation (130–160).—The disciples of R. Ishmael, of whom only two are known by their names (R. Joshia and R. Jonathan), whilst the others are usually quoted as 'the Tanna of the school' of R. Ishmael. The younger disciples of R. 'Aḳiba are R. Meir, who continued the systematizing labours of his master, and is thus supposed to have laid the foundation of a Mishna; R. Jehuda b. 'Ilai, who is called 'the first of the Speakers'; R. Shim'on b. Yoḥai, of whom R. 'Aḳiba said, 'Be satisfied that I and thy Maker know thy powers'; R. Neḥemiah, to whom, as to the two last-mentioned Rabbis, various *Tannaitic* compilations are attributed; R. 'Eleazar b. Shamua, round whom the greatest number of disciples gathered, and R. Joṣe b. Ḥalaphta, to whom the book *Ṣeder 'Olam* (סֵדֶר עוֹלָם), containing a chronology of events and personages in the Bible, is attributed. Abba Shaul, compiler of a Mishna, and the Patriarch R. Shim'on II. b. Gamaliel II., are also included in the third generation.

---

* For the historical and theological significance of this method of interpretation, see Chwolson, *Das letzte Passamahl Christi und der Tag seines Todes* (St. Petersburg, 1892), p. 20 ff.

Fourth Generation (160–220).—R. Nathan Habbabhli, who emigrated from Babylon to Palestine, and there held under the last-mentioned Patriarch an office in the Sanhedrin the nature of which is not quite known; Symmachos, the disciple of R. Meir, and a great authority in matters of civil law; and various other *Tannaim*, sons and disciples of the authorities of the preceding generation. The most important among them is the Patriarch R. Jehuda Hannasi, also called *Rabbênû hakḳādôsh* (רַבֵּינוּ הַקָּדוֹשׁ), 'Our Master, the Saint,' but more frequently *Rabbi*, 'the Master,' without adding his name. He was the son of the Patriarch R. Shim'on II., and the disciple of R. Shim'on b. Yoḥai, and of R. 'Eleazar b. Shamua; he presided over the Sanhedrin, which during this generation was, as it would seem, a migratory body, shifting from place to place, from Usha to Beth-shearim, and thence to Sepphoris and Tiberias. This R. Jehuda is said to have maintained friendly relations with the Roman authorities of Palestine at that period. This fact, as well as the circumstances of his noble birth, great wealth, official position, saintly character, and his mastery of the contents of the Oral Law, gave him an authority over his contemporaries never enjoyed by any other *Tanna*, and gathered round him a band of distinguished disciples and colleagues which rendered possible his work as compiler and codifier of the Mishna.*

The literary productions of all these generations of *Tannaim*, as well as of their predecessors the 'Pairs' and the *Ṣôphĕrîm*, both in *Hălākhā* and in *Haggādā*, are, as far as they have been preserved, embodied in the following collections.

The **Mishna** מִשְׁנָה† (from שָׁנָה), meaning a 'teaching,' a 'repetition,' is a designation most appropriate for a work generally looked upon as the main depository of the contents of the Oral Law, which (in contradistinction to מִקְרָא, reading matter, or the Scriptures) could be acquired only by means of constant repetition. This work, compiled (apart from some later additions) by R. Jehuda the Patriarch, is divided into 6 Orders (שִׁשָּׁה סְדָרִים=ש״ס), each of which contains several *Maṣṣikhtôth* (מַסֶּכְתּוֹת, sing. מַסֶּכֶת (Aram. מַסֶּכְתָּא), derived from נָסַךְ, meaning 'to weave'; cf. the Latin *textus*), or 'texts' (but more commonly called 'tractates'), whilst each tractate is divided into *Pĕrāḳîm* (פְּרָקִים, sing. פֶּרֶק), 'joints' or 'sections,' each of which, in its turn, consists of so many *Hălākhôth* (in the sense of paragraphs). The number of the tractates is 63 (or, in another enumeration, 60), bearing the following titles, which are suggestive more or less of their varied contents, though extraneous matter that is in no way indicated by the title is everywhere introduced:—

I. ZĔRĀʿÎM, זְרָעִים 'Seeds.'

1. *Bĕrākhôth*, בְּרָכוֹת 'Benedictions,' treating of laws and regulations relating to the liturgy. 9 chapters.
2. *Pēʾā*, פֵּאָה 'Corner,' treating of the laws relating to the corner of the field and the forgotten sheaves, etc., to be left for the poor (Lv 19^{9}, Dt $24^{19. 21}$). 8 chapters.
3. *Dammai*, דַּמַּי (also דְּמָאי) the 'Doubtful,' respecting corn and other productions of the earth, of which it is doubtful whether the prescribed tithes had been paid. 7 chapters.
4. *Kil'ayîm*, כִּלְאַיִם 'Mixtures,' *i.e.* mixtures of seeds, animals, and materials for cloth, prohibited by the Scriptures (Lv 19^{19}, Dt $22^{9\text{-}11}$). 9 chapters.
5. *Shĕbîʿîth*, שְׁבִיעִית the 'Sabbatical year' (Ex 23^{11}, Lv $25^{1\text{ff.}}$, Dt $15^{1\text{ff.}}$). 10 chapters.
6. *Tĕrûmôth*, תְּרוּמוֹת 'Heave-Offerings,' for the priest (Nu $18^{8\text{ff.}}$ and Dt 18^{4}). 5 chapters.
7. *Maʿăsērôth*, מַעַשְׂרוֹת 'Tithes' (Nu $18^{21\text{ff.}}$). 5 chapters.
8. *Maʿăsēr Shēnî*, מַעֲשֵׂר שֵׁנִי 'Second Tithe' (Dt $14^{22\text{ff.}}$). 5 chapters.
9. *Ḥallā*, חַלָּה the 'Dough,' a portion thereof to be given to the priest (Nu $15^{18\text{ff.}}$). 4 chapters.
10. *'Orlā*, עָרְלָה 'Uncircumcised,' fruits of the tree during the first three years (Lv $19^{23\text{ff.}}$). 3 chapters.
11. *Bikkûrîm*, בִּכּוּרִים 'First Fruits,' brought to the temple (Dt $26^{1\text{ff.}}$, Ex 23^{19}). 3 chapters.

II. MÔʿED, מוֹעֵד 'Season.'

1. *Shabbath*, שַׁבָּת 'Sabbath,' laws relating to it, mainly prohibitions of work (Ex 20^{10} etc.). 24 chapters.
2. *'Êrûbîn*, עֵירוּבִין 'Amalgamations' or ideal combinations of localities with the purpose of extending the Sabbath boundary, as well as laws as to the Sabbath day's journey. 10 chapters.
3. *Pĕṣāḥîm*, פְּסָחִים 'Passovers,' laws relating to them (Ex $12^{1\text{ff.}}$, Lv 23^{4}, Nu $9^{1\text{ff.}}$). 10 chapters.
4. *Shĕḳālîm*, שְׁקָלִים 'Shekels,' collected for the temple (Ex $30^{12\text{ff.}}$, Neh 10^{33}), and the various objects for which they were spent; including lists of the higher officials of the temple. 8 chapters.
5. *Yômā*, יוֹמָא 'The Day' (also *Yôm Hakkippûrîm*, יוֹם הַכִּפּוּרִים 'The day of Atonement'), treating of the service in the temple on that day, and of the laws relating to fasting (Lv $16^{1\text{ff.}}$). 8 chapters.
6. *Ṣukkā*, סֻכָּה 'Booth' or 'Tabernacle,' respecting the laws on dwelling in booths for seven days, and other observances during this feast (Lv $23^{34\text{ff.}}$, Nu $29^{12\text{ff.}}$). 8 chapters.
7. *Bêẓā*, בֵּיצָה 'Egg' (so called after the first words with which the tractate begins, but also termed *Yôm Ṭôb*, יוֹם טוֹב 'Feast'), enumerating the different kinds of work permitted or prohibited on festivals (Ex 12^{10}). 5 chapters.
8. *Rōsh Hashshānā*, רֹאשׁ הַשָּׁנָה 'New Year,' dealing with questions relating to the calendar, but chiefly with the laws to be observed on the first of the 7th month (*Tishri*), the civil New Year of the Jews (see Lv 23^{24}, Nu $29^{1\text{ff.}}$). 4 chapters.
9. *Taʿănîth*, תַּעֲנִית 'Fast,' respecting the laws observed and the order of the liturgy on such days. 4 chapters.
10. *Mĕgillā*, מְגִלָּה 'Roll' of Esther, relating to the laws to be observed on the feast of *Purim*. 4 chapters.
11. *Môʿēd Ḳāṭon*, מוֹעֵד קָטָן 'Minor Feast' (also called מַשְׁקִין, the first word of the tractate), *i.e.* the laws relating to the days intervening between the first and last days of the feast of Passover and that of Tabernacles. 4 chapters.
12. *Ḥăgîgā*, חֲגִיגָה 'Feast-Offering,' treating of the duty of pilgrimage to Jerusalem and the sort of sacrifices to be brought on such occasions (see Ex 23^{17} and Dt 16^{16}), as well as of laws regarding the degrees of defilement (against which the pilgrims are cautioned). 3 chapters.

III. NĀSHÎM, נָשִׁים 'Women.'

1. *Yĕbāmôth*, יְבָמוֹת 'Levirate Marriages' (Dt $25^{5\text{ff.}}$), and the forbidden degrees in marriage (Lv 18, etc.). 16 chapters.
2. *Kĕthûbôth*, כְּתוּבוֹת 'Marriage Deeds and Marriage Settlements' (see Ex 22^{16}). 13 chapters.
3. *Nĕdārîm*, נְדָרִים 'Vows,' and their annulment (Nu $30^{3\text{ff.}}$). 11 chapters.
4. *Nāzîr*, נָזִיר 'Nazirite' (Nu $6^{2\text{ff.}}$). 9 chapters.
5. *Ṣôṭā*, סוֹטָה 'The Suspected Woman' (Nu $5^{12\text{ff.}}$). 9 chapters.
6. *Giṭṭîn*, גִּטִּין 'Letters of Divorce' (Dt $24^{1\text{ff.}}$). 9 chapters.
7. *Ḳiddûshîn*, קִדּוּשִׁין 'Betrothals.' 4 chapters.

IV. NĔZÎḲÎN, נְזִיקִין 'Damages.'

1–3. *Bābā Ḳammā*, בָּבָא קַמָּא 'First Gate'; *Bābā Mĕẓîʿa*,

---

* Some authorities number five generations of *Tannaim*. For the purpose of brevity, we have accepted the plan of those who have condensed them into four. For the same reason, we have confined ourselves to the most important *Tannaim*, omitting many who deserve mention. Compare H. Strack's excellent monograph *Einleitung in den Thalmud*², p. 76 ff., and his bibliography appended to each *Tanna*. The references there given include those to Bacher's works, which are the most important contributions to the subject in any language other than Hebrew.

† St. const. מִשְׁנַת. The Patristic δευτέρωσις (see references in Schürer, *l.c.* i. p. 88, n. 1) speaks for מִשְׁנָה (second to the Torah), st. const. מִשְׁנֵה. Both explanations are represented in Rab. literature. Cf. *Arukh Completum*, *s.v.* משנה.

בָּבָא מְצִיעָא 'Second Gate'; *Bābā Bathrā*, בָּבָא בַתְרָא 'Last Gate.' These formed in ancient times only one tractate, bearing the same title as the whole order, מסכת נזיקין 'Tractate of Damages,' divided into three sections, each section consisting of 10 chapters. These three treat of (1) damages and injuries caused by man and beasts for which he is responsible (see Ex $21^{18ff.}$ $22^{3ff.}$); (2) of laws concerning lost property, trusts, the prohibition of usury and similar matters, duties towards hired labourers, etc. (see Ex $22^{6ff.}$ $23^{3.4}$, Lv 19^{13} $25^{14.36}$, Dt $23^{20.25}$ and 24^{14}); (3) laws relating to the different ways of taking possession of various kinds of property, the right of pre-emption, definition of certain terms used in contracts and oral transactions, order of inheritance (see Nu $27^{6ff.}$), etc.

4. 5. *Ṣanhedrin*, סַנְהֶדְרִין (10 chapters), and *Makkôth*, מַכּוֹת 'Stripes' (3 chapters), also forming in ancient times one tractate. The former treats of the constitution of the various courts of justice and their modes of procedure, the examination of witnesses, and the four kinds of capital punishment for grave crimes, as well as of the punishment consisting in being excluded from eternal life, etc. etc. The latter deals with offences for which the infliction of 39 stripes is prescribed (Dt $25^{2ff.}$), with false witnesses (Dt $19^{16ff.}$), and the laws relating to the cities of refuge (Nu $35^{10ff.}$, Dt $19^{2ff.}$).

6. *Shĕbhû'ôth*, שְׁבוּעוֹת 'Oaths,' taken in private or administered by the court (Lv $5^{1.4}$). 6 chapters.

7. *'Ēdûyyôth*, עֵדְיוֹת 'Evidences,' containing a collection of laws and decisions gathered from the statements made by distinguished authorities. 8 chapters.

8. *'Ăbôdā Zārā*, עֲבוֹדָה זָרָה 'Idolatry,' regarding the treatment of idols and their worshippers (Dt $4^{25ff.}$). 5 chapters.

9. *'Ăbôth*, אָבוֹת 'Fathers' (of Jewish tradition), containing mostly ethical sayings and maxims of the *Tannaim*. 5 chapters.

10. *Hôrāyôth*, הוֹרָיוֹת 'Decisions' (wrong ones) given by the authorities, treating of the sacrifices to be brought if the public acted in accordance with such erroneous teachings (Lv $4^{1ff.}$). 3 chapters.

V. Ḳodāshîm, קָדָשִׁים 'Sacred' things.

1. *Zĕbāḥîm*, זְבָחִים 'Sacrifices' (also called שְׁחִיטַת קָדָשִׁים and קָרְבָּנוֹת), treating of the laws relating to the various modes of offerings, the sprinkling of the blood, the burning of the fat pieces or of whole animals, etc. (Lv $1^{1ff.}$). 12 chapters.

2. *Mĕnāḥôth*, מְנָחוֹת 'Meat-Offerings,' including also the laws regarding libations (Lv $2^{5ff.}$ etc., Nu $15^{3ff.}$). 12 chapters.

3. *Ḥullîn*, חֻלִּין (also שְׁחִיטַת חוּלִין) 'Things Secular,' regarding the mode of killing animals and birds for ordinary use, as well as the various diseases disqualifying them from being eaten, and many other dietary laws. 12 chapters.

4. *Bĕkhôrôth*, בְּכוֹרוֹת 'Firstborn,' of men and animals (Ex $13^{2.12ff.}$ etc.), including also the laws regarding the tithes of animals (Lv $27^{26.32ff.}$). 9 chapters.

5. *'Ărākhîn*, עֲרָכִין 'Valuations,' of persons and things dedicated to the temple (Lv $27^{2ff.}$), also including some laws relating to the year of Jubilee (Lv $25^{15ff.}$). 9 chapters.

6. *Tĕmûrā*, תְּמוּרָה 'Change,' the laws bearing on cases of substituting a secular animal for one already dedicated to the altar (Lv $27^{9.33}$). 7 chapters.

7. *Kĕrîthôth*, כְּרִיתוֹת 'Excisions,' treating of sins subject to the punishment of 'the soul being cut off' (Gn 17^{14}, Ex 12^{15} etc. etc.). 6 chapters.

8. *Mĕ'îlā*, מְעִילָה 'Trespass,' treating of sacrilege committed by secularizing things belonging to the temple or to the altar (Lv $5^{15ff.}$). 8 chapters.

9. *Tāmîd*, תָּמִיד 'Continual' sacrifice, describing the temple service in connexion with this daily sacrifice (Ex $29^{38ff.}$, Nu $28^{3ff.}$). 7 chapters.

10. *Middôth*, מִדּוֹת 'Measurements,' of the temple, describing its courts, halls, chambers, and gates, etc. etc. 5 chapters.

11. *Ḳinnîm*, קִנִּים 'Nests,' of birds, or pairs of doves brought as sacrifice by the poor (Lv $1^{14ff.}$ $5^{7ff.}$). 3 chapters.

VI. Ṭohārôth, טְהָרוֹת 'Purifications.'

1. *Kēlîm*, כֵּלִים 'Vessels,' furniture, garments, and all kinds of utensils subject to Levitical impurity (Lv 11^{32}). 30 chapters.

2. *'Ōhālôth*, אֹהָלוֹת 'Tents' and habitations as conductors of Levitical impurity (Nu $19^{14ff.}$). 18 chapters.

3. *Nĕgā'îm*, נְגָעִים 'Leprosy,' in all its various degrees (Lv 13–14). 14 chapters.

4. *Pārā*, פָּרָה 'Red Heifer,' the use made of its ashes for the purpose of purification (Nu $19^{2ff.}$). 12 chapters.

5. *Ṭohārôth*, טְהָרוֹת 'Purifications,' used euphemistically for טומאות 'defilements' of all sorts and their various degrees. 10 chapters.

6. *Miḳwā'ôth*, מִקְוָאוֹת 'Wells' and cisterns to be used as means of ritual purification (Lv $15^{11.12}$ etc. etc.). 10 chapters.

7. *Niddā*, נִדָּה the 'Menstruous,' the Levitical impurity attaching to women under certain physical conditions (Lv $15^{19ff.}$). 10 chapters.

8. *Makhshîrîn*, מַכְשִׁירִין 'Preparers,' respecting the conditions under which certain articles became (by coming in contact with liquids) prepared for eventual defilement (Lv $11^{37ff.}$). 6 chapters.

9. *Zābîm*, זָבִים 'Persons afflicted with running issues,' the impurity arising thereof (Lv $15^{2ff.}$). 5 chapters.

10. *Ṭĕbûl Yôm*, טְבוּל יוֹם 'Immersed during the day,' *i.e.* the condition of a person who had taken the ritual bath prescribed but has still to wait for sunset to be considered as quite pure (see Lv $22^{6.7}$). 4 chapters.

11. *Yādayim*, יָדַיִם 'Hands,' respecting the ritual impurity attaching to them (according to the Oral Law), and the mode of cleansing them by pouring water over them. 4 chapters.

12. *'Ūḳẓîn*, עוּקְצִין 'Stalks,' how far they are considered a part of the fruit so as to convey impurity when touched by anything unclean. 3 chapters.

The idiom in which the Mishna is compiled is the New Hebrew, interspersed with occasional Greek and Latin words; its diction is fluent and easy when not disfigured, as all works coming to us from antiquity are, by interpolations and textual corruptions. The date of its compilation may be fixed about A.D. 220. This was undertaken and accomplished by R. Jehuda the Patriarch, not with the purpose of providing the nation with a legal code, but with the intention of furnishing them with a sort of thesaurus, incorporating such portions of the traditional lore as he considered most important. Hence the ground for his including in the work the opinions of the minority (*e.g.* of the school of Shammai), which only in a few exceptional cases were accepted as a norm for practice. A preliminary acquaintance with the contents of the Scriptures bearing upon the topic expounded by tradition is always assumed; so that, *e.g.*, the tractate *Ṣukkā* commences: 'A booth (the interior of which is) higher than 20 cubits is disqualified,' thus premising the duty of living in booths for seven days according to Lv 23^{42}. In many cases even a knowledge of the institutions established by the Oral Law is presupposed. Hence such a statement as that with which the Mishna commences: 'When do they begin to read the *Shĕma'* in the evening (*i.e.* the 3 paragraphs in the Scriptures, Dt 6^{4-9} 11^{13-21}, and Nu 15^{37-41}, the first paragraph of which begins with the word *Shĕma'* שְׁמַע)? From the time the priests (in the case of defilement) come back (from their ritual baths) to eat their heave-offering' (*i.e.* after sunset, see Lv 22^{4-7}). The duty or the custom of daily reading the *Shĕma'* is thus assumed as something generally known though not mentioned in the Scriptures.

The works after which R. Jehuda modelled his compilation and the sources upon which he drew were probably the older Mishna collections, the first composition of which was, as there is good reason to believe, begun by the first successors of Shammai and Hillel, then compiled by R. 'Aḳiba, and continued by his disciple R. Meir, who enriched it by additions of the later *Tannaim*. This Mishna became the groundwork of that of R. Jehuda, apart from various other collections of a similar kind (*e.g.* the Mishna of Abba Shaul), which were equally known to the compiler and utilized by him.* The strata of these older compositions are still in many places discernible, either by their style and phraseology or by the nature of their contents. An instance of the former is the passage illustrating the prohibition against transporting things on Sabbath from a space belonging to a private individual to that constituting a part of the public property. This commences יְצִיאוֹת הַשַּׁבָּת (M. *Shabbath* i. 1), instead of הוצאות הש׳, through which the Scripture expression אַל יֵצֵא (Ex 16^{19}) is still visible, and thus points to a time when the *Hălākhā* was still in its early stage, forming a sort of paraphrase of Scripture, not a set of abstract laws. As an instance of the latter, it is sufficient to refer here to the historical description of the procession in which the sacrifice of the first-fruits was brought to the temple (Ex. 23^{19}), concerning which we read in M. *Bikkûrîm* iii. 4: 'The pipe was playing before them (the pilgrims) until they arrived at the temple mountain, when even Agrippa the king would take the basket (containing the first-fruits) on his shoulders, stepping forward till he reached the courts; then the Levites spoke in song (chanted), "I will extol thee, O Lord, for thou hast lifted me up"' (Ps 30^{2}). The mention of Agrippa (probably Agrippa I., *c.* 40) points to a contemporary document, since a Rabbi of a later period would, for the sake of emphasis, have named some biblical potentate (*e.g.* Solomon), not a mere Herodian prince.* This is only a specimen of many other portions of the Mishna, which contain lengthy descriptions of the sacrificial service on certain occasions, or give accounts of the architecture of the temple, its administration (including lists of the names of the higher officials), and its economy; whilst others furnish us with records of actual transactions of the Sanhedrin, the procedure of the courts, and the various methods of execution. All these bear the stamp of their own age, and testify to the early date of their composition.

---

* For this 'higher criticism' of the Mishna, see Dr. Lewy, 'Über einige Fragmente aus der M. des Abba Saul' in *Zweiter Bericht über die Hochschule für die W. d. J. in Berlin*, 1876, and Dr. D. Hoffmann, *Die erste Mischna* (Berlin, 1882).

The question whether R. Jehuda, besides compiling, actually wrote down the Mishna, is still a controverted point amongst modern scholars, as it was nearly a thousand years ago between the Franco-German and the Spanish authorities. The balance of evidence is still about equal on each side. Three things, however, seem to be certain. First, there existed a law or custom, dating from ancient times, prohibiting the writing down of the contents of Tradition, though the Scripture support for this custom (Bab. Talm. *Tĕmûrā* 14*b* and parallel passages) was not advanced till a comparatively late period (end of the 2nd cent.). Ample evidence of this fact is afforded by the traditional term, 'Torah by mouth,' as well as the various mnemotechnical aids to be found in the Mishna (*e.g. Megilla* i. 4–11, אין בין) and the homage paid to those who invented them (see Jerus. *Shĕḳālîm* 48*c*, regarding the grouping of *Hălākhôth* in numbers, and *Aboth d' R. Nathan* 18, respecting R. 'Akiba's arranging of the Torah in links). Second, the prohibition did not extend to books of a *Haggadic* character (סִיפְרֵי דאַגַּדְתָּא), of which we know that they both circulated among, and were read by, the Rabbis. Under *Haggādā* was included also the gnomic literature—as, for instance, the Wisdom of Ben Ṣira, which both the *Tannaim* and the *'Amoraim*, as well as the authorities of a later period, the *Geonim* (*e.g.* R. Saadya), knew in the Hebrew original, and were constantly quoting, and of which fragments covering nearly two-thirds of the book have now been found after a disappearance of nearly 700 years. Third, the prohibition was often disregarded, even in cases of *Hălākhā*, as in the case of the *Mĕgillath Ta'ănîth* (מְגִילַּת תַּעֲנִית), containing a list of certain days in the year on which no fast could be declared, or the *Mĕgillath Ṣammānîn* (מְגִילַּת סַמָּנִין), 'the Roll of Spices,' treating of the preparation of the incense (Ex $30^{34\text{ff.}}$) in the tabernacle and the temple (Jerus. *Shĕḳālîm* 49*a*).

Owing to the great authority of R. Jehuda the Patriarch, his compilation became the *Mishna* κατ' ἐξοχήν, a sort of canonical collection of the teachings of the *Tannaim*, forming the text-book of the students of the Oral Law, round which centred all the comments, discussions, and the additional matter produced by the succeeding generations. The other collections, likewise confined to the teachings of the *Tannaim*, but composed in schools not presided over by the Patriarch, pass under the name either of מִשְׁנָה הַחִיצוֹנָה *Mishna Haḥîẓônā* (more frequently the Aram. בָּרַיְיתָא *Bāraithā*), 'the external Mishna,' or *Tôṣephtā* (תּוֹסֶפְתָּא), 'addition' (to the Mishna). No treatise representing the 'external Mishna' has come down to us, but many hundreds of quotations from such external Mishnas are scattered over the two Talmuds, mostly introduced by such phrases as תְּנוּ רַבָּנָן ('our Masters taught'), or תַּנְיָא ('it is taught'), or תנא and תָּנֵי ('he taught'). But we possess a work, bearing the name *Tôṣephtā*, corresponding with the arrangement of the Mishna, and dealing with the same subjects. It shows marks of different ages; and, whilst it embodies portions coming from collections preceding our Mishna, it presupposes the knowledge of the latter, whilst in some places it even affords comments and explanations taken from the *Gemara* and recast in the New Hebrew style of the Mishna. It is thus safe to assume that the date of its final redaction falls in the later age of the *'Amoraim*, though its composition may have been initiated by R. Ḥiya and R. Hoshaya the disciples of R. Jehuda, to whom tradition attributes such a work undertaken in imitation of the *Tôṣephtā* of R. Nehemia, who is credited with having collected 'additions' to the Mishna of R. 'Aḳiba. To this class of works also belong the so-called Minor Tractates bearing the following titles:—*Aboth d' R. Nathan* (אָבוֹת דר׳ נָתָן), a sort of *Tôṣephtā* and *Midrash* to the tractate *'Ābôth*, existing in two recensions;* *Maṣṣekheth Ṣôphĕrîm* (מַסֶּכֶת סוֹפְרִים),† 'Scribes,' dealing with the laws relating to the writing of the Scriptures. The text is in a bad condition, the interpolations and additions (on the Jewish liturgy, etc.) almost obliterating the original plan of the work, and it should be studied in connexion with the tractates *Ṣepher Tôrā*, *Mĕzûzā* (laws relating to the writing of certain verses from the Scriptures and to fixing them on the door-posts, see Dt 6^{9}), and *Tĕphillîn* (Phylacteries), edited by Kirchheim; *Maṣṣekheth Sĕmāḥôth* (מַסֶּכֶת שְׂמָחוֹת 'Joys'),‡ a euphemistic title for laws and customs connected with mourning—of which we have also a shorter recension ed. by C. M. Horwitz under the title מַסֶּכֶת שְׂמָחוֹת זוּטְרָתִי ('Tractate Joys, the Minor'); *Maṣṣekheth Kallā* (מַסֶּכֶת כַּלָּה 'Bride'), laws of chastity to be observed in conjugal life; *Maṣekheth Derekh 'Ereẓ* (מַסֶּכֶת דֶּרֶךְ אֶרֶץ), 'Manners' and behaviour of the different classes of society on various occasions. The tractate exists in two recensions, a longer (רַבָּה) and a shorter one (זוּטָא). The latter, dealing almost exclusively with the rules of life prescribed for the 'disciples of the wise,' is of a very spiritual nature. Lastly, we have to note here the other tractates ed. by Kirchheim, including, besides those mentioned above, the tractates dealing with the laws relating to *Ẓîẓîth* (צִיצִית), 'Fringes' (Nu 15^{38}); *'Ăbādîm* (עֲבָדִים), 'Slaves'; *Kûthîm* (כּוּתִים), 'Samaritans'; and *Gērîm* (גֵּרִים), 'Proselytes.'

The works recorded thus far, though containing occasional hermeneutical elements, convey, owing to their scantiness and the long intervals at which they occur, but a faint idea of the interpretatory work of the *Tannaim*. For this we must turn to the earlier *Midrash*, which has come down to us in the following works:—the *Mèkhiltā* (מְכִילְתָּא), 'Measure' on a portion of Exodus; the *Ṣiphrê* (סִפְרֵי), 'the Books' on portions of Numbers and the whole of Deuteronomy, both *Midrashim* emanating from the school of Ishmael; and the *Ṣiphrā* (סִפְרָא) or *Tôrath Kôhănîm* (תּוֹרַת כֹּהֲנִים), 'The Book' or 'The Law of the Priests' on Leviticus, a product of the school of R. 'Aḳiba. Besides these fairly complete works we also possess fragments of a *Mĕkhiltā* of R. Shim'on b. Yoḥai on Exodus, and of a small *Ṣiphrā* (סִפְרָא זוּטָא) on Numbers, both originating in the school of R. 'Aḳiba; and of a *Mĕkhiltā* on Deuteronomy, coming from the school of R. Ishmael.* The exegetical system of the Rabbis, forming the basis of the *Midrash*, grew with the rise of the new schools, the seven hermeneutical rules of Hillel having been developed by R. Ishmael into thirteen, and expanded (particularly as regards their application in the department of *Haggādā*) by R. Eliezer, the son of R. Joṣe of Galilee, into thirty-two or thirty-three rules; whilst rules of interpretation of other distinguished Rabbis are also mentioned. The practical object of the *Midrash* was the deduction of new *Hălākhôth* from the Scriptures, or the finding of a 'support' (אַסְמַכְתָּא) for the old ones. It is very difficult to determine in which cases the *Midrash* preceded the *Hălākhā*, and in which the *Hălākhā* preceded the *Midrash*, but it may be safely assumed that in most cases where the interpretation of the Rabbis is forced and far-fetched the *Hălākhā* was first handed down by tradition as an ancient usage or custom, and the Biblical 'support' was invoked only to give it the weight of Scripture authority. Here are one or two instances, which, given in the language of the Rabbis, may convey some idea of the vivid style of the *Midrash*—

‡ See N. Brüll, 'Die Talmudischen Tractate über Trauer um Verstorbene' (*Jahrbücher der Jüd. Litt.* pp. 1–57).

'R. Ishmael, R. 'Eliezer b. 'Aẓarya, and R. 'Aḳiba were walking on the high-road, and Levi Hassadar and R. Ishmael the son of R. 'Eliezer b. 'Aẓarya were walking behind them. And then the following question was put before them, "Whence is it to be inferred that danger of life 'removes' the Sabbath?" . . . R. Joṣe of Galilee answered, "It is written, BUT (אַךְ) *my Sabbaths ye shall keep* (Ex 31^{13}); the (limiting particle) אַךְ teaches, there are Sabbaths which thou keepest, others which thou 'removest' (the latter in cases of danger of life)." R. Shim'on b. Manaṣya says, "Behold Scripture says, *And ye shall keep the Sabbaths, for it is holy unto* YOU (*ib.* v.^{14}), the Sabbath is given to you (with stress on the word לָכֶם) to desecrate in case of need, but thou art not given to the Sabbath"' (*Mĕkhiltā, ad loc.*). Other Rabbis base this *Hălākhā* on the logical principle of *à fortiori* (קַל וָחוֹמֶר, one of the hermeneutical rules of Hillel), but none disputes the *Hălākhā* in itself, which had evidently the authority of ages. Another instance is the interpretation of Ex 21^{24} (cf. Lv 24^{20}): '*Eye for eye*, that is, money (amounting to the value of the eye). Thou sayest money, perhaps it means the real eye (*i.e.* that his eye should be blinded in retaliation for the organ which he has destroyed). R. Eliezer said, "It is written, *And he that killeth a beast he shall restore, and he that killeth a man shall be put to death* (Lv 24^{21}). The Scripture has thus put together damages caused to a man and those caused to a beast. As the latter may be atoned for by paying (the damages), so can also the former (except in cases of murder) be punished with money"' (*Ṣiphrā Lev. ad loc.*; *Mĕkhiltā ad loc.*; *Bābā Ḳammā*, 83*b*). This argument, called הֶקֵּשׁ (analogy of matter), is in direct opposition to the literal sense of the Scriptures, which implies the *jus talionis* in unmistakable terms; but it was only meant to lend some biblical sanction to a *Hălākhā* that had been a controverted point between the Sadducees and the Pharisees for centuries before. It is different, when we read, for instance, with regard to the law, *And the land shall keep Sabbath to the Lord* (Lv 25^{2}): 'One might think that it is also forbidden to dig pits, canals, and caves (this being a disturbance of the land) in the sabbatical year, therefore we have an inference to say, *Thou shalt neither sow thy field nor prune thy vineyard* (*ib.* v.^{4}), proving that it is only work connected with vineyard and field that is forbidden.' In instances like this, where the interpretation has nothing forced or strange about it, it would not be risky to assume that the *Hălākhā* was the outcome of the *Midrash*. But it is not such mere practical questions that have produced the vast *Midrash* literature. A great portion of it is simple commentary, though sometimes reproduced in that vivid dialogue style which makes it appear *Midrash*-like. *E.g. And ye shall take a bunch of hyssop and shall dip it in the blood that is* בַּסַּף (Ex 12^{22}), on which the *Mĕkhiltā* (*ad loc.*) has the following comment: 'The Scriptures tell us that he carves out a hole on the side of the threshold over which he kills (the passover lamb); for סַף means simply the threshold, as it is said, *In their setting of their thresholds by my threshold* (סִפָּם אֶת־סִפִּי Ezk 43^{8}, cf. LXX and Vulg.). This is the opinion of R. Ishmael. R. 'Aḳiba says סַף means nothing else but a vessel, as it is said, *the bowls* (סִפִּים), *the snuffers, the basins*' (1 K 7^{50}, cf. Aram. versions and commentaries). Another example may be taken from the expression וְיִנָּזְרוּ *from the holy things of the children of Israel* (Lv 22^{2}) on which the *Ṣiphrā* comments: 'נְזִירָה (a noun, derived from וינזרו) means nothing else but separation. And so he says *which separateth himself from me* וְיִנָּזֵר (Ezk 14^{7}), and he says again, *They separated backwards* (נָזֹרוּ Is 1^{4}).' Such instances of mere פְּשַׁט (simple meaning) could be cited by hundreds, and it is not impossible that many more were omitted by the scribes, who considered such renderings of words and definitions of terms as universally known through the medium of the various versions, and hence not sufficiently important to be copied.* In the *Haggadic* portions of the *Midrash* the elements of simple exegesis are less prominent—a fact which is easily explained by their subjective character. Sometimes the interpreter or preacher is so deeply convinced of the truth of the lesson he has to teach that he feels no compunction in interweaving it with biblical texts, and putting it into the mouth of a biblical hero. Thus we read in the *Ṣiphrā* with reference to Lv 9^{6} *This is the thing which the Lord commands ye shall do*: 'Moses said unto Israel, *Do* remove the *evil desire* (יֵצֶר הָרַע) from your hearts. Be all in awe and of one counsel to worship before the Omnipresent. As he is the Sole One in the world, so shall your service be single-hearted, as it is said, *Circumcise* the foreskin *of your heart, for the Lord your God is the God of gods and the Lord of lords* (Dt $10^{16.\,17}$), and *then the glory of the Lord shall appear unto you* (Lv 9^{6}).' The thought expressed in this interpretation is that the manifestation of the Divine glory is the reward for the fulfilment of a commandment, and is sure to occur whenever Israel accomplishes the laws of the Torah in true devotion and single-heartedness of spirit. Occasionally the preacher in his enthusiasm leaves the text altogether and rushes off into a sort of hymn, as, for instance (Ex 15[1]), *I will praise God,* on which the *Mĕkhiltâ* (*ad loc.*):—‘I will give praise to God that he is mighty . . . that he is wealthy . . . that he is wise . . . that he is merciful . . . that he is a judge . . . that he is faithful.’ Each attribute is followed by a proof from Scripture, and the whole is a paraphrase of 1 Ch 29[11. 12]. The constant citing of parallel passages by way of illustration is a main feature of the *Midrash, e.g. Ṣiphrê* on Nu 15[39] ‘*And ye shall not seek after your own heart and your own eyes* עֵינֵיכֶם: By this latter is meant adultery, as it is said, And *Samson said to his father, Get* her for me, for she is pleasing to *my eyes*’ (בְּעֵינָי Jg 14[3]). Again, Dt 6[5] ‘And thou shalt love the Lord thy God with *all thy heart and all thy soul,*’ where the *Ṣiphrê* adds by way of comment: ‘Even if he should take away thy soul. And so he (the Psalmist, 44[22]), *Yea, for thy sake are we killed all the day long.*’ The great exegetical principle was, ‘The words of the Torah are poor (or deficient) in one place but rich in another, as it is said, *She is like the merchant's ship; she bringeth her food from afar*’ (Pr 31[14]; Jerus. Talm. *Rōsh Hashshānā* 58*d*).

Friedmann's Introduction to his edition of the *Mĕkhiltā* (Vienna, 1870); Dr. Lewy, *Ein Wort über die 'Mechilta des R. Simon'* (Breslau, 1889); and Dr. D. Hoffmann, *Zur Einleitung in die halachischen Midraschim* (Berlin, 1886–87).

* See Friedmann's *Introduction to the Mekhilta*, p. lxxvi, and Dr. L. Dobschütz' brochure, *Die einfache Bibelexegese der Tannaim* (Breslau, 1893).

iv. The ’*Amoraim* אֲמוֹרָאִים ‘Speakers,’ ‘Interpreters’; a designation commonly applied to the authorities who flourished 220–500, and whose main activity consisted in expounding the Mishna. The seats of learning were no longer confined to Palestine, great schools having arisen, as in the time of the *Tannaim,* in various places in Babylonia, destined even to overshadow the former. The Babylonian teachers (who received ordination) bear as a rule the title *Rab* (רַב) in contradistinction to their Palestinian brethren who were called *Rabbi* (רַבִּי). The most important among the ’*Amoraim* are the following:—

First Generation (220–280).—(*a*) *Palestine:* R. Jannai, of whom we have a saying in the Mishna; R. Ḥiya and R. Hoshaya Rabba, the supposed compilers of the *Tôṣephtā* (see above); R. Joshua b. Levi, the subject of many legends, to whom various mystical treatises (descriptions of paradise and hell, etc.) are attributed; R. Joḥanan (b. Nappaḥa) of Sepphoris and Tiberias, disciple of R. Judah and the most prominent teacher in Palestine during the 3rd cent., and his brother-in-law R. Shim‘on b. Laḳish. (*b*) *Babylon:* Abba Arikha (‘Long Abba’), commonly cited by his title Rab. He ‘went up’ (from Babylon) to Palestine together with his uncle R. Ḥiya (mentioned above) to study under R. Jehuda, and on his return founded at Sura the school over which he presided; Samuel ירחינאה (the astronomer), a relative of Rab, and, like him, a disciple of R. Judah (though he did not receive ordination from him). He became head of the school in Nehardea.

Second Generation (280–300).—(*a*) *Palestine:* R. Eleazar b. Pedath, R. Simlai, R. Aṣṣi (also Iṣṣi and R. Ammi) (also Immi), and R. ’Abuha. The first four emigrated to Palestine from Babylon; whilst R. ’Abuha, who was a native of Palestine, taught in Cæsarea, where he often had controversies with Christian teachers. The famous *Haggadist* R. Shamuel b. Naḥmani also belongs to this generation. (*b*) *Babylon:* R. Huna (Sura), R. Jehuda (b. Jeḥeskel), founder of the school of Pumbeditha; R. Ḥiṣda, R. Shesheth, founder of a school in Shilhi. All these were disciples of Rab and Shamuel, or of one of them.

Third Generation (320–370).—This period marks the decay of the schools in Palestine, a consequence of the religious persecutions inaugurated under the reign of Constantine. (*a*) *Palestine:* Jeremia, R. Jona, and R. Joṣé. (*b*) *Babylon:* Rabbah (רַבָּה) b. Naḥmani (Pumbeditha), famous for his dialectical skill and called ‘the mountain-mover’; his colleague R. Joṣeph, a great authority on Targum, whose wide acquaintance with all branches of the Law brought him the title of ‘Sinai’; their pupils ’Abayi and Raba (רָבָא), both famous for the ingenious methods exemplified in their controversies scattered all over the Bab. Talmud; R. Papa, founder of a school in Nares.

Fourth Generation (375–427).—(*a*) *Palestine:* R. Shamuel (b. Joṣe b. R. Bun); (*b*) *Babylon:* R. Ashi (Sura); R. Kahana II. (Pumbeditha), and Amemar (Nehardea). The former is credited with having begun the compilation of the Bab. Talmud.

Fifth Generation (427–500).—*Babylon:* Mar bar R. Ashi; Rubbina (contraction of Rab Abina (Sura)), and R. Tosphaa (Pumbeditha). The two latter were greatly instrumental in accomplishing the work commenced by R. Ashi, finishing the compilation of the Bab. Talmud, and reducing it to writing.

The literary productions of these two schools are largely embodied in the two Talmuds bearing the title of their native countries: (*A*) **Palestinian Talmud** called the Talmud of Jerusalem, ת׳ יְרוּשַׁלְמִי, which is also more correctly called (since there were no schools in Jerusalem after the destruction of the temple) ת׳ אֶרֶץ יִשְׂרָאֵל ת׳ דמערבא and גְּמָרָא דִבְנֵי מַעֲרָבָא ‘the Talmud of (the children of) the Land of Israel,’ ‘the Talmud (or the *Gemara*) of (the people of) the West.’ (*B*) The **Babylonian Talmud** ת׳ בַּבְלִי, which (though only occurring once) was also known under the title of ת׳ אַנְשֵׁי מִזְרָח ‘the Talmud of the people of the East.’* The main object of the Talmuds is the interpretation of the Mishna, tracing its sources, giving its reasons, explaining obscure passages, as well as real or seeming contradictions, by the aid of parallel passages in the ‘external Mishnas,’ and illustrating its matter and expanding its contents (especially in the branches of civil law) by giving such cases as life and altered circumstances were constantly furnishing. It is perhaps in this latter quality that the text of the Talmud proper as distinguished from the Mishna is called *Gĕmārā* גְּמָרָא, meaning, according to some authorities, ‘Supplement’ or Complement to the Mishna.† The Talmuds differ in various minor respects. Thus, the non-Hebrew portions of the Jerus. Talmud are composed in the West Aram. dialect, whilst those of the Bab. Talmud are written in an East Aram. idiom, closely related to the Syr. and still more akin to the Mandaic language. The style of the Jerus. Talmud is more concise, its discussions less diffuse, than those of the Bab. Talmud. The former is altogether free from the casuistic and lengthy discourses on imaginary cases which form a special feature of the productions of the Eastern Rabbis. It should, however, be remarked that, so far as dialect and diction are concerned, the Bab. Talmud is not always uniform, there being various tractates, such as *Nĕdārîm, Nāzîr, Tĕmûrā Mĕ‘îlā,* and *Kĕrîthôth,* which betray certain grammatical forms and peculiarities of style, reminding us in some places of the diction of the Talmud of Jerusalem. Apart from the main object as described, the text of the Mishna serves sometimes (particularly in the Bab. Talmud) as a mere peg on which to fasten matter having hardly any connexion with the contents of the latter. *E.g.*

---

* See *JQR* ix. 120.

† Neither the Jerus. nor the Bab. Talm. extends over all the 60 (or 63) tractates of the Mishna. The Jerus. Talm. has *Gĕmārā* to the first four orders of the Mishna and to three chapters in the tractate *Niddā* in the sixth order; but in the second order there is missing the *Gĕmārā* to the last four chapters of the tractate *Shabbath,* to the third chapter of the tractate *Makkôth,* and in the fourth order to the tractates ’*Ābôth* and ’*Ēdûyyôth.* The Bab. Talm. has *Gĕmārā* as follows: in the first order to tractate *Bĕrākhôth* only; in the second order, tractate *Shĕḳālim* is omitted; in the fourth order, tractates ’*Ābôth* and ’*Ēdûyyôth* are omitted; in the fifth order, tractates *Middôth* and *Kinnîm* are omitted; in the sixth order, *Gĕmārā* to tractate *Niddā* alone.

the lines in Mishna tractate *Giṭṭîn,* 'that the laws regarding the σικάριοι (a name under which certain leaders of the Zealot bands were known) did not apply to the land of Judæa,' are followed in the Bab. Talmud by a legendary account of the wars preceding the destruction of the second temple, and various incidents connected with it, extending over more than 5 folio pages (55*b*–58*a*). Again in the tractate *Bābā Bathrā*, the accidental remark in the Mishna, that a volume (or roll) containing the Scriptures inherited by two or more brothers must not be divided among them by cutting it up into its constituent books even when the parties agree to this, provokes in the *Gĕmārā* (of the Bab. Talmud) a discussion relating to the arrangement of the Canon of the OT, its rise, and the dates at which the various books included in it were composed, accompanied by a long discourse on the particular nature of the Book of Job, the character and date of its hero, together with a few remarks on other biblical personages, which covers nearly 8 folio pages (13*b*–17*a*). This process of inserting matter but slightly connected with the text is at times carried further by adding to the inserted matter other topics having a similar slight connexion with it. As an instance of this process we may regard the following. Mishna *Bĕrākhôth*, ch. ix. 1, runs, 'He who sees a place in which miracles were performed for the sake of Israel says, Praised be he who wrought miracles for our fathers in this place.' By way of illustration the *Gĕmārā* (Bab. Talm. *ib.* 54*a*) cites an 'external Mishna' in which it is taught that 'He who sees the crossings of the Red Sea (*i.e.* the place at which the Jews crossed the Red Sea, Ex 14²²), or the crossings of the Jordan (Jos 3¹⁴ᶠᶠ·) . . . is bound to give thanks and praise to the Omnipresent' (*Mākôm*). The last words suggest a quotation of R. Jehuda in the name of Rab, adding to the number of those who are under the obligation to give thanks, also the four cases enumerated in Ps 107 (people returning from a sea voyage, coming back from a journey through the desert, recovering from a serious illness, or released from prison, 54*b*). This statement is followed by several other sayings (54*b*, 55*a*) which have no other connexion with the preceding matter than identity of authorship, all being cited in the name of Rab. One of these citations is to the effect that for three things man should in particular pray to God (who alone can grant them): 'a good king, a good year, and a good *dream*' (55*b*); but the last word again suggests a new train of thought on the subject of dreams, their interpretation and fulfilment, which forms the theme of the next 6 folio pages (55*a*–57*b*). Owing to these sudden and violent changes from subject to subject, the style of the Talmud becomes very uncertain and rather rambling;* but, on the other hand, it is this very circumstance that keeps the 'sea of the Talmud' in constant motion, relieving it from the monotony and tedious repetition so peculiar to the majority of theological works dating from those early ages. Indeed, owing to this facility for dragging in whatever interested the compilers or the scribes, the Talmud almost loses the character of a work of divinity, and assumes more the character of an encyclopædia, reproducing the knowledge of the Rabbis during the first five centuries on all possible subjects, whether secular or religious. This is, as already indicated, particularly the case with the Bab. Talmud, the *Haggādā* of which is very discursive and rich in all sorts of folk-lore. It must, however, be borne in mind that the authorities in whose names the strangest stories are sometimes communicated are often Rabbis from Palestine, whose sayings and statements were as much studied and discussed in the East as they were in the West.

v. The *Ṣaborai* סָבוֹרָאֵי 'Explainers' or 'Meditators' (upon the words of their predecessors), whose activity is supposed to have extended over the whole of the 6th century. The most important among them are Rabbah Joṣe (Pumbeditha) and R. 'Aḥai (of Be Ḥathim), who flourished about the beginning of the 6th cent., and probably shared largely in the compilation work of the last of the '*Amoraim*; and R. Giza (Ṣura) and R. Simona (Pumbeditha), who belonged to the middle of the same century. The activity of the *Ṣaborai*, about whose lives we know little, consisted mainly in commenting upon the Talmud by means of explanatory speeches, and contributing to it some additional controversies marked by peculiarity of style and by absence of the names of those engaged in the dialogue, as well as by insertion of final decisions upon the differing opinions of their predecessors.* The school of the *Ṣaborai* is peculiar to Babylon, there being no corresponding class of teachers in Palestine. Nor is there any reliable tradition, regarding the compilation of the Jerus. Talmud, by whom it was accomplished, and when it was undertaken. Maimonides' statement, that R. Joḥanan composed the Jerus. Talmud, can, since this work contains quantities of matter dating from a much later period, mean only that by the aid of the schools he founded, this Rabbi was largely instrumental in giving rise to a work embodying the teachings of the later Western authorities. But in consequence of religious persecutions and political disturbances the decay of the schools set in too early to permit even such comparative completeness and finish as are to be found in the Bab. Talmud, which is itself far from perfection in this respect. Indeed the abruptness of the discussions of the Pal. Talmud, the frequent absence of formulæ introducing quotations or marking the beginning of the treatment of a fresh subject or the conclusion of an old one, as well as the meagreness of its matter where the analogy of the Bab. Talmud would suggest the greatest fulness, and the fact that it has no *Gĕmārā* at all on the 5th order (sacrifices), which is so strongly represented in the Bab. Talmud,†—all these circumstances convey the impression that the Jerus. Talmud was never submitted to a real conscious compilation with the object of presenting posterity with a completed work. What was reduced to writing does not give us a work carried out after a preconcerted plan, but rather represents a series of jottings answering to the needs of the various individual writers, and largely intended to strengthen the memory. And thus lacking the authority enjoyed by the Mishna and the Bab. Talmud, which were the products of the great centres of learning, the Jerus. Talmud was, for a long time at least, not elevated to the rank of a national work, and it is therefore easy to understand how such portions of it as had not much bearing upon actual practice were permitted to disappear. Altogether, the people of Palestine were, as an old Rabbi said, 'sick with oppression,' and had no time to spare for the niceties of the *Hălākhā*, 'and did not listen to the words of Talmud (in the narrower sense of discussing the legal portions of it) and the Mishna.' The deeper was their devotion to the *Haggādā*, which gave them 'words of blessing and consolation.' This will account for the copiousness of the *Haggadic* literature, which reached its highest development during the period of the *'Amoraim*. This literature is embodied in the *Midrashim* to various books of the OT as well as in certain independent *Haggadic* treatises, the contents of which, though possibly compiled at a later age, are made up of the homilies and moralizing exhortations given in the names of the same Palestinian Rabbis who figure as authorities in the two Talmuds. They, however, form a literature by themselves, never having served as sources or factors of the Talmud, though they are sometimes useful as parallel passages to the *Haggadic* portions of the latter. They thus do not fall within the scope of this article. It is, however, only fair to warn the theologian that though he may dispense, *e.g.*, with the *Pĕsiḳtā* (collection of homilies mainly based on the *Haphṭārôth*) or the Midrash *Shîr Hashshîrîm* (allegoric interpretations of the Song of Songs) in his study of the Talmud, he cannot do so safely in his study of the Rabbi, whose performance of his prophetic office is seen to best advantage in such moralizing works as those of which the *Haggadic* pieces just mentioned are a fair specimen.

---

* It is this discursiveness which makes a proper translation of the Talmud almost impossible: see M. Friedmann's brochure, דבר על אודות התלמוד, Vienna, 1895 (Heb.).

* On all these points see N. Brüll's essay, 'Die Entstehungsgeschichte des bab. T. als Schriftwerkes'; and Weiss, as above, vol. iii. p. 208ff., and vol. iv. p. 1ff.

† The question whether the Jerus. Talmud ever had *Gĕmārā* to the fifth order is best discussed in the *Heḥalutz* . . . by Osias H. Schorr, who on excellent grounds maintains that such a *Gĕmārā* must have existed. But it must be stated that hitherto, not even in the Cairo collections, which have restored to us so many lost works, has a single line turned up to confirm Schorr's hypothesis. About the peculiarities of the fourth order, see I. Lewy, *Interpretation des 1. Abschnittes des paläst. Talmud-Traktats Nesiḳin* (Breslau, 1895), p. 20; but compare also the references to the other authorities there given. This essay is the best piece of work yet done on the redaction of the Jerus. Talmud.

LITERATURE (omitting mostly such books as have already been referred to in the notes).—EDITIONS: There are very few critical editions of the ancient Rabbinical literature, though new reprints are constantly appearing. The following, however, deserve special notice:—*Mishna*, Naples, 1492, ed. pr.; *Mishna . . . Latinitate donavit* . . . J. Surenhusius, Amstelod., 1698; *The Mishna, edited from a unique MS*, by W. H. Lowe, Cambridge, 1883; *Mishnayoth: Hebräischer Text mit Punktation, Deutscher Übersetzung*, von A. Samter, Berlin, 1887 (not yet finished). Most editions have, as a rule, the commentaries of 'Obadya di Bertinoro and of Yom Ṭob Lipman Heller (תוספות יום טוב), or the commentary of Maimonides (not as frequently as the two former). As useful editions for students, the tractates edited by Strack may be recommended. *Toṣephta*, edited by Zuckermandel (after MSS), Pasewalk, 1880. *Jerus. Talmud*, Venice, 1523, ed. pr., Krotoschin, 1866, and Zitomir, 1860–67. This last edition has several commentaries. Of single tractates there have appeared, among others, *Bĕrākhôth*, *Pē'ā*, and *Dĕmā'î*, with the commentary *Ahabath Zion*, by Z. Frankel, and a part of *Bābā Kammā* with a commentary by I. Lewy. *Bab. Talmud*, Venice, 1520, with the commentaries of R. Solomon b. Isaac, and the *Glosses* of the Franco-German Rabbis called *Toṣaphoth* (Additions). The last and best edition of the Talmud is that which appeared in Wilna, 1880–86, 25 vols. The *Variæ lectiones in Mischnam et in Talmud Babylonicum*, by Raph. Rabbinowicz, consisting of 16 vols., and extending over a large part of the Bab. Talmud, is a most important work for the critical study of the Talmud. Also to be consulted is the work קונטרס למלאות חסרונות השם, Königsberg, 1860, restoring the words and passages omitted or corrupted by the censors. Of single tractates we have only to notice here the *Tract. Makkoth*, ed. Friedmann, Wien, 1888.*

INTRODUCTORY AND BIBLIOGRAPHICAL: N. Krochmal מורה נבוכי הזמן, Lemberg, 1851 (Heb.); L. Zunz, *Die Gottesdienstlichen Vorträge der Juden*^{2}, Frankfurt-a.-M. 1892; M. Steinschneider, *Jewish Literature*, §§ 1–7, London, 1857; Z. Frankel, דרכי המשנה, *Hodegetica in Mischnam . . .* Lipsiæ, 1859 (Heb.); by the same, מבוא הירושלמי, *Introductio in Talmud Hierosolomitanum*, Breslau, 1870 (Heb.); Graetz, *Geschichte der Juden*, vols. 3 and 4 (Germ.); Dérenbourg, *Essai sur l'histoire et la géographie de la Palestine d'après les Thalmud et les autres sources rabbiniques* (Paris, 1867); I. H. Weiss, דור דור ודורשיו *Zur Geschichte der Jüdischen Tradition*, vols. 1–3; Strack, *Einleitung in den Thalmud*, Leipzig, 1894; M. Mielziner, *Introduction to the Talmud*, Cincinnati, 1894; Schürer, *GJV*^{2}, i. § 3 E, Leipzig, 1890 (Germ.). For popular accounts see E. Deutsch, *The Talmud*, Philadelphia, 1896; A. Darmesteter, *The Talmud*, Philadelphia, 1897.

DICTIONARIES AND GRAMMARS: Nathan b. Yeḥiel (of the 11th cent.), ספר הערוך, 1480, ed. pr. This work was last edited or rather incorporated in the *Arukh Completum . . . auctore Nathane filio Jechielis . . . corrigit explevit critice* Alex. Kohut, 8 vols., Wien, 1878–92; Joh. Buxtorf, *Lexicon Chaldaicum Talmudicum et Rabbinicum*, Basel, 1640; Jacob Levy, *Neuhebräisches und chaldäisches Wörterbuch über die Talmudim und Midraschim*, Leipzig, 1876; M. Jastrow, *Dictionary of the Targumim, the Talmud Babli and Jerushalmi*, London and New York, 1886; Sam. Krauss, *Griechische und lateinische Lehnwörter im Talmud, Midrasch, und Targum . . .* Berlin, 1898; W. Bacher, *Die älteste Terminologie der jüdischen Schriftauslegung: Ein Wörterbuch der bibelexegetischen Kunstsprache der Tannaiten*, Leipzig, 1899; H. L. Strack and C. Siegfried, *Lehrbuch der Neuhebräischen Sprache* . . . Karlsruhe and Leipzig, 1884; A. Geiger, *Lehr- und Lesebuch der Sprache der Mishnah*, Breslau, 1845 (Germ.); I. H. Weiss, משפט לשון המשנה, Wien, 1865 (Heb.); G. Dalman, *Grammatik des Jüdisch-Palästinischen Aramäisch*, Leipzig, 1894 (Germ.); S. D. Luzzatto, *Elementi grammaticali del . . . dialetto Talmudico Babilonese*, Padua, 1865 (Ital.), of which a Germ. tr. was prepared by M. S. Krüger, and was published in Breslau, 1873; Levias, *Grammar of the Bab. Talm.*, Cincinnati, 1900.

The attempts towards translating the Talmud are many and various. A full account of them will be found in Dr. Erich Bischoff's *Kritische Geschichte der Thalmud-Übersetzungen aller Zeiten und Zungen*, Frankfurt-a.-M. 1899 (Germ.). The present writer can, however, recommend only the following books: On the Mishna see above. On *Minor tractates: Masecheth Sopherim*, by J. Müller, Leipzig, 1878; *Derech Erez Suta*, by A. Iawrogy, Königsberg, 1885. Jerus. Talm.: A. Wünsche, *Der jerusalemische Talmud in seinen haggadischen Bestandtheilen ins Deutsche übertragen*, Zürich, 1880. Bab. Talm.: *A Translation of the treatise Chagigah*, by A. W. Streane, 1891; *Tractate Baba Mezia mit deutscher Übersetzung* . . . by A. Samter, Berlin, 1876; *Der Bab. Talmud in seinen Hagadischen Bestandtheilen wortgetreu übersetzt*, by Wünsche, 1888. The student would do well to consult always, when reading a *Haggadic* text, the following standard works by W. Bacher: *Die Agada der Babylonischen Amoräer*, Strassburg, 1879; *Die Agada der Tannaiten*, Strassburg, 1884; *Die Agada der Palästinischen Amoräer*, Strassburg, 1892.

S. SCHECHTER.

SIBYLLINE ORACLES.—The collection of Jewish and Christian poems which pass under the name of the Sibyl covers in its time of production a period of many centuries, reaching back into at least the 2nd cent. B.C., and coming down (when its latest developments are included) far into the Middle Ages. When we take further into account that, even in its first Jewish and Christian forms, Sibyllism was merely an attempt to transplant a feature of literature that was centuries old, and already effete in the pagan world, it will be seen that it constitutes a very important element in historical theology, and one which has had every influence upon the mind of man that could be secured for it by the exercise of authority (operating through the State as in Roman life, or through great names as in the case of the Christian Church), supported as that authority was by the natural love of the secret and mysterious which characterizes the major part of men in all periods of human history.

The original Sibyl is very nearly the equivalent of 'prophetess' in the Gr. and Rom. world; the derivation of her name from an assumed combination of Σιός (for Θεός) and βουλή (in a form βυλλά) goes back to Varro (cf. Lact. *Div. Inst.* i. 6); and, although it may be (and probably is) invalid philologically, it is sufficient evidence of the character assigned to the persons known as Sibyls, who had the knowledge (as it was supposed) of the Divine will in the fatalistic sense, and were in the habit of recording the fiats of that Divine will in various oracular and prophetic ways. Accordingly, they could be consulted, either in some special *antrum* or grotto, or through an inspection of such prophecies as they had committed to writing. Now, according to the ancients, there were a number of such Sibyls, known sometimes by actual names, and sometimes by the places where they prophesied, as the Chaldæan,

---

* A good bibliographical account of the various reprints of the Bab. Talmud is to be found in Rabbinowicz's מאמר על הדפסת התלמוד, München, 1877, whilst a short list of the various MSS in the different libraries is given by Strack in his *Einleitung*, p. 70 ff. It should, however, be noted that the last 20 years have brought to light many Talmudical pieces, not known to any bibliographer. They are still awaiting description. Mr. Elkan N. Adler's library (London) is especially rich in early prints not known to Rabbinowicz; whilst the Cambridge collections, both in the possession of the University Library and in that of Mrs. Lewis and Mrs. Gibson (now in Westminster College), contain many MSS fragments of the Bab. and Pal. Talmuds of the highest critical value.

Erythræan, Delphic, etc. But for practical purposes the one that exercised the commanding influence over the Christian Church to which we have alluded above is the Cumæan Sibyl. It is necessary to bear in mind that this commanding influence is merely a case of survival from the Roman State religion. And the question for the student of the Sib. Oracles as we have them extant, is as to the extent of the survival. It can be tested under the heads of (1) the language, (2) the form, (3) the matter of the ancient and the more modern oracles.

The Rom. tradition affirmed that these oracles had originally been offered by a certain Sibyl to a certain Roman king (say Tarquinius Superbus), but at an excessive price; the price being refused, she departed and destroyed a certain part of her books, and returned to offer the remainder at the original price; and, after this process had been repeated a certain number of times, the king was sufficiently interested to buy the remainder, which thus became in the Roman government a State deposit of information concerning the future, placed under the control of the augurs or *viri quindecemvirales*, and to be consulted in time of exigency.

There is no need to spend time in criticising the details of such a story, which is merely an attempt to find a venerable origin for a Roman practice; for it is certain that the Roman government had such books of Sib. oracles, which they from time to time augmented or retrenched by various editorial processes. What is important to remember is—(i.) that these oracles were for the most part, perhaps wholly, in Greek; (ii.) that they were in hexameter verse, probably with the literary devices of alphabetic and acrostic writing; (iii.) that they were concerned *inter alia* with the fortunes of the world at large and of the empire, the ages of the universe, and the collapse and rejuvenescence thereof. The first of these points, and, in part, the second, may best be illustrated by references to an actual oracle which has come down to us, preserved by Phlegon, *de Mirabil.* c. 10, apparently from a Roman writer, Sextus Carminius, and dated in the year A.V.C. 629 (=B.C. 124). It relates to the birth of a hermaphrodite, which the oracle alludes to in the words—

> καὶ τοί ποτε φημὶ γυναῖκα
> Ἀνδρόγυνον τέξεσθαι ἔχοντά περ᾽ ἄρσενα πάντα
> Νηπίαχαι θ᾽ ὅσα θηλύτεραι φαίνουσι γυναῖκες.

Obviously, the oracle was made to suit the portent, and it was composed in hexameters. At this time, then, we know the method of formation of the oracles, and that the collection was subject to accretion or modification. They were written, as all later oracles and books of oracles, in the religious metre and language of Homer. Moreover, on examination it will be found that the oracle is acrostic, and apparently based upon an earlier acrostic which has been used, which was itself metrical. The books were therefore treated as *sortes* by the augurs, but handled with freedom in secret so as to adjust the prophecies to the needs of the time. That they contained some scheme of the ages of the world and of the ἀποκατάστασις πάντων, is clear from Virgil's

> 'Ultima Cumæi venit iam carminis ætas;
> Magnus ab integro sæclorum nascitur ordo.'
> (*Eclog.* iv. 4),

and a number of similar considerations.

All of these features are abundantly illustrated in the Jewish and Christian Sib. books. It was necessary that they should be if the world was to swallow the literary deception that was being practised upon it.

It must not be supposed that such a gigantic and long-continued fraud could have been carried on without meeting with criticism from a people as acute and polished as the Greeks. While it is certain that almost all the Fathers of the Church were firm believers in the inspiration of the Sibyls (for we need not doubt the honesty of Justin and Clement, of Tertullian, of Lactantius, and a host of others, though it is equally clear that the deceived must have been near of kin to the deceivers), it was not possible that such keen wits as Lucian and Celsus should come under the spell. They saw at once that the Christians were making oracles to suit their own propaganda, and were quick to proclaim the fact; and Lucian, in particular, himself turned Sibyllist in order to tell in mock heroics the fortunes of Peregrinus and of Alexander of Abonoteichos. This extant criticism and ridicule must have been widely extended. We can trace from the successive Sibyllists themselves the objections which they had to meet. One, of necessity, was the dependence of the Sibyl upon Homer, for Sibyllism is closely related to Centoism, and borrows lines and expressions freely from Homer. It was necessary, therefore, for the assumed Sibyl to explain that the borrowing was really on the side of that thief Homer. Accordingly, the Sibyl herself attacks the supposed later poet in the following lines—

> καί τις ψευδογράφος πρέσβυς βροτὸς ἔσσεται αὖτις
> ψευδόπατρις· δύσει δὲ φάος ἐν ὀπῇσιν ἐῇσιν
> . . . . . .
> . . . ἐπέων γὰρ ἐμῶν μέτρων τε κρατήσει.
> (*Orac. Sib.* iii. 419 ff.);

and this judgment is endorsed by Tatian, who in his tract *Against the Greeks*, § 41, maintains the superior date of the Sibyl to Homer. A closer examination, however, of the oracles reveals that Homer is not the only writer pilfered; there is a constant coincidence with fragments of Orphic hymns, which would certainly be much more pronounced if we were not limited in our comparison to the few fragments that have been conserved of this branch of literature. Now, it is worth noticing that Clement of Alexandria (the best read of all the early Fathers in the matter of Greek literature) expressly declares that the Sibyl is earlier than *Orpheus*; while, to quote another author of nearly the same date, Tertullian will have it that the Sibyl is older than *all other literature* (cf. Tert. *adv. Nationes*, ii. 12). It is clear from these testimonies that there had been from the first a critical dispute over the antiquity of the supposed Sibylline verses; at all events, the anti-Homeric strain in the Sibyl which we have quoted above occurs in verses which Alexandre assigns to the time of Antoninus Pius, and the writers who endorse the sentiment belong very nearly to the same period. And before this time there must have been an active Sibylline propaganda carried on by the early Christians, most of whom were deceived and some of them deceivers.

Something of a similar kind to this contest between Homer and the Sibyl and Orpheus and the Sibyl for priority, appears to have taken place at a later date in regard to Virgil. We have already pointed out that the acquaintance of Virgil with Sibylline oracles may be assumed. It does not follow that these oracles have anything to do with the extant collection; rather they seem to be the Roman collection, which Virgil must have known by report, and perhaps by actual study of published or unpublished portions. Now it has been shown by Dechent (*Ueber das erste, zweite und elfte Buch der Sib. Weissagungen*, 1873) that the eleventh book of the Oracles has coincidences of language with Virgil. The Sibyl describes, for example, the flight of Æneas from Troy in ll. 144 ff., which begin—

> *ἄρξει δ' ἐκ γενεῆς τε καὶ αἵματος Ἀσσαράκοιο*
> *παῖς κλυτὸς ἡρώων, κρατερός τε καὶ ἄλκιμος ἀνήρ,*

which may be compared with

> 'Romulus, Assaraci quem sanguinis Ilia mater
> Educet' (Virg. *Æn.* vi. 779).

After describing the person and fortunes of Æneas, the writer proceeds to explain that her verses will be stolen by a later poet, much in the same language as we noted in Bk. iii. for Homer—

> *καί τις πρέσβυς ἀνὴρ σοφὸς ἔσσεται αὖτις ἀοιδός*
>
> . . . . . .
>
> *τοῖσιν ἐμοῖσι λόγοις μέτροις ἐπέεσσι κρατήσας·*
> *αὐτὸς γάρ, πρώτιστος ἐμὰς βίβλους ἀναπλώσει*
> *καὶ κρύψει μετὰ ταῦτα.*

But here we must, in view of the coincidences in language between the Sibyl and the *Æneid*, understand Virgil and not Homer as the supposed thief. Obviously, the Sibyllist, who is so anxious to be prior to Virgil, must have written a good while after Virgil, as is also shown by the reference to Virgil as hiding the oracles. Alexandre refers this part of the oracles to the year A.D. 267; and it is interesting to observe that, not long after that date, the emperor Constantine in his oration to the Nicene Fathers invokes the authority of the Sibyl, and suggests the dependence of Virgil upon her writings, quoting Virgil for convenience in a Greek rendering. It is reasonable, therefore, to suppose that the question of relative priority between Virgil and the Sibyl belongs to this period of time.

It is to be noted, however, that the earliest of all the books of oracles does not seem to have encountered any such hostile reception. Parts of what is now edited as the third book, ll. 97–294, 491–fin., are assigned by Alexandre to the year 166 B.C. It is not decided whether the production of these verses was due to some active inquiry which was being made at the time after extant oracles, which search might easily have led to the fabrication of them by some learned Alexandrian Jew, or whether it is only one more example, to be added to many belonging to this time, of the transference of the text of the LXX into Gr. verse. Whatever may be the reason, it is certain that the versified story of the destruction of the tower of Babel, with the poetic expansion that it was accomplished by the agency of mighty winds, was accepted as a fresh historical authority by contemporaries (Abydenus, Polyhistor, and, following them, Josephus), and as confirming the accuracy of the biblical record from which it is derived, by Clement of Alexandria and Eusebius. So that it does not appear that the earliest Jewish portions of the Sibylline books provoked the same hostility as those which are later and definitely Christian. They appear to have met with an unquestioning acceptance.

It will be convenient to set down here the dates which have been assigned to the extant books. Our first scheme is that of Alexandre, whose *Excursus ad Sibyllinos Libros* is the storehouse of material for all who wish to have a thorough knowledge of the subject. According to him—

Bk. iii. ll. 97–294 and 489-fin. is a Jewish work, written in Egypt in the year 166 or 165 B.C.
Bk. iv., the oldest of the Christian Sibyllines, was written in Asia in the 1st cent. A.D. under Titus or Domitian.
The Prooemium to the collection (a fragment preserved by Theophilus of Antioch) and Bk. viii. ll. 217–429, are probably by the same Christian hand, and written in the beginning of the 2nd cent. under Trajan or Hadrian.
Bk. viii. ll. 1–217, written by a Christian of a millenarian type, in Egypt in the reign of Antoninus Pius.
Bk. iii. ll. 295–488 and Bk. v. are Judæo-Christian, and were written in Egypt in the reign of Antoninus Pius.
Bks. vi. and vii. are Christian (?heretical), and written in the reign of Alexander Severus, about A.D. 234.
Bk. viii. ll. 430–fin., by Christian hands in the middle of the 3rd cent.
Bks. i. ii. and iii. ll. 1–96, by Christian hands, in Asia in the middle of the 3rd cent.
Bks. xi. xii. xiii. xiv., Judæo-Christian, written in Egypt about the year 267 A.D.

With this scheme of Alexandre may be compared that propounded by Ewald. According to Ewald (*Abhandlung über Entstehung Inhalt und Werth der Sib. Bücher*, Göttingen, 1858) we have—

Bk. iii. ll. 97–828, about B.C. 124.
Bk. iv., about A.D. 80.
Bk. v. ll. 52–530, about A.D. 80.
Bks. v. ll. 1–51, vi. vii., in A.D. 138.
Bk. viii. ll. 1–360, about A.D. 211.
[Bk. viii. ll. 361–500, Ewald declares to be non-Sibylline.]
Bks. i. ii. iii. ll. 1–96, about A.D. 300.
Bks. xi. xii. xiii. xiv., much later: Ewald imagines references to the emperor Odenatus and to the rise of Islam!

Further discussions of dates of the whole or parts of the different books may be found in Friedlieb, *Orac. Sibyll.* (Leipzig, 1852), or Bleek (*Theol. Zeitschrift*, Berlin, 1819), or Dechent (see above). The different judgments arrived at by these writers would probably be rectified by a closer study of the whole body of Sibylline literature. So far, the best guide is Alexandre, whose *Excursus* is a monument of patiently accumulated facts.

EDITIONS OF THE SIBYLLINE ORACLES.—The first published portion of the Sibyllines was the famous acrostic, Ἰησοῦς Χριστός, Θεοῦ υἱός, Σωτήρ, which was printed by Aldus. The first ed. was due to Xystus Betuleus (Sixtus Birken) at Basel in 1545. It contained the first eight books. The second (Lat.) ed. was issued from the same printing-house (John Oporinus) in the following year. The third (Gr.-Lat.) appeared at Basel in 1555. The fourth ed. (that of Opsopœus = Koch) appeared at Paris in 1599, three years after the death of the editor. In 1817 the collection was expanded by Cardinal Mai's discovery of the Books xi.–xiv., which were printed first in his *Scriptorum vet. nova collectio*, vol. iii. pt. 3. Of more modern edd. the ones in common use are those of Friedlieb (Leipzig, 1852), Alexandre (Paris, 1860), and Rzach. Of these, the last, published at Prague in 1891, is by far the best for the text; it contains no excursus, but has a brief critical preface, and a most valuable appendix exhibiting the dependence of the Sibyllines on Homer, Hesiod, the Orphic hymns, etc. With the text of Rzach and the excursus of Alexandre, the student can find out almost all that is known of the Sibyllines. It is necessary to add a final caution with regard to the quotation of the books. There is a fluctuation in their numbering on the part of the editors, due to the imperfection of the series. The last four books, for example, are numbered ix. x. xi. and xii. by Friedlieb.

[Since the writing of the foregoing article, Geffcken's tract, entitled *Komposition und Entstehungszeit der Oracula Sibyllina*, has appeared, to which the student is referred for the latest view of the subject.] J. RENDEL HARRIS.

SAMARITAN PENTATEUCH.—i. HISTORICAL CONNEXION BETWEEN THE SAMARITANS AND THE PENTATEUCH.—The Samaritans are a mixed race, sprung from the remnants of the ten tribes which lost their independence in B.C. 722, and from the foreign colonists who were settled by the Assyrian kings in Central Palestine. Hence the question arises whether the Pentateuch was already known to the subjects of the Kingdom of the Ten Tribes. It might be supposed that this question must be answered in the negative, for the single reason that the Jahweh cultus introduced by Jeroboam I. (1 K 12^{28}) deviated to so large an extent from the Law. This argument, however, is not absolutely decisive, for even the kingdom of Judah, *e.g.* under Ahaz (2 K 16^{3}) and Manasseh ($21^{2ff.}$), witnessed frequent and serious departures from the legitimate religion. But there is at least one valid ground for the conclusion that the Pentateuch was first accepted by the Samaritans after the Exile. Why was their request to be allowed to take part in the building of the second temple (Ezr $4^{1f.}$) refused by the heads of the Jerusalem community (v.^{3})? Very probably because the Jews were aware that the Samaritans did not as yet possess the Lawbook. It is hard to suppose that, otherwise, they would have been met with this refusal. Further, one who, like the present writer, regards the modern criticism of the Pentateuch as essentially correct, has a second decisive reason for adopting the above view. Or does the very existence of the Samaritan Pentateuch present an obstacle to the conclusion at which most representatives of modern Pentateuchal criticism have arrived, namely, that the sources of the Pentateuch were united by Ezra into the one stream which we see in our Pentateuch? At the present day there is scarcely any longer a single writer who would claim that the Samaritan Pentateuch supplies any argument against the critical position. No such claim is made, for instance, by C. F. Keil in his *Einleitung in d. AT*, 1873, § 204, or by Ed. Rupprecht in *Des Rätsels Lösung*, II. i. (1896) p. 196 f., or by the Roman Catholic Fr. Kaulen in his *Einleitung in die Heilige Schrift*, 1892, § 194.

How long after Ezra's time it was when the Samaritans accepted the Pentateuch is uncertain. They may have already done so at the time that Nehemiah, upon the occasion of his second visit to Jerusalem (B.C. 433), expelled the son of Joiada, the high priest, who had married a daughter of the Samaritan prince Sanballat (Neh 13^{28}). For there was hostility between the Jews and the Samaritans even at a much later period, although the latter had adopted the Law. But the view that appears to be most probable is that the above-mentioned son of the high priest induced the Samaritans both to accept the Pentateuch and to build a temple of their own upon Mt. Gerizim. It is well known that Josephus (*Ant.* XI. viii. 2) relates how Manasseh, son of the high priest Ἰαδδοῦς, and son-in-law of the Samaritan prince Σαναβαλλάτης, fled to the Samaritans in the time of the Persian king Darius Codomannus. But here, in all probability, we have simply a chronological error, for later writers were weak in their knowledge of the chronology of the post-exilic period. For instance, in To 1$^{18-21}$ the years 701–681 are compressed into πεντήκοντα or τεσσαράκοντα ἡμέραι (Fritzsche, *Libri apocryphi*, pp. 110, 113), and in *Seder 'olam rabba* 30 it is said that the rule of the Persians after the building of the second temple lasted only 34 years (see, further, art. by the present writer in *Expos. Times*, x. [1899] p. 257). Nor are there wanting in the post-Biblical tradition indications pointing to the fact that it was near the time of Ezra that the Samaritans accepted the Pentateuch. For instance, in Bab. Talm. (*Sanhed.* 21*b*) we read: 'The Torah was originally revealed in the Hebrew character and in the holy [*i.e.* Hebrew] language, the second time in the Assyrian character and in the Aramaic language, and Israel chose the Assyrian character and the holy language, whereas it gave over the Hebrew character and the Aramaic language to the ἰδιῶται.'* This second revelation of the Law which is here presupposed, has in view the activity which, according to other passages of the tradition, Ezra displayed with reference to the Pentateuch. For instance, in Bab. Talm. (*Ṣukkā 20a*) it is said: 'The Torah was forgotten by the Israelites until Ezra came from Babylon and restored it' (other passages are translated in König's *Einleit. in d. AT*, p. 241 f.). Nor is there anything inexplicable in the circumstance that the Samaritans, about the year B.C. 433, accepted no part of the OT but the Pentateuch, for even the Jews exalted the Torah above the other parts of the OT. The Mishna enacts in *Megillā* iii. 1: 'If one sells books (*i.e.* parts of the OT other than the Pentateuch), he may take a Torah in exchange; but if one sells a Torah he may not take other books in exchange' (many further testimonies to this later appreciation of the Torah above the rest of the OT will be found in König's *Einleit.* p. 455 f.).

Later notices of the actual existence of the Samaritan Pentateuch are found in the Talmud (cf. Zach. Frankel, *Ueber den Einfluss der palästinischen Exegese auf die alexandr. Hermeneutik*, p. 243), in Origen (whose *Hexapla* reads on the margin of Nu 13^{1} ἃ καὶ αὐτὰ ἐκ τοῦ τῶν Σαμαρειτῶν ἑβραϊκοῦ μετεβάλομεν), and in Jerome (*Prologus galeatus*: 'Samaritani Pentateuchum totidem literis scriptitant, figuris tantum et apicibus discrepantes'). But about the year A.D. 1600 not even a scholar like Scaliger (*De emendatione temporum*, lib. 7) was aware whether there were copies of the Samaritan Pentateuch in existence in the East. At last, in the year 1616 Piedro della Valle purchased a complete manuscript of this Pentateuch from the Samaritans at Damascus. Between the years 1620 and 1630 Ussher collected in the East six copies of it. Since then many codices of this work have been collated; cf. de Rossi, *Variae lectiones VT*, 1784–88, vol. i. p. CLV f.; Rosen, *ZDMG*, 1864, p. 582 ff.; Abr. Harkavy, *Katalog der Samaritan. Pentateuchcodices in St. Petersburg*, 1874. The Samaritan Pentateuch was first *printed*, under the superintendence of Joh. Morinus, in the Paris Polyglott (1645). A second impression appeared in the London Polyglott (1657). It was published, transcribed in the square character, by Blayney at Oxford in 1790. Its peculiarities are also set forth in a separate column of Kennicott's *Vetus Test. heb. cum variis lectionibus* (Oxonii, 1776–80), and in H. Petermann's extremely interesting work, *Versuch einer hebräischen Formenlehre nach der Aussprache der heutigen Samaritaner*, 1868, pp. 219–326. In the latter will be found also a transcription of the whole of the Book of Genesis, as Amram, the then high priest of the Samaritan community at Nâblûs, dictated it to Petermann (pp. 161–218).

ii. COMPARISON BETWEEN THE SAMARITAN-HEBREW AND THE JEWISH-HEBREW PENTATEUCH.—(*a*) *The character of the MSS, and the method of dividing the text.*—The Samaritan manuscripts, like the majority of the Jewish ones, are of parchment or paper; the Samaritans likewise preferred the roll form for use in Divine worship. The Samaritan MSS want the vowel signs and the accents, which are employed in the Jewish Pentateuch. In lieu of these they exhibit the following signs: a point separates each word from the next; two points, similar to the colon in modern languages, mark off smaller and larger paragraphs (Kohn, *Zur Sprache, Litt., u. Dogmatik d. Samaritaner*, p. 1 f.). The whole Pentateuch is divided by the Samaritans into sections which they call קצין (*kaẓîn*). Of these they reckon in the Pentateuch 966 (Hupfeld, *ZDMG*, 1867, p. 20), while the Jews are accustomed to count in the Torah 379 close and 290 open *parashas* (cf. König, *Einleit.* p. 463).

(*b*) *Linguistic* differences. The *vowel letters* are much more frequently employed in the Samaritan than in the MT. Even *shĕwā* is many times indicated by ו or י: for instance, אוניות, a form which the MT first exhibits in 2 Ch 8^{18}, is written by the Samaritan in Dt 28^{68}, or נישורי is read for גְּשׁוּרִי in Dt 3^{14}. The orthography which the MT favours, especially in the earlier parts of the OT, agrees still oftener with that found on the Jewish coins. But the Samaritan Pentateuch thus reflects the latest stage of development reached by Hebrew orthography within the OT, and in a great many instances goes even beyond this. In the matter of *pronouns*, the unusual forms are regularly changed into the usual ones. For instance, הוא, which in the Pentateuch (Gn 2^{12} etc.) stands for the later היא 195 times, and which is altered in the MT *only in the margin*, is replaced by היא in the Samaritan *in the text*. The form נַחְנוּ, which is permitted in the MT, is changed in the Samaritan into אנחנו (Gn 42^{11}, Ex 16$^{7f.}$, Nu 32^{32}). As to the conjugation of *verbs*, the lightened form of the imperfect, the so-called jussive, is almost always changed into the ordinary form: וַיֵּשֶׁב (Gn 32^{1}) is replaced by וישוב (read by the high priest Amram as *uyeshôv*); יֵרָא (41^{33}) by יראה (*yere'i*); וָאֵרָא (31^{10} 41^{22}) by ואראה (*wêre'i*).—In the declension of *nouns*, the endings in *-ô* and *-î*, which, in spite of J. Barth (*ZDMG*, 1899, p. 598), are to be considered relics of the old case-endings, are almost uniformly dropped: חַיְתוֹ appears as חית in Gn 1^{24} (בנו of Nu 23^{18} 24$^{3.15}$ is left unaltered); גנבתי as גנובת (*genuwat*) in Gn 31^{39}; and אֵימָתָה as אימה in Ex 15^{16}. In the construction of nouns, many of the marks are obliterated which point to a *nomen generis* being of common gender: *e.g.* נער 'young maiden' (Gn $24^{14. 16. 28. 55. 57}$ $34^{3. 12}$, Dt 22^{15-29} [except v.^{19}]), which the Massoretes altered *only in the margin*, is changed into נערה (*nâra*) *in the text* of the Samaritan (cf. Gesenius, *de Pentateuchi Samaritani origine*, etc. p. 28 ff.). The solitary occurrence of מֵ which the present writer (*Lehrgeb.* ii. 293) has been able to discover before the article in the Pentateuch is מֵהָעוֹף of Gn 6^{20}, and this disappears in the מן העופ (*min a'ôph*) of the Samaritan.—In the *lexical* sphere, the following differences are worthy of note: ילד 'beget' is replaced by the form that became usual in later times, הוליד, in Gn 10^{8} and 22^{23}. The verb נגח, which is used in Ex $21^{28. 29. 31. 32. 36}$ of the 'pushing' of an ox, is replaced by the more familiar verb הכה 'strike.'—Differences of a *syntactical* or *stylistic* kind are the following: the sentence הלבן מאה שׁנה יִוָּלֵד (MT of Gn 17^{17} 'shall a child be born to one who is a hundred years old?' LXX εἰ τῷ ἑκατονταετεῖ γενήσεται υἱός;) is in perfect agreement with the Hebrew linguistic usage as this appears in Gn 4^{18} etc. But the Samaritan has missed this construction, and substituted the easier *alben maat shena ulêd* (אוליד), 'shall I at the age of a hundred years beget a child?' In the MT of Gn 7^{2} the formula אִישׁ וְאִשְׁתּוֹ appears alongside of the synonymous pair of words זָכָר וּנְקֵבָה (v.^{3}). This variety of expression disappears in the Samaritan, which uses the latter formula in *both* verses. The asyndetic עֵץ (Gn 1^{11}), אֶל (3^{16}), הנפלים (6^{4}), תמים (v.^{9}), are changed into ועצ etc., and greater clearness is thus obtained.—Under the same heading may be ranged certain phenomena of *diction*, due to the Aramaic dialect, which afterwards became naturalized among the Samaritans. For instance, we find הררט for אררט (Gn 8^{4}), גבחים for גבהים (7^{19}), עמר for חמר 'wine' (Dt 32^{14}). The gutturals are thus very frequently interchanged, because to the Samaritan copyist, accustomed to the Aramaic dialect, they had lost their distinctive phonetic values. To the same cause are due such forms as that of the pronoun אתי (Gn $12^{11. 13}$ $24^{47. 60}$) and אתינ (31^{6}), or of צחקתי (for צחקת Gn 18^{15}), the infinitive לאזכרה (for לזכר 9^{16}), etc. (cf. Gesenius, *l.c.* p. 53 ff.).

---

* The view of L. Blau, expressed in his programme 'Zur Einleitung in die heil. Schrift,' 1894, p. 74, that the term ἰδιῶται here does not refer to the Samaritans, will not hold its ground.

(*c*) *Material* differences: (*a*) many passages are altered or supplemented from parallel passages. For instance, לא אעשׂה of Gn $18^{29f.}$ is replaced in the Samaritan by לא אשחית *lâ ashît*, after vv.$^{28. 31f.}$. The servant of Moses is called in the MT sometimes הוֹשֵׁעַ (Nu $13^{8. 16}$, Dt 32^{44}), and sometimes יהושׁ(ו)ע (Ex $17^{9f. 13f.}$ 24^{3} etc.), but the Samaritan writes the latter form even in the three passages in which the change of *Hoshea* into *Jehoshua* is recorded, so that we read in Nu 13^{16} 'and Moses called Jehoshua, the son of Nun, Jehoshua'! Again, in Gn 11^{11-26} the formula is regularly added, 'and all the years of . . . were . . . years, and he died,' which is derived from the parallel genealogy ($5^{5ff.}$). In 17^{14a} 'on the eighth day' is read in harmony with the parallel passage. After 30^{36} we find a long addition, which is borrowed from 31^{13}. Specially striking is the following series of passages: Ex 6^{9} (cf. 14^{12}) 7^{18} (cf. vv.$^{16-18}$) 7^{29} (cf. vv.$^{26-28}$) 8^{19} (cf. vv.$^{16-19}$) $9^{5. 19}$ 10^{2} 11^{3} (cf. $4^{22f.}$) 18^{25} (cf. Dt 1^{9-18}) 20^{17} (cf. Dt $27^{2. 5-7}$) 20^{21} (cf. Dt $5^{26. 28}$ 18^{18-22} $5^{27f.}$) 39^{21}, Nu 4^{14} 10^{10} 12^{16} 13^{33} 20^{13} $21^{11f. 20}$ 27^{23} 31^{20}, Dt 2^{7} 5^{18} 10^{7}. The remarkable circumstance about all these passages is that in every instance where it is recorded that Moses said or did something, this is always preceded by a statement in so many words that it was a Divine command that he should act so, and, wherever a Divine command is recorded, this is repeated in the same terms when we are told that Moses fulfilled it. This is a carrying to the extreme of that pleonastic form of expression which may be observed also in certain portions of the Jewish-Hebrew Pentateuch (cf. König, *Stilistik*, etc. pp. 169, 172, 176). That the above passages in the Samaritan Pentateuch are of secondary origin is sufficiently evident from the circumstance that its text there has not the support of a single ancient witness.—(*β*) There are differences due to a religious or other like interest. The statement in Gn 2^{2a} וַיְכַל אֱלֹהִים בַּיּוֹם הַשְּׁבִיעִי וג׳, 'and God declared all his work finished (see König, *Syntax*, § 95*b*) on the *seventh* day' was not understood, and so the seventh was changed into the *sixth* day (Sam. *beyôm eshshishshi*). The number 430 years, during which the Hebrews sojourned in Egypt, according to the MT of Ex 12^{40}, appeared to be too large, and hence the expression בארצ כנענ 'in the land of Canaan' was inserted before the words 'in the land of Egypt.' (By the way, the MT of Ex 12^{40} is shown by Ezk $4^{5f.}$ to have been the text in existence at the time of the prophet, for the 390+40 years of Ezk $4^{5f.}$ are nothing else than a reflexion of the 430 years of the Egyptian bondage of Israel). Again, the plural predicate with which אלהים 'God' is coupled in Gn 20^{13} 31^{53} 35^{7} and Ex 22^{8}, is changed into a singular, in order to avoid the appearance of polytheism (Kohn, *de Samaritano Pentateucho*, p. 22).—Another group is formed by the following passages.—The statement in Ex 24^{11} ויחזו 'and they beheld (*sc.* God),' is replaced by ויאחזו 'and they cleaved to (God),' the idea being that the Deity must have been strictly invisible. The conception of God was thus transcendentalized. In obedience to the same motive, so-called intermediary beings are introduced between God and man, אלהים ('God') being replaced by מלאכ אלהים ('an angel of God') in Nu 22^{20} 23^{4}, and יהוה by מלאכ יהוה in vv.$^{5. 16}$. Conversely, המלאך ('the angel') is once, Gn 48^{16}, changed into המלכ ('the king'), in order to avoid attributing to the angel what God Himself had accomplished, namely, the deliverance of Jacob. The Samaritans showed themselves in other instances as well very jealous for the character of God. From this motive they changed the words 'take all the heads of the people and hang them up' (Nu $25^{4f.}$) into 'command that they slay the men who attached themselves to Baal-peor,' the command as it runs in the MT appearing to involve an injustice on the part of God. To the same category belongs the substitution of 'hero (גיבור) of war' for 'man (אִישׁ) of war,' as a designation of God in Ex 15^{3}.—Yet another group of differences have for their aim the securing of the æsthetic purity of the Law. The Samaritans, for instance, have not only taken into the text those marginal readings which the Jewish Massoretes adopted for æsthetic reasons (Dt 28^{30}), but have replaced the term מבשׁיו 'his secrets' (25^{11}) by בשׂרו 'his flesh.'—Finally, it was upon national grounds that the name עיבל ('Ebal) was exchanged for גריזים (Gerizim) in Dt 27^{4}. It has been shown, notably by Verschuir (in No. iii. of his *Dissertationes philologicæ-exegeticæ*, 1773), that the context demands the building of the altar nowhere but upon Mt. 'Ebal. God is presented especially as witness to the oath and as avenger of any breach of it ($29^{12. 14. 19}$), and accordingly we look both for the building of the altar as a symbol of the Divine presence, and for the offering of sacrifice by the people, upon *that* mountain from which the curse was proclaimed (27^{13}). After the Samaritans, moved probably by 27^{12} where Gerizim is named as the mount of blessing, had built their temple upon this mountain to the south of Shechem, they would be led naturally enough to introduce the name Gerizim in v.^{4}. The Jews, on the other hand, had no interest to substitute the name 'Ebal for the name Gerizim, for the point that concerned them was not whether Gerizim or 'Ebal was to have the preference, but whether the hegemony belonged to Gerizim or to Zion (Jn 4^{20}).

In view of all these differences between the

Jewish-Hebrew and the Samaritan-Hebrew Pentateuch, there can be no doubt that what the Samaritans possess is a *later* form of the Pentateuch. Whether we look at the groups dealing with linguistic differences or at those connected with the subject-matter, the indications point to a *late* period. A sufficient evidence of this is supplied by the Jewish *marginal* readings which are taken by the Samaritans into the *text* itself, but the same conclusion follows equally from the theological peculiarities of the Samaritan Pentateuch which have been mentioned above. For the same transcendentalizing of the conception of God is met with also in the later writings of the Jews: *e.g.* the statement 'and God was grieved' (Gn 6^6) is replaced in the Targum of Onkelos by 'and He commanded by His מימרא (*word*) to destroy their energies according to His will.'

iii. RELATION OF THE SAMARITAN PENTATEUCH TO THE HELLENISTIC (*i.e.* THE SEPTUAGINT).—(*a*) Both these forms of the Pentateuch agree in many details of form. For instance, both, differing in this from the MT, have an 'and' before 'tree' in Gn 1^{11} (MT עֵץ, Sam. *wez̧*, LXX *καὶ ξύλον*). The case is the same in 3^{16} (אֶל־הָאִשָּׁה *wel a'ishsha*, *καὶ τῇ γυναικί*), 6^4 (הנפלים *wannephilem*, *οἱ δὲ γίγαντες*), and $6^{15.19}$. Again, both have in common some considerable deviations from the MT. In Gn 2^2 the LXX, like the Samaritan, has replaced 'on the seventh day' by 'on the sixth day' (*τῇ ἡμέρᾳ τῇ ἕκτῃ*). Instead of the strange order 'earth and heaven' which the MT exhibits in Gn 2^{4b}, the other two forms of the Pentateuch have the more usual succession of the two words (*shamêm waarez̧*, *τὸν οὐρανὸν καὶ τὴν γῆν*). Both supplement the words of Cain in 4^8 by 'let us go into the field' (*nelaka ashshadi*, *διέλθωμεν εἰς τὸ πεδίον*). Both interpolate into the MT of Ex 12^{40} the words 'in the land of Canaan,' but, while the Samaritan has this addition *before*, the LXX has it *after*, the words 'in the land of Egypt.' Finally, the Samaritan and the LXX agree in some of the expansions of the MT which are derived from parallel passages. For instance, in Gn 1^{14} there is the addition 'to give light upon the earth' (*la'êr al aarez̧*, *εἰς φαῦσιν ἐπὶ τῆς γῆς*), and in 11^8 'and the tower' (*wit ammegdal*, *καὶ τὸν πύργον*) is added.

(*b*) Differences between the Samaritan and the LXX. As regards the use of 'and,' the LXX agrees with the MT in Gn 6^9 (צדיק תמים, *δίκαιος τέλειος*, against Sam. *z̧adêk̦ utamem*). The LXX prefers asyndesis in *τὸν Σήμ, τὸν Χάμ, τὸν Ἰάφεθ*, as against the syndesis of the MT ('Shem, Ḥam, *and* Japheth') and the polysyndesis of the Samaritan (*it Shem wit Am wit Yephet*). In 2^{25} the האדם of the MT and the *ὁ Ἀδάμ* of the LXX agree, but the Samaritan has the anarthrous אדם (*adam*), whereas in 3^{20} the article is wanting alike in the Samaritan (*adam*) and the LXX (*Ἀδάμ*). In 3^3 the MT and the LXX have the simple expression 'the tree,' but the Samaritan reads 'this tree' (*a'iz̧ azze*). The LXX has different numbers from the Samaritan in the genealogies of Gn $5^{3ff.}$ and $11^{10ff.}$. Finally, in the sphere of religion, the Samaritan Pentateuch has retained the Divine name Jahweh in its *text*, only that the Samaritans read for it *Shema* (Petermann, *l.c.* p. 162), which means 'the name' *κατ' ἐξοχήν*. This use of the expression 'the name' has the foundation already laid for it in Lv 24^{11}, and makes its appearance for the first time in the Mishna in the words 'Let him offer a short prayer, saying, Help, O name (הַשֵּׁם), thy people the remnant of Israel' (*Bĕrākhôth* iv. 4). The Greek Jew has already replaced in his *text* the most holy Name יהוה (*Jahweh*) by the expression 'the LORD' (*ὁ κύριος*) which the Hebrew Jews placed in the *margin*. But, on the other hand, the Greek Jew has retained the term 'God' in Nu 22^{20} and 23^4 (*ὁ θεός*), whereas the Samaritan has introduced the expression 'angel of God,' thus raising the Deity above any intercourse with man.

iv. SOURCE OF THE PECULIARITIES OF THE SAMARITAN PENTATEUCH.—Four principal suggestions have been made to account for these peculiarities.

(*a*) May not the features in which the Samaritan and the Greek Pentateuch agree with one another, and differ from the Jewish-Hebrew Pentateuch, be traceable directly to certain views and aims of later scribism? This is not only possible, but is even positively favoured by the circumstance that the relation of the Samaritan and the Greek to the Jewish Pentateuch is a mixture of agreement and difference. Let us look at two examples. The later scribes held that אדם in Gn $2^{20ff.}$ is not the *nomen appellativum*, 'man,' but the proper name 'Adam.' This common opinion, however, found expression in various ways. The Hebrew-Jewish Massoretes pronounced, in 2^{20} $3^{17.21}$ *le-adam*, *i.e.* without the article, because this was possible in these three passages without alteration of the *text*, which in the other two passages (2^{25} 3^{20}) would have had to be altered to get rid of the article. The Greek Jew likewise retains the article in 2^{25} (*ὁ Ἀδάμ*) and drops it only in 3^{20}. But the Samaritan in *both* these passages has introduced the anarthrous word אדם (*adam*) into the text. Again, the view that the 430 years of Ex 12^{40} included Israel's sojourn in Canaan *and* Egypt, finds expression in *different* ways in the Samaritan and in the LXX.

(*b*) Is it more likely that the readings wherein the Samaritan and the LXX agree in differing from the MT were found in older Hebrew codices? (Abr. Geiger, *Urschrift u. Uebersetzungen*, p. 99 f.; de Wette-Schrader, *Einleit.* p. 98; Vatke, *Einleit.* p. 109). There are traces, of course, of Jewish-Hebrew MSS whose text deviates in some points from the MT. For instance, the tract *Ṣôphĕrîm* (vi. 4) relates that 'Three books were found in the forecourt (בעזרה): in one was found written הוא eleven times, and in two היא eleven times, and the two were declared to be right, and the one was left out of account.' That is to say, a manuscript was discovered in the forecourt of the temple in which the personal pronoun of the 3rd pers. sing. was expressed by הוא not only in the well-known 195 passages, but also in the other eleven passages of the Pentateuch, where that pronoun occurs. Yet this is but a weak support for the view that at one time a Jewish-Hebrew MS of the Pentateuch contained the peculiarities wherein the Samaritan and the LXX differ from the MT. Or may it be supposed that a Jewish-Hebrew MS of this kind took its rise amongst the Hellenistic Jews in Egypt? (Riehm, *Einleit.* ii. 446). At all events, the accounts we have of the origin of the LXX know nothing of Egyptian MSS of the Heb. Pentateuch which formed the basis of the Greek translation.

(*c*) Or are we to hold that the Samaritan Pentateuch was subsequently corrected from the Greek? (Ed. Böhl, *Die alttest. Citate im NT*, p. 171). This view cannot be set down as absolutely impossible, but it raises new and difficult questions. Was there once a Greek Pentateuch, which was simply copied by the Samaritans? There is no evidence for this, nor is it likely. On the other hand, if the present text of the LXX was used by the Samaritans for correcting their Pentateuch, why did they adopt only a portion of the peculiarities of the LXX?

(*d*) The same difficulties arise if we assume that it was a Samaritan-Hebrew codex (Eichhorn, *Einleit.* ii. 641 f.) or a Samaritan-Greek codex (Kohn, *Samaritanische Studien*, p. 38 ff.) that was translated at Alexandria. For, in the first place, tradition knows nothing of this. Secondly, it is not in the least likely that as early as the 3rd cent. B.C., when the so-called Septuagint version of the Pentateuch originated, so many Samaritans had adopted the Greek language that a Greek translation of the Pentateuch would have been executed for their use. It is true there are 43 Greek passages which are marked by Origen as *τὸ Σαμαρειτικόν* (Field, *Origenis Hexaplorum quæ supersunt*, p. lxxxii ff.). It is also certain that these passages are relics of a complete Greek translation of the Pentateuch (Kohn, 'Das Samareitikon' in *Monatsschrift f. Gesch. u. Wissensch. d. Judenthums*, 1894, pp. 1–7, 49–67), which was prepared for the use of Samaritans living in Greek-speaking countries. For we are told that Symmachus put forward his Greek translation in opposition to a Greek translation which was current among the Samaritans (Epiphanius, *de Ponderibus et Mensuris*, c. 16). But there is not the slightest probability that this Greek translation was older than the LXX.

When all these considerations are taken into account, the first of the views enumerated above remains the most probable, namely, that the greater part of the differences which show themselves between the MT and the Samaritan Pentateuch, grew up through the influence of later currents of thought, just as is the case with the majority of the differences between the MT and the LXX.

We see the influence of later hermeneutics and theology continuing to work in another form which the Pentateuch assumed among the Samaritans, and which must not be confused with the Samaritan

Pentateuch hitherto spoken of. When the W. Aramaic dialect had inundated also Central Palestine, the Samaritan-Hebrew Pentateuch was *translated* into this new country dialect of the Samaritans. Thus originated the Samaritan Pentateuch-*Targum*, which, according to the tradition of the Samaritans, dates from the 1st cent. B.C., and is attributed to a priest, Nathanael, but which is more correctly derived, with Kautzsch (*PRE*^{2} xiii. p. 350), from the 2nd cent. A.D. This translation was first printed in the Paris (1645) and London (1657) Polyglotts, and the text given there was transcribed in the square character by Brüll (*Das Samaritanische Targum*, 1873–75). After fresh comparison with many MSS, it was published by H. Petermann under the very misleading title *Pentateuchus Samaritanus* (1872–91). The Oxford *Fragments of a Samaritan Targum*, published by Nutt in 1874, have also been used by Petermann in restoring the text of Leviticus and Numbers, as well as the St. Petersburg Fragments published by Kohn in 1876, which are made use of in the 5th part, which embraces Deuteronomy. 'But there are more variants than appear in Petermann-Vollers,' says P. Kahle in his *Textkritische und lexicalische Bemerkungen zum samaritan. Pentateuchtargum* (1898), pp. 8, 11, etc. On the character of this Targum the reader may now compare, above all, the thoroughgoing article of Kohn in *ZDMG*, 1893, pp. 626–97. Kahle (*l.c.* p. 8) remarks that in the Targum 'the Hebrew-Samaritan text is rendered slavishly, word for word.' Yet the transcendentalizing of the Divine and the glorification of Moses show themselves in a still higher degree here than in the Sam. Pentateuch itself.

After the Mohammedan conquest of Palestine (A.D. 637), when Arabic was becoming more and more the medium of intercourse employed by the Samaritans, Abu Sa'îd in the 11th cent. translated the Pentateuch into Arabic. (The books of Genesis, Exodus, and Leviticus in this translation have been edited by A. Kuenen, 1851–54). The so-called Barberini Triglott, a MS which was deposited in the Barberini Library at Rome, exhibits in three columns the Samaritan-Hebrew text, the Samaritan-Aramaic, and the Samaritan-Arabic versions.

ED. KÖNIG.

RACES OF THE OLD TESTAMENT.—*Scope and Definition.*—It is essential to the proper treatment of a subject to determine first of all its scope. In the broad sense of the term, the races of the OT include all the peoples that are mentioned within that promiscuous compilation representing a large number of distinctive works and embracing the remains of a literature which covers a period of almost one thousand years of intellectual activity. The character of this literature, as thus defined, makes it natural that the geographical horizon of the OT writers should be practically coextensive with the then existing ethnological knowledge. By actual contact the Hebrews are brought into relationship with the entire group of nations settled around the Mediterranean, as well as with many inland groups to the north, east, south, and south-west of the land which became the home of the Hebrews *par excellence*. The early traditions and the legendary accounts of periods and personages lying beyond the confines of trustworthy knowledge, increase this number by many races of which little more than the names have been preserved. To give an exhaustive account, therefore, of the races of the OT would involve writing a treatise on ancient ethnology.

On the other hand, as ordinarily understood, the races of the OT include primarily those peoples only which stand in close contiguity to the central group in the scene of OT history—the Hebrews themselves; and here, again, a further twofold division suggests itself, viz. between those which belong to the more immediate ethnic group of which the Hebrews form a part, and those which lie outside of these limits. Confining ourselves in the main to a discussion of the theme in the narrower sense, it will meet our purposes best to treat it under these two aspects.

i. THE HEBREWS AND SEMITES.—The group historically known as the Hebrews, and forming the confederation of tribes to which the name Bĕnê Israel is given in the OT, forms part of a larger group known as the SEMITES. By virtue of this relationship, and in consequence of the geographical distribution of the other branches of the Semites, it is to the Semitic family that the races most prominently mentioned in the OT belong. The term Semite is used both in an ethnological and in a linguistic sense. As originally employed by J. G. Eichhorn [*] at the close of the 18th century, it embraced the peoples grouped in Gn 10 as the 'sons of Shem.' Since, however, it has been ascertained that the peoples thus grouped do not belong to one race or even to allied races, the ethnological application of the term has been modified to designate a race distinguished by the following features: dolichocephalic skulls; curly and abundant hair; slightly wavy or straight strong beard, the colour predominantly black; prominent nose, straight or aquiline; oval face.[†]

It must, however, be borne in mind that the pure type is comparatively rare. At an exceedingly remote period the mixture of Semites with Hamites and Aryans began, so that except in the less accessible regions of central Arabia it is doubtful whether pure Semites exist at all. So pronounced has this mixture been that some investigators regard the Semites as the product of two races—a blonde and a dark race; but the introduction of such a division is confusing. The mixture has not been with one race but with many races, and hence it is but natural that a variety of types should have been produced. The preponderating type, however, being dark, it is legitimate to conclude that the latter represents the original stock, and that the 'blonde' Semites furnish the proof precisely of that admixture which we know from other sources actually took place.

Where the original home of the Semites lay is a matter of dispute, and will probably never be settled to the satisfaction of all scholars. The drift of scholarly opinion, after vacillating between southern Babylonia, the eastern confines of Africa, southern Arabia, and the interior of the Arabian peninsula, is now in favour of the latter region.[‡] It is, at all events, in central Arabia that the purest Semitic type is still found, and, so far as known, it was invariably from the interior of Arabia that the Semitic hordes poured forth to the north-east and north-west and south to establish cultured States or to assimilate the culture which they already found existing.

It is in this way that we may account for the greatest of Semitic States—that of BABYLONIA and ASSYRIA in the Euphrates Valley and along the banks of the Tigris. The course of culture in Mesopotamia is from south to north, and this fact is in itself an important indication that the Semites who took possession of Babylonia came from a district lying to the south of Babylonia. The Babylonians and Assyrians thus form a distinct branch of the Semites, though at the same time furnishing an illustration of the admixture with other races upon which we have dwelt. The Euphrates Valley appears to have been from time immemorial a gathering-place of various nations, and, in passing, it may be noted that the Biblical legend of the confusion of tongues (Gn 11), which significantly takes place in Babylonia, appears to be based upon a dim recollection of this circumstance. So far as present indications go, the Semites upon coming to the Euphrates Valley already found a culture in existence which, however, they so thoroughly assimilated, and on which at the same time they impressed the stamp of their peculiar personality to such an extent, as to make it substantially a Semitic product. Indeed, the presence of this earlier culture was probably the attraction which led to the Semitic invasion from the interior of Arabia, just as at a later date the Semitic civilization of the Euphrates attracted other Semitic hordes towards making a northern movement from this same region. It is among these hordes, pouring out of the steppes of Arabia, and proceeding in the direction of the Euphrates Valley, that we are to seek for the ancestors of the Hebrews.

[‡] For recent discussions of the various theories, see Nöldeke, *Die semitischen Sprachen* (Leipzig, 1887), and his article 'Semitic Languages' in *Encyc. Brit.*^{9}; also Brinton and Jastrow, *The Cradle of the Semites* (Philadelphia, 1891), where further references will be found; and more recently G. A. Barton, *A Sketch of Semitic Origins* (New York, 1902). ch. i.

The sociological process which began thousands of years ago is still going on at the present time, where nomadic groups, attracted by the opportunities of spoil, continue to skirt the regions of culture in the East, with the result that a certain proportion of them are permanently gained for the cause of civilization, and settle in culture centres.* The Biblical tradition which goes back to settlements on the Euphrates—Ur and Ḥarran (Gn 11^{28-31})—finds an explanation in such a movement. Forming part of a nomadic invasion, the Hebrews were among those who, allured by the attractions of Babylonian culture, made settlements of a more permanent character along the Euphrates, first at Ur and later farther north at Ḥarran. That, however, these settlements did not involve casting aside nomadic habits altogether, is shown by the Biblical tradition which records a movement of Hebrews from Ur to Ḥarran and thence by the northern route into Palestine. The presence of an Eliezer clan of Damascus in close affiliation with Abraham (Gn 15^2) and his band, points to a temporary settlement at Damascus on the route to the west. Once on the west of the Jordan, the Hebrews continue their semi-nomadic habits for several centuries, and it is not until the 11th cent. that this stage in their career is definitely closed.

These movements of the Hebrews, as recorded in a blurred, and yet for that reason not altogether unhistorical tradition, suggest, as already pointed out, the manner in which southern Mesopotamia became a thoroughly Semitic State, the invading Semites absorbing the old culture (whatever that was, and whatsoever its origin may have been), and giving a new direction to the further intellectual, social, and religious development of the Euphrates Valley. This parallel also indicates—what is more important for our purposes—a common origin for the Semites who obtained possession of Babylonia and those who, after moving up and down the western outskirts of Babylonia, entered Palestine. The testimony of language bears out this supposition, for the relationship between Hebrew and Babylonian is such as to warrant our concluding in favour of the descent of the two peoples from one common branch to which the name 'Aramæan' may be given.

It is both interesting and significant to find that tradition preserves the appropriateness of this designation. On a solemn occasion, when the Hebrew, appearing before Jahweh, is to recall his past, a formula is introduced in which he refers to his ancestor as 'a stray (אֹבֵד) Aramæan' (Dt 26^5).

1. The ARAMÆAN branch of the Semites thus assumes large dimensions. Besides the Babylonians and Assyrians and Hebrews, it includes the Semites who settled in Syria as well as the groups of Moabites and Ammonites settled on the east side of the Jordan, while the Phœnicians settled on the Mediterranean coast constitute another Aramæan division or offshoot. Of the relationship existing between Hebrews and Babylonians we have already spoken. *When* the early contact in the Euphrates district began, of which Biblical tradition preserves a faint recollection, it is impossible to say; nor must it be supposed that the Hebrews at the time of their forward movement from interior Arabia were sharply differentiated from the promiscuous groups of Semites who participated in the movement.

By virtue of the relationship existing between Hebrew and the various Aramaic dialects, particularly between Hebrew and Aramaic in its oldest form,* we are justified in thus placing the group subsequently distinguished as a conglomeration of clans, from which the Hebrews trace their descent, in the same category with that large and somewhat indefinite branch of Semites which we have already designated as Aramæan. While the relationship between Hebrews and Babylonian-Assyrians was never entirely broken off, political or commercial associations being maintained with but short interruptions between Mesopotamia and Palestine from the time of the permanent settlement of the Hebrews to the west of the Jordan, down to the destruction of the two Hebrew kingdoms in the 8th and 6th cents. respectively, this relationship was not so close as that which was maintained between the Hebrews on the one hand, and the Moabites, Ammonites, Edomites, Ishmaelites (or Arabs), Phœnicians, and other subdivisions of the great Aramæan branch, on the other. Among the races occurring in the OT, it is these which occupy the most prominent place in Hebrew history. It seems desirable, therefore, to dwell upon them in greater detail.

The tradition recorded in Gn 19^{30-38} which ascribes the origin of the MOABITES and AMMONITES to an act of incest committed by Lot with his two daughters, simply reflects the hostility between these two nations and the Hebrews. To throw discredit upon an opponent's ancestry is a favourite method in Arabic poetry of expressing one's contempt and inveterate hatred. More significant, as pointing to the close bond between these three groups, is the circumstance that Abraham and Lot are represented as uncle and nephew. Interpreted historically, this relationship points to a clan or group of clans exercising supremacy over another group or sending forth this group as an offshoot. The character of the Abraham-Lot cycle of stories points to the latter contingency. The separation of Lot from Abraham (Gn 13) is decisive in this respect. It is the form in which tradition records the recollection that one group is an offshoot of a larger one. The quarrel between Abraham's 'men' and the followers of Lot is the common occurrence among nomads. They separate into little groups, and, as these groups grow, rivalry ensues, leading to further separation. We are therefore justified in concluding that Moabites and Ammonites were at one time not differentiated from the Hebrews, or rather that all three belonged to a single group, whatever the name of that group may have been. That there were other clans or tribes arising from that general group is quite certain, and, as this body of Aramæan tribes moved northwards from the Euphrates Valley and settled to the east and west of the Jordan, they were joined on the road by others. It is not necessary for all the members of the group to have come into Palestine at one time. On the contrary, it is more likely that, owing to circumstances beyond our knowledge, it was a series of waves of emigration that led Aramæan groups away from the Euphrates and by a devious northern route towards lands farther to the west. The Hebrews, Moabites, and Ammonites were carried along by these waves; and, whatever the order in which they came, the motives leading them to the west were the same in all. Language again comes to our aid in confirming this theory of the intimate bond uniting Hebrews to Moabites and Ammonites. The Moabite Stone (see vol. iii. p. 404 ff.), found in 1868 at Dibon, the capital of Moab, and recording the deeds of Mesha, king of Moab (*c.* 850 B.C.), proves that Hebrew and Moabitish differ from one another as much as and no more than the dialect of northern Germany differs from the speech of southern Germany, while the proper names of Ammonitish rulers and gods in the OT, in default of Ammonite records which have not yet been found, indicate that Hebrew and Ammonitish stood in the same close relationship to one another. That the political relations continued to be hostile from the first differentiation of the three groups, is the natural outcome of conditions which still characterize the districts once occupied by the Moabites and Ammonites.

---

* See Lady Anne Blunt, *The Bedouin Tribes of the Euphrates* (London, 1879), especially chs. xxiii. and xxiv.

* *e.g.* the inscriptions of Teima (*c.* 6th cent. B.C.) and the inscriptions of Zinjerli (8th cent. B.C.).

The case is somewhat different with the EDOMITES. The fact that they do not enter upon the scene until after the Hebrews had crossed the Jordan is significant. The process of differentiation had progressed sufficiently to single out of the Aramæan branch the Hebrews as a distinct subdivision. If tradition is to be trusted, the continuation of this same process which led to the separation of the Abraham and Lot clans, further divided the Hebrews into two subdivisions, one represented by Isaac—Jacob—Israel, the other by Ishmael—Esau—Edom. The double line of tradition, however, complicates the situation considerably. Ishmael and Isaac as 'sons' of Abraham are paralleled by Esau and Jacob as 'sons' of Isaac. To conclude that the Abrahamitic group first separated into two subdivisions, Isaac and Ishmael, and that subsequently another differentiation took place between Esau and Jacob as branches of the Isaac group, seems tempting; but this simple solution of the problem encounters some obstacles. The ISHMAELITES, according to Biblical tradition, are identified with the large body of tribes in central northern Arabia, and the Arabs themselves have accepted this tradition; but the unequal proportion between the two, the Hebrews representing a well-defined group of comparatively small extent, while the Ishmaelites assume the dimensions of a branch of the Semites as extensive and as undefined as the 'Aramæans,' raises the suspicion that the Biblical tradition in this instance is not of popular origin, or at all events not wholly popular, but due to a 'learned' theory which attempted to account for the close racial and the no less close linguistic affinities between Hebrews and Arabs. The theory is naturally interpreted in the OT with due allowance for national pride, so that, while Ishmael is conceded to be the older son of Abraham (Gn 16^{15}), Isaac is the favourite one (22^{2}). While, again, the tradition is forced to make the concession to historical fact in predicting for Ishmael a large progeny (Gn 16^{10}–17^{20}), and otherwise admitting Elohim's partiality for Ishmael (*e.g.* 17^{18}),—witness the act of circumcision which admits him into the covenant with Elohim (17^{23-26}), and Ishmael's miraculous deliverance (21^{13-20}),—the general aim of the tradition is to play off Isaac against Ishmael. This is consciously done, and in a manner quite different from the naïve way in which in other instances popular tradition is given a literary form. If in addition it be borne in mind that, in the actual history of the Hebrews, Ishmaelites play no part, it seems plausible to conclude that the Ishmaelitic current in the OT tradition is not of popular origin. The Ishmaelites do not dwell in Palestine or in the immediately adjacent districts, and popular tradition takes no interest in groups of peoples with which it has nothing to do. At most, Ishmael's being driven away from the domain set aside for Isaac may recall a settlement in Palestine prior to the advent of the Hebrews; but even this element of historical sediment in the tradition is doubtful, and it seems more plausible to assume that the separation of Isaac and Ishmael is a 'doublet' suggested either by Lot's separation from Abraham or Jacob's separation from Esau, the story itself being introduced to account for the ethnic relationship between Hebrews and Arabs. As such it has its value and, in a certain sense of the word, its justification.

2. The ARABS represent the second great branch into which the Semites may be divided, and as further subdivisions of this branch we may distinguish (1) the Arabs of central and northern Arabia; (2) the Arabs of southern Arabia; (3) the offshoot of the latter in Africa—notably in Abyssinia; (4) the offshoots in modern times of the Arabs of northern and central Arabia in (*a*) Egypt and the N. African coast, (*b*) Palestine and Syria, (*c*) India and the Malay Archipelago.

So far as the OT is concerned, we are interested only in the first two subdivisions. The culture of the Arab branch of the Semites begins in the south — in southern Arabia and in Abyssinia. Which of these is the original and which the offshoot is a question which a number of years ago could have been answered without hesitation in favour of the former, but which now is an open one. During the past two decades, inscriptions have been found in Yemen and in Abyssinia revealing the existence of several important kingdoms in southern Arabia, and indicating both here and on the opposite African coast a noteworthy degree of culture, the age of which is at least fifteen hundred years before our era, and which may turn out to be considerably older.

If the theory which places the home of the Semites in central Arabia be accepted, the probabilities are that, corresponding to a northern movement, there was a tendency for certain groups of Semites to spread towards the south; and if the culture in the south was actually established by them in this way, it would also be natural to suppose that this culture was carried by emigrants from Yemen to Abyssinia. However that may be, the language of southern Arabia, known as Himyaritic,—subdivided into a number of dialects, — and that of Abyssinia, known as Ethiopic, prove a close connexion between the groups inhabiting this district. It is interesting to note that southern Arabia and Abyssinia are mentioned in the famous description of the rivers of Paradise (Gn 2^{11-13}); for, whatever the origin of the name *Ḥavîlah* is, there is little doubt that some district of Arabia is meant,* while the land of *Cush* is, to the writer of Gn 2, Ethiopia.

The historical relations between Hebrews and the Arabs of southern Arabia appear to have been entirely of a commercial character, and these seem to have been confined to the short period of political glory which tradition associates with the reign of Solomon. This commercial intercourse between southern Arabia and Palestine gave rise to the 'Midrashic' tale of the queen of Sheba's visit to Solomon (1 K 10^{1-10}), to which the Arabs have added as supplement Solomon's visit to Yemen.* The Arabs have also retained the recollection of the twofold division of the branch, and, in the genealogical lists prepared with such infinite care by the genealogists, one branch—the northern—is traced back to Adnan, and the other —the southern—to Kaḥtan.

---

* Glaser, *Skizze der Geschichte und Geographie Arabiens* (Berlin, 1890), ii. 323-326.

The Ethiopians were well known to the Hebrews, and the prophets are fond of introducing allusions to them into their orations (*e.g.* Is 18^{1}, Jer 46^{9}, Ezk 29^{10} 30^{4} etc., Nah 3^{9}, Zeph 3^{10}), although *Cush* does not always stand for Ethiopia.

Coming back to the tradition in Genesis which divides the Hebrews after Isaac into two divisions —Jacob-Israel and Esau-Edom—there can scarcely be any doubt that we have here again a case of a popular tradition and perfectly reliable, in so far as it points to a common origin for the Hebrews and the Edomites. While the Moabites and the Ammonites remained east of the Jordan and the Hebrews moved to the west, the Edomites eventually established themselves to the south and southeast of the Hebrews; though, retaining their nomadic habits of life and nomadic fierceness of manner, they frequently made incursions into the territory of their neighbours. The form of the Biblical tradition would also indicate that the Edomites formed part of the 'Aramæan' emigration that entered the lands to the east of the Jordan in a series of migratory waves, coming by the northern route from the Euphrates district. Jacob and Esau are represented as twin sons of the Isaac and Rebekah clans. The marriage between Isaac and Rebekah, interpreted historically, means that a branch of the Abrahamitic group formed an alliance with another group which, in continuation of the western movement that brought Abraham and Lot to the west, prompted other Aramæan groups to follow the example. Rebekah coming from 'Aram-naharaim' to join the Hebrew group is a proof for the theory above maintained, that the stream of 'Aramæan' emigration to the west continued steadily for an indefinite period, and perhaps never ceased entirely. Alliances between small groups are common among the nomads to this day; but the result is generally that after a time a separation again takes place, not necessarily between the same groups, but in the next generation or two, by which time the growth of the united group has been such as to engender rivalries among the members.

In the case of Jacob and Esau there is another reason for the separation, and one of no small historical moment. It was natural that some at least of the Aramæan hordes, attracted to the Euphrates district by the culture existing there, should have been influenced by the example of this culture to take a forward step in civilization. We may safely set down Babylonian culture as an important factor in bringing about the division of the Semitic nomads into two classes—those of the fiercer grade retaining their nomadic habits unchanged, dependent upon hunting and plunder for their sustenance; and the higher grade, softer in manner, wandering about, followed by their flocks, and continuing nomadic habits chiefly for the sake of the latter and because of the necessity of seeking proper pasturage at the various seasons of the year. Those groups of the Aramæan branch which became differentiated as Hebrews, Moabites, and Ammonites, attain the higher grade at the time of their entrance into western lands or shortly thereafter, while the Edomites represent a subdivision which either relapses into the fiercer state —a not uncommon experience—or was, for some reason or other, prevented from taking the step forwards which eventually leads to the agricultural stage, and with this the complete laying aside of nomadic habits. Jacob, described as 'a tent dweller' (Gn 25^{27}), represents the nomad on the road to culture, and is contrasted with Esau the hunter — the Bedawî proper* (*ib.*). A hint of impending change in social conditions is already furnished by the tradition associated with Abraham and Isaac of digging wells (Gn 26^{14-33}) for the needs of the extensive herds of sheep and cattle which they acquired (v.^{14}). This being the case, it is not easy to account for the close association of the two groups, Jacob and Esau, representing such different levels of culture, and why there should be, in the case of one of the subdivisions of the Hebrew group, a reversion to the ruder nomadic type. Such, however, is evidently the case, and the Edomites, tracing back their descent to the Esau clan, represent a branch of the Hebrews that remained in a lower stage of culture, while the other steadily advanced till the agricultural stage was reached. The bond between the Israelites and the Edomites appears to have been much closer than that between the Hebrews and any other subdivisions. The rivalry, too, appears to have been keener. There is not merely hatred between Jacob and Esau, but the former adroitly dispossesses the latter, drives him away from his inheritance back almost to the desert, where he takes up much the same sort of life as that led by the Semites before coming into touch with culture at all. Still, the recollection that Israel and Edom are brothers is preserved in the popular mind in quite a different manner from that in which Ishmael and Isaac are so spoken of. A late psalmist (Ps 137^{7}) still denounces the treachery of Edom at the time of the downfall of the Southern kingdom as particularly reprehensible, because, as a brother, he should have come to the rescue instead of helping to the downfall of Judah. It lies, of course, outside the province of this article to consider the details of the relationship between Israel and Edom. For our purpose it is sufficient to specify in this general way the relationship existing between the Hebrews and the various subdivisions of the Aramæan and Arabic branches of Semites.

Two other branches of the Arabic group which appear prominently among the races of the OT are the Amaleḳites and the Midianites. The tradition recorded in Gn 36^{12} traces the AMALEḲITES back to Esau. Like the Edomites, they represent the fiercer type of the Bedawîn. Their first encounter with the Hebrews takes place during the period when the latter themselves are still in the nomadic stage. The rivalry between the two must have been bitter indeed, since the hatred of the Hebrews towards the Amaleḳites not only survives to a late period, but is inculcated in the Pentateuch as a religious duty (Dt 25^{17-19}). While originally the name of an Arab tribe settled around Ḳadesh, the term seems to have come to be applied to roaming bands of marauders in general. It is in this way probably that we are to account for the presence of Amaleḳites not only at Rephidim (Ex 17^{8-16}), but as far north as Mt. Ephraim (Jg 12^{15}, cf. 5^{14}). Indeed the Hebrews are molested by Amaleḳites as late as the days of Saul (1 S 15^{1-9}), and it was left for David to drive them finally back to their desert haunts (1 S 30[1-20]). The Ḳenites and Ḳenizzites settled around Ḥebron are set down as branches of the Amaleḳites who joined the federation of the Bĕnê Israel, and this defection must have intensified the hatred of the Amaleḳites for Israel, and led to atrocities and barbarous treatment of captives on the part of the Amaleḳites, the recollection of which survived among the Hebrews to a late day.

---

* Weil, *Biblische Legenden der Musselmänner* (Frankfort, 1845), pp. 245–275.

* The Arabic word *bedwîj* signifies the 'one outside,' and is therefore the equivalent of the Hebrew phrase 'man of the field' (Gn 25^{27}).

The application of the name *Amaleḳ* to Bedawîn in general finds a parallel in the still more indefinite manner in which the term *Midian* is used by some OT writers. That the MIDIANITES also belong to the Arabic group of Semites is sufficiently shown by their settlement around Mt. Sinai, where we first find them (Ex 2[15. 17]) described as shepherds. They were evidently regarded as already, in the days of Moses, belonging to the milder class of Bedawîn—the nomad on the road to culture; and yet subsequently, in the period of the Judges, the Midianites are in alliance with the Amaleḳites (Jg 6[3]). In genuine Bedawîn fashion they pounce down upon the Hebrews, who had now become agriculturists, and rob them of their flocks and belongings. At this time they are scarcely to be distinguished from the Amaleḳites; and the two groups become synonymous with the marauding bands of Bedawîn, belonging in reality to a vast number of different tribes who constantly threaten the existence of the cultured States of Palestine.

3. There is still one branch of the Semites to be considered which receives prominent mention among the races of the OT—the PHŒNICIANS. If we were to be guided by the testimony of language alone, the settlers along the northern Mediterranean coast certainly belong to the same branch as Hebrews, Moabites, Ammonites, and Edomites; but the totally different social conditions prevailing in Phœnicia, and the unique rôle played by the Phœnicians in history as merchants and seamen, suggest that another factor is at work here. The theory has been advanced and met with considerable favour, that the Phœnicians were not the original settlers of the coastland of Syria, but came there from their homes, which were originally on the southern coast of Asia Minor, or, as some are inclined to believe, at the mouth of the Persian Gulf. There is, however, not sufficient material to settle so delicate a problem. There is no indication that the population along the Syrian coast represents a mixture of Semites with other races, and our knowledge of Phœnician antiquities is too meagre—and what there is does not reach far enough back—to enable us to specify the historical relationship existing between the Phœnicians and other subdivisions of the Aramæan branch. As long as no evidence to the contrary is forthcoming, we must continue to place the Phœnicians in the same category with Hebrews, Moabites, etc.; and, assuming that they formed part of the general movement of 'Aramæan' groups from Arabia, they became differentiated after settling along the coastland, where they may already have found a seafaring population, whom they gradually dispossessed, just as the Hebrews upon entering Palestine found the country settled by a population whom they in turn drove out.

The relationship between Hebrews and Phœnicians was, again, chiefly commercial, just as between Hebrews and Yemenites. Commercial intercourse led to political alliances; and at one time, in consequence of such an alliance,—in the days of Ahab,—there was danger of the Phœnician cult becoming a serious rival to the national Jahweh worship.

The Phœnicians lead us to consider another group, which entered into far closer relations with the Hebrews than almost any other, and which, among the races of the OT, occupies a peculiarly prominent and significant place—the CANAANITES. The OT usage of 'Canaan' is not consistent, being sometimes employed to include all of Palestine proper, Phœnicia, and even lands to the east of the Jordan, and at times restricted to Palestine. It is therefore not easy to determine the precise extent of Canaanitish settlements. From the fact that 'Canaanite' comes to be synonymous with the merchant of Phœnicia (Is 23[8], Ezk 17[4], Pr 31[24]), we may certainly conclude that the Phœnicians were regarded as Canaanites, and the further use of the term as a designation of the pre-Israelitish inhabitants of Palestine is an indication of a close relationship between some sections at least of those peoples whom the Hebrews dispossessed and the Phœnicians. But at this point certainty ends. The Canaanite is frequently introduced in the OT in connexion with a number of other groups—the Amorites, Ḥittites, Perizzites, Ḥivvites, and Jebuṣites (*e.g.* Ex 34[11]), to which elsewhere the Girgashites are added (*e.g.* Gn 15[20. 21] *). It is quite clear from the way in which these peoples are grouped,—sometimes five being mentioned, sometimes seven, at times only two—Canaanite and Perizzite (*e.g.* Gn 13[7] 34[30]),—that they were no longer sharply differentiated in the minds of the writers. Taken together, they constitute the inhabitants of Palestine whom the Hebrews encountered when they attempted to conquer the country; but the survival of the term 'Canaan' as the name for the district, and 'Canaanite' as a general designation for the earlier inhabitants, points to Canaanites as forming the most powerful, and probably also the most prominent, part of the population. It may well be that some of those mentioned in the above conglomeration—notably the Perizzites and Girgashites—were merely subdivisions of the Canaanites that for a time acquired an independent position, but afterwards were again absorbed into the general body of Canaanites. At all events, it is plausible to assume that the interior of Palestine was occupied for an indefinite period, prior to the advent of the Hebrews, by groups of Semites more or less closely related to one another of which the Canaanites became the most prominent.

These Canaanites belonging to the same branches as the Semitic settlers in Phœnicia, the question of their origin is involved in the problem as to the origin of the Phœnicians. Adopting again the general theory above advanced, we may assume a movement similar to that which brought the Hebrews to Palestine to have taken place at a much earlier date. What Hebrew tradition assigns to the days of Abraham appears, then, to have been only a repetition of much earlier events. The Phœnicians and the Palestinian Canaanites would thus represent a subdivision of the Aramæan branch that moved along the Euphrates, and finally passed over by the northern route towards western lands, some settling along the coast and others pushing into the interior.

In the course of time these groups took a step forwards in culture, and became agriculturists. Their villages developed into towns, while those groups living on the coast were lured to seafaring careers.

It was the Canaanites—to use the general name—whom the Hebrews, upon entering Palestine, found in possession, and the wars with them continued for many generations, until finally the Hebrews obtained the upper hand. This contact with the Canaanites forms a most important factor in Hebrew history. By that power of attraction which the higher culture possesses for those of an inferior grade, the Hebrews were

* 'Rephaim' in this verse is an explanatory gloss.

prompted to make the attempt to secure for themselves the towns and cultivated lands to the west of the Jordan. The success of their efforts is followed by the permanent abandonment of nomadic habits, and instead of sheep raisers they become and remain for subsequent centuries tillers of the soil. From a religious point of view, the contact with the Canaanites was also fraught, with important consequences. The national deity, Jahweh, originally associated with the sojourn of the people in the wilderness,—the nomadic period of their existence,—becomes the protecting deity of the fields, and the people do not hesitate to call Jahweh by the name which the Canaanites applied to their field deities—Baal. For a time the amalgamation of the Jahweh and the Canaanitish Baal cult seemed imminent, when a 'national' reaction takes place, and, under the lead of jealous Jahweh-worshippers, the attempt is made to drive the Baal priests with the Baal rites out of the country, just as the worshippers of Baal had been forced out of their possessions. For all that, Jahweh absorbs some of the traits of Baal, and it is not until several centuries later—when Jahweh Himself was on the point of becoming a deity singled out from all others by the ethical character attributed to Him—that the last traces of the old Canaanitish cults also disappear.

How far back the arrival of the Canaanites in Palestine is to be dated is a question which cannot be answered with any degree of certainty. It is safe to assume an interval of several centuries between this event and the movement of Hebrew tribes from the Euphrates Valley towards western lands. The earliest occurrence of the name is in the Tel el-Amarna tablets, dating from *c.* 1400 B.C., in which we find the name Canaan under the form *Kinaḫi*, but limited in its application to the seacoast, and more properly the northern seacoast, *i.e.* Phœnicia. But, at whatever date we fix the entrance of the Canaanites, even they do not appear to have been the first Semitic group that settled in Palestine. Of the groups mentioned so frequently with the Canaanites in the OT—the Perizzites, Ḥittites, Ḥivvites, Amorites, Girgashites, and Jebuṣites—we know unfortunately very little, with the exception of the Ḥittites and the Amorites. The Perizzites and the Girgashites, it has been pointed out, may have been subdivisions of Canaanites, and yet from the way in which, in two places (Gn 13^{7} 34^{30}), Canaanites and Perizzites are put side by side as comprising all Palestine, one might be tempted to conclude that the Perizzites represented an independent group, which was at one time coequal in importance with the Canaanites. It seems even more certain that the Jebuṣites and Ḥivvites had no direct connexion with the Canaanites. Taking this in connexion with the circumstance that in the Tel el-Amarna tablets the term Canaan does not include Palestine proper, it is more than probable that some of the groups mentioned with the Canaanites represent still other settlers. In a notable passage (Gn 15^{19}) three additional groups—Ḳenites, Ḳenizzites, and Ḳadmonites—are spoken of as occupying the territory later claimed by the Hebrews. That these groups are Semitic is sufficiently indicated by their names, the last mentioned of which, the 'Easterners,' still contains a trace of the district whence they came.

At the period of the Hebrew conquest of Palestine we no longer hear of these groups. They appear ere this to have been driven to the south by the all-powerful Canaanites, and subsequently to the west by the Hebrews. It is quite natural that the traditions regarding these earlier movements should be dimmed. There was no reason why the Hebrews or the Hebrew writers should have been sufficiently interested to preserve any distinct recollection. Their relations were primarily with the Canaanites. The importance of the latter in the eyes of the Hebrews is revealed in the earlier form of the story of the distribution of mankind as furnished in Gn 9^{25-27}, which makes Canaan, Shem, and Japheth the progenitors of the human race; and, on the other hand, the hatred of these rivals of the Hebrews crops out in this same chapter which connects Canaan with Ḥam—the 'accursed' son of Noah (v.^{25}).

ii. RACES OF DOUBTFUL ORIGIN.—A peculiar position is occupied by the Amorites and the Ḥittites. The AMORITES are found throughout northern Palestine as early at least as the 12th century B.C., when we encounter the name *Amurru* (or *Amurra*) in cuneiform inscriptions. So prominent do they become that they furnish to the Babylonian and Assyrian chroniclers the name for the entire district of northern and southern Palestine, and there are indications that the Hebrews, too, at one time gave to the term Amorite an extensive application. In the so-called Elohistic document, 'land of the Amorite' is used in this way.* These Amorites must accordingly have turned to the south, and, indeed, when the Hebrews entered Palestine, they found their way blocked by a large powerful kingdom on the east of the Jordan (see AMORITES in vol. i.). The remarkable statement of Ezekiel ($16^{3.45}$), that the 'mother' of Jerusalem was a Ḥittite, and the 'father' an Amorite, points also to the early presence of Amorites on the west of Jordan. To assume, however, that 'Canaanites' and 'Amorites' are synonymous terms representing one and the same population, is not justified. In the Tel el-Amarna tablets the 'Amurru' land is frequently mentioned and always designates the interior of Palestine, though more particularly the northern section; but the name may be carried back still farther. In Babylonian legal documents of the period, *c.* 2300 B.C., a town Amurru occurs, situated in Babylonia. If we are to conclude from this that the Amorites also came from the Euphrates Valley, we should have still another instance of the movement which brought such various groups of Semites to the west. A more important conclusion that appears to be warranted, is that the Amorites would thus turn out to be settlers in Palestine earlier than the Canaanites, and that the latter represent the group which finally obtains the ascendency and retains it until the appearance of the Hebrews. That with the conquest of the land by the Canaanites, the Amorites do not disappear, any more than the Ḥivvites, Jebuṣites, and other groups, is quite natural, seeing that when the Hebrews conquered the Canaanites the old inhabitants were dispossessed, but, by the express testimony of OT writers, not driven out (Ex $23^{29.30}$, Jg $1^{21.27-36}$).

The question has been raised, notably by Sayce (*Races of the Old Testament*, p. 110), whether the Amorites and other groups of the pre-Israelitish inhabitants were Semites. Much stress has been laid upon the representation of Amorites on Egyptian monuments where they are depicted with yellow skin, blue eyes, red eyebrows and beard, and light but also black hair (W. M. Flinders Petrie, *Racial Types from Egypt*, London, 1887). The Egyptian artists, however, were not always consistent in their drawings, and more particularly in their colourings, as Sayce himself is forced to admit (*l.c.* 113, 114). Too much importance, therefore, must not be attached to the colouring of the racial types on the Egyptian monuments. Anxiety to produce a pleasing or startling effect was a factor which interfered seriously with ethnographical accuracy. But, apart from the colouring, there are no such decided distinctions between Amorites and Judæans on Egyptian monuments as to warrant the supposition that the two belonged to different races or even to different branches of the Semites; and to account for this, as Sayce would have us do, by assuming that up to comparatively so late a period as the days of Rehoboam the population of southern Judæa was still largely Amoritic (*l.c.* p. 112), is simply building a further argument upon a mere supposition. The term Amorite, moreover, has a Semitic sound and appearance, and until better evidence to the contrary is forthcoming we may group them with the same race as the later settlers of Palestine. The Amorites were a warlike people, living in walled towns. The recollection of their prowess survived to a late date, and they became to subsequent generations the giants of olden days. It has become customary in consequence to identify the Amorites with the ANAKIM, REPHAIM, EMIM, and ZAMZUMMIM, or to regard these as so many subdivisions of the Amorites. It is true that the Rephaim and Anakim are occasionally spoken of in the OT as though they were identical with Amorites, but this is due to the fact that 'Rephaim' and 'Anakim' (cf. *e.g.* Dt $2^{11.20}$ $3^{11.13}$) are used as generic terms for a powerful race, and no longer as specific designations of any particular group. This, however, does not imply that there were no groups known as Rephaim and Anakim respectively, but that they belong to such a remote past as to become mere names to later generations; and since strength and gigantic stature are invariably ascribed by a later generation to remote ancestors,—in part, no doubt, justifiably ascribed,—we may only conclude from the way in which these terms are used that no definite traditions about these groups have survived. As for Emim and Zamzummim (possibly identical with the Zuzim of Gn 14^{5}), they are merely the names of the ancient population of Moab and Ammon respectively (Dt 2^{11} and ^{20}). While it is no longer possible to specify the extent of the territory of the Rephaim and Anakim, so much appears tolerably certain that these groups, with the Emim and Zamzummim, constitute the oldest inhabitants of Palestine and the district to the east of the Jordan known to us—preceding the Amorites but afterwards commingled through the faintness of tradition with Amorites, just as Amorites in time are not sharply distinguished from Canaanites, and just as the groups Ḥivvites, Perizzites, etc., come to be viewed in some strata of tradition as subdivisions of Canaanites.

---

* See Steinthal, *Zeits. f. Völkerpsychologie*, 12, 267, and Ed. Meyer, *ZATW* i. 122.

If we are to seek for a *non-Semitic* race in Palestine at all, we must go back beyond the Amorites to the nebulous Rephaim, Anakim, Emim, and Zamzummim. There are some reasons for actually supposing the pre-Amoritic settlers to have been of a different race, which was gradually subdued by the Amorites both to the east and west of Jordan; but the thesis is one which in the present state of our knowledge cannot be proved with certainty, though the fact of the existence of an early non-Semitic population in certain portions of Palestine has now been established by ethnological evidence (see Alex. Macalister in *PEFSt*, Oct. 1902, pp. 353-356).

With even greater assurance than in the case of the Amorites, has it been maintained that the ḤITTITES belong to a non-Semitic race. The problem in this instance is even more complicated, in consequence of the vague and indefinite usage of the term. We find a group of Ḥittites in the south around Ḥebron carried back by tradition to the days of Abraham (Gn $23^{5.7.10}$ etc.). These Ḥittites are also in alliance with Edomites, and in the days of David we encounter Ḥittites in his army (2 S 11, cf. 1 S 26^{6}). The Egyptian and Assyrian monuments, however, reveal the existence of Ḥittite settlements in the north along the Orontes as early as the 15th cent. B.C., and these gave the mighty Assyrian rulers a great deal of trouble before they were finally subdued towards the end of the 8th century. The term appears to include a variety of groups which extend northward and westward of the Amorites to the southern and western crests of Asia Minor as well as far into the interior. These northern Ḥittites do not seem to have anything more in common with those of the south than the name. How this is to be accounted for is an unsolved problem. While the northern Ḥittites have left numerous monuments containing sculptures and inscriptions, those in the south do not appear to have even reached the stage of culture which produces art and literature. From the Egyptian monuments we catch glimpses of the Ḥittite physiognomy, and, to judge from these, the Ḥittites were not a Semitic race; and yet too much stress must not be laid upon these representations. Certainly, we have no sound reason for supposing those of the south to belong to any other race than the Semites. The rather close relations between them and the Hebrews and the Edomites would point to ethnic affinity; and if there is any connexion between the Ḥittites of the south and those of the north, we may at most assume that the latter became mixed with the non-Semitic population without losing Semitic traits altogether.

iii. NON-SEMITIC AND MIXED RACES.—1. But, while a doubt thus remains as to the ethnic character of the Ḥittites, there is no question as to the non-Semitic character of a group with which the Hebrews from a certain period came into close though always hostile contact—the PHILISTINES. There is no reason to question the tradition which makes them come from CAPHTOR (Am 9^{7}, Dt 2^{23}, Jer 47^{4}); and, while the problems connected with the identification of Caphtor have not been entirely solved, still all the indications point towards Crete, and scholars are now pretty generally agreed in regarding the Philistines as pirates belonging to some branch of the Aryan stock, who, attracted perhaps, as were the Hebrews, by the fertile lands of Palestine, forced their way into the Canaanitish settlements, and succeeded in obtaining the supremacy in the entire 'Shephēlah,' where they established a number of petty kingdoms. Almost immediately after they entered Palestine, hostilities between Hebrews and Philistines began, and, long after the Canaanites were subdued, the Hebrews still had to contend against the armies of the Philistines. In the days of David their opposition was broken, and, though after the death of Solomon they regained their independence, it was but a shadow of the old power that remained. The interference of Assyria in Palestinian affairs dispelled even this shadow.

We have thus passed in rapid review the large variety of groups in Palestine and adjacent districts with which the Hebrews came into political or commercial contact, and who occupy a more or less prominent place among the races of the OT.

2. Passing beyond the narrower bounds, and yet not leaving Semitic settlements altogether, we have first to deal with the EGYPTIANS. Like Babylonia, Egypt, by virtue of its flourishing culture, proved an attractive magnet which drew the nomads of the Sinai peninsula and adjacent districts to frequent sallies against the outlying Egyptian cities, and, as in the case of the Aramæan advances along the banks of the Euphrates, the higher culture prompted groups now and then to a forward step which led to the partial abandonment of the life commensurate with the Bedawîn stage of culture. Egypt, accessible both from the north and

the south, on several occasions fell a prey to invaders who managed to obtain control of the political fortunes of the country. The monuments at Beni Hassan depict most graphically an invasion of foreigners, who are none other than the Semites, entering Egypt, and, as we learn from various sources, gradually becoming powerful factions in certain of the Egyptian districts. The Hyksos dynasty is an illustration of the power which foreigners managed to obtain in Egypt; and whoever may be intended by the Pharaoh under whom Joseph, according to Biblical tradition, rose to eminence, his presence marks the success of one of the Semitic invasions of Egypt. The groups that primarily came to Egypt naturally belonged to the Arabic branch of the Semites, but these were not infrequently joined by those coming from southern and central Palestine, who formed part of the Aramæan movement from the Euphrates Valley towards the west. The higher class of nomads, who were prompted to change their location with a view to securing pasturage for their flocks, would find themselves specially attracted to Egypt in those periods, not infrequent in Palestine, when the insufficiency of rain during the wintry season is sure to be followed by a drought and scarcity of food. It was such an occurrence that led some of the tribes which afterwards formed the confederation of the Israelites to pass down to Egypt, and their numbers, as appears from the form of the narrative in Exodus, were from time to time reinforced by others. In that sense we are to interpret the story which tells of Simeon and Benjamin being kept in Egypt as hostages before the others joined them there, which means simply that certain tribes reached Egypt earlier than others. The narrative in Genesis (46^{8-27}) makes all the 'twelve' tribes proceed to Egypt, but we can hardly expect a reliable tradition on such a question of detail. So accustomed are the writers of a later age to regard the federation of the twelve tribes as a unit, that they project this union into the remote past, though without historical warrant for doing so. The OT writers, viewing history from the point of view of later theorists, cannot conceive of less than twelve tribes at any time, and suppose that necessarily these tribes clung to one another. We are permitted to assume that certain Hebrew groups left their Palestinian settlements to seek better pastures in Egypt, but to go further and bring all twelve tribes into the district of the Nile is unhistorical, for the sufficient reason that the federation did not exist at this time except in the mind of the OT narrator, who is so fond of genealogies, and attaches such importance to them that he is inclined to place, in a remote past, facts and factors which really belong to a much later age. It is not surprising, in view of the location of Egypt, thus open to invasion from two sides, that its population was of a mixed character. If one may judge from the language of Egypt, the substratum of which has now been ascertained to be Semitic,* the basis of the population is likewise Semitic; but both language and people are largely mixed with 'Ḥamitic' elements, more particularly Libyan. This element in the course of time appears to obtain the mastery, despite the frequent Semitic immigrations into Egypt, and to such an extent indeed that both the people and the language retain but few Semitic traits.

3. Of the BABYLONIANS we have already had occasion to speak. In the Euphrates Valley, likewise, a mixture of races appears to have taken place at a remote period; but here the situation is just the reverse of what we have found in Egypt, inasmuch as it is the Semitic element which obtains the supremacy to such an extent as to give to the Babylonian culture, from the earliest period revealed to us by historical inscriptions, a purely Semitic character. But the Egyptians and Babylonians (and subsequently the Assyrians) agree in this respect, that their relations to the Hebrews continue, with but few interruptions, throughout the period of the political existence of the latter. Before the counter movement of Hebrew tribes and other Semitic groups* from Egypt back to the Arabian peninsula takes place, Egyptian rulers enter into close relationship with Palestine, Phœnicia, and Syria. The Tel el-Amarna tablets, so frequently mentioned in the course of this article, are the evidence of this uninterrupted intercourse in the 15th cent. before our era. The establishment of a Hebrew confederacy in Palestine exposes the Hebrews to constant danger of being absorbed either by the rulers of the Nile or by the ambitious lords of the Euphrates Valley and the Tigris. The political history of the two Hebrew kingdoms is largely taken up with the endeavour to steer clear of this danger—an endeavour that ends in failure.

iv. THE TENTH CHAPTER OF GENESIS.—The races hitherto discussed are the ones which play a part in the historical events unfolded in the OT narratives, but they are far from exhausting the races whose existence is recorded in the pages of the OT. The geographical horizon of the OT is remarkable for its wide extent, and indeed there are but few races—*e.g.* the Chinese and Japanese—which are left out of account in the famous *tenth chapter of Genesis*, which forms our principal source for a survey of the races of the OT in the wider sense, as including all those *known* to the Hebrews, or, more correctly speaking, to Hebrew writers, whether these races had anything to do with Hebrew history or not. The chapter itself in its present form is the result of considerable editing, involving more particularly the dovetailing of two documents, one of which is commonly assigned by modern scholars to the Jahwistic history, the other to the Priestly Code. The composition of the former of these documents is placed in the 9th cent., the latter shortly after the end of the exilic period; but how much earlier the traditions are, and the knowledge upon which the chapter is based, it is quite impossible to say. Apart from some additions in the list of the descendants of Shem, the chapter may be viewed as representing the geographical knowledge of a group of Hebrew writers in the 8th and 7th cent. B.C. The absence of any direct reference to *Persia* is an indication that even the post-exilic compiler took as his point of view conditions existing previous to his own day. In forming an estimate of the chapter, it should, however, be borne in mind that the traditions embodied therein are of a scholastic and not a popular character, and that, while there are no substantial reasons for assuming that the writers had before them geographical lists written in cuneiform or Egyptian characters from which they transcribed their data, the grouping of the races and nations of the world is distinctly the work of Hebrew schoolmen who are guided by learned and not by popular tradition. This is manifest already in Gn 9, the closing verses of which beginning with v.[18] should be studied in connexion with ch. 10.

The *three groups* into which the human race is divided do not represent a popular point of view. A people's geographical horizon—its *tout le monde*—is limited by its political and social interests. The three sons of Noah in the popular form of the tradition are not the broad subdivisions of mankind, but three subdivisions within the groups in which the Hebrews were more particularly interested: (*a*) Shem, by which the Hebrews themselves are meant; (*b*) Canaan, the predecessors and hated rivals of the Hebrews in Palestine; (*c*) Japheth, originally designating probably the people of Phœnicia,* with perhaps the adjacent island of Cyprus. These are the three sons of Noah in the original form of the famous blessing and curse (Gn 9[25-28]). In the scholastic recasting of the popular tradition, the three sons of Noah become the progenitors of the human race. SHEM is taken as an extensive term to include a group of peoples who were regarded as ethnically close to the Hebrews, JAPHETH is similarly extended to embrace a large group of races to the north of the Hebrews, while *Canaan* is replaced by ḤAM, who is viewed as the progenitor of the group of races to the south of Israel as well as of others who were particularly hostile to the Hebrews. Interpreted in this way, it is manifest that we must not seek for a purely scientific division of the races known to the OT writers, but one in which science is linked to national prejudices and preferences. With these preliminary remarks we may pass to an analysis of this remarkable document, so far as scholarship has succeeded in interpreting it. The suggestion has already been thrown out that the grouping of peoples in the chapter in question is *geographical* rather than ethnic or linguistic, though it may at once be added that the geographical principle is not consistently carried out. The clearest section is that referring to the sons of Japheth (vv.[2-5]), the core of which belongs to the post-exilic writers.

---

* See Erman's article in *ZDMG* xlvi. pp. 93–129, and Hommel in the *Beiträge zur Assyriologie*, ii. 342–358.

* Ex 12^{38} speaks of the 'mixed multitude' which left Egypt at the same time as the Hebrews.

1. The *Japhethites* represent groups and races lying to the north of Palestine. Of the 'sons' of Japheth, namely, Gomer, Magog, Madai, Javan, Tubal, Meshech, and Tiraṣ, the majority have been identified. GOMER is the equivalent of the Gimirrai frequently referred to in the inscriptions of Assyrian kings, and represents a promiscuous group of peoples who, forced across the Black Sea by Scythian hordes pressing upon them, settled in Cappadocia. In the early part of the 7th cent. we find these Gimirrai in conflict with Assyria and Lydia, and shortly after the middle of that century they are driven still farther to the east. MADAI is Media, JAVAN represents the Ionians, while TUBAL and MESHECH are found in juxtaposition in the Assyrian inscriptions under the forms Tabal and Muski; and the location of these groups may with certainty be fixed in central Asia Minor. There remain only Magog and Tiraṣ. Outside of the occurrence of MAGOG here (and in 1 Ch 1[5], which is copied from Gn 10[2]) the name is found twice in Ezekiel (38[2] and 39[6]). In the former of these passages it is a gloss to Gog, indicating the identity of Gog and Magog in the mind of the annotator; while in the second passage the LXX has 'Gog,' which the Hebrew text also exhibits in Ezk 38[14. 16. 18] and 39[1]. In view of this, it seems reasonable to suppose that Magog is a slip for Gog, the M being superinduced perhaps by the M of the following Madai. The error, once introduced, was carried over into Ezekiel, once as a variant, and in the second case as an actual reading instead of Gog. From the passages in Ezekiel the views connected with Gog may be clearly deduced. The name is a collective one, for a whole series of peoples coming from the north, and threatening at one time, during the 7th cent., to engulf the Semitic world much as the Goths and Vandals threatened the Roman empire. The danger was averted, but so great was the terror inspired by the northern hordes that Gog survived to a late period as the symbol of wickedness and evil power—a pre-Christian Antichrist. The identification of TIRAṢ is not certain. The view of Ed. Meyer (*Gesch. d. Alterthums*, i. p. 260), which associates Tiraṣ with the Turusha, a seafaring nation mentioned in the Egyptian inscriptions of the 13th cent., and whom the Greeks reckon to the Pelasgians, has been generally accepted; but recently W. Max Müller (*Orient. Lit.-Zeitung*, 15th Aug. 1900, col. 290) prefers to regard Tiraṣ as a doublet—a variant of Tarshish mentioned in v.[4], and to identify both with Turs, *i.e.* the land of the Tyrsenians or Italy.

As subdivisions of Gomer, there are mentioned Ashkenaz, Riphath, and Togarmah. The passage in Jer 51[27], where ASHKENAZ is placed in juxtaposition with Minni and Ararat, is conclusive for placing the Ashkenazites in western Armenia, while the occurrence of a personage Ascanios as a leader of the Phrygians and Mysians in the *Iliad* (ii. 862 and xiii. 79) has, together with some other evidence (see ASHKENAZ in vol. i.), led some scholars to fix upon the Phrygians as the group more particularly denoted. For the location of RIPHATH there are no certain data, while TOGARMAH appears to be some part of Armenia, whence horses and mules were exported to the markets of Tyre (Ezk 38[6]).

As of Gomer, so of Ionia, a number of subdivisions are noted—Elishah, Tarshish, Kittim, and Dodanim. It has become customary to identify ELISHAH with Hellas; but since W. Max Müller has shown satisfactorily that Alashia, occurring in the Tel el-Amarna tablets, is the ancient name for Cyprus, it seems natural to connect Elishah with this term (*Or. Lit.-Zeit.*, 15th Aug. 1900, col. 288). TARSHISH has commonly been identified with the Phœnician colony Tartessus in southern Spain; KITTIM with Cyprus, in view of the town Citium; and DODANIM, for which the LXX as well as the parallel passage (1 Ch 1[7]) has 'Rodanim,' with Rhodes. There are, however, serious objections against all these identifications. One can hardly suppose that a writer would jump in this wild fashion from Hellas to Spain, then back to Cyprus, and then on to Rhodes. The very frequent references to Tarshish—no fewer than twenty-five times in the OT—make it certain that an intelligent reader knew where to look for it. But while there was *one* Tarshish, whose location was well known, which probably lay in Spain, it does not follow that 'Tarshish' in all passages refers to this place. There is significance in the juxtaposition with Pul (probably an error for Puṭ, or Punt) and Lydia in Is 66[19]. This suggests another Tarshish adjacent to Asia Minor; and, while in many if not most of the passages the location in Spain suits the context, in Gn 10 and in some other instances we do not appear to be justified in going so far to the west. Whether Kittim is really the city of Citium in Cyprus has been questioned by both Winckler and Müller (see *Or. Lit.-Zeit.*, 15th Aug. 1900, *ib.*). If Dodanim is really a corrupt reading for Rodanim, the identification with Rhodes may be admitted, but we cannot be certain that the LXX reading and the one in 1 Chron. do not represent an intentional change with a view of suggesting this identification. All therefore that can be said with regard to Elishah, Tarshish, Kittim, and Dodanim is that we must probably seek for them among the larger islands of the Mediterranean and Ægean Sea—preferably among those adjacent to the southern and western coasts of Asia Minor. On this assumption we can understand the reference in v.[5] to the 'islands of the nations,' which appears to be a convenient manner of designating the minor islands of this region. The groupings of these four names is based on a tradition which regards the people meant as offshoots of Ionia on the Asia Minor coast. It does not, of course, follow that 'the sons of Japheth' represent necessarily subdivisions of the Aryan race. As already pointed out, the writer of Gn 10 has but vague notions regarding racial affinities of nations, whereas his geographical views are quite clear and definite. Still it so happens that Asia Minor, from the western coast far into the interior, was at an early date the seat of Aryan settlements, and in the 7th cent. the greater portion of the population belonged in all probability to the Aryan group of races.

---

* The expression 'dwelling in the tents of Shem' (9[27]) points to a land adjacent to Palestine.

2. The '*sons of Ḥam*,' as the second division, embrace the races of the south, so far as known to the Hebrews, CUSH being Ethiopia, MIẒRAIM the equivalent of Egypt, while the evidence which identifies PUṬ with Libya—so already Josephus—is still the most satisfactory available. At the same time, it would appear from the passage in Is 66[19] (above referred to) as well as from other evidence (see Winckler, *Altor. Forschungen*, i. p. 513, note), that there was another country, Puṭ, situated near Lydia, and designating probably some island or group of islands in the Ægean Sea. In most of the passages in the prophetical books in which Puṭ is mentioned, it is this region and not the Puṭ of Gn 10[6] which is meant. The introduction of CANAAN at this point and the grouping with the 'Ḥamites' is not to be taken as an indication that in the mind of the writer the Canaanites came from the south. The mention is due to the hostility which existed between the Hebrews and Canaanites, and which prompted the writer, in obedience to popular prejudices, to place the Canaanites with the 'accursed' race. The same spirit is responsible for the insertion (vv.[8-12]), which places the *Babylonians* and *Assyrians*—whose ultimate control of Palestine was already imminent at the time when the section was written—also with the sons of the 'accursed' son of Noah, though it is possible that the confusion of Cush=Ethiopia with the Cossæans (a people to the north-east of Babylonia), may have been a factor also in bringing about this result. As offshoots of Cush, there are mentioned Ṣeba, Ḥavîlah, Ṣabtah, Raamah, Ṣabteca, and as offshoots of Raamah again, Sheba and Dedan. Of these seven districts, Ḥavîlah and Sheba and Dedan can be fixed with sufficient definiteness to form starting-points for the general determination of the rest. ḤAVÎLAH is certainly some district in Arabia—probably on the western coast,—SHEBA is a portion of southern Arabia, while DEDAN, to judge from the juxtaposition with Tema in central Arabia (Jer 25[23], Ezk 25[13]), must be sought in the interior of Arabia, extending considerably towards the north. The remaining names appear likewise to have been designations for other portions of the Arabian peninsula, more particularly the western and south-western sections. Unless we assume that the tradition is utterly without foundation, we must perforce conclude that Cushites settled in large numbers on the western coast of Arabia from the southern extremity to a point considerably north. Similarly, in the subdivisions of Egypt (vv.[13, 14]) the certainty that the LEHABIM are Libyans, and that PATHROS is Upper Egypt, justifies the conclusion that the NAPHTUḤIM and CASLUḤIM are to be sought in northern Africa, even though the precise identification is still doubtful. The introduction of the *Philistines* in v.[14] is, without much question, a gloss which has been inserted into the text at the wrong place. It would come appropriately after the mention of the CAPHTORIM,—*i.e.* probably Cretans (see above),—and the gloss itself, which connects the Philistines with Caphtor, rests upon the traditions embodied in such passages as Dt 2[23], Jer 47[4], Am 9[7]. There, again, the bitter hostility between the Hebrews and the Philistines appears to have been the factor which prompted the association of the Cretans and Philistines with the descendants of Ḥamites.

As offshoots of the Canaanites a large number of groups are mentioned, most of which are known to us from the actual relations existing at one time or the other between them and the Hebrews. Such are the Jebuṣites, Amorites, Girgashites, and Ḥittites, while the situation of Ẓidon, Simyra, Ḥamath, and Arvad is perfectly definite. The other groups, ARḲITES and ṢINITES, therefore belong to this same region between the Phœnician coast and eastern Syria. How unimportant, in the mind of the writer, ethnological affinity is may be judged from the introduction of the ḤITTITES in the form of a gloss in v.[15] and as an offshoot of Canaan. Whatever and wherever the Ḥittites were, they certainly were not closely allied to Canaanites. The name itself designates, as already intimated, a promiscuous group of peoples whose settlements at one time covered a good portion of the interior of Asia Minor, whose culture and general character have little in common with Canaanites. The importance of the Ḥittite settlements in Syria adjacent to the territory covered by Canaanitish groups has led to the mention of Ḥeth, by the side of Ẓidon, as an offshoot of Canaan. It thus appears that the second group—the Ḥamites—represents a greater mixture of totally distinct races than we encountered in the case of the Japhethites. Ḥamites, Semites, Aryans, and Turanians are thrown together without any scruples.

3. The remainder of the chapter, vv.[21-32], is taken up with the favoured group—the *Shemites*. It is evident from a superficial survey of the list that it cannot originally have belonged to the preceding enrolment of nations. One and the same writer would not have placed Assyria with Cushites (v.[11]), and a few verses later on made Assyria an offshoot of Shem (v.[22]). Nor is it conceivable that in one part of a document the Lydians should have been placed with Egypt (v.[13]) and in another with Aram (v.[22]). Again (vv.[28, 29]), we encounter Sheba and Ḥavilah among the sons of Shem, whereas in v.[7] they are grouped with Cushites. Quite peculiar to this third section of the chapter is also the long genealogical chain—Arpachshad, Shelah, Eber, Peleg, and Joḳṭan,—whereas, in the case of the Japhethites and Ḥamites, at most a double chain is furnished. The longer chain, in the case of the Shemites, suggests a relationship between this section of the tenth chapter and such a chain as is found in the eleventh chapter. Here as a matter of fact we have the 'doublet' of our section, for vv.[10-26] present a genealogical table of Shemites introduced as a preface to the narrative of Abraham. Comparing these two lists, it will be found that the Shemites in the narrower sense consist of two branches which meet in the series Arpachshad, Shelah, Eber. With the latter the division begins, the Abrahamitic group tracing descent to PELEG, one of the sons of Eber, while the other branch starts with another son, JOḲṬAN. In Gn 10[26-29] the subdivisions of Joḳṭan are given, and the section thus complements the genealogical chain of the Pelegites in the 11th chapter. There is no difficulty in determining the region where the writer places these two branches of Shemites, or, more strictly speaking, Eberites. The descendants of Peleg are represented by the Aramæan settlements along the Euphrates with the gradual extension of these groups into the district to both sides of the Jordan, while the Joḳṭanites represent those who passed on to the south and west of Arabia. The situation of Sheba and Ḥavilah has already been referred to. ḤAẒARMAVETH is identical with Ḥadramaut along the southern coast; and HADORAM, UZAL, OBAL, and the rest must likewise be sought in the region of Yemen. Only in the case of the mysterious OPHIR is it possible

that the writer intends to have us take a leap over to the African coast (see Peters, *Das Land Ophir*, 1902, who has made out a strong case for locating Ophir in the district near the Zambesi river in southern Africa). Roughly speaking, the twofold division of the Shemites corresponds to the customary division of Arabia into Yemen and Sham (or Syria), the 'right' and the 'left' land, or, as it was mistranslated by Latin writers, Arabia *Felix* and Arabia *Infelix*. Gn 10^{21}, where Shem is referred to as the 'father' of all 'the sons of Eber,' reveals the real sentiment underlying the genealogical lists of vv.$^{24-29}$ and 11^{10-26}. The two branches—the Pelegites and Joḳṭanites—comprise those groups which, in his opinion, are genuine Shemites, the only Shemites worth speaking of according to his view, though perhaps not the only ones he knew of. The inclusion of south Arabian tribes is rather significant, and strengthens the thesis maintained at the beginning of this article, which makes central Arabia the starting-point for Semitic emigration in two directions. However this may be, it would appear that a later writer, not satisfied with this narrow scope given to the Shemites, saw fit to add as separate subdivisions Elam, Assyria, Lud, and Aram, embracing what he considered *the Mesopotamian branch* of the Shemites, Elam being to the east of Mesopotamia, Assyria the general term for Mesopotamia itself, Aram the designation for the district to the west of Assyria, while LUD (following upon Arpachshad) is one of the puzzles in the chapter. The identification with Lydia is out of the question. That it may be some textual error—*we-Lud* being superinduced by the *Arpachshad yalad* of v.^{24}—is not impossible. If, however, the reading be accepted as correct, the most natural suggestion would be to place Lud to the north or north-east of Mesopotamia. The attempts to identify ARPACHSHAD have hitherto failed. Even Cheyne's proposal (*ZATW* xvii. (1897) 190) to separate the term into two words, ארף (*'Arap*=Arapcha) and כשד (*Kashed*=Chaldæa), which is the most plausible of the many suggestions offered, does not commend itself; and it would appear, indeed, that Arpachshad is no more a district than Sheba, Eber, or Peleg, but in reality only the name preserved by tradition of some ancient group to which the Eberites traced their descent. If this be so, the name is out of place in v.^{22}, and has either been introduced by the writer, whose chief aim it was to add Elam, Assyria, and Aram as a Mesopotamian branch of Shemites to the south Arabian and Syriac-Palestinian branches, or has in reality been brought in by an error, וארפכשד ולוד (v.^{22}) being a 'doublet' of וארפכשד ילד (v.^{23}). At all events, it appears to be clear that Elam, Assyria, and Aram represent a third Shemitic branch added by some writer to the original twofold division. Of the subdivisions of Aram—Uẓ, Ḥul, Gether, and Mash—Uẓ, though not definitely marked off, is the region of Ḥauran, extending, however, considerably to the south; MASH (for which 1 Ch 1^{17} has *Meshech*) may be identical with the Mons Masius between Armenia and Mesopotamia, while ḤUL and GETHER are altogether obscure, and it would be idle to hazard any conjectures at present.

The addition of Aram narrows still further the scope of the Pelegites, who are thus practically confined to the groups of Hebrews in Palestine and their neighbours directly to the east of the Jordan. The omission of Babylonia in this addition of a Mesopotamian branch is an index to the age of the writer who added it. Not, indeed, that we are to conclude that he belongs to the period when the supremacy of Assyria over the south was so undisputed as to justify the application of 'Assyria' to the northern and southern Mesopotamian districts, for, as a matter of fact, the distinction between Babylonia and Assyria was at all times maintained. The omission is intentional, and similarly the inclusion of Elam among the descendants of Noah's favourite son is also dwelt upon with intent. There can be little doubt that *Elam* is merely another designation for Persia in the mind of the writer. The reign of Cyrus, with whom brighter times for the Judæan exiles set in, was a sufficient reason for glorifying Persia at the expense of Babylonia. The writer was willing to permit the hated Babylon to be founded by a descendant of Ḥam, but Persia belongs to the favoured race; and Assyria, which for more than a century had been merely a name without substance, could also be magnanimously included, since consistency demanded that the country adjacent to Persia should belong to the same group. The writer, however, takes his revenge upon Babylonia, ignoring the name entirely and substituting that of her own hated rival Assyria. We are therefore brought down to the end of the Exile for the *addition* of the Mesopotamian branch of the sons of Shem. Once more we observe that ethnic affinity is an unimportant factor in the grouping—geographical proximity counts first, and natural preferences and dislikes second. Still, in the case of the 'sons of Shem' as in that of the Japhethites, it so happens that all those enumerated go together ethnically. With the exception of the *Elamites*, who are Aryans, the members of all three branches of Shemites are also to be grouped as subdivisions of a single race, only that it must be borne in mind that not all the subdivisions are enumerated; and that some which unquestionably belong here, *e.g.* the Canaanites with their numerous branches, are to be found in the Ḥamitic division, while some of those in the Japhethite group, not yet definitely identified, may likewise turn out to be members of the Shemitic race. See also following article.

In this survey, necessarily defective, of the important tenth chapter of Genesis, the chief aim has been to present the view taken of the races of the ancient world by a Hebrew writer, or, more exactly, by Hebrew writers. Two features stand out prominently in this view—firstly, the breadth of the writers' horizon; secondly, their indifference to the ethnic relationships among the peoples grouped together. The main factors in determining this group are, again, two—(1) geographical affinity, and (2) natural dislikes. It is the combination of these two factors that leads to many of the inconsistencies in the grouping that we have noted. The writers are not merely interested in those races with which the Hebrews have come in contact, but extend their view to those which stand outside of this limit, and yet they do not pass farther than Elam and Armenia in the east; the western limits are the islands of the Mediterranean adjacent to the southern and western coasts of Asia Minor; they take in all of northern Africa, and embrace Arabia from the extreme south up to the mountains of Syria. The aim of the writers being to include all mankind, the limitations of the chapter fairly represent the bounds of historical knowledge at the time of composition. The races of the OT in the larger sense, and as revealed by this chapter, cover the civilized States grouped around the Mediterranean, the Red Sea, and the Persian Gulf, together with the less cultured races and tribes of this district. While the tenth chapter of Genesis occupies a unique place in the OT by virtue of the large number of races and peoples enumerated, yet the prophets furnish the proof that the knowledge evidenced by this chapter was not exceptional. A trait of the great prophets is their fondness for including in their view many other nations besides the people whom they addressed.

The Book of Amos opens (chs. 1. 2) with a series of denunciations of a variety of districts: Damascus, Gaza, Tyre, Edom, Ammon, Moab being introduced as a means of heightening the dramatic effect when Judah and Israel are reached. Isaiah (chs. 13–23), Jeremiah (46–51), and Ezekiel (21–32 and 38. 39) similarly have a series of 'oracles' directed against nations near to and remote from the Hebrews, and in addition to this they incidentally introduce many others by way of illustration to their arguments. So, *e.g.*, Ezk 38 is a miniature reproduction of Gn 10. The prophet enumerates in the course of his oration Gog, Meshech, Tubal (v.[2]), Persia, Ethiopia (Cush), Puṭ (v.[5]), Gomer, Togarmah (v.[6]), Sheba, Dedan, Tarshish (v.[13]). Elsewhere (ch. 27) we encounter Tyre (v.[3]), Ẓidon, Arvad (v.[8]), Persia, Lud, and Puṭ (v.[10]), Javan, Tubal, Meshech, Togarmah, Dedan, Aram (vv.[10-16]), Arabia, Sheba, Raamah, Eden, Assyria (vv.[22-23]). Through these references, the explanation of the races mentioned in Gn 10 is considerably advanced, though new problems are also presented by the mention of nations not otherwise known. So in the two chapters of Ezekiel under consideration we encounter for the first time Persia, Arabia, and also Eden.* The omission of Persia in the Genesis list (though referred to probably in the supplemental mention of Elam) has already been commented upon. In the case of ARABIA, it is the name rather than the race that is new; while EDEN—corresponding, perhaps, to *Bit-Adini* in cuneiform literature and occurring with ḤARAN and CANNEH (probably an error for Calneh)—is covered in Genesis by Assyria and Babylonia.

More important, however, than the variation in nomenclature and the additions, to be gathered from the prophetical orations, to the ethnological phases of the OT, is the circumstance that the prophets in question should have an acquaintance with so many races. The prophets would not have referred to these many nations had they not been certain of being understood by the people to whom they address themselves. From this point of view, the prophetical books reveal the existence of an international intercourse in ancient times on a much larger scale than is ordinarily supposed. The tenth chapter of Genesis is an illustration of this general acquaintance with the races of a considerable section of the ancient world; and while the list rests in part on a theoretical basis, and is prepared for a scholastic purpose, yet it cannot be doubted, in view of the evidence furnished by the prophetical books, that a majority of the peoples there mentioned are races with which, either politically or commercially, the Hebrews came into direct contact.

In this way the treatment of the races of the OT resolves itself, after all, into a consideration mainly of those associated with the Hebrews. While, therefore, the distinction made at the beginning of this article may be maintained [(*a*) the subdivisions of the Semitic race and of the pre-Israelitish inhabitants of Palestine, (*b*) the non-Semitic and mixed races with whom the contact was less constant and in many cases less close where it did exist], the races introduced from the purely theoretical point of view form a comparatively small minority. To be sure, the underlying principle of the chief source for the larger view of OT ethnology which divides the whole of mankind into three divisions is deprived by modern ethnological investigation of its scientific value. The races enumerated under each one of these divisions do not, as we have seen, necessarily form a homogeneous group. The distribution being controlled largely by the geographical factor, it was not to be expected that this should be the case, quite apart from the fact that an ancient writer could hardly be expected to have the ethnological attainments required for such a method of grouping. As a conspectus, however, of races known to the Hebrews, largely through contact and in part through learned tradition, the tenth chapter of Genesis not only retains its intrinsic value, but serves as an indispensable aid in supplementing the ethnological material, furnished incidentally by the narrative which follows the remarkable history of the Hebrews, from the early time of the departure of the first group from the Euphrates Valley through the nomadic period, with its frequent changes of residence, on to the conquest of Palestine and the growth of the federation of Hebrew tribes into a nation in the full sense of the word, with a distinct political organization, down to the political decline and fall of this people, which survived in a strange way even the loss of national independence.

MORRIS JASTROW, JR.

SEMITES.—The term *Semite* (*Shemite*), forming the adjective *Semitic* (*Shemitic*), is derived from the patriarch Shem, who in the Bk. of Genesis is named as the ancestor of most of the peoples known to ethnologists and now popularly designated as 'Semites.' The account of Shem and his descendants in Gn 10 is partly genealogical and partly geographical, and does not exactly correspond to a scientific classification. Hence we take the family tree of Genesis as the starting-point of our inquiry rather than as an exhaustive summary. None the less, any description or discussion of the Semites as a whole must have chiefly a biblical interest, and that for two main reasons. In the first place, the actors in and makers of Bible history were Semites, who did their deeds and said their say within the Semitic realm. Further, the truth of God, as it is revealed in the Bible, was not merely conveyed to the world through an outward Semitic channel; it was moulded in Semitic minds, coloured by the genius of Semitic speech, and put to the proof for the education of the world in Semitic hearts and lives. It is perhaps enough in this connexion to remind the reader that Moses, David, Elijah, Amos, Hosea, Isaiah, Jeremiah, St. John, St. Paul, and the Son of Man Himself, were Semites. The religious and moral significance of the race thus indicated may be further illustrated by citing the fact that Tiglath-pileser, Nebuchadrezzar, and Hannibal are the only Semites of the pre-Christian time whose names stand for world-moving achievements outside the realm of religion and morals.

---

* Gebal, Damascus, and Ḥelbon also occur in ch. 27, but as names merely of cities, and need not therefore be taken into consideration. So Ẓidon (27[8]) is covered by Canaan and by Tyre in Gn 10.

The principal list of the descendants of Shem appears in Gn 10^{21-30}. This whole table proceeds from one source, J, except that, according to the critics, v.^{22}, which gives a list of the sons of Shem, belongs to P. These immediate descendants are Elam, Asshur, Arpachshad, Lud, and Aram. Of these names the third and fourth are unfortunately obscure, and it would be unprofitable to discuss here the various explanations that have been offered. *Lud* is generally supposed to stand for Lydia; but the reason for such an enormous interval of separation from the other Semitic peoples is far to seek. Possibly this brief word (לוד from לד) very early underwent some change, and does not represent the original. It is almost certain that this is the case with *Arpachshad*, since the latter half of the word is the stem of *Kasdīm* (but see p. 82^a), the Heb. word for *Chaldæans*, who lived in Lower Babylonia. The whole word, thus assumed to be modified in MT, would naturally stand for a portion of the territory to the N.W. of the Persian Gulf.* The first in the list, *Elam*, though historically non-Semitic, must have had many Semitic immigrants. *Asshur* is the well-known people and country of Assyria. The last named of the sons of Shem is *Aram*, that is, the Aramæans. The sons of Aram are next enumerated (v.^{23}). Thereafter the interest is concentrated upon the progeny of Arpachshad. His grandson is *Eber*, who is not only the ancestor of the Hebrews, as is fully detailed by P in ch. 11, but also of the Arabs (10^{26-30}). We may now attempt a present-day view of the descendants of Shem, referring to any of the lists of Genesis as occasion demands, and thus working back from the known facts of modern research instead of attempting to work downward from the indistinct hints of tradition.

i. CLASSIFICATION OF THE SEMITES.—The surest token of racial affinity is ordinarily the possession of a common language or of closely related idioms. It is not an infallible test; for it may happen that through inherent weakness or stress of fortune a tribe or a nation may be absorbed by another, and lose its own form of speech. On the other hand, it very rarely happens that a race predominant in numbers or political influence loses its language and adopts that of an inferior or degenerating race. Hence, while even the exclusive use, by a large community, of a given language or dialect does not necessarily indicate that the race is unmixed, it may be reasonably held that the predominating racial element in that community originally spoke the current language. Again, as regards the degrees of relationship between kindred peoples, it should be remembered that the most valid kind of linguistic evidence is that afforded by the common possession of grammatical or structural elements, and of terms for the most fundamental ideas and the most indispensable or rudimentary arts and appliances of life. These simple and elementary working principles are far-reaching in their application, and will need to be taken into account in all that is said, either as to the original Semitic race and its language, or as to any of the derivative races and their languages or dialects.

On the evidence of language and of historical distribution combined, these peoples are made to fall into two great divisions, the *Northern* and the *Southern* Semites. Roughly speaking, the Southern branch of the family had its permanent and proper home in the peninsula of Arabia; while the Northern division was included in the region bounded on the N. by the modern Kurdistan, on the W. by the Mediterranean, and on the E. by modern Persia. We have, however, except from linguistic induction, no indication of a time when either the Northern or the Southern division formed by itself a homogeneous whole, much less of the presumptive earlier stage when all Semites together were comprised in a single community. On the contrary, our earliest archæological evidence reveals to us these regions as occupied by several families or groups more or less nearly related. Thus, while Arabia has long been known as the home of a single people, though of many tribes, speaking a common language, the earlier record is of peoples speaking and writing distinct though closely related languages. Similarly, the Northern division, as far back as we can see through the mists of antiquity, is found to be made up of distinct families. A tentative comprehensive grouping may be made as follows:—

SOUTHERN SEMITES	Northern Arabians. Sabæans. (Abyssinians).
NORTHERN SEMITES	Babylonians and Assyrians. Aramæans. Canaanites. (Hebrews).

The above classification would describe the distribution of the Semites as a race during that period of ancient history when they were the ruling power of the world, roughly speaking from B.C. 2000 to B.C. 500. It should be added that the hypothesis of a Southern branch is surer than that of a distinct Northern group, and that some scholars (as Hommel and Zimmern) prefer to assume an East-Semitic division—Assyro-Babylonian, and a West-Semitic—Aramæan, Canaanite, Arabo-Abyssinian. It is, indeed, so difficult to unify the Assyrian, the Aramaic, and the Canaanitic languages, that if we were to use linguistic data alone, it would, for working purposes, be allowable to assume these four separate units: Assyro-Babylonian, Aramæan, Canaanite, and Arabo-Abyssinian.

(*A*) *SOUTHERN SEMITES.*—(*a*) *Northern Arabians.*—The term 'Arab,' which at present connotes the only survivors on any large scale of the Semitic races, was originally of very restricted significance. Ancient usage confines it to a comparatively small district in the north of the peninsula E. of Palestine, extending sometimes over the centre of the Syro-Arabian desert. In this sense the word is used in the Assyr. inscriptions, in OT (*e.g.* 2 Ch 17^{11} 21^{16} 22^1 26^7, Is 13^{20} 21^{13}, Jer 3^2 25^{24}, Neh 2^{19}, Ezk 27^{21}), as well as in the lately discovered Minæan inscriptions. It was not till shortly before the Christian era that it was enlarged so far as to include the whole of the peninsula.* Besides the 'Arabs,' there were several other important ancient communities in N. Arabia. Most of these are embraced under the names of the descendants of Ḳeṭurah ('the incense-bearer'), and of Ishmael, in Gn 25 and 1 Ch 1^{29-33}. We may cite as of historical fame Midian, the northern Sheba (cf. Job 1^{15}), Dedan, Asshur (Gn $25^{3.18}$), Nebaioth, Ḳedar, Dumah, Massa (cf. Pr 30^1 31^1), Tema, and Jeṭur. The general distinction between Ḳeṭurah and Ishmael is that the latter stretched farther to the east and south. According to Gn 25^{18}, the tents of Ishmael were pitched as far east as Ḥavîlah on the south-west border of Babylonia (Gn 2^{11}). In the west, however, their several routes intersected and their pasture-grounds were contiguous. Dumah (Is 21^{11}) and Massa, Ishmaelites, lay in the path of the Ḳeṭurites, Midian, Dedan, and Asshur. But these by no means exhaust the category of N. Arabians. We must fairly include those of the 'Edomites' who are historically and locally Arabs. Thus not only Teman but Amaleḳ is reckoned to Edom in Gn 36^{11-18}. Furthermore, towards the east side of the desert is the great tribe or country of Mash, which with Uẓ, the home of Job in the west, is allotted to the Aramæans in Gn 10^{23}, though, according to Gn 36^{28}, the latter is given to the Ḥorite Edomites. The explanation of the anomaly comes from the important fact that the Aramæans, who, as a rule, did not wander in ancient times far from the valley of the Euphrates, stretched out in certain regions favourable to pasturage, to mix and mingle with the more purely nomadic tribes of the desert.

---

* Some such people seems necessary here, since Arpachshad is indicated as the ancestor of Aramæans and Arabs alike, and the region in question is their natural dividing-point. Moreover, it was peopled also by Semites from the earliest known period. Confirmation of this view is afforded by the fact that, according to v.^{25}, Peleg, 'in whose days the earth was divided,' was a descendant of Arpachshad, while the reference to the dividing of the earth points to Babylonia as the place of his residence, according to 11^{2-9}, which is also the production of J.

* This extension came about largely through the fact that the original 'Arabs' were the most important tribe living in the neighbourhood of the Greek and Roman possessions in Syria and Mesopotamia. The classical writers use the name not only in the narrower but also in the wider sense, *e.g.* Herod. iii. 107.

(*b*) *Ṣabæans.*—We call the ancient inhabitants of S.W. Arabia Ṣabæans, because this people created the most powerful and extensive kingdom of all that region. Many other tribes, however, sometimes their subjects, also flourished. Among these were the Katabanians, directly north of Aden, and the Himyarites to the east. The latter were so important that scholars formerly called the ancient S.W. Arabians generally by their name. Recent researches, however, which have disclosed elaborate architectural remains, and brought to Europe hundreds of inscriptions, the work of Ṣabæans, more than confirm the ancient fame of Sheba, and vindicate its claim, not only to a wide commerce and a productive soil, but to an influential empire as well.[*] A branch of the same people formed a less known nation, whose recently found inscriptions have suddenly brought it into great prominence—the Minæans. The proper home of this people was the west coast of Arabia between Yemen and Mecca. That they were not identical with the Ṣabæans proper is abundantly proved. Their language is, in fact, a distinct dialect of the S. Arabian or 'Ṣabæan.' Their inscriptions are found over a very wide range of the west country, from the heart of Yemen itself to the very borders of Palestine. Their abundance, as well as the contents of some of them, show that both regions alike were then subject to them. That was, however, before the rise of the Ṣabæan power, and therefore long before the Christian era. They are possibly alluded to in 1 Ch 4^{41}, 2 Ch 26^{7}, where the word employed (מְעוּנִים) reminds us of the original name *Ma'īn*. See, further, art. SHEBA in vol. iv.

(*c*) *Abyssinians.*—This term is more appropriate than the current 'Ethiopians,' since that is the proper designation of the people of the Nile Valley above the First Cataract, in other words the biblical Cushites. That is to say, the Ethiopians are an African race, while the Abyssinians are fundamentally Semitic. At a very early date, far earlier than is generally supposed, a migration from S.W. Arabia, of a people closely akin to the Ṣabæans and Minæans, was made over the narrow sea to the cooler and healthier region of the Abyss. highlands. Here they developed a community which long remained uninfluenced by African elements, and cherished close relations with the Arabian mother-land. Its principal seat was Aksum, the centre of a powerful monarchy, which at length, in the 4th cent. A.D., conquered, and for a time held, Yemen and W. Arabia.[*] The Abyssinians have long since ceased to be a pure Semitic race or to speak a pure Semitic idiom; though 'Ethiopic,' as their language is called, is still their sacred tongue; and the Semitic type is still unmistakable in a large section of the population.

The attempt thus made to bring the Southern Semites under distinct groupings is only approximately successful. Besides the tribes already enumerated, many others are found, particularly in the S.E. and E. of Arabia, which, though Semites, have at least no permanent historical association with any of the groups. Very interesting, however, is the tabulation in Gn 10^{26-30}, which brings the most prominent of these remaining communities under one category. Thus, among the sons of Joḳṭan son of Eber, we find, along with Ḥaẓarmaveth, the modern Ḥadramaut, or the coastland east of Yemen, also Sheba and, to our surprise, OPHIR and ḤAVÎLAH. Unfortunately, the remaining nine tribes or localities cannot as yet be absolutely identified. But inasmuch as Ophir is almost certainly to be found on the E. coast of Arabia, and Ḥavîlah S.W. of Babylonia (but see above, p. 81^{a}), the presumption is that they represent families intermediate between these remotely separated districts. In brief, the summation seems to point to a close connexion between the N.E., E., S., and S.W. inhabitants of ancient Arabia. Furthermore, the brotherhood of Joḳṭan and Eber, the father of Peleg and grandson of Arpachshad, points to a tradition of kinship between the ancient Babylonians and the remotest S. Arabians. These are matters deserving serious attention.

(*B*) *THE NORTHERN SEMITES.*—Of far more importance to the Bible student than the Arabians and Abyssinians is the Northern branch of the Semitic family. Fortunately, it is also not very difficult to indicate the several divisions of the Northern Semites, and their local distribution. Taking them up in the order of their primary settlements from east to west, we have first to do with those dwelling by the lower waters of the Euphrates and Tigris.

(*a*) *Babylonians and Assyrians.*—In that region which Gn 2 describes as the cradle of the human race, lived a people whose history, traced not simply in their language, but also in their architectural remains, and even in their literary monuments, goes back to a period far beyond any other known to men. We call this people summarily *Babylonian*, from the name of the great historical capital. But Babylon or Babel did not come into prominence till about B.C. 2250. We have to regard the whole surrounding country as having been, for centuries and even millenniums before that era, divided up among a number of city-States, having a longer or shorter history of narrower or wider dominion. These communities we have also to consider essentially Semitic. The hypothesis of a so-called 'Sumerian' civilization and 'Sumerian' language, preceding the rise of the Semites, is in its current form the result of hasty and superficial theorizing, and the present writer is convinced that it will have to be essentially modified. As neighbours to the Semites, and more or less mingling with them from time to time, were a foreign people, probably more than one people, who contributed some important elements to their mythology and civic life, with corresponding terms to their language. Who they were and whence they came cannot as yet be said. Possibly they were of a race akin to the Elamites across the Tigris, or to the Kassites of the highlands to the north of Elam. The name 'Sumerian' as applied to them is, in any case, a misnomer; and the supposed Sumerian language is possibly only the Semitic Babylonian, or 'Assyrian,' written according to a system developed alongside of the popular syllabic from the original ideographic, and preserving the essential features of the latter. There are, it is true, many phenomena of this peculiar idiom which such an hypothesis does not explain. On the other hand, no one has yet succeeded in constructing a reasonable or consistent grammar of the supposed language, though good material is abundant. Until this is done, the Semitic has a right of possession, precarious though it may be. Many invasions of Babylonian territory were made by non-Semitic peoples from the most ancient times, especially Elamites and Kassites, but the language, the religion, both State and popular, and the civilization as a whole, remained always essentially Semitic down to the time of Cyrus and the Persians. Distinctive of the Babylonians, although adopted by other people, was their mode of writing in wedge-like characters, which, however, is far from representing the original ideographs. Distinctive of them especially were their culture, their inventive genius, their intellectual enterprise and love of knowledge. They were thus not only prominent among the Semites, but were also the most influential of all the peoples of antiquity, except the Hebrews, Greeks, and Romans. Indeed, when we consider their early development among the races of men, and the indirect influence of their genuine ideas, we may regard them fairly enough as the primary intellectual movers of the world.

---

[*] Its ancient capital was Ma'rib, though San'ā, three days' journey to the west, was a city of greater renown, and is the present capital of Yemen. Thus the Sabæan kingdom long comprised the whole of Tihāma, the S.W. coastland of Arabia. It also extended itself far both to the east and north.

[*] That they were separated from the Minæans and Ṣabæans at a very remote period is proved by the fact that their language, though more akin to the Ṣabæan than is the Arabic, is yet quite distinct from the former, whose written characters it borrowed, while it is also much less closely related to the Ṣabæan than is the Minæan dialect.

The Assyrians were of the same race as the Babylonians, and in all probability an offshoot from them. The name is derived from the city of *Asshur*, which was founded at an unknown early date on the west of the Tigris just above its confluence with the Lower Zab, which formed the normal southern boundary of the kingdom of Assyria. The Assyrians used the Bab. language in its purity. Indeed we usually call this language 'Assyrian,' because it was principally from the monuments of Assyria, and not from those of Babylonia, that our knowledge of it was first obtained, towards the middle of the 19th century. Unlike Babylonia, which contained many large cities, Assyria proper had but few, the principal being Nineveh and the surrounding fortresses. The Assyrians had virtually the same institutions as the Babylonians, with many of the same deities, and the same modes of worship. They were inferior to them in intellectual enterprise and culture, but superior in the military art, and in capacity for organization. They would appear, moreover, to have suffered less from the irruptions of outsiders, and therefore to have preserved, on the whole, a more purely Semitic racial type. It should be remarked, however, that the biblical lists make out the Assyrians and a portion of the Babylonians to have been of Cushite descent (Gn 10^{8-12}), perhaps in view of the mixture of races that had gone on in Babylonia (but cf. also p. 81^{a}). According to the same account (v.^{11}), Assyria was settled from Babylonia. See, further, artt. ASSYRIA and BABYLONIA in vol. i.

(*b*) *The Aramæans.*—The second great division of the Northern Semites, the biblical 'Aram,' had as its proper home a much larger range of country than any of the others. Within historical times the Aramæans had their settlements at various points on both sides of the Lower Tigris, to the west of the Lower Euphrates, in Mesopotamia, and in Syria south as far as Palestine. Indeed it is impossible to say with certainty what was their original centre. They seem to have been equally at home herding cattle for the markets of Babylon, driving caravans along the Euphrates, or holding bazaars in the crowded cities of Ḥarran and Damascus. A partial explanation of their ubiquity and versatility is found in their genius for trade and commerce. They were *par excellence* the travellers and negotiators of the ancient East. What the Phœnicians achieved by sea, they with almost equal enterprise and persistence attained on the land. To them was largely due the commercial and intellectual interchange between Babylonia and Assyria on the one hand, and the western States, particularly Phœnicia, on the other. They had their trading posts even in Asia Minor, through which the Greek cities appear to have obtained much of their knowledge of letters and the liberal arts.

It is possible to make certain restrictions of the general fact of the wide extension of the Aramæans. Until the 12th cent. B.C. they are not found in large settlements west of the Euphrates, though doubtless many isolated expeditions had from time to time crossed the River. They appeared in great numbers, with huge herds of cattle, upon the grazing grounds within reach of the Bab. cities. They also formed numerous settlements on the upper middle course of the Euphrates, especially on the left bank, and between that river and the Chabor. Here was Mesopotamia proper, the Aram-naharaim (or 'Aram of the two Rivers') of OT. Here also was Ḥarran, a city of enormous antiquity, held in historical times principally by Aramæans. After the fall of the Ḥittite dominion in Syria, Aram. immigration hither went on apace, and Carchemish, Arpad, Aleppo, Ḥamath, Ẓobah, and, last and greatest of all, Damascus, were colonized and enriched by them. In the time of David (*c.* 1000 B.C.) they are found firmly planted in Syria (2 S 8). From the 10th to the 8th cent. B.C. decisive importance attached to the rôle of the 'Aramæans of Damascus' (the 'Syrians' of EV). But their westward career did not end with the political decay of Damascus. By the 3rd cent. B.C. Palestine, which politically had become in succession Babylonian, Egyptian, Assyrian, Neo-Babylonian, Persian, and Greek, spoke popularly an Aram. idiom. After the rise of Christianity and the complete destruction of the Jewish State, the Jewish church perpetuated one dialect of Aramaic and the Christian Semites another. The Euphrates was the general dividing-line between W. and E. Aramaic, just as it had for many centuries parted the two main divisions into which the Aram. race had fallen. The vitality of Aramaism is attested by the fact that, while the popular dialects of Syria and Mesopotamia soon yielded to Arabic after the establishment of Islam in the 7th cent. A.D., Syriac, the principal E. Aramaic dialect, flourished as a literary language till the 13th cent., long after all traces of Aram. political influence had completely disappeared. See, further, art. ARAM in vol. i.

(*c*) *Canaanites.*—For want of a better term, we give this name to the pre-Hebrew inhabitants of Palestine and Phœnicia, with their descendants. We class them as Semitic by reason of their language, their civil institutions, and their religion, all of which reveal the purest type of Semitism. It is true that the Phœnicians of the coastland differed surprisingly from the inhabitants of the interior in their pursuits and mental habits. But common to both are 'the language of Canaan' (Is 19^{18}), and analogous forms of Baal-worship. As to their place of departure from the common camping-ground of the Semites we are again left to the widest sort of inference.* Of interest is the question as to the direction from which the Canaanites came into their historical abiding-place. The answer is: from the north or east; for if they had come from the south they would have spoken Arabic, or some dialect of South Semitic nearly akin to Arabic. That they were not the primitive inhabitants of Palestine is clear from the Bible statements as well as other evidence. We may for convenience call the earlier residents 'Amorites,' a people whose antiquity may be inferred from the name 'Land of the Amorites,' given to the country in the remotest times by the Babylonians. The Amorites were possibly not Semitic. The most significant fact about them is that there is no indication that they ever occupied the lower coastland, though they had settlements on both sides of the Jordan. They survived as a community longest in the east, where they were finally absorbed by Moabites, Ammonites, and the invading Hebrews.

The most striking feature of the civic and social life of the Canaanites was their residence in small city-States, independent of each other, and only confederated, if at all, under stress of common danger. This tendency to mutual repulsion was exhibited even among the Phœn. cities, which, however, partly on account of their foreign colonizing experience, became more disposed towards voluntary federation. The pursuits of the two branches of the Canaanites were not more dissimilar than their fortunes. While those of the interior remained isolated, exclusive, and comparatively uncultured, those of the coastland became the most cosmopolitan, and, in a material sense, the most directly serviceable to mankind of all their race. While the one did not survive for more than a generation or two the Heb. occupation of Canaan, the other, in the political world yet not of it, utilizing and subsidizing the great world-powers in the form of tribute-giving, following their own way to opulence and commercial supremacy, survived not only the Heb. monarchy, but the Assyr., the Bab., the Pers., and even the Macedonian empire, succumbing at last to the Roman alone.

It may be added that the various tribes mentioned in the Hexateuch as inhabiting Palestine are in all probability merely local subdivisions of the Canaanites, and not co-ordinate independent races. An exception is made of the ḤITTITES by those who hold them to have been immigrants from Syria, where they preceded the Aramæans. It is a matter of surprise that in Gn 10 the Canaanites, as well as the people of Middle Babylonia, are associated with the people of Upper and Lower Egypt (Cush and Mizraim). The explanation, probably, is that the Egyptians are partly of Semitic origin, and that there existed in Palestine, as well as in Babylonia, from very remote times, a population supposed to be akin to the Egyptians, with whom the later inhabitants mingled. The PHILISTINES were probably a non-Semitic people, possibly from the island of Crete, whose settlement in Palestine was made not earlier than the 14th or 13th cent. B.C.

(*d*) *The Hebrews.*—By this name we have to understand, not Israel alone, but all the Hebraic peoples, including as well the Edomites proper, the Moabites and Ammonites, whom the traditions of Israel with good reason claim as kindred. Their larger affiliations are not easy to make out. At least Israel and Moab spoke 'Hebrew.' But this was the language of Canaan; and they may have acquired it by immigration, just as the Edomites learned Arabic. Our best guide is the biblical record, according to which Abraham, their common ancestor, of the line of Arpachshad, Eber, and Peleg, came from Ur of the Chaldees, in the west of the Lower Euphrates. This implies Bab. kinship. But as belonging to a family of shepherds he was likely to have Aram. associations, since Aramæans abounded in all the neighbouring pasture-grounds. It is in accordance with this hypothesis that we find him sojourning in Ḥarran, the great Aram. settlement in Mesopotamia. His kindred there were always reckoned as Aramæans; and the immediate ancestor of the Israelites, though born and reared in Canaan, is called a 'stray Aramæan' (Dt 26^5). But none of the Semites show such a racial admixture as do the children of Israel. Primarily of Bab. affinity, their association with the Babylonians is attested by the common traditions of these two most highly endowed branches of the Semitic race. The residence in Egypt did not add any new elements to the already acquired Aramæan. Nor does it seem probable that all of the Hebrews of Canaan joined in the migration to Egypt with the family of Jacob. But both before and after the permanent settlement in Canaan large accessions were made of Arab. derivation (Ḳenites and others), while we have also to take account of the absorption of much of the Can. population after the conquest. It was therefore not till shortly before the founding of the monarchy that the people of Israel assumed that fixity of racial type popularly known as 'Hebrew.' What kept the community together through endless vicissitudes of fortune, what still gives Israel even now a bond of spiritual unity, is not purity of race, but steadfastness of faith in J", the old-time God of Israel. At the same time it is manifest that, so far as descent is concerned, the Hebrews must be taken only secondarily as one of the divisions of the Northern Semites.

ii. HISTORY OF THE SEMITES.—It appears, therefore, that we have to reckon with four primary branches of the Semitic stock: Arabians (and Sabæans) in the south; Babylonians, Aramæans, Canaanites in the north. From the Southern branch the Abyssinians are a secondary offshoot; from the Northern, the Hebrews. When we seek for the original home of this oldest of civilized races we are pointed to a region in N. Arabia, probably not far from the Lower Euphrates. The Semitic civilization is essentially of nomadic origin. N. Arabia is the geographical centre of the race. It is much more likely to have peopled the surrounding highlands than to have been peopled from them. The Arabic language is upon the whole nearest the primitive Sem. speech, as it is by far the oldest and purest of all living tongues, and its speakers in Arabia belong to the oldest and purest of races. Again, the Egyp. language has an important Sem. admixture; and it must have been from Arabia that this element was derived. We assume that the Northern Semites—Babylonians, Aramæans, Canaanites—lived long together apart from the Arabs, who tended always to the centre of the desert.*

The order of divergence seems to have been as follows:—The ancestors of all the Semites remained in their desert home for an indefinitely long period before the decisive separation took place. Very early, however, apparently even before the Sem. language was fully developed, a section of the tribes leavened the N. African population with a strong and persistent Sem. element. It is not yet certain whether the transit was made across the Isthmus or over the lower entrance of the Red Sea. Recent discoveries of remains of primitive Egyptians in Upper Egypt seem to point to the latter route. Possibly there was a very early movement of Semites along E. and S. Arabia, from which came the African migration. This must have preceded the Ṣabæan development. Next, the tribes representing the Northern Semites moved northwards, not yet attaining to fixed settlements, or at least not to life in cities. From these the Aramæans branched off as northern nomads. The ancestors of the Babylonians and Canaanites still held together for a time, while yet civic life and government were unknown. Next came the settlement of the Babylonians between the Lower Euphrates and Tigris, where they found an inferior alien population, which they subdued or absorbed. The Canaanites, parting from them, moved westward across the wilderness till they reached the highlands of Palestine and the sea. The Phœn. tradition that the fathers of the family came from the shores of the Persian Gulf, may perhaps be an authentic reminiscence of this memorable movement. It was not till many ages later that the Hebraic clans made a similar and still more fateful migration to the Land of Promise. A long residence of all the Arabian tribes upon the oases of the central desert preceded the departure of the S. Arabians and their gradual occupation of the coast of the Red Sea and the Ocean. Still another interval elapsed before a migration took place over the sea to Abyssinia.

---

* As to their places of settlement on the west coastland it is noteworthy that the Phœn. maritime cities extend to the north of Lebanon, while the Canaanites of the interior are not found to a certainty anywhere except south of that mountain range. The opportunities of trading by sea perhaps account for this local divergence.

* The first of all the Semites to form fixed settlements were the Babylonians. Since the 'Hebrew' language shows on the whole closer phonetic relations with the 'Assyrian' than does the Aramaic, it follows that the speakers of the former, or the Canaanites, must have lived longer together with the speakers of the latter, or the Babylonians, than did the Aramæans.

Some faint conception of the antiquity of the Sem. race may be gained from a consideration of its oldest literary monuments. We now have access to specimens of the language of the Babylonians as it was written between 5000 and 4000 B.C. It there presents an aspect differing not at all from that which it exhibits over three millenniums later. That is to say, it is a language showing signs of advanced phonetic degeneration, separated by a decisive stage of phonological and structural change from the Heb., still more from the Aram., and more again by an enormous interval from the South Sem. dialects. How many thousands of years we have thus to add to what we may call the historical period, as above indicated, cannot be said. Backward beyond that period we have still to take into account the ages that intervened between the Sem. migration into Africa and the separation of the South and the North.

For biblical study the history of the *Southern Semites* is of comparatively little significance. The interests of the OT centre in Palestine; and it was not till long after the Christian era that the life and thought of our race were affected by any decisive movement from the south. The Arabs played no part in the world's history till the time of Islam. But it would be a mistake to exclude, on that account, Arabia entirely from our historical survey. In the first place, S. Arabia was in the earliest known times a region of much greater importance than it was during the later period of Israel's history. It would appear that wide stretches of grazing land were occupied by great tribal confederations, some of which at certain periods at least assumed the dignity of kingdoms. In very remote times also the mineral productions of gold and precious stones were more abundant and valuable than they are now. The Bab. inscriptions bear testimony that in the fourth millennium B.C. the liveliest intercourse was maintained, and that by overland routes, between Babylonia and E. and W. Arabia,—and it would even appear that Arabs at one time obtained control of Babylonia. On the other hand, Gn 14 mentions what was apparently no exceptional instance of an expedition from Babylonia in the 23rd cent. B.C. to the peninsula of Sinai. In the next place, we learn from the recently discovered Minæan inscriptions that this people had established a flourishing trade and even a kingdom of their own on the west coast of Arabia before the rise of the kindred kingdom of Sheba, that is to say, before the time of Solomon, and that with the aid of writing they had attained to a fairly high degree of civilization. Lastly, it must be remembered that many Hebrews resided for a whole generation in Arabia, that thence its population was perpetually recruited, and that the biblical literature makes great account of the wisdom, piety, and patriarchal simplicity of various tribes of the Arabian borderland.

Outwardly considered, the Bible story of the career of Israel is an episode in the history of the *Northern Semitic* communities. That history begins with the first Sem. settlements in Babylonia. Here agriculture was first practised with large and rich results. Thereupon followed trade by river, sea, and land in days when Zidon and Tyre were still untenanted rocks, and the fertilizing waters of the Nile still flowed to the sea through an uncultivated waste. Cities one after another were built, cities famous in tradition and history, each the centre of a little kingdom, each with its own patron deity, its own temple and priesthood, and its own priest-king, such as were Akkad, and Sippar, and Nippur, and Erech. In these days—perhaps as early as 6000 years B.C.—Ur of the Chaldees and the no less renowned Eridu were unknown, ancient as they are; for the waters of the Persian Gulf then rolled over their future sites.

The next stage was that in which individual cities began to extend their dominion widely and to form little empires of their own. One city after another thus arose to power, until there came to be a few independent kingdoms instead of many. These, however, could not all survive in the rivalries and ambitions of that time and country, and so there came to be two dominant centres, the one in Northern and the other in Southern Babylonia. About B.C. 4000 we find Akkad in the north aiming at dominion, not only over Southern Babylonia, but over the most productive regions of Arabia and Syria, as far as the Mediterranean. This, however, we have reason to believe, was not the first great 'empire.' It is only the first that is fairly well known as yet. The centre of authority was also sometimes in the south, where, among the monarchies of B.C. 3000 and onwards, Ur of the Chaldees occupies a prominent place. The term of this alternating dominion lasted very long. In the 23rd cent. B.C. the rule was broken by an invasion of the Elamites, of whose subsequent domination Gn 14 gives a partial record. Not long thereafter the city of Babylon came to the front, and was made the capital of a united Babylonia, a position which was never abdicated till the close of the Sem. régime. But foreign rule was not at an end. After a lengthy period of native control, Kassites from the eastern highlands broke in upon Babylonia and held sovereign sway from the 18th to the 13th century. This is the period of the political decadence of Babylonia, due not merely to the domination of a foreign dynasty, but to the rivalry of a kindred nationality. For the result of the gradual rise of Assyria was that Babylonia played no world-moving rôle till its revival under the Chaldæan dynasty at the close of the 7th century B.C.

The early history of Assyria is obscure. Beginning very early with the growth of the city of Asshur, it gradually extended northward, mainly on the east of the Tigris, till it touched on the mountains of Kurdistan. The kingdom proper was never very large, but the race had a genius for war, and more capacity for government than any of the other ancient Semites. Its steadily cherished purpose was to secure the dominion in W. Asia already claimed by Babylonia, and to enlarge it till it should embrace the world. It took many centuries to reach the summit of power; but the idea was at length in a measure realized. By far the most important incident in this process of Assyr. extension was the prolonged and bitter strife with Babylonia, ending in the total subjugation of that venerable empire.

Bible students are concerned primarily with the people of Revelation, and secondarily with the actors in the events that prepared the way for that people and determined their providential destiny. From these points of view we are able to look at the history of the N. Semites as one great connected series of events co-operating towards the making and the discipline of Israel. In this 'increasing purpose' each one of the great divisions of the N. Semites played an important part. The home of Israel was to be in the West-land, more particularly in Palestine. This region from the remotest known times was of special interest to the inhabitants of the East. Thither came from the East the Can. immigrants. Thither followed them in course of time the slower-moving Aramæans. Thither came the Hebrews themselves, also from the farther East, as to a land of promise. Thither, before and after the earliest and latest of these permanent emigrants, came the all-dominating Babylonians, for conquest and still more for exploration and for self-enrichment. Normally, until the 16th cent. B.C., the whole of the West-land was under the sway of Babylonia. And when its political control was relinquished, its intellectual influence remained, so that near the close of the 15th cent. the Bab. language and its cuneiform writing were the international means of communication between the remotest regions. Even letters from Mesopotamia, Syria, Phœnicia, and Palestine, not to speak of Assyria and Babylonia itself, were written therein to the court of Egypt, 300 miles up the Nile. This state of things at length passed away, because Babylonia and Assyria spent their force upon one another, and thus both alike lost their hold upon the West.

It was in this period, which we may fairly call exceptional in the history of ancient W. Asia, that the opportunity for independent action came to the peoples of the western coastland. It was then also that the Egyptians, who in their whole history never successfully interposed in Asia, except when the Babylonians or Assyrians were enfeebled or quiescent, essayed to conquer Palestine and Syria. It was in this period, too, that the Hittites arose to power in Northern and Central Syria, and contended long and bitterly for supremacy with the invaders from over the Isthmus. Within the same limits of time, Israel, emerging from the obscurity and shame of Egypt, began to play its rôle in Palestine. Then was enacted the earlier half of its unique history, including its conquest and absorption of one branch of the Canaanite race, and its 'brotherly covenant' (Am 1[9]) with the other, and culminating in its greatest external power and splendour under David and Solomon. Then also were formed the settlements in Syria of the Aramæans, which became so fateful for Israel in its 'hundred years' war,' in its cruel suffering, and its moral and spiritual chastening after its own internal dismemberment.

But the Bab. idea of Western dominion, inherited by Assyria, was at length realized. Assyria was the first of Sem. nations to learn how to govern as well as to subdue the territory of its rivals. After intermittent attempts at conquests, progress westward was surely made and maintained from the 9th cent. onwards till the middle of the 7th. The Aramæans were crushed; and Israel, repressed for a time, arose again to prosperity under Jeroboam II. and Uzziah. But its 'day' also came at last. N. Israel was obliterated and added to the realm of Assyria, while Judah was made an Assyr. vassal. Till near the close of the 7th cent. B.C. Assyria remained the undisputed mistress of W. Asia, not simply controlling the other Sem. communities, but making most of them an administrative portion of her own empire. Thus it came to pass that the individuality of the various communities was gradually destroyed, that one was distinguished from the other less by racial connexion than by traditional usages and spoken language. Ethnical terms were generalized, so that Western seafaring men and merchants came to be known as 'Phœnicians' or 'Canaanites,' inland traders and travellers as 'Aramæans,' and at a later date also learned men and astrologers as 'Chaldæans.' The general revolution of which this phraseology is a symptom was immensely accelerated by the irruptions of northern barbarians, Kimmerians, and Scythians, which took place during the later years of the Assyr. dominion. The same influx of foreigners hastened the fall of Assyria, which was in any case inevitable, on account of the impossibility of holding together for ever a multitude of petty communities by centralized force alone.

But when Nineveh fell, in B.C. 607, its ruin was utilized by new exponents of the ancient Bab. spirit, the Chaldæans from the shores of the Persian Gulf. Combined with them, and foremost in the attack upon Nineveh, were the Aryan Medes—a people new to dominion, but the precursors of a movement which was to put an end to the rôle of the N. Semites. In the partition which followed the conquest, the Chaldæans retained the proper Sem. domain, while the Medes claimed the highlands to the east and north. The régime of the Chaldæans was stern and strenuous, though not so cruel as that of the Assyrians. Egypt, which had been subdued and then given up by the later Assyr. empire, made a futile attempt, during the brief interregnum, to occupy Syria and Palestine. It was thrust out by Nebuchadrezzar the Chaldæan. Egypt itself was in due time visited and disciplined within its own domain. The kingdom of Judah, removed from Egyp. control, was put under bond to the Chaldæans. Repeated revolts brought about at last the destruction of Jerus. and the kingdom, and the exile of the people.

But internal decline effected a decay of the Chaldæan empire almost as swift as that of the Assyrian. A round seventy years limited its duration. *Its* destruction also was accelerated by an Aryan power. Cyrus the Persian, beginning his career as the head of a little province of Media, had become lord of the vast Median dominion, the conqueror of Lydia, and the ruler of a territory stretching from the Indus to the Ægean Sea. Babylon fell to him in the summer of 539, and with its transfer into Aryan hands the political sway of the N. Semites was for ever ended.

The rule of Cyrus was tolerant and humane. Under it the principle of delegated power, unknown to the Semitic rulers, was put in force. Under the comparatively genial sway of the Persians, many of the old Sem. communities, Bab., Aram., Can. (Phœn.), and Heb., continued to exist, and some of them to flourish. The Aram. people, in small communities, survived in greatest numbers, and taught their language to most of the old N. Semitic realm. But Jerusalem and Tyre were long the most outstanding representatives of the Sem. genius. Surviving longest as centres of influence, they recalled to the world the ancient power of the Sem. mind and spirit. The one handed over to Europe the method as well as the example of a world-wide commerce. The other, in the more potent and more enduring realm of religion, continued to verify and to publish the essential truth about God and man and duty.

It was, above all, in this region of thought and feeling that the Semites did their work for humanity. In their front we place the community of *Israel*, with all its feebleness and insignificance. It was under the vassalage to Assyria and Babylonia that the prophets and poets of Israel uttered those words which form the most precious legacy of all ancient time. And it was after the national life had been finally extinguished that the ancient Church abjured false gods for ever, and first realized the idea of local and individual worship apart from the central sanctuary. Thus was prepared the way for that final epoch, when He who was not only a Semite and a Hebrew but the Son of Man, did away with ritual, priesthood, and caste, and erected His temple in the heart of humanity. Thus a greater service was done for the world by the most potent of the forces of Semitism under political disability and decline, than any which had been wrought by the mightiest of Semitic empires in the days of their power and pride.

iii. CHARACTERISTICS OF THE SEMITES.—It has been stated above that the Sem. civilization is essentially of nomadic origin. We may go further, and assert that the character of the people was vitally affected by their early habitual mode of life. Probably no race in the world's history has had such a prolonged experience of tribalism as a preparation for its wider active career among the nations. The general sketch already given of the early history of the Semites may give some indication of the conditions of their life in those distant ages. The inland Arabs of the present day present the nearest surviving analogy, changed though the type has been from the ancient prototype. A better representation, though still far from adequate, is afforded by the picture which the Arabian historians and poets have drawn of the manners and pursuits of their countrymen in the centuries before Islam: the migrations of their tribes, their alliances, their feuds, their forays and raids, their revenges, their stormy passions, their loves and hates, their swift growth and decline, their superstitions, their monotonous activity, their impulsive energy. But the correct estimate, as nearly as it may be reached, can be gained only by the use of the imagination, trained in the inductions of prehistoric archæology. By a process of reduction and elimination we may arrive at an approximate view of primitive Semitic society.

We must not imagine the Semites shortly before their separation as one large community swayed by a common leader, obeying common laws, and inspired by common memories. We have rather to think of a multitude of small communities, some of them scarcely more than parasitic unorganized hordes, speaking various closely related dialects, constantly intermingling with and modifying one another, and ranging over a vast extent of wilderness land. Hunting still engrossed the attention of many of the tribesmen, though immense herds of cattle were the property of others. They had learned something of the practical uses of metals, especially of copper and iron, besides gold, silver, and several precious stones. The various tools and weapons essential to the business of hunters and shepherds are also represented by words common to the several derivative languages. They were close observers of animals, wild and domesticated, and of various species of plants. They would even appear to have employed some rude form of writing, though none which was later developed into a general system. Their common vocabulary is naturally deficient in legal terms; for their only law was usage and prescription, and their only court that of the family or tribal chiefs. On the other hand, the religious habit and consciousness had found copious expression.

The reciprocal antagonism of a multitude of tribes, so long maintained in spite of frequent alliances and absorptions, and guarded by the tribal badges of social and religious usage, had its most marked result in the permanent political character of the later Sem. communities. Mutual repulsion, even between the States most closely allied by blood or common interest, was universal, and was scarcely ever overcome, even after prolonged forcible amalgamation. City-kingdoms became the rule in all fixed settlements—an institution which was essentially tribal chiefdom made permanent and hereditary. This type of government was scarcely modified, even in the most highly organized States; there intervened no real substantial authority between the king and any of his subjects. Even Israel, which exceptionally began its settled career as a tribal confederation, reverted inevitably to the normal Sem. type of government. After the establishment of the kingdom, Israel was reduced to 'Ephraim,' and Samaria became the synonym of either, while Jerusalem ere long became the virtual surrogate of Judah.

Of absolutely immeasurable importance to the world were the intellectual and moral character and temper of the ancient Semites. Long-continued intense activity, within a wide yet monotonous and secluded territory, was the habit of this unique people. Such a habit of necessity produces men eager, impulsive, and intense, but narrow and unimaginative. Such were the prehistoric Semites, and such the Semites of history. Religious, for the most part, rather than moral; patient, resolute, enduring, brave, serious; faithful to friends, implacable towards foes,—they have borne the stamp of tribalism all through their history. With little breadth of imagination, or range of invention, or intellectual or moral sympathy, they have given to literature scarcely anything dramatic or epic. But their ardour and passion, their religious and patriotic fervour, have inspired a lyrical poetry unequalled or unsurpassed. Intensely subjective, they have little spontaneous interest in experimental science and the pictorial arts. Incapable of wide speculation, they have had no genuine philosophy of their own; but, wholly practical in their views and modes of life, they have attained to the highest eminence in gnomic wisdom. Their faculty of surviving in strange conditions and surroundings, and of arousing themselves from chronic inactivity to almost superhuman daring and enterprise, seems to be the manifestation of a reserve power potentially acquired through ages of undaunted persistence under hard conditions. Not looking far around them, they have at times seen all the farther beyond and above them. And when it has been given them to see straight and clear, they have beheld 'unspeakable things, which it is not possible for a man to utter.' But they are apt to see only one thing at a time, and so in their judgments of men and things they are exclusive, partial, and extreme. When they perceive the principal part of a thing, it is conceived of and described as standing for the whole. In their mental pictures there is but little combining of elements, or shading or perspective. In their vocabulary there are few qualifying or restrictive terms. In their view of the universe they refer everything to direct supernatural agency. Hence they leave little scope to the individual human will, and a circumscribed choice of action to themselves. They know of but two types of government, the one a development of the other: the patriarchal and the absolute monarchical. They follow but few occupations, and their work is divided among hereditary guilds. For the like fundamental reason, they are quite limited in their view of human merits and allotments; men are to them either absolutely good or absolutely bad; and their destiny is to be either beatific or hopelessly wretched. With such mental and moral qualities, they have been, according to the light which they have seen and the course to which they have been driven, the most beneficent or the most noxious of our species. There are two consummate forms and modes of Sem. faith and practice—Judaism and Mohammedanism. The one, with all its inevitable limitations, was incomparably the greatest gift of God to the world in ancient times. The other, in spite of the truth which it has appropriated, is one of the greatest evils of the world's later days, one of the most perverse and malignant, one of the most perplexing and disheartening.

LITERATURE.—On possible relations between the Semites and other races, see Benfey, *Verhält. d. ägypt. Sprache z. semit. Sprachstamm* (1844); Friedr. Delitzsch, *Indogerm.-Semit. Wurzelverwandtschaft* (1873); McCurdy, *Aryo-Semitic Speech* (1881); Brugsch, *Hierogl.-demot. Wörterb.* (1867), Introduction. On the question of the original seat of the Semites and their classification, essays have been written by von Kremer, Guidi, and Hommel in favour of the theory of a migration from the N.E.; by Sprenger, Schrader, and de Goeje approving of the view that Arabia was the starting-place. See the summation in favour of the latter hypothesis in Wright, *Compar. Gramm. of Sem. Languages* (1890), p. 5 ff.; and comp. Nöldeke, art. 'Semitic Languages,' in *Encyc. Brit.*^{9} Hommel's latest classification, as based on language, may be found in *AHT* (1897). The genius and character of the Semites are discussed in Hommel, *Die semit. Völker und Sprachen* (1883), p. 21 ff., where the views of Renan, Ewald, Chwolson, Grau, and Sprenger are also cited and criticised. On the religion of the Semites, see W. R. Smith, *RS*; Baudissin, *Studien zur sem. Religionsgeschichte*; and Baethgen, *Beiträge z. sem. Religionsgeschichte*. For the history of the Semites, see Max Duncker, *Hist. of Antiquity* (tr. from the German [1879], vols. i.–iii.); Meyer, *Gesch. des Alterthums* (1884), vol. i.; Maspero, *Hist. anc. des peuples de l'Orient*; Lenormant, *Hist. anc. de l'Orient*; G. Rawlinson, *The Five Great Monarchies of the Ancient Eastern World*; Sayce, *The Ancient Empires of the East*; McCurdy, *HPM*. See also artt. ASSYRIA and BABYLONIA in vol. i. and in the *Encyc. Bibl.*, and the Literature there referred to; and add on the Sumerian question, Weissbach, *Die sumer. Frage* (1898).

J. F. MCCURDY.

DIASPORA.—

Introduction.

- i. Extent of the Diaspora: in (1) the Euphrates districts; (2) Syria; (3) Arabia; (4) Asia Minor; (5) Egypt; (6) Cyrenaica; (7) North Africa; (8) Macedonia and Greece; (9) Rome; (10) the rest of Italy, and Spain, Gaul, Germany.
- ii. Organization of the communities: certain features common to them everywhere; differences as to (1) the *name* of the community, (2) the *officials*. Constitution of the Jewish communities akin to that of the Greek communes.
- iii. Toleration and recognition by the State anthorities. Three forms of political existence: (1) as a colony of foreigners (κατοικία); (2) as private societies or 'unions'; (3) as more or less independent corporations alongside the communal bodies. Toleration of the Jewish cultus a main essential. Right of administering their own funds, and jurisdiction over their own members. The question of military service. The cult of the Emperor; advantage of the Jews in this matter over the Christians. Varying attitude of different Emperors towards the Jews.
- iv. Rights of citizenship, and social standing. Citizenship possessed by the Jews especially in recently founded cities like Alexandria and Antioch, or in those whose constitution had been reorganized like the cities of Western Asia Minor. In such instances the Jews formed a φυλή by themselves. Many Jews enjoyed even *Roman* citizenship. Social standing of the Jews. The offices of *alabarch* and 'head physician.'
- v. Religious and intellectual life. Danger of syncretism and philosophic indifference. The Synagogue a safeguard. The *Greek* language used in the Synagogue services. The temple at Leontopolis. Payment of dues to the temple at Jerusalem. Pilgrimages to the festivals. Greek influences. Pædagogic part played by the Diaspora in relation to Christianity.

Literature.

Amongst the causes that contributed to the rapid spread of Christianity during the Apostolic and post-Apostolic periods, one of the most important was the circumstance that Judaism was already dispersed as a powerful force throughout the whole extent of the Roman Empire, nay even beyond it. Everywhere the preachers of the gospel found Jewish communities, which furnished them with the starting-point for their proclamation of the advent of the Messiah. And, even if their success was not very marked within the pale of the communities themselves, it must be assumed to have been all the greater in the circles of 'God-fearing' Gentiles, who in many places had attached themselves as an appendage to the community of Jews. Through these circles being won over by the Jewish propaganda to a worship that was monotheistic and determined by ethical interests, the soil was loosened for the seed of the gospel to be scattered on it.

The enormous extent of the Jewish Diaspora in comparison with the petty mother country presents an enigma to historical inquiry which it is unable to solve with certainty. In any case, various factors must have co-operated to bring about the result in question. In the time of the Assyrians and the Chaldæans forcible deportations to the Euphrates districts took place, and a process of the same kind was repeated even in the Persian period, under Artaxerxes Ochus. At the beginning of the Greek period the rulers sought, in the interests of the consolidation of their dominions, to effect the greatest possible intermixture of populations, and with a view to this they incited and favoured general migrations, by guaranteeing certain privileges and by other means. Pressure from above and the prospect of gain, in particular the interests of trade, combined to produce an ebbing and flowing of the peoples scattered over the wide dominions of the Diadochi. It is to this period that we ought presumably to assign a large proportion of those Jewish migrations, whose occurrence we can only infer from their results in the Roman period. But all this is hardly sufficient to account fully for the fact before us. Is it possible that the small community, which under Ezra and Nehemiah organized itself around Jerusalem, and which even about the year B.C. 200 had not spread beyond the territory of Judæa (in the narrower sense), should have produced merely by natural increase the many thousands, nay millions, who at the latest in the 1st cent. A.D. are found scattered over the whole world? This is highly improbable. We are thus compelled to suppose that it was not only to migration and natural reproduction, but also to numerous conversions during the Greek period, that Judaism owed its wide diffusion over the whole world, and the great number of adherents whose existence we can prove in general with complete certainty, although we cannot give the actual figures.

In the present article we shall describe (1) the extent of the dispersion of the Jews; (2) the organization of the communities; (3) the measure in which they enjoyed toleration and recognition by the State; (4) the share of the Jews in citizenship; (5) their religious and intellectual life in general.

i. EXTENT OF THE DIASPORA.—We have general testimony to the wide dispersion of the Jewish people, commencing with the middle of the 2nd cent. B.C. In the Third Book of the *Sibylline Oracles*, composed probably about B.C. 140, it is said that 'every land and every sea is filled with them' (*Orac. Sibyll.* iii. 271, *πᾶσα δὲ γαῖα σέθεν πλήρης καὶ πᾶσα θάλασσα*). In the time of Sulla we are told by Strabo that the Jewish people had already 'come into every city; and one cannot readily find any place in the world which has not received this tribe and been taken possession of by it' (*ap.* Jos. *Ant.* XIV. vii. 2). According to Josephus, there is 'no people in the world without a fragment of us' (*BJ* II. xvi. 4 [Niese, § 398]: *οὐ γὰρ ἔστιν ἐπὶ τῆς οἰκουμένης δῆμος ὁ μὴ μοῖραν ἡμετέραν ἔχων*). The fullest details are found in the survey given by Philo in the letter of Agrippa to Caligula (*Legatio ad Gaium*, § 36 [ed. Mangey, ii. 587]): 'Jerusalem is the metropolis not only of Judæa, but of most countries. This is owing to the colonies which on suitable occasions she has sent to the neighbouring lands of Egypt, Phœnicia, Syria, Cœle-Syria; to the remoter Pamphylia, Cilicia, most parts of Asia, as far as Bithynia; and to the farthest corners of Pontus, as well as to Europe, Thessaly, Bœotia, Macedonia, Aetolia, Attica, Argos, Corinth, to the most and the fairest parts of the Peloponnesus. And not only is the mainland covered with Jewish settlements, but also the principal islands: Eubœa, Cyprus, Crete. I leave unnamed the lands beyond the Euphrates, for, with the exception of a small portion, all this district, including Babylon and the satrapies that embrace the fertile territory lying around, has Jewish inhabitants.' We are not able to test the correctness of this testimony in every detail. But the more our knowledge is enlarged by new discoveries, the more do we find the accuracy of the above description established. Coming now to particulars, the following are the most important testimonies:—

1. *THE EUPHRATES DISTRICTS.*—The earliest Diaspora of the Jews is that found in these regions (Assyria, Media, Babylonia). Large masses were deported by the Assyrians from the kingdom of the Ten Tribes, and by the Chaldæans from the kingdom of Judah. The Assyrians settled those whom they had carried away 'in Halah and in Habor by the river of Gozan, and in the cities of the Medes' (2 K 17^6 18^{11}), *i.e.* in the northern part of the region watered by the Euphrates, to the west of Nineveh (see the articles on the various localities just named). The Chaldæans brought their captives to the region of Babylon. It is true that large companies of the Judahites and Benjamites who had been carried to Babylon, afterwards returned to their native land and founded a new community there. But there was no such thing as a complete return of the Babylonian exiles. Still less was this the case with the members of the Ten Tribes deported by the Assyrians. Practically, the whole of these remained in foreign parts. This is not only implied in the biblical narrative, which knows nothing of a return on their part, but is expressly testified to by later writers (Jos. *Ant.* XI. v. 2: *αἱ δὲ δέκα φυλαὶ πέραν εἰσὶν Εὐφράτου ἕως δεῦρο, μυριάδες ἄπειροι καὶ ἀριθμῷ γνωσθῆναι μὴ δυνάμεναι*; cf. 4 Ezr 13^{39-47}; Origen, *Epist. ad Africanum*, § 14; Commodian, *Carmen Apologet.* 936–939). As late as the time of R. 'Akiba, the Rabbis continued to dispute whether the Ten Tribes would ever return or not (Mishna, *Sanhedrin*, x. 3 *fin.*; tradition vacillates regarding the authorities who supported the different views [see Bacher, *Die Agada der Tannaiten*, i. 143 f.]).

A fresh deportation was carried out by Artaxerxes Ochus, who about the year B.C. 350 transported Jewish prisoners to *Hyrcania* (Euseb. *Chron.*, ed. Schoene, ii. 112, ad ann. Abr. 1657; Orosius, iii. 7), probably because they had taken part in the revolt of the Phœnicians against the Persian sway.

All these Israelites who lived in the Euphrates districts maintained communication with the mother country, and, as the centuries ran their course, took their share in its religious development. Instead of being absorbed by the surrounding heathenism (as one would naturally have expected), they rather advanced in the direction of proper, strict, legal Judaism. And to such an extent did their numbers increase that in the Roman period they were counted by millions; and thus, even from a political point of view, constituted a power with which the Romans had to reckon, seeing that their settlements lay on the border of [down to the time of Trajan chiefly outside] the sphere of Roman authority. P. Petronius, the legate of Syria, considered it dangerous in the year A.D. 40 to provoke them to a hostile disposition towards Rome (Philo, *Legatio ad Gaium*, § 31 [ed. Mangey, ii. 578]). Trajan in his advance against the Parthians was exposed to a real danger by the revolt of the Mesopotamian Jews which threatened his rear. It is not probable that these millions (*μυριάδες ἄπειροι*) of Jewish inhabitants were simply descendants of the former exiles. We must rather think of a successful propaganda among the surrounding heathen. This propaganda, too, must have been directed from Judæa, for the population of which we are speaking was Jewish in the sense of Pharisaism, as is evident from the forms of activity displayed by its religious life (pilgrimages to the feasts, sending of dues to the temple, etc.; see, on this, below). The main stock, however, was certainly composed of the ancient exiles, for in the Roman period we find the Jewish population most thickly settled in the very spots to which the Assyrians and the Chaldæans once transported their prisoners. Josephus names, as their two principal cities, Nehardea (*Νέερδα, Νάαρδα*) and Nisibis (*Ant.* XVIII. ix. 1 and 9 *fin.*). The former of these was in Babylonia; the latter on the Mygdonius, a tributary of the Chaboras (Ḥabor), in the centre of the localities named in 2 K 17^6 18^{11}. Around Nehardea were thus grouped the descendants of the tribes of Judah and Benjamin; around Nisibis, the descendants of the Ten Tribes.

It may be further mentioned that, in the time of Tiberius, two brothers, Asinæus and Anilæus, founded in the neighbourhood of Nehardea a robber State, which, owing to the weakness of the Parthian monarchy, maintained its existence for several decades (Jos. *Ant.* XVIII. ix.).—In the time of Claudius the royal house of Adiabene (Izates, his mother Helena, and his brother Monobazus) adopted the Jewish faith, and proved its attachment by keeping up intimate relations with Jerusalem, by establishing various foundations there, and by taking part with the Jews in their great war with the Romans under Nero and Vespasian (Jos. *Ant.* XX. ii.–iv.; *BJ* II. xix. 2, IV. ix. 11, V. ii. 2, iii. 3, iv. 2, vi. 1, VI. vi. 3, 4).

2. *SYRIA.*—This is characterized by Josephus as the country which, on account of its proximity to Palestine, had the largest percentage of Jewish inhabitants, these being specially numerous in the capital, Antioch (*BJ* VIII. iii. 3: *τὸ γὰρ Ἰουδαίων γένος πολὺ μὲν κατὰ πᾶσαν τὴν οἰκουμένην παρέσπαρται τοῖς ἐπιχωρίοις, πλεῖστον δὲ τῇ Συρίᾳ κατὰ τὴν γειτνίασιν ἀναμεμιγμένον ἐξαιρέτως ἐπὶ τῆς Ἀντιοχείας ἦν πολὺ διὰ τὸ τῆς πόλεως μέγεθος*). At Antioch the Jews enjoyed the rights of citizenship, they had a splendid synagogue, and carried on a zealous and successful propaganda among the heathen population (Jos. *l.c.*). It is true that by all this they drew upon themselves the hatred of the pagan inhabitants. Regarding the state of things in most of the other towns of Syria we know nothing very definite. But Philo states that there are

'great numbers of Jews in every city of Asia and Syria' (*Legatio ad Gaium*, § 33 [ed. Mangey, ii. 582]: *Ἰουδαῖοι καθ' ἑκάστην πόλιν εἰσὶ παμπληθεῖς Ἀσίας τε καὶ Συρίας*). For Damascus exact figures are given by Josephus, who, however, contradicts himself on this point. In one passage he states that, at the outbreak of the great war in the year A.D. 66, there were 10,500 [so Niese's text of *BJ* II. xx. 2; according to another reading, 10,000] Jews massacred at Damascus. In another passage (*BJ* VII. viii. 7 [Niese, § 368]) he gives, instead of this number, '18,000, with women and children.' According to the first cited passage (*BJ* II. xx. 2), the women of Damascus were almost all devoted to the Jewish religion (*τὰς γυναῖκας ἁπάσας πλὴν ὀλίγων ὑπηγμένας τῇ Ἰουδαικῇ θρησκείᾳ*).

3. *SOUTH ARABIA.*—At what date Judaism reached this quarter is unknown, but it was strongly diffused there from the 4th cent. A.D. at the latest. When, under Constantius, attempts were made to extend Christianity in that quarter, these had to contend with Jewish opposition (Philostorgius, iii. iv.). At the beginning of the 6th cent. a Jewish king reigned there. Owing to his persecution of the Christians, he was dethroned by the Christian king of Abyssinia (see Fell, 'Die Christenverfolgung in Südarabien,' etc., in *ZDMG* xxxv. [1881] 1–74. Against Halévy, who argued that the king in question was not a Jew but an Arian, see Duchesne in *REJ* xx. [1890] 220–224).

4. *ASIA MINOR.*—Here we have numerous testimonies, and are able to demonstrate the presence of Jews in almost every quarter. They were most thickly settled in Phrygia and Lydia, and we know further how they came there. Antiochus the Great transplanted two thousand Jewish families from Mesopotamia and Babylonia to Lydia and Phrygia, because he considered them more loyal subjects than the Lydians and Phrygians, who were inclined to revolt (Jos. *Ant.* XII. iii. 4). While these Babylonian Jews peopled the inland provinces of Asia Minor, others were attracted by trade interests to the towns on the coast. An indirect evidence of the early appearance of the Jews in Asia Minor may be discovered also in 1 Mac 15^{16-24}. According to this passage, the Romans in the year B.C. 139 simultaneously despatched to a number of kings a letter in identical terms, charging them to refrain from showing any hostility towards the Jews. From this it may be inferred that Jews were already to be found in all the places there named. Of States and cities in Asia Minor the following are mentioned: the kingdoms of Pergamum and Cappadocia; the district of Caria, with the cities of Myndos, Halicarnassus, and Cnidos; Pamphylia, with the city of Side; Lycia, with the city of Phaselis; and, finally, Sampsame, *i.e.* the Samsun of later Arab geographers, or Amisus in Pontus, to the east of Sinope. These various districts and cities were in the year B.C. 139 politically independent, and are therefore named separately beside the great kingdoms of Pergamum and Cappadocia.

As showing the great numbers and the prosperity of the Jews of Asia Minor about the middle of the 1st cent. B.C., we have, on the one hand, the numerous acts in their favour during the closing years (B.C. 50–40) of the Roman Republic (collected by Josephus in *Ant.* XIV. x.); and, on the other hand, the remarkable passage in Cicero, *pro Flacco*, 28, in which he gives precise details as to the circumstances under which quantities of Jewish money, intended to be sent from Asia Minor to Jerusalem, were confiscated by the governor Flaccus (B.C. 62–61). The whole passage reads thus: 'Quum aurum Judæorum nomine quotannis ex Italia et ex omnibus provinciis Hierosolyma exportari soleret, Flaccus sanxit edicto ne ex Asia exportari liceret. . . . Ubi ergo crimen est? quoniam quidem furtum nusquam reprehendis, edictum probas, judicatum fateris, quæsitum et prolatum palam non negas, actum esse per viros primarios res ipsa declarat: *Apameæ* manifesto deprehensum, ante pedes prætoris in foro expensum esse auri pondo centum paullo minus per Sex. Cæsium, equitem Romanum, castissimum hominem atque integerrimum; *Laodiceæ* viginti pondo paullo amplius per hunc L. Peducæum, judicem nostrum; *Adramyttii* per Cn. Domitium, legatum; *Pergami* non multum.' If we add to these general testimonies other special ones, particularly those of the inscriptions, we obtain for the Jews in Asia Minor the following data (commencing with the N.W.):—

a. *Adramyttium* and *Pergamum:* the above testimony of Cicero.

b. *Phokœa:* an inscription (*REJ* xii. [1886] 236–242=*Bulletin de corresp. hellén.* x. [1886] 327–335): *Τάτιον Στράτωνος τοῦ Ἐνπέδωνος τὸν οἶκον καὶ τὸν περίβολον τοῦ ὑπαίθρου κατασκευάσασα ἐκ τῶ[ν ἰδ]ίων ἐχαρίσατο τ[οῖς Ἰο]υδαίοις. Ἡ συναγωγὴ ἐ[τείμη]σεν τῶν Ἰουδαίων Τάτιον Σ[τράτ]ωνος τοῦ Ἐνπέδωνος χρυσῷ στεφάνῳ καὶ προεδρίᾳ.*

c. *Magnesia* on Mt. Sipylus: a Jewish tomb-inscription (*REJ* x. [1885] 76).

d. *Smyrna:* an inscription from the time of Hadrian, with a list of those who had made presents to the city, among them *οἱ ποτὲ Ἰουδαῖοι* (*CIG* 3148). The Jews played a prominent part in connexion with the death of Polycarp (*Martyr. Polyc.* 12–13, 17–18; *Vita Polycarpi auctore Pionio*, ed. Duchesne, 1881; cf. also Reinach, *REJ* xi. 235–238). There is, further, this inscription from the 3rd cent. A.D. (*REJ* vii. [1883] 161–166): *Ῥουφεῖνα Ἰουδαῖα ἀρχισυνάγωγος κατεσκεύασεν τὸ ἐνσόριον τοῖς ἀπελευθέροις καὶ θρέμασιν μηδενὸς ἄλου ἐξουσίαν ἔχοντος θάψαι τινά, εἰ δέ τις τολμήσει, δώσει τῷ ἱερωτάτῳ ταμείῳ δηνάρια ͵αφ καὶ τῷ ἔθνει τῶν Ἰουδαίων δηνάρια ͵α. Ταύτης τῆς ἐπιγραφῆς τὸ ἀντίγραφον ἀποκεῖται εἰς τὸ ἀρχεῖον.*

e. *Sardis:* three official documents quoted by Josephus—1. A despatch of L. Antonius to the authorities of Sardis (B.C. 50, 49), permitting the Jews to refer their disputes for decision to their own tribunals, even when they are Roman citizens (*Ant.* XIV. x. 17). 2. A popular resolution of the city of Sardis, guaranteeing to the Jews the undisturbed exercise of their religion (*Ant.* XIV. x. 24). 3. A despatch of C. Norbanus Flaccus, from the time of Augustus, to the authorities of Sardis, reminding them afresh of the religious freedom of the Jews (*Ant.* XVI. vi. 6).

f. *Hypaepa*, to the south of Sardis: an inscription of *c.* 200 A.D., containing only the two words *Ἰουδαίων νεωτέρων* (*REJ* x. 74 f.).

g. *Ephesus:* the granting of the city franchise to the Jews, probably as early as the reorganizing of the city constitution by Antiochus II. Theos (B.C. 261–246). Numerous official documents are quoted by Josephus, particularly those dating from the years B.C. 49–42, according to which the Jews living in Ephesus were exempted from military service even when they possessed the Roman citizenship (*Ant.* XIV. x. 11–13, 16, 19, 25. During the years named the Roman citizens in Asia Minor were called out for military service). Under Augustus the authorities of Ephesus were repeatedly reminded that the Jews were not to be interfered with in sending the sacred money to Jerusalem (Philo, *Legatio ad Gaium*, § 40; Jos. *Ant.* XVI. vi. 4, 7). Their synagogue is mentioned in Ac $18^{19.26}$ 19^{8}. In a late tomb-inscription we meet with a Jewish *ἀρχίατρος* (*Ancient Greek Inscriptions in the British Museum*, iii. 2, No. 677). The 'head physicians' were appointed by the city, and enjoyed immunity from all burdens.

h. *Tralles:* incidental mention in a despatch from the Laodiceans (Jos. *Ant.* XIV. x. 20).

i. *Caria:* see, in general, 1 Mac 15^{23}, and cf. also the above remarks.

j. *Miletus:* a despatch of the proconsul to the city authorities, bearing on the religious freedom of the Jews (*Ant.* XIV. x. 21).

k. *Jasus,* to the south of Miletus: an inscription from the middle of the 2nd cent. B.C., according to which one Νικήτας Ἰάσονος Ἱεροσολυμίτης gave a money contribution in support of the festival of the *Dionysia* (Le Bas et Waddington, *Inscr.* iii. No. 294=*REJ* x. 76). It is not impossible that Jason, the father of this Niketas, is to be identified with the high priest of this name who lived in the Maccabæan period. Support of heathen festivals by Jews was not unknown at that time even in Palestine.

l. *Myndos:* a tomb-inscription from the begining of the Byzantine period (*REJ* xlii. 1–4).

m. *Halicarnassus:* a popular resolution regarding the religious freedom of the Jews (Jos. *Ant.* XIV. x. 23).

n. *Phrygia:* see Ramsay, *Cities and Bishoprics of Phrygia,* vol. i. pt. ii. (1897) pp. 667–676.

o. *Laodicea:* see Cicero, *pro Flacco,* 28; also a despatch of the authorities to the proconsul C. Rabirius, in which they disclaim any intention of interfering with the religious freedom of the Jews (*Ant.* XIV. x. 20).

p. *Hierapolis:* three Jewish inscriptions published in *Jahrbuch des deutschen archäol. Instituts,* ivth Ergänzungsheft (=*Alterthümer von Hierapolis,* herausg. von Humann, Cichorius, Judeich, Winter), 1898. We give extracts, showing the most important points—1. No. 69 a tomb-inscription, closing with the threat of a penalty: *εἰ δὲ μή, ἀποτείσει τῷ λαῷ τὸν* (*sic*) *Ἰουδαί[ω]ν προστε[ί]μου ὀν[όμ]ατι δηνάρια χείλια.* 2. No. 212 a tomb-inscription ending thus: *εἰ δὲ ἔτι ἕτερος κηδεύσει, δώσει τῇ κατοικίᾳ τῶν ἐν Ἱεραπόλει κατοικούντων Ἰουδαίων προστείμου* (*δηνάρια*) (.) *καὶ τῷ ἐκζητήσαντι* (*δηνάρια*) (*δισχίλια*). *ἀντίγραφον ἀπετέθη ἐν τῷ ἀρχίῳ τῶν Ἰουδαίων.* 3. No. 342 (=Ramsay, *Cities and Bishoprics of Phrygia,* i. 545) tomb-inscription of a certain Publius Ælius Glykon, who bequeathed to the managing body of the guild of purple-dyers (*τῇ σεμνοτάτῃ προεδρίᾳ τῶν πορφυραβάφων*) a capital fund, the interest of which was to be applied yearly, *ἐν τῇ ἑορτῇ τῶν ἀζύμων,* to the decorating of his tomb. He bequeathed likewise to the directorate of another guild (*τῷ συνεδρίῳ τῶν καιροδαπιστῶν*) a sum to be applied to the same purpose, *ἐν τῇ ἑορτῇ πεντηκο[στῆς].* The whole of the members of these guilds must, accordingly, have been, if not exactly Jews, at least well disposed to Judaism (cf. Ramsay, *Expositor* of Feb. 1902, pp. 98–100).

q. *Apamea:* Cicero, *pro Flacco,* 28 (see above); also a tomb-inscription (*ap.* Ramsay, *Cities and Bishoprics of Phrygia,* i. 538) ending thus: *εἰ δέ τις ἐπιτηδεύσι, τὸν νόμον οἶδεν τῶν Εἰουδέων.* The 'law of the Jews' cannot here be the Mosaic law, but a legal ordinance, recognized by the State, imposing a penalty on any harm done to Jewish tombs. The strength of Jewish influence at Apamea can be gauged from the circumstance that at the beginning of the 3rd cent. A.D. coins were struck by the city authorities (!) having upon them figures of *Noah* and his wife descending from the ark, and bearing the legend ΝΩΕ (fullest description of these coins in Madden, *Numismatic Chronicle,* 1866, pp. 173–219, pl. vi.; cf. also the Catalogue of the Collection Waddington in the *Revue Numismatique,* 1898, p. 397 f., Nos. 5723, 5730, 5731). Apamea thus claimed to be the spot where Noah's ark was stranded. This claim, which is known also from other sources, is connected in some way with the name of the city, Ἀπάμεια Κιβωτός, for *κιβωτός* is the biblical term for the ark of Noah. It may have been just this appellation of the city that led to the localizing of the Noah-legend. That this localizing is to be traced to Jewish influence, has been shown especially by Babelon ('La tradition phrygienne du déluge' in *Revue de l'histoire des religions,* xxiii. [1891] 174–183). Not only the Noah- but also the Enoch-legend reached Phrygia by means of the Jews; for the Phrygian Ἀννακός or Νάννακος, who lived over 300 years, and after whose death the great Flood came, is certainly no other than the biblical Enoch (he is called Ἀννακός by Stephanus Byzant. *s.v.* Ἰκόνιον; but Νάννακος by Zenobius, *Proverb.* vi. 10, and Suidas, *Lex. s.v.* Νάννακος).

r. *Akmonia:* an inscription in honour of a number of synagogue officials who had restored 'the synagogue built by Julia Severa' (*τὸν κατασκευασθέντα οἶκον ὑπὸ Ἰουλίας Σεουήρας . . . ἐπεσκεύασαν,* see Ramsay, *Revue des études anciennes,* iii. [1901] 272 [an earlier copy in *Cities and Bishoprics of Phrygia,* i. 649 f.]). It closes thus: *οὕστινας καὶ ἡ συναγωγὴ ἐτείμησεν ὅπλῳ ἐπιχρύσῳ διά τε τὴν ἐνάρετον αὐτῶν [βί]ωσιν καὶ τὴν πρὸς τὴν συναγωγὴν εὔνοιάν τε καὶ σπουδήν.* This inscription shows us to what influence Judaism had attained in the highest circles of society; for the Julia Severa who is named as the builder of the synagogue is known to us from coins and inscriptions (Ramsay, *Cities and Bishoprics of Phrygia,* i. 637, 647) as a noble lady of Akmonia in the time of Nero (*Prosopographia imperii Romani,* iii. 224 f., *s.v.* 'Servenius'; also coins in the Collection Waddington, *Revue Numismatique,* 1898, p. 384, Nos. 5488, 5490, 5494). Since she was at the same time high priestess of the cult of the Emperor, she cannot indeed have been a Jewess.

s. *Antioch of Pisidia:* a Jewish synagogue mentioned in Ac 13^{14}.

t. *Lycia* and the city of *Phaselis:* see 1 Mac 15^{23}, with the above remarks on that passage.

u. *Korykos* in Lycia: a tomb-inscription of late date (*REJ* x. 76).

v. *Tlos* in Lycia: a tomb-inscription from somewhere about the end of the 1st cent. A.D. (*Eranos Vindobonensis,* 1893, pp. 99–102). According to it, the *ἡρῷον* (sepulchral monument) was erected by a certain Ptolemæus for himself and his son Ptolemæus *ὑπὲρ ἀρχοντείας τελουμένας παρ' ἡμεῖν Ἰουδαίοις, ὥστε αὐτὸ εἶναι πάντων τῶν Ἰουδαίων καὶ μηδένα ἐξὸν εἶναι ἕτερον τεθῆναι ἐν αὐτῷ. ἐὰν δέ τις εὑρεθείη τινὰ τιθῶν ὀφειλέσει Τλωέων τῷ δήμῳ* [the conclusion is wanting].

w. *Pamphylia* and the city of *Side:* see 1 Mac 15^{23} and the general testimony of Philo (see above, p. 92^{a}), also Ac 2^{10}.

x. *Cilicia:* see likewise Philo, *l.c.* Since, according to Ac 6^{9}, Cilician Jews lived in Jerusalem in somewhat large numbers, the Diaspora in Cilicia must have been very considerable. Tarsus, the capital of Cilicia, was, as is well known, the birthplace of the Apostle Paul (Ac 9^{11} 21^{39} 22^{3}). One *Ιουδας υιος Ιοση Ταρσευς* is mentioned on a tomb-inscription of Jope (Euting, *Sitzungsberichte der Berliner Akademie,* 1885, p. 686). In the 4th cent. A.D. the Jewish patriarch caused the dues to be collected '*in every city of Cilicia*' from the resident Jews (Epiphanius, *Hær.* xxx. 11: ἀπὸ ἑκάστης πόλεως τῆς Κιλικείας τὰ ἐπιδέκατα καὶ τὰς ἀπαρχὰς παρὰ τῶν ἐν τῇ ἐπαρχίᾳ Ἰουδαίων εἰσέπραττεν).

y. *Korykos* in Cilicia: a Jewish sarcophagus with inscription (*Denkschriften der Wiener Akademie,* Phil.-Hist. Classe, Bd. xliv. [1896] p. 68).

z. *Iconium* in Lycaonia: a Jewish synagogue mentioned in Ac 14^{1}; on inscriptions there, cf. art. GALATIA in vol. ii. p. 88^{b}.

aa. *Galatia:* testimonies here very scanty, for there are none in Jos. *Ant.* XVI. vi. 2 (the closing remark that the edict of Augustus in favour of the

Jews was to be set up at *Ancyra* is based upon a false reading; the MSS have *αργυρη*). A tomb-inscription from Galatia will be found in *Bulletin de corresp. hellén.* vii. 24 (=*REJ* x. 77). The inscription *CIG* 4129 was found in the neighbourhood of Dorylæum, not therefore in Galatia. Cf., in general, art. GALATIA in vol. ii. p. 85^b.

bb. *Cappadocia:* 1 Mac 15^{22} (despatch from the Romans to king Ariarathes) is sufficient to justify the assumption that Jews were settled there. Cf. also Ac 2^9; Mishna, *Kethuboth*, xiii. 11; Neubauer, *Géog. du Talmud*, pp. 317–319; tomb-inscriptions of Cappadocian Jews at Jope, in *PEFSt.* 1893, p. 290, and 1900, pp. 118, 122. In the Jerusalem Talmud we meet with three Jewish scholars from Cappadocia (R. Judan, R. Jannai, R. Samuel); see Krauss, *Griech. und lat. Lehnwörter im Talmud*, ii. [1899] 558; Bacher, *Die Agada der paläst. Amoräer*, iii. [1899] 106, 749.

cc. *Bithynia* and *Pontus:* the general testimony of Philo (*Legatio ad Gaium*, § 36, *ἄχρι Βιθυνίας καὶ τῶν τοῦ Πόντου μυχῶν*); a Bithynian tomb-inscription of late date (*REJ* xxvi. 167–171). On Sampsame (1 Mac 15^{23})=Amisus in Pontus, see above, p. 93^a. From Pontus came both the Aquilas, the companion of St. Paul (Ac 18^2), and the author of a Gr. translation of the Old Testament. Cf. also Ac 2^9.

dd. *Pantikapæum* in the Crimea: two inscriptions of great interest (Latyschev, *Inscriptiones antiquæ oræ septentrionalis Ponti Euxini*, ii., Nos. 52, 53 [better texts here than in *CIG* 2114^{bb}, 2114^b]), one of which is dated from the year A.D. 81. Both contain deeds relating to the manumission of slaves of Jewish owners. At the close it is noted that the Jewish community 'took part in superintending' this legal instrument, *i.e.* shared the responsibility for its correct execution (*συνεπιτροπεούσης δὲ καὶ τῆς συναγωγῆς τῶν Ἰουδαίων*). Thus even in that remote region there was in the 1st cent. A.D. an organized Jewish community.

5. *EGYPT.*—If even in Syria and Asia Minor the Jewish population was a numerous one, this was pre-eminently the case in Egypt. Here, moreover, the Jews came to play an important part in the history of civilization; for, thanks to their favourable social position, they were able to adopt in large measure the Greek culture, and thus became the principal representatives of the Jewish-Greek form of thought. The emigration of larger masses of Jews to Egypt must undoubtedly be held to have first taken place in the Greek period. But sporadic migrations or even forcible transplantings happened earlier than this. Soon after the destruction of Jerusalem by Nebuchadrezzar (B.C. 586), a large company of Jews, from fear of the Chaldæans, and in spite of the protests of the prophet Jeremiah, took their departure to Egypt (Jer 42. 43; for the motive see Jer 41). They settled in various parts, at Migdol, Tahpanhes, Noph, and Pathros (Jer 44^1). But we do not know whether their descendants maintained their existence here as Jews.—Pseudo-Aristeas speaks of two transplantings of Jewish settlers to Egypt prior to the time of Ptolemy Lagi: one in the time of the Persians, and one much earlier, under Psammetichus, who in his expedition to Ethiopia is said to have had even Jewish soldiers in his army (*Aristeæ Epist.*, ed. Wendland, § 13: *ἤδη μὲν καὶ πρότερον ἱκανῶν εἰσεληλυθότων σὺν τῷ Πέρσῃ καὶ πρὸ τούτων ἑτέρων συμμαχιῶν ἐξαπεσταλμένων πρὸς τὸν τῶν Αἰθιόπων βασιλέα μάχεσθαι σὺν Ψαμμητίχῳ.* The king last named is probably Psammetichus II. [B.C. 594–589], who undertook a campaign against Ethiopia. That amongst others there were Semitic mercenaries in his army, we know from the inscriptions of Abu-Simbel [on which cf. the Literature cited in Pauly-Wissowa's *RE*, art. 'Abu-Simbel']. The Jewish migration to Egypt in the time of the Persians is not regarded by pseudo-Aristeas as a voluntary one; cf. § 35, ed. Wendland). See also 'Additional Note' at end of this article.

Whether as early as the time of Alexander the Great any considerable numbers of Jews migrated to Egypt, we know not. But we may trust the statement of Josephus, that, at the founding of Alexandria by the monarch just named, Jewish settlers were from the first incorporated among the citizens (*BJ* II. xviii. 7, *c. Apion.* ii. 4). Confirmation of this is supplied by the decree of the emperor Claudius (*ap.* Jos. *Ant.* XIX. v. 2), according to which the Jews in Alexandria were settled there from the very first (*τοῖς πρώτοις εὐθὺ καιροῖς*) along with the Alexandrians. Larger masses appear to have first come to Egypt under Ptolemy Lagi. According to pseudo-Hecatæus, we are to think in this instance of voluntary migrations (Jos. *c. Apion.* i. 22 [Niese, § 194]: *οὐκ ὀλίγαι δὲ καὶ μετὰ τὸν Ἀλεξάνδρου θάνατον εἰς Αἴγυπτον καὶ Φοινίκην μετέστησαν διὰ τὴν ἐν Συρίᾳ στάσιν*, cf. § 186). According to pseudo-Aristeas, on the other hand, Ptolemy Lagi transplanted Jewish prisoners in large numbers to Egypt. The details of his narrative belong, indeed, to the realm of romance. Ptolemy, we are told, carried captive to Egypt 100,000 Jews. Of these he armed 30,000 able-bodied men, whom he employed to do garrison duty in the fortresses of the country (§ 13: *ἀφ' ὧν ὡσεὶ τρεῖς μυριάδας καθοπλίσας ἀνδρῶν ἐκλεκτῶν εἰς τὴν χώραν κατῴκισεν ἐν τοῖς φρουρίοις*). The old men, the children, and the women, he is said to have handed over as slaves to his soldiers, on demand, as compensation for their services (*Aristeæ Epist.*, ed. Wendland, §§ 12–14, cf. 35–36). Afterwards Ptolemy Philadelphus is stated to have procured the freedom of all these Jewish slaves by paying to the owners twenty drachmæ per slave (§§ 15–27, 37). Since Josephus, in relating the same narrative (*c. Apion.* ii. 4 [Niese, §§ 44–47], *Ant.* XII. i.), simply reproduces the account of pseudo-Aristeas [in the first cited passage this is self-apparent, and in the other at least probable], the latter is our only witness. But, in spite of the romantic character of the narrative in question, this much at least is credible, that Ptolemy Lagi brought Jewish prisoners to Egypt and set them to garrison duty in the fortresses. For the fact that Ptolemy Lagi took Jerusalem by storm is unimpeachably vouched for by Agatharchides (Jos. *c. Apion.* i. 22 [Niese, §§ 209–211], *Ant.* XII. i.; cf. Appian, *Syr.* 50). And the employment of Jews for garrison work in strongholds is confirmed by the circumstance that at a still later period we hear of a 'Jews' camp' (*Ἰουδαίων στρατόπεδον*, *castra Judæorum*) in various places (see further, on this, below).

At Alexandria, in the time of the Diadochi, a special quarter, separated from the rest of the city, was assigned to the Jews, 'in order that they might be able to live a purer life by mixing less with foreigners' (Jos. *BJ* II. xviii. 7; from *c. Apion.* ii. 4 it might appear as if this quarter had already been assigned to the Jews by Alexander the Great, but, according to the manifestly more exact account in *BJ* II. xviii. 7, this was first done by the Diadochi; cf. also Strabo *ap.* Jos. *Ant.* XIV. vii. 2). This Jewish quarter stretched along the harbourless strand in the neighbourhood of the royal palace (*c. Apion.* ii. 4 [Niese, § 33]: *πρὸς ἀλίμενον θάλασσαν*, § 36 *πρὸς τοῖς βασιλικοῖς*), to the east, therefore, of the promontory of Lochias on the north-east of the city. The separation came afterwards, indeed, not to be strictly maintained, for Philo tells us that not a few Jews had their dwelling-places scattered about in the other quarters of the city. But even in Philo's time two of the five city-divisions were called 'the Jewish,' because they were predominantly inhabited by Jews (Philo, *in Flaccum*, § 8 [ed. Mangey, ii. 525]). We learn from this that *the Jews constituted something like two-fifths of the population of Alexandria*. According to Josephus, the fourth city-division was inhabited by Jews (*BJ* II. xviii. 8: τὸ καλούμενον Δέλτα, the city-divisions being named after the first five letters of the alphabet).

The total number of Jews in Egypt is reckoned by Philo in his own time at about a *million* (*in Flaccum*, § 6 [ed. Mangey, ii. 523]). He remarks in this connexion that they had their dwellings 'as far as the borders of Ethiopia' (μέχρι τῶν ὁρίων Αἰθιοπίας). This general statement is confirmed by many special testimonies, of which the following are the most important:—

a. *Lower Egypt*. To the east of the Delta, in the nome of Heliopolis (and near to Leontopolis, which must not, however, be confounded with the better known Leontopolis situated much farther to the north), lay the Jewish temple (formerly a temple of Bubastis), which owed its origin to the Jewish high priest Onias in the time of Ptolemy Philometor (Jos. *Ant.* XIII. iii. 2: ἐν Λεόντων πόλει τοῦ Ἡλιοπολίτου; see more fully, regarding this temple, below, p. 107^b). The region was known as ἡ Ὀνίου χώρα (*Ant.* XIV. viii. 1, *BJ* I. ix. 4). With this we should probably connect the 'vicus Judæorum' mentioned in the *Itinerarium Antonini* (ed. Parthey et Pinder, p. 75). But the 'castra Judæorum' mentioned in the *Notitia Dignitatum Orientis* (ed. Böcking, i. 69) is presumably different, although also situated in the same neighbourhood. At the spot where, according to the statement of distances given in the *Itiner. Anton.*, the 'vicus Judæorum' should be sought, there is still a *Tell el-Jehudiyeh*, in proximity to which a temple of Bubastis had once stood. Another *Tell el-Jehudiyeh*, which, according to Naville, has 'quite the appearance of a fortress,' lies farther south (see Naville, *Seventh Memoir of the Egypt. Explor. Fund*, London, 1890). We should probably identify the first named *Tell el-Jehudiyeh* [not, as Naville, the more southern one] with the building of Onias, and the other with the 'castra Judæorum.' While these places lay to the east of the Delta, Josephus in his account of Cæsar mentions an Ἰουδαίων στρατόπεδον, which, from the context of the narrative, must have lain to the west of it (*Ant.* XIV. viii. 2, *BJ* I. ix. 4). It cannot therefore be the same as the 'castra Judæorum' mentioned in the *Notitia Dignitatum*. The existence of various 'Jews' camps' is readily intelligible in the light of the statements quoted above from pseudo-Aristeas. Likewise in the Delta, in its southern portion, lies Athribis, where, according to an inscription of the Ptolemaic period found there, a certain Ptolemæus, son of Epikydes, chief of the police, acting in conjunction with the resident Jews, built a synagogue to the most high God (Πτολεμαῖος Ἐπικύδου ὁ ἐπιστάτης τῶν φυλακιτῶν καὶ οἱ ἐν Ἀθρίβει Ἰουδαῖοι τὴν προσευχὴν θεῷ ὑψίστῳ, *REJ* xvii. 235–238 = *Bulletin de corresp. hellén.* xiii. 178–182).

b. *Middle Egypt*. The more recent papyrus 'finds' have furnished information regarding the early settlement of Jews in Middle Egypt. According to a document of the 3rd cent. B.C. discovered in the nome of Arsinoë (the modern Fayum), there had to be paid for the possession of slaves in the village of Psenyris a duty εις τα αποδοχια της κωμης παρα των Ιουδαιων και των Ελληνων (*The Flinders Petrie Papyri*, ed. by Mahaffy, pt. i. 1891, p. 43). In another, belonging to the same region and dating from 238–237 B.C., we meet with a [παρεπ]ιδημος ος και συριστι Ιωναθας [καλειται] (*op. cit.* pt. ii. 1893, p. 23). Towards the end of the 2nd cent. B.C. a προσευχὴ Ἰουδαίων is mentioned at Arsinoë (*Tebtunis Papyri*, ed. by Grenfell, Hunt, and Smyly, pt. i. 1902, No. 86). At Oxyrhynchus, south of Arsinoë, documents have been found of the Roman Imperial period, in which a 'Jews' lane' (αμφοδος Ιουδαικη) is mentioned (*The Oxyrhynchus Papyri*, ed. by Grenfell and Hunt, pt. i. 1898, No. 100; pt. ii. 1899, No. 335).

c. *Upper Egypt*. Here there were Jews settled as early as the time of Jeremiah, for the Pathros of Jer 44^1 is Upper Egypt. A great many tax-receipts from the 2nd cent. B.C., written upon clay tablets (*ostraca*), have been found in the neighbourhood of Thebes. Among the names of the tax-collectors who grant such discharges there are many which are undoubtedly Jewish: *e.g.* Ιωσηπος Αβδιου, Ιωσηπιος, Σαμβαταιος Αβιηλου, Σαμβαθαιος Σολλουμιος, Σιμων Ιαζαρου, Σιμων Αβιηλου (see the collection in Wilcken, *Griechische Ostraka*, vol. i. 1899, p. 523 f.). A papyrus emanating from the same time and place contains a fragment of a letter, from which we learn that a Jew, named Δανοουλος, had failed of his engagement to make delivery of a horse (Grenfell, *An Alexandrian Erotic Fragment*, 1896, p. 75). On tax-receipts of the time of Trajan we repeatedly encounter the name of one Αντωνιος Μαλχαιος who had charge of the harbour dues (?; ὁρμοφυλακία) at Syene, on the southern border of Upper Egypt (Wilcken, *Griechische Ostraka*, ii. Nos. 302–304, cf. i. p. 273). As general evidence of the diffusion of the Jews 'as far as the borders of Ethiopia,' we have the above cited testimony of Philo. The great extent of their numbers in the Thebaid is best shown by the circumstance that in the time of Trajan they rose in arms here, as in the rest of Egypt, against the non-Jewish inhabitants (Euseb. *Chron.*, ed. Schoene, ii. 164 f.).*

6. *CYRENAICA*.—Here too the Jewish Diaspora was present in force. Even Ptolemy Lagi is said to have sent Jewish colonists thither (Jos. *c. Apion.* ii. 4 [Niese, § 44]). The Roman despatch of 1 Mac 15^{23} presupposes the presence of Jewish inhabitants in Cyrene. According to Strabo, the population of the latter city in the time of Sulla fell into four classes: citizens, farmers, *metoikoi*, Jews (Strabo *ap.* Jos. *Ant.* XIV. vii. 2: τέτταρες δ' ἦσαν ἐν τῇ πόλει τῶν Κυρηναίων, ἥ τε τῶν πολιτῶν καὶ ἡ τῶν γεωργῶν, τρίτη δ' ἡ τῶν μετοίκων, τετάρτη δ' ἡ τῶν Ἰουδαίων). At that time the Jews already played a prominent part in the disturbances which Lucullus, on the occasion of his incidental presence, had to allay (Strabo, *l.c.*). A Jewish πολίτευμα in the city of Berenike in Cyrenaica is brought to our knowledge by a lengthy inscription (*CIG* 5361; see more fully, below § ii.). Augustus and Agrippa took measures in favour of the Jews of Cyrene (Jos. *Ant.* XVI. vi. 1, 5). We have a number of testimonies in the NT to the presence of Jews in Cyrenaica: Mt 27^{32}, Mk 15^{21}, Lk 23^{26} (Simon the Cyrenian); Ac 2^{10} (Cyrenians present at Jerusalem at the Feast of Pentecost); 6^9 (a synagogue of the Cyrenians at Jerusalem); 11^{20} (Cyrenians come from Jerusalem to Antioch); 13^1 (Lucius of Cyrene a prominent member of the church at Antioch). In the time of Vespasian the Jewish *sicarii* also found adherents among their co-religionists in Cyrene (Jos. *BJ* VII. xi.; *Vita*, 76). The great rising of the Jews in Cyrenaica in the time of Trajan was marked by terrible violence (Dio Cass. lxviii. 32; Euseb. *HE* iv. 2).

7. *NORTH AFRICA*.—Here we can demonstrate the presence of Jews, during the Roman period,

---

* The diffusion of Semites throughout Egypt in the earlier Ptolemaic period is witnessed to also by a papyrus probably of the year B.C. 240–239, in which a *major-domo* makes a return of the *personnel* of his house for taxation purposes. He enumerates amongst others the γεωργοι μεθ' ὧν Χαζαιος Ραγεσηβααλ Ισαβ Καιαιας Σιταλκας Ματαναβααλ (Wilcken, *Griechische Ostraka*, i. 436, and also the correction on p. 523). But the Semites here named may be Phœnicians or Philistines equally well with Jews. For Phœnician inscriptions in Egypt, see *CIS* i. Nos. 97–113; *Répertoire d'épigraphie sémitique*, i. 1901, Nos. 1–4.

from the border of Cyrenaica to the extreme west (cf., especially, Monceaux, 'Les colonies juives dans l'Afrique Romaine' in *REJ* xliv. [1902] 1–28). We do not know when or how they came there. But, as the neighbouring Cyrenaica was largely settled by Jews as early as the Ptolemaic period, the colonization of Africa will also have begun then, at least that of proconsular Africa, and later that of Numidia and Mauretania.

a. *Proconsular Africa.* At Carthage there has been discovered an extensive Jewish cemetery, containing more than 100 vaults, each with from 15 to 17 *loculi*. Its Jewish character is shown by the frequent portrayal of the seven-branched candlestick (see Delattre, *Gamart ou la nécropole juive de Carthage*, Lyon, 1895; for Latin inscriptions from this cemetery, see *CIL* viii. Suppl. Nos. 14097–14114). The work *adv. Judæos*, attributed to Tertullian, presupposes the presence of Jews in Carthage. At Hammâm-Lif, not far from Carthage, the foundations of a synagogue of the Roman period have been discovered, upon the mosaic floor of which there are Jewish inscriptions in the Latin language (Renan, *Revue archéol.*, trois. Série, i. [1883] 157–163, iii. [1884] 273–275, plates vii–xi; Kaufmann, *REJ* xiii. [1886] 45–61; Reinach, *ib.* 217–223; *CIL* viii. Suppl. No. 12457). At Oea in Tripolis the Christian bishop in the time of Augustine consulted the Jews there about a passage in Jerome's new translation of the Bible (Augustine, *Epist.* lxxi. 3, 5). On the Peutinger Table there is mention of a place in the same neighbourhood, called 'Judæorum Augusti.'

b. *Numidia.* The presence of Jews at Hippo is evident from Augustine, *Serm.* cxcvi. 4. At Cirta there are Latin inscriptions (*CIL* viii. Nos. 7150, 7155, 7530 [cf. Add. p. 965], 7710).

c. *Mauretania.* At Sitifis there are Latin inscriptions (*CIL* viii. Nos. 8423, 8499). At Tipasa there was a Jewish synagogue, at Cæsarea the house of a Jewish 'ruler of the synagogue' is mentioned (see the evidence from processes against martyrs in Monceaux, *REJ* xliv. 8). Even in the extreme west of Mauretania, at Volubilis, a Hebrew inscription, probably of the Roman period, has been found (Berger, *Bulletin archéol. du comité des travaux historiques*, 1892, pp. 64–66, pl. xiii).

8. *MACEDONIA AND GREECE.*—The most important testimony is that of Philo, or of the letter of Agrippa to Caligula which he quotes (see above, p. 92a). Thessaly, Bœotia, Macedonia, Ætolia, Attica, Argos, Corinth, and, finally, τὰ πλεῖστα καὶ ἄριστα Πελοποννήσου, are named by him as countries where Jews dwell. If we compare this general statement with the meagre special testimonies that are available, we see how full of *lacunæ* our information is. Interesting dates are furnished by two manumission-deeds from Delphi. In the one a certain Atisidas gives their liberty to three Jewish female slaves (σώματα γυναικεῖα τρία αἷς ὀνόματα Ἀντιγόνα τὸ γένος Ἰουδαίαν καὶ τὰς θυγατέρας αὐτᾶς Θεοδώραν καὶ Δωροθέαν); in the other the subject of manumission is described as σῶμα ἀνδρεῖον ᾧ ὄνομα Ἰουδαῖος τὸ γένος Ἰουδαῖον (*Sammlung der griechischen Dialekt-Inschriften*, herausg. von Collitz, Bd. ii. Heft 3–5 [1892–1896], Nos. 1722, 2029). Since these documents belong to the first half of the 2nd cent. B.C., we have to do in all probability with prisoners of war of the Maccabæan period who had been sold into slavery in Greece. From 1 Mac 15^{23} it is evident that at the same date there were Jews also in Sparta and Sicyon. In the time of St. Paul there were Jewish synagogues at Philippi, Thessalonica, Berœa, Athens, Corinth (Ac $16^{2f.}$ $17^{1.\,10.\,17}$ $18^{4.\,7}$). For Jewish-Greek inscriptions at Athens, see *CIAttic.* iii. 2, Nos. 3545, 3546, 3547; at Patræ, *CIG* 9896; in Laconia and Thessalonica, *REJ* x. 77 f.; at Mantinea, *REJ* xxxiv. 148.

In the great islands of Eubœa, Cyprus, and Crete the Jews were very numerous. All three are named by Philo in the letter of Agrippa (see above). For Cyprus, cf. also 1 Mac 15^{23}, Ac 4^{36} 11^{20} $13^{4ff.}$; Jos. *Ant.* XIII. x. 4. In the time of Trajan the Jews in Cyprus massacred thousands of the non-Jewish population and devastated the capital, Salamis. For this they were completely rooted out of the island (Dio Cass. lxviii. 32; Euseb. *Chron.*, ed. Schoene, ii. 164 f.). For Crete, cf. 1 Mac 15^{23} (Gortyna); Jos. *Ant.* XVIII. xii. 1, *BJ* II. vii. 1, *Vita*, 76.

Of the other islands there is mention in 1 Mac 15^{23} of Delos, Samos, Cos, and Rhodes. The three last named were off the coast of Caria. The settlement of Jews in them would thus be connected with their settlement in Caria. At Cos, as early as the time of Mithridates, we hear of great sums of Jewish money being carried off by that monarch (Jos. *Ant.* XIV. vii. 2: τὰ τῶν Ἰουδαίων ὀκτακόσια τάλαντα). Rhodes was in the first half of the 1st cent. B.C. the home of two prominent authors who wrote against the Jews, viz. Posidonius and Apollonius Molon (both combated by Josephus in his work *c. Apion.*). In the time of Tiberius a grammarian named Diogenes lived there, whose habit it was to hold disputations only on the Sabbath day (Sueton. *Tiber.* 32). Delos, owing to its political and commercial importance during the Greek period, was a meeting-point for Oriental traders. That Jews with a Greek education were settled there about B.C. 100 at the latest, is shown by two Greek inscriptions emanating from the island of Rheneia (the burying-place of the inhabitants of Delos). The two inscriptions in question are of an imprecatory order, invoking Divine vengeance on the unknown murderers of two maidens. The prayers are unquestionably Jewish; the inscriptions are shown by the character of the writing to be not later than the end of the 2nd or the beginning of the 1st cent. B.C. (cf., on these interesting inscriptions, Deissmann, *Philologus*, lxi. [1902] 252–265). Acts in favour of the Jews of Delos, belonging to the time of Cæsar, are quoted by Josephus in *Ant.* XIV. x. 8 and 14. We have evidence, further, of the presence of Jews at Paros (Jos. *Ant.* XIV. x. 8), Melos (*Ant.* XVII. xii. 1; *BJ* II. vii. 1), and Ægina (*CIG* 9894).

9. *ROME.*—When we pass to Italy, we find that Rome in particular was the home of a Jewish community which could be counted by thousands. According to Valerius Maximus (I. iii. 2), Jews were expelled from Rome by the prætor Hispalus as early as the year B.C. 139, in consequence of their attempts at proselytizing (the passage, which has not survived in the original, reads thus, as extracted by Nepotianus: 'Judæos quoque, qui Romanis tradere sacra sua conati erant, idem Hispalus urbe exterminavit'; or, as given by Paris: 'Idem Judæos, qui Sabazi Jovis cultu Romanos inficere mores conati erant, repetere domos suas coegit' [Sabazius is a Phrygian divinity; there is here manifestly a confusion with Σαβαώθ = Heb. צְבָאוֹת *Ẓĕbā'ôth*]). Since, according to 1 Mac 14^{24} $15^{15\text{-}24}$, at that very time (B.C. 140–139) a Jewish embassy was sent to Rome by the high priest Simon, it would appear as if the propaganda referred to had been the work of parties in the train of this embassy (not the work of the members themselves).

The earliest witness to the existence of a Jewish colony in Italy (*i.e.* probably in Rome) is Cicero, *pro Flacco*, 28, from whom we learn that already in the time of Flaccus (*i.e.* B.C. 62–61) Italy was one of the places from which Jewish money was wont to be sent to Jerusalem. It was just then that the Jewish community at Rome received a large reinforcement through those of their countrymen whom Pompey brought there as prisoners of war (B.C. 61). The latter were sold as slaves, but were soon afterwards set at liberty, as they proved an awkward possession to their masters (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568]). There were many Jews in the audience when Cicero delivered his speech in defence of Flaccus, in the year B.C. 59 (Cicero, *l.c.*). On the death of Cæsar, their great protector, a multitude of Jews continued their lamentations for whole nights beside his funeral pyre (Sueton. *Cæsar*, 84). In the time of Augustus the Jews were already counted by thousands; we are told that a Jewish deputation, which came to Rome after the death of Herod, was joined on its arrival by 8000 Jews (Jos. *Ant.* XVII. xi. 1; *BJ* II. vi. 1). By the time of Tiberius repressive measures had begun. A resolution of the Senate was passed in the year A.D. 19, whereby all the Jews in Rome capable of bearing arms were deported to Sardinia to perform military service there, while the rest were banished from the city (Jos. *Ant.* XVIII. iii. 5; Sueton. *Tiber.* 36; Tac. *Annal.* ii. 85; the last named speaks of banishment from *Italy*). This measure was inspired mainly by Sejanus; after the fall of the latter, in A.D. 31, Tiberius once more adopted a friendly policy towards the Jews (Philo, *Legatio ad Gaium*, § 24 [ed. Mangey, ii. 569]). We may therefore suppose that he granted them permission to return to the city. In any case, they had once more gathered in Rome at the time of Claudius, for he, too, made an attempt to expel them from the city. Suetonius tells us that this step was taken owing to the violent tumults 'impulsore Chresto' [*i.e.* occasioned by the preaching of Christ]. But the edict of banishment, issued probably in the year 49, was not enforced, but restricted simply to a prohibiting of any assembling on the part of the Jews (a decree of expulsion is spoken of in Ac 18^2 and by Sueton. *Claud.* 25; but, according to Dio Cass. lx. 6, Claudius, owing to the difficulty of carrying it into effect, contented himself with withdrawing from the Jews the right of assembly [*ἐκέλευσε μὴ συναθροίζεσθαι*]. The year 49 is given as the date by Orosius [VII. vi. 15], who appeals, incorrectly indeed, to Josephus). Since the prohibition of assembling was equivalent to a prohibition of worship, the existence of the Jews in Rome was seriously endangered. But they succeeded, we know not how, in surviving even this crisis as well as many later ones, for, as Dio Cassius (xxxvii. 17) sums up their history, 'though often oppressed, they always exhibited the most vigorous power of growth.' Educated Roman society looked down on them with contempt. The satirists, Horace, Persius, Martial, Juvenal, made them the butt of their wit (cf. Hausrath, *Neutest. Zeitgeschichte*^{2}, iii. 383–392). Yet they constituted a factor of no little importance in public life. Even at the Imperial court they entered into manifold relations, whether as slaves or as officials of higher rank. The Jewish societies of the *Αὐγουστήσιοι* and the *Ἀγριππήσιοι* (see, on these, below, § ii.) were in all probability societies formed of placemen of Augustus and Agrippa. The empress Livia had a Jewish slave, Akme (Jos. *Ant.* XVII. v. 7; *BJ* I. xxxii. 6, xxxiii. 7). The emperor Claudius had friendly relations with Alexander [*var. lect.* Lysimachus], the Jewish alabarch of Alexandria, who had served his mother Antonia as minister of finance (Jos. *Ant.* XIX. v. 1). At the court of Nero we find a Jewish actor, Alityrus (Jos. *Vita*, 3). Poppæa herself is spoken of as *θεοσεβής*, and she was always ready to lend her aid in obtaining a favourable response from the emperor to petitions brought to him by Jews (Jos. *Ant.* XX. viii. 11; *Vita*, 3).

The dwellings of the Jews were situated at first and predominantly in the division of the city across the Tiber, which they occupied entirely in the time of Augustus (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568]: *τὴν πέραν τοῦ Τιβέρεως ποταμοῦ μεγάλην τῆς Ῥώμης ἀποτομήν, ἣν οὐκ ἠγνόει κατεχομένην καὶ οἰκουμένην πρὸς Ἰουδαίων*). But at a later period they spread into other divisions of the city as well. We find them in the Campus Martius and in the very midst of the Roman business world, namely, in the Subura (see below, § ii.). Juvenal makes the jocular assertion that the sacred grove of Egeria before the Porta Capena was let to Jews and swarmed with Jewish beggars (*Sat.* iii. 12–16). As to the internal organization of the communities and the stage of culture they had reached, we derive information from the numerous tomb-inscriptions, composed for the most part in bad Greek but also in Latin, which have been found in the subterranean burying-places before the gates of Rome. These belong to somewhere between the 2nd and 4th cent. A.D. The Greek tomb-inscriptions known up to about fifty years ago are collected in *CIG* iv. Nos. 9901–9926. They emanate probably for the most part from a cemetery before the Porta Portuensis which was discovered in 1602, but whose site is now unknown. Rich materials were supplied by the cemetery discovered some forty years ago in the Vigna Randanini on the Via Appia (cf. Garrucci, *Cimitero degli antichi Ebrei scoperto recentemente in Vigna Randanini*, Roma, 1862; also the same author's *Dissertazioni archeologiche di vario argomento*, vol. ii. Roma, 1865, pp. 150–192). Since then some other cemeteries have been discovered, but these do not contain many inscriptions. Five inscriptions from a cemetery in Porto are given, from communications of de Rossi, by Derenbourg in *Mélanges Renier*, 1887, pp. 437–441. For some Latin ones, see *CIL* vi. Nos. 29756–29763. A complete collection of all the Jewish-Greek and Latin tomb-inscriptions at Rome known down to 1896 is given by Vogelstein-Rieger in *Geschichte der Juden in Rom*, i. [1896] 459–483. See also Berliner, *Geschichte der Juden in Rom*, i. [1893].

10. *THE REST OF ITALY, AND SPAIN, GAUL, GERMANY.*—The presence of Jews in these localities is not for the most part demonstrable before the period of the later empire. Relative antiquity belongs to the Jewish community at Puteoli (Dikæarchia), the principal port for the trade between Italy and the East. In addition to Phœnicians and other Orientals we meet here with Jews as well, at the latest about the beginning of the Christian era (Jos. *Ant.* XVII. xii. 1; *BJ* II. vii. 1). But even in a petty town like Pompeii their presence is demonstrable at the date of the destruction of the place, A.D. 79. The names 'Sodoma' and 'Gomora' are scratched on the wall of a house; and not only 'Maria,' which might be the feminine of Marius, but 'Martha,' occurs. The following also are found on earthen vessels: 'mur[ia] cast[a],' and 'gar[um] cast[um] *or* cast[imoniale],' with which cf. Pliny, *HN* xxxi. 95 (Mau, *Pompeji in Leben und Kunst*, 1900, p. 15 f.).

In the period of the later empire the Jews were specially numerous in *Southern Italy* (see Neubauer, 'The Early Settlement of the Jews in Southern Italy' in *JQR* iv. [1892] 606–625). In Apulia and Calabria during the 4th cent. there were many places where the communal offices could not be properly filled, because the Jewish inhabitants declined to accept them (see the decree of the emperors Arcadius and Honorius [A.D. 398] in *Codex Theodosianus*, XII. i. 158). At Venosa (Venusia in Apulia, the birthplace of Horace) a Jewish catacomb has been discovered, with numerous inscriptions in Greek, Latin, and Hebrew, belonging to somewhere about the 6th cent. A.D.

(Ascoli, *Iscrizioni inedite o mal note greche latine ebraiche di antichi sepolcri giudaici del Napolitano*, Torino, 1880; *CIL* ix. Nos. 6195-6241). During this later period we meet with Jews also at Tarentum, Capua, and Naples, as well as in all the principal towns (Syracuse, Palermo, Messina, Agrigentum) of Sicily.—They do not appear to have been quite so thickly settled in *Northern Italy*. Yet we find them here too in most of the larger towns (Ravenna, Aquileia, Bologna, Brescia, Milan, Genoa).

For the other provinces of the West, *Spain*, *Gaul*, *Germany*, the testimonies likewise commence about the 4th cent. A.D. As it does not fall within the scope of the present article to examine all these in detail, we would refer the reader to Friedländer, *Darstellungen aus der Sittengeschichte Roms*, iii. [1871] 511 f.; the same author's *de Judæorum Coloniis*, Königsberg, 1876; and, above all, Th. Reinach, art. 'Judæi' in Daremberg-Saglio's *Dictionnaire des Antiquités grecques et romaines*.

ii. ORGANIZATION OF THE COMMUNITIES.—Everywhere where Jews lived together in any number, they organized themselves into societies, with a view to maintaining their uniqueness, safeguarding their interests, and practising their worship. It is certain that this organization was not everywhere the same. Differences in regard to the possession of political rights, differences in the degree of authority they were allowed to exercise, differences in the stage of culture in the various places where Jews lived, brought with them differences also in the internal organization. Where they formed an imposing political power, the constitution was different from what it was in instances where they formed only petty, modest, private societies. Nevertheless, there are certain common features that run through almost the whole body of the immense Jewish Diaspora. We can prove both these points from a variety of examples, although in many instances we are unable to pursue the details.

We know practically nothing about the constitution of the Jewish communities in the *Euphrates districts* in pre-Talmudic times. Our survey must thus confine itself to the communities within the sphere of the Roman sway.

At *Alexandria* the Jews, owing to their large numbers and their political influence, found themselves in a peculiarly favourable situation. Although they possessed the rights of citizens (see below, § iv.), they constituted a State within a State. Not only had they their own residential quarters, as mentioned above, but they formed an almost independent community, with a kind of monarchical head. Their constitution is thus described by Strabo (*ap.* Jos. *Ant.* XIV. vii. 2): 'But there is also an ethnarch at their head, who rules the people and dispenses justice, and sees that obligations are fulfilled and statutes observed, like the archon of an independent State' (*καθίσταται δὲ καὶ ἐθνάρχης αὐτῶν, ὃς διοικεῖ τε τὸ ἔθνος καὶ διαιτᾷ κρίσεις καὶ συμβολαίων ἐπιμελεῖται καὶ προσταγμάτων, ὡς ἂν πολιτείας ἄρχων αὐτοτελοῦς*). The maintaining of this independence was materially facilitated during the Imperial period by the circumstance that, from the last of the Ptolemies down to Septimius Severus, Alexandria, unlike nearly all Hellenistic towns, had no city Senate (Spartian, *Severus*, 17; Dio Cassius, li. 17). In the time of Augustus a certain modification of the condition of things appears to have taken place. It is, indeed, noted in the decree of the emperor Claudius (*ap.* Jos. *Ant.* XIX. v. 2) that even Augustus, after the death of the ethnarch who held office during the administration of Aquila [10-11 A.D., see *Ephemeris Epigraphica*, vii. 448 (=*CIL* iii. Suppl. No. 12046)], 'did not prevent the appointment of ethnarchs' (*καὶ καθ' ὃν καιρὸν Ἀκύλας ἦν ἐν Ἀλεξανδρείᾳ, τελευτήσαντος τοῦ τῶν Ἰουδαίων ἐθνάρχου, τὸν Σεβαστὸν μὴ κεκωλυκέναι ἐθνάρχας γίγνεσθαι*). But the whole object of Claudius in this decree is to insist that even under Augustus the political rights and the religious freedom of the Jews in Alexandria had not been diminished. This is not at all irreconcilable with a certain modification of the internal constitution. But we are expressly told by Philo that such a modification was introduced by Augustus. His statement is to the effect that, when the Jewish *genarch* died, Magius Maximus, who was on the point of undertaking for the second time the office of administrator of Egypt, received instructions from Augustus that a *gerusia* was to be appointed to manage the affairs of the Jews (*in Flaccum*, § 10 [ed. Mangey, ii. 527 f.]: *τῆς ἡμετέρας γερουσίας, ἣν ὁ σωτὴρ καὶ εὐεργέτης Σεβαστὸς ἐπιμελησομένην τῶν Ἰουδαικῶν εἵλετο, μετὰ τὴν τοῦ γενάρχου τελευτήν, διὰ τῶν πρὸς Μάγνον Μάξιμον ἐντολῶν, μέλλοντα πάλιν ἐπ' Αἰγύπτου καὶ τῆς χώρας ἐπιτροπεύειν* [the traditional *Μάγνον* of the MSS is incorrect, the name was *Magius* Maximus, see *CIL* ix. No. 1125]). Accordingly, we may probably suppose that the difference between this later and the earlier organization consisted in the substitution of a *gerusia* for the monarchical authority of the ethnarch, or in the setting up of a *gerusia* side by side with him. In favour of the latter supposition it can be urged that the decree of Claudius appears to presuppose the continued existence of ethnarchs even after the interposition of Augustus. At the same time, it is also possible that Claudius only means to say in general that the Jews still continued to have their own superiors (*ἐθνάρχαι*). The *γερουσία* and the *ἄρχοντες* at its head are further mentioned by Philo several times in the same context (§ 10 [ed. Mangey, ii. 528]: *τῶν ἀπὸ τῆς γερουσίας τρεῖς ἄνδρες*; *ib.* *μεταπεμψαμένῳ πρότερον τοὺς ἡμετέρους ἄρχοντας*; *ib.* p. 528 f. *τοὺς ἄρχοντας, τὴν γερουσίαν*; *ib.* § 14 [p. 534] *τῶν μὲν ἀρχόντων*). Josephus mentions the *πρωτεύοντες τῆς γερουσίας* (*BJ* VII. x. 1). According to the principal passage of Philo (§ 10 [ed. Mangey, ii. 527 f.]), Flaccus caused thirty-eight members of the *gerusia* to be dragged into the theatre and scourged there. The whole number was, accordingly, greater than this; it may have been seventy, after the model of the Sanhedrin at Jerusalem. In any case the *ἄρχοντες* were not the whole body of the *γερουσία*, but only its committee of management. This is clear not only from the statements of Philo, but from the standing usage of the Greek word.*—A widely diffused error is the identification of the Egyptian *alabarch* with the Jewish *ethnarch*. The first named office was a purely civil one, although, of course, it was repeatedly held by Jews of note (see below, § iv.).

---

* In the above account no regard is paid to a passage in the Letter of Aristeas, which, if its terms were more precise, would supply us with information regarding the organization of the Alexandrian Jews about the year B.C. 200. The passage (*Aristeæ Epist.*, ed. Wendland, § 310) reads: *στάντες οἱ ἱερεῖς καὶ τῶν ἑρμηνέων οἱ πρεσβύτεροι καὶ τῶν ἀπὸ τοῦ πολιτεύματος οἵ τε ἡγούμενοι τοῦ πλήθους εἶπον* (this, which is the text of our MSS, is reproduced exactly in Euseb. *Præp. Evang.* VIII. v. 6; Jos. *Ant.* XII. ii. 13 [ed. Niese, § 108] gives a free summary of the contents of the passage). Since there is no sufficient reason for deleting the *τε* before *ἡγούμενοι*, there are four classes mentioned: (1) the priests, (2) the elders of the interpreters, (3) the elders of the *πολίτευμα* of the Jews, (4) the *ἡγούμενοι τοῦ πλήθους* (cf. the explanation of Wendland in *Festschrift für Joh. Vahlen*, 1900, p. 128). The last two classes answer to the *γερουσία* and the *ἄρχοντες* as organized by Augustus. It would thus appear as if the organization in those early times had been similar to what it again became subsequent to the time of Augustus, whereas in the intervening period it had more of a monarchical form. There is, indeed, nothing strange in a modification of the constitution having taken place more than once in the course of three centuries. But the statement of pseudo-Aristeas is too vague to build certain conclusions upon.

When we take a survey of what we know otherwise about the constitution of the communities of the Diaspora, certain common features show themselves amidst many local differences.

1. One point in which a difference shows itself concerns *the name for the community*. In so far as the latter forms an independent political corporation, it is called **πολίτευμα**. This term, however, is found only in the case of Alexandria (*Aristeæ Epist.* § 310), and of Berenike in Cyrenaica. In the latter instance the word occurs in a decree set up by the Jewish community in honour of the Roman governor, M. Tittius (*CIG* 5361; see facsimile in Roschach's Catalogue of the Museum of Toulouse [where the inscription now is], *Musée de Toulouse, Catalogue des Antiquités*, 1865, No. 225): *ἔδοξε τοῖς ἄρχουσι καὶ τῷ πολιτεύματι τῶν ἐν Βερενίκῃ Ἰουδαίων*. The names of the *ἄρχοντες* who stood at the head of the *πολίτευμα* are given at the beginning of the decree; there are nine of them. (On the use of *πολίτευμα* in a similar sense, see Perdrizet, 'Le *πολίτευμα* des Cauniens à Sidon' in *Revue archéol.*, trois. Série, xxxv. [1899] 42–48; and Wendland, *Aristeæ Epist.*, Index, *s.v.*).

In most towns the Jews formed at first a colony of foreigners side by side with the body of citizens. This is the condition implied in the expressions **κατοικία** (inscription at Hierapolis: *δώσει τῇ κατοικίᾳ τῶν ἐν Ἱεραπόλει κατοικούντων Ἰουδαίων*; cf. Ramsay, *Expositor*, Feb. 1902, p. 96 f.), **λαός** (inscription at Hierapolis: *ἀποτείσει τῷ λαῷ τῶν Ἰουδαίων*), **ἔθνος** (inscription at Smyrna: *δώσει τῷ ἔθνει τῶν Ἰουδαίων*).* These various designations all express the fact that the Jews belonged to a foreign nation, and in Greek towns were counted non-citizens.

The commonest designation, however, especially in later times, is **συναγωγή**. In Greek usage this word occurs only in the sense of 'assembly,' 'festal gathering.' Thus, for instance, *c.* 200 B.C., in the so-called Testament of Epikteta (*CIG* 2448 =*Inscriptiones Græcæ insularum maris Ægæi*, fasc. iii. No. 330), the society which is to attend to the hero-cult instituted by Epikteta is called *τὸ κοινόν*, but the annual gathering of the society *συναγωγά* (col. iv. line 23 f. *τὰν δὲ συναγωγὰν . . . γίνεσθαι ἐμ μηνὶ Δελφινίῳ ἐν τῷ μουσείῳ καθ' ἕκαστον ἔτος ἀμέρας τρεῖς*). But in Jewish usage *συναγωγή* stands for the community as a corporation (in the LXX it mostly represents עֵדָה; see art. CONGREGATION in vol. i.). This term has the most general sense, and hence could be retained even when the Jews through Greek culture and participation in the rights of citizenship had become assimilated to the rest of the inhabitants. They then formed a 'society' for the protection of their religious interests. We can adduce instances of the use of *συναγωγή* in this sense from inscriptions in Asia as well as at Rome. So, for instance, in Asia: at Phokæa (*ἡ συναγωγὴ ἐτείμησεν τῶν Ἰουδαίων Τάτιον Στράτωνος*), Akmonia in Phrygia (*οὕς τινας καὶ ἡ συναγωγὴ ἐτείμησεν*), Pantikapæum (*συνεπιτροπεούσης δὲ καὶ τῆς συναγωγῆς τῶν Ἰουδαίων*).

At *Rome* the Jews were not, as at Alexandria, organized as a single great corporation, such a thing being apparently not tolerated by the authorities. They had, on the contrary, to content themselves with the more modest position of a number of small private societies. Each society had its special name. The following names are preserved in the inscriptions: **1.** *συναγωγὴ Αὐγουστησίων* (*CIG* 9902, 9903=Fiorelli, *Catalogo del Museo Nazionale di Napoli: Iscrizioni latine*, Nos. 1956, 1960; *CIL* vi. No. 29757; *REJ* xlii. 4). **2.** *συναγωγὴ Ἀγριππησίων* (*CIG* 9907). **3.** 'Synagoga Bolumni' (*CIL* vi. No. 29756). These three societies are named after prominent persons [Bolumnus is=Volumnus], whether for the reason that the members were in the service of these men (cf. Ph 4^{22} *οἱ ἐκ τῆς Καίσαρος οἰκίας*), or because the latter were the patrons of the societies. Since we meet with *Ἀγριππήσιοι* as well as *Αὐγουστήσιοι* side by side, the reference is doubtless to the first Augustus and his friend Agrippa. The name assumed by the societies would be retained even after the death of their patrons. Other societies take their name from the quarter of the city of Rome in which their members lived, namely,—**4.** The *Καμπήσιοι*, called after the Campus Martius (*CIG* 9905 [more correctly in Garrucci, *Dissertazioni*, ii. 188, No. 4]; also Garrucci, *l.c.* ii. 161, No. 10; *CIL* vi. No. 29756 'mater synagogarum Campi et Bolumni'). **5.** The *Σιβουρήσιοι*, named from the Subura, one of the most frequented quarters in Rome, a centre of trade and business life (*CIG* 6447=Fiorelli, *Catalogo*, No. 1954). The following additional synagogues are also known:—**6.** A *συναγωγὴ Αἰβρέων*, presumably that of the Hebrew-speaking Jews (*CIG* 9909; *Mélanges Renier*, 1887, p. 439=Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 945). **7.** A *συναγωγὴ Ἐλαίας*, named after the symbol of the olive tree (*CIG* 9904; de Rossi, *Bullettino di archeol. crist.* v. p. 16). **8.** At Porto a *συναγωγὴ τῶν Καρκαρησίων*, which derived its name from the occupation of its members, who were *calcarienses*, 'lime-burners' (*Mélanges Renier*, 440; and in *CIG* 9906 we should in all probability read not *Καμπησίων* but *Καλκαρησίων* [see Garrucci, *Cimitero*, 38 f.]).

An isolated occurrence of another designation for the Jewish corporation of a city has yet to be mentioned, namely, the '*Universitas* Judæorum qui in Antiochensium civitate constituti sunt.' This is found in an Imperial statute of the year A.D. 213 (*Codex Justin.* I. ix. 1).

2. A pretty extensive uniformity appears to have prevailed in the matter of the organization and titles of the *officials* of the community. Almost everywhere we have evidence that the managing committee bore the name **ἄρχοντες**. **1.** For Alexandria we have to refer to the above-cited passages from Philo. **2.** For Berenike in Cyrenaica see in like manner the above-mentioned inscription, according to which there were nine *ἄρχοντες* at the head of the Jewish *πολίτευμα*. **3.** At Antioch a Jewish *ἄρχων* is incidentally mentioned by Josephus (*BJ* VII. iii. 3). **4.** At Tlos in Lycia the office of Jewish archon (*ἀρχοντεία*) is referred to in an inscription (see above). **5.** For North Africa we have the testimony of Tertullian, who names quite generally, amongst other Jewish offices, that of *ἄρχων* (*de Corona*, 9: 'Quis denique patriarches, quis prophetes, quis levites aut sacerdos aut *archon*, quis vel postea apostolus aut evangelizator aut episcopus invenitur coronatus?'). It is therefore extremely probable that the archon mentioned in a Latin inscription in Utica is a Jewish one (*CIL* viii. No. 1205, also Addenda, p. 931). **6.** In Italy, too, the title appears to have been in general use. In a Homily for the birthday of St. John (printed among the works of Chrysostom in editions prior to that of Montfaucon, *e.g.* ed. Paris, t. ii., 1687), which takes account of the conditions of Italy in the time of the later empire, it is made a matter of reproach to the Jews that, in opposition to the law of God, they begin the year, not in spring but in the month of September: 'mensem Septembrem ipsum novum annum nuncupant, *quo et mense magistratus sibi designant, quos Archontas vocant.*' When we turn to the Jewish inscriptions of Italy we meet with the title at Capua (*CIL* x. No. 3905 'Alfius Juda arcon arcosynagogus'), at Porto near Rome (Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 949 *Κλαύδιος Ἰωσῆς ἄρχων*), and with special frequency at Rome itself (*CIG* 9906, 6447, 6337;

---

* In the case of the inscriptions that have been already quoted in § i. we give here only the references.

Garrucci, *Cimitero*, 35, 51, 61, 67, also the same author's *Dissertazioni*, ii. 158, No. 4, 164, Nos. 15, 16, 17, 18; de Rossi, *Bullettino*, v. 16).—At Rome each of the societies, it is certain, had its own archons. They were elected, according to the Homily just named, annually in the month of September. There might be re-election (*δὶς ἄρχων*, *CIG* 9910; Garrucci, *Cimitero*, 47); nay, it would appear as if an archon might be elected for life, for this is the probable meaning of the repeatedly recurring *διὰ βίου* (*CIL* x. No. 1893 'Ti. Claudius Philippus dia viu et gerusiarches'; *CIG* 9907 *Ζώσιμος διὰ βίου συναγωγῆς Ἀγριππησίων*). Cf., in general, Wesseling, *De Judæorum archontibus ad inscriptionem Berenicensem*, 1738; Schürer, *Die Gemeindeverfassung der Juden in Rom in der Kaiserzeit nach den Inschriften dargestellt*, 1879.

It is only for Italy that the presence of the title γερουσιάρχης or γερουσιάρχων is demonstrable. The first of these forms is found in the tomb-inscriptions at Rome (*CIG* 9902 = Fiorelli, *Catalogo*, No. 1956; Garrucci, *Cimitero*, 51, 62, 69, *Dissertazioni*, ii. 183, No. 27) and in the neighbourhood of Naples (*CIL* x. No. 1893); the other occurs at Venosa (*CIL* ix. Nos. 6213, 6221). The title can have no other meaning than 'president of the *gerusia*.' We thus learn from it, what without this evidence might have been assumed, that the communities had not only *ἄρχοντες* but also a *γερουσία*. The fact that, in spite of this, the title *πρεσβύτερος* nowhere occurs in the numerous tomb-inscriptions at Rome, is instructive. The elders were not officials in the proper sense, they were the confidential advisers of the community. Hence *πρεσβύτερος* was not a title. It is not till a very late period that we find it so employed (*e.g.* at Venosa, and that even in the case of women, *CIL* ix. Nos. 6209, 6226, 6230, cf. also *Codex Theodosianus*, XVI. viii. 2, 13, 14).

The office of ἀρχισυνάγωγος (EV 'ruler of the synagogue') was quite generally established. We can prove its existence for all the leading spheres of the Jewish Diaspora. **1.** Egypt (Hadrian's alleged letter to Servianus *ap.* Vopiscus, *Vita Saturnini*, 8). **2.** Asia Minor: Antioch in Pisidia (Ac 13^{15}), Cilicia (Epiphan. *Hær.* xxx. 11), Smyrna (inscription in *REJ* vii. 161 f.), Myndos in Caria (*REJ* xlii. 1–4), Akmonia in Phrygia (see above, p. 94^a, for inscription; in this instance an *ἀρχισυνάγωγος διὰ βίου*). **3.** Greece: Corinth (Ac $18^{8.17}$), Ægina (*CIG* 9894). **4.** Italy: Rome (*CIG* 9906; Garrucci, *Cimitero*, 67), Capua (*CIL* x. No. 3905), Venosa (*CIL* ix. Nos. 6201, 6205, 6232), Brescia (Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 2304). **5.** Africa: Hammâm-Lif near Carthage (inscription on the mosaic pavement of the synagogue), Cæsarea in Mauretania (*Acta Marcianæ*, iv. 1; *REJ* xliv. 8). **6.** The Roman empire in general (*Codex Theodosianus*, XVI. viii. 4, 13, 14).

The duty of the *ἀρχισυνάγωγος* was to take charge of the public worship. Since there was no official preacher in Jewish communities, any qualified member of the congregation being permitted to read the Scripture lessons or deliver an address or lead in prayer, it was necessary to have an official to direct and watch over the exercise of this freedom by the members. This was the *ἀρχισυνάγωγος* (Heb. רֹאשׁ הַכְּנֶסֶת). He had to fix on the reader of the lessons and the leader in prayer, and to invite competent persons to address the congregation (Ac 13^{15}). To him fell the general duty of seeing that nothing unseemly took place in the synagogue (Lk 13^{14}), and he had doubtless to take care also that the synagogue buildings were kept in proper repair. He belonged to the number of the *ἄρχοντες* of the community, but his office was a more special one than that of the *ἄρχοντες* in general; hence the two offices are named side by side as distinct (*CIG* 9906; Garrucci, *Cimitero*, 67; *CIL* x. No. 3905; Ac 14^2 [according to the text of D: *οἱ δὲ* ἀρχισυνάγωγοι *τῶν Ἰουδαίων καὶ οἱ* ἄρχοντες *τῆς συναγωγῆς*]). Since we meet with a *γερουσιάρχης* side by side with the *ἀρχισυνάγωγος* in the tomb-inscriptions of Rome and Venosa, those two offices also are to be regarded as distinct. That is to say, the *ἀρχισυνάγωγος* was not, as such, at the same time the head and president of the *γερουσία*. It is quite possible, however, that outside Italy [it is only in this country that we hear of a *γερουσιάρχης*] both offices were united in one person.

Finally, we encounter pretty frequently in the inscriptions the titles *pater synagogæ* and *mater synagogæ*:—*πατὴρ συναγωγῆς* (*CIG* 9904, 9905, 9908, 9909; Garrucci, *Cimitero*, 52, *Dissertazioni*, ii. 161, No. 10; *Mélanges Renier*, 440); 'pater synagogæ' (*CIL* viii. No. 8499; *Codex Theodosianus*, XVI. viii. 4); *πατὴρ τῶν Ἑβρέων* (*Mélanges Renier*, 439 = Kaibel, *Inscr. Gr. Sicil. et Ital.*, No. 945); *πατὴρ τοῦ στέματος* (*CIG* 9897); *πατὴρ λαοῦ διὰ βίου* (*REJ* xxxiv. 148); 'pater,' without any addition (Garrucci, *Dissertazioni*, ii. 164, No. 18; *CIL* ix. Nos. 6220, 6221); 'mater synagogæ' (*CIL* v. No. 4411, vi. No. 29756). The very circumstance that the title is found in the feminine as well as the masculine form, makes it probable that it does not stand for a communal *office*, strictly so called. Nor are we to understand it of the patron of the community; it was simply a title of honour given to aged members who had deserved well of the community (cf. the statement of ages in *CIG* 9904 *ἐτῶν ἑκατὼν* (*sic*) *δέκα*, and *CIL* vi. No. 29756 'quæ bixit an. lxxxvi. meses vi.').

The employment of the terms *ἄρχοντες* and *γερουσία* shows that the constitution of the Jews in the Diaspora *was based on the communal constitution of the Greek cities.* There are other traces besides this of the strong influence exercised by this model upon the external arrangements of the Jewish communities. Like the Greek communes, the Jewish communities honoured deserving men and women by the bestowal of a wreath and of the *proedria.* Thus the community of Phokæa honoured a woman who had taken upon herself the cost of building the synagogue, *χρυσῷ στεφάνῳ καὶ προεδρίᾳ* (see above, § i.). The Jewish *strategos* Chelkias was likewise honoured with a golden wreath (*Archiv für Papyrusforschung*, i. [1900] 48–56; *REJ* xl. [1900] 50–54). The community of Berenike resolved regarding the Roman governor, who had shown himself friendly to the Jews, *στεφανοῦν ὀνομαστὶ καθ' ἑκάστην σύνοδον καὶ νουμηνίαν στεφάνῳ ἐλαΐνῳ καὶ λημνίσκῳ* (*CIG* 5361). At Alexandria honorific decrees and gifts of this kind, including also such as related to the emperors, were exhibited in the vestibules of the synagogues (Philo, *in Flaccum*, § 7 [ed. Mangey, ii. 524]). Hence Philo complains that, when the synagogues were wrecked by the Alexandrian mob, 'even the shields and golden wreaths and steles and inscriptions in honour of the emperors' perished in the general destruction (*Legatio ad Gaium*, § 20 [ed. Mangey, ii. 565]: *καὶ σιωπῶ τὰς συγκαθαιρεθείσας καὶ συμπρησθείσας τῶν αὐτοκρατόρων τιμὰς ἀσπίδων καὶ στεφάνων ἐπιχρύσων καὶ στηλῶν καὶ ἐπιγραφῶν*).

The influence of Greek processes of law shows itself in the Jewish legal instruments affecting manumission of slaves, found at Pantikapæum (Latyschev, *Inscriptiones antiquæ oræ septentr. Ponti Euxini*, Nos. 52, 53).—In Asia Minor there was a widely recognized right to exact a money penalty for the unauthorized use of a grave. Hence in a multitude of tomb-inscriptions we find a warning against such an act, with a specification of the fine that would be incurred. Penal cautions of this kind, couched exactly in the terms usual in other quarters, may be read also on Jewish tombs at Smyrna, Hierapolis in Phrygia, Tlos in Lycia, Korykos in Cilicia (see above, § i.). The fines are to be paid either to the Imperial *fiscus* or to the Jewish community (*τῷ ἔθνει τῶν* Ἰουδαίων [at Smyrna], *τῷ λαῷ τῶν* Ἰουδαίων, *τῇ κατοικίᾳ τῶν* Ἰουδαίων [at Hierapolis]), or to both.—To Greek influence should probably be attributed also the bestowal of titles and honorary offices upon women. In Greek communes and societies we encounter women with such titles as *πρύτανις*, *στεφανηφόρος*, *γυμνασίαρχος*, *ἀγωνοθέτις*, *δεκάπρωτος*; so amongst the Jews we have *ἀρχισυνάγωγος* (at Smyrna [*REJ* vii. 161 ff.], and Myndos in Caria [*REJ* xlii. 1–4]), *πρεσβυτέρα*, and 'mater synagogæ' (see above).

But, in spite of this extensive adoption of Greek forms, the influence of Greece upon the Jewish communities must not be exaggerated. Not only their religion, but even their civil law was retained by them as far as possible. Everywhere they laid the greatest stress upon justice being administered in the bosom of Jewish communities *κατὰ τοὺς πατρίους νόμους* (Jos. *Ant.* XIV. x. 17). And this jurisdiction of their own was to a large extent conceded to them by the heathen authorities.

iii. TOLERATION AND RECOGNITION BY THE STATE AUTHORITIES.—The framework of political rights into which the Jewish communities had to fit themselves, varied in different places and at different times. We may distinguish some three forms under which the communities in the Diaspora attained to a political existence; and all three have more or less numerous analogues.

1. The nearest analogy is that of the *settlements of foreigners*, especially Orientals, in the great trading cities of the Græco-Roman world. In all the great seaports of the Mediterranean, during the era of Hellenism we meet with Egyptian, Phœnician, Syrian traders, who not only carry on their business in passing, but are permanently settled there in greater or smaller numbers, and have formed themselves into close corporations for the defence of their common interests. They built their temples, maintained their religious service, and supported one another in their material interests. Settlements of this kind are known to us from inscriptions, particularly at Athens (Egyptians, Κιτιεῖς from Cyprus, Sidonians), Delos (Tyrians, Berytenses, Egyptians), Puteoli (Tyrians, Berytenses). The members of the corporation lived in the city as strangers (non-citizens), but their society enjoyed toleration and recognition from the State authorities. To this class belonged, without any doubt, the oldest settlements of the Jews in many places. They formed a *κατοικία*, *i.e.* a colony of foreigners, separate from the political commune.

2. Another analogy is presented by the *private societies* which existed in enormous numbers and in a great variety of forms throughout the whole of the Græco-Roman world. Religious or commercial interests, or both together, led in ancient as in later times to the forming of a great many 'unions' (*θίασοι*, *ἔρανοι*, *collegia*), which had their own administration of funds, and exercised a certain discipline over their members. In looking after their own affairs they occupied an independent position in relation to the political commune similar to that of the colonies of foreigners just described, but were distinguished from them by the circumstance that (at least as a rule and for the most part) they consisted of natives, whether citizens and freedmen, or non-citizens and slaves. To this class belong most of the Jewish communities in later times. For the more the Jews became assimilated to their surroundings, the more they passed from the position of foreigners to that of homeborn, particularly in instances where they possessed the rights of citizenship. With all this, however, they appear as a rule to have retained a certain position of isolation, for the amount of jurisdiction which, with the consent of the city authorities, they exercised within their own circle was, so far as we know, for the most part greater than was conceded to other religious or trades unions.*

3. A third analogue to the communities of the Jewish Diaspora is seen in the *corporations of Greeks and Romans in non-Greek or non-Roman countries.* The Greeks, in view of the wide diffusion of Hellenism, had less occasion for forming such corporations. These were much commoner where Romans were concerned. As the ruling nation, the Romans outside Italy everywhere laid claim to a unique position. They were subject neither to taxation by the communes nor to the jurisdiction of the city authorities, but formed independent bodies alongside of the communal societies of the particular cities in which they lived. Examples of this kind are to be met with in great numbers throughout the whole extent of the Roman Empire (Mommsen, *CIL* iii. Suppl. p. 1306, on No. 7240; Mitteis, *Reichsrecht und Volksrecht in den östlichen Provinzen des römischen Kaiserreichs*, 1891, pp. 143–158). It is with this entirely independent position which these associations held in or rather alongside the communes, that we may compare the position of the Jews in Alexandria and in the city of Cyrene as described by Strabo (*ap.* Jos. *Ant.* XIV. vii. 2). For here they were not subject, as would appear, to the rule of the communal authorities, but constituted an independent corporation side by side with the rest of the body of citizens. Their independence thus went beyond what was enjoyed by the first two classes above described.

A uniform presupposition in all these political regulations was *State toleration of the Jewish cultus.* This was enjoyed by the communes almost everywhere and at most periods of time. In the empires of the Ptolemies and the Seleucids the religious freedom of the Jews was a matter of course. But the early Ptolemies and Seleucids also conferred important political rights upon their Jewish subjects (see below, § iv.).† Antiochus the Great protected the cultus at Jerusalem by royal statutes (Jos. *Ant.* XII. iii. 3, 4). [The genuineness of these is, indeed, disputed (see Büchler, *Die Tobiaden und die Oniaden*, 1899, pp. 143–171; Willrich, *Judaica*, 1900, pp. 48 f., 58–60), but on what appear to the present writer insufficient grounds. The genuineness is held, amongst others, by Ed. Meyer, *Die Entstehung des Judenthums*, 1896, pp. 66, 68]. The persecution of the

---

* Mommsen (*Histor. Zeitschrift*, lxiv. [1890] 421–426) has contended that it was only down to the fall of Jerusalem that the Jews were regarded as a people (*gens*, ἔθνος), and that after that event 'the place of the privileged *nation* was taken by the privileged *confession*.' That is to say, in the earlier period political privileges had been accorded to all who were Jews by birth, and to them alone, whereas in the later they belonged to all who professed the Jewish religion, and to them alone. But, in the opinion of the present writer, this is pushing an observation which is correct in itself to far too sharp a point, when an actual juristic formula is thus arrived at. Even during the period of the late empire the Jews were still in many instances regarded as a 'people' (the inscription of Smyrna τῷ ἔθνει τῶν Ἰουδαίων dates at the earliest from the 3rd cent. A.D., and even the inscriptions of Hierapolis must be placed subsequent to A.D. 70). And it was just the later emperors who sought to prevent the 'confession' from being extended beyond the circle of the Jewish nation; that is to say, they granted privileges only to the people, and not to the confession. Mommsen's view, however, will be found correct to this extent, that the Jews, as time went on, advanced more and more from the first of the above two classes to the second.

† Cf., on the friendly disposition of the early Ptolemies to the Jews, in general, Jos. *c. Apion.* ii. 4, 5.—A Ptolemy once actually granted the right of asylum to a Jewish *proseuche* (*CIL* iii. Suppl. No. 6583 Βασιλεὺς Πτολεμαῖος Εὐεργέτης τὴν προσευχὴν ἄσυλον. The monarch referred to is probably Ptolemy III., for had it been Euergetes II. = Ptolemy VII., we should have expected his consort to be named along with him).

Jews by Antiochus Epiphanes was quite an exceptional phenomenon. Pre-eminent as a friend of the Jews was Ptolemy VI. (Philometor), who even permitted a Jewish temple to be built in Egypt (see below, § v.). The hostile attitude to the Jews assumed by Ptolemy VII. (Physcon) was due, not to their religious but their political partisanship (Jos. *c. Apion.* ii. 5).

The free exercise of their religion was expressly allowed to the Jews also by the Roman legislation, which safeguarded it from any attempts at suppression by the Greek communes. It was especially to Cæsar and Augustus that the Jews were indebted for their formal recognition in the Roman Empire. A whole series of acts have been preserved for us by Josephus (*Ant.* XIV. x., XVI. vi.), partly resolutions of the Senate, partly edicts of Cæsar and Augustus, partly those of Roman officials or of communal authorities of the same date. These all have the same purpose, namely, to secure for the Jews the free exercise of their religion and the maintenance of their privileges (cf., on these acts, especially the investigation of Mendelssohn in *Acta Societatis Phil. Lips.*, ed. Ritschelius, v. [1875] 87-288 ; also *Theol. Literaturzeitung*, 1876, cols. 390-396 ; Niese in *Hermes*, xi. [1876] 466-488). While Cæsar prohibited in general all *collegia* except those that had existed from remote antiquity, the Jewish communities were expressly excluded from this prohibition (Jos. *Ant.* XIV. x. 8: *καὶ γὰρ Γάιος Καῖσαρ ὁ ἡμέτερος στρατηγὸς καὶ ὕπατος ἐν τῷ διατάγματι κωλύων θιάσους συνάγεσθαι κατὰ πόλιν μόνους τούτους οὐκ ἐκώλυσεν οὔτε χρημάτων συνεισφέρειν οὔτε σύνδειπνα ποιεῖν*). We find, for instance, a Roman official appealing to this decree in warning the authorities of Paros not to interfere with the Jews in the practice of their religious observances (Jos. *l.c.*). It is likewise to the influence of Cæsar that we should probably trace the four decrees quoted by Josephus, *Ant.* XIV. x. 20-24. The object, direct or indirect, of all of them is to guarantee to the Jews of Asia Minor (Laodicea, Miletus, Halicarnassus, Sardis) the unimpeded exercise of their religion. After Cæsar's death, the two contending parties vied with one another in maintaining the privileges of the Jews. On the one hand, Dolabella, the partisan of Antony, who made himself master of Asia Minor in the year B.C. 43, confirmed to the Jews the exemption from military service and the religious freedom granted them by former governors (*Ant.* XIV. x. 11, 12). On the other hand, M. Junius Brutus, who in the spring of the year 42 was making warlike preparations in Asia Minor against Antony and Octavianus, persuaded the Ephesians to adopt a resolution that the Jews were not to be interfered with in their observance of the Sabbath and their other religious practices (*Ant.* XIV. x. 25).

All this had the effect of bringing about a legal standing, in virtue of which *Judaism was a 'religio licita' throughout the whole of the Roman Empire* (Tertull. *Apolog.* 21, 'insignissima religio, certe licita' [the expression, by the way, is not a technical one in Roman law, which speaks of '*collegia* licita']). That, amongst others, the Jews in the city of Rome enjoyed this legal standing, is specially testified by Philo for the time of Augustus (*Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]). It is true, however, that down to the 2nd cent. A.D. foreign *sacra* could be practised only outside the 'pomerium.'

The State recognition of the Jewish communities is essentially connected with two important concessions: *the right of administering their own funds, and jurisdiction over their own members.* The former of these had a special importance, owing to the collecting and transmitting of the dues paid to the temple at Jerusalem. The governor Flaccus, a contemporary of Cicero, had interfered with this (Cic. *in Flaccum*, 28 ; see the text of the passage quoted above, § i.). The communal authorities of Asia likewise appear, even after the edicts of Cæsar's time and in spite of these, to have continued to act in a similar way. The decrees of the time of Augustus accordingly bear chiefly upon this point. As Augustus permitted the export of sums of money from Rome itself (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]), it was impressed upon the communes of Asia Minor and Cyrene that in this matter they must put no obstacle in the way of the Jews (Jos. *Ant.* XVI. vi. 2-7 ; Philo, *Legatio ad Gaium*, § 40 [ed. Mangey, ii. 592]).

Of equal importance for the Jewish communities was *the possession of a jurisdiction of their own.* Since the Mosaic law has regard not only to the performance of the cultus but also to the relations of civil life, placing the latter under the control of a Divine law, it was intolerable to the Jewish conscience that Jews should be judged by any code of laws but their own. Wherever the Jews came they brought their own system of law with them, and executed justice, according to its standard, in the case of their fellow-members. It may be regarded as probable that the employment of their own code in *civil processes* was everywhere sanctioned by the State authorities, in so far, that is to say, as complaints of Jews against one another were concerned. Not only must this have self-evidently been the case at Alexandria, but it is witnessed to also for Asia Minor by a despatch of Lucius Antonius (governor of the Province of Asia, B.C. 50-49) to the authorities of Sardis (Jos. *Ant.* XIV. x. 17: *Ἰουδαῖοι πολῖται ἡμέτεροι προσελθόντες μοι ἐπέδειξαν αὐτοὺς σύνοδον ἔχειν ἰδίαν κατὰ τοὺς πατρίους νόμους ἀπ' ἀρχῆς καὶ τόπον ἴδιον, ἐν ᾧ τά τε πράγματα καὶ τὰς πρὸς ἀλλήλους ἀντιλογίας κρίνουσιν· τοῦτό τε αἰτησαμένοις ἵν' ἐξῇ ποιεῖν αὐτοῖς, τηρῆσαι καὶ ἐπιτρέψαι ἔκρινα*). The terms of this despatch show that even those Jews who possessed the Roman citizenship (*πολῖται ἡμέτεροι*), and as Roman citizens could have sought redress before the *conventus civium Romanorum*, preferred to bring their disputes before the Jewish tribunal (*σύνοδος, conventus*) for decision. Even in the legislation of the later Imperial period, this Jewish jurisdiction continued to be recognized in civil cases (*Codex Theodosianus*, II. i. 10 [Decree of the emperors Arcadius and Honorius of the year 398]: 'Sane si qui per compromissum, ad similitudinem arbitrorum, apud Judæos vel patriarchas ex consensu partium in civili duntaxat negotio putaverint litigandum, sortiri eorum judicium jure publico non vetentur: eorum etiam sententias provinciarum judices exsequantur, tamquam ex sententia cognitoris arbitri fuerint attributi').

A jurisdiction of their own in *criminal cases*, in the complete sense of the expression, was certainly not conceded to the Jews in most places. On the other hand, not only do we meet with undoubted instances of the exercise of a *correctional police authority* (see Mommsen, *Zeitschrift für die Neutest. Wissenschaft*, ii. [1901] 88 f.), but this would even appear to have been permitted by the State authorities. It is from this point of view that we are to understand how Saul of Tarsus applied to the Sanhedrin at Jerusalem for full powers to punish Jewish Christians living outside Palestine (Ac 9^2 22^{19} 26^{11}). He himself was afterwards as a Christian scourged five times by the Jews (2 Co 11^{24}); in these instances we are certainly to think, not of Palestinian but of foreign Jewish communities. At Corinth the proconsul Gallio leaves it to the Jews to proceed against St. Paul according to their own judgment, for he himself will not act as judge when an offence against the Jewish religion is concerned (Ac 18$^{12-16}$).

In addition to the freedom of initiative secured for the Jews in the instances we have just described, the Roman toleration paid a very large regard to their religious sensibilities. One chief difficulty concerned the question of *military service.* Such service was quite impossible for a Jew in a non-Jewish army, for on the Sabbath day he might neither bear arms nor march more than 2000 cubits. This question became a specially practical one when, on the outbreak of the civil war between Cæsar and Pompey in the year B.C. 49, the party of Pompey commenced the enrolment of troops on a large scale all over the East. In the Province of Asia alone the consul Lentulus raised two legions of Roman citizens (Cæsar, *Bell. Civ.* iii. 4). Amongst these were included the resident Jews who possessed the Roman citizenship. At their own request, however, Lentulus exempted them from military service, and gave his conscription agents everywhere instructions to the same effect (Jos. *Ant.* XIV. x. 13, 14, 16, 18, 19). Six years later (B.C. 43) Dolabella, with express appeal to the earlier edicts, confirmed the privilege of *ἀστρατεία* to the same Jews (*Ant.* XIV. x. 11, 12). Further privileges enjoyed by the Jews were the following:—1. By a statute of Augustus they were exempted from citation before a court on the Sabbath day (*Ant.* XVI. vi. 2, 4). 2. If a public payment of money or delivery of corn fell on a Sabbath, the Jews were to receive their share on the following day (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 569]). 3. Instead of the oil furnished by the communes, the use of which was forbidden to the Jews, they received a money equivalent (Jos. *Ant.* XII. iii. 1).

The whole political standing above described was never in later times essentially and permanently altered. The measures taken by Tiberius against the Roman Jews affected only the city of Rome. The great question of the *cult of the Emperor*, which afterwards became the main occasion of the bloody persecutions of the Christians, led in the case of the Jews to a merely transitory and local persecution. Augustus and Tiberius were, indeed, gratified when the provincials voluntarily offered them divine honours after the Greek fashion, but they did not demand that this should be done. Caligula was the first to make such a demand universally. Since the Jews on account of their religion could not comply with it, a bloody persecution began at Alexandria, due at first to the anti-Jewish mob, but afterwards carried on by the governor himself. But Claudius hastened to issue an edict of toleration by which all the rights and privileges of the Jews were restored (Jos. *Ant.* XIX. v. 2–3). No subsequent attempt was ever made to compel the Jews to take part in the cult of the Emperor. It came to be regarded as an ancient privilege that they were exempt from this. They had thus the advantage over the Christians in that their privileges had been long established before the cult of the Emperor became the State religion, and was demanded of subjects as a test of loyalty. While the Christians had to atone by bloody martyrdom for their refusal to sacrifice to the Emperor, no such demand was ever made upon the Jews.

It is true, indeed, that certain vacillations in their attitude to the Jews are found on the part of the Emperors. Claudius himself felt compelled to take measures against the Jews in the city of Rome. But these were local, and were not thoroughly carried out. The great war of Vespasian and the destruction of the temple at Jerusalem led, in the case of the Jews of the Diaspora, to the result that the former temple tax of two drachmæ had now to be paid to the temple of Jupiter Capitolinus (Jos. *BJ* VII. vi. 6; Dio Cassius, lxvi. 7). This must certainly have been repugnant to the feelings of the Jews. But their religious freedom was not otherwise interfered with by Vespasian. Their political rights were even expressly protected by him, for instance in Alexandria and Antioch (*Ant.* XII. iii. 1, *BJ* VII. v. 2). Domitian exacted the two drachmæ tax with the utmost rigour (Sueton. *Domit.* 12), and inflicted severe penalties on any Romans who passed over to Judaism (Dio Cass. lxvii. 14). But the existing rights of the Jews were not annulled. Under Nerva a milder condition of things was inaugurated, in so far as he forbade any one to be accused for 'living in the Jewish manner' (Dio Cass. lxviii. 1). By this order the 'calumnia fisci Judaici,' *i.e.* accusations laid by informers in the interests of the Jewish *fiscus*, was abolished (cf. coins inscribed 'calumnia fisci Judaici sublata').

A violent shock to the existing condition of things was given by the great Jewish revolts under Trajan and Hadrian. The latter was due, not wholly but partially, to Hadrian's *prohibition of circumcision* (Spartian, *Hadrian.* 14). This prohibition, so far as we can learn, was quite a general one, issued on grounds of humanity, and not specially directed against the Jews. But the carrying out of such a decree would have been tantamount to a destruction of real legal Judaism. Hadrian's immediate successor, Antoninus Pius, however, while he retained the prohibition in other instances, once more granted the Jews permission to circumcise their children (*Digest.* xlviii. 8, 11 pr.). Similarly, Septimius Severus forbade only the formal passing over to Judaism (Spartian, *Sept. Sev.* 17). Of Alexander Severus we are expressly told that he 'Judæis privilegia reservavit' (Lamprid. *Alex. Sev.* 22). The policy of the Christian Emperors was not always the same, but in general was directed towards preventing the spread of Judaism, without annulling its existing rights.

iv. RIGHTS OF CITIZENSHIP, AND SOCIAL STANDING.—It has already been remarked above that the Jews as a rule, at least in pre-Christian times, lived in Greek cities as *foreign settlers*, like the Egyptians, Phœnicians, or Syrians. That is to say, they were *not citizens*, and had no share in the management of municipal affairs. But there were not a few towns where they possessed the citizenship. This was the case especially in such cities as had been newly founded, or whose constitution had been reorganized during the Greek period. To the category of the recently founded belong pre-eminently the two capitals of the empires of the Ptolemies and the Seleucids, namely, Alexandria and Antioch.

At *Alexandria* the Jews, we are assured by Josephus, were placed by Alexander the Great on a footing of equality with the Macedonians from the very first founding of the city (*c. Apion.* ii. 4: *εἰς κατοίκησιν δὲ αὐτοῖς ἔδωκεν τόπον Ἀλέξανδρος καὶ ἴσης παρὰ τοῖς Μακεδόσι τιμῆς ἐπέτυχον . . . καὶ μέχρι νῦν αὐτῶν ἡ φυλὴ τὴν προσηγορίαν εἶχεν Μακεδόνες*). In another passage Josephus asserts that Alexander, by way of rewarding them for their services against the Egyptians, gave them equal rights with the Hellenes, and that the Diadochi further permitted them to call themselves Macedonians (*BJ* II. xviii. 7: *Ἀλέξανδρος . . . ἔδωκεν τὸ μετοικεῖν κατὰ τὴν πόλιν ἐξ ἰσοτιμίας* [*var. lect.* *ἰσουμοίρας*, probably a corruption of *ἰσομοιρίας*] *πρὸς τοὺς Ἕλληνας. διέμεινεν δ' αὐτοῖς ἡ τιμὴ καὶ παρὰ τῶν διαδόχων, οἳ . . . καὶ χρηματίζειν ἐπέτρεψαν Μακεδόνας*). In the decree of the emperor Claudius, quoted by Josephus (*Ant.* XIX. v. 2), it is said that the Jews had been settled side by side with the Alexandrians from the first, and that they had obtained equal political rights 'from the kings' (*ἴσης πολιτείας παρὰ τῶν βασιλέων τετευχότας*). These rights were expressly confirmed to them by Cæsar. A brass pillar set up by the latter in Alexandria proclaimed that the Jews were Alexandrian citizens (*Ant.* XIV. x. 1, *c. Apion.* ii. 4). Philo likewise notes that the Jews had the legal standing of Ἀλεξανδρεῖς and not that of the *Αἰγύπτιοι* (*in Flaccum*, § 10 [ed. Mangey, ii. 528]). The annulment of their rights during the persecution under Flaccus was merely temporary, for Claudius soon hastened to restore their ancient privileges (*Ant.* XIX. v. 2). Even after the great war of A.D. 70 the petition of the Alexandrians, that the Jews should be deprived of the citizenship, was not granted (*Ant.* XII. iii. 1).

A similar condition of things prevailed at *Antioch*. Here, too, from the founding of the city by Seleucus I. (Nikator), the Jews had received the same rights of citizenship as the Macedonians and Hellenes (*Ant.* XII. iii. 1 : *Σέλευκος ὁ Νικάτωρ ἐν αἷς ἔκτισεν πόλεσιν ἐν τῇ Ἀσίᾳ καὶ τῇ κάτω Συρίᾳ καὶ ἐν αὐτῇ τῇ μητροπόλει Ἀντιοχείᾳ πολιτείας αὐτοὺς ἠξίωσεν καὶ τοῖς ἐνοικισθεῖσιν ἰσοτίμους ἀπέφηνεν Μακεδόσιν καὶ Ἕλλησιν, ὡς τὴν πολιτείαν ταύτην ἔτι καὶ νῦν διαμένειν* ; and to a similar effect *c. Apion.* ii. 4 [Niese, § 39]). In this city also their privileges were set forth on brass tablets (*BJ* VII. v. 2 [Niese, § 110]). In one passage Josephus expresses himself as if these rights were first conferred upon them by the successors of Antiochus Epiphanes (*BJ* VII. iii. 3). But probably he is thinking of a restoration of their privileges after the period of persecution under Epiphanes. When in the time of Vespasian the Antiochenes begged that the Jews might be expelled from the city or deprived of their privileges, this petition was refused as in the case of the similar application of the Alexandrians (*BJ* VII. v. 2 [Niese, §§ 108–111], *Ant.* XII. iii. 1).

According to the above-cited passage (*Ant.* XII. iii. 1), Seleucus I. (Nikator) granted the rights of citizenship to the Jews, and placed them on a footing of equality with the Macedonians and Hellenes, not only at Antioch, but in all the cities founded by him in Asia and Syria. The number of these cities was very considerable (Appian, *Syr.* 57). Even if the statement of Josephus does not justify the conclusion that there were Jewish settlers in *all* of them, this must have been the case with no inconsiderable proportion.

In all the above instances equality of rights on the part of the Jews was based upon the recent foundation of the cities during the Greek period. In the older cities, if Jews came to settle, they could not obtain the citizenship. There was one contingency, however, which made this possible, namely, if the political constitution of the city came to be organized afresh. Such recastings of their constitution took place frequently at the commencement of the Greek period in the cities of Western Asia Minor. Alexander the Great himself overthrew the oligarchical governments that prevailed there, and replaced them by democratical constitutions (Arrian, I. xviii. 2). This was followed by a series of fluctuating forms in the troubled times of the Diadochi. The definite restoration of autonomy and democracy in the cities of the Ionian coast was essentially the work of Antiochus II. (Theos), B.C. 261–246 (Jos. *Ant.* XII. iii. 2 : *τῶν γὰρ Ἰώνων κινηθέντων ἐπ' αὐτοὺς* [*scil.* *τοὺς Ἰουδαίους*] *καὶ δεομένων τοῦ Ἀγρίππου, ἵνα τῆς πολιτείας, ἣν αὐτοῖς ἔδωκεν Ἀντίοχος ὁ Σελεύκου υἱωνὸς ὁ παρὰ τοῖς Ἕλλησιν θεὸς λεγόμενος, μόνοι μετέλθωσιν, κ.τ.λ.* This general testimony of Josephus, according to which Antiochus II. bestowed their *πολιτεία* on the Ionians, is confirmed by a number of special inscriptional testimonies). It is probable that at this time of the political reorganization of the cities in Western Asia Minor the Jews amongst others received the rights of citizenship. It is wrong, indeed, to refer the *αὐτοῖς* in the above quotation to the Jews; it really stands for the Ionians. But the context of the passage makes it probable that at the same time with the Ionians the Jews also obtained the citizenship, and that in the time of Agrippa the non-Jewish inhabitants demanded the sole possession of this for themselves (so also Ramsay, *Expositor*, Feb. 1902, pp. 92–95). At all events, in the time of Josephus the Jews in *Ephesus and in the rest of Ionia* possessed the rights of citizens (*c. Apion.* ii. 4 [Niese, § 39] : *οἱ ἐν Ἐφέσῳ καὶ κατὰ τὴν ἄλλην Ἰωνίαν τοῖς αὐθιγενέσι πολίταις ὁμωνυμοῦσιν, τοῦτο παρασχόντων αὐτοῖς τῶν διαδόχων*). Incidentally we learn that they enjoyed the citizenship in Sardis also (*Ant.* XIV. x. 24), and even outside Asia Minor, at Cyrene (*ib.* XVI. vi. 1).

Wherever the Jews had the rights of citizenship, they must in their totality have formed a *φυλή* by themselves. For the citizens of Greek towns were divided into *φυλαί*, which also practised their own special religious cults. On the latter ground it is inconceivable that an individual Jew, if he desired to remain a Jew at all and to adhere to his religion, could hold the citizenship in a Greek town (attention has been called to this point especially by Ramsay, *Expositor*, Jan. 1902, pp. 22–29). Only where a considerable number of Jews formed a *φυλή* of their own, on the same footing as the other *φυλαί*, could they be citizens. If then St. Paul was a citizen of Tarsus (Ac 21^{39}), we must conclude that the Jews in general who were settled there possessed the citizenship. Ramsay (*l.c.* pp. 29–33) suggests that they may have obtained it on the occasion of the rearranging of the constitution of the city by Antiochus IV. about the year B.C. 170. This appears, however, very improbable in view of the hostility of Antiochus to the Jews.

Even when the Jews formed a *φυλή* of their own, they found themselves, as citizens of a Greek town, in *a self-contradictory position*. They had to take their part in municipal business. But this included, amongst other things, the care of the native religious cults, a duty towards which the Jews were compelled to maintain a uniformly passive relation. And this passivity was a constant ground of complaint on the part of their heathen fellow-citizens. If they desired to be citizens, they must also honour the gods of the city. Such was the demand made by the representatives of the Ionian cities when they brought their complaint against the Jews before Agrippa (*Ant.* XII. iii. 2 : *ἀξιούντων, εἰ συγγενεῖς εἰσιν αὐτοῖς Ἰουδαῖοι, σέβεσθαι τοὺς αὐτῶν θεούς*). The same view was taken everywhere in the Greek cities. Hence it is quite intelligible that the Jews should have been most exposed to the dislike, nay the hatred and persecution, of the heathen inhabitants just in those places where they possessed the citizenship. So it was, for instance, at Alexandria (*BJ* II. xviii. 7, persecution under Caligula), Antioch (*BJ* VII. iii. 3–4, v. 2), the cities of the Ionian coast (*Ant.* XII. iii. 2); and the same was the case at Cæsarea in Palestine, where they had obtained, through Herod the Great, the *ἰσοπολιτεία* (*Ant.* XX. viii. 7, 9, *BJ* II. xiii. 7, xiv. 4–5, xviii. 1). Everywhere it was only the superior authority of the Roman *imperium* that protected them in the enjoyment of the privileges that were recognized as belonging to them.

In addition to the local franchise, not a few of the Jews of the Diaspora possessed also the *Roman citizenship*. At Rome many of them had the degree of citizenship enjoyed by freedmen (*libertini*), for a large proportion of the community was made up of the descendants of those prisoners of war who were brought to Rome by Pompey and sold as slaves, but afterwards manumitted (Philo, *Legatio ad Gaium*, § 23 [ed. Mangey, ii. 568 f.]). This citizenship was, indeed, not a complete but a limited one (Mommsen, *Römisches Staatsrecht*, iii. 1, 420–457).—In Asia many Jews would appear to have been possessed of Roman citizenship: so, for instance, at Ephesus (*Ant.* XIV. x. 13, 16, 19), Sardis (*ib.* 17), Delos (*ib.* 14), in general (*ib.* 18). Hence it is not surprising to find St. Paul also in possession of it (Ac $16^{37\text{ff.}}$ $22^{25\text{-}29}$ 23^{27}). We are not, indeed, aware how the Jews attained to this rank.

The advantages which accompanied the possession of Roman citizenship were very considerable. The possessor was exempt from degrading punishments such as scourging (Ac $16^{37\text{ff.}}$ $22^{25\text{ff.}}$) and crucifixion. He had also the right not only to appeal to the Emperor against a judgment that had been pronounced, but to 'call upon' the Emperor at the very commencement of the process and at every stage of it, *i.e.* to demand that the examination should be conducted at Rome, and judgment given by the Emperor himself (Ac $25^{10\text{ff.}\,21}$ 26^{32}; cf. Mommsen in *Ztschr. f. Neutest. Wissenschaft*, ii. [1901] 90–66). Of one important right the Jews made no use. While they were entitled as Roman citizens to bring civil processes before the special tribunals consisting of Roman citizens, which were found everywhere in the provinces, they preferred to have them decided by the courts belonging to their own communities (*Ant.* XIV. x. 17).

The *social standing* of the Jews must have varied greatly in different places. They appear to have been most favourably situated in Egypt, especially at Alexandria. Owing to their prosperity and culture they here played an important rôle in public life, and under some of the Ptolemies they even rose to high offices in the State. Ptolemy VI. (Philometor) and his consort Cleopatra 'entrusted their whole empire to Jews, and the commanders of the whole army were the Jews Onias and Dositheus' (Jos. *c. Apion.* ii. 5). Another Cleopatra, the daughter of the royal pair above named, likewise appointed two Jews, Chelkias and Ananias, to the chief command of her army in the war against her son Ptolemy Lathyrus (*Ant.* XIII. x. 4, xiii. 1–2).* In an inscription at Athribis there is mention of a Ptolemy, *ἐπιστάτης τῶν φυλακιτῶν* (chief of police), who, in conjunction with the Jewish community, built the synagogue of the place (see above, p. 96^{a}). Although it does not necessarily follow from this that he was a Jew, the probability, in view of analogous cases, is in favour of such having been the case. The Ἀντωνιος Μαλχαιος who in the time of Trajan held the ὁρμοφυλακία at Syene (see above, p. 96^{b}), *may* also have been a non-Jewish Semite, but ought in all probability to be regarded as a Jew. We may also remind the reader of the above (p. 96^{b}) mentioned Jewish tax-collectors in the Thebaid during the earlier Ptolemaic period.

During the Roman period several Jews of noble birth and wealth held the office of *alabarch*. So, for instance, Alexander, the brother of the philosopher Philo (Jos. *Ant.* XVIII. vi. 3, viii. 1, XIX. v. 1, XX. v. 2), and a certain Demetrius (XX. vii. 3). The view that the *alabarch* was the head of the Jewish community is certainly wrong. He is in all probability identical with the ἀραβάρχης, whose office was that of chief superintendent of customs on the Arabian frontier, *i.e.* on the east side of the Nile. (A 'vectigal Arabarchiæ per Ægyptum atque Augustamnicam constitutum' is mentioned in the *Codex Justin.* IV. lxi. 9; an inscription found at Koptos contains a tariff fixing 'how much is to be raised by those who farm the ἀποστόλιον [?] at Koptos under the *arabarchy*'; see the text of this inscription in *Bulletin de corresp. hellénique*, xx. [1896] 174–176; on the office of the *alabarch* in general, see the Literature in Schürer, *GJV*³ iii. 88 f., and add Wilcken, *Griechische Ostraka*, i. [1899] 347–351). Perhaps it is the office of the *alabarch* that is in view when Josephus says that the Romans 'continued (to the Jews of Alexandria) the position of trust given them by the kings, namely, the watching of the river' (*c. Apion.* ii. 5 *fin.*: 'maximam vero eis fidem olim a regibus datam conservaverunt, id est fluminis custodiam totiusque custodiæ' [the last word is certainly corrupt]). The 'watching of the river' refers to watching it in the interests of levying customs. In any case the *alabarch* was not an official of the Jewish community, but a man who held a prominent place in civil life.—Tiberius Alexander, a son of the alabarch Alexander, even reached the highest grades of a Roman military career, although at the expense of renouncing his ancestral religion.

Outside Egypt the Jews do not appear to have anywhere gained so influential a footing. Yet instances are not wanting elsewhere of their rising to positions of prominence. In Jerusalem at the outbreak of the war of A.D. 66 there were Jews holding the rank of Roman knights (Jos. *BJ* II. xiv. 9). At Ephesus and Venosa we meet in tomb-inscriptions with Jewish 'head physicians' (ἀρχίατροι; see *Ancient Greek Inscriptions in the British Museum*, iii. 2, No. 677; Ascoli, *Iscrizioni inedite o mal note*, 1880, No. 10). These were appointed by the city, and are thus to be regarded as municipal officials. In Italy the Jews from the time of Septimius Severus were admitted to the city offices (*Digest.* L. ii. 3: 'Eis qui Judaicam superstitionem sequuntur, divi Severus et Antoninus honores adipisci permiserunt').

V. RELIGIOUS AND INTELLECTUAL LIFE. — In spite of all its contact with Greek surroundings, the Jewish people preserved its religious uniqueness in a surprising fashion. The effects of the Maccabæan rising manifestly extended also to the Diaspora. As in the mother country at the time of Antiochus Epiphanes there was in aristocratic circles an inclination towards Hellenism even in religious matters, so in the city of Jasus in Caria we hear about the same time of a Νικήτας Ἰάσονος Ἱεροσολυμίτης who contributed money to support the festival of the *Dionysia* (see above, p. 94^{a}). But the Maccabæan rising removed the danger of a wholesale syncretistic amalgamation of Judaism with Hellenistic heathenism. Instances of this last phenomenon do, indeed, occur. The Jewish Hellenist Artapanus considered that he was glorifying Judaism by representing the patriarchs and Moses as not only the creators of all secular culture, but the founders of the Egyptian religious cults in the sense in which Artapanus himself understood these (see the fragments of his writings in Euseb. *Præp. Evang.* ix. 18, 23, 27). In the temple of Pan at Apollonopolis Magna in Upper Egypt two Jews recorded their thanks to 'the god' for an act of deliverance (*CIG* 4838^{c}). In a professed letter of Hadrian it is even said in general that in Egypt all the Jewish ἀρχισυνάγωγοι are 'astrologers, *haruspices*, and quacks' (Vopisc. *Vita Saturnini*, c. 8, in the 'Scriptores Historiæ Augustæ': 'Nemo illic archisynagogus Judæorum, nemo Samarites, nemo Christianorum presbyter non mathematicus, non haruspex, non aliptes'). Side by side with syncretistic mixture we find also philosophic indifference to the literal sense of the Law. There were Jews with an education in philosophy who, on the basis of the allegorical interpretation of Scripture, regarded the higher, philosophical, or ethical sense of the commandments as the only one of value, and neglected the observation of the literal sense (Philo, *de Migratione Abrahami*, § 16 [ed. Mangey, i. 450]: *εἰσὶ γάρ τινες οἳ τοὺς ῥητοὺς νόμους σύμβολα νοητῶν πραγμάτων ὑπολαμβάνοντες τὰ μὲν ἄγαν ἠκρίβωσαν, τῶν δὲ ῥᾳθύμως ὠλιγώρησαν*). It may be also assumed in general that the observance of the Law on the part of Greek Judaism did not attain to the rigour and preciseness of the Pharisaic party in Palestine. Greek culture formed a heavy counter-weight to the latter. Nevertheless, the Judaism of the Diaspora asserted itself in the main along the same lines as in Palestine. Syncretistic movements and philosophic indifference never gained the upper hand. The leaders of the communities took care that even in the Diaspora the religious life was regulated by the standard of the Law of Moses. Any one who seriously broke off from the latter was expelled from the community. Even a philosopher like Philo complains of the depreciation and neglect of the literal sense mentioned by him in the above quotation. With all his skill in the allegorical interpretation, he yet maintained the binding character of the literal sense, nay he attempted to show that all commands, even those relating to ceremonial purity and to food, are based upon reason and nature.

---

* Chelkias and Ananias were the sons of the high priest Onias IV., the founder of the temple of Leontopolis.—A Greek inscription, now in the Berlin Museum, contains a fragment of a decree in honour of a certain *Chelkias* or, as is more probable, his son. All that has survived of the name is the genitive Χελκίου. The subject honoured was στρατηγός, and received as a mark of distinction a golden wreath (see Willrich, *Archiv für Papyrusforschung*, i. [1900] 48–56). It is possible, but not certain, that this Chelkias is identical with the one mentioned by Josephus.

One principal agency in maintaining the ancestral faith was found in *the regular gatherings in the synagogue on the Sabbath.* It is beyond question that these were held also in the Diaspora in every instance where a community had been organized. According to Philo, 'On the Sabbath day in all cities thousands of houses of instruction are opened, in which understanding and self-restraint and ability and justice and all virtues are taught' (*de Septcnario*, § 6 [ed. Mangey, ii. 282]). The apostle Paul, in the course of his journeys in Asia Minor and Greece, found Jewish synagogues everywhere, *e.g.* at Antioch in Pisidia (Ac 13^{14}), Iconium (14^{1}), Philippi ($16^{2.\,3}$), Ephesus ($18^{19.\,26}$ 19^{8}), Thessalonica (17^{1}), Berœa (17^{10}), Athens (17^{17}), Corinth ($18^{4.\,7}$). In the larger cities there were more than one synagogue; at Alexandria there were a great many (Philo, *Legatio ad Gaium*, § 20 [ed. Mangey, ii. 565]: *πολλαὶ δέ εἰσι καθ' ἕκαστον τμῆμα τῆς πόλεως*).

The *language* used in the synagogue service was undoubtedly as a rule *Greek.* The Church Fathers expressly testify that the Greek Bible was used in the synagogues (Justin, *Apol.* i. 31, *Dial. c. Tryph.* 72; Tertull. *Apol.* 18; Pseudo-Justin, *Cohort. ad Græc.* 13). The Old Testament is familiar to St. Paul in the LXX translation only. It is not therefore likely that the Hebrew and Greek texts were used both together. The prayers and the address were also, it may be regarded as certain, in Greek, for in every instance where this language prevailed the Jews adopted it as their mother tongue. This is shown above all by the tomb-inscriptions. The early period at which the language of the LXX began to exercise a commanding influence on liturgical forms, and especially on the language of prayer, has been recently shown by the above (p. 97^{b}) mentioned imprecatory inscriptions of the island of Rheneia near Delos. These should be dated, in the opinion of epigraphic experts, not later than about B.C. 100. They are couched quite in the style of the LXX (*ἐπικαλοῦμαι καὶ ἀξιῶ τὸν θεὸν τὸν ὕψιστον, τὸν κύριον τῶν πνευμάτων καὶ πάσης σαρκός . . . κύριε ὁ πάντα ἐφορῶν καὶ οἱ ἄνγελοι θεοῦ, ᾧ πᾶσα ψυχὴ ἐν τῇ σήμερον ἡμέραι ταπεινοῦται μεθ' ἱκετείας*). Even the Palestinian Rabbis could not avoid sanctioning the writing of the Scriptures in Greek and the uttering of prayers in the same language. The exceptions not covered by this permission are very trifling (*Mĕgillā*, i. 8; *Ṣôṭā*, vii. 1, 2). For the ordinary prayers (*Shĕma'*, *Shĕmōneh 'Esreh*, and blessing at meals) the employment of any language is expressly sanctioned.

No *sacrificial cultus* was legal, after the Deuteronomic reformation, outside Jerusalem. In spite of this, such a cultus was practised in Egypt for more than two centuries. The occasion of its establishment was the deposition of the ancient high priestly family during the general upheaval under Antiochus Epiphanes. The high priest's son, Onias, having no prospect of gaining his ancestral office at Jerusalem, came to Egypt in the time of Antiochus V. (Eupator) (B.C. 164–162). Here he received a cordial welcome from Ptolemy VI. (Philometor) and his consort Cleopatra. The king placed at his disposal an ancient ruined temple at Leontopolis in the nome of Heliopolis, which had formerly been a sanctuary of the ἀγρία Βούβαστις.* This was converted by Onias into a Jewish sanctuary, modelled after the temple at Jerusalem, but smaller and plainer, and with a number of deviations in details. Since there were already priests on the spot in sufficient numbers, a formal Jewish temple-cultus was established, which continued uninterrupted from that date (*c.* B.C. 160) until, after the destruction of Jerusalem, the temple of Leontopolis was also closed by the Romans in the year A.D. 73 (see, in general, Jos. *Ant.* XII. ix. 7, XIII. iii. 1–3, x. 4, XX. x. 3; *BJ* I. i. 1, VII. x. 2–4; *Orac. Sibyll.* v. 429–511). It is true that this cultus was never regarded by the teachers of the Law in Palestine as justifiable, and that the sacrifices offered in the Egyptian temple had only a very limited degree of validity attributed to them (Mishna, *Mĕnāḥôth*, xiii. 10). Nay, even the Egyptian Jews themselves were not satisfied with their own cultus, but kept up their connexion with Jerusalem. They performed the pilgrimages to that city like all other Jews (Philo, *de Providentia*, quoted in Euseb. *Præp. Evang.* viii. 14, 64, ed. Gaisford), and their priests, when they married, always had the genealogy of their wives verified at Jerusalem (Jos. *c. Apion.* i. 7).

Amongst the most important obligations which the Law imposed upon the Jews was that of paying *the manifold dues to the priests and to the temple at Jerusalem*: firstfruits, heave-offering, tithe, firstlings, dues in connexion with baking and killing, offerings on divers occasions, and finally the two drachmæ tax. So far as a due levied on the products of the soil of the *Holy Land* was concerned (firstfruits, heave-offering, tithe), the Jews of the Diaspora were, as a matter of course, exempt. But there remained still enough of performances to which even a Jew living far from Jerusalem was bound, if he meant to be true to his religion. If the dues could not, owing to distance, be paid in kind, they had to be converted into money. All these obligations were, so far as we know, punctiliously and zealously discharged by the far scattered Diaspora. The result of this was the accumulation of immense stores of wealth at the central sanctuary. Josephus (*Ant.* XIV. vii. 2) expressly accounts for these by pointing to the great extent of the Diaspora. Philo gives a detailed account of the collecting and delivery of the money (*de Monarchia*, ii. 3 [ed. Mangey, ii. 224]): 'The temple derives its revenue not merely from a few pieces of land, but from other and much more copious sources, which can never be destroyed. For so long as the human race endures, the temple's sources of revenue will also continue, since their permanence is bound up with that of the whole world. For it is prescribed that all Jews over twenty years of age shall pay annual dues. . . . But, as might be expected in the case of so numerous a people, the dues amount to an enormous sum. *In almost every city there is a receiving office for the sacred funds, into which the dues are paid. And at fixed times men of noble birth are entrusted with the conveyance of the money to Jerusalem.* The noblest are chosen in every city, in order that the hope of every Jew may be transmitted unimpaired. For the hope of the pious is based upon the regular payment of the dues.' In the Euphrates districts the principal treasuries were in the cities of Nisibis and Nehardea. In these the money was first collected and thence transmitted to Jerusalem at a fixed time, many thousands taking charge of its conveyance, in order to protect the sacred treasure from the plundering attacks of the Parthians (Jos. *Ant.* XVIII. ix. 1).

---

* Its situation is most precisely defined in Jos. *Ant.* XIII. iii. 2: *τὸ ἐν Λεόντων πόλει τοῦ Ἡλιοπολίτου ἱερὸν συμπεπτωκὸς . . . προσαγορευόμενον δὲ τῆς ἀγρίας Βουβάστεως.* In other passages Josephus says merely that the temple was situated 'in the nome of Heliopolis' (*Ant.* XII. ix. 7, XIII. x. 4, XX. x. 3; *BJ* I. i. 1, VII. x. 3). We have to do, then, not with the better-known Leontopolis, which formed a nome of its own, but with another, which was included in the nome of Heliopolis. The latter lay on the east side of the Delta. In this neighbourhood there are still two mounds, each bearing the name *Tell el-Jehudiyeh* (see Naville, 'The Mound of the Jew and the City of Onias' in *Seventh Memoir of the Egypt. Explor. Fund*, 1890). One of the two will be identical with the foundation of Onias. Naville fixes upon the one farthest south, on account of its being nearer to Heliopolis. The more northern one, however, seems to the present writer the likelier site, because there are evidences of the Bubastis cult at it. See also above, p. 96^{a}.

The transmission of such large sums to Jerusalem repeatedly gave rise to collisions with the Roman and municipal authorities. Flaccus, during his administration of the Province of Asia, prevented the money being sent, and municipal authorities were constantly inclined to do the same. But the Roman legislation subsequent to the time of Cæsar protected the religious liberty of the Jews in this as in other matters (see above, p. 103). After the destruction of the temple, the payment of sacred dues necessarily underwent transformation. The two drachmæ tax was converted into a Roman tax; other dues which depended upon the continued existence of the temple could not, in the nature of things, be paid any longer. But even under these circumstances the Jewish people, by voluntary self-taxation, continued to assert their unity. A new central authority, the Patriarchate, was created, to which at least a portion of the prescribed sacred dues was paid every year. The collecting of these was now accomplished by deputies of the Patriarchate, the so-called *apostoli*.

The principal means of maintaining an exchange of thought between the mother country and the Diaspora, and of furthering and maintaining a close fellowship between the two, was found in the frequent *festival pilgrimages* made by Jews from all parts of the world to Jerusalem. 'Many thousands from many thousand cities journeyed to the temple at every festival, some by land and some by sea, from east and west, from north and south' (Philo, *de Monarchia*, ii. 1 [ed. Mangey, ii. 223]). The number of Jews ordinarily present at Jerusalem at the feasts is reckoned by Josephus at 2,700,000, a number which, indeed, also includes the permanent population of Jerusalem (*BJ* VI. ix. 3).

While the Jews scattered all over the world thus held fast to the religion of their fathers, and that in the legal form it had received through the Restoration under Ezra, they had become in other respects *Greeks*. Greek culture asserted its supremacy in a decisive fashion here, as elsewhere. In Asia Minor, Greece, Egypt, Cyrenaica, nay even at Rome, Greek was the mother tongue of the Jews. All the relics of writing that have come down to us from the Diaspora during the last centuries B.C. and the first centuries A.D. are in Greek. This is true especially of the tomb-inscriptions, whose evidence is of importance because they are concerned not only with the rich and noble, but with the poor and humble (see above, § i., for the most important materials under this head). These tomb-inscriptions are at the same time a faithful mirror of the stage of culture that prevailed in the communities. The Greek of the tomb-inscriptions at Rome is barbarous, and shows, what might otherwise have been supposed, that the Jews here remained for the most part at a low social level. In other places the inscriptions of various kinds that have survived reveal a higher degree of culture.

It was in *Egypt* that the Jews most thoroughly assimilated the Greek culture. Here, as is shown by the case of Philo, they read the Greek poets and philosophers; Homer, Sophocles, and Euripides; Plato, Aristotle, and Zeno. All this could not, as a matter of course, be without far-reaching influence upon their whole intellectual life. Their conception of the world and of life, in spite of their adherence to legal Judaism, was powerfully influenced in its contents by Greek culture. The literature produced by Hellenistic, especially Alexandrian, Judaism is, in consequence, of an extremely varied character. It serves, on the one hand, religious ends, the defence and propagation of Judaism (Apologetics and Propaganda); and, on the other hand, it follows Greek models in History, Poetry, and Philosophy. So far as poetical art is concerned, it was indeed somewhat meagrely represented. The extant fragments of Greek dramas and Greek epics treating of biblical subjects can scarcely be said to be marked by any high poetic strain (see the fragments of a drama treating of the story of the Exodus from Egypt by the tragedian Ezekiel *ap.* Euseb. *Præp. Evang.* ix. 28, 29; and the fragments of an epic on the history of Jerusalem by the elder Philo *ap.* Euseb. *ib.* ix. 20, 24, 37). In philosophy, however, the Jews made very notable achievements. Greek philosophy had indeed advanced far on the way towards monotheism. It had also, as represented by many of its teachers, an ethical cast. Hence the Jews discovered here many elements which were capable of assimilation by them. These they adopted with remarkable powers of adaptation; and in this way, by combining the religious world-conception of the Old Testament with the philosophic world-conception of the Greeks, they created a new unique philosophy of religion which was as much Jewish as Greek. A clear picture of this is given us by the writings of the Alexandrian Philo, which have come down to us in great numbers.

The adoption of Greek culture enabled the Jews again for their part to exercise an influence on their heathen environments. From all that we know, they carried on a vigorous and successful propaganda. Those whom they gained over were either formally received into the communities by circumcision, or they attached themselves to them in a loose form 'as God-fearing' (*σεβόμενοι, φοβούμενοι τὸν θεόν*), forming a kind of appendage to the communities (see art. PROSELYTE in vol. iv.). This Jewish propaganda served in great measure as a preliminary to Christianity. In general the Jewish Diaspora, as was remarked at the beginning of the present article, paved the way along which the first preachers of the gospel went forth into the world, and in many ways laid the foundation of the rapid success of their preaching.

[*Additional Note* to § i. (5).—The early settlement of Jews in Alexandria is confirmed also by an inscription, discovered in 1902 in the neighbourhood of Alexandria, which reads thus: Ὑπὲρ βασιλέως Πτολεμαίου καὶ βασιλίσσης Βερενίκης ἀδελφῆς καὶ γυναικὸς καὶ τῶν τέκνων τὴν προσευχὴν ὁ Ἰουδαῖοι (see *REJ* xlv. [1902] p. 162). The inscription refers in all probability to Ptolemy III. Euergetes (247–222 B.C.)].

E. SCHÜRER.

RELIGION OF GREECE AND ASIA MINOR.—

Introduction.
A. PRIMITIVE ANATOLIAN AND PRE-HELLENIC RELIGION.
  I. Sacred Stones and other Inanimate Objects: (1) stones, pillars, columns, etc.; (2) thrones; (3) weapons; (4) wooden posts.
  II. Sacred Trees.
  III. Sacred Animals: (1) animals as parts of the god; (2) the bull; (3) the goat; (4) the sheep; (5) the horse; (6) the swine; (7) the bee; (8) the sacredness of domesticated animals; (9) domesticated animals as sacrifice; (10) the lion, the stag; (11) the serpent; (12) sacredness of wild animals.
  IV. Sacred Places: (1) mountains; (2) sacred caves and mountain glens; (3) sacred springs and lakes; (4) development of the sacred place into a religious centre or *Hieron*; (5) sacred places in the religion of Greece.
  V. Relation of the original *aniconic* religion to image-worship: (1) coexistence of the two kinds of worship; (2) votive images and representations of the Deity; (3) shrines (*naoi*).
  VI. The Divine in human form and character: (1) the Great Mother; (2) the growth of mythology as the story of the Great Mother; (3) myths of the goddess and the god; (4) the birth and death of the Divine nature.
  VII. Ritual and Ceremonial: (1) the origin of ritual; (2) the Mysteries; (3) nature of the Mysteries; (4) the character of the Phrygian and the Greek Mysteries; (5) the growth of ritual; (6) purification; (7) confession; (8) approaching the Deity; (9) priests; (10) *hieroi*.
  VIII. Influence on Society and Life: (1) marriage; (2) *hierodouloi*; (3) women guards; (4) self-mutilation; (5) burial; (6) brotherhoods and guilds; (7) government and administration; (8) household *protegés*; (9) religious influences on social conditions.
  IX. History and Chronology: (1) development of the Anatolian Religion in history; (2) local diversity in Anatolian Religion; (3) chronology.
B. THE HELLENIC RELIGION.
  I. Early Greek Religion.
  II. Greek Religion and Greek Law.
  III. The Elements of Hellenic Religion.
  IV. The Growth of Hellenic Religion: (1) continuity of development; (2) growth of mythology; (3) polytheism and the Hellenic unity; (4) formation of the Hellenic Pantheon; (5) the Hellenic Religion an ideal; (6) theory of the Hellenic Pantheon; (7) moralization of the Hellenic gods; (8) the Daimones and the Divine in the physical world; (9) restrictions on the nature of the gods; (10) State gods and gods within the State; (11) extension of the worship of a god; (12) State recognition of the Pan-Hellenic Religion; (13) the Hellenic Religion a part of the City-State; (14) the Hellenic conception of piety.
  V. The Hellenic classification of deities as Olympian and Chthonian: (1) Hellenism and the thought of death; (2) the Olympian and the Chthonian gods.
  VI. The Religion of Apollo and the Delphic Oracle (L. R. F.).
C. LATER DEVELOPMENT OF RELIGION IN THE GREEK WORLD.
  I. Religion in Literature and Philosophy.
  II. The attitude of St. Paul to Greek Philosophy.
  III. Degradation of the Hellenic Religion: (1) foreign influence; (2) susceptibility to foreign religious influence; (3) manner in which foreign religion entered Greece; (4) itinerant priests; (5) magic; (6) the worship of living men as deities.
  IV. Religion of the Græco-Asiatic cities.
  V. Decay and death of the Hellenic Religion.
Literature.

The religion of the Greek peoples and of the races which lay between Hellas and the strictly Oriental nations, in communication with both, influencing and influenced by both, is a subject which can hardly be omitted in a survey of the religions which came into immediate relation to Christianity in the earliest stage of its history; and yet it is a subject which at the present time is hardly susceptible of adequate treatment within narrow space. The antiquities of the most notable Hellenic cults have been much investigated, though not always in a very intelligent fashion or with a proper conception of the religious bearing of the details so carefully and laboriously collected. Hence the religious ideas and conceptions entertained by the various tribes of Greece, often differing widely from one another, have hardly been sufficiently observed and studied in their gradual evolution; and, in fact, evidence is so scanty in regard to most of them, that it is doubtful if the attempt could be successful.

If the religion of the strictly Greek tribes is still very obscure, much more is this the case with what may be called the half-Greek peoples * of Asia Minor. This is a subject still almost unstudied, or studied occasionally, in a haphazard way, partially, and as a sort of appendix to the religion of Greece proper. This way of entering on the study, under the bias and colouring influence of Greek prepossession, is, we believe, injurious, and has caused much misapprehension. One should rather begin the study of Greek religion from Asia Minor, both as being more primitive in many of its forms, and as having sent into Greece a series of religious waves which strongly affected that country. At a later period the Greek influence returned over Asia Minor, and overran it in a superficial way; but this new period in religion was broadly different, and easily distinguishable from the older and truly Anatolian period. It is necessary to begin afresh in that country, to collect and classify and value the religious facts, and on this basis to give an account of the religion of the peoples; but that is a great work, which is far too large for the narrow limits of an article. Probably the most useful way at present will be to state as simply and clearly as possible the views which the writer is disposed to hold, avoiding disputation and argument, and therefore making little reference to discrepant views, except where such reference is the shortest way of stating the subject clearly. This gives unavoidably an appearance of dogmatism, which the writer can only apologize for as the necessary result of the attempt to make the subject clear in small space: if the views of others were stated, either the article would become a confusing congeries of irreconcilable theories, or it would grow too large in estimating and discussing other views. It is also necessary to explain that the writer's views are founded on a far from complete survey of the facts, and are liable to correction, doubtless, in many details, if the opportunity should ever be granted him of writing a complete account of Anatolian religion; but the general principles are the result of more than twenty years of interest and occasional study, and are not likely to be much changed by further thought.*

---

* On the meaning which we attach to this term 'half-Greek, see the following paragraph.

The phrase 'half-Greek races' is not used in an ethnological sense in this article. It does not imply a mixture of Greek and non-Greek blood in any race. It is employed to indicate a gradual shading off of character, as one proceeds from Greece proper towards the East. The view which we take is that even the tribes of Greece proper were far from uniform in blood and stock. The Hellenic idea and civilization which those tribes evolved was far too many-sided to arise among a homogeneous nation: there were combined in its composition a great variety of characteristics contributed by various tribes of very diverse character, nursed and matured amid the peculiar circumstances of the seas and lands that touch and mingle in south-eastern Europe and Asia Minor. The lands that border on the Ægean Sea were pre-eminently the nursing-home of Hellenism, and the further we go from it the more faint and evanescent become the traces of the Greek spirit. Hellenism is only partially a racial fact; it denotes also a general type of intellectual and political development, of industrial education and artistic achievement.

The point of view from which we start may be stated in outline as follows. (1) The religion of the Anatolian race or races, in its origin, was to a considerable extent an idealized presentation of the actual life of the time, exhibiting a Divine model and authorization for the existing customs and institutions in family and society and the State as a whole.

(2) Their religion was the authority for the laws and rules on which rested their industry and agriculture and general well-being. Perhaps it originally taught those rules to a simple people, in which case the knowledge embodied in them probably belonged at one time to the priests alone. Certainly, the sanction for the rules was religious: the violation of them was punished by the Divine power through sickness, whether disease of any part of the body or the general indefinite fact of fever, which was considered to be a consuming of the body and strength by Divine fire.

(3) The Divine power was the ruler of the people, acting through its visible representatives, namely, the kings or priests: there is every probability that the king was the priest: the priest-kings or priest-dynasts are a most characteristic feature of Anatolia.

This is obviously the religion of a comparatively civilized people, not of a barbarous race. And it must be distinctly understood from the outset that we are not investigating the origin of the religious forms which are described in the following pages: we are attempting to understand clearly and state precisely the religious ideas of a population, possessing an ordered system of government of a peculiar and well-marked character, surrounded by many equipments and devices and implements of an artificial and developed character, practising both agriculture and a very highly developed system of treating domesticated animals and adapting them to the benefit of mankind.

A question of extreme interest and importance is, how far any signs of progress and development can be observed in the religion which we are studying. It may be doubted whether there can be detected anything in the way of growth from within, of elevation of the religious idea and of the moral standard in the application of religion to life, such as is the most striking feature in the history of Hebrew religion. On the whole, the history is one of deterioration and degradation rather than one of elevation. Any improvement that does take place seems rather attributable to, and fully explained by, the meeting of different races with different religious ideas corresponding to their differing social and family organization; and is probably not caused by any mind working from within the religion, unfolding and vitalizing the germs of truth which it contained, and burning away the envelope and accretion of accidental idolatrous forms that clung to it. We use intentionally these last words, for it will appear that the fundamental and essential idea in the Anatolian religion is not strictly idolatrous, and that the development in polytheism and image-worship was gradual, and was external and accidental rather than natural and necessary.

A. *PRIMITIVE ANATOLIAN AND PRE-HELLENIC RELIGION.*—In treating this subject, reference must often be made to primitive Greek, or, as it may be called, Pelasgian worship (anticipating part B, §§ I, II), which illustrates the Anatolian religion so remarkably as to demonstrate that some intimate relation once existed between them. We must here simply assume the relationship without inquiring into its nature.

I. SACRED STONES AND OTHER INANIMATE OBJECTS.—As a preliminary, we may ask what traces of the worship of inanimate things can be observed in Asia Minor or Greece, and what is the idea involved in this worship? Many examples are known of such things being regarded with deep religious veneration.

(1) *Stones, Pillars, Columns*, etc.—A rude and shapeless stone, which had fallen from heaven (διοπετής), doubtless a meteorite, existed originally at Pessinus, and was brought to Rome about B.C. 204; it is a type of many other similar stones at Orchomenos, Thespiæ, Synnada, Adada, etc. Many of these stones had some approximate regularity of shape, sometimes perhaps accidental, in other cases distinctly due to human workmanship. Such were the conical or roughly pyramidal stones in the temples at Paphos (of Aphrodite), Perga (Artemis), Delphi (Apollo), etc.: obelisks, columns, and stones of a distinctly tetragonal shape are indicated in many other cases: above all other gods in Greece such stones or pillars were connected with Hermes, and called *Hermaia* or *Hermai.**

It admits of no doubt that many sacred stones had primarily a purpose in family life or social or political organization. Boundary stones or *termini* were erected by mutual agreement between disputants, and were consecrated by every religious sanction known at the time, by ceremonial, and by a curse on the violator or remover; and the belief indubitably was that the ceremonies of erection and consecration had caused Divine power and life to take up its abode in the stone: this Divine power demanded worship in recognition and propitiation, and was able and ready to punish neglect or violation. The *terminus* was valueless unless it was respected and inviolate: human need was urgent that it should be respected, but mere human power was unable to make it so: accordingly, the Divine power was invoked to supply the deficiency, and by proper rites was brought down and caused to dwell in the pillar or the stone. One of the ceremonies proper to the cult of such sacred stones was the pouring of oil on them; and in general a similar ceremonial to that described in § II was practised. Similarly, in a house any peculiarly important bearing member, a central pillar or roof-tree, was placed under Divine protection by invoking the Divine power to reside in it.

---

* In the *Cities and Bishoprics of Phrygia*, i. and ii., the present writer was groping his way to the views now expressed in part A. A considerable portion of part B was written in 1879-81, and needed hardly any change to adapt it to the writer's present views. In view of recent theories it should be added that the view here advocated, as to the way in which pre-Hellenic religion developed into Hellenic, remains practically unchanged since 1881, but the name 'Pelasgian' was not used in that old sketch of the subject.

* *μεθόριον στησάμενοι τὸ* Ἑρμαῖον (Polyænus, *Strat.* vi. 24); *τὸ Ερμαῖον ἐς ὃ Μεσσηνίοις καὶ Μεγαλοπολίταις εἰσὶν ὅροι* (Pausanias, viii. 34. 6). These *Hermaia* were columns, or heaps of stones, or single stones. A useful collection of ancient authorities will be found in Mr. M. W. de Visser's treatise, *de Græcorum diis non referentibus humanam speciem*, Leyden, 1900.

In all cases there is but one method and one principle. The more urgent man's need is, and the more important for his life and well-being any stone or erection is, the more does it become necessary to make the Divine power take up its abode in the stone. In other words, the stone becomes a *Beth-el*, or 'House of God'; the pillar embodies the god Hermes.

The subject in its bearing on early Greek religion has been admirably treated by Mr. A. J. Evans in an elaborate paper on 'Mycenæan Tree and Pillar Cult' (*Journ. of Hell. Stud.* 1901, pp. 99–203), which will henceforth be regarded as fundamental in this department, though it will doubtless receive development and improvement and correction in details from both the author and others. The preceding remarks will show why the objection recently raised against Mr. Evans' theory in *Journ. of Hell. Stud.* 1901, pp. 268–275, cannot weigh with us: the objection is that many of his examples of 'sacred pillars' are obviously structural members, and need not therefore be considered to have any religious purpose: we, however, hold that the structural importance produced the sacred character of the 'pillar.' The sacredness of rude purposeless stones was perhaps due to 'false analogy,' that fruitful agency in thought, and should be regarded as not primitive, but cases of degradation.

Probably no one could doubt that the rude meteoric stone was worshipped because it had fallen from heaven, and was obviously and unmistakably a mark and sign and example of Divine activity and power. Similarly, it seems beyond doubt that the boundary stone, or the supporting member of the family home and roof, is made into a dwelling-place of Divine power, in order that human needs may be satisfied by Divine aid. The same principle of interpretation must be applied in many other cases where the stone was neither in itself an object useful to man, nor marked by its natural character and origin as Divine. It was often urgently necessary to protect a locality for the common use of men, and this was done in a similar way by setting up one or more sacred stones in it; but in such cases the sacred stone was an addition, and not an integral part of the structure or equipment.

In a town it was urgently required that the street, the common property and a necessary convenience for all, should be inviolate and properly kept and respected by the dwellers or passers-by. The common need was guaranteed by the sacred *Hermai* or pillars, which were made the residence of Divine power by charming it into them through the proper rites; and misdemeanour in the street or encroachment on it was thus constituted a disrespect of the divinity, and punished by him.

In a more developed state of society, roads leading from city to city were probably put under Divine protection in a similar way; and the sacred stones were commonly made useful to human requirements by having distances engraved on them, thus becoming milestones.* But such stones generally belonged to a more advanced stage of thought, when men refused to consider a stone the abode of Divine power. On the Roman Imperial roads they were dedicated to the Emperor, and thus placed under the guardianship of the Imperial god incarnate in human form on the earth. The god and the stone are in this stage separated in thought, but the stone remains sacred in a new way as the property of the god.

A meeting of three roads or streets, as an important point, was placed under the guardianship of the Divine power. When the anthropomorphic tendency had become strong, the Divine guardian of the triple crossing was represented as the goddess (under the name Hekate in Greece) with three faces, looking to the three ways (just as in Italy the god protecting the archway and the door was represented with two faces looking in the two directions). But before the anthropomorphic idea had gained full strength, there was doubtless some other way of symbolizing the Divine guardianship of the meeting of the ways; and the suggestion seems obvious that the symbol was the *triskeles*, three human legs and feet, diverging from a common centre, and typifying the walking of men along the three ways which radiated from the meeting-place (*compitum*). Little is known with regard to this form of cultus, except in Rome, where the feast of the *Compitalia* was an important part of the city-religion; but few will doubt that, as streets and roads became important, a cultus corresponding to the *Compitalia* developed in primitive Anatolia. In the coinage of Anatolia the *triskeles* is almost entirely confined to the cities least affected by Hellenic culture, in Pisidia, Isauria, and early or inner Lycia. Moreover, the epithets τρικάρανος, τετρακάρανος, applied to Hekate-Selene, are doubtless to be understood as applying to the goddess who guards the *trivium* or the *quadrivium*.*

It may therefore be reasonably maintained that in many other places, where we know only that in primitive thought a stone was regarded as sacred and made the object of worship in the Greek world, the fundamental character was the same. The stone was worshipped as home and symbol and proof of Divine power—a power able and ready to respond to human needs. See also below, (2), and § IV (1).

As Greek thought developed in the direction of anthropomorphism and polytheism, there arose an opinion that the old sacred stone was either a representation and image of a god, the rudest beginning of a statue, or an altar dedicated to the god. Such views seem not to be original and genuine religious conceptions, but merely philosophic interpretations by which more developed thought tried to bring primitive religious facts into conformity with itself. Thus the pillars, mentioned above, in streets and open places, which were originally called *agyiai* or *agyieis*, were regarded as altars or representations of a Deity, sometimes Helios, sometimes Dionysos, but most commonly Apollo; and *Agyieus* was then usually regarded as an epithet of Apollo. The Greeks themselves hesitated whether to call the pillars altars or statues of Apollo, a sure proof that neither description was complete and true. The pillars or stones in open places and gymnasia, by roads, at boundaries, originally and commonly styled *Hermai*, *i.e.* embodiments of Hermes, came to be regarded rather as statues of Hermes, and were developed accordingly in art, as we shall see in the ensuing paragraph.

The institution of sacred stones was modified by another influence. Art was engaged in the service of the anthropomorphic tendency in religion, and wrought out ideal expression in human form of the various gods: the types of gods and goddesses were elaborated, and distinguished from one another, in the ruder stage to a considerable extent by symbols and equipments, but in the more developed and perfected stage by the varying artistic expression of the idealized conception of each deity as an individual character. Alongside of this rapid progress in the artistic presentation of different types of Divine character as different personal gods in human form, there was another line of development, through which the sacred pillars (which still continued to be erected in numbers during this more developed period) were made to assume more resemblance to the human form. The top of the pillar was carved into a bust, and parts of the body were indicated on the sides: such figures were commonly called *Hermai*, and Greek art developed the type at a later time in various ways, making the busts portraits of real human persons. In all such cases art takes the view that the pillar is a rude statue of some deity or hero, and makes additions or modifications to bring out this character more clearly.

---

* Curtius, *Gesch. des griech. Wegebaus.*

* See *Hermes*, iv. p. 64; Ramsay, *Hist. Com. on Galatians*, p. 219.

The epithet of meteoric stones, διοπετής, was sometimes transferred to certain very archaic statues, about which the legend grew that they had fallen from heaven: such was the case with the rude figure of barely human form in which Artemis of Ephesus was represented (Ac 19^{35}). The nature of those rude old idols will be more fully considered in § III (1) and § V (1).

(2) *Thrones.*—The ancients mention many stones in Greece which were said to derive their sacred character from having been the seat of deities or heroes (who in these cases may usually be regarded as deities degenerated in popular legend). Such were the Agelastos Petra at Eleusis (or at Athens) on which Demeter sat sorrowing for her lost Kora,* or, as another legend said, where Theseus sat before descending to Hades; the chair of Manto at Thebes, the stone of Telamon at Salamis, etc. The bed of Actæon at Platæa and various other stones may be classed with these. The Omphalos at Delphi is often represented with Apollo sitting on it.

In Asia Minor there are examples of rocks cut to the rough form of a seat. The 'Throne of Pelops' in Sipylus beside Magnesia (Pausanias, v. 13. 7) is probably to be identified with the rock-cutting, forming a sort of broad seat, or platform with a back, on the highest point of an early rock citadel on the slope of Sipylus, about 4 or 5 miles east of Magnesia.

Dr. Reichel has elaborated these facts into a theory of Throne-worship: viz., that the Divine nature, not yet represented in personal human form, was symbolized by the throne or seat, which was regarded as an indication of its presence.

Some of Dr. Reichel's examples of Divine thrones rest on his own far-fetched and almost certainly erroneous explanations; † in other cases the recorded story about a Divine or heroic throne may be only a later popular explanation of an older religious fact, no longer understood. But whether that aspect of his theory is only pressed too far and applied to unsuitable cases, or whether it is wholly erroneous, there is, at any rate, another and a true side to his theory. He is right in his view that before the period of images and image-worship we must admit the existence of an imageless worship in the Ægean lands and Asia Minor generally: a Divine power invisible to man was approached and adored; it was felt in the phenomena of the world, in the growth and life and productivity of nature; its presence and power were symbolized and envisaged to its worshippers in various ways, but the symbols were not considered as images or likenesses of that Divine nature, but rather as its home or residence, or as an effect and exemplification of its power. The statement of Nicol. Dam. *Synag. fr.* 19 (p. 148), and Stobæus, *Serm.* xlii. p. 292, that the Phrygians did not swear or exact from another an oath (by any god), probably has some reference to this belief in a Divine nature without images.* On this topic see further, § V (1).

Dr. Reichel has erred, as we believe, only in the direction in which he has developed a correct observation. It was not the seat or throne of the formless and invisible Divine nature that was in the beginning worshipped; for the very idea of a seat already involves the attribution of something like form and personality to the power which needs and uses a seat. The fundamental idea was that of the home and abode, or the origin of Divine power. Out of this springs all the symbolism and all the earlier phenomena of Anatolian religious observances. The sacred stone or the sacred tree is the home of the Divine nature: the cave among the wild mountains, the simple shrine, are easy developments of the same idea.†

(3) *Weapons.*—Other inanimate objects besides stones were made the object of worship. The Alani, a rude barbarian tribe south-east of the Black Sea, are said to have worshipped a naked *sword*, which they fixed for the occasion in the ground. This might be disregarded as a savage custom which had come in from Central Asia, were it not that one of the reliefs—among the most important, to judge from its size—portrayed on the walls of the *adytum* before the eyes of the initiated at Boghaz-Keui (Pteria probably), east of the Halys,‡ represents a gigantic sword stuck in the ground, with only the hilt and a small part of the blade protruding. The hilt in itself is evidently a symbol or representative of Divine power, composed of two pairs of animals, evidently lions, surmounted by a human head wearing the tall pointed hat characteristic of the supreme god. It is therefore not open to doubt that the custom of the Alani in the 4th cent. after Christ was the same as the ancient Anatolian custom. We see clearly that the sword was regarded not as a god in and for itself, but as a symbol of a vague pervading Divine power. That power resides mainly in the hilt, not in the blade, and is moulded not altogether unlike the human form, and yet differing essentially from it, full of the terror and strength of savage nature embodied in the four lions, but human-headed.

If some tribes worshipped the sword, others regarded the *battle-axe* as sacred. The difference obviously arises from difference of warlike custom: the weapon to which the tribe trusted especially in battle was esteemed by it the home of the Divine strength by which they conquered and hoped to conquer. In Caria and in Crete the axe appears as a Divine symbol. We may confidently assume that it was made the object of a special cult, like the Sword-god among the Alani. Though this is not exactly proved definitely by the evidence, yet the importance of the Carian name *Labrys* (*bipennis*, 'battle-axe') in Carian religion leaves little doubt on the point: Labranda was one of the chief centres of the worship of the Carian god, who was actually called *Labraundos*,§ and one of the Kouretes in Carian mythology was Labrandos.* But, even more unmistakably than the sword, the axe was a symbol of a Divine power felt as lying behind it and expressing itself through it, and not as a power or a terror in itself. The god carrying the battle-axe on his shoulder is one of the most familiar and widely diffused symbols in east Lydian and west Phrygian coinage.†

---

* A similar stone and legend probably existed in Asia Minor; and a Christian form was given to it later; see *Journ. of Hell. Stud.* 1882, p. 349.

† See A. J. Evans in *Journ. of Hell. Stud.* 1901, p. 189; Fritze in *Rhein. Museum*, 1900, p. 588.

* The Pontic oath by Men Pharnakes (Strabo, p. 557) is later (cf. p. 128); but see Roscher, *Selene*, p. 122.

† On the shrine see § V (3); on the sacred cave, § IV (2).

‡ See Perrot, *Histoire de l'Art dans l'Antiquité*, iv. pp. 642, 647; Chantre, *Voyage en Cappadoce*, gives the latest account.

§ Hellenized as *Zeus Labraundos*.

We notice that the worship of the axe belongs to the Carians, a people who beyond doubt were an immigrant race; and we shall see among them some examples of divergence from the Anatolian type of religion (see § VI (2)). The worship of the axe must be regarded as also a divergence from that type; and, in accordance with the principle stated at the beginning of the article, this divergence is to be attributed to the character of the Carian race. In the same way the worship of the sword, though traceable in the religion of the central plateau in the earliest period known to us, is probably a development out of the original Anatolian type due to pressure from the east and north-east. The east Anatolian type of cultus is of a much more bellicose type than the central Anatolian (see § IX (2)), and the reason indubitably lies in the rough and warlike character of the tribes on that side, such as the Kardouchoi, modern Kurds, etc.

(4) *Wooden posts.*—A rude wooden post was sometimes worshipped in a way similar to the more common sacred stone. The Divinity at Samos was originally symbolized by a wooden plank; and in the more anthropomorphic development, when the Divinity had come to be thought of as the goddess Hera, this plank was called the earliest statue of her. Many other similar stumps of wood experienced the same development in anthropomorphic thought.

In origin some, and probably most, of those sacred stumps or planks were holy trees, decayed and dead;‡ and they strictly fall under § II. But in other cases the original was a wooden pillar or column, the support of a chamber or house, and falls under the class described above, § I (1); this was clearly the case with the Dionysos Kadmos at Thebes, described by Pausanias, ix. 12. 4 (which de Visser, p. 88, has aptly illustrated from Diod. Sic. I. xxiii. 4).

II. Sacred Trees.—The worship of sacred trees is one of the most widely spread religious phenomena in the early Greek world. The ancient Homeric hymn to the Aphrodite of the Troad (264–272) mentions that the life of the mountain nymphs, who shall nurse the goddess's son, is associated with the life of the sacred trees, which man may not cut down; and that, when a tree withers and dies, the nymph dies with it. The oaks of Dodona were Divine, and the sound of the motion of their branches was the voice of the god declaring his will and revealing the future to men. The bay tree of Apollo, the olive of Athena, and many others, had doubtless the same origin. In later time the popular legend often attached itself to such trees, that they had been planted by some hero or Divine figure (so with two oaks at Heraclea in Pontus), or in some other fashion they were involved in his life-history (a frequent form being that the god or hero or heroine had been suspended from the tree).§

The worship of the tree was conducted on precisely the same plan as that of the image in later times. It was clothed, crowned, adorned;* processions were made to it, sacrifices were burnt to it, and meat-offerings laid before it. People prayed to it and kissed it (Ov. *Met.* vii. 631). It was impious to go beneath it without the proper rites (Ov. *Fast.* iv. 749). It was wrong to pass it without some token of respect (Apul. *Flor.* 1). The fall of a holy tree was a very bad omen; and in Rome on such an occasion an *exauguratio* was performed, as there had originally been an *inauguratio* (Plin. *HN* xv. 20).

Dedication of the *hair* has always been the greatest sign of devotion to any deity; boys dedicated their hair on entering manhood, brides before marriage, married women at the birth of a child; and in Delos it was customary for boys and bridal couples to dedicate their hair under the olive tree that grew on the grave of Hyperoche and Laodice.

The sacred tree was the pledge of the presence and favour of the god, and on it therefore depended the prosperity of the family, tribe, or State which worshipped it. Such belief is seen in reference to the fig tree in the Roman forum,† or the olive in the Acropolis at Athens; and when the latter put forth a new shoot after the burning of the city by the Persians, the people knew that the safety of the city was assured. A piece of the sacred tree was a pledge of security to the Argo and to the fleet of Æneas (*Æn.* ix. 92). The fate of Megara depended on an olive tree (Plin. *HN* xvi. 72).

The tree, then, was on earth the embodiment or the home of Divine life; and the life of man in some forms of belief was connected with a tree during his earthly existence and passed into it at his death. Like the gods, men are often said to be born from trees. Hesiod's third race of men were born from ash trees, and Meleager's life depended on a piece of wood. Ares was born from Hera and a plant (see below, § VI (2)). Talos and Adonis were born from trees. Most instructive are the cases in which the tree is said to have grown out of the hero's grave. Such was the plane tree on the tomb of Amycus in Bithynia: Amycus had opposed and fought with all strangers; and if any part of his tree was taken on board a ship, there ensued constant quarrelling, until his influence was got rid of by throwing away the bough. Here the tree is evidently the embodiment of the spirit of the dead person. There was generally a fountain beside the tree, as at Dodona and Aulis.

Moreover, transformation into a tree was equivalent to translation to the company of the gods: and the tree became then a sacred pledge for posterity, the prototype of the later hero-chapel. The plants and trees which grew on the grave were the life of the buried human being. Phemonoe, the first Pythia, foretold that from her dead body would spring herbs which would give to animals that ate them the power of showing the future by the state of their entrails. Thus she would live on with men. And, similarly, the plants on graves made a connexion between the deceased and this world: an Athenian law (Ael. *Var. Hist.* 5. 17) punished with death any one who cut a holm-oak growing in a sepulchral ground (*heroon*). From this sprung the later custom of planting gardens in cemeteries. Many passages in literature allude to the sympathy between the dead man and the trees or plants on his grave. On that of Protesilaus grew plane trees, whose twigs pointed towards Troy, and whose leaves fell sooner than those of any tree around.‡

The belief in holy trees has lasted, probably unbroken, in Anatolia through Christian times down

---

* The Carian local names *Laryma* and *Lôryma* (both bishoprics) may be connected (through an intermediate form *Lavryma*); also *Lobrine*, a title of Cybele at Cyzicus.

† See list in Head's *Catalogue of Coins Br. Mus.: Lydia*, p. cxxviii.

‡ Examples in great number are alluded to by Maximus Tyrius, viii. 1 (de Visser, p. 88).

§ The oaks at Heraclea, Plin. *HN*, xvi. 89. On the whole subject Boetticher, *Baumkultus*, is fundamental; but Mannhardt and many other writers must be consulted.

* Theocr. xviii. 45.

to the present day. In the *Acta* of St. Philetærus[*] a grove of tall cypress trees at a place in Mysia called Poketos, on the road from Nicæa and the Rhyndacus to Cyzicus, is mentioned as the chief seat of local pagan rites in the 4th cent.; the reference probably proves that the grove existed or was still remembered when the *Acta*, a late composition but embodying a real local tradition, took form. An inscription of Sandal (Satala in the Lydian Katakekaumene) mentions the punishment inflicted in the form of disease by the gods Sabazios and Anaitis Artemis on a man who had cut their trees; and the Mohammedans still believe that disease will afflict any one who cuts the trees on a neighbouring hillock.[†] Sacred trees were hung with garlands, just as at the present day rags and scraps of garments are tied by Mohammedans to sacred trees in many parts of Asia Minor, though this practice is not in accordance with the spirit or the rules of their religion.

The veneration of the sacred tree or grove evidently implies the idea that the tree is an embodiment of the Divine life and power, and that he who maltreats the tree injures the Divinity that lives in the tree. At the same time, the utilitarian element also entered here, for the belief protects and safeguards the interests of men, or their deep feelings of respect for the dead. The trees beside a village were useful to its population, or they were sentinels keeping watch over the grave of the dead. The worshippers of the Divine power ornament the tree in which that power is manifested with garlands, or with small representations of the power in some of its manifestations: and out of the latter custom, through growing religious degeneration, springs the legend that some hero (connected with, sometimes a mere impersonation of, the Divinity) has been suspended from the tree, as Marsyas from the plane near Celænæ in Phrygia, or Helena from the plane at Sparta (Paus. iii. 19. 10; Theoc. 18, 43).

III. SACRED ANIMALS.—That various animals had some religious awe attached to them in early Greek and Anatolian religion is well known; but the nature and real meaning of this awe are far from certain. No branch of our subject is more obscure than this; and in none are so many wild and vague statements and such mixture of ideas current.

The question of sacred animals is always liable to be mixed up with the question of Totemism. There are, indubitably, certain facts in the religious ceremonial and symbolism of the Greek peoples which can be most easily and naturally explained as survivals of Totemism. But we cannot think that Totemism held any place in Greek or Anatolian religion as it presents itself to our study. Similarly, the black stone of the Kaaba in Mecca is an old fetish, the veneration of which has survived in Mohammedanism; but fetishism is not really an influence in, or part of, Mohammedanism. Many survivals of pagan rites and symbols are apparent in the developed Hebrew worship, but they did not touch its essence or affect its development except to be successively eliminated from it. Similarly, the survivals of Totemistic forms in the Greek world do not affect our study of its religion, though they are of extreme interest to the archæological investigator. The religious ideas of the tribes and races, whose contact and intercourse produced the form of thought, religion, and civilization which we call Hellenism, were raised above the level of Totemism; and even the earliest Greek thought did not understand those survivals in a Totemistic way, but put a new, and historically incorrect, interpretation on them in popular legend.

Also, the form of religious thought in which the sacred animal was regarded and worshipped as being actually a god incarnate is not characteristic of Anatolia. The nearest approach to that idea is in the Ephesian religion of Artemis (7), where the goddess was the queen bee; but there is no proof that any actual bee was worshipped. The explanations of sacrificial rites as being cases in which celebrants kill and eat the sacred animal as the body of their god, are not admissible, except perhaps in some borrowed rites of external origin.

We may, with some confidence, lay down the general principle (which we shall find confirmed in several instances and contradicted in none), that the sacred animals of Anatolian religion are regarded in relation to a more generalized conception of the Divine power, which lies behind them and finds expression through them. Hence they are often represented in the rude symbolism of primitive Anatolian art as associated with, or employed in, the service of some deity or Divine figure, who is an embodiment of that higher Divine power.

(1) *Animals as parts of the god.* — The most typical appearance of animals in this way is as bearers or supporters or companions or components of gods. A god or goddess is often shown in rude Anatolian cult-representations as standing on an animal or bird: that is the case with a god, presumably Sandon or Baal-Tarz (Hellenized as *Zeus Tarsios*), represented on coins of Tarsus, with several deities on the religious sculptures in the *adytum* at Boghaz-Keui, and with various small works of art in bronze or on seals or in other forms. The Horseman-god described below, (5), perhaps belongs to this class.[*]

In other cases the figure of a god has a rough resemblance to the human form, but is composed of one or more animal forms, supporting a human head, or in an Egyptianizing type the head is that of a beast or bird, but the body is human (as in some figures at Boghaz-Keui, or the Black Demeter with the head of a horse at Phigalia in Arcadia).

To this class belong the representations of Cybele with her lions, or of Artemis with her stags. In those cases the earliest known types show the Deity with a form in which nothing is human except the head and perhaps the arms: the rest of the figure is a mere shapeless non-human mass or stump. The animals stand on each side of this central figure. In one case Cybele's lions rest their forepaws on her shoulders.[†] Greek art took these ancient native types and developed them freely, making the figures of the goddesses entirely human, giving beauty and dignity to them, seating Cybele on a throne with her symbols (*patera* and *tympanon*) in her hands, representing Artemis after the type of the Greek hunting goddess, and introducing some dramatic motive in their relation to the accompanying animals: the goddess plays with the animals or caresses one of them with her hand. Sometimes the lion reclines in Cybele's lap like a pet dog. See also § V (3).

In such representations it is clear that the original religious conception did not regard the Deity as of human form. There is sufficient resemblance to suggest at first sight the human form; but at the second glance the differences are seen to be very marked. The types arose, as we shall see, in the way of votive offerings. The worshipper offered to the Divine power some rude representation of itself, laying this on or near the stone, or hanging it from the tree, which was considered to be the home of the Divinity. The representation rudely embodied the vague, unformed conception entertained by the worshippers: the Divine power was not wholly unlike human, but it was different, and contained the strength and swiftness or the teeming productive power of various animals.

[†] *Journal of Hell. Studies*, 1884, p. 245 and plate.

The conception of the *Satyr*, a half-human half-bestial form, belongs originally to Asia Minor, and was developed, first in Ionian, and then in general Greek art. The more strictly Greek conceptions of Thessalian Centaur and Arcadian Pan are fundamentally the same in character. The Satyr-type varies between human mixed with horse and human mixed with goat, while the Centaur is only of the first kind and Pan only of the second. Silenus is a similar idea, of Anatolian origin probably, but developed in art more on the human side. The idea in all these figures is that of rude, free, natural life, untrained, unfettered by conventions and ideas of merely human origin; this life of nature is the spontaneous expression of the Divine life, and comes nearer to the Divine nature than men can approach, but also it has a distinct human side, and can come more easily into relations with mankind than the Divine nature can. Men can by stealth catch and force to their will[*] the Satyr and Silenus, who are thus intermediaries between the Divine and the human. On the other hand, those figures are the companions and servants and associates of the god Dionysos, a deity of marked Anatolian character. In another respect they are a means of mediating between the Divine nature and mankind: 'they took them wives of all that they chose' (Gn 6^2). Now the idea lies deep in the Anatolian religion, as we shall see, that man has come from God and goes back to him at death; and evidently this relation between Satyrs or Sileni and human women is one of the grotesque developments by degradation of that idea; see below on the serpent (11).

(2) The *bull* often appears in surroundings which show his religious significance: in one case he seems to be standing on an altar, as an object of worship to the human figures looking towards him.[†] The very frequent employment of a bull's head on sepulchral and other steles and on sarcophagi at a later period evidently originated in the sacred character of the animal, and had at first an apotropaic purpose (the Divine power protecting the grave), but became purely conventional and ornamental in the lapse of time. But even in the above-mentioned case, where the bull is the object of worship, a glance at the figure is sufficient to show that he is worshipped as a symbol: he represents and embodies the generative power of nature: there lies behind him the Divine power of growth and life, which he expresses: in this character he played a part in the Phrygian Mysteries.[‡]

(3) The *goat*, which is mentioned as sacred in the worship of Leto and Lairbenos,[§] and doubtless generally, was associated with Dionysos, a deity of markedly Anatolian character. At Laodicea on the Lycus the goat appears as a companion of the god Aseis (identified with the Greek Zeus, and treated as an epithet of Zeus), who lays his hands on the horns of a goat standing beside him. In Greek art there is known a type showing Aphrodite riding on a goat, which may probably be an artistic development of an old schema showing a deity standing on a goat. Such also is a late Anatolian type showing Men sitting or riding on a goat.

The goat and the ox are evidently the animals characteristic of a pastoral people on the great plains of central Asia Minor; and the fact that they were so useful must have helped to give them their sacred character. Countless herds of goats are still a feature of the great plains of the central plateau.

Like the bull, the sacred goat is doubtless to be understood as the male animal, the embodiment and representative of the productive Divine power regarded on the active side. The Divine nature, as we shall see, was regarded in Anatolia sometimes as complete and sexless, but more frequently as divided into two Divine beings, male and female; and in the latter case the life of nature is pictured in the cultus as the mutual relations of the Divine pair, the god and the goddess.

(4) The *sheep* was a third animal of great importance on the pasture-land of the plateau; and there is evidence that it was sacred. The sheep was worshipped by the Samians, and was closely connected with the worship of Hermes. Milchhöfer in *Archäolog. Zeitung*, 1883, p. 263, quotes examples of the occurrence of the ram as a figure on graves in Phrygia and Armenia.

The sacred sheep is to be understood as the ram. He stands in the same relation to Hermes as the goat does to Dionysos. It is a ram that appears on the Anatolian and Armenian tombs.

(5) The *horse* must be regarded as a sacred animal (as might be expected), on account of the widely-spread representations of the Horseman-god. No Divine figure is so common in the later hieratic art of Asia Minor as this deity. He occurs on the coins of many cities in Lydia and West Phrygia, and on rock reliefs as well as on votive steles in the Pisidian hill-country; these are almost all of the Roman period, but the type is certainly much older. In many cases the Horseman-god is a hero, *i.e.* the deified form of a dead man (regarded as identified with the god, § VIII (5)), and the type must in those cases be regarded as sepulchral. Hence the horse-head, which appears in many sepulchral reliefs in Attica, may be taken as a symbolic indication of the same type, the part standing for the whole. In those reliefs the deified dead is usually represented as a seated figure of heroic size, and the horse-head in an upper corner of the relief indicates in brief the type of the Horseman-god, which is another form of the dead man's new heroized nature. The horse was probably imported into Anatolia, and belongs to a later period than bull, sheep, and goat.

(6) The *swine*.—Most difficult and obscure are the questions connected with the swine. There is good evidence to show that the swine was sacred in the Anatolian religion. In Crete, which was in strong religious sympathy with Asia Minor, the swine was sacred, and played an important part in the Mysteries and the birth of Zeus. At the Eleusinian Mysteries, which were influenced both from Crete and from Asia Minor, the swine constituted the most efficacious and purificatory sacrifice; the Greek purification for murder or homicide involved the sacrifice of a swine, and the Lydian ceremony is said by Herodotus (i. 35) to have been identical with the Greek (which may be taken as proof that the rite was carried from Anatolia to Greece). In Lycia a swine is represented on the Harpy Tomb, under the chair on which sits the heroized or deified dead. Small pigs of terra-cotta or porcelain have been found in Lydian graves.[*] The older and general Phrygian custom had at least no horror of swine.[†]

[‡] *Ταῦρος δράκοντος καὶ πατὴρ ταύρου δράκων*, 'the god-bull is father of the god-serpent, and the serpent of the bull,' was a formula of the Phrygian Mysteries (Clemens Alex. *Protrept.* ii.).

[§] See Roscher's *Lexikon der gr. u. röm. Mythologie*, s.v. 'Lairbenos' (Drexler), and Ramsay, *Cities and Bish. of Phrygia*, i. p. 138 f. See also below, (8).

[*] Ramsay, *Histor. Geog. of Asia Minor*, p. 32.

[†] *Ib.* p. 32.

But this Anatolian custom was interfered with by a new influence, namely, the Semitic (or perhaps we ought to say simply the Jewish) and Egyptian abhorrence for the swine.[*] This ruled, at least in later time, at the Pontic Komana, where a swine might not be brought into the city, much less into the sacred precinct or temple of the goddess.

Here we are brought in view of two opposing and irreconcilable ideas; and our view is, in all such cases, that these contradictory ideas originate from different races (or, in the case of Jewish religion, from the influence of a new step in development). The attempt has been made to interpret the abhorrence and loathing of the swine as arising naturally out of the extreme awe and fear with which it was regarded on account of its high supernatural powers; but, on such a principle, anything can be evolved out of anything. There are two opposite conceptions of the swine.

According to the one, the swine is a sacred and purifying animal; it is in close relation with the Divine nature, and the human worshipper uses it to cleanse himself so that he may be fitted to come into relation with the Deity—sacrificed as the Eleusinian and Eteocretan prelude to initiation or marriage [identical rites, § VIII (1)]; not eaten except after sacrifice (see (8), (9), and Ath. 376).

According to the other conception, the swine must not be brought near the Deity nor permitted even to approach his neighbourhood, any one who has touched a swine is unclean, any one who habitually comes in contact with swine is a permanent outcast. We refuse to consider that these two opposing views have a common origin: they belong to two irreconcilable modes of thought. The abhorrence of the swine we explain on grounds of health: in a hot country the flesh of the swine is not wholesome, and in the development of thought and religion in Egypt and in Palestine this was observed and constituted into a religious law for the benefit of man.

It is said that the Egyptians once a year sacrificed a swine to the moon and Osiris, and ate its flesh; and in Is 66^{17} we hear of Jews who met secretly to eat the flesh of swine and mice as a religious rite. But these are natural examples of the persistence of the old religious facts in secret or on some exceptional occasion: the new and higher religious idea cannot wholly extirpate the ancient idea: the old superstition has a hold on the souls of men, and usually something is conceded to it. Only, the Hebrew prophets would concede nothing, but insisted on the absolute and utter abolition of the old superstition: that is one of the numberless points of distinction between Hebrew religion and all other ancient religions which competed with it.

The principle laid down in the preceding paragraph is one of great importance in our subject. In the religious history of the Greek tribes we observe numerous cases in which the religious idea of one tribe overpowers that of another when the two tribes come together. But a religious fact rarely, if ever, dies utterly: though the weaker, it produces some effect on the stronger, and one of the commonest effects was that a secret and mysterious performance of the submerged religious ritual was permitted at long intervals.[†] Thus human sacrifice seems to have been allowed to continue in rare acts of ritual, many centuries after the general feeling of the Greek tribes had condemned the idea of sacrificing a human being. Another way in which the submerged religion maintained itself was in the superstitions of the lowest and least educated classes, and in rites which were rejected as magical and irreligious by the higher thought of the people.

The rules of impurity connected with the swine are also a subject of great difficulty; and here again the difficulty seems due to the interlacing and intermixture of different religious ideas, no one of which has made itself absolutely supreme. Thus, for example, the statement is sometimes made that the worshippers of the Lycian and Anatolian god Men Tyrannos abstained from swine's flesh; yet the swine was intimately connected with the Divine power in Lycia (as we have seen).

Out of these facts a very elaborate theory that men abstained from the sacred animal as being holy can be spun. But the abstaining from swine's flesh in the ritual of Men Tyrannos was merely a very brief temporary act of purificatory preparation, as is obvious from the context,[*] and did not amount to a permanent rule of avoidance, such as obtained in Egypt and Palestine. The rules of preparatory purification in the later period (our authority belongs to the time of the empire) were much influenced by analogy; and this case proves nothing as to the real and original theory ruling in the worship of Men Tyrannos.

The abstinence from swine's flesh, said to have been practised at Pessinus in Phrygia, was, perhaps, a much more serious and real fact. It would hardly have been mentioned by Pausanias had it been a mere act of brief occasional purification: he records it, evidently, as standing in marked contrast to the ordinary usage of Western Anatolia (of which he was a native, and whose people he had chiefly in view as his readers). The custom of Pessinus is to be explained as due to Semitic influence gradually spreading westwards over Asia Minor.

The sacred character of the swine in early Anatolian and Greek ritual was due, beyond all doubt, to its being considered as a symbol and representative of the Great Mother. It was the domesticated sow, with her teeming litters of young, that suggested its holy character. Thus the holiness was founded on similar grounds to that of the bull or cow and the sheep and the goat: the animals which were most useful to man were esteemed sacred, as the gifts of God. There can hardly be any doubt that the method of domesticating and caring for these animals was considered to have been revealed by the god, who continues to be their patron, and whose beneficent power towards man is manifested in them: see (8).

The *wild boar*, which is sometimes connected in mythology with the Divine nature, would derive his sacredness from a different cause, for he must be classed with the wild animals which are impersonations of the Divine strength and swiftness and might: see (10).

(7) *The bee.*—Most instructive of all in regard to the Divine nature is the bee. The bee was the sacred symbol at Ephesus, *i.e.* the bee was the type of the goddess. A large body of subordinate priestesses connected with her worship were called *melissai*, the working bees; and a body of officials (who were originally of priestly character)[†] were called *essenes*. Now there was a mistake, common in Greece, with regard to the sex of bees; the queen bee was thought to be a male, and called *essen* or *βασιλεύς*. But, when we look at the Ephesian cult, we find that it was founded on

---

[*] See Wiedemann, *Herodot's Zweites Buch*, p. 85. Origen, *c. Cels.* v. 49, speaks of the Egyptian priests alone as refraining, which implies a relaxation of usage.

[†] See below, § VII (2).

[*] The authority is a pair of almost identical inscriptions frequently published: Dittenberger, *Sylloge*, No. 379, *CIA* iii. 73, 74; Foucart, *Assoc. Relig.* p. 219. The worshipper must purify himself ἀπὸ σκόρδων καὶ χοιρεων καὶ γυναικός, but the purification was a matter of a day, and after washing from head to foot the worshipper could enter the god's presence the same day: the eating of garlic and swine's flesh, like the third fact, is implied to be the habitual and ordinary way of life of the worshippers.

[†] See, *e.g.*, Pausanias, viii. 13, 1.

a true knowledge. The goddess was the queen bee; and her image makes this plain. Her body has only the slightest resemblance to a human body, but has the outline of the body of a bee. What are ordinarily called *mammæ* on her body are not so, for no nipple is indicated: they really represent eggs, and the mass of the body is simply a great ovary or skin filled with ova. The goddess is literally indicated as the one great mother of all life in the community. The *essenes* are the male bees or drones, who do no work. The *melissai* are the female and working bees, in whom the sexual character is undeveloped (see § VI (3)). The resemblance between the constitution of the swarm or community of bees and that of the primitive Anatolian community, as described in § VIII (3), (7), is striking.

The resemblance is even more striking in respect of the life-history of the Mother-Goddess and of the queen bee; but this will be treated in § VI (3). Taking this in conjunction with the preceding remarks about the Divine power and life under the bee form, we see clearly that the place of the bee in the cultus implies such knowledge of its habits as would be impossible without careful observation and intelligent methods of treatment. This is merely one example of the wisdom and skill applied to the utilization and domestication of animals in the ancient Anatolian theocratic system. The arts of domestication were rooted in religion. The remarkable practice of self-mutilation as a religious act, characteristic of Phrygian worship (§ VIII (4)), seems clearly to have originated from the rule (divinely given, as was supposed) of mutilating in the same way oxen and other domesticated animals, and from the natural mutilation of the bee (§ VI (3)).

(8) *The sacredness attaching to domesticated animals.*—It is obvious that the sacred character of the animals which have hitherto been mentioned rests ultimately on their domestication and their usefulness to man. This suggests that some of the arts of domestication may have originated on the great Anatolian plateau, where the conditions are exceedingly favourable,[*] and where the existing traces show that a large population and great cities were found where now for many centuries only a very sparse sprinkling of nomads and a certain number of small villages have existed. That a high degree of skill was reached in the domestication of animals is also certain. Valuable breeds of animals were artificially produced by intelligent cross-breeding. Of these the Angora goat still survives; and the secret of its breeding is still carefully treasured and concealed.[†] That the secret of preserving the purity of the wool lies in breeding is pointed out elsewhere,[‡] on the authority of practical experience; and the natural probability of this explanation (which has never been mentioned elsewhere) is admitted as obvious by some high authorities to whom it has been mentioned. But the breed of the Colossian sheep with its glossy violet fleece, and the glossy black-fleeced sheep of Laodicea, have entirely disappeared; and the reason is that those artificial breeds were through carelessness allowed to degenerate.[§]

(9) *Domesticated animals as sacrifice.*—No doubt need be entertained, though the fact cannot be definitely demonstrated by extant evidence, that the life of all domesticated animals was sacred. Their existence was so important to man that it must be guaranteed and protected by the strongest religious sanctions. To slay the ox or the sheep or the goat or the swine was an act of impiety. Among the Phrygians it was a capital crime to slay an ox used in ploughing.[*]

Yet there can be equally little doubt both that the flesh of the animals was wanted as food and that they were needed as offerings in sacrifice. Here two religious laws come into collision with one another. A quaint and evidently very archaic ceremony, which was preserved among the people of Athens (a race characteristically autochthonous and Pelasgian), illustrates the way in which the difficulty was met. The ox for sacrifice was selected by a sort of chance, the one being taken which first came forward out of a herd to eat the corn scattered on the altar near which the animals were driven. The ox thus selected was slain for the sacrifice; but the ministers who slew it with axe and knife fled, and in their absence the weapons which had killed the sacred animal were tried and condemned, and punished for sacrilege by being thrown into the sea. The flesh of the ox was eaten; its skin was stuffed with straw, and the stuffed animal was harnessed to a plough.[†]

The character of the ceremony, as an expiation of the apparent crime of slaying the sacred animal, is clear. The god, in his kindness to man, has shown how the guilt may be avoided or diverted, and the flesh of the animal can be enjoyed by man without suffering the due penalty. The name of the sacrifice, τὰ Βουφόνια, 'the ceremonies connected with the slaying of the ox,'[‡] makes the meaning of the whole clear. Probably, in the origin, the killing of an ox (not a common act in agricultural life), perhaps even the killing of any sacred animal, was always accompanied with that elaborate ceremonial, and made a religious act. The ox was induced to commit an act of impiety in eating the sacred barley and wheat on the altar; any guilt involved in slaying him was visited on the murdering weapon; and, finally, the pretence was gone through that the ox was still ready to be used for its ordinary agricultural work.

The attempt has been made to explain the *Bouphonia* as the slaying in the harvest season of the ox which represents the spirit of vegetation: the ox, as the Divine being who constitutes the life of the crop, is supposed to be slain at the harvest (as Lityerses in Phrygia was slain by the sickles of the reapers). This attempt is supported by an incorrect interpretation of the word *Bouphonia*, as 'the slaying of the ox.' The explanation is forced and unsatisfactory, and may be considered as an example of the extreme to which excellent scholars are sometimes led in trying to adapt a theory, which furnishes the correct explanation of many usages, to other usages which it does not suit.

A Phrygian inscription throws some light on this subject. The goat is there mentioned as sacred. A certain person confesses to have sinned because he had eaten the flesh of the goat, though the animal had not been offered as a sacrifice with the proper ceremonial: he atones for the sin, and acknowledges the justice of the penalty with which the god has visited him.[§]

[†] The accounts of the ceremony vary a little as regards details: see Mr. J. G. Frazer's *Golden Bough*^{2}, vol. ii. p. 294 f.

[‡] This sense of the plural is typical and common: Διὸς γοναί, 'the circumstances connected with the birth of Zeus,' and so on. A false interpretation of the word Βουφόνια is alluded to in the next paragraph.

[§] See *Cities and Bishoprics of Phrygia*, i. pp. 138, 150. The present writer has there adopted an explanation suggested to him by Prof. Robertson Smith, which would take the crime to consist in eating goats' flesh at all. But it is more probable that the crime lay in eating it without first offering the animal in sacrifice. Either of the two different senses given to ἄθυτος in the two explanations is grammatically possible.

(10) The *lion*, which is so often associated with Cybele, is also found in art as the supporter on which a deity stands. Like the bull, and doubtless for the same reason, the lion was taken as a common ornament on tombstones—originally with a protective meaning, later as a mere conventional figure—especially in Phrygia and Pisidia.[*] Similarly, the *stag* was the regular accompaniment of Artemis, and appears carrying a deity on an early Anatolian seal.[†]

There can be no doubt that the sacredness of these two animals, the lion and the stag, springs from their being the most typical representatives of wild natural life in its strength and its swiftness. These two typical wild animals are connected intimately and characteristically with the Divine nature as female, *i.e.* with Cybele or Artemis. That side of the Divine nature bulked far more largely in old Anatolian religion than the male side.[‡] The Great Goddess, the All-Mother, plays a much more characteristic and commanding part than the god, who is often pictured as her attendant, and as secondary to her. The life of nature is commonly represented as female. The spirits of the trees and mountains, the lakes and forests, are the Nymphs, described often as if they led a sexless, separate existence, though there are not wanting examples of the other conception, which brings them into association with the Satyrs or Sileni and makes the reproduction of the life of nature spring from the relations between the male and the female divinities.

Accordingly, it is a pair of lionesses, not of lions, that appear on the most ancient Phrygian Lion-Tombs and on the Gateway at Mycenæ. But the sex is not always emphasized; and artistic considerations probably contributed to determine the ultimate preference for lions and stags, so that these were regularly represented as companions even of the goddesses Cybele and Artemis: the mane and the horns made the male animals more picturesque and striking types.

But in none of these cases is there any universal rule of sex. If the male Divinity is symbolized by the ram or he-goat, there are certain to be some cases in which the female Divinity must be represented by the female animal in order to carry out the mythological tale or the cult-act. These less usual and less typical instances, which need not be quoted in detail, do not really interfere with the general rule of sex which has been stated.

(11) The *serpent*, however, was pre-eminently the sacred animal in Anatolian and Greek religion. It dwells in the bosom of the earth, the Great Mother. It appears and disappears in a mysterious way. In many Greek temples, and especially in the temple of Athena Polias on the Acropolis at Athens, a sacred serpent dwelt: it was fed by the priests, and considered to be a sort of embodiment or guarantee of the Divine presence in the temple. This idea, however, was below the religious level of the highest Greek literature, in which it does not make much appearance; but it played a great part in popular belief and superstition, as well as in actual ritual. Especially, a serpent with large cheeks, called *pareias*, which was believed to be friendly to man and hostile to dangerous serpents, was considered holy, and used in the ritual of the Mysteries. In the sacred drama enacted in the Mysteries the god in the form of a serpent became father of the god-bull by Kora or Persephone his daughter (see the quotation in note to § III (2)); and the initiated fondled a *pareias* serpent in imitation of this.[*] Hence the idea that human life is of Divine origin took the form, in regard to some special heroes, (*e.g.* Alexander the Great) that a serpent was their father.

The idea that the serpent is a representative of the Divine life appears in various forms: a serpent was intimately associated with, and almost the embodiment to human eyes of, Æsculapius or Asklepios, of Sabazios, of Zeus Meilichios, and in general of most heroic and dæmonic conceptions, and of the departed dead. Naturally, the animal, which often took up its residence in graves, was regarded by popular superstition as the embodied spirit of the dead; and, when a serpent took possession of any grave in this way, there was a general tendency to regard the person there buried as being peculiarly active and efficacious, *i.e.* as a hero.[†] The dead man, again, has become identified with the Divine nature; and the serpent therefore is peculiarly representative of the Divine nature in its Chthonian aspect, *i.e.* as connected with the world of death. The Agathos Daimon, a Chthonian power, associated with the earth and the riches of the earth, is represented by a serpent (sometimes with a human head). See B, § V.

The worship of the god-serpent at Hierapolis and Laodicea in the Lycus valley[‡] has played some part in the formation of Christian legend: the sacred serpent is there called the Echidna, and is described as the powerful enemy of St. John and St. Philip.

The belief in the sacredness of the serpent was practically disregarded by the majority of Greeks in the classical period, and despised as a superstition unworthy of an educated person; but some peculiarly sacred serpents, such as that of Athena Polias, retained a hold on general opinion. Ælian mentions that, of all the Peloponnesian Greeks, only the Argives refrained from killing serpents.

(12) *Sacredness of wild animals.*—Obviously, there is not the slightest appearance that the sacredness of the above-mentioned wild animals in this early religion was founded on dread of their power, and anxiety to propitiate them. The facts as stated are absolutely opposed to that opinion. Moreover, in the region of Asia Minor which we take to be the centre and origin of its religious ideas, the great central plateau, wild animals can hardly have been a serious danger within historical times. The country is open, and there is such total absence of cover[§] that beasts of prey cannot have existed in any numbers. The Austrian traveller Sarre quotes the statement of Von Moltke, that the great plains are the most perfectly level known in the world. As a rule, they are and have been for thousands of years so bare and, apart from human work and provision, so unproductive, that little wild life, and none of the greater savage animals, could be supported in them. In such a level country deer would be a difficult prey; and when human skill wrought out some irrigation, found water, where it was not accessible on the surface, by sinking very deep wells, and introduced great herds of domesticated animals, the wild beasts which were able to prey on sheep or oxen

---

[*] For Phrygia, see *Journal of Hellenic Studies*, 1882, etc. For Pisidia, see Sterrett, *Wolfe Expedition*, pp. 91–93. The present writer has seen many other Pisidian or Isaurian examples. Rohde (*Psyche*, p. 679) thinks that the lion was used as denoting the fourth grade in Mithraic initiation, and Cumont (*Monum. relat. au Cult de Mithras*, p. 173) inclines to agree with him. This cannot be correct. It leaves the sex out of account: see the two following paragraphs.

[†] Perrot, *op. cit.* iv. p. 772.

[‡] See below, § VI.

[*] Σαβαζίων γοῦν μυστηρίων σύμβολον τοῖς μυουμένοις ὁ διὰ κόλπου θεός· δράκων δὲ ἐστιν οὗτος, διελκόμενος τοῦ κόλπου τῶν τελουμένων (Clemens Alex. *Protrept.* ii. 16; cf. Arnobius, v. 21; Foucart, *Les Associations Religieuses*).

[†] Strictly, every dead man was a hero; but such ones were heroes *par excellence*.

[‡] Ramsay, *Cities and Bishoprics of Phrygia*, i. pp. 51, 87.

[§] The central plains were known as *Axylon*, the treeless region, two centuries before Christ, in the first glimpse of them that the records permit; and other considerations show that this state had existed for a long time previously.

or goats could shelter themselves only in the broken ground of the surrounding mountains,[*] and in some of the isolated mountain peaks of the plateau (for others of those plateau mountains are singularly bare and shelterless). Thus the greater beasts of prey must have been from a very remote period few, and regarded in practical life as an object of the chase and of sport to the rulers and the nobles (in whatever form nobles existed); and it is probable that this condition of things fostered the tendency to regard them as sacred by some sort of religious substitute for a game law.

Again, serpents are neither very numerous nor at all dangerous. Various quite harmless species occur in moderate abundance, and a few are said to be venomous, but death from the bite of a serpent is practically unknown in the country. Yet the scantiness of the population in recent centuries, and the small extent of agriculture, have given full opportunity for wild life to increase to its natural limits.

Accordingly, for a period of four thousand years or more, wild animals in the plateau must probably have derived their sacredness from other considerations than the terror and danger that they caused; and the evidence of religious facts is clear that the origin lay in their noble qualities of strength and swiftness, and in their association with the Divine nature living free in the wild and mountainous districts. See also above, (10).

IV. SACRED PLACES.—(1) *Mountains.*—If a stone could be holy, much more could a great rock or a mountain be regarded as the home or the embodiment of the Divine power.[†] Mount Argæus, the lofty mountain which towers above Cæsarea in Cappadocia to the height of nearly 13,000 feet, was regarded as a god or as an image of the god, and by it men took a solemn oath: on the coins of Cæsarea it is the regular type, taking the place which the image of a god occupies in most coins of Hellenic or Hellenized cities. On coins of Prostanna in Pisidia, Mount Viaros is represented in a similar way, and it, too, was evidently regarded by the people who dwelt near it as the holy mountain. The identification proposed in the *Historical Geography of Asia Minor* (p. 407) for Mt. Viaros rests chiefly[‡] on a certain similarity in the situation of the lofty peak, which towers over Egerdir and the great lake called by the ancients Limnai, to Argæus rising out of the level Cappadocian plateau.

Then in general it is probable or certain that the Great God was adored on the tops of other mountains. An example from another Cappadocian hill is proved by an inscription found on the summit.[§] The lofty mountain, now called Hassan Dagh, 10,000 feet high, north-west from Tyana, seems to have borne the same name, *Argæus*, as the Cæsarean mountain; and in that case it probably had a similar sacred character. The Bithynians worshipped Zeus under the names of Papas ('father') and Attis[‖] on the tops of mountains.

In the rock-temple at Boghaz-Keui, one of the figures, evidently a personage of great importance on account of his size,[¶] is represented as standing, or rather striding, with his feet on the summits of two mountains. The Divine nature rests on the mountains, and is at home on their summits, just as, in other representations on the walls of the same natural temple, several deities stand on their own sacred animals.[*] Again, in that same rock-temple, several of the sacred animals stand with their feet placed on the top of high squared pedestals; and the so-called 'Niobe' on Mt. Sipylus, which is beyond doubt an image of the goddess Cybele, sits with her feet resting on two similar pedestals.[†] Those pedestals are probably to be interpreted as holy pillars (such as those at Gnossos in Crete, pictured in Mr. Evans' article, *Journal of Hellenic Studies*, 1901, p. 110). The present writer formerly interpreted them as mountains;[‡] but in the art as practised at Boghaz-Keui the type of the sacred mountain was rounded in form and broken in outline, and it seems hardly permissible to suppose that two types so different were employed there simultaneously to indicate the same conception.

The truth may indeed probably be that the sacred stone when unshaped and rude derived its holiness, in some cases, from being regarded as representative of the sacred mountain, the part standing for the whole (just as the bull's head stands for the god-bull, § III (2)), or the miniature for the vast reality. The *omphalos*, on which Apollo sits or stands, would then be a sort of miniature of the mountain which is his Divine abode.

It seems, at any rate, beyond doubt that originally any great mountain, such as Mt. Argæus, was considered sacred, because on it there rested a vague formless Divine presence and power, whose might dominated the country round. This becomes all the more clear when one considers the sacred caves: see the following paragraph.

(2) *Sacred caves and mountain glens.*—Many sacred caves are known: as, for example, Steunos, the cave of Cybele, near Aizani, described by Mr. J. G. C. Anderson in *Annual of British Sch. Ath.*, 1897–8, p. 56; the cave of Leto or Cybele, beside Hierapolis, described in *Cities and Bishoprics of Phrygia*, i. p. 89; the cave of Zeus on Mt. Dicte in Crete, recently excavated by Mr. Hogarth; etc. All these are caves in the mountains, lonely, far from cities, full of the impressiveness and religious awe of wild and majestic nature. Along with caves in the stricter sense we may class deep gorges and glens among the mountains, in which holy places of Anatolia were often situated. They are roofed with the sky, instead of with a covering of rock.

In those caves and gorges the Divine power was not worshipped in any visible embodiment. The human mind was impressed by the vague formless presence of the Divine nature in such solitary places, and went there to worship. So, in modern times, at the head of the deep romantic gorge of Ibriz, where the great springs of the river of Cybistra-Heraclea flow forth from the rock in surroundings of impressive grandeur, the rude peasants from the neighbouring village come and tie a rag to the tree by the great fountain; and, if you ask the reason why they do so, they reply in simple phrase, '*Dede var*,' which is the nearest approach their untrained thought and scanty words can make to expressing their sense of present Divine power.[§] In ancient times men had the same thought, that the Divine power was clearly manifested for the benefit of man at Ibriz; and they expressed it similarly by votive offerings, as we may be sure. But they expressed it also in more civilized and artistic ways; and above all other forms they expressed it in a great rock sculpture, showing the god presenting his gifts of corn and wine to the king of the land. The river makes this part of the dry Lycaonian plain into a garden; and the god has given the river, making it flow forth from his holy mountain at the head of that deep gorge, which is like a vast cave open to the sky. The king is dressed in gorgeous embroidered robes: the god wears a peasant's dress, for he is the impersonation of the toiling cultivator, who by patience and faith adapts nature to the benefit of man. Nowhere is the spirit of Anatolian religion expressed so unmistakably as at Ibriz. In the words in which St. Paul appealed to a simple audience of Lycaonians, the fountains of Ibriz are a witness to the Divine power, that it did good and gave men fruitful seasons, filling their hearts with food and gladness (Ac 14^{17}). The speaker knew his audience, and caught the exact tone of religious feeling that sounded in their hearts.

---

[*] The present writer has there seen bears and boars often; panthers and leopards are reported to exist.

[†] ὄρος Καππαδόκαις καὶ θεὸς καὶ ὅρκος καὶ ἄγαλμα (Max. Tyr. viii. 8); graves on hill-tops, Puchstein, *Reisen in Kl.* p. 228.

[‡] The order of Hierocles and the established identification of surrounding cities place Prostanna somewhere there.

[§] Ramsay, in *Bull. Corresp. Hell.* 1883, p. 322.

[‖] Surely *Attis* must mean 'king' or 'prince.'

[¶] Perrot, *Histoire de l'Art*, iv. p. 639.

[*] See above, § III: the figures are shown in Perrot, *Histoire*, iv. p. 637.

[†] *Journal of Hell. Stud.* 1882, p. 39.

[‡] As quoted in the previous note.

[§] *Dede* doubtless means originally 'ancestor': it is the name applied to those heroized personages worshipped in the *Turbes* common all over the country: the *Turbe* always contains or is built above the grave of the *Dede*, who is sometimes a known historical figure, sometimes a mythical personage, sometimes one whose very name has been forgotten, and who is simply 'the *Dede*.' See below, § VIII (5).

The rock-temple at Boghaz-Keui, which has been so often mentioned above, was of this class. A mile away from the great city, up a gorge in the side of a rocky hill, two chambers with vertical walls cut in the rocks (the human hand having assisted the natural formation of the recesses), entirely open to the sky, and connected by a narrow passage, leading from one to the other, constitute the temple and place of worship.

To the same class belonged the great Cappadocian sanctuary of Komana, in a glen of the Anti-Taurus, where the river Sarus flows in its winding channel deep down among the lofty mountains. To the same class, too, belonged one of the holy places of Ephesus. Besides the familiar and famous home of the Ephesian Artemis, which lay out in the open plain near the city and close to the isolated holy hill near the middle of the Cayster valley, there was another seat of her worship in a glen among the mountains that bound the valley on the south. This more sequestered place retained its sanctity alongside of the more famous temple. The account given of it has been transformed by adaptation to the later Greek mythology of Artemis; and the true old Anatolian aspect can only be guessed at. But there the birth of the goddess had occurred: there an annual festival and assembly (*panegyris*) was celebrated: there were both an ancient temple with archaic images and a later temple with Greek statues: there an association of Kouretes, evidently a society meeting in the worship of the goddess,* called by an ancient Anatolian and Cretan name, had its centre and celebrated certain mystic rites. And when the religion of Ephesus had been changed to a Christian form, the city had not merely the Church of St. John beside the great temple in the plain and the church called Maria in the city (where the Council of A.D. 431 was held): † there was also a holy place of the Mother of God among the mountains on the south of the plain (to which the Greeks of the district continued to make an annual pilgrimage down to the present day, calling the place Panagia Kapulu, the Virgin of the Door).‡

(3) *Sacred springs and lakes.*—In the holy place of Ibriz we have found that the awe attaching to glens amid the mountains was inseparable from the similar religious emotion suggested by bountiful springs. In that thirsty country the most fertile soil without water is a desert; but if water is given or brought it becomes a garden. A fountain, then, was the gift of God; and the modern name applied to such great springs, *Huda-verdi* ('God hath given'), is probably a mere Turkish version of an ancient Anatolian expression. A fine spring* which rises in the undulating plain on the east side of Lake Caralis (Bey Sheher), and flows down to the lake, is overhung by a series of ancient sculptures of obviously religious character, which are carved on the side of a small chamber built at the edge of the springs, so that the water seems to run out from under the huge stones of which the nearest wall of the chamber is built.

The fountain was the gift of God. The belief is distinctly different from the Greek idea of the Naiad nymph who lives in and gives life to the spring; and yet the two ideas readily pass into one another. The Greek mind was filled with the sense of joy and life that the spring suggests; the spring was the life of a god; and the life of the spring in the Greek anthropomorphic imagination was pictured as a Divine maiden, human in form and character and emotions, but eternal and ever young. The Anatolian mind regarded the spring as Divine, because given by God, and at the same time it was conceived as the home and embodiment of Divine life, the proper object of worship, the mother of the life of the fields which derive their fertility from its waters, and ultimately, too, the mother of the heroes and men who are born beside it and fed from its produce. This last idea appears still in its earlier form in *Iliad*, ii. 865, where the Lydian chiefs are the sons 'to whom the Gygæan lake gave birth.' But from this it is an easy step to the Greek idea of the Naiad; and we see that the step has been taken in *Iliad*, vi. 22, where the Naiad nymphs in the Troad bear two noble sons to the hero ox-herd. The ultimate cause of sacredness, viz. purity and use to man, appears in the Italian prohibition of bathing in sacred springs or the sources of aqueducts (Plin. *Ep.* viii. 8. 20. 5; Tac. *Ann.* xiv. 22; Sen. *Ep.* 41).

When the spring was of hot or medicinal water, its beneficent qualities and God-given origin were equally or even more conspicuous. Many such springs are known to have been the scene of a special worship, and doubtless all were so. The Divine power was clearly seen in them.

(4) *Development of the sacred place into a religious centre or Hieron.*—Naturally, some of the sacred places became much more famous and important than others. The circumstances that produced such fame and importance belong to the history of each individual locality. It was the needs, the numbers, and the nature of the surrounding population that made some shrines greater than others. Holy places in very secluded situations could hardly become very important as religious centres, though devotees often visited them and made offerings. The great *Hiera* were usually connected with some centre of population, where the primitive form of theocratic government and the needs of the ritual (on which see § VIII (7) and § VII (9)) caused the growth of a large establishment, whose influence became recognized far beyond the immediate circle of its original worshippers. Such, for example, were the Pontic and the Cappadocian Komana, the Galatian Pessinus, the two *Hiera* of the Cappadocian Zeus at Venasa and at Tyana, the *Hieron* of the Milyadic Zeus or Sabazios, mentioned by Ælius Aristides (which is certainly the one that is described in considerable detail in the writer's *Cities and Bishoprics of Phrygia*, i. ch. ix., though the identification is not there mentioned), the *Hieron* of Leto and Lairbenos at Dionysopolis and Hierapolis (*ib.* ch. iv.), and many others.

† ἐν τῇ ἁγιωτάτῃ ἐκκλησίᾳ τῇ καλουμένῃ Μαρίᾳ: see above, vol. i. p. 725.

‡ The Roman Catholics of Smyrna have taken up this place during the last ten years, calling it the house where the Virgin lived after St. John brought her to reside at Ephesus.

* Eflatun Bunar, 'Plato's Spring': *Hist. Geogr. As. Min.* p. 39.

It is not the case, however, that those great *Hiera* were later in growth than the cities beside which or in which they were situated. In many cases it was the *Hieron* which caused the city to grow by attracting population. But a large population required a suitable home, and the town where people should dwell could in many cases not be situated exactly at the holy place, and must be placed at some distance. At Ephesus it is highly probable that the place among the mountains on the south of the valley where the goddess was believed to have been born, and where *Mysteria* were regularly performed, was the true old holy place; but the *Hieron* grew in the open valley, beside an isolated hill, which formed a convenient centre for the growing population.

(5) *Sacred places in the religion of Greece.*—It is obvious how entirely pre-Hellenic this religion was, so far as we have yet described it, and how entirely unlike it was to the religion that we are familiar with as Greek. Not a single feature which we regard as characteristically Hellenic is apparent in it. And yet, to everything that we have described, parallels can be cited from religious foundations in the strictly Greek lands. Behind Greek religion proper there lies, far away back, that old aniconic worship in mountain solitudes and mysterious caves, or on mountain tops, like that of Hera on Mount Ocha in Eubœa, or of Zeus on Mount Lycæus in Arcadia; and the most barbarous of the rude symbolic images of Anatolia, compounded of parts of animals, are not more absolutely un-Hellenic than the Arcadian horse-headed Demeter. That early religion of the Greek lands seems to have been the religion of the aboriginal race who elaborated the Mycenæan civilization of Crete and the Ægean Islands, and, above all, of the Argolic valley and other parts of the West Ægean coastland, the people whom Prof. W. Ridgeway would identify as Pelasgian. On this ancient foundation the religion of later and more artistic Greece was gradually built up: see below, B, § I.

V. Relation of the original aniconic Religion to Image-Worship. — (1) *Coexistence of the two kinds of worship.*—We have spoken of that primitive religion as aniconic, as reverencing the Divine nature without giving it any definite form; and yet we have been forced often to speak of the rude images in which that primitive conception of the Deity was expressed. The truth seems to be that the inconsistency, in which we find ourselves involved, lies in the religion from the beginning. Probably it was at no time absolutely aniconic and impersonal: doubtless there was always in the popular conceptions a deep-seated and unconquerable tendency to give form to the Divine nature, to regard it as envisaged in something like human or animal form. The anthropomorphic side alone was steadily developed in the growth of Hellenism. In the Anatolian religion the aniconic side and the barbaric bestial envisagement both continued strong and important, until they were forced into the background by the invasion of the formed and completed Hellenic civilization, with its philosophic scepticism about the old religion in theory and its anthropomorphic orthodoxy in practice. But even then those native characteristics were far from being extirpated. They persisted in the form of superstitious and secret mysterious rites, and, for the most part, even the educated tolerated them and accorded a moderate amount of recognition to them.

Again, even in the latest period, when image-worship was apparently universal, the old, vague, impersonal conception of the Divine nature was not extirpated, but remained still vigorous. No inconsistency was felt between the aniconic and the iconic personal idea. All the stages in this long process of development could perfectly well exist at the same time. Two or three centuries after Christ, it is evident from many inscriptions that the popular mind often thought of and spoke about 'the God,' or 'the just God,' or 'the pious and just God,' as the vague, formless Divine power. The people were all acquainted with and reverenced both the purely human representations of the Greek religious art and the barbarous symbolic images of primitive Anatolian worship. But still their mind was also occupied with a mysterious power behind them.

Similarly, we must recognize that from the earliest stage the germs of image-worship and anthropomorphism were not wanting.

(2) *Votive images and representations of the Deity.* —The need for some outward and material representation of religious conceptions seems to have been felt especially in approaching the Divine nature with prayers and vows, and in making acknowledgment of and expiation for neglect or disobedience. The worshippers came to the holy place, cave or grove or mountain or spring or stone, and they desired to leave there either some token of their reverence or some reminder of their own person and their own needs, or perhaps both. In proof of their reverence they dedicated offerings, either the sacred emblems and symbols of the Divine power, *e.g.* axes to the god with the axe in the Dictæan cave of Crete, or representations of the home and nature of the Deity. The most characteristic of those representations were the shrines (*ναοί*), on which see below, (3). Further, in evidence of their gratitude when they paid their vow, or of their penitence when they atoned for some neglect of the Divine will and power, they often left representations of themselves as they had been aided by the god, or of the part of the body in which they had suffered punishment, just as the modern peasant ties a rag from his clothing on a sacred tree beside the old sacred fountain.

(3) *Shrines* (*naoi*). — Most typical among the votive offerings of Anatolian religion are the shrines or *naoi*, which filled so large a place in the practical elaboration of Artemis-worship in Ephesus. The *naoi* of Artemis are described at some length in vol. i. p. 606. Here we have only to allude to the origin of this representation. We seem to find the oldest known form of the *naos* in the colossal figure of the so-called Niobe in Mt. Sipylus, which is indubitably an image of the goddess (whether Cybele or Artemis, two names of the one ultimate Divine nature), and which is probably the ancient statue of the Mother-Goddess described by Pausanias as the work of Broteas. This image we take to be rather a votive representation than intended as a cultus-statue. Its conspicuous situation in a perpendicular rock at the top of a very steep slope seems to prove its votive character: it is a token of the piety of the dedicator, not an image set up to be the object of worship for others, though doubtless some cultus would be established here by the dedicator as part of his pious act.

Other very archaic examples of the same character are probably the Cybele between her lions at Arslan-Kaya,* and the little figure of the goddess on the outside of the wall of the Midas city.†

The thought which the dedicator desired to express was that of the Mother-Goddess in her sacred cave; he imagined her as of vaguely-human form, for she to whom man owes his birth cannot be wholly unlike the human form: he tried to give her the accompaniments and emblems suited to express her power or her chosen ritual, lions or *tympanon.* This primitive idea, worked on the rocks, was developed in numberless small votive works in terra-cotta or marble or silver; and many examples of those in the cheaper materials are found at most of the seats of Anatolian worship. See also vol. i. p. 606.

VI. THE DIVINE IN HUMAN FORM AND CHARACTER.—If various animals seemed suitable expressions or embodiments of the might of the Divine nature, the human analogy most of all affected the mind, and commended itself as proper to convey some idea of the Godhead. That the anthropomorphic tendency existed from the beginning alongside of other forms of expression which have been described, seems indubitable (just as the aniconic idea has been traced as surviving even in the most developed iconic period); and it has given rise to far the largest mass of myth.

(1) *The Great Mother.*—The characteristic which specially distinguishes the Anatolian religion is its conception of the Divine Being as the mother, not the father, of mankind. This feature runs through the social system and the history of the land. Strong traces of *Mutterrecht* have been observed and collected by several writers. Even in the Græco-Roman period, when those traces had almost disappeared from the cities owing to the spread of Greek manners, women magistrates are very frequently alluded to.

The life of man was conceived in that old religion as coming from the Great Mother: the heroes of the land were described as the sons of the goddess, and at death they returned to the mother who bore them. The god, the male element in the Divine nature, was conceived as a secondary figure to the Great Mother; he was recognized as only an incidental and subsidiary actor in the drama of nature and of life, while the permanent feature of the Divine nature is its motherhood, as the kindly protecting and teaching power. In later development, under the influence of external conditions and foreign immigration, more importance (especially in the exoteric cult) was attached to the god: see § VIII (7).

That conception of the Divine power was prompted and strengthened by the physical character of the land. The great plateau, where the religion had its ancient home, was separated from the sea by broad and lofty mountain walls (and it is on the sea that the sense of personality and individual initiative are most encouraged); and its character tends to discourage the sense of personal power, and to impress on the mind the insignificance of man, and his absolute dependence on the Divine power.* But the Divine was kind, lavish of good gifts in rain and useful winds and fountains of water and everything that was needed; but all those good things required skill and work and obedience to the divinely taught methods, in order to take advantage of them. Disobedience to the Divine commands meant ruin and unproductiveness. Obedience was the prime necessity. With patience and observance the children of the earth found that the Divine power was a protecting, watchful, and kind mother.

That character is permanently impressed on the history of the land and the people; not vigour and initiative, but receptivity and impressibility, swayed the spirit of the people, breathed through the atmosphere that surrounded them, and marks their fate throughout history;† and this spirit can be seen as a continuous force, barely perceptible at any moment, yet powerful in the long-run, acting on every new people, and subtly influencing every new religion that came into the land. Thus, for example, the earliest trace of the high veneration of the Virgin Mary in the Christian religion is in a Phrygian inscription of the 2nd cent.; and the earliest example of a holy place consecrated to the Mother of God as already almost a Divine personality is at Ephesus, where her home among the mountains* is probably as old as the Council of Ephesus, A.D. 431.

In regard to the nature of the Goddess-Mother, it is unnecessary to repeat what has been said in vol. i. p. 605 on the nature of Diana: that whole article may be assumed here.

(2) *The growth of mythology as the story of the life of the Great Mother.*—The Great Mother, evidently, was often imagined simply as the Divine guardian and protecting mother, without any distinctly sexual character being thought of. But her character as the mother could not be separated from the sexual idea in the popular mind; and, naturally, it is on this side that most of the mythology and dramatic action connected with the Divine story originates. The mystery of life, the succession of child to parent and of crop to seed, the growth of plant and tree and animal and man, lay deep in the minds of the primitive Anatolian people or peoples. They regarded all these phenomena as manifestations of the same ultimate Divine power. The custom of killing a human being in the field that his life may pass into the coming crop and make it grow well, is clearly implied in the legend of Lityerses at Celænæ. Similarly, the life of the tree is the life of the Dryad or Nymph. Each form can pass into the others, if the suitable situation occurs.

The life of nature begins anew every spring. This process is the life of the Great Mother: her child is born every year. Sometimes this birth was imagined as originating through her own innate power; she combined, as it were, the male and the female principle in herself. In Caria and in Cyprus this took the grotesque form that the supreme god was bisexual, and some repulsive legends were founded on this barbarous idea. These are probably not strictly Anatolian: they are distortions of the original thought, for a male deity imagined as endowed with some bisexual characteristics does not explain the continuance and perpetuation of the life of nature. They probably arose among immigrant peoples, like the Carians, whose national character substituted a god for a mother-goddess as the supreme conception of Divinity.

Certainly, that bisexual idea was on the whole rejected in the development of Anatolian religious symbolism; and little mythology was founded on it. More common is the idea that the Great Mother conceives through the influence of some flower or fruit, or in some other non-sexual way, as in the birth of Attis at Pessinus.† Not unrelated to this is the already mentioned idea that the god-serpent was the father of the Divine child.

But far more characteristic and widespread, and more simple and natural, is it to describe the Divine life more exactly according to the analogy of the natural world. The Divine nature is then imagined as divided between the two sexes; there is the god and the goddess, and the process of the Divine life evolves itself in the reciprocal action of the Divine pair and the birth of a new offspring: thus we find that the God-Father, the Goddess-Mother, and the Son (Dionysos, Sabazios, etc.) or the Daughter (Kora, etc.), are all assumed as essential to the drama of Divine life in numerous cults and myths.

While we cannot penetrate, in the dearth of evidence, to the earliest forms of these sacred myths and of the cult usages with which they are connected, it seems only reasonable to suppose that they began in a simple and self-consistent form. The view which forces itself on us is that the drama of the Divine life was at first understood and presented to the worshippers in some single and definite form at a time, and not in a confused mixture of different forms. In this ancient ritual the goddess is generally the important and essential figure, while the god is an adjunct needed for the proper development of her life, who passes out of notice when he has fulfilled his part in the drama; and in many cases the union of the two is described as a crime against some law, or actually as an act of fraud or violence even of the most abominable character, which sometimes entails punishment even unto death.

† See the art. in the *Geographical Journal*, as in previous note.

* See above, § IV (2).

† Pausanias, vii. 17.

(3) *Myths of the goddess and the god.*—Sometimes the union of the goddess and the god is pictured under the forms of agriculture, as of Demeter with Iasion 'in the thrice-ploughed fallow field.' Thus the goddess bears the Divine child; but Iasion is slain by the thunderbolt; for a life must be given in primitive ritual that the crop may acquire the power to grow. This cult myth (*ἱερὸς λόγος*) is connected with the Samothracian Mysteries and with Crete, two ancient centres of the primitive population, which we may now call Pelasgian, using the same name that the Greeks used, though modern scholars long ridiculed it.

Most important and most instructive as to the nature of the Anatolian religion is the idea, described above in § III (7), that the Divine power and the Divine life are revealed in the nature of the bee. As we have seen, the form of the Ephesian goddess (a form not restricted to Ephesus, but widely prevalent in Lydian and Phrygian cities) is modelled far more closely on the shape of the bee than of the woman. Now, the life of the queen bee (as described in the *Encyclopædia Britannica*[9], whose account may be given more shortly in the following terms) is the best explanation of the Attis legend. As regards reproduction, the opinion was once maintained that the queen bee was in herself sufficient without any male bee, or that the male principle was conveyed to the queen without her coming into contact with a male. But it has been clearly proved that the queen comes into relation with a male bee while taking a flight in the air; and if she does not find a mate within three weeks of her birth the power of intercourse seems to become lost. In the intercourse the male is robbed of the organs concerned; and thus mutilated is left to perish on the ground. His existence seems to have no object apart from the queen bee, and he fulfils no other function and no other duty in life. This description applies with striking exactness to the relation between the Mother-Goddess and the god, who (as we have seen) exists merely to be her consort, and is quite an insignificant personage apart from his relation to her. We must here anticipate what is said in later sections as to the character and original importance of the Goddess-Mother, and as to the growth of the dignity of the god in historic development, in order to bring out the bee nature in her life-history. The god consorted with the goddess by stealth and violence: the goddess was angry at the outrage: she mutilated the assailant, or caused him to be mutilated (*exsectis virilibus semivirum tradidit*). Even the false but not unnatural opinions about the impregnation of the queen bee have obvious analogies in the myths about the Mother-Goddess.

The myths riot in variations on this ugly theme, and we need not allude to them, except in so far as they are necessary for understanding the facts. The god, though mutilated, must still be living in perfect form, for the life of nature (whose annual bloom he represents) is renewed in perfection every year; and accordingly the myth sometimes tells that the penalty was inflicted vicariously, *ἀποσπάσας ὁ Ζεὺς τοῦ κριοῦ τοὺς διδύμους φέρων ἐν μέσοις ἔρριψε τοῖς κόλποις τῆς Δηοῦς, τιμωρίαν ψευδῆ τῆς βιαίας συμπλοκῆς ἐκτιννύων*, where there is an obvious reference to the treatment which the sacred instructions prescribe for domesticated animals.* Further, purely fanciful developments in Greek myth produced such tales as that the goddess was a lover of the god, and mutilated him in jealousy, or that the mutilation was intended to compel and enforce chastity. Such tales are absolutely opposed to the original Anatolian idea, which is intended to account for the fruitfulness and new life of nature. The subject offered a good opening for attack to the Christian polemical writers, Clemens Alexandrinus, Firmicus Maternus, Arnobius, etc.; and they are our best authorities. The accounts which they give, hideous as they are and concentrating attention only on the evils, must be accepted as correctly stating facts: it would have ruined their effect if they had not been recognized as true statement of facts. Moreover, they are corroborated in various details by pagan authorities; and as a whole they bear the unmistakable stamp of truth, but not the whole truth.

The myths in their older form, as distinguished from the fanciful variations, are obviously in the closest relation to the ritual: they are simply descriptions of the drama as represented in the sacred rites.

At other times the union of the two Divine natures is pictured after the animal world: Demeter as the mare meets the horse Zeus, Pasiphae became the cow, and so on. Popular and poetic imagination, which sported in the most licentious fashion with all those myths of the Divine unions, worked out this class of tales especially with the most diabolical and repulsive ingenuity; and it is in the degraded conception of the Divine nature implied in these abominable fantastic developments that the Christians who inveighed against the pagan religion found their most telling weapons. The mythology that grew around this subject would in itself make a large subject; but, though it possesses considerable interest as bearing on history and social customs, it has little value from a religious point of view.

These exaggerated and really distorted myths did not remain mere tales. They reacted on the ritual, which grew and elaborated itself and took in new elements in the lapse of time. But in this process of elaboration there was no real religious development, but simply degradation.

(4) *The birth and death of the Divine nature.*—The mystery of birth is matched by the mystery of death, and the one occupied the mind of the primitive Anatolian peoples as much as the other. Death was regarded and imagined by them under similar illustrative forms drawn from external nature; and the Divine nature, which is the model and prototype of all the activity of man, was seen living and dying in the life of trees and plants, of grass and corn. The recurring death of nature, the bright and beautiful luxuriance of spring cut off in its prime by the sun of summer, the joy and warmth of the summer alternating with the coldness and darkness of the long severe winter on the Anatolian plateau, the light of day transformed into the deadness of night, furnished a series of expressions of the same principle; and mythology and cult are full of them. In numberless local varieties the same truth is expressed: the young hero is slain in the pride of life and the joy of his

---

* See above, § III (7 f.).

art: Marsyas the sweet rustic musician vies with the god, and is by the god hung up on the plane tree and flayed: Hylas is drowned in the fountain by the nymph who longs for him and takes him away to herself from the earth: the twelve children of Niobe are all slain by the wrath and arrows of the god: Achilles must die young, and his grave was shown at various seats of his worship, in Elis, in the Troad, on the south Russian coasts. The eternal contradiction repeats itself: the life of nature is slain, yet reappears: it is slain by the Divine power, yet it is in itself the embodiment of the Divine power: the god slays the god: on this, mythology plays in endless variations of the same tale.

With this obvious fact of the death of nature, its birth is equally obviously connected. The life of nature never ends: it dies only to be born, different and yet the same. Men mourn for the dead god, and immediately their mourning is turned to joy, for the god is reborn. The mourning over Attis in the Phrygian worship of Cybele was succeeded by the *Hilaria*, as the lamentation for Adonis or 'Thammuz yearly wounded' in Syria was followed by the rejoicing over his rejuvenation.

With this subject the largest and the most valuable class of myths is connected; but the few examples which have been quoted above must suffice.

VII. Ritual and Ceremonial. — We have spoken of the growth of mythology before speaking of the ritual in which the Anatolian religious ideas sought to express themselves. This order must not be taken as implying the opinion that myth is, either logically or chronologically, prior to ritual. On the contrary, ritual comes first, and myth is secondary: myth grows around the rite, and explains it or justifies it or enlarges it to the popular mind. But myth begins from the very origin of ritual, and there was probably never a time when rite existed free from myth. The human mind must from the beginning describe and think about and imagine to itself the reason and nature of the religious rite; and its thought and fancy and description express themselves as myth. But the ritual has perished, while fragments of the mythology have been preserved; and it is through the myths, compared with some rare pieces of evidence about the rites, that we penetrate back to the ritual.

(1) *The origin of ritual.* — The ritual of the Anatolian religion is very imperfectly known. So far as we are able to discover, it is founded entirely on the idea that the Divine nature is the model according to which human life must be arranged. The god, or rather the Goddess-Mother, is the teacher, protector, corrector, and guide for an obedient family of children. What they ought to do is to imitate the Divine life and practise the divinely revealed methods. The ritual is the whole body of Divine teaching. The sacrifice, as the method whereby man can approach and seek help from Divine power, has been revealed by God; so the god was at the beginning the first priest, and the ritual is the repetition before successive generations of mankind of the original life of the Divine beings. The successive priests in the cultus were each of them representative for the time being of the god; each wore the dress and insignia, and even bore the name of the god.

In accordance with this principle various reliefs are to be explained, in which the representation is grouped in different zones: in the upper zone the Divine figures appear in their own proper circle of circumstances; in the lower zone the Divine figures appear as brought into relations with mankind, their worshippers, and, *e.g.*, as teaching men the method of sacrifice and offering. One of the best examples has been published by an old traveller, Wagener, in his *Inscr. rec. en Asie Mineure*, pl. i. It is still in existence, and will be republished in the proper chapter of the *Cities and Bishoprics of Phrygia*, iii.

According to our view, then, the Anatolian religious ritual was a representation or repetition of the stages and actions of the Divine life. The important stages in human life were embraced therein; and human individuals made their lives right and holy by performing their actions after the Divine plan.

This is a large subject. It is as wide as the life of the ancient Anatolian races, and in its full breadth it would have to include the progress of history and the march of conquerors and of immigration, for all those events affected and modified ritual. Here we touch on a few details only. Fortunately, circumstances favoured the preservation, throughout the dominance of paganism, of an important part of the primitive ritual under the form of *Mysteria* in many of its original seats, not merely in Anatolia, but also in Attica, Samothrace, etc. The primitive forms were not, indeed, kept pure, but were adulterated by many additions; but still they remained; and if we had a complete knowledge of the *Mysteria*, we could go far to recover the primitive forms. It is necessary here to treat together the Anatolian and the Greek Mysteries, anticipating part B.

(2) *The Mysteries.* — The ancient ritual of the Greek or Pelasgian tribes was overlaid but not destroyed by later religious forms of more 'Hellenic' character. In mythology this is expressed by tales of the conquest of the old deities by younger gods, Kronos or Saturn by Zeus or Jupiter, Marsyas by Apollo, etc. In such cases the old religion, though conquered, is not extirpated, but only submerged. It takes a long time, and much education, to eradicate a religion from the popular heart: the hearts of the educated and privileged classes are more easily changed. When the new religion stands on a distinctly higher platform than the old, or is of an uncompromising nature, the ancient beliefs persist in some such form as magic and witchcraft and rites proscribed as unhallowed and evil, and the older gods are stigmatized as devils: see B, §§ I, V; C, § III (5).

But in this case the new religion was not uncompromising, but singularly accommodating in type. Its spirit was polytheistic and eclectic in the highest degree. It had little objection to a pair or a score or a hundred of additional gods, old or new. Where laws existed in the Greek cities forbidding the introduction of 'new gods,' the intention was rather political than religious: the dread was lest anything should be introduced that would disturb the delicate equilibrium of Hellenic city-constitution, and especially anything that would prove self-assertive or bigoted, and would tend to subvert the established city religion, which formed an essential element of the city-constitution, and was to a great extent political in character: see B, § IV (14).

Accordingly, the old forms persisted in the form of Mysteries, sanctioned by the State as ancient and holy, yet distinctly regarded as a survival not quite in keeping with the true Hellenic religion. The old gods were still considered and reverenced as gods, admitted as members of the Hellenic Pantheon; and though Zeus was nominally the supreme god, yet in some ways the old gods whom he had dethroned were esteemed more holy and more efficacious than he. The name *Mysteria*, which was given to the ancient rites, was indicative of an element of secrecy, and a certain uncanny character, as of ideas which were not to be admitted as part of ordinary life.

What, then, were the Mysteries? In what lay their essential character? Before trying to answer this question we must point out that, though there is in the general view a distinct separation between Mysteries and the cults of the properly Hellenic gods, yet in practice and in detail they pass into one another, so that it is impossible in some cases to say what category certain rites fall under. But there is a general type characterizing all the cults called Mysteries; and, as we shall see, the great Mysteries were in Roman times developed so as to be even more strikingly similar to one another. The Mysteries of the Anatolian religion may be conveniently summed up under the name Phrygian Mysteries, as they are commonly called by the ancient writers; but they were celebrated far beyond the bounds of Phrygia. The name *Mysteria* was, doubtless, given to them in Asia Minor rather from their analogy to the *Mysteria* of Greece proper; and not because they were considered there so mystic and separate from ordinary religion as they were in Greece proper. In the cities of Asia Minor, however, the Greek or Hellenic views of religion became steadily more effective; and as those views grew stronger, the native religion was more and more felt to be of the nature of *Mysteria*.

(3) *Nature of the Mysteries.*—In the Anatolian religion, either originally or at some stage in its history (whether through contact with some other race or through some other educational influence), the idea of the recurring death and new birth of the natural world—regarded, of course, as the annual death and rebirth of the Divine life—was combined with the fact of the sequence of generations in human life. The same sequence must exist in the Divine nature, for the Divine nature is the counterpart and prototype of the human in all stages of its history. The Divine parents and the Divine child correspond to the human. The drama of this Divine life was set before the worshippers in the Mysteries.

But again in the Divine life, as we see it in the annual life of nature, the father is the son, the mother reappears as the daughter: it is never possible to draw any definite line of division between them: the Divine child replaces the parent, different and yet the same. If that is the case with the Divine, the same must be the case in human life. The stream of human life goes on continuously, changing yet permanent; and death is only a moment in the succession. Here the idea of immortality and a life of man wider than the limits of the material world is touched.

Obviously, an important aspect of religion is here introduced. Human life is regarded as permanent and everlasting, like the Divine life of nature; and the religion of the grave is the foundation of the entire religion [see also § VIII (5)]. That man when he dies becomes a god, was considered already in the 4th cent. B.C. to be part of the teaching conveyed in the Mysteries, as is shown in the curious metrical inscriptions engraved on plates of gold which have been found in graves of South Italy and Crete, and which belong to that and the following centuries. There the deification is considered to be the result of initiation; but in the primitive religion, when all men were religious and the Mysteries were the religion of the whole people and not restricted to some chosen *mystæ*, the dead all went back to the god from whom they came. In a very ingenious paper, S. Reinach has discovered the mystic formula uttered by the initiated—'a kid I have fallen into the milk,' which conveyed in symbolic terms the same meaning as the words which the goddess of the world of death seems to have addressed to the initiated dead who came before her—'thou hast become a god instead of a man,' or 'thou shalt be a god instead of a mortal.'[*]

It is certain that the pagan apologists, defending the established religion and attacking the Christian, found this philosophic meaning in the ritual of the Mysteries, in which that early religion still lived on. That this meaning was implicit in the ritual from the beginning seems fairly certain. That it was understood by some persons is probable, and that some development of the ritual was made at some time or times to give more emphasis to the meaning is also probable. Not merely people in general, but also some of the most educated among the Greeks, believed in the salutary effect of the Eleusinian Mysteries; and this salutary effect is expressly connected with the future world.[†] Advantages in the world of death (or of life) are said to be gained by those who are initiated; and those advantages are not the result of the mere ritual observance. The initiated are said to grow better; and salvation in the future life is said by Isocrates to be gained both by the initiated and by all who live a pious and just life (*Symm.* xii. 266).

But this effect of the Mysteries was not attained or helped by any formal instruction. It was dependent entirely on the intense interest and eager contemplation of the initiated, and the strong impression produced on their minds. The ceremonies at Eleusis took place at night, after a considerable period of preparation and purification: the purification consisted mainly in ritualistic acts, but not entirely so, for probably some stress was laid on the condition that the initiated must be pure in heart and not conscious of having committed any crime: they were, certainly, left to judge for themselves of their own moral purity, and the best ancient pagan conception of purity was consistent with habitual disregard of some of the elementary moral rules of the Christian and of the Hebrew religion. But the principle of moral purity was admitted, even though only in a very defective and poor form; and that was a great thing, at least in comparison with the general character of ancient paganism.

After this preparation, and when in a state of high expectancy, the initiated were admitted to see the drama of the Divine life: the words spoken in the drama were few, and concerned only with the action: the mystic objects were simple in character: the most holy and crowning act at Eleusis was the ear of corn mowed down silently. But there was a belief ready in the minds of the spectators that certain truths were enigmatically expressed in the action, though, as the ancient writers say, a philosophic training and a reverent religious frame of mind were required to comprehend them.[‡]

The details of the Mystic drama set before the worshippers cannot here be described. A very brief description is given, in vol. iii. p. 467, of the ceremonial of the Eleusinian Mysteries; and in the last few paragraphs we have had those Mysteries chiefly in mind.

---

[*] That the kid is here the mystic form of Dionysos, as the God-Son in the Divine nature, is generally recognized: see S. Reinach, *Rev. Arch.*, Sept. 1901, p. 205 (though we cannot go with him beyond what we have adopted from him in the text above). The Phrygian Zeus Galaktinos, or Galaktios, may be brought into comparison (*Histor. Geogr. As. Min.* p. 235, and A. Körte, *Beilage zum Vorlesungsverzeichniss*, Greifswald, 1902, p. 30): he is the god of the pastoral people of the great plains and the grassy hills of Phrygia.

(4) *The character of the Phrygian and the Greek Mysteries.*—Probably there was not a wide difference even in the beginning, and still less in later times, between the Eleusinian and the Phrygian Mysteries as regards actual ritual: many ceremonies were probably common to both, and in both there was much that was disgusting and repulsive. Yet the Phrygian Mysteries are described as abominable and immoral by the older Greek writers, even by those who praise and admire the Eleusinian: the former were believed to ruin and degrade a Greek city, but the latter to save and ennoble it. The difference lay not simply in the fact that some repulsive ceremonies are quoted by the Christians as peculiar to the Phrygian Mysteries; for much of what remains in Clemens' description of the Eleusinian is equally detestable. The real superiority of the Eleusinian over the Phrygian Mysteries lay, first, in a certain difference of spirit, as the Greek sense of order and measure and art undoubtedly gave a harmony and artistic character to their version of the Oriental forms; and, secondly, in the fact that, as known in Greece proper, the Phrygian Mysteries were introduced by slaves and foreigners, and participated in by the superstitious and the ignorant: they were celebrated for money by strolling priests, and any one who paid a fee was initiated without preparation except some ritual acts: there was no solemnity in the surroundings, and no dignity in the ceremonial, but all was vulgar and sordid. A very few persons, also, might observe that the slight requirement of moral purity made at Eleusis had become a mere phrase in those street celebrations, and that advantages in the future world were promised in return for mere participation in those vulgar rites. But that observation was probably beyond the ordinary range of even the educated Greeks.

As regards the many disgusting details against which the Christian writers direct their polemic, the admirers of the Mysteries might defend them by arguing[*] that religion places us face to face with the actual facts of life, and that, when the mind is exalted and ennobled by intense religious feeling, it is able to contemplate with pure insight phenomena of nature and life in which the vulgar mind sees nothing but grossness. They would point out that the language of religion may be and ought to be plainer and more direct than the language of common life. These arguments are weighty; but one has only to read the undeniable accounts given by Clemens, Arnobius, etc., to see how insufficient they are to palliate the ugliness of the ritual.

In primitive thought the direct and simple expression of the facts of life would need no apology and no explanation. The feature of the Mysteries that needs and is incapable of apology is that, as known to us in later time, they are not simple and direct: they are elaborate and artificial products of diseased religion. They stand before us as the culmination of a long development; and the development has been a depravation, not an elevation, of a ritual which had at first been naïve and direct in its simple rudeness.

(5) *The growth of ritual.*—The process of growth in ritual went on in two ways.

(*a*) In the meeting of two different races their respective religions affected one another. Doubtless, the one generally swamped and submerged the other; but the apparent victor was not unaffected in the process. An indubitable example is seen in the Lydian Katakekaumene, otherwise called Mæonia. Here an old Mæonian or Lydian population was mixed with a body of colonists introduced by the Persian kings five centuries B.C.; and in the Roman inscriptions six or seven hundred years later the goddess is called Artemis Anaitis, the first name being her ordinary title in Lydian cities, and the second being Persian. In other Lydian cities, where the same mixture of population took place, the goddess is called Artemis Persike, in which the same religious mixture is even more clearly expressed. In cultus, obscure as that subject always is, it is certain that the fire-worship and Magian priests of the Persians were thus introduced into those Lydian cities.[*]

(*b*) There was often a conscious and deliberate elaboration of forms and ritual by the priesthood. This enlargement of the ceremonial was the result of an attempt to adapt the established religion to popular taste, and was accomplished chiefly by introducing rites that had proved fashionable. The Mysteries celebrated at different religious centres competed with one another in attractiveness, for there was much to gain from a great concourse of worshippers in any city. Hence all of them adapted to their own purposes elements which seemed to be effective in others; and thus a marked similarity of character between the rites of Eleusis, Samothrace, and Anatolia came to exist. Sometimes, at least, new priests were added along with the new ceremonies. These ceremonies were often derived from or influenced by the growth of mythology, and they seem (so far as the scanty evidence justifies an opinion) to have generally tended to obscure any healthy religious idea that lay in the ritual, and to have increased the ugly and repulsive element.

The older forms of religion are the simpler, but it is not probable that any form was ever absolutely simple. There is a certain tendency in human nature to mingle forms, and to see the Divine idea under several aspects. Just as in early literary expression metaphors are often mixed, so in primitive thought different envisagements of the Divine power arise simultaneously, and these pass into one another without the inconsistency being felt. Still, it is beyond question that, when we get any of these religious ideas at an early stage, it has a simpler form and embodies a single process, though the accompanying religious myth may express the process in a way that involves some inconsistency in details. This ancient form is markedly and unmistakably different from the elaborate and artificial ritual of later times.

Especially, the elaborate dramas of the later Mysteries, as played before the initiated in the Roman Imperial period, are obviously composed by a process of syncretism out of various inharmonious and inconsistent cults. In the story enacted in the Eleusinian Mysteries, as described by Clemens Alexandrinus, there are traces so obviously Phrygian, that many modern scholars have regarded his whole description as applying to the Phrygian Mysteries alone. But Clemens distinctly implies that he is describing the Eleusinian Mysteries, and he illustrates his description and his invective by quoting other details, saying that these are taken from the Phrygian Mysteries. The explanation of these facts, undoubtedly, must be that the later Eleusinian Mysteries had been influenced by the Phrygian Mysteries.

That details from various sources were united in those later Mysteries is shown by their composite character: there is not merely the fundamental element, the story of the Divine father and mother and the birth of the child: there are several such stories interlocked in one another: the god-bull, the god-ram, the god-serpent, appear in different details, and pass into each other in kaleidoscopic fashion. There is here an original germ and a series of successive additions due to the reception of new religious forms and ideas, which were incorporated in the growing ceremonial.

---

[*] The following sentences are slightly modified from the writer's article 'Mysteries' in the *Encyclopædia Britannica*^{9}.

[*] Pausanias, v. 27. 6, vii. 6. 6; the name Artemis Persike is found often on coins of Hierocæsarea in Lydia. See also Head, *Catalogue of Coins, Brit. Mus.: Lydia*, pp. lviii–lxvi and 111 ff.

(6) *Purification.*—This subject has been alluded to in § III (6), where the later rules of ceremonial purity are mentioned. But there can be no doubt that certain practices of purification were prescribed in the original Anatolian ritual. The Greek purificatory rules for homicides were identical with the Lydian;[*] and, as the Lydian cannot be supposed to be derived from the Greek, we must here see an example of the influence which throughout ancient times was exerted by Anatolian religion on Greek. In these and in the preparation for the Mysteries the swine was the cleansing animal.

The ceremonial of purification after homicide carries the inquirer back to a very primitive stage. As the ritual was common to Greece and Lydia (and doubtless Phrygia also, as is probable though unattested), we may presume that the early Greek ideas connected with it are true of Anatolia also. Now, one of the rites of the Dionysiac festival *Anthesteria* was called 'the Cans' (Χόες), because every celebrant drank out of a separate can; and the myth explained that Demophon, son of Theseus, instituted the custom when Orestes came to Athens unpurified: wishing to receive him hospitably, yet not to let an impure person drink out of the same cup as the pure worshippers, the king ordered that every person should drink from his own can separately, and proposed a prize to the best drinker. Here the rite of competition and prize-giving to an individual victor is Hellenic, and belongs to the later development (B, § III). But other elements in the ceremony point to an early date; the chief rite was the marriage of the representative woman or queen among the people (the wife of the Archon Basileus) to the god; and the idea was also associated with this day that it was accursed, for the dead arose on it and must be propitiated. Here again the idea of connecting evil omen and a curse with the dead is Hellenic and late (see B, § V); but the association of the rising from the dead with the Divine marriage is primitive and original. Similarly, we may regard the horror against a homicide partaking of the common cup as a thoroughly primitive idea; he must be purified before taking part in that sacred ceremony of civilized man, the drinking of the common cup. But the application of this to the rite of 'the Cans' is late, and probably founded on a misconception. In the marriage of the risen god and the queen, as an annual rite to ensure wealth and increase to the land (which at that season, 12th February, was being prepared for the coming year's crop and harvest), the common cup was partaken of only by the bridal pair [see § VIII (1)]; and the people in general rejoice separately as individual spectators of the holy rite.

The distinction between the unity and close relationship implied by the ritualistic drinking from the common cup and the separateness implied by drinking from separate cups is a noteworthy feature; and explicit emphasis was probably placed on it in the ceremony; but the details are unknown. Similarly, in the Christian Sacrament the Saviour laid emphasis on the breaking and distribution from one loaf, in contrast to the use in ordinary Oriental meals of a loaf for each guest (see 1 Co $10^{16f.}$). See further, § VIII (1) and (6).

The most important fact for us in purification is that it implies some germs of a conception of sin which has to be atoned for before the worshipper may approach the Divine power. Breaking an oath and refusal to restore money entrusted to one's care entail impurity; and the Divine anger punishes any one who approaches the sanctuary without expiating such a crime. It is, however, true that impurity equally results from offence against purely ceremonial rules, and that the conception of sin and expiation which is revealed in the evidence on this subject is of a very humble kind; but there was at least a germ capable of higher development, though there is little or no sign that any development ever took place, except perhaps to some small extent through the contact with and resistance to Christianity.

Guilt and impurity entailed punishment. The punishment seems to have been inflicted in some cases independently of any disrespect to the Deity due to entering the holy place in a state of impurity. The sin results directly, and without the sinner entering the sanctuary, in punishment at the hand of the god or goddess, who therefore must sometimes have been conceived as on the watch to punish sin. Here again there is the germ of higher moral conceptions.[*]

But the utilitarian element which is so clear in many features of the primitive Anatolian religion can be distinctly traced also in the rules of purification. The Goddess-Mother was the teacher and guide of her people from their birth till she received them back to her in death. The ablutions which she required from them were an excellent sanitary precaution; and if the whole system of purificatory rules were known to us, this side would probably be much more obvious and incontestable.

(7) *Confession.*—A remarkable and important fact in connexion with impurity and sin was that the process of expiation seems to have involved (whether obligatorily or voluntarily, we cannot be sure; but probably obligatorily) a public confession. Sense of guilt was brought home to the individual by some punishment, generally disease (fever, in which the unseen Divine fire consumes the strength and the life, was recognized as the most characteristic expression[†] of Divine wrath). Thereupon the sinner confessed, acknowledged the power, and appeased the anger of the god or goddess, and was cured and forgiven. Finally, as a warning to others, the confession, the punishment, and the absolution were engraved often on a stele and deposited in the sanctuary.[‡] See also below, C, § III (4).

(8) *Approaching the Deity.*—Apart from prescribed ritual, the worshipper came voluntarily to the god or goddess for three purposes: (*a*) to pray for good for himself or his family; this was called *εὐχή* in Greek, and the prayer was necessarily accompanied by giving, or by a promise to give, something in return to the Deity, if the desire was granted: thus *εὐχή* (in Latin, *votum*) involved both prayer and sacrifice or vow: it was a sort of bargain with the Divine power; (*b*) to imprecate evil on one's enemies (*ἀρά*, *κατάρα*, *ἐπαρά*): this was really a variety of the former, for *ἀρά* strictly means 'prayer'; but in the development of Greek religion it was commonly and almost invariably addressed to the powers of the old régime, who had become mysterious, occult, and uncanny, and passed more and more into the sphere of magic. The vow in this case fell into disuse, for the occult powers were not gratified by public gifts, but by the mere recognition of their

[†] This is shown most clearly in the curses engraved on leaden tablets, in which the wrath of the Deity is invoked against any enemy or false friend; it is usually the Divine fire which is invoked to destroy the fever-struck wretch.

[‡] On this subject see *op. cit.* in footnote * above.

efficaciousness: the mere approaching them in the proper ritual and method enabled the worshipper to call them into action on his side, and he could as it were compel them to act by addressing them by the proper formulæ (which thus acquired a magic character); but some kind of sacrifice was an invariable part of the ritual.[*] (*c*) To invoke the Deity as a witness of what they were about to say or had said (ὅρκος). This, again, was strictly a variety of the previous class, for the *horkos* was simply an imprecation of evil on oneself in case one were speaking falsely. The person swears by the Deity whom he invokes as a witness, and who is his *horkos*; and, as the form was very ancient, the object sworn by might be an animal or a stone, as the primitive embodiment or home of Divine power: such was the old Cretan oath associated with the name of Rhadamanthus (though the Scholiast on Aristoph. *Av.* 520 speaks as if Rhadamanthus were the inventor of such milder forms of oath, as by the dog, the goose, the ram, etc.): such also was the sacred Latin oath, *per Jovem lapidem.* An oath, as being really a prayer to the Deity, was properly accompanied by a sacrifice.

In all such cases the prayer or oath is binding on the descendants or representatives of him who has invoked the Deity, and the consequences may fall on them even generations later. It was not uncommon to bring the children to the place where the oath was taken, and thus make them explicitly and publicly parties to the act and sharers in its consequences.

These voluntary and occasional acts, which persisted alongside of the stated ritual, were older than, and gave rise to, ritual. The asking of help from the god in difficulties or troubles was as old as the idea of a god; for in the Anatolian belief the god was the helper and teacher. The way in which he was efficaciously approached naturally came gradually to be stereotyped as ritual, and was regarded as revealed by the god, who was in this way his own first priest, and teacher of his own rites.

(9) *Priests.*—The original idea which gave rise to the Anatolian priesthood has become clear in the preceding investigation. The priest is the bearer of the Divine knowledge; he can teach men how to approach and propitiate the Divine power. This knowledge was originally taught by the Divine Being personally to men; in other words, the god is the first priest, performing as an example to his successors the due ceremonies. The idea of a Divine revelation, through which man becomes aware of the nature and will of God, is here present in a very crude and rude form; and it is hardly possible to distinguish how far this rudeness is the real primitive simplicity of a very early stage, when thought is hardly separated from the sensuous accompaniments through which it is suggested to men, and how far it may be imparted by degeneration, *i.e.* by the stereotyping of primitive sensuous forms, and the loss of the germ of thought implicated in those forms.

While the priest in this ancient stage of religion possesses the knowledge and imparts it to the worshippers, he is not considered to be necessary in himself. The worshipper, whether a private individual who approaches the Deity on behalf of himself and his family, or an official or magistrate who acts on behalf of the State or body which he represents, needs no intermediary between himself and the god. Provided he can perform fully and correctly his part in the transaction,[†] the Deity is satisfied and must respond. The priest or helper is needed only to keep the worshipper right, to guard him against errors, and to help him to understand the way in which the Deity replies or conveys information; in other words, the helping priest merely acts as instructor, while the worshipper plays the part of priest-officiator, and performs the series of acts which the god himself originally did as an example to mankind who come after him.

In this stage there is not, in the strict sense, any priest or any sacerdotal order or caste, though naturally the Divine knowledge would tend to be handed down from father to son. Priests in the strictest sense begin only when a person permanently assumes the place of the god's representative, and plays the part of the god regularly in the ritual as it was rehearsed at the proper intervals before a body of worshippers. The priest in this fuller sense was connected with and helped the growth of an anthropomorphic conception of the Deity. He was the representative on earth of the god as the priestess was of the goddess; and the two played their parts year after year in the Divine drama, which constituted the most important part of the growing body of ritual.

The priest who represented the god wore his dress,[*] and in some cases, probably in most, assumed his name. In Pessinus, for example, the chief priest was called Atis, as is shown by inscriptions of the 2nd cent. B.C.; and undoubtedly this was simply the name of the god variously spelt Attis or Atys or Ates, and was assumed as an official title, implying that the office was ἱερώνυμος, *i.e.* the bearer lost his individual name and assumed a hieratic name when he entered on office.

In Asia Minor the succession to the priesthood was, in all probability, hereditary (according to some principle of inheritance not as yet determined) in early times. Where the Greek element entered sufficiently strongly, this principle was usually altered; some more democratic principle of succession was substituted; and sometimes life-tenure was changed to tenure for a period of four years, or more frequently of one year, or occasionally even of a shorter period. In some of the more thoroughly Greek cities of the coast, such as Erythræ, the priesthoods of the numberless deities were put up to auction by the State, and sold to the highest bidder. But wherever an early or a more purely Anatolian and less Hellenized condition can be traced, the great priesthoods seem to be for life, and to be connected with certain families.

The number of priests, in this fuller sense, tended to increase from various causes, and to become a sacerdotal order. The possession of knowledge of the Divine law was a powerful engine, for the body of ritual was steadily growing in volume, and any mistake in it would have nullified its effect. Attention was entirely concentrated on details, and the spirit seems to have been wholly lost. But the knowledge of the multitudinous details required study and teaching; and this caused the formation of a priestly caste or order, in which the tradition was handed down. The power of that order rested on the inaccessibility and difficulty of their lore, and on the ignorance of the worshippers; and hence there was every temptation to keep up that ignorance, to multiply details of cultus and make the knowledge of it harder, and to create a bar of separation between the priestly order and the people. But no details are known, though the general principle may be confidently assumed.

Moreover, as the great religious centres or *Hiera* grew into importance (see § IV (4), above), they required a permanent staff of priests and ministers, in order that the increasing number of persons who frequented them might always find help and counsel. In turn the increase of the permanent staff at the great *Hiera* tended to foster the growth of the established ritual. Instead of merely aiding the individual worshipper to perform one single act of the Divine action which suited his special circumstances at the moment, the priests of each *Hieron* on stated occasions set the whole Divine drama before the eyes of bodies of worshippers. While this more elaborate ceremonial had its justification in producing a certain good effect on the spectators, and in imparting ideas to them, yet there was the strongest temptation for the permanent priests to refrain from emphasizing this aspect of the ceremonial, and to elaborate the spectacular side in the way described above. In the simpler Anatolian system of society this strengthened their power (§ VIII (7), below); and in the developed Hellenic system it added to the wealth and influence of the *Hieron* by attracting immense crowds to the great festivals accompanying the annual (or in rare cases biennial) ceremonies.

---

[*] This second purpose frequently passed into the sphere of magic: see C, § III (4).

[†] ἐμπορικὴ ἄρα τις εἴη τέχνη ἡ ὁσιότης: Plato, *Euth.* 14 E.

[*] See *Cities and Bish. of Phrygia*, i. pp. 56, 103, 110.

Thus there was, necessarily, a large establishment maintained at the principal religious centres: see § IV (4). Besides the great priesthoods there were required large numbers of inferior priests, *ministri* and *ministræ*, to perform the details of the cultus (see § II, above) and prophecy and give attention to the worshippers and the offerings; also *hierodouloi*, of whom there were many thousands at the greatest *Hiera.* The *hierodouloi* had become serfs or slaves attached to the *Hieron* in various ways, and were protected and governed by the theocratic administration of the *Hieron*: on the female *hierodouloi*, see § VIII (2), below. Finally, there was a class of persons called *hieroi*: see next § (10).

It is clearly established by numerous cases, that, in later times at least, there was a college of priests in every religious centre in Anatolia. This college was a hierarchy, with distinct gradation of authority and allotted duties. At Pessinus a priest is described as occupying the fifth or tenth place in order of rank; and in other cases where the evidence shows only that there was a chief and various subordinate priests, we may probably assume from the analogy of Pessinus that strict gradation extended throughout the college. Every religious act was probably the work of the priests as a body (though the chief priest would be the leader); and this furnishes some argument in favour of the Bezan reading ἱερεῖς in Ac 14^{13}, where Prof. Blass condemns that reading on the incorrect ground that there was only one priest for each temple.

(10) *Hieroi.*—This class of persons, mentioned at Ephesus and many other religious centres, and evidently very numerous, have been much discussed, with varying results, by many modern writers. Their status is very obscure. The opinion advocated in the writer's *Cities and Bishoprics of Phrygia*, i. 147 f., is that the *hieroi* are merely a modification of the non-Hellenic institution of the *hierodouloi* under the influence of Hellenic institutions and spirit. The *hierodouloi* were serfs, but not slaves; whereas the Greek law knew only the grand distinction between freemen and slaves. The peculiar relation of the *hierodouloi* to the *Hieron* gave a power to the latter which was alien to the Hellenic spirit; and the old *hierodouloi* seem to have been transformed in the Hellenized cities into an inferior order of the city population, distinct alike from citizens and from resident strangers and from freedmen. The relation of the *hieroi* to the *Hieron*, and their service at the *Hieron*, seem to have been more a voluntary matter; and violation of it was left to be dealt with by the god; it was not enforced as a rule by legal action.

VIII. INFLUENCE ON SOCIETY AND LIFE.—It is a necessary part of our task to observe the bearing of this religion and ritual on social life; but this subject is too obscure to justify any general statements of a very positive kind; and only a very few details can here be mentioned.

(1) *Marriage.*—There is unmistakable evidence that a marriage ceremony of a religious nature existed, and that this ceremony stood in close relation to a part of the ritual of the Mysteries. In fact, the marriage was, as it were, a reproduction by the bride and bridegroom of a scene from the Divine life, *i.e.* from the mystic drama. The formula, 'I escaped evil: I found better,'[*] was repeated by the celebrant who was initiated in the Phrygian Mysteries; and the same formula was pronounced as part of the Athenian marriage ceremony. Another formula, 'I have drunk from the *kymbalon*,'[†] was pronounced by the initiated; and drinking from the same cup has been proved to have formed part of a ceremony performed in the temple by the betrothed pair.[‡] It is distinctly stated by a grammarian that the marriage ceremony took the form of celebrating the 'Holy Marriage' in honour of the Divine pair.[§] At marriages in Athens certain instruction was imparted to the contracting pair by the priestesses of Demeter and Athena.

The ritual of the Mysteries as reported to us does not contain, it is true, any idea of marriage between the goddess and the god, but on the contrary presents a series of incidents of violence and deceit; and, as we have seen, the whole story is taken straight from the life of nature as seen in animals and crops. Undoubtedly, the suggestion from these incidents would seem to be that the Divine life, which is to form the model and exemplar for mankind, was of that rude and savage kind. But it must be remembered that our information comes from opponents whose object was only to paint the horrors, and not to give a fair judgment of the ritual as a whole. While we must admit the truth of everything they say, we must add what they have omitted; and in all probability they have omitted the reconciliation and the exhibition of the progress of life to a higher level through the influence of religion. That some such exhibition formed part of the Mysteries is made practically certain by certain allusions among the pagan authorities. The formula, 'I escaped evil: I found better,' implies it. So does the whole tone of the defence which the ancients give of the Mysteries. We suppose that the idea of legal union and of marriage formed part of this exhibition and improvement.

Diels, *Sibyllinische Blätter*, p. 48, has observed that part of the marriage ritual was almost identical with the purificatory ceremonies practised in the Mysteries (compare also S. Reinach's ingenious paper, *Rev. Archéol.*, Sept. 1901, p. 210): the connexion was suggested tentatively in the present writer's *Hist. Com. on Galatians*, p. 90; and it may now be regarded as proved.

It is an extremely important fact that the human marriage ceremony was thus celebrated by forms taken from the Mysteries; and the conclusion must be that the human pair repeat the action in the way in which the god and goddess first performed and consecrated it, and that, in fact, they play the parts of the god and goddess in the sacred drama. This single example is, as we may be sure, typical of a whole series of actions. We have seen also that some, probably all, domesticated animals, intended to be eaten, were slain and sacrificed according to an elaborate ritual (§ III (9)); and we may accept as highly probable the general principle that all the important acts of life were regarded as religious ceremonies, which must be performed in the proper fashion, as inaugurated by the god or goddess and taught by them to men. Every important stage in life was modelled on what the goddess or the Divine pair had done, and thus each stage was consecrated by a sort of sacrament. The subject is both wide and obscure: see below, Nos. (5) and (6).

[‡] The proof is given in the present writer's *Historical Com. on the Epistle to the Galatians*, pp. 88–91, and is here strengthened by details there omitted.

[§] *οἱ γαμοῦντες ποιοῦσι τῷ Διῒ καὶ τῇ Ἥρᾳ ἱεροὺς γάμους*: *Lex. Rhetor.* p. 670 Porson, p. 345 Nauck. The grammarian probably did not correctly apprehend the nature of this fact, which he must have got from a good authority. Usener in *Rhein. Mus.* xxx. p. 227, assumes that the reference is to the Athenian 'Holy Marriage,' a festival well known at Athens. But the *Hieros Gamos* was known elsewhere, and the true meaning of the grammarian's words is certainly as stated in the text above.

There are, however, many difficulties connected with the question of Anatolian marriage which must first be noticed briefly.

The practice of marriage between such near relations as father and daughter, mother and son, brother and sister, is often described as common in Asia Minor. This disregard of the common restrictions on marriage is mentioned usually as characteristic of tribes or persons, called *Magusæi*, immigrant from Persia, and diffused over Cappadocia, Phrygia, and Galatia, who retained during the Christian period their mysterious ritual, worshipped fire, refrained from slaying animals (though they employed other people to kill the animals which they required for food).* But we must be struck with the fact that, except as regards the worship of fire, we know that all the characteristics attributed to the Magusæi are clearly marked in the Anatolian ritual. The mystic ritual of the Divine life consisted of a series of incestuous unions. The slaying of an animal for food was an impious act, and the impiety was punished in the ritual (§ III (9)), though the animal slain was eaten. Basil, who is one of our authorities about the Magusæi, describes marriage by capture as practised and not harshly judged by ordinary opinion in his own time.† Now, marriage by violence is characteristic of the mystic drama.

(2) *Hierodouloi.* — In this connexion another social fact must be noted, viz. ceremonial prostitution of the female *hierodouloi* or slaves of the sanctuary. This custom is known to have been widely practised at the great centres of Anatolian religion. Strabo mentions it at Komana and other Eastern centres. In the West it was characteristic of Lydia generally;‡ and the women who contributed to build the grave of Alyattes were only employing in a sacred purpose the money which belonged to the goddess. This duty was originally or theoretically incumbent on all unmarried women for a season; but how far it was practically acted on by people in general we have no means of determining. During the Græco-Roman period it seems (so far as the scanty evidence permits any judgment) to have been carried into effect by women of ordinary society only in exceptional cases, on account of some special vow or some Divine command (given in dream or oracle). But, even in the most educated period and society, the custom, though doubtless regarded as a mark of superstition and devotion to an un-Hellenic cult, was recognized and practised in some cases as one of the duties of religion by women who apparently returned to their ordinary place in society after their term of service.* Apart from these devotees, the custom was practised in later times by large numbers of women, slaves of the *Hieron*, as a permanent way of life.

It might fairly be disputed whether that custom belonged to the original Anatolian religion, or was part of the accretion which gathered round it in the course of its development. Evidence does not exist to warrant a decided opinion; but the custom probably belongs to a more 'advanced' and artificial state of society than the primitive Anatolian, and is to be ranked as belonging only to its development.† This forms part of the ground on which rests our opinion that no trace of elevation can be observed in the history of that religion, but that its development is simply a degradation. The custom is, undoubtedly, not in keeping with the simple type which we attribute to primitive Anatolia, and seems incongruous with the institutions described in the following section. If we are right in this opinion, then the custom would have to be regarded as one of the instances of Oriental influence (like the horror of the swine in § III (6)), due to immigration from the East and long subjection to a succession of Asiatic monarchies. It is certainly an old-established part of the religion, going back to the earliest days of Oriental influence; but we believe it is possible to go back on fairly reliable evidence to an older stage in the history, when the women *hierodouloi* were of a different character, viz. guardians of the goddess and of her worshippers.

(3) *Women guards.*—The myth of Herakles and the Lydian queen Omphale, in which the woman wears the hero's arms, while he sits and spins under her command, takes us back to the primitive type of society which is described in a series of early Anatolian legends of the Amazons. Omphale and Herakles are obviously types of the Great Goddess and her companion or attendant god; and we remember that the Lydian kings for five centuries boasted to be descendants (*i.e.* representatives in orderly succession) of the first priest-king Herakles. The tale of the hero Achilles dressed as a woman and spinning in the family of Lykomedes is another example of the way in which Greek fancy worked up that primitive custom: Achilles is a hero of the north coast of Asia Minor and of some points on the Greek coast.

The Great Goddess, the protecting and guarding mother of her people, had her attendant women. These were armed as warriors, and were called Amazons in Greek legend, where fantastic characteristics are assigned to them.‡ But that a real foundation lies under those fanciful tales is certain. We can dimly descry in primitive history the Amazons, the servants of the native Anatolian goddess, contending, on the banks of the Sangarios, against the immigrant Phryges from Europe, among whom Priam fought as a young leader of the Western tribe.§

The women servants of the goddess are to be considered as resembling her in part of her character as her active and armed *ministræ*. In Ephesus they were the *melissai* or working bees, while the

[†] *Quarterly Review*, No. 372, p. 426; Basil, *Epist.* 270.

[‡] In Phrygia, compare, for example, a Roman inscription (erected by a native of Pisidian Antioch), interpreted and printed correctly in *Histor. Com. on Epistle to the Galatians*, p. 201 (incorrect in Kaibel, *Inscrip. Græc. Ital.* etc., No. 933, and elsewhere), with Strabo, p. 577.

[*] See Ramsay, *Church in Rom. Emp.* p. 397 f.; *Hist. Com. on Galatians*, pp. 40, 201.

[†] The present writer formerly erred in considering it to be a relic of the primitive stage in Anatolian religion; the orderly analysis of that religion, above given, shows that it belongs to its degradation. Marriage was the original rule, though with barbarous usages: promiscuity belongs to the stage of deterioration.

[‡] It is an interesting illustration of the view stated in § III (7) and § VI (3), that the modern discoverer of the sex of the working bees, Dr. Warder, called them 'true Amazons.'

[§] *Iliad*, iii. 184–190.

goddess was the queen bee. The sexual side of the *melissai*, alike in the bee and the priestess, is not developed: the *ministræ* therefore must have been young, and their term of service was part of their education. Evidence has perished as regards the women servants of the goddess; but in all probability at the conclusion of their term of service they passed into ordinary society, and in the ceremonial of marriage went through the ceremonies above described, imitating the actions and fate of the goddess. The opinion stated by the present writer, that a number of those armed servants of the goddess are portrayed on the wall of the rock-sanctuary at Boghaz-Keui,* has not been adopted by recent scholars; but the argument against it—the failure of any indication of the female form in the breast—has no force in view of the character of the *ministræ* as active guards, in whom the sexual type is so slightly developed as to be imperceptible in their fully draped and armed forms.

In the primitive Anatolian period the women *ministræ* must be taken to have been real guardians of the goddess and agents of her government (which she exercised through her priest-king), true Amazons or armed warriors. But history changed: the plateau became a subject land; society, manners, and needs altered, and the *ministræ* necessarily lost their original character. During this change we may believe that their development into the slaves of the sanctuary, as we see them in the more developed period, occurred. There was an element in the old *ministræ*, hinted at in legend, which could be intensified and systematized so as to transform them into the later *hierodouloi*; but the primitive element was essentially different from the organized savagery of the time of the degradation, (2).

(4) *Self-mutilation.*—The most remarkable example of the way in which the individual man imitated in his acts the life of the Deity, was in the practice of mutilation. The fate of the god, the consort of the Great Goddess, had hallowed the act; and it was familiar to all as part of the treatment prescribed by the Divine regulations for domesticated animals. Not merely was it practised on occasion of great religious festivals as a part of the ritual, not merely was it almost certainly the prescribed and necessary condition, originally, for the priest who represented the god in the ritual; it was also often performed on themselves by individuals in a state of religious excitement, induced by some crisis of their own life or of the country in which they lived. On the origin of this ceremony, see § III (7).

This act was alien to the character of Hellenic civilization and religion; and was always regarded with horror and contempt by the Greek spirit as the crowning proof of the barbarity and vulgarity of Anatolian superstition, as in the *Attis* of Catullus (which follows a Greek model).

(5) *Burial.*—In a religion which taught, explicitly or implicitly, that men are children of the Goddess-Mother, and at death return to the mother who bore them, it is natural that great sanctity should be attached to graves and sepulchral rites. In fact the religion of the grave is the religion of the household, and lies at the foundation of religion in general. The dead man, as heroized or deified, was represented under the form of the Deity, and one of the commonest later types was the Horseman-god, § III (5).

This is an exceedingly wide subject; and more can be learned about it than about any other department of Anatolian religion. The principal points may here be briefly stated. See also § IX (1).

The grave was conceived as the house or home of the deceased; and the word οἶκος is sometimes applied to it in epitaphs. But, inasmuch as the dead man is now part of the Divine nature, more frequently the grave is conceived as his temple. His right to the sole possession of it was guarded with jealous care, for, if any unauthorized corpse gains entrance, this intruder will share in the offerings and honours of the temple, and thus in the godhead of the deceased (for the dead man's godhead consists practically in the cultus and offerings paid to him; a god unworshipped is a dead god). It is noteworthy that the sepulchral inscriptions guard far more carefully against intrusion than against mere injury done to the tomb: injury can readily be repaired, but intrusion, if once successful, is hardly reparable.*

Then the making of the grave and the erection of a tombstone was a dedication to the Deity; and the epitaph on the grave was expressed often in the form of a prayer (and, of course, a vow accompanying it) to the Deity with whom the dead person was identified. Even when a person, during his lifetime, prepared his own grave, he expressed the epitaph in the form of a prayer and dedication to the Deity.† It was a duty which one owed to God to make a grave.

Thus every Phrygian grave was also a shrine or temple. Accordingly, there is no force in the argument, which many writers have employed, that such a monument as the famous sculptured rock which bears the dedication 'to king Midas' (ΜΙΔΑΙ ϜΑΝΑΚΤΕΙ) was a cult-shrine, and therefore cannot have been a sepulchral monument. In truth it was both. Similarly, some of the tumuli in the Phrygian land have probably a utilitarian purpose, being intended to serve as watch-towers and road-marks. But they were, in all probability, also sepulchral. It was desired to give them permanent sanctity, and this end was attained by the grave inside, with the religion attached to it. Probably it is not too bold to lay down the general principle that the sanctity of a locality was generally, in the primitive Anatolian system, confirmed by the awe attaching to the grave-temple. That principle remains to a large extent in force still. Sacred places are numerous all over the country; and in almost every one the sacredness is confirmed by, or founded on, the awe attaching to the supposed grave of some saint or hero. The fact that the grave is often demonstrably fictitious (as when the hero is a mere myth, or has several graves in different places) shows how strongly the need for a grave in every holy place is still felt by the Anatolian mind. The primitive custom in Greece of burying in the house, consecrated and guarded the family home.‡

The essential parts of the grave-monument were an altar and a door; and the two typical forms of gravestone in later Phrygia were developments of the altar and of the door. The former at least retained the name, and is called 'the altar' in numberless inscriptions. On this altar-tombstone there is sometimes engraved, apart from the epitaph (and even on a different side from it), the word 'door' (θύρα); and this custom obviously arises from the feeling that a door was essential and must be indicated, even if only by a word. We have already seen that, in later grave-monuments, members which originally had a meaning were indicated by some part of their original form, and became mere conventional ornament. We may suppose that the door was simply an essential part of the house or temple in which the dead god dwelt, while the altar was necessary for the living worshippers to lay their offerings on.[*]

* *Cities and Bishoprics of Phrygia*, i. pp. 99 f., 348 (n. 24).

† These statements, made at first in explanation of the identity in form, appearance, and general character between grave-monuments and stones recording a prayer and vow or dedication, were controverted by Prof. A. Körte; but he has since published a stone whose inscription is purely a dedication to the god, except that at the end the dedicator adds the sepulchral form καὶ ἑαυτῷ ζῶν, proving beyond question that the dedicatory stone was at the same time the gravestone over his intended tomb. We are now agreed that this custom was characteristically Phrygian; but the present writer sees far more examples of it than Prof. Körte admits.

‡ See above, § IV (2); also Ramsay, 'Permanent Attachment of Religious Veneration to Special Sites in Asia Minor,' published in *Transactions of the Oriental Congress at London*, 1892, p. 381.

It was probably on the worship of the dead that the worship of Divine personal beings was built up. The dead parent links the family with the Divine nature. Any inexplicable misfortune or mischance was often attributed by the Greeks to some neglect of this cult, and expiated by special attention to the dead. Among the Greeks the special sacrifice to the dead hero took place on his birthday, and was called γενέσια or γενέθλια quite as often as νεκύσια. Among Christians, on the contrary, the day of death of a martyr was celebrated as his *dies natalis*, birth into his true life.

The cult of the dead was therefore of prime importance, and this applies as much to Greece as to Anatolia. Here, too, the gods had set the example, which was to be followed in the case of men. The grave of Zeus, the grave of Achilles, and so on, formed an integral part of the equipment of their worship. The worship of the heroes, *i.e.* the Divine dead, bulked far more largely in Greek life and religion than would appear from a superficial survey of the literature. This is partly due to the fact that the cult of the dead was part of the half-submerged archaic religion, believed in by all, but not made prominent in public life. But even in the literature it is often evident, and must always be understood as the substratum on which all social life rests.

(6) *Brotherhoods and guilds.*—If the ritual of the Mysteries was used as a sort of sacrament to consecrate or give the Divine sanction to marriage and the other important steps in the family life of man, so that the family was united and constituted and maintained by Divine law, the same seems to have been the case in the formation of associations and unions wider than the family. Such groups played a highly important part in Anatolian society. Originally, in the simplest form of primitive society, there was probably only the one wider group, the village, united in the religion of the central sanctuary or *Hieron* [see (7)]. The ritual of the Mysteries (to use the later Greek name anachronistically) constituted the bond to hold the village together. All were brothers, because all knew in the mystic ritual that they were the children of the Great Mother.

But as life and society became more complex, as towns became too large for a common bond of ritual to hold them (while no common municipal bond existed, such as the Greek city offered), groups of persons with common interests and pursuits were formed, some as trade guilds, some for other purposes. They are known under many names, Boukoloi, Korybantes, Hymnodoi, Satyroi, etc.,[†] but all were united in a common ritual; and an essential part of this lay in the common meal and the cup of which all partook. There can be no doubt that the ceremonial was similar to that of the Mysteries, and was of the nature of a sacrament or religious consecration of the common tie, and yet no direct evidence can be given, or is likely ever to be found. But the indirect evidence seems conclusive: the most general name for the members of any association is *symbiotai* ('those who live in association'), but the term *symmystai* is occasionally used as an equivalent;[*] and this term seems conclusive, for it is inexplicable unless the *symbiotai* were united by the tie of the common mystic ritual.

The unity of the brotherhood or society was consecrated, therefore, by the common meal and the common cup from which all drank: this was the ritual of the Mysteries, according to the formula, 'I ate from the *tympanon*: I drank from the *kymbalon*'; where the names of the sacred instruments of the Mother-Goddess are given to the common dish and the common cup. The Christian idea of breaking a common loaf was perhaps peculiar to Christianity, and due to the direct institution of the Founder: the common meal of the pagan societies probably followed the usual practice of simple Oriental meals, in which each guest has his own loaf, though all eat from a common dish. But that eating from one loaf implies brotherhood is an old idea.

(7) *Government and administration.*—The form of social organization which, in the historical period, was characteristic of Anatolia was the village-system,[†] which is often contrasted with the highly articulated and self-governing municipality (πόλις) of the Hellenes. The people dwelt in groups of houses called villages: at the head of each village was a *komarch*, who represented it to the supreme authority, which in the strict Anatolian system was the priesthood of the neighbouring temple (ἱερόν) as representative of the Divine power in human form. The government was in theory a theocracy: in practice the priest (usually hereditary, according to some uncertain system of inheritance) or priest-dynast was autocratic, as speaking in the name of the Deity. One restriction of his power lay in the fact that intimation of the Divine will was often conveyed to worshippers in dreams; but even in this case the interpretation of the dream usually required aid from the priesthood. 'Beyond this there was no education, and no State, and probably little or no formal law.'[‡]

In what relation this system, as we find it later in practical working, stood to the primitive Anatolian system is uncertain. It shows obvious traces of development, in that the mother has become less prominent, and the male element more important. This line of development was inevitable. Immigrant races were usually insufficiently provided with women; and armed conquerors must certainly have consisted mainly of men. The conquering race, therefore, must take wives from the conquered race; and the social position of women necessarily deteriorated when the conquering caste was mainly men, and the women for the most part belonged to the subjugated people. In the earliest period there can be little or no doubt that theocracy was the ruling system; but the way in which it was worked, and the exact position of women in the priesthood, remain uncertain. Further, we know that there were in early Anatolia imperial systems and great monarchies; but what was the relation in which they stood to the theocracy is obscure. We may be confident that the Herakleid dynasty in Lydia ruled as priest-kings, each new king representing the god Herakles, consort of the Great Goddess (as we see in the myth of Herakles and Omphale);

[†] ᾠκεῖτο κωμηδόν is the expression of Strabo.

[‡] *Histor. Com. on Galatians*, p. 40.

and it is probable that the inheritance passed in the female line, and the king reigned as consort of the heiress.* The natural inference that the same practice existed in the ancient empire of the central plateau, whose chief city was at Boghaz-Keui, and in the later kingdom of Tyana, is valueless, while we have no information as to the relation of this chief priest-king to the priests of the many sacred centres throughout the land (each of which was, presumably, a small theocracy for its surrounding village or villages). The supposition that the empire consisted of a loose aggregate of separate theocracies would not account for the great size and imperial character of the city at Boghaz-Keui; and we are at present reduced to mere conjecture; but evidence is likely to be discovered, when the hieroglyphic inscriptions of the country are deciphered.

(8) *Household protegés.*—A class of persons who are called in documents of the Roman period by various names, *alumni*, θρεπτοί, θρέμματα, θρεπτά, are frequently mentioned in Asia Minor. In the Roman period they are identified almost completely with foundlings, *i.e.* infants exposed by their parents and brought up as a speculation by strangers with a view to selling them for profit: such foundlings were not peculiar to Asia Minor, but known generally over the Empire, and rescripts relating to them were issued by Vespasian, Titus, and Domitian for the province of Achaia, and by Trajan for Bithynia,† and their status and rights formed a frequent subject for Imperial legislation. But in the inscriptions of Asia Minor these *protegés* are mentioned so frequently in epitaphs as to prove clearly that under that name is included also some class of persons peculiarly characteristic of the country. They are generally mentioned immediately after the children, and are sometimes distinguished from and mentioned before slaves, so that it is hardly possible to regard them as *vernæ*, slaves born and brought up in the household, although we would not deny that the term possibly may sometimes have that signification. This class is at present of quite unknown character and origin, but probably it takes us back to a primitive custom — some Anatolian institution similar to, yet distinct from, the Roman *clientela*. In a Bithynian inscription, a husband and wife and their protectress (θρέψασα ἡμῶν used as a noun) have a common tomb: all three have the same *nomen*, which the two θρέμματα must have received from the protectress; but the two were not the children of the protectress either by nature or adoption, for they were free to marry one another. The inscription, No. 36, in *Cities and Bish. of Phrygia*, shows a case in which a child had been exposed in accordance with a dream and brought up by another person, and yet the parents retain some rights over him. The tie uniting the *protegé* and the protector was evidently a close and sacred one; but the subject is one for further investigation, and nothing positive can yet be laid down with regard to it.

(9) *Religious influences on social conditions.*—While immigration, war, and conquest are favourable to the male sex, it may conversely be assumed that the high position of women and the influence exercised by, and respect paid to, the mother in the primitive Anatolian system, imply the long continuance of a peaceful condition amid a settled and, so to say, autochthonous people, such that the importance of motherly care in promoting social development had full opportunity to make itself thoroughly appreciated.

In our brief survey of the prominent features of the primitive Anatolian religion, it has become clear that this religion was originally a consecration of the rules and practices which were useful and almost necessary in actual life. While it cannot be proved in detail, yet all the evidence points to the conclusion, that in this religion the life of a simple community was ordered and prescribed from birth to death in a series of religious formulæ for personal conduct, personal purity, relation to others in the family and the community, management of the household and of agriculture and farm economy. A great deal which, in recent times, has ceased to be familiar to the poorest and the least educated classes was, in that early time, enforced on all as obligatory religious ceremonial. In modern times this growing ignorance of the fundamental principles on which comfort, propriety, and happiness in life depend, is felt to be a serious danger alike among the most civilized peoples, and in the less civilized Christian nations like the Russian. It cannot be denied that the tendency of the Christian Church to concentrate teaching on theoretical dogma and Church ritual, and to lose hold on the practical household life of the people, has contributed to spread this ignorance by gradually allowing the ancient stock of practical household wisdom to fall into oblivion, and sometimes even actively discouraging it as involved with superstition.

We have laid little stress on the barbarous elements in the Anatolian cultus, but have omitted them or passed them over lightly. Partly this is due to the fact that in many cases they seem to result from degradation of the primitive religion, due to the influence of foreign conquerors and immigrants, and accompanied by a probable deterioration of the original people. In other cases the barbarous elements are original, and correspond to the equipments and surroundings of primitive Anatolian society: these might profitably be investigated with a view to acquiring a better idea of that society, but time and wide knowledge on the part of the investigator are required.

The failure to develop the higher side of the Anatolian religion is doubtless due to many causes. The country was on the highway of armies, and the uncertainty and suffering consequent thereon were unfavourable to orderly development, while the best and most spirited element in the people was most exposed to extermination under the successive foreign conquerors. Nothing is more destructive to the highest qualities of human nature than the presence of an entirely uncertain and capricious, yet serious and ever dreaded, danger. In the succession of military conquerors the intermixture of foreign religious elements was often brought about in the worst way, viz. through the instrumentality of a rude, brutal, uneducated, and therefore superstitious Oriental soldiery, which had received not even military discipline.

The unquestioned and absolute domination of a priesthood was also unfavourable to development. The element of prophecy, in the sense of becoming sensitive to the Divine will and interpreting it with reference to contemporary events, was recognized, but seems to have been kept entirely under the control of the official priesthood. Moreover, the succession of priests in Anatolia was largely or altogether hereditary (according to unknown rules of inheritance): this increased the cast-iron and unprogressive nature of priestly rule. If, as seems probable, the chief priest in early times had to be a eunuch, that must have further debased the character of the priesthood. Thus there was no opportunity for the growing wisdom of the national mind to declare itself, since the nation outside the priesthood seems to have been given over to ignorance and practical slavery: or, rather, there was probably no nation and no national life, but merely a congeries of villages.

---

* The evidence is collected by Gelzer in *Rhein. Museum*, xxxv. p. 519 ff. (cf. xxx. p. 5).

IX. HISTORY AND CHRONOLOGY.—(1) *Development of the Anatolian Religion in history.* — It would be impossible in this place to treat even in outline the development of the Anatolian religion. The development was different in every region, varying according to the diverse historical vicissitudes and succession of immigrants and conquerors in each; and the subject would thus be a very complicated one. Moreover, as regards no single region has even any attempt been made to collect and classify the extremely scanty evidence. We can merely quote a very few examples of the process.

In north-eastern Phrygia the Gauls settled during the 3rd cent. B.C. They found there the ancient Phrygian worship of Cybele and Attis. In many instances we can prove that the Gauls adopted the religion of the land, in accordance with the ancient belief that every land has its own deities, whose power is supreme there (cf. 2 K 17^{26}). The religious types on the Galatian coins are entirely either Phrygian or Græco-Roman, the latter character coming in later. The marriage ceremony in the one recorded instance was of the Anatolian type:* this instance belongs to the family of a chief probably of the 2nd cent. B.C., and the noble families were doubtless more ready to change their religious customs than the common people; but Gaulish tribes would follow their chiefs.

It is, however, beyond doubt that the Gauls introduced some modification into the old worship. The Gallic spirit and temper undoubtedly made some impression on the character of Phrygo-Galatic religion. For example, we know that at Pessinus, one of the chief centres, where the spirit of the ancient religion continued dominant and little affected by Hellenism until the latter half of the first century after Christ, an arrangement was made about B.C. 160, whereby half of the places in the college of priests were appropriated to the Gauls and half left to the old priestly families.† We can, however, say little with any confidence about the Celtic element in the Phrygo-Galatic religion. That the Gauls retained the use of the Celtic language as late as the 4th cent. after Christ is certain, but how far they imposed it on the old Phrygian subject-population is uncertain.

But, when we go further back in the history of Phrygia, we find that the Phrygians themselves were immigrants from Europe, who adopted the religion of the native population. The Mother-Goddess was seated in the land before the Phrygians entered it; and mythology retained the memory of the contest between the immigrants and the old religion with its women-guards, the Amazons.‡ The Phrygian conquerors adopted the worship of Cybele, probably imposing their own language on the mixed population. But there is no trace in mythology that the women-guards were retained in the Phrygian system; and we may probably attribute to this crisis the strengthening of the male element in the Divine idea, and the introduction of the worship of the God-Thunderer (Hellenized as *Zeus Bronton*) or the God-on-the-Car, *Benni* or *Benneus*,§ into the Phrygian worship.

On the other hand, a special mode of burial was retained among the priests of the Phrygian land, evidently the old priestly usage. They were placed upright on a rock,‖ whereas in the rock-graves that remain in the country of the Phrygian kings this custom was evidently not followed.

In these two cases we have types of what must have occurred in the many conquests of parts of the country by immigrant races. There was no attempt to exterminate or expatriate the old people and religion. The conquerors took part of the land—sometimes one-third was recognized as the proper proportion—and shared in the established religion along with the ancient worshippers; but they affected the cultus more or less, and imparted to it some part of their own nature.

(2) *Local diversity in Anatolian Religion.* — While we have necessarily directed attention mainly to the common character of religion over the whole of Asia Minor, it must be clearly understood that this community of character was not complete, but that there were great local diversities, which cannot here be properly estimated. For example, the East Anatolian religion of the warlike goddess at Komana, who was identified by the Romans with Bellona, shows a marked diversity from the true Anatolian type; but this is probably to be attributed to racial difference. More warlike and barbarous tribes pressed in from the east of the Euphrates (see § I (3), above), and superinduced a new stratum of religious ideas and rites which belonged to their own tribal character. Similarly, in southern Thrace the Orphic ritual shows a character approximating on one side to the Phrygian, but also revealing clearly a different racial character, viz. that of more barbarous tribes accustomed to eat raw flesh, and giving to this custom a place and a consecration in their religion. This, however, is a large subject.

(3) *Chronology.* — As to the age to which we are carried back before we reach the primitive Anatolian worship in its uncontaminated form, it is not possible to make any positive estimate. The earliest stage in its development that is attested by external evidence is probably found in the subjects portrayed in the rock-sculptures of Boghaz-Keui, which are commonly dated somewhere in the second millennium before Christ. But there we are already face to face with a stage of contamination with the religion and cultus of a people from the east or north-east (perhaps in some degree also from the south-east)—a people who superimpose a new and incongruous stratum of religious, social, and governing ideas on the primitive forms.

Nor is it certain by any means that the Boghaz-Keui stratum was the first stage superimposed on the primitive religious foundation. Those sculptures are of such a highly complex character that they have as yet resisted all attempts at a complete solution; and none of the attempts at a partial explanation has commanded general approbation among scholars. For practical purposes the sculptures are still a mere riddle; and hence we have been unable in this study to make any use, except in a few superficial details, of these earliest and most elaborate religious records of Anatolia. But the very fact that they are so complicated and obscure furnishes probably a sufficient proof that they are not the records of a simple cultus, but of one which had already passed through a complex process of development and contamination.

Thus we are reduced to the study of the development from the inside — a method always unsatisfactory, because subjective and liable to become fanciful, but specially unsatisfactory on the chronological side, for only contact with external facts gives any marks of time. In the development we are struck with the tenacity with which primitive characteristics were retained, readily distinguishable from the added elements; and the primitive character seems autochthonous.

springing from the land, stimulated by its atmosphere, and imposing its character in some degree, more or less, on every new people or religion that entered the land.

The character of the plateau marks it out as an early home of human culture. The soil is fertile, the country is level and little exposed to dangerous animals, and in certain districts, where water is naturally abundant, cereals are naturally produced in sufficient quantity to furnish regular food to an early race of men. The art of agriculture was there taught almost by Nature herself, who thus revealed herself as mother and teacher of her people. The art of irrigation was also taught there by the same kindly mother: in some places it is so easy that the life-giving stream, flowing from a great heaven-sent spring (§ IV (3)), seems to invite men to divert and distribute its waters. The art, when once begun, was readily extended, and a country, which is now almost entirely uncultivated, and part of which is loosely indicated on Kiepert's map as *désert salé*, is shown by the remains to have supported many towns and cities in early times.* Step by step, and precept upon precept, the Goddess-Mother, the Thesmophoros of the Bœotian plain and the Athenian plain (see B, § II), educated her people; and showed them how to make the best of the useful animals, swine, ox, sheep, and goat, and later also of the horse, by proper nurture and careful treatment and breeding. The history of the education which she gave remains for us in that Anatolian religion of which some faint outline has been traced in the preceding pages.

If our view is correct, it is obvious that in a better knowledge of the Anatolian worship lies the key to an extremely early stage of human development; and that this religion has to be compared with the most primitive stages of the known ancient religions of the east Mediterranean lands. As a rule, even the most ancient Semitic cults are known to us chiefly in a considerably developed stage; and the Anatolian religion takes us behind them. In that land true religious development was arrested by causes at which we might guess; and the primitive revelation of the Mother-Goddess found no prophets and seers to carry it to completion: see § VIII (9).

B. *THE HELLENIC RELIGION.*—In studying the development of thought in the strictly Greek lands, we are inevitably carried back to an ancient form of religion there prevalent, which presented a marked similarity to the simple primitive Anatolian cultus. The extent and the limits of the similarity cannot be determined with our present knowledge. But everywhere, in attempting to comprehend the developed Hellenic religion, one finds that it rests on this substratum of deep religious feeling, which sometimes was hardly articulate, and in that case was often rather looked down upon as superstition and δεισιδαιμονία (Ac 17²²) by the more educated and philosophic minds.

I. EARLY GREEK RELIGION.—Frequent references occur in Herodotus to an older Greek or Pelasgian religion different in character from the religion of which he conceived Homer and Hesiod to be the organizers (ii. 53). Arcadia he believed to contain more of the Pelasgian character than any other part of Greece. Precisely in Arcadia and the adjoining parts of the Peloponnesus, the strongest traces of such a pre-Hellenic religion are shown in the description of Pausanias. According to Herodotus (ii. 53), the gods of that old religion had no names and no images. The meaning of this statement is that statues (ἀγάλματα) in the later sense were not used. Symbols of various kinds, however, existed in greater number and variety perhaps in Arcadia than in other parts of Greece; but Herodotus, who was speaking of the anthropomorphizing tendency in religion, would not call those rude and non-human embodiments ἀγάλματα. Epithets of a more general character were attached to these gods, but not proper individual names: among these epithets we may reckon 'the Great God or Gods' (θεὸς μέγιστος, θεοὶ μέγιστοι), 'the Pure Gods' (θεοὶ καθαροί), 'the Good God or Genius' (ἀγαθὸς θεὸς or δαίμων), as well as 'the Propitiated Gods' (θεοὶ μειλίχιοι), 'the Revered Ones' (Σεμναί), 'the Kings' (ἄνακτες).

In this religion the worship of the Earth-Goddess appears in various aspects. She is sometimes the physical conception, but more generally is conceived in a more moral aspect, as the orderly harmonious march of physical phenomena, under such epithets as Themis, Harmonia, etc. This order is an avenging power that punishes all offence against itself: it is then Praxidike, Adrasteia, Nemesis, etc. It is also connected with happiness, wealth, and prosperity, and the goddess is then Tyche, Chryse, etc. The goddess is often accompanied by a male genius or deity, described as her husband or brother or attendant or child. He appears as the ἀγαθὸς δαίμων, the protecting hero, or the genius of fertilizing power.

Traces of this religion may be found in most parts of Greece: in Attica, in Bœotia, and the Northern islands, as well as in the Peloponnesus. The goddess is akin in nature to the Italian *Bona Dea*. It is a pre-Hellenic religion, but it has much of the Greek spirit about it. The deities have in many cases as much of moral as of physical character; Themis becomes a Hellenic conception. The relation of such older forms of belief to the true Hellenic religion is well given by Æschylus (*Eumen.* 1 ff.) in his history of the oracle at Delphi, where the gradual change from the first Gaia to the latest Apollo is clearly shown. No conflict is there said to take place, but the older religion merges in and is recognized by the later, so that the purely physical conception of the Earth (*Gaia*) is moralized and harmonized into Themis, and Themis is elevated into the highest Hellenic type, Phœbus Apollo, through the intermediate stage Phœbe, who is evidently a mere device to facilitate the transition in sex, as the god Phœbus inherits in right of his sister Phœbe. On the other hand, Æschylus (*Agamemnon*, 178 ff.) describes the relation of the Hellenic Zeus to the older dynasty as that of a conqueror and almost a destroyer.

These passages are important as showing that the Greeks always retained the recollection of a certain succession and development in religion, and occasionally they connect it—and in our view rightly—with the succession of races in Greece, where the later conquered without destroying the older.

The development of the Earth-Goddess into Themis was exactly paralleled by that of the older Demeter into Demeter *Thesmophoros*, 'the introducer of *thesmoi*' (θεσμοί, 'ordinances'), who is known chiefly in Bœotia, the plain of Athens, and Paros. The agricultural idea lies at the bottom of her chief festival at the time of the autumn ploughing and sowing. But that fundamental reference was merged in another idea, viz. the analogy between the continuation of the human family and the operations of agriculture.* The goddess Thesmophoros founded and presided over social order, family life, the functions of women, and the birth of children; marriage was the chief *thesmos*,* and the priestess Thesmophoros gave some instructions to newly married couples. A Hellenic touch lies in the custom of giving prizes to the most beautiful women in Arcadia, and apparently also at Thermopylæ.† Here two great Hellenic ideas, love of beauty and liking for the competitive principle, are united in the developed form of the rites; but the goddess whose festival was thus honoured was Eleusinia and not the more primitive Thesmophoros.

---

* The 'nomadization' of Asia Minor has been the chief cause of the present desolation: see *Impressions of Turkey*, p. 103, and the paper already quoted in *Geographical Journal*, Sept. 1902.

* Cf. Soph. *Œdip. Tyr.* 1497; Æsch. *Sept.* 753; Eurip. *Phœn.* 18, etc.; also the old Attic legal formula *ἐπ' ἀρότῳ παίδων γνησίων*. See A, § VI (2), (3).

The resemblance of this Demeter Thesmophoros to the outlines of the Anatolian Mother-Goddess, as it has been traced in the earlier part of this article, is too obvious to need any words; and Herodotus points out (ii. 171) that the *Thesmophoria* rites were formerly practised by the Pelasgian women of the Peloponnesus, but perished when the Dorians conquered the country, except in Arcadia, where the primitive population and ritual remained. Moreover, the worship of the goddess Thesmophoros was confined to women (which markedly distinguishes her worship from that of the Eleusinian Demeter), and swine were sacrificed to her by throwing them alive into holes in the ground. These are very primitive characteristics, and show that the cult of this goddess had not been developed so much as that of the Eleusinian goddess, who is in the myth marked as an immigrant with a long history of growth out of her Pelasgian germ.

Pausanias is sometimes inclined to identify those earlier conceptions with Hellenic deities. He feels that 'the Good God' must be Zeus;‡ but about the nature of the two *Anaktes* he expresses doubt, which proves that he was struck by some marked difference between them and the two Dioscuri. In short, the Greeks felt that those gods whom they counted older, and sometimes called Pelasgian, were different from their own gods, and yet closely related to them. The succession is sometimes described as the inheritance of child from parent, sometimes as the acquisition by victor from vanquished and even exiled gods. Those old deities were not in harmony with the later Hellenic gods; there belonged to the older a graver, sterner, and more solemn character; yet there were implicit in them the germs of the double Hellenic conception of Olympian and Chthonian deities, on which see § V, below.

The conservatism with which, as a rule, the old cult-ideas were preserved in Greece and allowed a certain scope alongside of the later, give great historical importance to the study of Greek religion. Often the institutions of a bygone age retained a religious existence long after they had disappeared from actual society.

II. GREEK RELIGION AND GREEK LAW.—That early religion was practically coextensive with the whole circle of public and private life. Religion was the only sanction which originally existed to enforce a custom or strengthen an institution; religion impressed these on the people by constituting them into solemn rites binding on all. When in the development of the Hellenic system political institutions grew and law became a power, the legal sanction to some extent replaced the religious sanction.

One by one the various branches of duty between members of the State were taken into the circle of law. In earlier times this was often done under the advice and approval of the oracles (especially the Delphic). One set of duties after another was formulated as a branch of public law sanctioned by stated punishments and penalties. In various cases the old form was continued alongside of the later, and the offender against a law was not merely punished legally, but was also formally cursed, *i.e.* handed over to the punishing care of Heaven. The Court of Areopagus in Athens well exemplifies the gradual transformation of the religious into the legal sanction, with the religious forms persisting to some extent alongside of the legal.

But the old sanction in its primitive form continued to reign in the circle of family duties and rights, the duty of children to parents and of the younger to the older, the right of children to protection and care at the hands of their parents, of the poor to the charity of the richer, and of the stranger to hospitality. It was the *Erinnyes*, the old vague conception of the avenging power of nature, older almost than the conception of personal gods, who punished any infraction of those duties and rights.* Here a conception akin to the primitive one reigned in the developed Hellenic thought. The *Erinnyes* of the father, of children, of the poor, protected their rights and punished the violator; in other words, punishment was left to Divine action, and rarely interfered with by human law. Even the inviolability of the oath is described by Hesiod as protected by the *Erinnyes*, who punished bad faith alike among gods and men.†

In the sphere of international law, heralds went between States as Divine officials (*κήρυκες Ἑρμοῦ*). A species of international custom, not formulated into law in the strict sense, was recognized as existing between Hellenic States, but not between Greeks and barbarians;‡ but it was considered to be Divine or unwritten law, it depended on the conscience and feeling of the individual State, and was regarded by some more than others. By the religious, however, it was considered more binding than the formal laws.§

Thus religion continued to be a sort of completion of public law. Where the latter was insufficient or inapplicable, or beyond the reach of the sufferer, the religious sanction was invoked in the form of a curse. Especially, international obligations were guarded by little more than the religious sanction. Any idea of Hellenic unity which existed had been the creation of religion; and the rights of even the Greek stranger or traveller, much more of the non-Greek, were almost wholly left to religion. Law was mostly confined to the relations between one citizen and another; and in the cases where (as in Athens) it touched the relation of a resident stranger to citizens, the stranger must be represented by a citizen, and could not himself have any standing before the law. Similarly, the traveller was under the protection of the gods of the road.

III. THE ELEMENTS OF HELLENIC RELIGION.—Beyond other traceable but less important influences, three forces pre-eminently are to be distinguished in the history and formation of Hellenic religion. There was, first, that above-described pre-Hellenic cultus in the Greek lands, to which we may, like the Greeks themselves, apply the name Pelasgian: that cultus had certainly a very strong resemblance to the primitive Anatolian worship, and we have freely used certain obviously primitive ceremonies of the Greek lands as evidence of the character of the old Anatolian religion.

---

* *Odyssey*, xxiii. 296, *λέκτροιο παλαιοῦ θεσμον*, is a faint echo of the religious idea.

§ *ἄγραφοι νόμοι, ἄγραπτα νόμιμα*, Soph. *Ant.* 454.

Into the question whether it spread from Anatolia into Greece, as so many later religious impulses did, we shall not enter, though it may be pointed out that the Greeks believed themselves to have derived some very characteristic early forms of Greek cult from Crete, which in its turn was certainly connected with and influenced by Asia Minor.

There was, in the second place, the influence exercised by surrounding nations on early Greek history and religion. Only one side of this influence can be considered here, viz. the Oriental. Under the name of Oriental may be included all influence which came from Asia Minor during the period commonly called historical, as well as all traces of Phœnician or other strictly Asiatic influence. There was certainly great importance attaching to this influence; yet its true character must be noted. It did not make Greek ideas, but was simply the raw material out of which the Greek mind drew part of its growth. The Greek mind, with its eager, ardent curiosity, learned from all its neighbours, and most of all from the most advanced neighbours.

In the third place, there was that special quality and tendency of the Hellenic mind, a unique and exquisitely delicate element, which selected and moulded, moderated and regulated, mixed and added life to, the food which it absorbed from the experience and the acquirements of various other nations. That spirit of Hellenism stood in such obvious relations to the peculiar geographical and other external conditions of Greece, that some writers regard it as absolutely produced by them.

But, in our view, there was a certain innate intellectual character in the formed Greek mind, which enabled them to see in nature what no other race could see, and to use opportunities as no other race could have used them. The spirit of Hellenism, it is true, was fostered by the geographical conditions, and could have acquired strength in no other land. It needed just those peculiar relations of sea and land to foster and strengthen it; it was, like the most delicate and exquisite of Hellenic goddesses, born on the sea, not on the land; but that sea must be the Ægean, the path and the roadway of the Greek peoples, which united the Greek lands instead of estranging and separating them (as other seas seemed to do).

One of the most noteworthy forms in which the strong Hellenic appreciation of individual personality and rights (without much feeling of individual duty) showed itself was the love of competition and prizes. The individual Hellene trained himself to the highest pitch attainable in competition with his fellows, and his eagerness was stimulated by the prize of victory. The prize, in the true Hellenic idea, was simply the victor's garland, the recognition by his peers that he had won the victory. In the early stages of Hellenism the mere honour of victory was hardly sufficient to tempt the competitive ardour without prizes of value; and when in later times the Hellenic games were introduced in the Asiatic cities, it was the custom there to give valuable prizes (θέματα); while even the Hellenic contests in that later time were made practically valuable by privileges and money rewards from the victor's own State. Only in the fullest bloom of the Hellenic spirit were the honour and crown sufficient to attract all Hellenes.

Many religious ceremonies were modified or developed by the introduction of such competitions. While the barbarism of primitive funeral rites was developed by the Romans into gladiatorial combats, it was developed among the Greeks into the system of funeral sports and prizes. The crown of wild olive, which originally was simply the garland of the foliage sacred to the god, worn by every worshipper at Olympia, was by the Hellenes given as a prize to the victor in a competition.

The view, then, which we take is that the character of Greek religion arose in the country, and sprang from the Greek genius, which took into itself, assimilated, and gave new life and character to elements gathered from its own past and from every race with which the Greeks came in contact, so far as those races offered anything worth learning; but in this process the Greek spirit, so long as its bloom and vigour lasted, only grew more and more intensely Hellenic. The more the Greeks learned from Phœnicians or Phrygians, the more unlike them they became. In many of the Hellenic deities there is a certain Oriental element, but how utterly different in character and spirit is the Hellenic Aphrodite from a Phœnician goddess. Although Aphrodite, as she was worshipped in the cultus of the Greeks, bore strong traces of the ugly, gross, material Orientalism, and though Phœnician elements in origin can be assigned to her more confidently than to any other Greek deity, yet the Hellenic genius is almost more conspicuous in the graceful, exquisite, smiling Aphrodite of the *Iliad* than in any other Greek deity. The Greek spirit could make her beautiful without making her moral in the modern sense.

IV. THE GROWTH OF HELLENIC RELIGION.—(1) *Continuity of development.*—The Hellenic religion which was built on that older Greek foundation had in itself little of true religious character and depth. It was in many ways a beautiful development of artistic feeling, harmony, and grouping, instinct with the Hellenic sense of individual rights and liberty, and indissolubly intertwined with the political institutions of the free, self-governing, progressive Greek City-State. The city was the highest creation of the Hellenic genius, with its free institutions and its education of the individual man; and the Hellenic religion was the ideal counterpart of the Hellenic city.

But, when we try to sound the real religious depths of the Greek nature, we must go to the worship of the dead or of the sacred stones (the *Hermai*), or the mystic worship of the deities of the old Pelasgian type. Yet the difference between the old religion and the formed Hellenic worship does not amount to absolute opposition. The later grew out of the earlier by a simple process of easy development. No definite and unvarying line divides the older gods of Greece from the properly Hellenic gods. There is hardly one of the latter who has not also in some district, or on account of some aspects of his worship, a place among the former.

(2) *Growth of mythology.*—The old personages of myth and religion continued to acquire new meaning and character amid the historical vicissitudes of the people. Just as among the Germanic and Scandinavian tribes the old Aryan tales took on a Christian character in their later development, so the old pre-Hellenic Divine personalities bear the impress of later history, or (to vary the metaphor) formed centres round which the floating beliefs and facts of later times gathered. Thus the name of Zeus goes back to the primitive Aryan stock, but he came to be the bearer of new thoughts and ideals in the Hellenic mind. To admit that Cadmus represents a Phœnician element in Greek history does not necessarily imply that Cadmus must be a Phœnician name. To take a typical case of a markedly late development: As the Oriental seclusion of women began to spread among the Greeks in general, the familiar use of boys and male favourites in domestic service, with the vices that accompanied this custom, became general. As was invariably the case, a mythical or religious parallel and example was

found, and Ganymedes became the mythical representative of the new custom in all its worst features. But, while one recognizes this, one may carry back the history of the mythic figure Ganymedes much further, and see in him one of the numberless local impersonations of the freshness and bloom of nature, the Good Genius who came from heaven and returns again to it.

The old legends can be traced in Greece in never-ceasing transformations. They appear in the Lyric poets in a very different form from what they bear in Homer; and the Tragic poets take them and again remodel them, while in Pausanias we find occasional traces of local forms differing from all the literary embodiments. The Odysseus of Homer is not the Odysseus of Sophocles. But the inference, which has sometimes been drawn, that the Tragic poets did not know the Homeric poems in the form in which we possess them, has no validity. The Lyric and the Tragic poetry represent a deeper phase—certainly a very different phase—of thought and religion from the Epic; and those later poets treated the myths as their poetic or dramatic property, and read in them or into them the thoughts of their own time.

(3) *Polytheism and the Hellenic unity.*—The older Greek religion, as we have seen, was comparatively simple. There was not a large number of gods worshipped in any one district. But the conception and names of the Divine beings varied in different districts to some degree. Though fundamentally the same, the idea of 'the God' tended in each district to assume some of the special character of the people, and to run through a special kind of development according to the succession of immigrant tribes or the varying experience of the original tribe. New religious conceptions came in with new tribes. The special deity of each race reflected in his nature the whole history of his people. The power of each deity was confined to his own district and the circle of his own worshippers.

But the idea of Hellenic unity became a political force, founded on a religious basis and strengthened in the literary development of the country. This unity was merely ideal, and never became a political reality: it was a power which exerted a certain influence on events: it was an end which some persons saw dimly before them in the distance. The Delphic Oracle was to some extent guided by that ideal in the leading which it gave to the Greek States when they consulted it; but its influence was never directed to modify the character of local or tribal religion. It always supported the established customs of each State. But it favoured uniformity by introducing new gods (*πυθόχρηστοι*) into almost every city of Greece: *e.g.* Aphrodite, Dionysos, Demeter, and Kora were all introduced at Erythræ by oracles from Delphi. Thus the local religions tended towards a common type by adopting each other's gods.*

Political or social unity, to the ancient mind, could exist only through common religion. Those who worshipped different gods and practised hostile religious rites could have no unity. Therefore, as a Hellenic ideal unity grew, the varying religions of the various States composing that unity could not be felt as essentially different from or really hostile to one another. If there was an ideal unity in the political sphere, there must necessarily be an ideal unity in the religious sphere; and the gods of one Hellenic State were recognized as gods by the others. Those gods quarrelled with one another, as brothers and sisters quarrel, or as the Hellenic States warred with one another. But the States met in the common recognition of the Hellenic deities. Especially the four great Pan-Hellenic games—Olympian, Pythian, Nemean, and Isthmian—formed peaceful meeting-places for all Hellenes, where religion kept the peace and all celebrants felt the benign influence of the Hellenic gods.

(4) *Formation of the Hellenic Pantheon.*—But when all the various gods who obtained Pan-Hellenic recognition were thus set side by side, the religious consciousness demanded some theory of the relation between them. Various theories, in which a religious system was built up, came into existence. But out of these the great unifying forces, literature and the Delphic Oracle, formed a generally recognized Pantheon. No two expressions of that system are precisely the same. Different writers conceived it with slight variations, but the general type is clear. The conception of a household, as it were, consisting of twelve great deities is found in several parts of Greece; but it was far from being universal, and the twelve selected were not everywhere the same. Again, in no district did the Hellenic Pantheon correspond exactly to the actual popular religion.

Everywhere both literary and popular conceptions tended towards a common form, which had its root in the popular mind and the popular ideas. It was the great poets who most of all gave shape to it, and made it familiar over the whole country and in the Greek colonies. Hence the popular Greek idea that the Hellenic religion was the creation of Homer and Hesiod had a certain truth. They beyond all others gave expression to the popular tendencies, and were the chief instruments in moulding the recognized, or, as one might almost call it, the 'orthodox' Greek Pantheon.

(5) *The Hellenic Religion an ideal.*—This common religion, which we shall continue to term the Hellenic religion, must be carefully distinguished from the actual religion of any single Hellenic State. Like the political unity which originated along with it, the Hellenic religion was much more an ideal than an actual, realized fact. Its centre and crowning idea is the supremacy and almighty power of Zeus; but very seldom do we find that Zeus is in actual worship the most important god of any State. In Athens, *e.g.*, Athenaia was the great divinity and tutelary goddess of the State; and her festivals were celebrated with greater magnificence and public interest than any others. The honour and safety of the State were bound up with her worship, not with that of Zeus. Zeus, at least so far as actual ritual is concerned, occupied quite a secondary position.

But under this local diversity it is clear that a general likeness existed. We can hardly consider that men who merely performed stated ceremonies had a religion. That term we can use only with reference to men who thought about the ideas involved in these rites; and it was the approximation to a general Hellenic type in their local religion that engaged general attention. Though they spent most care and most money on the festival of Athenaia, of Hera, or of Poseidon, their thought was concerned most with Zeus as *the* god, and with Athenaia or the others only as his representatives. Especially is this common or Hellenic religion the religion of the literature to which the most thoughtful men gave shape. But a national literature, though it be in advance of the prevalent standard of thought, is not in opposition to it. Homer and Plato only gave clearer form to the thoughts that were present in all educated minds. This common character, this Hellenic religion, is the true line in which the actual religion of Greece tended to develop. All intercourse of Greek with Greek, all education, all feeling of pride in their common blood and nationality, tended to foster it throughout the country, but, of course, in unequal degree according to the unequal strength of these influences in different parts of the country. Hence the Hellenic type was not equally apparent everywhere, just as it was not equally realized by all men. Some tribes went more rapidly, others very slowly, but all were tending in one direction. Various lines of argument lead to the conclusion that this Hellenic religion assumed a definite form by the middle of the 8th cent. B.C. Changes continued to take place, new ideas were added, new gods and new rites were popularized after that date, and indeed down to the latest time when Greek gave place to a new religion, which was thoroughly non-Hellenic and even anti-Hellenic, though to some considerable extent it has been influenced by Greek ideas. But at that period the religion of Hellas seems to have assimilated all its essential elements and to have established itself as a power over all the Greek tribes, which acted chiefly from a religious centre recognized by all the Hellenes —viz. the Delphic Oracle.

---

* *νόμος πόλεως*, Xen. *Mem.* iv. 3. 16; Dem. *Mid.* § 51.

In fact, from that time onwards it was not so much blood or locality that determined the right of different tribes to the common name of Hellenes, as recognition of this Hellenic religion and participation in the Hellenic rites.

The history of the Greeks in modern times presents a remarkable parallel. For centuries the Greek religion was the only bond that held together the Greeks in different regions. Every other bond was gone. No Greek government, education, or literature existed. The national name had perished, and the people were serfs to a barbarous race. The tie of language had in many cases disappeared, and even at the present day there are Greeks in Asia Minor who do not know a word of the Greek tongue. Community of blood was confined to a small part of the Greek world, so called. But the religion remained to unite the people, and it proved a stronger tie than any other. Cretans of the Greek Church are Greeks, Cretans whose fathers became Mohammedans are non-Greek. This common religion was enough to preserve all the old feeling; and when the country was awakened from the sleep of centuries, when education and literature came in to help, as strong a national feeling and as complete a severance in the national mind between Greek and the rest of the world have been made manifest as ever existed in olden times. In the western parts of Asia Minor the movement can still be watched in progress. The schools have not yet been universally established, but, wherever they have been planted, a single generation develops the religious feeling into a strongly national one.

(6) *Theory of the Hellenic Pantheon.*—Further, there was a polytheistic element in the primitive Greek religion; and there grew up very early an idea that around the chief deity there were other great deities, in whom the Divine power existed in more narrowly circumscribed fashion: thus a system of higher and lower divinities was formed in such an ancient cultus as that of Eleusis. In the growth of a unified Hellenic religion this idea was developed. According to this system Zeus is the supreme god, father of gods and men, protector of right and punisher of evil: as Ἑρκεῖος and Κτήσιος he is the patron of family and household, as Ξένιος and Ἱκέσιος he is the guardian of hospitality and of friendly intercourse between different countries; finally, he is the protector of cities and public life, and the fountain of law and of morality: from him originates all revelation of the will of heaven (Πανομφαῖος). His will is fate; and the course of events is the gradual consummation of his purposes. In the whole *Iliad* the will of Zeus was wrought out (Διὸς δ' ἐτελείετο βουλή). In the tale of Melampus and Iphiclus, as it is narrated in the *Odyssey*, xi. 290 ff., the fate from the god fettered the prophet, but, when the full time came, he was released and the purpose of Zeus was perfected. The other gods and goddesses are the ministers of the will of Zeus. Each has his special province: Apollo speaks to mankind in oracles what Zeus wishes to reveal; Hestia is the goddess of family life; Poseidon rules the sea; and so on.

The province or sphere of action assigned to each deity * in this Hellenic idea had not much influence on the local cultus. When we take the Hermes of Imbros we find, not the Hellenic idea of the messenger of Zeus, but the Imbrian idea of the Divine power. But the Hermes who was adopted in many Greek cities under the Hellenic impulse was the Hellenic idea; and the popular view approximated to the Hellenic view. The average Greek thought of Aphrodite as the deity of love and beauty, Hermes as the god of heralds, and so on, irrespective of the cultus; and their names passed often into proverbial popular usage in this connexion.

This religion as we find it in Homer was practically the general religion of Greece. While in each district the same gods as of old were worshipped with special care, and the regular *cultus* at their sanctuaries was traditionally fixed among the priests, the other Pan-Hellenic gods were recognized beside them, and occasionally a Pan-Hellenic cultus even eclipsed the native worship. Thus at Olympia, Hera (perhaps associated in the Holy Marriage, ἱερὸς γάμος, with Zeus Καταιβάτης, the naturalistic deity) was the native goddess; but the festival of Zeus Olympius, a later institution, far surpassed the older worship in magnificence. In general, however, the native worship remained the chief one, and the 'orthodox' Hellenic system was recognized either by altars and worship of other gods separately, or by an altar of all the gods or of the Twelve Gods. See (14).

(7) *Moralization of the Hellenic gods.*—The most important element in the progress of Greek religion lay in the tendency to make its gods more and more into moral conceptions. In the case of the greater gods, the physical character that had once belonged to them almost entirely disappeared from the Hellenic mind. In this respect the view of Homer may be taken as identical with that which prevailed generally during the 6th or 5th century. The gods are concerned with human life and human action; they influence the course of nature solely as a means of aiding or hindering the works of men. While the gods had thus become almost purely moral conceptions, the tendency to see Divine life in external nature remained as strong as ever.

(8) *The Daimones and the Divine in the physical world.*—When once the tendency to polytheism had been established, it increased rapidly. The physical world was filled with Divine beings. Every place, every natural object which impressed men with its beauty or solemnity, became to them the seat of a deity. The nymphs of the old Pelasgian religion formed a convenient expression for this pantheistic idea; and nymphs were seen in every tree and every stream, every glen and every mountain.

In moral conceptions a Divine nature was equally conspicuous; and altars to Pity, Shame, Friendship, etc.,† were erected in different places. Many of these names are known as actual epithets of different deities; Athena *Ergane* and Athena *Nike* are well known; Artemis *Eukleia* was worshipped at Thebes. Ara or the Arai are sometimes an independent conception, sometimes a name of the Erinnyes or Eumenides. In such deities as Eros or the Charites we have forms which were in some instances worshipped as the great embodiment of the Divine conception and chief gods of the places (so Eros at Thespiæ, the Charites at Orchomenos); but generally they were only inferior figures attendant on the great gods. The Greeks themselves found it difficult to determine how far a god as worshipped under two epithets continued to be one being. Socrates (Xen. *Symp.* c. 8, 9) knows not whether there is one Aphrodite or two, Ourania and Pandemos; for Zeus himself, whom men count one, has many surnames. Xenophon was wont to sacrifice to Zeus Soter and Zeus Basileus; but a soothsayer of Lampsacos showed him that he had sinned in not sacrificing also to Zeus Meilichios. It cannot here be accidental that Xenophon's first sacrifices acknowledged only the Olympian religion, whereas Zeus Meilichios is a Chthonian deity. Solon's laws ordered that men should swear by three gods, Ἱκέσιος, Καθάρσιος, Ἐξακεστήριος; but these, though expressly called three gods, are obviously epithets of Zeus. It is therefore not surprising to find that epithets gradually tend to acquire distinct personality and a separate worship.

---

* τιμὰς καὶ τέχνας διελόντες, Herod. ii. 53.

† ἔλεος, αἰδώς, φιλία, ὁρμή, φήμη, φόβος, γέλως, εἰρήνη, ἐργάνη, πειθώ, εὐνομία, εὔκλεια, σωτηρία, ὁμόνοια, καιρός, νίκη, ἀρά, κ.τ.λ.

This tendency is seen already in Homer, who personifies the Λιταί. The sea-monster Scylla he calls a goddess, and Chimæra, Echidna, Sirens are godlike beings (θεῖον γένος). So pestilence and hunger are called gods by Sophocles (*Œdip. Tyr.* 28) and Simonides of Amorgos (vi. 102). These and all other striking instances of natural power, real or fabulous, were equally representative of the Divine nature. The term *daimon* (δαίμων) was often applied to such powers. In Homer the term δαίμων denotes a distinctly less personal conception than θεός: hardly anywhere except in *Il.* iii. 420 is a special god called δαίμων: the δαίμων is bearer of the Divine power which works in nature and in human life: the δαίμων has not been so formed, bounded and defined by mythology and cultus as θεός: δαίμων is sometimes even used impersonally (especially in the *Odyssey*) in the sense of *numen.* There is a certain tendency in Homer to attribute a bad influence to the δαίμων, and the preponderance of evil is distinctly marked in the *Odyssey.**

In the post-Homeric usage δαίμων acquired a more definite meaning, and was applied to certain godlike beings intermediate between the great gods and mankind. In Hesiod the spirits of men of the Golden Age are appointed by Zeus to watch and guard men, and are called *daimones,* and the name is also applied to Phaethon, appointed by Aphrodite as guardian of her shrine. Hence it is generally applied to the train of inferior beings attendant on the chief gods, as Satyrs, Corybantes, Erotes, etc. (Plato, *Legg.* 848 D). These *daimones* are often conceived as the executors of the will of Zeus in particular cases.† The analogy with some phases of the Hebrew doctrine of angels is interesting. In Arcadia men sacrificed to Bronte and Astrape, evidently *daimones* of Zeus. Wind-gods‡ are worshipped in a similar fashion, though they are not expressly so named. *Daimones* as companions and guardians of individual men are mentioned by Theognis (161 ff.), and frequently in later authors.* The words εὐδαίμων, δυσδαίμων probably imply such a view. They are not found in Homer; and ὀλβιοδαίμων (*Il.* iii. 182) is one of many suspicious expressions in the passage where it occurs. Εὐδαίμων is used by Hesiod (*Op.* 824). The Roman idea of a genius of city or people is not found till a late date. After the Christian era the *Tyche* of the city was worshipped; and the head of the city-goddess appears on coins. This, of course, must be distinguished from the genuine ancient cult of Tyche.† In Athens a cult of the *Demos,* alone or along with the *Charites,* is mentioned in inscriptions of the last cent. B.C.

Some order was introduced into this motley throng of Divine beings by the idea of a train of inferior deities attendant on each of the greater gods. Dionysos had a troop of followers from Sileni and Satyrs down through all grades of life to wild beasts. The train of attendants is a sort of epitome of the sphere of action belonging to the god, and that of Dionysos represents all phases of the life and energy of nature which are included in the special significance of that deity. So it is with many other gods. All the deities and *daimones* of the sea form a court round their sovereigns Poseidon and Amphitrite. To Aphrodite is attached every variety of love and grace, Eros, Himeros, Pothos, the Charites, etc. Art had much to do in determining the form of all these trains of beings; and they seldom attained such importance as to be recognized in public cult.

(9) *Restrictions on the nature of the gods.*—The originally restricted character of the Greek gods continued to cling to them. Their power was once confined to a narrow district, their worship to a small circle. As the gods changed from physical to moral conceptions, the range of their power widened, and the circle of their worshippers was increased; but still there was a universal feeling that a defined boundary did exist, and that new worshippers were admitted into a select and exclusive company. The cultus of a god was often transferred to a new place, where his worship was established in a form as closely as possible resembling the original (ἀφίδρυσις); but blood and race were usually the cause of such a transfer. The worship of the mother city thus spread to the colonies. When smaller communities were concentrated in a great State, as the Attic towns were in Athens, the worship of each was transferred to the central city; and the chief festival of the god was constituted a memorial of the original transfer by a procession to the ancient seat of the worship. Thus the old image of Dionysos was taken from Eleutherai to Athens, and an imitation left in its place. But the Eleusinian worship was left in its own home, with Athens as a secondary seat of the cultus.

This process was common in Greek history, and a well-known example in historical times is the foundation of Megalopolis by Epaminondas, in order to establish a centralized Arcadian State in counterpoise to the power of Sparta. When this was done the gods and worship of the minor States were incorporated in the greater, and the memory of their relation was kept up in the annual festival and procession between the cities. The importance of this custom for the development of inter-communication in Greece has been well shown by Curtius.‡ A system of roads to connect the chief city with the minor ones was a necessity of the growing cult. When the worship was left in the minor State as too holy to be disturbed, a road between the two cities was equally required. This conception of the roads is related to the utilitarian view described in A, § I (1), etc.: the use of the roads for the god's service was the guarantee and consecration of their usefulness for all his worshippers, and ensured that they were respected by all who reverenced his power.

---

* Kröcher, *Gebrauch des Wortes* δαίμων, reckons that the word occurs there eighteen times in action unfriendly to men, fourteen times indifferent or friendly. Fick derives δαίμων from the root *das,* 'to teach,' and identifies it with the Sanskrit *dasmant,* 'wise.'

† So in Plato (*Legg.* v. 730 A), ὁ ξένιος ἑκάστου δαίμων καὶ θεός, τῷ ξενίῳ συνεπόμενος Διί.

‡ Herod. vii. 178, 189.

* Cf. Plato, *Phædon,* 107 D.

† Paus. vi. 25. 4; ii. 7. 5; iv. 30. 2.

‡ *Geschichte des Wegebaus bei den Griechen.*

Thus originated the sacred roads of the processions of Athens, of Megalopolis, of Sparta to Amyclæ, of Elis to Olympia. The road from Athens to Marathon, by which the god had been brought to Athens, was, as Curtius has emphasized, always traversed by the θεωρίαι sent by Athens to consult the Delphic Oracle. There they found the road that connected Marathon with Delphi, marking the way along which the worship of the god had once been borne; and they travelled by the Sacred Way in preference to the direct path from Athens to Delphi. Hence they watched the lightning over Harma before starting; in other words, they observed the signs of the weather in the direction of Marathon. The most famous Sacred Way in Greece was the path by which Apollo had come to Delphi with the Dorians from the north of Thessaly, and every fourth year the sacred procession to Tempe kept alive the old relation. These processions are among the most interesting features of Greek religion. War was often stopped to allow them to be carried out. But in the Peloponnesian war this was not the case: for years after the Spartans occupied Dekeleia the procession by land to Eleusis ceased, till Alcibiades, by guarding the way with soldiers, enabled it to be held in safety.

(10) *State gods and gods within the State.*—Even in the State itself only a few of the gods were worshipped by the whole people. These were the θεοὶ πατρῷοι, γενέθλιοι, ἀρχηγέται, with whose worship the safety, honour, and existence of the State were bound up. They have to be distinguished from θεοὶ πάτριοι, a term which includes all the gods legally recognized in the community.

Every set of persons within the city united in any relation had their own god. But voluntary associations for the worship of a god, and united by no other bond but this worship, belong to a later time, including those which were made in a city like Athens by a set of strangers for the purpose of their own national worship: see below, C, § III.

Besides the patron-gods of each city (θεοὶ πατρῷοι), all gods legally worshipped in the State required respect from the State. If any of them were injured, or if their full rights were not given them, their anger was shown not merely against the individual wrong-doer, but also against any one in his company, and against the whole community.* Hence it was only prudent for the State to extend its support to the worship of every god, to contribute to the expense of his sacrifices and festivals (δημοτελῆ ἱερά), and to give dedicatory offerings from time to time. At the same time, it was obviously necessary to guard against the introduction of new gods into the State (see (14) below).

(11) *Extension of the worship of a god.*—It depended entirely on the worshippers themselves to determine how far their circle should be widened. In some cases a rigid exclusiveness was maintained, and new members were admitted only as a special honour. In the family worship of Zeus Ktesios some did not allow even the domestic slaves to participate (Isaios, *Ciron.* § 16); but the general custom was to admit the household slaves to the household worship (cf. Æsch. *Agam.* 1026). To the public worship of some States no strangers were admitted, as was the case in the Panionion (Herod. i. 143). At Argos no stranger could sacrifice in the Heraion (Herod. vi. 81). Athens was in general far more hospitable (Dem. *Neær.* § 79). This exclusiveness is rather a relic of the past than a real characteristic of the Hellenic religion, and it disappeared sensibly as time elapsed. The worshippers were the chief source of revenue to the priests and the temple (Lucian, *Phalar.* ii. 8), and were generally encouraged to come from all quarters.

Apart from the formal ritualistic service of the temples, viz. the public festivals, admission to which was a matter of public concern, what may be called occasional worship, depending on the wishes and needs of individual worshippers, was a considerable element in the Hellenic religion. The cost of the public ceremonies was defrayed by the State: private worshippers in the temple also existed. This element was an increasing one, and was encouraged by the Oracle and by the priesthood in general. Pindar's house in Thebes was close by the temple of Rhea, and he honoured the goddess greatly (Pyth. iii. 77): the term indicates not mere vague respect, but practical acts of worship and offering were implied in 'honouring a god.' Neighbourhood to a particular god had the same effect in other cases (Plaut. *Bacch.* ii. 1, 3): even travellers passing a shrine or a sacred tree ought to show some token of respect, were it only to kiss the hand to it.

It is doubtful how far such worship was admitted from all comers. Probably the strict rule, in older time, was that only the privileged circle of worshippers could be admitted; and Herodotus (v. 72, vi. 81) shows cases of exclusion of extraneous worshippers. But it is probable that these cases were exceptional, that worshippers were rejected only in some excitement of national feeling, that the principle of Hellenic religion, which gradually established itself in most of the temples of local cults, was that all Hellenes might worship in Hellenic temples, and that, in such cases as Herodotus mentions, the intending worshipper acted on this principle.

(12) *State recognition of the Pan-Hellenic Religion.*—The idea of a Hellenic religion of gods common to all Hellenes never gained complete ascendency, but is seen in many individual cases. Zeus *Hellenios* or *Panhellenios* was worshipped in Athens (Paus. i. 18. 9; Ar. *Eq.* 1253) and in Ægina (Pind. *Nem.* v. 10; Paus. i. 44. 9). The expression κοινοὶ θεοί and others similar (Herod. ix. 90, etc.) show the same feeling. Invocation of all the gods together is not infrequent (Dem. *de Cor.*, *init.*; *Mid.* § 52). An altar of all the gods (βωμὸς κοινὸς πάντων θεῶν) existed at Olympia; and at Ilium there was a priest of all the gods (τῶν πάντων θεῶν). Altars of the Twelve Gods, as a convenient summary of the chief Hellenic gods, were frequent. Later we find in Messene statues of all the gods ὁπόσους νομίζουσιν Ἕλληνες.

(13) *The Hellenic Religion a part of the City-State.*—In the fully formed Hellenic city the State religion was one part of the commonwealth, and the State gods had a recognized claim to certain perquisites. The relation of the gods to the State lost the religious and pious character, and came to be conceived as a purely legal matter (νόμῳ γὰρ τοὺς θεοὺς νομίζομεν, Eur. *Hec.* 800). Here the verb does not mean so much as 'believe in the existence of' nor so little as 'practise the rites of'; it may be paraphrased by the preceding sentence. Not that the law could abolish the gods and their worship. The original thought that the Divine nature was a necessary part of the world, and help from it a necessary element in human life, was indelible and beyond the legal power to alter. A State without religion was as little conceivable as a State without laws; the good citizen and the religious citizen were equivalent expressions.

---

* Æsch. *Sept.* 581; Eur. *El.* 1353; Hor. *Od.* iii. 2. 26, etc.

(14) *The Hellenic conception of piety.*—Εὐσέβεια, 'piety,' consisted in giving the gods their due; righteousness is justice to the gods.[*] Mythologically, the idea is expressed by Hesiod (*Theog.* 535) as a regular compact of mutual duties and rights (κρίνεσθαι) made in Methone between Zeus and Prometheus as the representatives of gods and men. Law and public opinion required that the gods be given their due; but that personal honour be paid them there was no necessity. Their character and position might be ridiculed so long as no intention was shown to do away with their worship. The γραφὴ ἀσεβείας was directed only against him that sought to alter or infringe the established ceremonial. The atheist (ἄθεος) was obnoxious to the law because his principles made the cultus unnecessary.

The worship of new deities was forbidden in Athens, until the Ecclesia, or the Nomothetai acting under its direction, sanctioned the introduction of a new cult, and settled the ceremonial belonging to it. But the effective prohibition of foreign rites was hindered by various causes. It was no one's business to protest against a new worship or prosecute the worshippers; the duty, disagreeable and entailing ill-will from a considerable section of the people, was left to the patriotic piety of the nation to carry out, and seldom found any one to perform it. An openness to novelties, a receptivity for foreign thought, characterized the Athenians; and foreign citizens and foreign religions (ἐπίθετοι) found in general an equally free access to the city. See below, C, § III; above, A, § VII (2).

A higher conception of εὐσέβεια, however, was not wanting. Fear of the god was from the first no prominent part of the idea of piety. Throughout the literature, love is a much more important element. Zeus is the father of gods and men, not as being their creator, but as a father-like ruler (Aristot. *Pol.* i. 12). The good man is the man beloved of God. The gods were full of goodwill towards men. The passages where the fear of God is mentioned often show that a high idea is implied in the word 'fear' (ἵνα γὰρ δέος, ἔνθα καὶ αἰδώς, Plat. *Euth.* 12 C). The word δεισιδαίμων occurs in the sense of 'pious' in Xenophon and Aristotle (*Pol.* v. 11. 25).

But the other conception of God as hurtful to men, and of the Divine action as showing itself in calamity, is not absent (see C, § I). In later times δεισιδαιμονία, as the superstitious fear of God, is distinguished from εὐσέβεια. This sense is first found in Polybius, if we except the doubtful chapter of Theophrastus (*Char.* xvi.). Moreover, the expression 'justice towards God' is often used in a better sense than that of mere compliance with an external law. But such finer thoughts probably belonged only to the few; it is hardly possible to attribute any ideas of the kind to Nicias, who was to many the ideal of a pious man. The picture that Plato gives of the religion of his time is a very dark one. In one place (*Legg.* x. p. 885) he says that some disbelieve in the gods, and others think that they are moved unjustly by gifts and vows. Still worse is the account given by Adeimantos and Glaucon in *Rep.* ii., where the strolling soothsayers who sell pardons to the people, and teach them that a few ceremonies and a little money will gain forgiveness for all sins, are especially inveighed against.

It must, however, be remembered that these passages are purposely one-sided. The truth is that popular thought was unable to reconcile the love of the gods and the fear of the gods, which constituted the central antithesis of Hellenic religion. Their religion provided no help in the difficulty. Ideas of sin, of the wrath of Heaven, were present to all men; and those who could not themselves rise to higher thoughts sank to superstitious practices to avoid the consequences of the guilt which they felt themselves laden with. The mythological legends handed down from an older stage of religion, and frequently gross and revolting in character, still clung to the gods of the national religion. The gods seemed themselves to sanction hateful and immoral acts, and exposed themselves as much to the ridicule of men as to that of their peers (*Il.* i. 600; *Odyss.* viii. 343). The better thought of Greece rejected and abolished these fables; but the vulgar often justified their evil deeds by the example of the gods.[*]

As the Hellenic State grew, and as art separated itself from the service of religion, the secularization of all cultus proceeded with rapid strides. The productions of the fine period of art were not made to be worshipped, but to be admired in the temple. The spectacular side of religion became every year more prominent. If it could not satisfy the religious wants of the people, it aimed at least at satiating them with fine shows. In many temples the cultus, though never wholly wanting, was quite subordinate to the purposes of State offices and of occasional pageants, which had far more of a political than a religious character. See also C, § III (4).

Art no longer formed, as it once did, a part of religion; but it influenced the popular theory of religion very materially. The Artemis of cultus was developed mainly by the artistic element into the huntress maiden; and this conception of the goddess, though not ruling in cultus, was certainly the common Hellenic idea. In this and other ways the gulf between the ancient cult and the actual thought of the people was widened.

V. THE HELLENIC CLASSIFICATION OF DEITIES AS OLYMPIAN AND CHTHONIAN. — This distinction, so characteristic of and peculiar to Hellenic thought, has already been anticipated as if familiar. One can hardly speak about Hellenic religious thought without assuming it.

(1) *Hellenism and the thought of death.*—In the thought which belongs to and constitutes Hellenism, looked at in its relation to religion, the first moment was the revolt of man against the hard law of nature—a revolt springing from the energetic, joyous consciousness of individual power and freedom. This thought expressed itself in the gods whom it pictured to itself—gods of beauty and of enjoyment. There was a tendency to eliminate from the traditional conception of the Divine beings everything that conflicted with this sentiment, and leave only gods of life and brightness. The Athenaia of actual Attic cult died, and was mourned for every year according to the old religious idea of the annual death and rebirth of the life of nature; but the Athena of Hellenic thought was lifted far above death. The grave of Dionysos was a central fact in the actual ritual, but drops out of the literature almost entirely.

The older views as to the dead, which made them into and worshipped them as gods, were not in accordance with the Hellenic spirit, and are not conspicuous in Greek literature. But the continuance of the ritual and worship of the dead in practice among the Greeks is everywhere presupposed and sometimes alluded to. There was in this respect a deep gap between the educated spirit of Hellenism and the actual conduct of the ordinary Greek man or woman. The Hellenic spirit hated and avoided the thought of death. It was concerned with life and brightness and enjoyment, with show and festival and art. Homer describes the *Eidola* of the dead as preserving in the realm of death a shadowy and wretched existence which is worse than the most miserable lot in life. Yet in the Homeric poems the old rites are seen in practice at the graves of Patroclus and Achilles (*Odyss.* xxiv. 65, etc.) That old ritual was systematized and formulated under the influence of the Delphic Oracle (whose rule always was to recognize and regulate the ancient religious usages); and this systematization was repeated in the Solonian legislation, and doubtless all over Greece.*

---

[*] Cf. Plat. *Protag.* 331, *Rep.* i. 331 B; Cic. *de Nat. Deorum*, i. 41, 116.

[*] Plat. *Euth.* 5 E; Ar. *Nub.* 905, 1080; Eur. *Hipp.* 451, *Ion.* 449; Ter. *Eun.* iii. 5. 36.

Hellenism could not maintain itself at this stage: the hard facts of the world and of life demand and force recognition. Thus comes in the second moment in the Hellenic religious idea—the inevitable awe before this irresistible power, the power of nature, stern, inexorable, irresistible, which may be regarded either impersonally as Fate or Necessity (Εἱμαρμένη, Ἀνάγκη), or personally as a god whose power or will constitutes and moves and orders the course of nature. Here the gods of the old régime returned into the Hellenic consciousness. They were more closely connected in the Greek mind with the power of nature and the one great fact in nature, Death. Life, the other side of that great fact, was not, as a rule, apprehended by the Greeks in its true relation to Death. The Greek mind had sought to make for itself gods of life alone; and the two antithetic sides of the religious conception were to a great extent developed separately from one another. In this way, probably, must be explained the remarkable fact that in the Hellenic religion life and death are apportioned, so far as that is possible, to two different moods of thought and two different sets of deities. Only in the highest development of Greek thought in some rare minds, and there only in a very imperfect way, was the antithesis reconciled in a higher conception of the Divine nature (see C, § I, below).

(2) *The Olympian and the Chthonian gods.*—The difference between the gods of the old religious ideas and of the newer or Hellenic thought tended to crystallize in the distinction between Chthonian and Olympian gods, though this distinction never became absolute and universal, and there is hardly any deity who belonged everywhere and at all times to the one class and never to the other. But the worship of the dead, *i.e.* of the heroes, and of the Chthonian gods, was marked off by broad lines from that of the Olympian gods; and most of what was really deep and heartfelt religion in Greece belongs to the former, while most of what is artistic and a permanent possession for the civilized world belongs to the latter.

The even numbers and the left hand belonged to the Chthonian deities, the odd numbers and the right hand to the gods of heaven (Plat. *Legg.* iv. 717 A). White was the appropriate colour of the Olympian gods, the East their abode, and the direction to which their temples looked and their worshippers turned when sacrificing to them. The forenoon was the time suitable for their worship. The Chthonian gods preferred blood-red or black; the West was the direction to which their worshippers faced, the afternoon their chosen time. Offerings to the Olympian gods were shared in by men; offerings to the Chthonian gods were burnt whole. Men had community in the sacrifice with the former, with the latter they had none. One who had partaken of the black sheep offered to the hero Pelops in his grove in the Altis might not enter the temple of Zeus (Paus. v. 13). The priestess Theano refused to curse Alcibiades and devote him to the infernal gods, on the ground that her duty was only to bless (Plut. *Alc.* 22).

The worship of the Chthonian deities was for the most part mystic; and a very brief description of the character of the ritual of the Mysteries has already been given in A, § VII. This mystic and secret character shielded the Chthonian gods against the Hellenizing tendency; and thus the awe that attached to them remained unimpaired. Awe was foreign to the spirit of Hellenism; but the human spirit demands an element of awe, and the Hellenes were human. Accordingly, Hellenism protected the Chthonian gods against itself by keeping them private, mysterious, and apart.

VI. The Religion of Apollo and the Delphic Oracle.—To attain a conception of the spirit and character and the infinite variety of Hellenic religion and its relation to Hellenic life, it is above all necessary to study the practical development of the individual gods out of their primitive form into the full Greek idea. We can here take only one example. We might select Athenaia, the champion and mother of Athens, originally a form of the Pelasgian Mother-Goddess, who became step by step an almost purely Olympian deity (at least in the popular idea, though never in the actual cultus*), patron of what the world holds in memory as most characteristic of Athens, protector of the democracy, of art and of letters, opposed to and yet closely connected with Poseidon, who was the champion of the oligarchic and aristocratic element in the city.† But Apollo is, on the whole, the most typical and representative Hellenic deity, and his oracle at Delphi was the most powerful influence in guiding and moulding the growth of Hellenism. And as, in the much debated subject of Greek religion, it is useful to see more than one view, Mr. L. R. Farnell, the author of *Cults of the Greek States*, will treat this part of it.—

[If the study of any single Hellenic divinity can suffice for the comparison of the pagan and Christian classical world in respect of religious thought and rite, one may be justified in selecting the Apolline worship for the purpose. It may not indeed present us with the highest achievement of the Hellenic spirit in religious speculation: for instance, to trace the gradual evolution of ideas that made for monotheism, we must turn rather to the worship of Zeus. Nor, again, did it attempt to satisfy, as did the Dionysiac and Eleusinian cults, the personal craving for immortality and happiness after death which was working strongly in the Hellenic world before the diffusion of Christianity. Currents of mystic speculation, coming partly from the East, and bringing new problems concerning the providence of the world and the destiny of the soul, scarcely touched and in no way transformed the personality of Apollo. Until the old Hellenic system was passing away, he remained a bright and clearly outlined figure of the early national religion, a Pan-Hellenic god, whose attributes reflected and whose worship assisted the various stages of material, social, and moral development through which the race had passed. The study of the cult is of the highest value for the student of Hellenism, and not without value for the wider study of European ethics and religion.

To understand this, we must distinguish more carefully than is often done between the figure of worship and the figure of myth. This is the more necessary in the case of a religion such as the Hellenic, that was not fortified by any strong and imperious dogma which might bring the mythic fancy under control. Hence Greek myth, though usually bright and attractive, and often illuminative of actual worship, is sometimes repulsive, and no adequate expression of the serious mood of the worshipper. If we confine our view, then, to the public cults—Greek devotion being mainly public—and to the myths that illustrate these, we soon discover that Apollo did not instantly reveal himself, as he emerged above the horizon of prehistoric Hellas, as the divinity of the higher life who brought a higher message to his worshippers. The Apollo of Æschylus and Pindar is not quite the same as the Apollo of the earliest Greek tribes. The records of the historic period still preserve the impress of a wilder and more savage age.

---

* See U. Köhler's commentary on the famous Cean inscription, *Athen. Mittheil.* i. 139; Plutarch, *Solon*, 21.

* Her relation to the Eumenides, the Gorgon, and the serpent-footed Erichthonios, shows her Chthonian and antique character.

† See Neil's edition of Aristophanes' *Knights*, p. 83.

The meaning of the name Apollo, like that of most of the Divine names in Greece, escapes us. A modern etymology that connects it with *ἀπέλλα*, the Doric word for 'assembly,' would yield us, if we could accept it, the very interesting result, that the aboriginal deity was not a mere 'Nature-god,' a personification of some portion of the natural world, but already a political divinity full of promise for the future public life of the race. But for etymological reasons the word *ἀπέλλα* could not give rise to the derivative *'Απόλλων*, though they might both come from some common stem.

We must content ourselves with having the right to believe that he is at least an Aryan god, brought in by the Hellenic conquerors, and the common possession of several of the leading tribes. In countries where the autochthonous population claimed to have survived, such as Attica and Arcadia, he is clearly an immigrant, not an indigenous deity. And Greek ritual preserved and hallowed the memory of his original entrance into Hellas from the north. It seems that in Herodotus' time the Delians were still in the habit of receiving certain cereal offerings at the festival of Apollo that purported to come from the 'Hyperboreans.' The route which the offerings followed entered Greece from the north-west, and, passing southward as far as Dodona, then struck across eastward to the Malian Gulf, and so by the Eubœan Carystos to Delos. Wild fancies have been conceived and foolish theories devised about these Hyperboreans. Error arose from the illusory belief that any people, known however dimly to the Greeks, and known to be worshippers of Apollo, could have been styled 'the people who live beyond the north wind.' The key to the puzzle has been undoubtedly found by Ahrens, who as a philologist has made one of the very few philological contributions to the study of Greek religion that are of any value. He discovered that the word *'Υπερβόρειοι* is a slight popular corruption for *'Υπερβόροι* or *'Υπερβερεταῖοι*, a well-attested Macedonian dialect form for the Delian word *Περφερέες* that Herodotus declares was applied to the sacred 'carriers' of Apollo's offerings. They are then northern Greeks, all bearing pure Greek names, which all have a religious origin proper to their ritualistic function. And it is of the greatest interest to note that the route by which the oblations of the North-Greek tribes are reported to have travelled is the natural route of invasion which the Aryan conquerors are now supposed by modern historians to have followed.

Can we discover the original character of this divinity in the earliest days of the worship in Greece? A belief that still appears to prevail in ordinary classical scholarship is that he began his career as a sun-god, displacing earlier and less personal solar powers, and became gradually humanized and withdrawn from this elemental sphere. But the belief is uncritically held, and breaks down before the evidence of the cult-facts. The epithets whereby a Greek divinity was addressed in prayer and official hymns give the best clue to the ideas of ancient worship. None of those that are attached to Apollo can be naturally interpreted as designating a god of the sun or of the lights of heaven. *Λύκειος*, one of his most common titles, can come from the stem of *λύκο-s*, 'wolf,' and not phonetically from the stem of *λύκη*, an assumed old Greek word for 'light.' *Λυκηγενής*, an epithet only used twice in the *Iliad* in a conversation between Athena and the Lycian Pandaros, can mean, in accord with the laws of word-formation, either 'Lycian-born' or 'wolf-born': the latter significance being in harmony with a well-attested legend. *Αἰγλήτης*, 'the god of the gleam' at Anaphe, appears to have been a later transformation for an older form *'Ασγελάτας*, a term of quite different import.

At a comparatively later period, Apollo comes into touch with Helios, especially in Asia Minor: the same may be said of other divinities, for whom no one would claim a solar origin. The first to identify him with Helios was Euripides; but this poet is often quite reckless of the popular religious view, and the statement belongs to a certain theory of his.

In pagan North Europe, and in pagan Greece, the leading practices of ritual that have been discovered and interpreted by modern research aimed at ensuring fertility and growth in the vegetable and animal kingdoms. This must be the chief interest of primitive society in the pastoral and agricultural age; and it is this that gives function and much of their character to most of the Hellenic divinities throughout all periods of their career, and especially to Apollo.

Doubtless, the earliest Hellenic invaders had already advanced beyond the social level of the hunter and the shepherd. Yet early cult and cult-ideas that survived the changes and progress of the ages preserve the traits of savage life. Here and there Apollo was still the cave-dweller: for instance, near Magnesia on the Mæander, where his image and spirit filled his priests with superhuman force, so that in wild frenzy they bounded down steep rocks and uprooted strong trees: even in cultured Athens he was still worshipped in a cave on the Acropolis. To this period belong such conceptions as that of Apollo *Λύκειος*, the wolf-god, the son of a wolf-mother, the god to whom wolves were offered in Argive ritual. In Cyprus we come upon the worship of Apollo *'Υλάτης*, the deity of the woodland, to whom certain trees were sacred; and the bow, the weapon of early man, and always the chief badge of Apollo, belongs to him as the divinity of the chase, to whom the huntsman even in the days of Arrian offered a tithe of the spoil. Throughout all Hellas he was worshipped also as the deity of flocks and herds, who tended sheep and horned cattle in the pastures, and brought plentiful supply of milk, as *Νόμιος* and *Γαλάξιος*. The agricultural life, which is again a higher stage, is also under his care. He guards the crops from mildew and vermin, preserves the boundaries of the tenements, and to his shrines at Delphi and Delos the Greek States far and wide send their tribute of corn.

His festivals, which fell in spring, summer, and early autumn, but never in winter, attest very clearly his vegetative and agricultural character. At Amyclæ, in Laconia, he succeeded to and absorbed the cult of an old hero of vegetation, Hyacinthus, probably a pre-Hellenic personage, the beautiful youth who dies young and is bewailed as the incarnation of the bloom and the early fruits of the year. His grave was beneath the basement of Apollo's statue, and the first part of the *Hyacinthia* festival was consecrated to him; the note of sorrow in the ritual is an echo from the primitive life of the husbandman and harvester in Europe and Asia. The Laconian festival of the

Κάρνεια is one of peculiar interest, and it is impossible here to cope with the questions that arise concerning it. Our own view is that Apollo Κάρνειος, whose name means 'the cattle-god,' was worshipped by the Dorians in North Greece, and probably by the Dryopes before the Dorian conquest of the Peloponnese; that the Dorians established his worship in Megara, Sicyon, Argos, and Sparta, though a previous migration, possibly of the Dryopes, may have already planted the worship in certain parts of Southern Greece. The Spartan ritual has been well interpreted by Mannhardt: for nine days all the people lived in tents or huts, a reminiscence of primitive life, and the chief act of the festival was the pursuit of a man called 'the runner,' who was covered with garlands, by youths who carried grape clusters; if they caught him, it was a good omen for the crops and vintage. The ritual is vegetation-magic and old European. Upon this, as upon the ritual of the *Hyacinthia*, the higher worship of the god of song and music was engrafted.

To this early pastoral and agricultural period belongs the rite of human sacrifice which survived here and there in the worship of Apollo, and which was probably more frequent in the earlier period when it was common to all Aryan and to less progressive races. In Cyprus those who touched the altar of Apollo were thrown from a rock; from the famous Leucadian promontory in Acarnania a victim was hurled once a year 'as a piacular offering' to Apollo; and in the Attic Θαργήλια, an early harvest-festival consecrated to Apollo, where most of the ritual was harmless vegetation-magic, the cruel rite may have prevailed, even in the civilized age, of leading forth two human scapegoats and putting them to death by stoning or burning. The human oblation, which Greek civilization tended to abolish or modify, is a practice—whatever its true meaning—that is rooted in savagery. Yet it sometimes contains the germ of the idea of piacular and vicarious atonement that can bear fruit in a higher religion.

So far it has only been the primitive character of Apollo that we have attempted to outline. His real significance for the Greek πόλις touches higher issues. He becomes, or already at the dawn of Greek history he was, one of a special group of deities that presided over the communion of the family, the clan, the village, and finally of the πόλις, the last development of these. His cone-shaped pillar stood in the street before the door of the citizen; and Apollo Ἀγυιεύς becomes Apollo Προστατήριος, the god 'who stands before the door' and shields the household from terrors of the seen and unseen world. To the Ionic communities he stood in the special relation of ancestor, and the Dorian cities honoured him as the leader of their colonies, and sometimes as the founder and organizer of their social institutions.

Two instances may be selected from the many that might be quoted, to show the importance of his cult for social and political progress. At Athens the court called ἐπὶ Δελφινίῳ was founded to try cases of homicide where justifiable circumstances were pleaded. When criminal law becomes able to consider such pleas, it is advancing from the barbaric to the civilized stage. It is of importance, therefore, to note that this great advance was associated at Athens, in part at least, with the name and cult of Apollo. Again, at Delphi the worship of the Pythian Apollo played a very useful part in the emancipation of slaves. The slave who saved money could not, of course, be sure of buying his freedom from his master, for the latter might lay hands on the money and retain the slave; but he could, and from a vast number of Delphic inscriptions we have evidence that he very frequently did, deposit the money with the god, who then purchased him from his master, and let him go free with a religious guarantee, that was legally effective, against further violence or constraint. This excellent system prevailed in other worships elsewhere, but was specially in vogue at Delphi.

To the development of ethical thought the Apolline cult contributed one vital conception, that of purification from sin, an idea that belongs to other cults also, but is most prominent in this. We must not interpret this conception as having at the outset any essential relation to inward or moral purity, or as even enforcing any austere ideal of sexual abstinence. Purification in the Apolline and other Hellenic cults must be understood in a ritualistic sense; the process of purification aimed at washing away certain stains from a man's person that rendered him ritualistically unclean, that is, unable to approach the altars and temples of the gods, or to mix with his fellows without spreading a deadly miasma around him: such stains would be contracted by harmless physical acts, but specially by contact with blood. It is therefore the shedder of blood who stood in special need of the Delphic ritual of purification, in which the use of the laurel and the lustration with swine's blood are combined. Now, these kathartic practices are not proved to have been very ancient in Greece; the poet Arctinus of the 8th cent. B.C. is the first who records them, and he associates them with Apollo and Artemis. There is reason for believing that they were introduced into Delphi from Crete, the land whence the Athenians summoned Epimenides to purge the city from the stain of the Cylonian massacre, and whither Apollo himself repaired to be purified from the blood of Python. The Athenian Θαργήλια was partly a feast of purification; and the idea was still more prominent in the Delphic feast of the Στεπτήρια, held every eight years in the early summer, when, after a dramatic representation of the slaughter of Pytho, the Delphians selected a beautiful and high-born boy, who was temporarily an incarnation of the god, and who proceeded to Tempe, and, after purification, returned by the 'Sacred Way,' bearing the pure laurel through many an old seat of Apollo's worship in Thessaly, Oeta, and Malis. This ritualistic idea of cleanliness, so prominent in the Apolline cult, at first a non-ethical idea, is of the greatest importance for the history of ethics, for from it has grown the advanced conception of moral purity and the civilized horror of bloodshed.

Finally, Apollo was pre-eminently a god of the arts and the higher intellectual life, the leader of the Muses, the deity to whom the stateliest forms of music and song were consecrated. In pre-Homeric days the Pæan was already his special hymn of praise. In its earliest period the Pythian festival was a musical, not an athletic, contest; it came to include a competition of poets, and even of painters, thus fulfilling some of the functions of a Royal Academy of Arts. It is, in fact, the distinction of the Greek as compared with other high religions of the world that it conceived of the Divinity as revealed in the achievements of art and human science no less fully than in the moral life of the household and the State.

It remains to give a very brief outline of the Oracular worship of Delphi; for this presents the salient features of the god in the strongest light; and the Delphic tripod was the chief source of his power, and one of the few bonds of religious union in the Hellenic world. The god had seized upon Delphi or Pytho before the period of the Homeric poems, that is to say, before the Greek colonization of Asia Minor.

We may ask how Apollo became pre-eminently the prophetic god, while the power of divination was always inherent and often active in every deity and many a departed hero. His special distinction in this sphere was probably not due to any fundamental fact in his original character. The prestige of Delphi was probably the cause rather than the effect of the oracular prestige of Apollo; what it was that won for Delphi this unique position is a question that cannot now be raised.

We are certain, at any rate, that it was from the Delphic rock that the fame of the prophetic god spread far and wide over the Hellenic and non-Hellenic world; and affiliated shrines were planted in Greece consecrated to Apollo Pythæus.

The sanctity of the temple was safeguarded by the Amphictyonic Council, whose constitution reflects the pre-Homeric age of Greece, and whose members bound themselves by a solemn oath to defend the shrine, and never to destroy or allow the destruction of an Amphictyonic State. It was not the fault of the religion that the oath was shamefully broken, and that this ideal of a higher national union remained barren.

The manner of divination at Delphi is interesting, and in one respect peculiar. The 'mantic' art in Greece has been defined as twofold; one kind being ecstatic, enthusiastic, insane, the other sane and rational. The diviner of the former type is possessed by the spirit of the god who enters into him or her through the sacramental eating or drinking of a substance in which the spirit of the god was supposed to reside; so possessed, the human frame becomes an organ of the voice of God, and the human lips are moved in madness with utterances that the skilled can interpret. Of the latter type is soothsaying from birds and other animals, inspection of entrails, the drawing of lots, which may be corn-stalks or notched pieces of wood. The soothsayer in this case is sane enough, and may be said to practise rationally an art or science that is merely based on a false hypothesis. To these we may add a third: prophecy by means of dreams that were supposed to well up from the earth and the earth-spirit into the sleeper's brain. The second type is regarded as specially Apolline, ecstatic enthusiasm being considered to be alien to the character of the sane god. All three were once practised at Delphi—the third when the Oracle was under the dominion of the earth-goddess, the two former after Apollo's arrival. But the only divination that was in real vogue there in the historic period was of the ecstatic, enthusiastic, epileptic type. The Pythoness drinks the water of the holy stream, chews the sacred laurel-leaf, mounts the tripod above the chasm whence the mephitic vapours rose, and then speaks words of frenzy which the Ὅσιοι, the five priests of the noblest Delphic blood, holding office for life, who sit near her listening, interpret according to some system of their own. This oracular madness has been supposed to be un-Apolline, and due to the strong influence of the Bacchic cult at Delphi. The theory is plausible, but not convincing. The priestess of the Argive shrine of the Pythian Apollo, a very early offshoot of Delphi, was also 'possessed by the god,' though the possession was wrought by a draught of the blood of the sacred lamb that was offered to him in the night. What strikes us as really un-Apolline is inspiration by means of the subterranean vapour: this may be a heritage from the pre-Apolline and 'Chthonian' period of the Oracle, for the subterranean world and its agencies are wholly alien to him.

The Pythoness was merely a virtuous woman, often of humble origin, a mere tool in the hands of the 'Holy Ones.' The history of the Oracle is really the history of the generations of those Ὅσιοι, the record, if we could gather it, of their varying attitude towards the national ethics, politics, and religion; and a complete list of the oracles would give us a marvellous insight into the average mind of Hellas. For these priests must be taken as reflecting the better average character of the nation, not as inspired teachers with a definite mission and advanced dogma. But their power was really great, and their exercise of it and their claims remind us dimly of the Papal power in the Middle Ages. In one respect their work was evil, and through conservative instinct they lagged behind the growing morality of their age; many a legend and record attest that, so far from softening the harsher traits in Greek religion, they encouraged and insisted on the maintenance of human sacrifice. The savage rite gradually passed away in spite of Delphi.

The political career of the Oracle cannot be dealt with here. It may be enough to say that the oracles which have been preserved display no settled policy; usually, but not always, the Oracle is on the side of constitutional government as against the tyrant, and was nearly always the devoted friend of Sparta, owing much of its great prestige in the 7th and 6th cent. to the support of that State.

In a famous oracle concerning the Spartan plan of Arcadian conquest, Apollo's voice was on the side of righteousness, but the utterance suggests a quasi-Papal claim to dispose of territory. But with all her influence Delphi was too weak to menace the liberties of the Greek States. Her best political activity was in the sphere of colonization; the Ὅσιοι have every reason to be considered the best informed agency for emigration that any State has ever possessed. Of course, neither in this nor in any other matter could they dictate; they merely advised and pointed the route to adventurous spirits; and they advised very well, so that at last no body of colonists were likely to start without the sanction of Delphi. There is reason for thinking that this colonizing of Apollo began in prehistoric times. The Dorian migration was probably blessed by the Oracle; and, what is still more important, we have good evidence from the legends, of the custom of dedicating to Delphi a tithe of the captives taken by any conquest: these appear to have been sometimes sent forth as a colony of the god's.

A few last words may be added concerning the part played by the Oracle in Greek religion and morality. In spite of the dark exception mentioned above, its influence, which was certainly great, was often good, and generally innocent. The priests were propagandists of two departments of cult especially: the cult of Dionysos, who was Apollo's confrère at Delphi, and the cult of heroes. The latter is an interesting feature of Greek religion, for it explains the spread of later saint-worship in the Mediterranean; and as no departed holy person could be canonized without the sanction of the Pope, so no departed athlete, warrior, or benefactor could be, or was likely to be, the object of public worship without the authorization of Delphi. Usually, the Delphic rule in religion is to encourage each State to maintain the religion and ritual of their forefathers.

In the sphere of private morality, in the ethics of the conscience, the Oracle often did good service; and this short epitome of a large theme may close with a few illustrations of this. Herodotus has preserved for us the stern and significant words with which the Oracle denounced Glaukos for tempting the god to connive at fraud: the terrified sinner craved forgiveness for his evil thoughts;

but the Pythoness told him that God would punish evil intent as well as evil act. This was then almost a new phase in the world of Greek ethics. Again, at a later time the Oracle reveals how far the moral thought of Greece had advanced out of the old bondage to ritual: a brave and good man had slain his own friend by accident while defending him in a deadly encounter with robbers; horror-stricken, with his friend's blood upon him, he flees to Delphi to ask what atonement or ritual can wash off the sin; but a better voice greets him than might have greeted Œdipus: 'Thou didst slay thy friend, striving to save his life; go hence, thou art purer than thou wert before.' Akin to the ethical idea embodied here is a χρησμὸς τῆς Πυθίας preserved in the Anthology: 'Enter the shrine of the pure God, pure in soul, having touched thyself with holy water: lustration is easy for the good; but a sinner cannot be cleansed by all the streams of ocean.' The genuineness of these oracles is a matter of indifference; they prove a rising tide of ethical feeling, which originated in the philosophical schools of Greece, and was imputed to Delphi. The conservative Oracle itself came to be regarded as playing its part in freeing men from that ancient heavy burden of ritual that in an older period may have aided certain growths in the moral world, but had long been a clog upon moral advance.

This short exposition of a great chapter in Greek religion puts forth many unproved and undeveloped statements. The present writer hopes to be able to deal more fully and more satisfactorily with doubtful and important points in the fourth volume of his *Cults of the Greek States.*

LEWIS R. FARNELL.]

C. *LATER DEVELOPMENT OF RELIGION IN THE GREEK WORLD.*—I. RELIGION IN LITERATURE AND PHILOSOPHY.—The essential inconsistency and self-contradiction involved in the idea of the Hellenic Pantheon was apparent, in a dim way, even to the common mind. Zeus was himself an individual with a history full of faults and selfishness. While his rule was often a mere capricious despotism, the other gods were a court surrounding him, each with his own schemes clashing both with the will of Zeus and with the wish of his fellow-deities. Thus the power of the highest god was limited, and overruling fate then became an inexorable law, before which even he must bow. However unwilling, he must surrender his own son Sarpedon to the death that fate had allotted him.

The contradictions and inconsistencies which were inherent in the system were felt by the common people. Thus Euthyphron defends his action against his father by the analogy of Zeus's treatment of his own father Kronos. The worship of the different gods in the State was loosely coordinated into a religion. In Athens the enjoyment and splendour of the great festivals of Athena were supplemented by the solemn impressiveness of the Mysteries. The feeling of awe, the fear of God, and the dread of divinely-sent calamity, grew with the spread of education into a vague consciousness of sin, and of the need for reconciliation with an offended God. On this consciousness the Orphic Mysteries were based; and in them certain observances ensured Divine forgiveness and future happiness. Strolling prophets even professed to sell indulgences, and in return for money to ensure, by performing certain rites, safety from punishment. At the same time a vague idea was growing in the popular mind that a good and pious life was needed to please God, quite as much as compliance with a stated ritual.

There was only one possible cure—raising the conception of God and intensifying the tendency to monotheism inherent in human thought, and not entirely lost sight of in the Greek religion. No adequate provision existed in the religion for educating the people and purifying itself. The Delphic with other Oracles had carried on this work for centuries, and ἐξηγηταί, appointed with its sanction in many States, were judges in difficult points of religion, and had some influence in coordinating the several cults; but the influence of the Oracles began to grow weaker after the end of the 6th cent., and their character deteriorated. The established religion became purely conservative, and the effort of all its ministers was solely to keep up the traditional state of things. The only hope lay in the literature of the age and the spread of higher thought. As poets had formulated with the help of the prophets the prevailing system, they with the help of the philosophers had now to raise its character. This was the religious work that the Gnomic poets, Pindar, and the Tragic poets successively performed.

The first adequate recognition in modern times of this important side of Greek literature is probably to be found in the pages of Zeller and of Trendelenburg, to whom especially we owe much in the following paragraphs.

Although the religious thought expressed in Greek literature and philosophy tended constantly to separate itself from the common religion, yet it was only the development of the latent capacities of that common religion. In its earlier stages literature worked hand in hand with the Delphic Oracle. The great Lyric and even the Tragic poets were recognized as the servants and ministers of the god. They wrote hymns for the worship which the Oracle propagated over Greece; and there is every reason to think that their finest conceptions of religion were practically those of the Oracle. Those brief proverbial utterances in which the wisdom of the 7th and 6th cents. concentrated itself are in the records expressly brought into connexion with the Oracle, over whose entrance was inscribed the μηδὲν ἄγαν of the Wise Man.*

But the relation between the two did not always continue so peaceable. Apart from those who simply denied the truth of the prevailing religion, those who like Æschylus or Socrates continued in sympathy with, and tried to read a higher meaning in, the established religion, found themselves in frequent danger of being misunderstood. Æschylus was accused of revealing the Mysteries to the profane, and Socrates was condemned as seeking to introduce new deities into the State. The Delphic rule of maintaining the hereditary order of things (τὰ πάτρια) was generally on the side of the uneducated, though the Oracle seems on the whole to have appreciated the work and character of Socrates. The conflict of religion and science, which had begun in the 5th cent. or even earlier, was the prominent fact in the 4th.

Two questions rose naturally to the minds of all who thought about the common religion: first, what was the relation of Zeus to the other gods, and how could will and power in them be reconciled with his omnipotence? And, second, what was the relation of Zeus to that overpowering fate that seemed at times to control even his will? In truth, the two questions are but two aspects of the same difficulty, and the answer to one involves the answer to the other. As long as the conception of God contains any of the capricious human element, so long must the will of Zeus clash with the will of the other gods and be overruled by the unbending, unvarying order of nature. When the Divine nature is conceived as absolutely regular and the Divine will as absolutely free from arbitrariness and caprice, opposition between the will of the different gods and disagreement with the course of fate tend to disappear.

---

* See especially a paper on Freedom and Necessity in Greek Philosophy in Trendelenburg's *Beiträge.*

As we have already seen, the religious view in Homer varies between the opposite and inconsistent views, and the same wavering is seen throughout Greek literature.

Herodotus represents more completely the lower view of Divine nature than any other of the great writers. In his view, success produces pride; man believes in his own power and sufficiency, and recognizes not the unseen power of God: the gods blind him and lead him into destruction through his own arrogance. This view, that the gods, acting as the instruments of an inscrutable fate, blind men, involves essentially the same idea of fate as the other view, that the gods are friends of men, but that fate is over the gods and too powerful for them. The latter view is summed up in the words of Pittacos, ἀνάγκᾳ δ' οὐδὲ θεοὶ μάχονται. To Herodotus mere success is in itself a defying of the Divine law: the Divine power is chiefly seen in the misfortune which it sends on men. The order and regularity of the world, recognition of which is the fundamental idea of his work, is quite above and apart from human reason; man cannot adapt himself to it, but only mourn when he has felt its power. Only when he dies is a man safe from the calamity that the god may at any moment send on him.

But in the literature Zeus became by degrees more completely the bearer of a moral rule, and the other gods the willing ministers of his providence and will. As this idea was more thoroughly grasped, the opposition between Fate and God was in some degree reconciled; the order of nature (Εἱμαρμένη) became a moral and knowable law, the will of God: man, by learning and living in accordance with that will, can avoid the calamity which must otherwise overtake him. So in Pindar, Zeus causes all that happens to man; he can turn night to day, and day to night: nothing that man does is hid from him; only where he shows the way is a blessing to be hoped for. The constant theme of Æschylus is the unerring, unfailing justice displayed in the course of nature. He uses Justice (Δίκη) and Zeus sometimes as convertible terms; and both denote that order in nature which through suffering teaches knowledge and conformity with itself, and the recognition of which is the only consolation in time of doubt. He recognizes a development in the history of religion; the triumph of Zeus over the older dynasty of the Titans is the triumph of a moral providence over a lower order of gods. He directly combated the ancient saying as it appears, *e.g.*, in Herodotus (παλαίφατος λόγος), and declares that it is the actual sin of man, not the mere fact of his prosperity, that brings on him the divinely-sent calamity (*Agam.* 750; *Eum.* 531); and in many other passages he shows in clear words that such calamity is simply the way in which wisdom is taught to men even against their will. The law of Zeus, or the course of justice, is to learn by suffering (παθεῖν μαθεῖν, πάθει μάθος, *Agam.* 170). The law is a kindly one, the gracious dispensation of one that has power to make his will into Necessity. The older dynasty had represented the rule of fear: Necessity was only a punishing power, which man must dread but cannot understand; and was exercised by the gods of that dynasty—

τίς οὖν ἀνάγκης ἐστὶν οἰακοστρόφος;
Μοῖραι τρίμορφοι μνήμονές τ' Ἐρινύες·

and Heraclitus declares that if the sun were to transgress his bounds the Erinnyes would punish him. But under the completed sway of Zeus the avenging power of the older gods is merged in the helping and benignant power of the younger deities, for Necessity is changed into order and reason, which man can learn and respect, and thereby avoid the punishment and gain the good. Socrates seems even to have substituted *Pronoia*, Providence, for Necessity; but his biographer did not understand him.

In Sophocles, polytheism perhaps appears in its most perfect form; the other gods are only representatives of the one God, or instruments used in turn by a moral providence. To Pindar, also, Zeus is not so much a god, as the one God.

Euripides was clearly conscious of the essential self-contradiction involved in polytheism; he perceived clearly and felt strongly that it results in degrading the several gods and making the world irrational: he gave as emphatic and open expression to this as he dared: for example, in the Apollo of the *Ion*, whose criminal conduct towards Creusa in the past is even surpassed by the dishonesty of his attitude towards her and towards Xuthus in the play. That Euripides was fully conscious of this aspect of the action seems undeniable: that the general Athenian public had only some vague, uneasy sense that the poet was maligning the gods seems equally certain. It is doubtful if Euripides had any solution to offer that satisfied himself; but at any rate the conditions under which he had to work precluded his formally offering any solution, for he dared not make his views about the gods too explicit, and could only suggest difficulties and put questions. But, although his plays are remarkably instructive as regards the attitude of a section of the thinking and educated Greeks towards polytheism, the subject is too large for our limits.

At the same time, the other side of religious thought grew correspondingly. The idea of a larger cycle of life in which the apparent injustice of earthly existence might be eliminated and all men receive their deserts—an idea of which the most scanty traces appear in Homer and Hesiod—grows more apparent in Pindar: future punishment is the climax of the Divine vengeance in Æschylus, it is often referred to in Sophocles, and Euripides says, 'Who knows if death is not really the life, and life the death?' This recognition of a single rule in life and after death reconciles the antithesis of Olympian and Chthonian deities.

The influence of literature penetrated gradually through the people. The more educated were, of course, more open to it, and thus tended to become estranged from the popular beliefs as superstitions. Hence in the 5th and 4th cents. there was a growing gap between the religion of the educated and the religion of the common people. Both, so far as we have yet gone, were equally polytheistic. Philosophy entered on a bolder path, and directly combated the polytheism and anthropomorphism of the popular religion. While the poets saw in the ancestral religion the germs of higher thoughts, they did not try to free these thoughts from the sensuous symbolism in which the prevailing religion enveloped them. Philosophy naturally tended more to rise above the traditional and accepted ideas. Hence it appears to Plato in the Tenth Book of the *Republic* that in the conflict between philosophy and the vulgar crowd the poets are among the latter.

The fundamental doctrine of Greek philosophy is always the unity of the world. Some conceive this unity under the form of God, others under the form of Nature. Heraclitus conceives this unity as the Divine λόγος, which constitutes the correlation and intelligibility of phenomena: and Anaxagoras as νοῦς or Reason. It is therefore the philosophic expression of that fate or order of nature which is recognized by the poets and by religion; but the philosophers from the first maintain it as a knowable law.

The attitude of the philosophers towards the established religion is various. Some do not trouble themselves about it, others use it where it suits them. Heraclitus approaches most closely the Æschylean point of view; he declares that, whereas men see contradiction and perplexity in the world, God sees only unity and consistency; and, like Æschylus, he calls the order of nature 'Justice' (Δίκη). Man learns what is this Justice, and in learning achieves his own character and works out his own fate: τὸ ἦθος ἑκάστῳ δαίμων (compare Æsch. *Eum.* 520 f.). On the other hand, the worship of images and the offerings of beasts seem to Heraclitus hateful.

Democritus and Empedocles bring in the gods of the established religion as part of the system of things evolved from their primordial principles.

A third class of philosophers simply oppose the common religion, and would fain sweep it away to make room for a higher belief. Xenophanes cannot find strong enough terms to express his hatred for such doctrines as the plurality of gods, with all their moral failings. The anthropomorphism of the current religion, where gods are born and die, revolts him. God is infinite, and finite characteristics are foreign to His nature. God does not change and move like the vulgar deities; He is motionless, for He is all that exists, and there is nothing outside of Him into which He could move or change.

To the Sophists (who may be broadly distinguished from the Greek philosophers by their utter lack of sense for the unity of nature, and the limitation of their view to the multiplicity of phenomena) religion was created by voluntary compact among men; the variety of religions proved that it could not exist by nature, for if it came by nature it would be one. That the variety of religious thought was the necessary consequence of the variety of character produced in men by variety of external circumstances, their analysis of the world was too superficial to show. But this very superficiality of theirs is more representative of popular thought than the philosophy of deeper men, and shows better what was the religion of the educated in their own time.

Nothing sets in so clear a light the degradation of the gods in popular thought as the comedies of Aristophanes. Much as he hates the Sophists, and bitterly as he attacks their irreligion, he himself shows the gods of the established religion in more ludicrous and degrading situations than any of the Sophists cared to do. The Sophists approved of these gods as a very useful device, and inculcated respect for them as the means of developing morality among the people.

Isolated outbreaks of popular fury, in times when calamity terrified the people into piety and roused in them a temporary and quickly evanescent reaction against the growing irreligion of the time, were of no avail 'to stem the torrent of descending time.' Purely conservative, without any provision for deepening its character and keeping pace with the rapid growth of thought and of political and commercial life, the established religion continued, as a trammelling and impeding institution, losing its hold year by year on all classes of the people. How intense was the religious feeling of Athens is shown by such outbreaks as took place in B.C. 415 and 410. A longing for something more is everywhere manifest in the literature, and history shows the dissatisfaction to have been as strong in the mass of the people. The feeling was vague, for the people knew not what they sought; and it showed itself at first only in blind outbursts of fury against more prominent violations of the established religion, though in reality these violations were merely stronger examples of the universal dissatisfaction.

Only a prophet with a deeper revelation could bring the strong religious feeling of the people and the decay of the national worship into harmony; and, after Socrates had sealed with his life his belief in freedom of religious thought, the succession of philosophy to the position once occupied by the Delphic Oracle as leader of Greek religion was accomplished. It was, however, the misfortune of Greek life, and a proof of its religious weakness in comparison with the Hebrew race, that the prophetic mantle found no new wearer. In the dangerous path of pointing out the true and divinely ordained course in actual public life,—that path in which Palestine produced a constant succession of great thinkers to walk,—Socrates found no follower. Plato, while fully acknowledging that the true philosopher should take part in public life, found the actual world too full of evil to allow philosophy to enter it. Greek thought therefore remained abstract from actual life; it found its work and its heavenly kingdom, not in the world, but apart from it. Thus, in Greece, there never took place that application of philosophy to practical work which makes for development in religion; and there was never exerted that influence of philosophy on public life and on the mass of the people which is the marvellous feature of Hebrew history.

Socrates only expresses more definitely and in simpler terms the theory of the older poets: one God rules all for the best. He expresses no disbelief in the other gods, and often uses the plural θεοί; but they are not an important element, and he never, so far as our accounts go, expressed any opinion about their relation to the great God. Plato regards the common religion as the exoteric form of a deeper truth; it is generally mythical, *i.e.* it expresses in sensuous language spiritual truths. This exoteric religion is proper for the education of children, and necessary for those who cannot rise to understand the reality pictured to them in the tales of the gods. But the popular mythology must be purified: it is full of hateful and false tales which have crept in through the influence of poets and corrupted the genuine myths.

Aristotle has the same view. Polytheism is a State-engine for education. On the other hand, he sometimes tries to connect it with his system, by placing the gods in the stars; but the subject gets little notice from him.

Aristotle was the last purely Hellenic philosopher; Greek thought had now run its course. With the victorious march of Alexander, Greek civilization went forth to conquer the East; and Greek thought was now brought directly in contact with Oriental religion, and particularly with the genuine monotheism of the Hebrews. The Greek contempt for barbarians gradually disappeared before the actual experience of a religion greater than their own; while the narrowness of the Jews recognized the high character of Greek philosophy. In the last centuries before Christ, constant attempts were made on both sides to unite Hebrew and Greek thought into one system. The doctrine of angels and devils, which was mixed up (in later times) with the Hebrew monotheistic belief, was assimilated with the Greek polytheism. The gods who surrounded Zeus became *daimones* who interposed between God and the world and bridged over the gulf between the infinite and the finite. The idea became common that all men are the children of God; that the true service of God lay, not in the cult-observances of any particular religion, but in a virtuous life; and that a priesthood to mediate between man and God was needless and wrong. The λόγος of Heraclitus and of Plato became in the Jewish school of Alexandria the Divine Word which is the bearer of all Divine power. Most of these attempts at a union of Hellenic and Jewish thought ended in an ascetic system; for all aimed at combining the two by dropping elements from each. In Christianity alone both find their completion and perfection, without loss of any of their true character.

Stoicism was the most remarkable Greek attempt to produce a synthesis of Hellenic and Oriental thought. It was to a great extent a religion, but it was an artificial religion with none of the vigour of natural unconscious life. As Zeller says, the whole Stoic view of the world was founded on the idea of one Divine being, father of all, containing and sustaining all, ruling all, manifest everywhere. God was to the Stoics the beginning and the end of the world's development. Virtuous action consists in fulfilling the Divine will and law. The true philosopher is sufficient for himself, master of his fate, above all surrounding circumstances, perfectly happy in his own knowledge, lord of all things, a true king—and a self-satisfied prig. As all men stand in the same relation to God, all men are brothers.

In its theoretic character Stoicism was wholly careless of and uninfluenced by the popular religion. But in practice the Stoic philosophers inculcated acquiescence in the religion which was accepted by common opinion and a restraint on the passions of the common people. They spoke with contempt of many points in the popular faith, the temples, the images, the fables; but they found real germs of truth in it, and thought these sufficient to justify its continuation.

Better almost than in any other writer we may see in Horace the effect of these religious philosophies on the world of Greece and Rome. To think and reason about conduct and good action and wisdom is his only religion. The gods to him are little more than names and fables. When he supported the attempt of Augustus to re-create the old religious cults, the poet and the emperor were alike urged on by the feeling that religion was a political and social machine so useful as to be indispensable to good government.

II. THE ATTITUDE OF ST. PAUL TO GREEK PHILOSOPHY.—In this brief, imperfect outline of the religious side of Greek literature—a subject which calls for a much more serious and systematic treatment than it has ever received—it has been shown how clearly the Greek thinkers conceived the problem, and how lofty was the plane on which they pitched their thoughts; but we have refrained from dwelling on their weaknesses and errors. But naturally St. Paul, who frequently alludes in very disparaging terms to the *Sophia* of the world, was most keenly sensible of its faults and imperfections. Three characteristics seem to have specially offended him.

In the first place, its method was shallow; it frequently offered irrational 'fables and endless genealogies' (1 Ti 1[4]) in place of real attempts to grapple with the problems, and was quite content with these pseudo-solutions: those genealogical explanations, not unknown even to the deepest Greek thinkers (as in Æschylus, *Agam.* 738 ff.), became more frequent in the later period, and were applied in all departments of pseudo-research, geographical, historical,* etc.

In the second place, the fibre in the popular philosophic speculation of the later Greek time (which alone was presented to the members of the Pauline Churches) was poor and its results disappointing. There came from the study no real advance in knowledge, but only frivolous argumentation and 'questionings' (1 Ti 1[4]).

In the third place, the Greek *Sophia* was entirely devoid of power over the will and heart of mankind. It remained purely theoretical and abstract: it could do nothing for men; it was the property of a few, and had no effect, or a miserably inadequate effect, on the life and character even of those few. Where it did to some degree touch the heart and affect the life of some rare individual, it produced a philosophic and affected prig rather than a true man; and in the case of some of its most eloquent exponents, such as Seneca, there was a woeful contrast in spirit between their words and their life. But the essential feature in St. Paul's teaching was that he propounded a doctrine of power, not of theory. That is what he lays special stress upon; and of that he found not a trace in the *Sophia* of the time. The Greek philosophers had sometimes observed that the unwritten laws which rested on religion had more influence on the will and conduct of men than the written laws of the State (see above, B, § II); but they had not carried out this observation to a practical result.

In this last observation lies the essence of the whole matter. The best and the most characteristic Hellenic thought was bound inevitably to regard the higher life, at which the good man must aim, not as the striving after an ideal above and beyond human nature, but as the proper and natural development of his human nature. There was in Hellenic thought no real conception of sin. There could not be such a conception, for it is of the essence of Hellenism to be perfectly content with the human nature, to rejoice in it, to find in it the Divine perfection. The counsel which Hellenic philosophy gave to man, which it must give so long as it continued true to the Hellenic spirit, was, 'Be yourself: do not fall short of your true and perfect development.' Such an idea as rising above oneself, trampling one's nature under foot as sinful, striving after the Divine nature, is essentially anti-Hellenic, and it is only rarely that any faint traces of it can be found even in those Hellenic philosophers who have been most affected by foreign thought. But it was in this revolt from the yoke of sin, in this intense eagerness after the Divine, that St. Paul found the motive power to drive men on.

But, though St. Paul saw so clearly and resented so strongly the faults of the Greek *Sophia*, it would be wrong to infer (as has been too often done) that he was either ignorant of or uninfluenced by it. It is a general fact that the great creative minds in philosophy have been more alive to the faults of their predecessors than to their excellences, and have given larger space and more emphasis in their writings to criticism of preceding philosophers than to expression of indebtedness to them. They were probably not fully conscious of their obligation, but it was very real. So it has been with St. Paul. He owed much to the Greek philosophy and thought, gained partly in formal education at Tarsus, partly by assimilation of the knowledge which floated on the surface of a more or less educated society and became insensibly the property of all its members. On this see the excellent papers by E. Curtius on 'Paulus in Athen,' and Canon E. Hicks, 'St. Paul and Hellenism,' in *Studia Biblica*, iv.; and on his probable debt (in common with Seneca) to the philosophy of Athenodorus, which must have been the staple of education and educated conversation at Tarsus in St. Paul's childhood, the present writer's remarks in *St. Paul the Traveller*, p. 300 ff., may be consulted.

---

* See, *e.g.*, the account given of early Tarsian history and topography by Athenodorus, the greatest philosopher and politician whom the city produced, quoted by Stephanus Byz., *s.v.* 'Anchiale'; also pseudo-Plutarch, *de Fluviis*, etc. (*Expositor*, Dec. 1901, p. 412).

Further, while St. Paul often harshly criticises the current *Sophia* in his letters to his young Churches, he was conscious that he was a debtor both to the educated Hellenes and to the uneducated non-Hellenes, both to the philosophically trained and to those who had no such training (Ro 1^{14}). And he would not have his Churches lose anything of the excellences of the Greek spirit. His extreme fondness for the word *charis* can hardly be quite separated in his mind, and could not possibly be separated in the minds of his numerous Hellenic hearers, from the Greek *charis*, the grace and charm which is of the essence of Hellenism. And he sums up in three Greek words his counsel to the Colossians and the Asians generally, when he urged them to 'make their market to the full of the opportunity which their situation offered them' (Col 4^{5}, Eph 5^{16}; cf. Ph $4^{4.8}$).

III. DEGRADATION OF THE HELLENIC RELIGION. —(1) *Foreign influence.*—In Greece as in Anatolia (see A, § VII (4), above), the history of religion after a certain period of progress and elevation was a continuous process of deterioration. The changes in religion were for the most part forced on by external causes, viz. by the pressure of foreign worships; and their influence was almost wholly bad. This character resulted partly from the way in which the influence reached the Greek races and cities (see (3), below), and partly from deeper causes which cannot be described in this short sketch (though they have been briefly indicated in A, § VIII (9), above): those deeper causes combined to destroy that sensitiveness to the Divine nature, and that desire to hear and readiness to obey the Divine voice, which make for progress and elevation in religious thought.

(2) *Susceptibility to foreign religious influence.* —Some influence was exerted on the religion of the Greeks by almost every race with whom they came in contact. Even the despised and barbarous Thracians could make their Bendis and Kotys or Kotytto powerful and reverenced in cultured Athens. But it was mainly cults from the East that affected the Greek peoples during the period which is best known to us.

The foundation of this influence was always the same. The Hellenic religion, with its invariable tendency to concentrate attention on the bright side of nature and life, and to permit only reluctantly, under mystic and half-acknowledged forms, any ritual appealing to the sense of fear in the worshippers, could never completely satisfy human needs; and more was always sought after, and seemed to be found in the more impressive foreign religions. Especially the enthusiastic, emotional, and impressive Oriental forms of religion exercised on Greece an influence which acted continuously throughout ancient history. As we have seen in B, § III, the Oriental character and the primitive Pelasgian character in many deities were fused, during the vigorous growth of the Hellenic spirit, into a new form, becoming truly Hellenic conceptions; and although, in the cultus especially, the original characteristics can be traced in the Hellenic deity, yet the completed product is essentially and generically different from the Oriental type.

Thus far back in Athenian history we can observe the entrance of the Brauronian Artemis, a figure analogous to the Ephesian Artemis and the Phrygian Cybele, with her attendant animals and her Amazon priestesses; but myth tells how the invading Amazons were expelled by the hero of Athenian Hellenism; and the Artemis who established herself was the graceful huntress-maiden, a purely Hellenic conception, however much of the primitive forms could be traced in the actual cultus. But as the youth and creative energy of Hellenism passed away the Oriental influence asserted itself more effectively, and was less modified by the spirit of Greece. Asklepios never became so thoroughly Hellenized as Dionysos, but he was a distinctly later introduction into the Hellenic circle of deities.

In all of those deities the Hellenic character is evident; but in later times Hellenism touched only very slightly, if at all, the gods of Phrygia, of Syria, and of Egypt, who were naturalized in Greek lands and cities. In an age when half-Greek or wholly barbarian kings and Roman emperors were worshipped as gods in Hellenic cities, it was clear that the spirit of Hellenism had grown very weak.

Those Oriental deities appealed to the side of human nature which was alien to, and could not be satisfied with, Hellenism and the bright festival-loving gods of Hellenic political and municipal life. But in earlier times, as any Oriental deities penetrated into the Greek circle, Hellenism tended to lend them its peculiar grace and charm, to tone down the excesses and the abandon of their rites, but at the same time to detract from their power to satisfy that deep-seated craving for an awe-inspiring deity. Even as late as the 3rd cent. B.C. the Cybele, who was worshipped at Athens in the Mêtroön, was sometimes invoked under the name of Aphrodite;* and the first signs of the Hellenizing of a naturalized foreign deity was the substitution of a Hellenic for the barbarous name.

The Egyptian Isis, the Phrygian Cybele, and many others, can be traced as far back as knowledge reaches, pressing upon and forcing their way into the mind and the worship of Greece. The worship of Isis was known very early in the Greek colony of Cyrene (Herod. iv. 186); for the Greeks of Cyrene were necessarily in close relations with Egypt, and doubtless Egyptians visited or resided in Cyrene, and, moreover, there was invariably a tendency in the ancients to worship the gods of the land to which they had migrated, in the belief that those gods were powerful in the land which belonged to them.

Cybele was introduced from Phrygia into the Ionic Greek colonies on the west coast of Asia Minor at a very early time, and in much the same way as Isis was introduced at Cyrene. The Phrygian traders came in numbers to Miletus, as Hipponax mentions in the 6th cent. B.C., and they brought their religion with them. Moreover, in times of danger the Greeks turned to Cybele for help, and found her efficacious and powerful; in this respect the story of the introduction of her worship at Miletus is instructive, and may be taken as typical of what happened in many other cases.

The party of the old kingly dynasty in Miletus, having been expelled, took refuge in Assesos, and were there besieged by the tyrant of Miletus. Being hard pressed they consulted the Oracle, and were informed by the god that helpers would come to them from Phrygia, who would release them and Miletus from misfortunes. Thereafter two young men came from Phrygia, bringing the sacred things (τὰ ἱερά) of the Kabeiroi † in a basket, and approaching the wall of Assesos by night asked admittance, as they had come at the order of the god, bringing sacred things from Phrygia for the good of the people of Assesos and Miletus. In the issue the tyrant was defeated and slain, and the new rites introduced into Miletus.‡ Here the reception of the native Anatolian ritual into Miletus is connected with the straits of a political party during a serious dissension in the city. Similarly, the introduction of the worship of the Dioscuri at Rome and the building of their temple in the forum was coincident with the struggle against the tyranny of the Tarquins, the Etruscan intruders, when the Twin Brethren aided the young republic.

† This term must indicate the Phrygian rites with the sacred objects displayed to the worshippers in Phrygia.

‡ Nic. Damasc. 53.

(3) *Manner in which foreign religion entered Greece.*—As to the way in which these foreign gods came to be adopted by the Greeks, no clear information has come down to us about the very earliest times, though myth and legend on the subject can be interpreted by comparison with later historical facts. But the facts quoted as typical in the last few paragraphs are taken from a comparatively early period, and they agree in general with the fuller evidence that survives with regard to the later centuries (which will be stated in the following paragraphs). From all these sources of evidence, it results that nothing like intentional spread of religious belief by the adherents of any of those foreign cults occurred; that each body of worshippers rather desired to keep to itself its own gods, and was unwilling to extend the circle except for some distinct present advantage to themselves and their worship; that the spread of a cultus was connected with migration or colonization, both because the migrating people carried their gods with them and because settlers adopted also the gods of the land in which they settled; the adoption of a new god was frequently connected with and suggested by some calamity, which was attributed by popular superstition or by Oracular authority to neglect or contempt of the god in question.

The Oracle was often consulted in such cases of calamity, and often recommended that a novel worship should be introduced. Such was the way in which Rome adopted the Phrygian Cybele in B.C. 204, and Athens in 430. But the Oracle in these cases (as is always probable and in some cases certain) simply confirmed the popular impression, that the new deity if properly invoked would be able to help; and this popular impression was produced by seeing the worshippers of the deity in question, and by the superstitious fear that that deity was very powerful (which the worshippers attested) and was being outraged by neglect.

The religious history of Athens in later times is better known than that of any other Greek State, and may be taken as typical. Athens showed itself more hospitable to foreign cults than any other city, but it was also more hospitable to foreigners. There came into existence in Athens a bewildering multiplicity of gods; but the same process of multiplication went on in all Greek cities more or less, and the increase was greatest in those cities where the largest number of foreign visitors or residents was found.

There was, of course, in Athens (and doubtless in Greece everywhere) a formal law (in some less civilized places, perhaps, only a general principle and 'unwritten law'), confirmed at first by, and indeed originating from, a strong popular feeling, which forbade the introduction of strange or new gods. The penalty was death. The formal permission of the State was necessary before any new god could be introduced. But this law and this originally strong popular feeling were, in practice, far from effective. The following were the usual circumstances.

Commerce and intercourse brought to Athens, the Piræus, and other great trading centres large numbers of foreigners. As these foreigners conduced to the increase of trade, the city which desired to become a great trading centre was forced to encourage them; otherwise, in the keen competition of Greek trading cities, they would have been driven away to more hospitable places. Those strangers naturally desired to practise their own peculiar worship; and, obviously, a State which encouraged them must tolerate their practice of their rites. As early as the legislation of Solon this necessity was recognized by the law which is attributed to him. A body of foreigners who desired to conduct their native worship in Athens might form a religious society (θίασος); and the State granted to the society permission for the rules which it might lay down for its members, and toleration for its rites, so long as its aims and regulations did not conflict with the public law or tend to subvert peace and order in the city. The constitution of those religious societies was modelled on that of the State. The assembly (ἐκκλησία) of members (θιασῶται) framed rules, elected priests and other officials, who were responsible to it, and inflicted fines on disobedient members; the fines could be enforced by action before the legal tribunals of the State. New members were welcomed to these societies, not from the desire to affect the life or conduct or belief of the outside world, but because increase in numbers increased the wealth and influence of the body.

In strict legal effect the Athenian State merely tolerated, but did not encourage, the rites of the religious societies (θίασοι). Special leave was required from the Athenian Assembly (Ἐκκλησία) before any such society could build a sanctuary for itself. As regards the rites celebrated by the societies, if these seemed to the State to be unsuitable or disorderly, the primary law came into force prohibiting the introduction of new deities on pain of death. The ritual was permitted only to the foreigners who constituted the society; and when, as occasionally happened, an alarm was raised that Athenian citizens were going after those strange gods, the primary law was liable to be brought into operation, and the offending society with its gods expelled. Thus in B.C. 430 the strolling priest (μητραγύρτης) who had initiated Athenian women into the rites of the Phrygian goddess was executed. But when the plague immediately afterwards broke out, owing to the overcrowding of the city due to the invasion of Attica by the Peloponnesian armies, an alarm arose, and the Delphic Oracle (which was consulted) attributed the epidemic to the wrath of the goddess at the murder of her priest, and ordered the State to atone by building her a temple. In consequence, the temple of the Mother-Goddess (Mêtroön) was built at the Piræus.

The question arises, whether, and how far, the building of the Mêtroön implied the introduction of the ritual of the Phrygian Mother-Goddess as part of the State religion. It was, of course, necessary that in her temple there should be a cultus of, and offerings to, the goddess: it was also obviously necessary that the ritual of the temple should be such as she loved. But that does not imply that the complete ritual and mysteries of the Phrygian deity were adopted and practised at the expense and under the sanction of the Athenian State. On the contrary, Demosthenes[*] holds up Æschines to public contempt because he had assisted at the performance of the Phrygian Mysteries; and he could hardly have done so if they had been part of the State religion. Probably the public worship in the Mêtroön was selected and toned down by something of Hellenic restraint and order. But the Phrygian ritual was performed at the Mêtroön by a private society of

---

Ὀργεῶνες, and elsewhere by strolling priests and *Metragyrtai*; and was still despised by the educated and the patriotic citizens, and discouraged by the State.[*]

The reason why the foreign rites spread was in Athens the same as elsewhere. The State religion, with its purely external show, did not satisfy the deep-lying religious or superstitious cravings of the people: the West turned to the more intense and enthusiastic religion of the East. While the educated classes in the later centuries were trying to unite Greek philosophy with Oriental ideas about the nature of God and his relation to man, the lower orders took refuge in the practice of the direct and undisguised Eastern rites. First naturalized in the Piræus among the lowest and most ignorant class of Athenians, who filled the harbour-town with the 'sailors' licence,'[†] those new rites, though scouted and despised by the more educated citizens, spread, and by degrees reduced the national worship to comparative neglect.

There was probably no period when Greece was not affected by such religious influence; but in Athens the movement assumed much greater strength through the influx of foreign merchants, attracted by the commercial supremacy and liberal policy of the city in the 5th cent. B.C.

Thus, *e.g.*, the rites of Adonis were introduced before the outbreak of the Peloponnesian war in B.C. 431.[‡] The festival was being celebrated at the time when the great expedition was setting sail for Sicily in B.C. 416, as Plutarch mentions (*Alc.* 18). The rites had come from Cyprus (and ultimately from Syria); one of the female conspirators in the *Lysistrata* of Aristophanes (performed B.C. 412) swears by the Paphian Aphrodite; and the ritual is ridiculed in the same play (389, 557). The chief ceremony was entirely non-Hellenic, with its vehement mourning for the goddess's dead favourite Adonis, the search for the body and its discovery, the planting of quick-growing plants in pots as the Garden of Adonis, the revivification of the god in the garden, and the joyous conclusion of the festival.

The Thracian rites of Kotytto were satirized by Eupolis in the *Baptæ*, and the fragments of that comedy show how ugly was the character of the ritual; while the fact that Eupolis had Alcibiades in view in the play, suggests how far the rites had spread in Athens. Æschylus had previously described the Edonian worship of Kotys and Dionysos in a lost tragedy; but there the worship was foreign, though its place in the tragedy shows how great interest it had for the Athenians. The rites were of similar general character to the Phrygian ritual of Cybele and Attis or Sabazios.

Through the analogy of these cases the nature of the introduction of any foreign worship in the very early Hellenic period can be readily gathered from the associated myths and legends. The worship of Dionysos was essentially of the same kind and character as the Phrygian ritual. When it began to penetrate into Greece, through the influence of foreign settlers or a foreign tribe, it aroused the strongest opposition from the native and patriotic party, and from the government which represented the wisdom and long experience of the governing class. But it won its way through its hold on the masses; and supposed or real calamities occurring to those who had expressed contempt or made open resistance to the new god were taken as proofs of his power. The religion of Dionysos was gradually accepted over Greece, and the god himself was received as the associate of Apollo in Delphi; but in general it rested on the devotion of the lower orders and the democracy,[*] and was resisted by the aristocracy and the governing classes. And even that religion was strongly affected by the Hellenic spirit; and its Greek ritual lost much of its Asiatic character and some of its most repulsive features.

(4) *Itinerant priests.*—The strolling impostors who dealt in religious and purificatory rites, and practised on the superstitions of the common people, have been mentioned above, and are often alluded to by the ancient writers. They generally claimed to be representatives of the old Orphic Mysteries, and to possess prophecies of Orpheus, Musæus, and other ancient seers. They had formulæ by which they could bend the gods to their will, and make them favour or injure whom they pleased; and this power they were ready to exercise in favour of any one who paid them. At a trifling cost, and without any personal trouble, one could gain forgiveness of sins, revenge on one's enemies, and a happy life in the future world. At other times the rites of the Mother-Goddess, or some other foreign ceremonial, formed the engine of their power. Some of them cured madness by ecstatic dances, either round the patient sitting in a chair or in company with him. *Orpheotelestai*, *Metragyrtai*, etc., are common names for such impostors, and little distinction can be drawn between different kinds of them. They were generally of a very low class, and addressed themselves to the lower orders of the people. Their equipment was poor, and they often carried about the instruments of their ritual on an ass.[†]

Some of their customs are described by Apuleius, *Met.* viii. 25 ff. Among them was included a parody of the confession and expiation (see A, VII (6 f.), above): one of the strolling band (who are described as *Galli*) in a loud voice confessed publicly that he had been guilty of violating the law of the goddess in some way, and demanded from himself the just punishment of his crime (in the same way as the goddess is represented in the confessional steles as demanding expiation and penalty from the criminal). Thereupon the devotee took a whip and beat himself, till the blood flowed and the sympathy of the multitude showed itself in gifts.

(5) *Magic.*—The practices of such impostors as are described in the previous section are not always distinguishable from magic, into which they shade off by imperceptible gradation. Magic in the strict sense was always felt by the Greeks to be a foreign and specially an Oriental art, as is shown by the very name *μάγος*, a magician, literally a magian or Persian priest. The magical art was called *γοητεία* in reference to the loud howling utterance of magic formulæ.[‡]

In Homer, apart from the tale of the obviously Oriental Circe, little approach to magic appears except in the art of medicine, which was to a great extent learned from the older civilizations of the East, and which always assumes an uncanny character to a primitive people: charms (*ἐπαοιδοί*) are uttered over wounds: Helena has a care-soothing drink, *nepenthe*; Aphrodite, a love-producing girdle; and Athena changes the form of men. But the use of all such arts is confined to gods and half-Divine heroes, and is therefore clearly distinguished from magic.

Later, the power of transforming men into other shapes, of making love-philtres, of stilling the winds, causing rain, etc., was believed to be attainable by human beings through arts which were strictly magical, and quite distinct from the process whereby (according to a primitive form of religious belief) priests through their prayers and rites could induce the gods to do those things.[*] The magical art whereby men could attain such powers was so well known and widely practised in Thessaly that the word *Thessalis* was used in the sense of 'witch.' Witches could draw down the moon (as Aristophanes says, *Clouds* 748), turn men into wolves, still the winds, and so on. This magic power was gained by *compelling* the gods; in other words, by appealing to a higher and supreme power to which the gods must bow. Magical art, then, was associated with an older pre-Hellenic religion and the Divine power of a more ancient system, and was always related to the Chthonian religion and the gods of the world of death.

[‡] See W. Headlam in *Class. Review*, 1902, p. 52.

The foreign origin of magic as practised in Greece must not be pressed too far. There can hardly be any doubt that it embodied elements of the primitive pre-Hellenic religion, which persisted in the form of popular superstition and occult lore after the public and acknowledged religion had assumed a new form.

The power of magic was most frequently invoked to attract reluctant persons to a lover, or to bring disease and death upon an enemy. Numerous examples of curses of this latter kind have been found in recent years, and have considerably enlarged our knowledge of the subject. They were usually scratched rudely on plates of lead, the proper metal, and buried in the ground, often in a grave, or in the Temenos of Chthonian deities. They were, however, also turned to a utilitarian purpose, and employed, *e.g.*, almost like advertisements of lost or stolen property, the finder of which was subjected to a terrible curse if he failed to restore it to the owner. Such curses were intended to be seen by the thief, and must therefore have been publicly exposed; but even these seem to have been connected with Chthonian worship, and attached to the shrines of Chthonian deities. The penalty invoked most frequently in all curses was fever, the hidden fire of the gods of death, which burns up imperceptibly the strength and life of the sufferer.[†]

To this subject belong also the belief in the evil eye (which, while specially injurious to children and domestic animals, was dangerous to all) and other forms of baleful influence, and the use of charms and preservatives against them (ἀποτρόπαια). This belief was a debased form of the doctrine seen in Herodotus, that the gods are jealous of any surpassing success, or power, or beauty, or happiness in man, and interfere to destroy it; and that it is wise to propitiate them by voluntarily sacrificing part of one's good fortune or wealth: hence arose the common practice of guarding against evil by spitting, and by ugly or obscene gestures.

It would, however, serve no useful purpose at present to enumerate the various forms which magic and other superstitious practices assumed in the Greek world. For our purpose, the important point is, that they were alien to and in the long-run stronger than the true Hellenic religion, and helped to destroy it.

(6) *The worship of living men as deities.*—The deification of living men was not in itself alien to the spirit of Hellenism, but, on the contrary, was quite in harmony with the Hellenic satisfaction and delight in human beauty and nobility. The worship of the dead as heroes was developed by Hellenism in a way that tended in that direction, as when the dead freebooter Philip was worshipped as a hero by the people of the Greek colony of Segesta (whom he had wantonly attacked in piratic fashion), simply on account of his personal beauty.[*] It was an easy step to identify the man of surpassing excellence, physical or mental, with a god either after his death or during his lifetime, when the perfection of human nature was regarded as Divine. Thus Pythagoras after death was worshipped under the form of Apollo Hyperboreios, Lycurgus as a god, Sophocles as Asklepios-Dexion. Sacrifices were offered to Brasidas and Hippocrates, and the term θύειν, which properly denotes the offering to a god as distinguished from a hero,[†] is used about them. According to Plutarch, the first man to whom worship was paid as a god during his lifetime was Lysander (*Lys.* 18). It is significant that this first step was made among the Asiatic Greek cities. While there was nothing essentially non-Hellenic in such deification of human nature, yet the Hellenic sense of order and measure and grace long shrank instinctively from such a step as an excess; but, in Asia, Hellenism never was so pure as in Europe.

The Thasians honoured Agesilaos in a similar way. From the time of Alexander the deification of kings was customary, as a mere recognition of 'divine right.' Roman generals were often honoured by Greek cities with festivals and games, which implied deification.[‡] Every Roman emperor in succession was worshipped; and it was inscribed on the coins and the engraved decrees of the greatest Greek cities as a special honour that they were temple-wardens (νεωκόροι) of the emperors.

IV. RELIGION OF THE GRÆCO-ASIATIC CITIES.—In the Hellenized cities of Asia Minor, which had such importance in the early history of Christianity, all these forms of religious thought and act were busy simultaneously. The old Anatolian superstition retained no vestige of its early simplicity and its original adaptation to the needs of a primitive people, and had been brutalized and degraded by the exaggeration of its worst features and the importation of barbarian superstitions; but it was still strong, especially in the cities of the inner country. The Hellenic religion in its decaying forms was introduced and talked about by the Hellenes of the cities. Greek or Græco-Asiatic philosophy exercised a considerable influence on the thought of the educated classes in those cities, and many sayings and principles and scraps from it had passed into the popular language and conversation of society; but it had little influence on life, except in the way of producing disbelief in current religions and contempt for the most vulgar kinds of superstition. But on the great mass of the population all kinds of superstition and magic exercised a very strong influence, and were on the whole in harmony with the spirit of the Anatolian religion in its modern form.

As to the philosophic speculation current in those cities, in spite of its many faults and its obvious weakness as a practical force, the account given in § I makes it easy to understand how and why philosophy, though so depreciated and scouted by St. Paul, was, after all, his ally in a certain degree against the gross forms of vulgar superstition which were the only active religious force in the cities. One can also readily understand why, to the educated observer in contemporary Græco-Roman society, such as Sergius Paulus in Paphos, or the Stoic and Epicurean philosophers in Athens, he seemed to be a new teacher of philosophy, more or less impressive in himself, but not essentially different in type from scores of other lecturers who were striving to catch the ear of the educated world.

---

[*] Compare, for example, Pausanias, ii. 34. 2 (at Methana in Argolis), viii. 38. 4 (at the spring Hagno on the Arcadian mountain Lycæus).

[†] See Wuensch in *Corpus Inscript. Att.*, Appendix.

[*] Herod. v. 47.

[†] The distinction, however, was not strictly maintained: θυσίαι were offered to Philip at Segesta.

V. DECAY AND DEATH OF THE HELLENIC RELIGION.—While the religion of the country ceased to satisfy the wants of the people, the outward show became greater and greater. The Scholiast on Aristophanes (*Vesp.* 661) says that the year consisted really of only ten months, as two were occupied by festivals; and Strabo (vi. p. 429) says that finally at Tarentum there were more feasts than days in the year. But the spirit in which the rites had once been performed was now lost; people tolerated the duties as traditional ceremonial, and enjoyed the festivals merely as fine shows. The word *ἀφοσιοῦσθαι*, 'to discharge oneself of what is due to the gods,' came to denote careless and perfunctory performance. The duty of performing the public sacrifices was hired out to the lowest bidder. Zeus had to mourn the neglect into which he had fallen compared with the more recent gods (Lucian, *Icarom.* 24).

In truth, the Hellenic religion in its most typical form could not permanently maintain its hold on human nature. It was the evanescent, rare, and delicate product of a peculiar period and of special conditions in human history. It was the belief of an aristocracy of talents and opportunities, filled for the moment with the delight of activity and expansion, and the mere joy of living. It required the Hellenic City-State for the theatre of its development, and the existence of a class, supported and set free from mere drudgery by a large enslaved population, but too numerous and too various in worldly circumstances to be only a narrow, privileged, and idle aristocracy of birth. But such conditions are rarely possible, and can never last long. Where an approximation to them occurs for a time in any considerable section of the population of any land, there results a tendency to a similar artistic development of religion. But there has never been elsewhere an experiment on such a scale as in Greece, where economic and social facts, natural surroundings, and relation to foreign nations, conspired to give a glory and an intoxicated consciousness of life to the small, energetic, busy, keenly competing cities of the Hellenes.

But even there the conditions soon ceased. Greece sank into its inevitable place as a third-rate province in some larger empire. It was essential to true Hellenism that it should be supported by the spirit of a self-governing people; its proud self-consciousness and joy in its own life and activity were inconsistent with servitude.

A mournful consciousness that the 'gods of Greece' were dead is often apparent in the later Greek literature, as, for example, in the well-known story preserved by Plutarch (*de Defectu Orac.* 17), that in the reign of Tiberius, when a ship sailing from Greece to Italy was among the Echinades Islands, off the Acarnanian coast, a voice was heard summoning by name a certain Egyptian pilot who chanced to be on board; and, when he answered the third summons rather reluctantly, the voice bade him announce when he reached Palodes that 'Pan the great is dead.'

It is a fitting conclusion to Hellenic religion that the Oracles became dumb; and especially that the Delphic Oracle, which had played so important and, for a time, so noble a part in guiding its development, lost first its influence and finally its voice. As a force in history it had long lost all power; in the 1st cent. after Christ, Delphi and Ammon had given place to Chaldæan astrologers, as Strabo and Juvenal agree in saying, and Plutarch wrote a treatise inquiring into the reason;* and in the 4th cent., when Julian sent to consult the Delphic Oracle, the last response was uttered for him: 'Tell the king, to earth has fallen the beautiful mansion; no longer has Phœbus a home, nor a prophetic laurel, nor a fount that speaks: gone dry is the talking water.' †

εἴπατε τῷ βασιλῆι, χαμαὶ πέσε δαίδαλος αὐλά·
οὐκέτι Φοῖβος ἔχει καλύβαν, οὐ μάντιδα δάφνην,
οὐ παγὰν λαλέουσαν· ἀπέσβετο καὶ λάλον ὕδωρ.

The religious forms of Greece had served their day; they were now antiquated, and the world passed on to other forms. The alternatives presented to the people were Christianity or vulgar superstition, while a steadily diminishing remnant of the educated class clung to a philosophical form of paganism.

LITERATURE.—Besides the many general Dictionaries and works on Greek Antiquities, which usually include Religious Antiquities, such as Daremberg-Saglio's *Dict. des Antiquités gr. et rom.* (A-M published in 1902), Pauly-Wissowa, *Real-Encyclopædie* (A-Dem. in 1902), Smith (who includes Mythology under Biography, and Ritual under Antiquities), etc., the works devoted expressly to Greek Religion (under which some casual information is given about cults of Asia Minor), either generally or in some particular department or aspect, are extremely numerous, and complete enumerations unnecessary and hardly possible. The reader who looks at the discussion of any detail in a few of the following works will find in them sufficient indications to guide him to the vast literature (much of it not in itself valuable) that has accumulated round most of the chief topics. Owing to the capricious and subjective nature of the treatment (which can hardly be avoided), the information which is most important for an investigator from a novel point of view may, however, be passed unnoticed in several of the most elaborate works, and may be found only by looking into some of the older or the less important and honoured works. The old-fashioned and unpretending *Handwörterbuch der griechischen u. röm. Mythologie* of Jacobi (Coburg, 1835), with its bare and bald lists of references to ancient authorities, is still often most practically useful for the investigator, because there he gets facts unencumbered with opinions: in the voluminous and indispensable, and in many respects far more complete, work of Roscher, *Lexicon der griech. und röm. Mythologie* (still unfinished: A-Par. published in November 1902), facts are apt to be concealed by opinions: but the variety of writers in the *Lexikon* on cognate topics often supplies a useful diversity of opinion. Those who desire to study the history of modern opinion will find the following list, while inadequate, yet a sufficient introduction from which to make a beginning (only, as a rule, one work by any author is named: the most recent writers as a rule are given, and the older can be followed up from them).—

Maury, *Histoire des Religions de la Grèce ancienne*; Farnell, *Cults of the Greek States*, i. and ii. 1896 (sequel not ready in 1902); Foucart, *Recherches sur l'origine et la nature des Mystères d'Eleusis*, 1895, etc.; Preller-Robert, *Griechische Mythologie*^{4}, 1887; A. Mommsen, *Feste der Athener* (new edition of *Heortologie*); E. Curtius, *Gesammelte Abhandlungen*, etc.; Dieterich, *Nekyia*; Diels, *Sibyllinische Blätter*, 1890; Bouchè-Leclercq, *Histoire de la Divination*; Usener, *Religionsgeschichtliche Untersuchungen*, 1889, *Griechische Götternamen*, etc.; Gruppe, *Die griech. Kulte u. Mythen*; Ridgeway, *Early Age of Greece*, 1901; many articles and other works by these writers, and also by S. Reinach, Miss J. E. Harrison, Wernicke, Wilamowitz, Robert, Maass, Kuhnert, Körte, Bloch, Drexler, Vitry, Perdrizet, Berard, Cumont, Studniczka, Rohde, Tümpel, Marillier, Beurlier, Miss A. Walton, Krause, Keller, Stengel, Weinhold, Crusius, Hoffmann, Reichel, Thraemer, Toepffer, von Fritze, Ziebarth, Ziemann, Buresch, Dümmler, etc. Anrich, *Das Antike Mysterienwesen*, 1894; Wobbermin, *Religionsgesch. Studien*, 1896; Gardner, *Origin of the Lord's Supper*, 1894, etc., treat of the relation of the Mysteries to early Christianity: Anrich is the least imaginative; Gardner takes a more subjective view. Cf. also S. Cheatham, *The Mysteries* (Huls. Lect. 1896–97).

On the origin of rites and their relation to savage ritual, Bötticher, *Baumkultus*; A. B. Cook, *Animal-Worship in the Mycenæan Age*; Frazer, *Golden Bough*^{2} (nominally on Italian, really more on Greek), 1900; Mannhardt, *Wald- und Feld-Kulte*, etc.; Jevons, *Introduction to the History of Religion*, 1896 (totemistic). In Bursian's *Jahresbericht* from time to time reviews of the entire literature can be found.

---

* Juv. *Sat.* vi. 553; Strab. xvii. p. 1168; Plutarch, *de Defectu Oraculorum.*

† Cedrenus, i. p. 532, has preserved the oracle, which is perhaps the work of a triumphant Christian or of one of the last pagan philosophers.

On the religious ideas in the Greek poets and philosophers: Zeller, 'Entwickelung des Monotheismus bei den Griechen' in his *Vorträge und Abhandlungen Geschichtl. Inhalts*, 1865, *Ueber das Wesen der Religion*, Tübingen, 1845; Trendelenburg, 'Nothwendigkeit und Freiheit in der griech. Philosophie' in the second volume of his *Historische Beiträge zur Philosophie*; and many scattered references and discussions in the commentaries on the leading authors, and in the Histories of Literature and Philosophy. Verrall, *Euripides the Rationalist*, states well some of the difficulties which are caused by a too superficial view of the thought of Euripides; but the solution suggested suffers from the want of any attempt to estimate the place of that poet in the development of Greek thought, and the failure to emphasize that Euripides must be studied in relation to the preceding and succeeding writers.

W. M. RAMSAY.

STYLE OF SCRIPTURE.—

i. Historical introduction.
ii. Characteristics of Biblical style due to earliness of date or to the Semitic idiosyncrasy of the Hebrews.
iii. Peculiarities of style purposely adopted upon occasion by *all* classes of Scripture writers.
iv. Peculiarities of style for which a preference is shown by *particular* classes of Scripture writers.
v. Conclusion. Observations on the *critical* and *doctrinal* significance of differences of style on the part of Scripture writers.
Literature.

i. HISTORICAL INTRODUCTION.—The question of the style of Scripture has formed the subject of discussion from a very early period. The diversity of forms in which prophecy, *e.g.*, makes its appearance was a point of too much interest to escape the notice of the scribes. Hence we already encounter in the Talmud a saying which contains an excellent illustration of the formal differences that exist between prophecies. We refer to the words: 'Everything that Ezekiel saw, Isaiah also saw; but Ezekiel with the eyes of a rustic who has seen the king, Isaiah with the eyes of a citizen who has seen him' (*Hăgîga*, 13*b*). The meaning is, that the descriptions found in the Book of Ezekiel are elaborated in much greater detail and sometimes developed at greater length than is the case in the Book of Isaiah (cf., *e.g.*, Ezk 1^{3}-2^{3} with Is 6^{1-8}). It may have been simply this diversity which marks the prophetical literature that gave rise to the judgment pronounced in *Sanhedrin*, 89*a*: 'No two prophets prophesy in the same style' (בסיגנון אחר), although this remark primarily concerned the differences disclosed by a comparison between Ob ^{3} and Jer 49^{16}. In the former of these passages we read 'The pride of thine heart (זְדוֹן לִבְּךָ) hath deceived thee,' but in the parallel passage we find 'Thy terribleness (תִּפְלַצְתְּךָ) hath deceived thee.' Such differences between parallel passages of the OT as affect especially their linguistic colouring were not upon the whole unnoticed in antiquity. This may be seen from the *Massora magna* to Ex 20^{17} etc., or from the tractate *Ṣōphĕrîm*, 8, etc. (cf. Ed. König, *Einleitung ins AT*, § 16).

Among early *Christian* writers no one has treated the question of the style of Holy Scripture in more detail than Adrianos in his Εἰσαγωγὴ εἰς τὰς θείας γραφάς (*aus neuaufgefundenen Handschriften herausgegeben, übersetzt und erläutert*, von Friedr. Goessling, Berlin, 1887). His whole book is devoted to the subject of the present article. He points out stylistic peculiarities of particular parts of the OT, *e.g.* the Psalter (§§ 99, 105). He also drew already the distinction between prose and poetry in Scripture. Taking the word 'prophecy' in the wider sense which it assumed in later times (cf. Ed. König, *Einleit.* p. 457), he remarked in the final paragraph of his work: 'It ought also to be known to the initiated that one kind of prophecy is composed in prose, like the writings of Isaiah and Jeremiah and their contemporaries, but another kind in regular measure adapted for singing (ἡ δὲ μετ' ᾠδῆς ἐν μέτρῳ), like the Psalms of the blessed David, and the prophecy [Ex 15^{1-18} and Dt 32 f.] contained in the second and fifth books of Moses' (§ 134).

This question of the style of Holy Scripture is of great importance in its bearing upon the judgment we form regarding its perspicuity and its inspiration. From this point of view, the style of the Biblical writers has been discussed by the authors we now proceed to name. Flacius Illyricus, in his famous *Clavis Scripturæ Sacræ* (1567, etc.; ed. Basileensis, 1628 f.), vol. i. Præfatio, fol. 3*a*, writes: 'Objiciunt illi [*i.e.* pontificii] de sensu ac intelligentia litem esse. Eam illi volunt ex Patribus peti opportere. At contra Augustinus et Hilarius contendunt ex collatione Scripturæ loca aut dicta obscuriora esse illustranda.' The other passages of his work which treat of style are 2_{32} 420_{25} 433_{39} ('Lapsus styli ex alio in aliud') 489_{47} ('De plenitudine styli') 508_{49} ('Stylus Paulinus'). These points, however, are much more fully discussed by Glass in his important *Philologia Sacra*, which went through a number of editions from 1623 onwards. To these questions he devotes the whole of the third and fourth tractates of the first of the five books into which his work is divided (4th ed. 1668, pp. 186–246). He sets out with the following statement: 'Inter rationes, quibus Bellarminus Scripturæ Sacræ obscuritatem probatam dare vult, occurrit etiam illa quam a styli seu modi dicendi in Scripturis usitati ambiguitate desumit,' and he brings forward good arguments in refutation of this charge against Holy Scripture. The same point of view has been since then considered by many scholars, and is touched upon by Sanday in his admirable Bampton Lectures on *Inspiration* (1st ed. 1893, p. 403), and C. A. Briggs in his comprehensive *General Introduction to the Study of Holy Scripture* (1899, p. 328). This highest point of view from which the question of the style of Scripture has to be considered, is not, however, the only one. It is a question which is not only an eminently religious one, but of importance as regards the history of culture. For it is an extremely interesting inquiry how far the *art* of description by means of language was developed among the Hebrews and the writers of the NT. In what follows we shall endeavour to satisfy both interests, the religious and the secular.

ii. CHARACTERISTICS OF BIBLICAL STYLE DUE TO EARLINESS OF DATE OR TO THE SEMITIC IDIOSYNCRASY OF THE HEBREWS. — The most important of these phenomena, arranged according to their noteworthiness and frequency, are the following:—

1. We have only to proceed a short way in our reading of the first book of the Bible to be struck with the great frequency with which the word 'and' occurs. The opening sentence of Genesis is followed by the statement 'And the earth was without form and void' (*tōhû wā-bōhû*). In like manner, the third sentence 'And darkness was upon the face of the deep' is tacked on by 'and,' while the fourth runs 'And the spirit of God moved upon the face of the deep.' And so in this same chapter there is a direct succession of some sixty sentences, all beginning with 'and.' This *preference for the copulative conjunction* may be observed no less in the frequent **Polysyndeton** which characterizes the style of Scripture, as, for instance, in 'Shem and Ham and Japheth' (Gn 9^{18}); or 'Elam and Asshur and Arpachshad and Lud' (10^{22}); or 'thou nor thy son nor thy daughter nor thy manservant nor thy maidservant nor,' etc. etc. (Dt 5^{14}); or 'Thou shalt not kill, neither shalt thou commit adultery, neither shalt thou steal, neither,' etc. etc. (5^{17-21} 6^{5}). Nay, this preference for 'and' went so far that we even find new books of the OT commencing with 'and.' This is the case not only with the five books of the Pentateuch, but also

with Joshua, Judges, Ruth, etc. It cannot be inferred from this form of opening that these books once formed parts of a continuous work, for the Book of Esther begins with the same formula 'And it came to pass,' although its subject is an isolated episode. The correct view of this phenomenon is that the expression 'And it came to pass' was so much in use that one came to write it from force of custom and almost unconsciously. On this same account, the fact that the Book of Ezekiel opens with 'And it came to pass' is no indication that something has dropped out before this formula, as is contended by Budde and others (see the controversy on this point between Budde and the present writer in *Expos. Times*, xii. [1901] 39 ff., 375 ff., 525 ff., 566 f.; xiii. 41 ff., 95). The expression 'And it came to pass' had become as common as the phrase 'And it shall come to pass,' with which circumstantial statements of time, etc., were introduced (cf. Is 2^2 'And it shall come to pass in the last days that,' etc.).

When we compare even so simple a writer as 'the Father of History,' this Hebrew fashion of connecting sentences is striking. After giving his own name and dividing mankind into the two categories of Hellenes and barbarians, Herodotus begins his narrative with the following sentences: '*Now* the learned among the Persians say that the Phœnicians were the authors of the discord (namely, between the Greeks and other peoples). *For*, after they (the Phœnicians) came from the sea that is called the Red Sea to this (the Mediterranean) sea, and settled in the land which they still inhabit, they immediately devoted themselves to great enterprises by sea. *But* in the course of transporting Egyptian and Assyrian goods, they frequently visited Argos as well as the rest of the country.' There is no need for proceeding further with the translation of Herodotus' *History*, in order to show the striking contrast in structure and connexion presented by its opening sentences and those of the Bible. The numerous principal sentences which are *co-ordinated* in Gn $1^{1ff.}$, and the stereotyped 'and' by which they are connected, have ceased, as a rule, to strike us, because from our earliest days we have been used to this characteristic of the Biblical narratives, and this fashion of writing, which is peculiar to Biblical history in the widest sense, was also very well calculated to impress our minds. For this way of adding principal sentence to principal sentence, and of connecting them for the most part by 'and,' is the childish device which always meets us at the naïve stage in the history of culture. We encounter it in the childhood of the individual, we find it amongst the uneducated masses of the people, and it shows itself at the primitive stages in the development of the human race. For instance, 'The Homeric speech loves the *co-ordinating* of sentences' (G. Curtius, *Gr. Gram.* § 519_5; Hentze, *Parataxe bei Homer*, 1889), and it is very interesting to note how the number of conjunctions in the later Hebrew and other Semitic languages underwent increase: for illustrations see Ed. König, *Historisch-Comparat. Syntax der heb. Sprache*, §§ 377–396*r*).

There are other four principal marks of the simple method followed by Hebrew writers in grouping their ideas and their sentences. —(*a*) There are such forms of expression as 'Let them be for signs and for seasons and for days and years' (Gn 1^{14}), words which mean, in all probability, 'Let them serve as signs for seasons,' etc. This is the same simple method of *co-ordinating ideas* as is familiar to us from the 'pateris libamus et auro' of Vergil, *Georg.* ii. 192, and is commonly known as Hendiadys. Other instances of it in Scripture are: 'a city and a mother in Israel,' *i.e.* a mother-city, a metropolis (2 S 20^{19}); 'feasting and gladness'=feasting of gladness (Est 9^{18}); 'I heard whispering and a voice,' *i.e.* whispering of a voice (Job 4^{16b}); 'changes and war'=changes of war (Job 10^{17c}); 'glory and strength'=glory of strength (Ps. 29^1 96^7); 'time and judgment'=time of judgment (Ec 8^5); 'cloud and smoke'=cloud of smoke (Is 4^5); 'trouble and darkness'=dark, *i.e.* irremediable, trouble (Is 8^{22}). In like manner the Heb. 'consumption and determination' is rightly changed in EV to 'consumption, even determined' (Is 10^{23} 28^{22}), and 'end and expectation' is correctly replaced by 'an expected end' (Jer 29^{11}). The same co-ordination of ideas meets us in 'the roll and the words' for 'the roll of the words' (Jer 36^{27}). An illustration of the same fondness for simple co-ordinating of ideas is found also in 'her hand . . . and her right hand' (Jg 5^{26}); or 'my hand . . . and my right hand' (Is 48^{13}); or 'the Lord . . . and his glory' (Is 60^2); or 'the Lord . . . and his strength' (Ps 105^4). This mode of expression is known as *καθ' ὅλον καὶ μέρος*, and a counterpart to it has been recently noted by the present writer in the words 'Who will bring me into the strong city? Who will lead me into Edom?' (Ps 60^9 ‖ 108^{10}; cf. Ed. König, *Fünf neue arabische Landschaftsnamen im AT*, 1902, p. 33 f.).—(*β*) There is the frequent throwing in of the interjection 'Behold!': *e.g.* 'And God saw . . . and, *behold*,' etc. (Gn 1^{31} 6^{12} 8^{13} 18^2 19^{28} etc.; cf. Ed. König, *Heb. Syntax*, § 361*g*).—(*γ*) We have the very frequent employment of *direct speech*. The list of examples of this begins with the words 'Let there be light' (Gn 1^3); it is continued in 'Let there be a firmament,' etc. (v.^{6}), 'Behold, I have given you,' etc. (v.^{29}), and so on it goes (cf. *Syntax*, § 377). The NT also shares abundantly in this preference for the *oratio directa* (Mt $1^{20.\ 23}$ $2^{2.\ 5}$ etc.).—(*δ*) The fourth mark of the naïve simplicity of style which is wont to be employed by the Biblical writers may be observed from the following instance: 'Till thou return unto the ground . . . for dust thou art, and unto dust shalt thou return' (Gn 3^{19}). Here we have first a destiny indicated for man, then the reason for this, and finally the destiny itself is once more repeated. Many of our readers must have noticed the same movement of thought in the conversation and letters of persons belonging to the lower classes. This process whereby one returns to the original starting-point is called **Palindromy**, and there are various species of it. Here are some other instances of the class represented by Gn 3^{19}: 'And it repented the Lord that he had made man, etc., and the Lord said, I will destroy, etc., for it repenteth me that I have made them' (Gn $6^{6f.}$); 'The earth also was corrupt, etc., for all flesh had corrupted,' etc. (v.$^{11f.}$); 'The Lord scattered them abroad, etc. Therefore is the name of it called Babel, etc., and from thence did the Lord scatter them abroad,' etc. ($11^{8f.}$); 'Every beast of the forest is mine, etc., If I were hungry, I would not tell thee, for the world is mine' (Ps $50^{10\text{-}12}$); 'O that my ways were directed to keep thy statutes, then shall I not be ashamed when I have respect unto all thy commandments' ($119^{5f.}$); 'Surely he hath borne our griefs, etc., for the transgression of my people was he stricken' (Is $53^{4\text{-}8}$); 'The Lord said, etc., because I have spoken it' (Jer $4^{27f.}$); 'Because ye multiplied, etc., because of all thine abominations' (Ezk $5^{7\text{-}9}$). — Another species of *Palindromy* is represented by the words 'The land was not able to bear them, that they might dwell together; for their substance was great, so that they could not dwell together' (Gn 13^6). There the course of ideas turns from the fact to its cause, and then returns to the fact or the consequence. The same mental movement may be observed in: 'Judah, thou art he whom thy brethren shall praise; thy hand shalt be in the neck of thine enemies; thy father's children shall bow down before thee' (Gn 49^{8}); 'The nakedness of thy mother shalt thou not uncover; she is thy mother, thou shalt not uncover her nakedness' (Lv 18^{7}); and the same is the case in v.^{15} 'My strength is dried, etc., for dogs have compassed me, etc., I may tell all my bones' (Ps 22^{15-17}); and in Is $53^{11f.}$ 'By his knowledge, etc., Therefore will I divide him a portion with the great, etc., because he hath poured out his soul unto death.' Essentially the same phenomenon recurs in 1 Ch 9^{44} 'Azel had six sons, and these are their names: Azrikam, etc., these were the sons of Azel.'—A third species of *Palindromy* is made up of instances like 'God created man in his own image, in the image of God created he him' (Gn 1^{27}); 'Make thee an ark, etc. Thus did Noah, according to all that God commanded him, so did he' ($6^{14.\ 22ab}$); 'Thou shalt speak all that I command thee, etc., and Moses and Aaron did as the Lord commanded them, so did they' (Ex $7^{2ff.\ 6ab}$). The same mode of expression meets us in Ex $12^{2ab.\ 28.\ 50}$ $39^{32.\ 43}$ 40^{16}, Lv. 4^{20}, Nu 1^{54} 5^{4} 8^{20} etc., Ec 1^{6}, Dn $8^{1ff.\ 20}$ etc. (see Ed. König, *Stilistik*, etc. p. 171 f.).

Another feature that strikes us in the strncture of clauses in the OT presents itself in 'I am the Lord thy God which *have* brought,' etc. (Ex 20^{2}). Other examples of the same fashion are Dt $5^{3b.}$ ('all of *us*') ^{6}, Jg 13^{11} ('the man that *speakest*'), 1 S 25^{33} ('and thou which *hast*'), Ps 71^{20} ('thou which *hast*'), Neh 9^{7} ('thon art the God who *didst*'), 1 Ch 21^{17} ('I it is that *have* sinned').

2. It reqnires no great acquaintance with the language of Scripture to enable one to recall such forms of expression as the following: 'Joseph was the *son* of his old age' (Gn 37^{3}), *i.e.* he was born when Jacob was advanced in years, forming thus a contrast to the 'children of youth,' *i.e.* children begotten by a man at the period of his full strength (Ps 127^{4}, cf. Gn 49^{3}). Where we now find in the EV the expressions 'son(s) of' or 'children of,' the Hebrew is בֶּן־ or בְּנֵי, and their use constitutes such a characteristic feature of the style of Scripture that it deserves somewhat fuller illustration.—(*a*) The בֶּן־ (*ben-*) is sometimes retained in the EV: *e.g.* Ben-ammi (Gn 19^{38}), *i.e.* 'belonging to my people'; Ben-oni (35^{18}), *i.e.* 'born in my sorrow'; Boanerges (Mk 3^{17}), *i.e.* 'sons of thunder.' Seven proper names show the Aramaic form of *ben-*, namely *bar-*: Bartholomew (Mt 10^{3}), Bar-jonah (16^{17}), Barabbas (27^{16}), Bartimæus (Mk 10^{46}), Barsabbas (Ac 1^{23}), Barnabas (4^{36}), Barjesus (13^{6}).—(*β*) בֶּן־ or בְּנֵי are reproduced by 'son(s) of' or 'children of' in the following expressions: 'son of his old age' (Gn 37^{3}); 'thy mother's sons,' or the like, *i.e.* brothers who have not only the same father but the same mother (Gn 27^{29}, Jg 8^{19}, Ps 50^{20}, Ca 1^{6}); 'children of his people' (Nu 22^{5}); 'children of Sheth' (24^{17}), *i.e.* friends of war tumult [according to Sayce, *Expos. Times*, xiii. 64^{b}, the 'Sutu], at least Jeremiah in the parallel passage (48^{45}) speaks of 'sons of tumult' (*bĕnê shā'ôn*); 'children (son, sons) of Belial' (Dt 13^{13} [RV 'base fellows'], Jg 19^{22} 20^{13}, 1 S 2^{12} 10^{27} 25^{17}, 1 K $21^{10.\ 13}$, 2 Ch 13^{7}), *i.e.* worthless persons (cf. Ed. König, *Syntax*, p. 309, n. 1 [against Cheyne]), cf. 'children of wickedness' (2 S 3^{34a} 7^{10}, 1 Ch 17^{9}); 'son of wickedness' (Ps 89^{22b}); 'children of iniquity' (Hos. 10^{9}); 'son of Hinnom' (?=wailing; Jos 15^{8} 18^{16}, Jer 7^{31} etc.); 'son of the morning' (Is 14^{12}); 'children of strangers' (2^{6b}); 'sons of strangers' (60^{10})='strangers' (Ezk 44^{7} etc., Ps $18^{44f.}$ $144^{7.\ 11}$, Neh 9^{2}); 'children of whoredom' (Hos 2^{4}); 'children of the needy' (Ps 72^{4}); 'children of youth' (Ps 127^{4}); 'children of the province' (Ezr 2^{1a}); 'children of the captivity' (4^{1b} $6^{19f.}$ $10^{7.\ 16}$); 'son of man' (Nu 23^{19}, Job 16^{21b} 25^{6} 35^{8}, Ps 8^{4} 80^{17} 144^{3} 146^{3}, Is 51^{12} 56^{2}, Jer $49^{18b.\ 33}$ 50^{40} 51^{43}, Ezk 2^{1} etc., Dn 7^{13} 8^{17}, Mt 8^{20} etc.);[*] 'sons (=disciples) of the prophets' (1 K 20^{35}, 2 K 2^{3} etc., Am 7^{14}); 'children'='disciples' (Mt 12^{27}); 'sons' = 'disciples' (Lk 11^{19}); 'son(s)' or 'children' = 'eitizen(s)' or 'adherent(s)' (Mt 8^{12} 13^{38}, Ac 13^{10}); 'children of (*i.e.* those that preparc) the bride-chamber' (Mt 9^{15}, Mk 2^{19}, Lk 5^{34}); 'son(s)' or 'children'='belonging to' or 'sharing in' (Mt 23^{15}, Lk 10^{6} 16^{8} $20^{34.\ 36}$, Jn 12^{36} 17^{12}, Ae 3^{25}, 2 Co 6^{18}, 1 Th 5^{5}, 2 Th 2^{3}, Eph 2^{2} 5^{6}, Col 3^{6}).—(*γ*) בֶּן־ or בְּנֵי are paraphrased in the following passages: Gn 5^{32} 'Noah was five hundred years *old*,' lit. 'a son of five hundred years' (and so in many similar passages); 15^{2b} 'the steward,' for the possessor or heir; 29^{1} 'the people (lit. sons) of the East' (cf. Jg 7^{12} 8^{10}, 1 K 5^{10}, Job 1^{3}, Is 11^{14}, Jer 49^{28}, Ezk 25^{10}); 'his ass's colt' (Gn 49^{11}); 'the bullock' lit. 'son of the cattle' (Lv 1^{5}); 'young' lit. 'son(s) of' (1^{14} $4^{3.\ 14}$ 5^{7} etc.); 'their people' lit. 'children of their people' (Lv 20^{17}, cf. Nu 22^{5}); 'rebels' lit. 'sons of refractoriness' (Nu 17^{10}); 'meet for the war' lit. 'sons of might' (Dt 3^{18b} AV; RV 'men of valour'); 'men of valour' or the like (Jg 18^{2a}, 1 S 14^{52} 18^{17} etc.); 'worthy' (Dt 25^{2a}); 'breed' (32^{14a}); 'surely die' lit. 'son of death' (1 S 20^{31b} 26^{16a}, 2 S 12^{5}, cf. Ps 79^{11b} 102^{20b}); 'wicked men' lit. 'sons of wickedness' (2 S 3^{34a}); 'hostages' lit. 'sons of pledges' (2 K 14^{14} ∥ 2 Ch 25^{24}); 'young' lit. 'son of' (2 Ch 13^{9}); 'kids' lit. 'sons of' (35^{7}); 'those that had been carried away' lit. 'sons of the exile' (Ezr 8^{35}); 'sparks' lit. 'sons of flame' (Job 5^{7}); 'a man' lit. 'son of man' (16^{21b}); 'lions' whelps' lit. 'sons of pride *or* savagery' (28^{8})='children of pride' (41^{34}); 'arrow' lit. 'son of the bow' (41^{28}); 'arrows' lit. 'sons of his quiver' (La 3^{13}); 'young' lit. 'son of' (Ps 29^{6b} 147^{9}); 'any of the afflicted' lit. 'son of affliction' (Pr 31^{5}); 'appointed to' lit. 'sons of' (31^{8}).

This characteristic of Scripture style attains all the greater prominence because the same derived usage is frequently met with in the case of the term 'daughter.' For instance, 'daughters of Heth' stands for Hittite women (Gn 27^{46}). The same usage appears in $28^{1.\ 8}$, Nu 25^{1}, Jg 11^{40}; 'the daughters of Shiloh' (Jg 21^{21}); 'daughters of Dan' (2 Ch 2^{14}); 'daughter of Tyre' (Ps 45^{12})='princess of Tyre'; 'daughters of Judah,' etc. (Ps 97^{8}, Ca $1^{5ff.}$); 'daughters of Zion,' etc. (Is 3^{16} etc., Jer $49^{3\alpha\beta}$, Ezk 16^{27}); 'daughter of Zion'='inhabitants of Zion' (2 K 19^{21}, Ps 9^{15} 137^{8}, Is 1^{8} $10^{30.\ 32}$ 16^{1} 22^{4} $23^{10.\ 12}$ 37^{22} $47^{1a.\ 5}$ 52^{2} 62^{11}, Jer $4^{11.\ 31}$ $6^{2.\ 14.\ 23.\ 26}$ $8^{11.\ 19.\ 21-23}$ 9^{6} 14^{17} $46^{11.\ 19.\ 24}$ 48^{18} 50^{42} 51^{33}, La $1^{6.\ 15}$ $2^{1f.\ 4f.\ 8.\ 10f.\ 13.\ 15.\ 18}$ 3^{48} $4^{3.\ 6.\ 10.\ 21f.}$ [on 'company,' etc., Ezk 27^{6b}, see Ed. König, *Heb. Syntax*, § 306*m*], Mic 1^{13b} $4^{8.\ 10.\ 13}$, Zeph $3^{10.}$ [against Hommel's art. in *Expos. Times*, 1899, p. 99 f., see the present writer's *Fünf neue arab. Landschaftsnamen im AT*, 1902, p. 58]^{14}, Zec $2^{11.\ 14}$ 9^{9} [on Is 1^{8} etc., see esp. *Stilistik*, p. $32_{10ff.}$]; 'daughter of Belial,' *i.e.* of worthlessness (1 S 1^{16a}); Hos 1^{3}; Mic 5^{1}; 'daughter of a strange god,' *i.e.* a female worshipper of him (Mal 2^{11b}); 'the daughters of music'=musical tones (Ec 12^{4}); *θυγατέρες* 'Ααρών (Lk 1^{5})=remote descendants of Aaron; and a similar sense is conveyed by 'daughter of Abraham' (13^{16}), 'daughters of Jerusalem' (23^{28}), *ἡ θυγατὴρ Σιών* (Mt 21^{5}, Jn 12^{15}), *θυγατὴρ θεοῦ* (2 Co 6^{18})=one belonging to the Kingdom of God.

A similar characteristic of the style of Scripture is its fondness for *employing substantives for adjectives*. There are numerous examples of this, even leaving out of account the instances in which the phenomenon disappears in the EV. Thus we find 'jewels of silver,' etc. (Gn 24^{53}, Ex 3^{22} etc.); 'men, etc., of truth' (Ex 18^{21}, Pr 12^{19} 22^{21a}). 'Few in number' is lit. 'men of number' (Gn 34^{30}, Dt 4^{27},

---

[*] On this expression in all its senses, see art. Son of Man in vol. iv.

1 Ch 16^{19}, Job 16^{22}, Ps 105^{12}, Is 10^{19}, Jer 44^{28a}, Ezk 12^{16a}). Cf. ‘the king’s court’ (Am 7^{13}); ‘city of confusion’ (Is 24^{10}); ‘an iron pen’ (Job 19^{24}); ‘instruments of death’ (=‘deadly,’ Ps 7^{13}); ‘sorrows of death’ (Ps 116^{3}, cf. Rev $13^{3.\,12}$ *πληγὴ τοῦ θανάτου*); ‘sacrifices, etc., of righteousness’=just *or* right *or* righteous sacrifices, etc. (Dt 33^{19}, Job 8^{6}, Ps $4^{1.\,5}$ 23^{3} 51^{19} 118^{19}, cf. $119^{7.\,62.\,106.\,160.\,164}$, Pr 8^{20} 12^{28} 16^{31}, Is 1^{26} $61^{3.\,10}$, Jer 50^{7}, Am 6^{12}); ‘habitation of justice’ (Jer 31^{23}); ‘Branch of justice’ (33^{15}); ‘garments of salvation’=garments which diffuse healing (Is 61^{10}); ‘God, etc., of my salvation’ (1 Ch 16^{35}, Ps $18^{2b.\,46}$ 24^{5} 25^{5} 27^{9} 65^{5} 68^{20} 79^{9} 85^{4}, Mic 7^{7}, Hab 3^{18}); עֹז ‘of strength’ is at times replaced by ‘strong’ (Jg 9^{51}, Jer 48^{17}, Ezk $19^{11.\,14}$ 26^{11}, Ps 61^{3} 71^{7} 89^{10}), or ‘mighty’ (Ps 68^{34}), or ‘loud’ (2 Ch 30^{21}); but we find, on the other hand, ‘God of my strength’ (Ps 43^{2}), ‘the rock of my strength’ (62^{7}), ‘rod of thy strength’ (110^{2}, cf. 132^{8}), ‘pride of your power’ (Lv 26^{19}), ‘fury of his power’ (Dn 8^{6b}), ‘gall of bitterness’ (Ac 8^{23}), *πᾶσα ψυχὴ ζωῆς*=‘every living soul’ (Rev 16^{3}).

Another of the peculiarities which belong to the *Semitic* idiosyncrasy of the Scripture narratives is the frequent introduction of *genealogies.* The interest was strong in the correct preservation of ancient tradition, and thus the genealogical connexions of families and tribes were noted. Hence we find many genealogical trees in the historical books of the Bible. A number of them form considerable lists, *e.g.* Gn $4^{17ff.}$ $5^{3ff.}$ $10^{2ff.}$ $11^{10ff.}$; many others are shorter, *e.g.* Jos 7^{18}, Ru $4^{18\text{-}22}$, 1 S 1^{1} 9^{1} $14^{49\text{-}51}$ etc., 1 Ch $1^{1ff.}$, Ezr $7^{1\text{-}5}$ (‘Ezra, the son of Seraiah, the son of Azariah, the son of Hilkiah, the son of Shallum, etc., this Ezra went up from Babylon’), Neh 11^{22}, Est 2^{5}, Job 32^{2}, Mt $1^{1\text{-}17}$ Lk $3^{23ff.}$.

A similar interest accounts for the arrangement of the Book of Genesis. It is an extremely noteworthy feature of its structure that the narrative regarding the main line of the human race, *i.e.* the citizens of the Kingdom of God, stands, like the trunk of a tree, in the centre of the whole. The branches of the race, which diverged from the main stem, are regularly dealt with at the outset briefly, but a detailed enumeration of the successive representatives of the main stem follows. Thus the final compiler, *i.e.* the author proper of the first book of the Bible, advances from the outside inwards, or from the remote to the near in chapters 4 (the Cainites) and 5 (the Sethites, from whose line sprang Noah, who carried the human race over the period of the Flood and ensured its perpetuation thereafter); in $10^{1\text{-}20}$ (Japhethites and Ḥamites) and vv.$^{21\text{-}32}$ (Semites); in $11^{1\text{-}9}$ (the human race, which rises in revolt against God in building the Tower of Babel) and vv.$^{10\text{-}25}$ (the Semites, and, above all, the Hebrews); in $11^{26\text{-}32}$ (the Teraḥites in general, cf. the supplementary list in $22^{20\text{-}24}$) and 12 ff. (Abraham). In like manner the collateral branches of the descendants of Abraham are treated of in $25^{1\text{-}18}$, but the main stem in v.$^{19ff.}$; and the descendants of Esau are given in ch. 36 before the commencement of the history of which Jacob is the central figure ($37^{1ff.}$). The principal line is always set forth last, because it forms the starting-point for the earthly mediators and heirs of the future salvation.

An interesting light is thrown upon the *social* conditions under which the Biblical writers lived, by the phenomenon we now proceed to describe. There are two sets of passages in which ‘thou’ alternates with ‘my lord,’ or ‘I’ with ‘thy servant’ (or ‘thy handmaid’). The first set finds its earliest illustration in ‘Hear us, my lord’ (Gn 23^{6}), and recurs, *e.g.*, in ‘The Lord said unto my *lord*, Sit *thou*,’ etc. (Ps 110^{1} etc., cf. *Stilistik*, p. 244). Thus persons in a subordinate position addressed their superiors as ‘thou,’ but frequently interjected ‘my lord,’ in order to express their subjection. In the same way they took care that the ‘I’ with which they introduced themselves should often alternate with ‘thy servant.’ *E.g.* ‘If now I have found favour in thy sight, pass not away from thy servant’ (instead of ‘from me,’ Gn 18^{3}). Similarly, ‘thy servant’ and ‘unto me’ alternate (Gn 19^{19}), or ‘me’ and ‘thy servant’ (Ps $19^{12b.\,13a}$), or ‘I’ and ‘thy servant’ (Dn $9^{16a.\,17a}$). Further, ‘I’ is resolved into ‘your servant’ in Gn 18^{5} and 19^{2}, where we read ‘Turn in, I pray you, into your servant’s house.’ Again, ‘we’ alternates with ‘thy servants’ in ‘We are true men, thy servants are no spies’ (Gn 42^{11}); or ‘thy servants’ has its parallel in ‘our’ (v.^{13}); cf. ‘Prove thy servants . . . and let them give *us* pulse to eat,’ etc. (Dn 1^{12} etc.), and the Aram. sentence ‘Tell thy servants the dream, and we will show the interpretation’ (2^{4} etc., cf. *Stilistik*, p. 252).

Another characteristic feature of Biblical style may be regarded at one and the same time from the *national* and the *religious* point of view. We refer to the frequent use of blessings and cursings. The series of blessings opens with Gn 1^{22}, and is continued in v.^{28} 2^{3} (blessing of the beasts, of man, and of the Sabbath) 5^{2} $9^{1.\,26f.}$ 12^{3} 14^{19} 25^{11} 28^{1} 35^{9} $47^{7.\,10}$ 48^{15} 49^{28}, Ex 39^{43}, Nu $23^{7ff.}$, Dt $33^{1ff.}$, 1 K $8^{14.\,55}$, 2 Ch 6^{3}. To the same class belongs also the frequent exclamation ‘O the happiness of Israel!’ or the like (Dt 33^{29}, 1 K 10^{8}, Ps 1^{1}, and so on to Ec 10^{17}); Mt 5^{44} ‘Bless them that curse you’; Lk $24^{50f.}$ ‘bless’=bid farewell; Mt 21^{9}, Mk $11^{9f.}$, Lk 19^{38}, Jn 12^{13}, cf. Ps 118^{26}. The series of cursings begins with Gn 3^{14} (the curse pronounced upon the serpent), and is continued in v.^{17} 4^{11} 9^{25} 12^{3} 27^{29} 49^{7}, Nu $5^{18ff.}$, Dt $27^{15ff.}$ $28^{16ff.}$, Jos 6^{26} 9^{23}, Jg 5^{23} 21^{18}, 1 S $14^{24.\,28}$ 26^{19}, Job 3^{8} (‘cursers of the day’), Ps 119^{21}, Pr 3^{33} 28^{27}, Jer 11^{3} 17^{5} $20^{14ff.}$ 48^{10}, Mal $1^{14ff.}$. To this list must be added the instances in which a ‘Woe!’ is addressed to any one: Nu 21^{29} (‘Woe to thee, Moab!’) 24^{14}, 1 S $4^{7f.}$, Ps 120^{5}, Pr 23^{29}, Ec 4^{10} 10^{16}, Is $3^{9.\,11}$ 6^{5} 24^{16}, Jer $4^{13ff.}$, Ezk 16^{23} etc., Hos 7^{13} 9^{12}, Mt 11^{21} 18^{7} etc., Mk 13^{17} 14^{21}, Lk 6^{24} etc., Jude ^{11}, Rev. $9^{12ff.}$ 12^{12} etc. This form of expression is connected partly with the ancient custom of blessing one’s children or friends and cursing one’s enemies (Nu 22^{6} etc.), and partly with the habit of the religion of Israel of postulating happiness for the godly and punishment for transgressors.—By the way, these last two categories possess certain features of special interest. The series of blessings has its first representative as early as the narrative of the Creation, that of cursings does not open till after man’s first sin. The Psalter, again, contains twenty-five examples of the phrase ‘O the happiness!’ (cf. *Syntax*, § 321*g*), but only once (120^{5}) the exclamation ‘Woe!’ The list of blessings is longer than the other, and does not end till the last chapter of the last book of the Bible. Its last utterance is ‘Blessed are they that wash their robes [*or* do his commandments],’ Rev 22^{14}.

iii. PECULIARITIES OF STYLE PURPOSELY ADOPTED UPON OCCASION BY ALL CLASSES OF SCRIPTURE WRITERS.—These devices will be set forth in such a way as to have regard to the interests, successively, of the human intellect, the will, and the feelings.

1. The Biblical writers aim at clearness, and this quality is not prejudiced (*a*) by the use, which is common to man, of Metonymy and Synecdoche.

Noteworthy instances of Metonymy are the following: ‘seed’ stands for descendants in Gn 3^{15} etc.; ‘the earth,’ as the source of its products, is put for the latter in ‘In sorrow shalt thou eat it (*i.e.* the earth=its products),’ 3^{17b}, cf. Is 1^{7b}. *Nābî’*, ‘prophet,’ is correctly rendered ‘prophecy’ by AV in Dn 9^{24b}; but ‘prophet’ in Mt 5^{17} and Lk $16^{29.\,31}$

has the same meaning; and 'Moses' stands for the Law in the expression 'Moses is read' (2 Co 3^{15}). 'Tongue' became naturally an expression for speech (Gn 10^{5} etc.). 'Lips' stands in Hos 14^{2b} for the confession of sin proceeding from the lips; the prophet means to say, 'We will offer as sacrifices of calves the confession of our sins.' Similarly, 'throat' means in Ps 5^{10} conversation. 'Hand' is often equivalent to activity (Ex 3^{19} etc. 'by a mighty hand'). 'Horn' represents power or rule (1 S 2^{1} etc., 'My horn is exalted,' etc.). In parallelism to 'peace,' 'sword' stands for war (Mt 10^{34}). 'Yield unto thee her strength' (Gn 4^{12}) is=give the product of her strength, *i.e.* her fruits. 'Lest ye be consumed in all their *sins*' (Nu 16^{26})=through the consequences of their sins, *i.e.* the punishment for them. In 'dust thou art' (Gn 3^{19}), dust=produced from dust (2^{7}). We encounter the same Metonymy in 'dust and ashes' (18^{27} etc., Sir 10^{9a}). 'Wood' or 'tree' is a term for the cross in Ac 5^{30}, Gal 3^{13} etc.—When we read 'Two nations are in thy womb' (Gn 25^{23}), we must plainly understand this to mean the ancestors of two nations. In the same way 'covenant' in Is 42^{6} stands for the mediator of the covenant, and 'blessing' in Gn 12^{2b} for the formula wherewith the blessing is invoked.—The *possessor* naturally often stands for the *possession*. Thus Lebanon is put for the cedars (Is 10^{34b}) which symbolize the host of the Assyrians; and the cup stands for its contents in 1 Co 11^{25} etc. 'Heart and reins' (Ps 7^{9} 26^{2} etc.) refers to thoughts and volitions. In Mk 5^{35} *ἀπὸ τοῦ ἀρχισυναγώγου* means 'from the house of the ruler of the synagogue.' So 'the hour' (Mk 14^{35}) might stand for the events of that period of time.—A *mark of distinction* points impressively to its *bearer* in 'A sceptre shall rise out of Israel' (Nu 24^{17}). So also in Is 23^{3} the Shihor, *i.e.* the Nile, stands for Egypt.—The *contents* may stand for the *container*: for instance, in Ps 9^{14} 'the gates of the daughter of Zion,' the daughter, *i.e.* the population, of Zion must be the equivalent of Zion itself. In like manner 'testament' (2 Co 3^{14})=book of the covenant, and 'prayer' (Ac 16^{16})=place of prayer.

Characteristic instances of **Synecdoche** are such as the following: 'the Jebusite,' etc. (Gn $10^{16f.}$); 'and the Canaanite was then in the land' (12^{6}); 'the man' (Ps 1^{1} 32^{1} etc.). This employment of *a part for the whole* may be seen also in other expressions. 'Father' is equivalent to all kinds of ancestors (Gn 47^{9}, Ex 12^{3}, Nu 14^{18}, Ps 22^{5} 39^{13} 106^{6} etc.). Again, in Abraham's words to Lot 'we are brothers' (Gn 13^{8}), 'brothers' stands for all degrees of relationship, and so also in Ex 2^{11} and Nu 16^{10}. The principal members of a class could very readily be used to represent the whole class: *e.g.* 'a land flowing with milk and honey' (Ex $3^{8.17}$ 13^{5} 33^{3}, Nu 13^{27} etc., Dt 6^{3} etc., Jos 5^{6}, Jer 11^{5} 32^{22}, Ezk $20^{6.15}$). So also a principal part could stand for the whole in the following: 'the shadow of my *roof*' (Gn 19^{8}), *i.e.* of my house; 'The ark of God dwelleth within *curtains*' (2 S 7^{2}, cf. 1 Ch 17^{1}, Ca 1^{5}, Jer 4^{20} 10^{20} 49^{29}, Hab 3^{7}), *i.e.* in a mere tent; 'Thy seed shall possess the *gate* of his enemies' (Gn 22^{17} 24^{60}, Dt 12^{15} 15^{7} etc., Ps 87^{2}, Is 3^{26a} 14^{31}, Mic 1^{9}), *i.e.* their city. The 'soul' stands for the whole man in Gn 9^{5a} 12^{5} ('the souls that they had gotten in Haran') ^{13} 14^{21} 17^{14} 46^{18}, Ex 12^{15}, Lv $7^{20f.}$ etc.; 'Let every soul,' etc. (Ro 13^{1}, Ac 2^{43} 3^{23}, 1 Co 15^{45}, Rev 16^{3}); 'three thousand souls,' etc. (Ac 2^{41} 7^{14} 27^{37}, 1 P 3^{20}); cf. 'Thou art my bone and my flesh' (Gn 29^{14}, Jg 9^{2}, 2 S 5^{1} $19^{13f.}$, 1 Ch 11^{1})=my blood relation; 'flesh and blood' (Sir 14^{18} 17^{31}, Mt 16^{17}, 1 Co 15^{50}, Gal 1^{16})=man; 'How beautiful upon the mountains are the *feet* of him that bringeth good tidings' (Is 52^{7}, Nah 2^{1}, Ac 5^{2}, Ro 10^{15}), the feet being the organs most necessary to a messenger.—In 'Blessed be the LORD God of Shem' (Gn 9^{26}), the designation of the whole ('Shemites') is put for that of the principal constituent of the race, namely Israel (cf. 10^{21}). The general expression 'the river' stands for the Euphrates, because for Western Asia this stream was 'the great river' (Gn 15^{18}), *i.e.* possessed most importance (31^{21}, Ex 23^{31}, Dt 1^{7} 11^{24}, Jos 1^{4} $24^{2f.14f.}$, 2 S 10^{16}, 1 K $4^{21.24}$ 14^{15}, 1 Ch 5^{9} 19^{16}, 2 Ch 9^{26}, Ezr 8^{36}, Neh $2^{7.9}$, Ps 72^{8} 80^{12}, Is 7^{20} 8^{7} 11^{15} 19^{5} 27^{12}, Jer 2^{18}, Mic 7^{12}, Zec 9^{10}). 'The high' *κατ᾽ ἐξοχήν* is the heavens (2 S 22^{17}, Job 16^{19}, Ps 7^{7} 18^{16} 71^{19} 93^{4} 144^{7} 148^{1}, Is $24^{18.21}$ 32^{15} 33^{5} 40^{26} 57^{15}, Mic 6^{6}).—To this category belongs also the employment of *the abstract for the concrete*: as, for instance, 'a help' (Gn 2^{20}); 'captivity' (2 K 24^{15} 25^{27}, 1 Ch 5^{22}, Ezr 1^{11}, Neh 7^{6}, Est 2^{6}, Is 20^{4} 45^{13}, Jer 24^{5} 28^{4} $29^{16.22}$ 40^{1} 52^{31}, Ezk $1^{1f.}$ 33^{21} 40^{1}, Am $1^{6.9.15}$, Ob ^{20b}, Zec 6^{10}). In Ps 110^{3b} 'youth' is employed in the same way as *iuventus=iuvenes.*

(*b*) Clearness of style can hardly be said to be prejudiced by the following devices.

It was natural that a single verb should express two cognate actions. Thus שׁוּף (Gn 3^{15b}) is used for the hostile action both of the seed of the woman and of that of the serpent, and is thus equivalent in the one instance to 'bruise' and in the other to 'sting.' This employment of only one verb is known as **Zeugma**. Other examples of its use are: Ps 76^{3} 'There brake he the arrows, etc., and [finished] the battle'; Ezk 6^{9} 'I am broken,' etc.; Hos 2^{18} 'I will break the bow, the sword, and the battle.'—Elsewhere we meet with *a play upon the double meaning of words.* For instance, in Gn 48^{22} שְׁכֶם has the two meanings of 'mountain ridge' and 'portion.' Further, Isaiah announces to his people, 'Though thy multitude, O Israel, be as the sand of the sea, a remnant of them shall return' (10^{22a}), *i.e.* 'a remnant certainly, but only a remnant' (Cheyne, 1884, *ad loc.*). Again, when Isaiah says to his people, 'God will lift up his staff over thee' [*i.e.* for thy protection] בְּדֶרֶךְ מִצְרָיִם ($10^{24b.26b}$), he means by דֶּרֶךְ, in the first instance, 'manner' or 'way.' That is to say, God will help Israel in the *way* in which He helped them once before, when He brought them forth from Egypt. But, further, בְּדֶרֶךְ מִצְרָיִם has in view the notion that God will deliver Israel by destroying the Assyrian army on the *way* to Egypt, as actually happened in B.C. 701 (Is 37^{36}). 'A phrase of double meaning, such as Isaiah loves,' is Cheyne's comment on Is 10^{22}. He adduces no other example, but we find a similar 'Janus-word' in $22^{23b.24}$, where כָּבוֹד is used in the two senses of 'honour' and 'weight.' Both originated from the radical notion of the word, namely 'heaviness.' Again, one and the same term שׁוּב means both 'turn away' and 'return' (Jer 8^{4b}). The other instances of this *ambiguity* will be found enumerated in *Stilistik*, p. 11 f.—The striving after a witty use of words in a double sense culminates in the **Riddle**; and, in accordance with the general custom of Orientals of diverting themselves by putting and solving riddles, we find that the writers of Scripture have interwoven a number of these with their histories and arguments. The earliest example is Jg 14^{14} 'Out of the eater came forth meat, and out of the strong [eater] came forth sweetness.' Both the occurrences mentioned here are opposed to ordinary experience, and thus awaken reflexion. The answer to this riddle was in turn given (v.^{18}) as a riddle, namely, 'What is sweeter than honey, and what is stronger than a lion?' Once more, the words 'The horseleech hath *two* daughters, crying, Give, give. There are *three* things,' etc. (Pr 30^{15}), furnish a specimen of the enigmatic sayings which the Jews called מִדָּה 'measure,' because they lead to the measuring, *i.e.* exhausting of the scope of a notion.

The other instances are Pr 6^{16-19}, Sir 23^{16} $25^{2.\ 7f.}$ $26^{5ff.\ 19}$ 50^{25}. Also the name SHESHACH in Jer 25^{26} contains a species of riddle. The key to it is found in the custom of interchanging letters. In one of these systems the last letter of the alphabet was substituted for the first, the next to the last for the second, and so on. In this way *Sheshach* (ששך) would stand for *Babel* (בבל). The same phenomenon presents itself in Jer 51^{1}, where the words 'in the midst of them that rise up against me' represent the Heb. *Leb-ḳamai* (לב קמי), which, on the same system of interchange of letters, would = *Kasdim* (כשׂדים), *i.e.* Chaldæans.

The following instances of *interchange of pronoun and substantive* may also be traced to natural motives, and are thus readily intelligible: 'God created man, etc., in the image of God created he him' (Gn 1^{27}). The words 'of God' take the place of 'his,' because prominence is meant to be given to the concept 'God.' The same preferring of the name 'God' to the pronoun is to be noted in the following passages: 'And the LORD said unto Abraham, etc., Is anything too hard for the LORD' (Gn $18^{13f.}$) = 'for me'? 'The LORD rained fire from the LORD,' etc. (19^{24}); 'Thou (O LORD) shalt destroy them that speak leasing, the LORD will abhor,' etc. (Ps 5^{6ab}), instead of 'thou wilt abhor,' etc.; 'He (the LORD) answered, etc., and the LORD,' etc. (Is $6^{11f.}$); 'concerning his Son, etc., which was made, etc., and declared to be the Son of God' (Ro $1^{3f.}$). In the same way 'thou' and 'the king' alternate in 2 S 14^{13ab}, and the title 'king' on many other occasions takes the place of the pronoun: *e.g.* 'O king, the eyes of all Israel are upon thee, that thou shouldest tell them who shall sit on the throne of my lord the king,' etc. (1 K 1^{20} 8^{1ab} 22^{15b} etc.); or 'Thine arrows [O king] are sharp in the heart of the king's enemies' (Ps 45^{5} etc.; cf. *Stilistik*, 154).—It was no less natural that the bare pronoun should frequently be used to point to the personage who is the main subject of any particular discussion. For instance, the hero who was called from the rising of the sun to deliver the exiles (Is 41^{1-7}) is indicated by the simple pronoun in 41^{25} 45^{13} 46^{11} 48^{14}, and perhaps 55^{11b}. Who, now, was a more important subject than God Himself, in religious texts such as are contained in the Bible? Hence the reference of the pronoun 'he' is not doubtful in the words 'if he destroy him from his place' (Job 8^{18a}), or in 9^{32a} 'for he is not a man,' etc. In both passages God is self-evidently the other party. The same function is discharged by 'he' in $12^{13f.}$ 13^{16b} 19^{8}, and 'God' is quite justifiably substituted by AV for the Heb. 'he' in 20^{23} and 21^{17b}. The same use of the pronoun 'he' to refer to God is found in the following passages: 'In them (the heavens) he set a tabernacle for the sun' (Ps 19^{4}); 'Judah was his sanctuary' (114^{2}); 'He will no more carry thee away into captivity' (La 4^{22} etc., cf. *Stilistik*, p. 115 f.). Thus 'God' came to be the *great logical subject* or *object of the Bible*. Almost more natural still was it that 'God' should be the *great logical vocative* of Scripture. Examples of the latter are: 'Salvation belongeth to the LORD, *thy* blessing is upon *thy* people' (Ps 3^{8}), or 'Put your trust in the LORD,' and 'LORD, lift *thou* up the light of *thy* countenance upon us' ($4^{5f.}$), or 'the LORD shall judge the people, judge me, O LORD,' etc. (7^{8}). This involuntary turning of the religious man to his God is met with again in 'I have set the LORD always before me,' and 'for *thou* wilt not leave my soul in hell,' etc. (Ps 16^{8-10}), or in 'He sent,' etc., and 'at *thy* rebuke,' etc. ($18^{14f.}$ etc. 69^{23b} 76^{4} etc.). The same natural apostrophizing of God is found in the well-known words 'therefore forgive them not' (Is 2^{9b}), or in 'and the LORD hath given me knowledge of it . . . then thou shewedest me their doings' (Jer 11^{18}). Many similar passages are collected in *Stilistik*, p. 243.

Besides these forms of transition from pronoun to substantive, there are other rapid transitions characteristic of the style of Scripture.—

(*a*) After Joseph has been extolled in the words 'Joseph is a fruitful bough,' etc., he is addressed directly: 'even by the God of *thy* father,' etc. (Gn $49^{21-24.\ 25f.}$). A similar transition shows itself in such instances as the following: 'Let her cherish him, and let her lie in *thy* bosom' (1 K 1^{2}); 'who eat up my people,' etc., and '*you* have shamed the counsel of the poor,' etc. (Ps $14^{4b.\ 6a}$). The complaint '*they* are gone away backward' is continued by the question 'Why should *ye* be stricken any more?' (Is $1^{4f.}$); cf. Hab $2^{7f.}$ etc. The opposite transition, from apostrophe to the objective and calmer treatment of a person, may be observed in the words 'Reuben, *thou* art my firstborn . . . *he* went up to my couch' (Gn $49^{3f.}$). The same change occurs again in 'O Jacob . . . *he* shall pour the water out of his buckets,' etc. (Nu 24^{5-7}); or in 'Worship *thou* him' and '*her* clothing is of wrought gold' (Ps 45^{11-13}); or in '*Thou shalt* be called the city of righteousness' and '*Zion shall* be redeemed,' etc. (Is $1^{26f.}$); or in '*Thy* men shall fall by the sword,' etc., and '*her* gates shall lament,' etc. ($3^{25f.}$ etc. 22^{16b} etc.; cf. *Stilistik*, pp. 238–248). There are, further, many passages in which the employment of the *third* person passes over into a preference for the *first*. A large proportion of these cases is explained by the circumstance that the writer passes to the use of direct speech: *e.g.* 'He feared to say, she is *my* wife' (Gn 26^{7}); 'The rulers take counsel together. . . . Let *us* break,' etc. (Ps 2^{3}); 'He maketh . . . know that *I am* God' ($46^{9f.}$); 'The LORD of Hosts doth take . . . and *I* will give children to be their princes' (Is $3^{1a.\ 4a}$); 'He fenced . . . and now judge between *me*,' etc. ($5^{2f.}$). Other instances are due to the author's including himself in the same group as the persons spoken of: *e.g.* 'They went through the flood on foot, there did *we* rejoice in him' (Ps 66^{6}); 'The daughter of Zion is left as a cottage . . ., except the LORD of Hosts had left unto *us* a very small remnant' (Is $1^{8f.}$). It might also happen that a collective personality like the Servant of the Lord (Is 41^{8} etc.) found its herald in a prophet. In this way is explained the employment of 'I' in the expressions 'In the LORD have I righteousness,' etc. (Is 45^{24} 48^{16b} 49^{1} 50^{4} 53^{1} 61^{1}). —Less frequent is the transition from the *first* person to the *third*, as in 'Lamech said, Adah and Zillah, Hear *my* voice, ye wives *of Lamech*, hearken unto my speech' (Gn 4^{23}). It is obvious that this form of transition is a very natural one. The 'I' or 'my' is replaced by the name of the person concerned. The same phenomenon appears in 'Balaam lifted up his eyes and said, Balaam the son of Beor hath said,' etc. (Nu $24^{2f.}$). 'David' is used instead of 'I' in 2 S 7^{20a}. In the words 'I shall not be greatly moved' and 'How long will ye imagine mischief against a man?' (Ps $62^{2b.\ 3a}$) the poet passes over from himself to the general category to which he belongs. With special frequency does the 'I' of a Divine message pass over into the third person. In some passages the place of the Divine 'I' is taken by a Divine name, as in the words 'Will *I* eat flesh of bulls? . . . Offer unto *God* thanksgiving,' etc. (Ps $50^{13f.}$), or in 'The LORD said unto my lord, Sit thou at *my* right hand . . . the LORD shall send the rod,' etc. ($110^{1f.}$). In other passages where the first person alternates with the third, we observe the language of God passing into that of His interpreter. An indisputable example of this transition is found in the words 'I will command the clouds that they rain no rain upon it, for the vineyard of *the LORD* is,' etc. (Is $5^{6f.}$). So also in 'Mine anger in their destruction . . . *the LORD of Hosts* shall stir up,' etc. ($10^{25f.}$ etc., cf. *Stilistik*, pp. 249–256).

(β) Another phenomenon very frequently met with in the OT is the *transition from plural to singular*, and *vice versâ*. For instance, we read 'And ye shall observe this thing for an ordinance to thee and to thy sons for ever' (Ex 12^{24ab}). There 'all the congregation of Israel' (v.^{3}), which in vv.$^{5-24a}$ is addressed by the plural 'your,' is treated in v.^{24b} as a singular, and this singular has probably at the same time an individualizing force, and a warm parenetic tone. But the reader of the OT is not misled thereby, for this transition meets him very frequently: *e.g.* Ex 13^{5-16} 20^{24} etc., Dt 6^{15} etc., Jg 12^{5}, Ps 17^{12a} ('a lion'), Is 56^{5b} (where 'them' instead of 'him' has a levelling effect), Mal 2^{14} ('yet *ye* say . . . the LORD hath been witness between *thee* and the wife of *thy* youth') ^{15b} etc.; cf. *Stilistik*, pp. 232–238.

(γ) Still less surprising is the *sudden transition from one subject to another*. The first instance of this is met with in the words 'When the sons of God came in unto the daughters of men, and they bare children to them' (Gn 6^{4}). This example is more difficult in the Hebrew text, where there is no equivalent for 'they,' and the verb *yālĕdû* might also mean 'beget' and be connected with the 'sons of God.' The next example is 'God shall enlarge Japheth, and he shall dwell in the tents of Shem' (9^{27}). Here 'God' cannot be the subject of 'shall dwell,' for He has been already extolled in v.^{26a} as the ally of Shem. The same phenomenon appears in 'And he believed in the LORD, and he counted it to him for righteousness' (15^{6}). There are not a few instances of this rapid change of subjects (cf. *Stilistik*, p. 257 f.), seeing that it is favoured by the so-called **Chiasmus**, of which an excellent specimen is presented by the words 'And the LORD had respect to Abel and his offering, but unto Cain and his offering he had no respect' (Gn $4^{4b.\,5a}$). Here the words that come first in v.^{4b} correspond to those that form the conclusion of v.^{5a}. On the other hand, the words with which v.^{4b} closes and the words that commence v.^{5a} are closely akin. It is readily explicable psychologically that similar ideas should be treated at the end of one sentence and directly afterwards at the beginning of a second. Hence *Chiasmus* is an extremely frequent occurrence in the OT. Here are a few further instances: 'The LORD knoweth *the way* of the righteous, but *the way* of the ungodly shall perish' (Ps 1^{6ab}); 'Why do the nations rage, and the peoples imagine a vain thing?' (Ps 2^{1ab}); 'It was full of judgment, righteousness lodged in it' (Is 1^{21}); 'The vineyard of the LORD of Hosts is the house of Israel, and the men of Judah his pleasant plant' (5^{7}). An exceedingly instructive example is furnished by the words: 'Make the *heart* of this people fat, and make their *ears* heavy, and shut their *eyes*; lest they see with their *eyes*, and hear with their *ears*, and understand with their *heart*' (Is 6^{10}). Here a threefold correspondence may be observed. A number of other examples will be found in *Stilistik*, pp. 145–148.

None of the above phenomena, as they are psychologically explicable, diminish the perspicuity of the style of Scripture, and there are a number of devices whereby its clearness is *increased*.—

The first place amongst these is held by the **Simile.** What a bright light is thrown upon the number of Abraham's descendants by the declaration that they shall be 'like the dust of the earth' (Gn 13^{16} 28^{14}), or 'as the sand which is upon the seashore' (22^{17} 32^{12}), or 'as the stars of the heaven' (15^{5} 22^{17} 26^{4} etc.)! How clearly defined is the victory of the theocratic king by the words 'Thou shalt dash them in pieces like a potter's vessel' (Ps 2^{9})! With what terrible distinctness the persecutor stands before our eyes when it is said 'lest he tear my soul like a lion' (7^{2} 10^{9} 17^{12})! The few words 'Zion is left as a cottage in a vineyard' (Is 1^{8}) describe the situation of besieged Jerusalem more clearly than could have been done in a series of sentences. With what a shuddering feeling we hear the words 'In that day they shall roar against them like the roaring of the sea' (5^{30})! We will only note, further, the characteristic words spoken of Ahaz, 'His heart was moved as the trees of the forest are moved with the wind' (7^{2}).—A special form of the Simile is the **Example.** For instance, when it is said 'We have sinned with our fathers . . . our fathers understood not thy wonders in Egypt,' etc. (Ps $106^{6f.}$), this is equivalent to 'We have sinned like our fathers,' etc. The *παράδειγμα* or *Exemplum* is merely a Simile introduced in a peculiar manner. The Example is rare in the OT, there being hardly any more instances of it than the following: Mal 2^{15} (Abraham), Ps 99^{6} (Moses, Aaron, and Samuel), $106^{30f.}$ (Phinehas), Neh 13^{26} (Solomon). Later generations had much more occasion to introduce characters from earlier history for the purpose of encouragement or of warning. The following are cited as examples for imitation: Abraham, Moses, and others in the 'Praise of Famous Men,' Sir 44 ff., in Jth 4^{22} $8^{19f.}$, or in 1 Mac 2^{52-60}; David as a pattern of self-restraint (cf. 2 S 23^{16}) in 4 Mac 3^{6-17}; the queen of the south (*i.e.* Saba) in Mt 12^{42}; the widow of Sarepta in Lk 4^{26} etc. We have, held up to warning: the Egyptians in Wis $17^{2ff.}$; the Sodomites in Mt 10^{15} $11^{23f.}$; Lot's wife, that *μνημεῖον ἀπιστούσης ψυχῆς* (Wis 10^{7}) in Lk 17^{32}; Theudas and others in Ac $5^{36f.}$ etc. The OT is somewhat richer in instances of the Example, if we include those that are drawn from the animal world. When, *e.g.*, we read 'The ox knoweth his owner,' etc. (Is 1^{3}), what is this but an example which puts man to shame? Similar is the force of the saying 'The stork in the heaven knoweth his appointed times,' etc. (Jer 8^{7}), and every one is familiar with the call 'Go to the ant, thou sluggard, consider her ways and be wise' (Pr 6^{6}). For further instances see *Stilistik*, p. 78 f.—Closely akin to the Example is the **Proverb.** For the function of the latter is simply to describe the usual working of an Example. It must, however, suffice here to note the high value of the Proverb as a device for lending vividness to a description. For further details, see art. PROVERB in vol. iv.—While, on the one hand, shortened forms of the Simile may be seen in the Example and the Proverb, this figure of speech assumes, on the other hand, expanded forms in the **Parable** and the **Fable,** as well as in those passages of the OT which may be called **Paramyths.** These three species of picturesque description are explained in the art. PARABLE (in OT) in vol. iii.

The second principal stylistic device for illustrative ends is the **Metaphor** and its cognates. The source of the metaphor is a vivid simultaneous contemplation of the main elements in two notions. For instance, the notions of joy and of light are naturally combined, because both exercise a liberative and elevating influence upon the health of man. On the other hand, unhappiness and darkness both weigh man down, as it were. Thus we explain sayings like the following: 'Thou wilt light my candle, the LORD my God will enlighten my darkness' (Ps 18^{28}). For the same reason, a sorrowful period in one's life is described as a passing 'through the valley of the shadow of death' (23^{4}). So we read 'The people that sat in darkness have seen a great light' (Is 9^{2}), *i.e.* they shall attain to political freedom and deliverance from guilt and sin. In a similar way 'fire' could be an expression for 'anger,' as may be seen in the words 'therefore the inhabitants of the earth are burned' (Is 24^{6}). The 'dew' was quite naturally used as a symbol for a great many phenomena of a cheerful order, so that there is no difficulty in understanding the expression in Ps 110^{3} 'Thou hast the dew of thy youth' (lit. 'Like the dew are thy young men'). On the other hand, the 'floods' and similar expressions stand for hosts of foes (Ps $18^{4b.\,16b}$ etc.). The 'earthquake' may point an allusion to political disturbances, as in 'Thou hast made the earth to tremble,' etc. (Ps $60^{2f.}$). The 'rock' is an equally natural figure for a place of refuge (Ps 27^{5} 'He shall set me up upon a rock'), as 'depth' is for catastrophe or misfortune (Ps 69^{2} 'I am come into deep waters'; cf. v.^{14b}, and 130^{1} 'Out of the depths have I cried unto thee'). Regarded from another point of view, the 'deep' was naturally employed as a symbol of the inexhaustible and unfathomable. Hence we read, 'O the depth of the riches,' etc. (Ro 11^{33}, cf. 2 Co 8^{2}), and for the same reason 'deep' in the sense of 'mysterious' is used of the heart (Ps 64^{6b}, Jth 8^{14}) or of the lip, *i.e.* the speech (Is 33^{19}, Ezk $3^{5f.}$). Thus 'to be deep' is equivalent to 'to be unfathomable' (Ps 92^{5} 'and thy thoughts are very deep'), and a matter that is incomprehensible is compared to the great primeval flood (תְּהוֹם רַבָּה Ps 36^{6} 'a great deep').—The number of combinations of phenomena from the different spheres is almost endless. We can note only a few of them. 'Shield' is an expression for 'protector' (Gn 15^{1} etc.), and 'star' is a beautiful figure for a conquering hero (Nu 24^{17} 'There shall come a star out of Jacob'; cf. Is 14^{12}, Dn 8^{10}, Rev 22^{16}, and Ovid, *Epist. ex Ponto*, III. iii. 2, 'O sidus Fabiæ, Maxime, gentis'). 'The waters,' again, stands for hostile troops (Ps 124^{5}, Is 8^{7}, Rev 17^{1} etc.), and 'branch' for 'descendant' (Ps 80^{11b}, Is 11^{1} 60^{21} etc.).—From the sphere of animated nature we have 'lion' as a honorific title for a strong hero (Gn 49^{9} 'Judah is a lion's whelp,' cf. 2 S 23^{20} etc.); and 'goats' might be symbolic either of leaders of the people (Is 14^{9}, where the Heb. is כָּל־עַתּוּדֵי אָרֶץ 'all the goats of the earth'; cf. Zec 10^{3}), or of refractory elements in the community (Ezk 34^{17}); while 'sheep' was an honourable designation for gentle and pious men (Ps 79^{13} 100^{3}, Is 53^{7}, Ezk 36^{38}, Mt $25^{32f.}$, Jn 10^{1} etc.). The expression 'on eagles' wings' (Ex 19^{4}) portrays the triumphant fashion of the Divine intervention in the course of history (cf. Dt 32^{11}, Ps 17^{8b}).—Lastly, certain objects in the inanimate sphere were often regarded as if they had life, and even as if they were human beings. Thus the blood has a voice attributed to it in the words 'The voice of thy brother's blood crieth unto me from the ground' (Gn 4^{10}); and when the prophet says, 'Hear, O heavens, and give ear, O earth' (Is 1^{2}), this only falls short of *personification*. The same figure may be observed in the call to ships to howl (Is 23^{1}); and in the passages where it is said that 'the stone shall cry out of the wall' (Hab 2^{11}), or that 'if these should hold their peace, the stones would immediately cry out' (Lk 19^{40}), how vividly the scene presents itself to our eyes! Since metaphorical expressions portray, as it were, to our eyes a spiritual process, they readily combine to form whole pictures. We have an instance of this in 'The whole head is sick, and the whole heart faint; from the sole of the foot even unto the head,' etc. (Is $1^{5f.}$); and another in 'There shall come forth a rod out of the stem of Jesse, and a branch shall grow out of his roots' (11^{1}). A continued series of metaphorical expressions of this kind receives the name of **Allegory.** This figure meets us *in* the Song of Songs, as, for instance, in the words 'I sat down under his (*i.e.* my beloved's) shadow with great delight, and his fruit was sweet to my taste' (2^{3}), or in 'A garden enclosed is my sister,' etc. ($4^{12ff.}$, cf. $7^{7f.}$), but it is not the case that the *whole* Song is an allegorical poem regarding the Messiah and His Church (cf. further, *Stilistik*, pp. 94–110, and art. SONG OF SONGS in vol. iv.).

2. The Biblical writers naturally desire to give their words the highest possible degree of *emphasis*. It is this aim that gives rise to not a few characteristic features of the style of Scripture.—(*a*) The employment of a *prospective pronoun*, as in 'This is that night of the LORD to be observed,' etc. (Ex 12^{42}); 'I shall see him, but not now,' etc. (Nu 24^{17}), the effect in this last instance being to awaken strongly the interest in the star which is then mentioned. So also 'Thou shalt not go thither unto the land which I give,' etc. (Dt 32^{52}); 'the Most High himself' (Ps 87^{5}); 'to this man will I look, even to him that is poor,' etc. (Is 66^{2}; cf. *Stilistik*, p. 153 f.).—(*b*) Emphasis is sought, again, by the repetition of one and the same expression, giving birth to the so-called **Epizeuxis.** The list of its occurrences begins with 'Abraham, Abraham' (Gn 22^{11}), and is continued in the following: 'the red, the red' (25^{30} AV 'that same red pottage'); 'Jacob, Jacob' (46^{2}); 'Amen, Amen' (Nu 5^{22}, Ps 41^{14} 72^{19} 89^{53}, Neh 8^{6}); 'of justice, justice' (Dt 16^{20} AV 'altogether just'); 'Come out, come out' (2 S 16^{7}); 'My God, my God' (Ps 22^{1}); 'Return, return' (Ca 6^{13}); 'peace, peace' (Is 26^{3}, where AV has 'perfect peace,' although it retains 'peace, peace' in 57^{19}, Jer 6^{14} 8^{11}); 'Comfort ye, comfort ye, my people' (Is 40^{1}); 'Ho, ho' (Zec 2^{6} etc.; cf. *Stilistik*, p. 155 f.). A specially high degree of emphasis was naturally expressed by the thrice-repeated employment of a word. This is seen in 'Holy, holy, holy is the LORD of Hosts' (Is 6^{3}); or 'The temple of the LORD, the temple of the LORD, the temple of the LORD' (Jer 7^{4}); or 'O earth, earth, earth' (22^{29}); or 'I will overturn, overturn, overturn it' (Ezk 21^{27}); or 'The LORD revengeth,' etc. (Nah 1^{2}). The same *emphatic repetition* occurs also with the conjunctions, as when the words 'We will arise and go and live and not die' (Gn 43^{8}) furnish us with a speaking picture of anxious impatience. Again, the double use of the conditional particle in '*If* ye have done truly . . . and *if* ye have dealt well with Jerubbaal' (Jg 9^{16}) serves very well as a reminder that the point was open to question. Once more, to indicate how well deserved a punishment was, we have a repeated 'because, because' (Ps $116^{1f.}$); or 'for, for' (Is $1^{29f.}$); or 'therefore, therefore' ($5^{13a.\,14a}$); or 'for, for' (Jer 48^{5ab} etc.; cf. *Stilistik*, p. 159).—Emphasis is also aimed at in such words as 'Get thee out of thy country, and from thy kindred, and from thy father's house' (Gn 12^{1}), where a series of words is so arranged as to designate an ever-narrowing circle of persons. Abraham must separate himself from even the most intimate circle of his relations (cf. Jos 24^{2}), in order to follow the Divine call. Such a form of expression is known as a **Climax**, and examples of it meet us frequently in the Bible. Here are a few: 'His bread shall be *fat*, and he shall yield *royal* dainties' (Gn 49^{20}); 'The children of Israel have not hearkened unto me, how then shall Pharaoh hear me?' (Ex 6^{12}); 'the day . . . and the night' (Job 3^{3}); 'ungodly . . . sinners . . . scornful' (Ps 1^{1}); 'my friend or brother' (35^{14}); 'Forget thy own people and (even) thy father's house' (45^{10}); 'in the twilight, in the evening, in the black night' (Pr 7^{9}); 'Are they Hebrews . . . Israelites . . . seed of Abraham . . . ministers of Christ?' (2 Co $11^{22f.}$); 'which we have heard, which we have seen, which we have looked upon, and our hands have handled,' etc. (1 Jn 1^{1}). Speci-

ally common is the Climax in connexion with the use of numbers: *e.g.* 'He will deliver thee in *six* troubles, yea in *seven* there shall no evil touch thee' (Job 5^{19}); 'God hath spoken once, twice have I heard this' (Ps 62^{11}); 'Give a portion to seven, and also to eight' (Ec 11^{2}); 'two or three . . . four or five' (Is 17^{6}); 'for three transgressions and for four,' etc. (Am $1^{3.\,6.\,9.\,11.\,13}$ $2^{1.\,4.\,6}$); 'Of three things my heart is afraid, and before the fourth I fear greatly' (Sir 26^{5}); 'Where two or three are gathered in my name,' etc. (Mt 18^{20}; cf. *Stilistik*, p. 163 f.). Quite similar is the phenomenon which presents itself in such expressions as, 'They go *from strength to strength*' (Ps 84^{7}); 'affording from species to species' (Ps 144^{13} AV 'all manner of store'); 'from wickedness to wickedness' (Sir 13^{21} 40^{13}), *i.e.* to ever new forms of wickedness; 'Add iniquity to their iniquity' (Ps 69^{27}); 'The sinner heaps sin upon sin' (Sir 3^{27} 5^{5}); 'A chaste woman shows grace upon grace' (26^{15}; cf. Jn 1^{16} 'grace for grace,' *i.e.* ever self-renewing grace).

3. In conformity with the nature of their subjects, the Biblical writers seek to invest their language with a high degree of *seriousness* and *dignity*. Both these qualities appear to be prejudiced by certain peculiar forms of expression. The first of these is the **Hyperbole**, a figure which is undoubtedly employed in the Bible. What is it but Hyperbole when the posterity of Abraham is compared to the sand upon the seashore (Gn 22^{17} etc.)? Even a theologian like Flacius admits this (*Clavis Script. Sacr.* 1628, ii. p. 383 ff.). But we must also assign to the same category forms of expression like the following: 'under *every* green tree' (from Dt 12^{2} to 2 Ch 28^{4}); 'The cities are great and walled *up to heaven*' (Dt 1^{28} etc.); 'though thou set thy nest *among the stars*' (Ob ^{4} etc.); 'Saul and Jonathan were swifter *than eagles*' (2 S 1^{23} etc.); 'I am a *worm*,' etc. (Ps 22^{6}; cf. *Stilistik*, pp. 69–77). But the employment of such expressions does not detract from the seriousness, not to speak of the truthfulness, of the style of Scripture. The Biblical writers simply conformed in this matter to the usage of their people and their time, and every hearer or reader of such expressions knew in what sense he must understand them. Nor will it be questioned that the same is the case with the examples of **Litotes** that occur in the Bible. Such are the following: 'A broken and a contrite heart, O God, thou wilt *not despise*' (Ps 51^{17}), *i.e.* wilt accept and praise; 'The smoking flax shall he *not quench*' (Is 42^{3}), but supply with fresh oil; 'He setteth in a way that is *not good*' (Ps 36^{4}); 'Thou, Bethlehem, art *not the least*,' etc. (Mt 2^{6}); 'when we were *without strength*' (Ro 5^{6}), *i.e.* laden with sin and guilt. It is true also of these and other expressions of a similar kind (cf. *Stilistik*, pp. 45–50), that they were not strange to readers of the Biblical writings, but were a well-understood equivalent for the positive statement in each case. The same principle holds good of the examples of **Irony** in the Bible. For instance, we have 'Go and prosper,' etc. (1 K 22^{15}), an ironical imitation of the words of the false prophets; 'No doubt but ye are the people, and wisdom shall die with you' (Job 12^{2}); 'It pleased God by the *foolishness* of preaching to save them that believe' (1 Co 1^{21}); 'Now ye are full, now ye are rich,' etc. (4^{8}, cf. 2 Co 12^{10} 11^{19} 12^{13}). The Biblical writers were not afraid of prejudicing the seriousness of their utterances by resorting to Irony, nor had they any occasion to be afraid, seeing that every one knew to convert these ironical expressions into their opposite. Hence we find this figure employed even in utterances attributed to God: 'Let them (the false gods) rise up and help you' (Dt 32^{38}); 'Go and cry to the gods whom ye have chosen, let them deliver you' (Jg 10^{14}); 'and give me to know' (Job 38^{3b} AV 'answer thou me'); 'Gather my saints together unto me' (Ps 50^{5}). Nay, even sayings of Jesus are reported which exhibit the use of Irony. Amongst these we do not include *καθεύδετε τὸ λοιπὸν καὶ ἀναπαύεσθε*, AV and RV 'Sleep on now and take your rest' (Mt 26^{45} ‖ Mk 14^{41}), for *τὸ λοιπόν* means 'later,' 'afterwards.'[*] But Irony is present (cf. *Stilistik*, p. 43) in the words 'Full well ye reject the commandment of God, that ye may keep your tradition' (Mk 7^{9}). There are other undoubted occurrences of the same figure, as, for instance, in Jn 7^{28} 'Ye both know me, and ye know whence I am.' To the Biblical writers Irony was simply what it is to human speech in general—a means of heightening the effect of an utterance. A similar intention underlies the occurrence of **Sarcasm** in Scripture. There is a scoff in David's question to Abner, 'Art thou not a valiant man?' (1 S 26^{15}), as well as in the exclamation 'How hast thou helped him that is without power!' (Job 26^{2}), or the statement 'As a jewel of gold in a swine's snout, so is a fair woman which is without discretion' (Pr. 11^{22}). Then there are the numerous familiar passages in which the gods of the heathen are the object of *satirical* persiflage: 'Elijah mocked them and said, Cry aloud, for he is a god, either he is talking,' etc. (1 K 18^{27}; cf. Ps $115^{4\text{ff.}}$, Is 40^{19} etc.). We have similar instances of satire in the question 'Is this the city that men called the perfection of beauty, the joy of the whole earth?' (La 2^{15}); in the affirmation 'They that be whole need not a physician' (Mt 9^{12}); and in the indignant substitution of 'concision' (*κατατομή*) for 'circumcision' (*περιτομή*) in Ph 3^{2} (cf. *Stilistik*, pp. 42–45). The Biblical writers, in short, avail themselves of all natural means of reaching their end, to teach and to warn men. In this respect as in others their heart was filled with the wish expressed by the apostle in the words 'I desire to change my voice' (Gal. 4^{20}).

4. The writers of Scripture sought to give to their words that ennobling effect which springs from regard to *purity* or chastity. Of this we find a considerable number of positive traces in the so-called **Euphemisms** such as the following: 'Adam *knew* Eve his wife' (Gn $4^{1.\,25}$; cf. v.^{17} $19^{5.\,8}$ 24^{16} 38^{26b}, Nu $31^{17\text{f.}\,35}$, Jg 11^{39} 19^{25} $21^{11\text{f.}}$, 1 S 1^{19}, 1 K 1^{4}, Mt 1^{25}, Lk 1^{34}); 'The sons of God *came in* unto the daughters of men' (Gn 6^{4}; cf. 16^{2} 19^{31} 29^{23} $30^{6.\,16}$ $38^{2.\,8\text{f.}}$ etc., Ps 51^{2b} etc.); '*come near* her' (Gn 20^{4}, Lv 18^{14}, Dt 22^{14}, Is 8^{3}, Ezk 18^{6}); 'to *touch* her' (Gn 20^{6}, Pr 6^{29}, 1 Co 7^{1}); '*lie with*' (Gn 19^{32} 26^{10} $30^{15\text{f.}}$ $34^{2.\,7}$ 35^{22} etc.); 'Thou *wentest up to thy father's bed*' (49^{4}); '*discover his father's skirt*' (Dt 22^{30} 27^{20}); 'she *eateth*,' said of the adulteress (Pr 30^{20}; cf. *Stilistik*, p. 39); 'Let the husband render unto the wife *due benevolence*' (1 Co 7^{3}). Another series is represented by euphemistic expressions like the following: 'the *nakedness*' (Gn $9^{22\text{f.}}$, Ex 20^{26} 28^{42}, Lv $18^{6\text{ff.}}$ $20^{11\text{ff.}}$, 1 S 20^{30}, Is 47^{3}, La 1^{8}, Ezk $16^{36\text{f.}}$ 22^{10} 23^{10}); 'her young one that cometh out from between her *feet*' (Dt 28^{57}); 'he *covereth his feet*' (Jg 3^{24}, 1 S 24^{3}, cf. Is 7^{20}); '*flesh*' (Lv $15^{2\text{f.}\,19}$ 16^{4}, Ezk 16^{26} 23^{20} 44^{7} etc.; cf. *Stilistik*, pp. 36–38).—There are only a few passages where it appears to us that the Biblical writers might have shown a little more reserve in dealing with 'the secrets' (Dt 25^{11}). We have no exception to take to those instances in which 'shame' is employed (Is 20^{4} 47^{3}), for this is still a veiled epithet. But the impression of a want of delicacy is given by modes of speech like the following: 'He lifteth up the beggar from the dunghill,' etc. (1 S 2^{8}); 'I did cast them out as the dirt in the streets' (Ps 18^{42}); 'Thou didst make us as the off-

---

[*] The present writer in his *Stilistik* (p. 43) anticipated Professor Potwin (see *Expos. Times*, Aug. 1901, p. 481), who rightly denies the presence of Irony in the above passage.

scouring,' etc. (La 3[45], 1 Co 4[13]); 'Dost thou pursue after a dead dog, after a flea?' (1 S 24[14]); 'Am I a dog's head?' (2 S 3[8]); 'a dead dog' (9[8] 17[9]); 'The carcass of Jezebel shall be as dung upon the face of the earth' (2 K 9[37]); 'They made it a draught-house' (10[27]); 'that they may eat their own dung,' etc. (18[27] ‖ Is 36[12]); 'They became as dung for the earth' (Ps 83[11]). Two facts, however, have to be taken into account with reference to such modes of expression. In the first place, they are in accordance with the fashion of earlier times, and were not so repugnant to men then as they are to us. But, further, the choice of such strong expressions served in some of the passages in question to increase the emphasis of the prophetic denunciation. This latter point of view helps us also to explain and to excuse certain passages in Ezekiel, notably 16[3ff.] and 23[3ff.]. We may assume that in these passages the idolatry of Israel is described in such detail as adultery, in order to deter subsequent generations from a repetition of this sin. At the same time, it must be admitted that the prophet could equally have achieved his purpose by a different method of treatment. In like manner, the description of the 'navel' and the 'belly' of the Shulammite (Ca 7[2ff.]) is somewhat too realistic.

5. The Biblical writers are by no means indifferent to *euphony* in their style.

(*a*) The very first words of the OT furnish evidence of this, the Heb. words *bĕrēshîth bārā* ('In the beginning created') being an instance of the first means of securing euphony, namely **Alliteration.** Other instances of it are found in *Nôaḥ yĕnaḥămēnû* 'Noah shall comfort us' (Gn 5[29]); *shemen shĕmekha* 'ointment thy name' (Ca 1[3]); *'āphār wā-'ēpher* 'dust and ashes' (Gn 18[27], Job 30[19] 42[6]); *yishshōm wĕ-shāraḳ* 'shall be astonished and shall hiss' (1 K 9[8], Jer 19[8] 49[17] 50[13]); *simḥā wĕ-sāsôn* 'joy and gladness' (Est 8[16f.]); *hôd wĕ-hādār* 'honour and majesty' (Job 40[10], Ps 21[5] 96[6] ‖ 1 Ch 16[27], Ps 104[1] 111[3]); *shāmîr wā-shayith* 'briers and thorns' (Is 5[6] 7[23-25] 9[18] 10[17] 27[4]); *sāsôn wĕ-simḥā* 'gladness and joy' (Is 22[13] 35[10] 51[11]); *shôd wā-sheber* 'desolation and destruction' (Is 51[19] 59[7] 60[18]); *shommu shāmayim* 'Be astonished, O heavens' (Jer 2[12]); *ḳôẓîm ḳāẓĕrû* 'shall reap thorns' (12[13]); *sar(r)ēhem ṣôrĕrîm* 'their princes are revolters' (Hos 9[15]), etc. etc.; *σήμερον σωτήρ* 'this day a Saviour' (Lk 2[11]).

(*b*) In other passages we meet with expressions like *tōhû wā-bōhû* 'waste and void' (Gn 1[2], Jer 4[23]). These words exhibit what is called **Assonance,** a phenomenon which recurs in *ṣôrēr u-môre* 'stubborn and rebellious' (Dt 21[18] etc.); *'ôyēb wĕ-'ôrēb* 'the enemy and the lier in wait' (Ezr 8[31]); *nĕsûy* ‖ *kĕsûy* 'forgiven' ‖ 'covered' (Ps 32[1]); *zādôn* ‖ *ḳālôn* 'pride' ‖ 'shame' (Pr 11[2]); *hôy gôy* 'Ah nation' (Is 1[4]); *kî* ‖ *yōphî* 'burning' ‖ 'beauty' (3[24]); *hôy hôdô* 'Ah his glory' (Jer 22[18]); *σχῖνος* 'mastic' and *πρῖνος* 'holm' (Sus [54. 58]); *κτηνῶν* 'beasts' and *πτηνῶν* 'birds' (1 Co 15[39]). In a good many instances Alliteration and Assonance are combined: *nā' wā-nād* 'a fugitive and a vagabond' (Gn 4[12. 14]); *Ḳayin* 'Cain' and *ḳānîthî* 'I have gotten' (Gn 4[1]); *Ḳênî* 'Kenites' and *ḳēn* 'nest' (Nu 24[21]); 'Achan' and 'Achor' (Jos 7[24]); the frequently recurring 'Cherethites and Pelethites' (2 S 8[18] 15[18] 20[7], 1 K 1[38. 44], 1 Ch 18[17]); *'attā 'attā* 'thou, now' (1 K 21[7]); *'ănîyyā* ('poor') *'Anāthôth* (Is 10[30]); 'Jezreel' and 'Israel' (Hos 1[4]), etc.; *πορνεία* 'fornication' and *πονηρία* 'wickedness' (Ro 1[29]); *φθόνου* 'envy' and *φόνου* 'murder' (*ib.*), etc.; cf. *Stilistik*, pp. 287–295.

(*c*) The superlative degree of this harmony of elements in style is observable in such collocations as the following: *wayyakkîrēm wayyithnakkēr* 'and he knew them, and made himself strange' (Gn 42[7ab]); *wa-hăshimmōthî . . . wĕ-shāmĕmû* 'and I will bring into desolation . . . and they shall be astonished' (Lv 26[32]); *shō'ā u-mĕshō'ā* 'desolate and waste' (Job 30[3] 38[27], Zeph 1[15], Sir 51[10c]); *'îm lō ta'ămînû kî lō tē'āmēnû* 'if ye will not believe, surely ye shall not be established' (Is 7[9]); *mûsād mus(s)ād* 'of founded foundation' (28[16]). Many other instances might be cited of this species of Euphony, which is usually called **Paronomasia** or **Annominatio.** The number is particularly increased by the very frequent explanations of Proper Names, which form a noteworthy feature in the style of the Hebrew historical books. In Genesis we have the following combinations: *'ădāmā* 'tillable land' and *'ādām* 'man (Adam)' (Gn 2[7]); *'ishshā* 'woman' and *'îsh* 'man' (v.[23]); *shêth* 'Seth' and *shâth* 'hath appointed' (4[25]); *yapht* 'shall enlarge' and *Yāphēth* 'Japheth' (9[27]), etc.; cf. *Stilistik*, p. 296. Elsewhere in the OT we have the following examples of Paronomasia: *Môshe* 'Moses' and *māshîthî* 'I drew' (Ex 2[10]); *Lēwî* 'Levi' and *yillāwû* 'they may be joined' (Nu 18[2]); *Mārā* and *hēmar* 'hath dealt bitterly' (Ru 1[20]); *'Edom* and *'ādôm* 'red' (Is 63[1f.]); *Jerusalem* and *shĕlômîm* 'wholly' (Jer 13[19]); *Solomon* and *shālôm* 'peace' (1 Ch 22[9]); *Πέτρος* and *πέτρα* (Mt 16[18]), etc.; cf. *Stilistik*, pp. 295–298.

(*d*) Euphony is aimed at also by making the same words recur at certain intervals. The various *nuances* that thus arise may be illustrated from the following groups of examples: (*α*) *bārûkh* 'blessed' occurs at the *beginning* of a number of sentences in Dt 28[3-6]. This usage is called **Anaphora,** and we note it also, for instance, in the *'ārûr* 'cursed' with which vv.[16-19] commence; cf. also 'I will sing . . . I will sing' (Jg 5[3]); 'Many . . . many' (Ps 3[1b. 2a]); 'Lift up your heads, O ye gates . . . lift them up' (24[9ab]); 'and it was full . . . and it was full' (Is 2[7ab. 8a]); 'Woe . . . woe,' etc. (5[8. 11. 18. 20-22]); 'and I will cut off . . . and I will cut off,' etc. (Mic 5[11a. 12a. 13a]); 'All things are lawful for me, but, etc. . . . all things are lawful for me, but,' etc. (1 Co 6[12]); 'Have we not power . . . have we not power?' (9[4f.]); 'All our fathers . . . and all . . . and all . . . and all' (10[1b-4]), etc.—(*β*) In 'We perish, we all perish' (Nu 17[12]), we find the same expression repeated at the *end* of two successive sentences—a method of securing Euphony which is called **Epiphora.** We encounter it again in the eleven times recurring 'and all the people shall say Amen' of Dt 27[16-26]; cf. 'Take them alive . . . take them alive' (1 K 20[18ab]); and we find at the end of sentences repetitions like the following: 'the king of glory' (Ps 24[10ab]); 'shall be bowed down' (Is 2[11. 17]); 'when he raiseth up,' etc. (vv.[19b. 21b]); 'shall lament her' (Ezk 32[16ab]); 'as a child' (1 Co 13[11]); 'so am I' at the close of three sentences (2 Co 11[22]); 'in watchings often . . . in fastings often' (v.[27]), etc.—(*γ*) A superior degree of Euphony is sought by *beginning* one sentence and *closing* another with the same expression. This so-called **Ploke** is exemplified in 'Ceased . . . in Israel . . . they ceased' (Jg 5[7]); 'Blessed shall be . . . she shall be blessed' (v.[24ab]); 'He lieth . . . he lieth' (Ps 10[9]); 'Wait on the LORD . . . wait' (27[14ab]), etc.; 'Vanity . . . vanity' (Ec 1[2]); 'Hope that is seen is not hope' (Ro 8[24]); 'Rejoice in the LORD . . . rejoice' (Ph 4[4]), etc.—(*δ*) Specially frequent is the attempt to secure Euphony by making the same word *end* one sentence and *begin* the next—the so-called **Anadiplosis.** The earliest example of it in the Bible is *shôphēkh dam hā'ādām bā'ādām dāmô yishshāphēkh* 'Whoso sheddeth man's blood, by man shall his blood be shed' (Gn 9[6]); 'The kings came and fought, then fought,' etc. (Jg 5[19]); '. . . the way, but the way,' etc. (Ps 1[6ab]); 'and gathered themselves together, yea . . . gathered themselves together' (35[15ab]); *lābēsh* ('is clothed'), *lābash* (Ps 93[1]); *lākhēn yĕyêlîl Mô'āb lĕ-Mô'āb kulloh* *yĕyêlîl* 'therefore shall Moab howl, for Moab shall every one howl' (Is 16^{7}); *ha-ḳêẓ bâ, bâ ha-ḳêẓ* 'the end is come, it is come the end' (Ezk 7^{6}), etc.; 'That which the palmerworm hath left hath the locust eaten, and that which the locust hath left hath the cankerworm eaten,' etc. (Jl 1^{4}) etc.; 'In him was life, and the life,' etc. (Jn $1^{4f.}$); 'Faith cometh by hearing, and hearing by the word of Christ' (Ro 10^{17}); 'He that soweth sparingly, sparingly shall he also reap' (2 Co 9^{6}); 'The trying of your faith worketh patience, but let patience,' etc. (Ja 1^{3}) etc.; cf. *Stilistik*, pp. 298–304.

iv. PECULIARITIES OF STYLE FOR WHICH A PREFERENCE IS SHOWN BY *PARTICULAR* CLASSES OF SCRIPTURE WRITERS.—1. In certain parts of the Bible the so-called 'lower' style is employed, while others are marked by the use of a 'higher' style. The difference may be observed even by readers of the Bible who have no acquaintance with Hebrew. They will note how in certain portions of the OT the employment of metaphorical expressions has a special vogue. Every one is familiar with the phrase 'daughter of Zion,' *i.e.* the inhabitants of Zion, and at times = Zion itself. But where do we meet with this phrase for the first time in the OT? From the beginning of Genesis we may read straight on to 2 K 19^{21} before we encounter it, and the passage just named is the only one in the historical books of the OT where it occurs. How has it found its way here? Simply because in this passage we have a report of words spoken by Isaiah (cf. Is 37^{22}), in whose writings this and similar phrases are found repeatedly (1^{8} $10^{30.\,32}$ 16^{1} 22^{4} $23^{10.\,12}$ 37^{22}; cf. [Deutero-] Is $47^{1\ \mathit{bis}.\ 5}$ 52^{2} 62^{1}). The reader of the English Bible may, further, remark how, for instance, in the Book of Isaiah, the beautiful metaphors of darkness and light are employed (5^{30b} 8^{22} $9^{1f.}$ etc.), and how at one time the hosts of the enemy and at another time the Divine judgments figure in the oracles of this prophet as irresistible floods ($8^{7f.}$ 28^{17} etc.). Any ordinary reader of the Bible will notice, again, how in Isaiah there are far more questions and exclamations than in the Book of Kings. For instance, 'How is the faithful city become an harlot!' (1^{21}); 'Woe unto the wicked!' (3^{11}); 'O my people!' (v.^{12}); 'Woe unto them!' etc. ($5^{8ff.}$); 'Woe is me!' etc. (6^{5}); 'Bind up the testimony!' (8^{16}); 'Shall the axe?' etc. (10^{15}); 'This people was not!' (23^{13}). Nor can the reader of this book help noticing the dialogues and monologues it contains. How lifelike, for instance, are the words 'The voice said, Cry, and he (the person formerly addressed) said, What shall I cry?' followed by the answer of the first speaker, 'All flesh is grass,' etc. (40^{6}). The same quality excites our admiration in 'Can a woman forget her sucking child?' etc.; 'Yea, they may forget . . . Behold, I have,' etc. ($49^{15f.}$); or in the question 'Wherefore have we fasted,' etc. (58^{3}), etc.; cf. *Stilistik*, pp. 229–231. But the reader of the original text of the OT will recognize much more clearly still that certain portions and even whole books are distinguished from others by a *higher style*. He will observe that many components of the Hebrew vocabulary are used only in certain passages. For instance, there is no occurrence in Gn 1–4^{22} of *he'ĕzîn* 'give ear,' a synonym of *shāma'* 'hear' which is used in $3^{8.\,10f.}$. On the other hand, *he'ĕzîn*, which is translated 'hearken' in 4^{23}, recurs in the following additional passages: Ex 15^{16}, Nu 23^{18} (one of the Balaam oracles), Dt 1^{45} 32^{1}, Jg 5^{3}, 2 Ch 24^{10} (perhaps an imitation of Is 64^{3}), Neh 9^{30} (in a prayer), Job 9^{16} etc., Ps 5^{2} etc., Pr 17^{4}, Is $1^{2.\,10}$ 8^{9} 28^{23} 32^{9} 48^{23} 51^{4} 64^{3}, Jer 13^{15}, Hos 5^{1}, Jl 1^{2}. The same is the case with the word *'imrā* 'speech,' which likewise does not occur prior to Gn 4^{23}, and after that is preferred to its synonym *dābār* only in the following passages: Dt 32^{2} 33^{9}, 2 S 22^{31}, Ps 12^{7} etc., Pr 30^{5}, Is 5^{24} 28^{23} 29^{4} 32^{9}, La 2^{17}. Consequently, the choice of these two words suffices to bring Gn 4^{23} into connexion with other portions of the OT where the same comparatively rare terms occur (cf. *Stilistik*, pp. 277–283). To take other two illustrations of a similar kind, the dative 'to them' is expressed by the usual *lāhém* in Gn 3^{21} etc., but by *lāmô* in the following passages: Gn $9^{26b.\,27b}$, Dt $32^{32.\,35}$ 33^{2}, Job 3^{14} etc. (10 times), Ps 2^{4} etc. (21 times), Pr 23^{20}, Is 16^{4} 23^{1} $26^{14.\,16}$ 30^{5} 35^{8} 43^{8} $44^{7.\,15}$ 48^{21} 53^{8}(?), La $1^{19.\,22}$ $4^{10.\,15}$, Hab. 2^{7}. Again, 'man' is expressed by *'ādām* from Gn 1^{26} onwards, but *'ĕnôsh* is the term selected in the Song of Moses (Dt 32^{26}) as well as in Job 4^{17} etc. (18 times), Ps 8^{5} etc. (12 times), Is 8^{1} $13^{7.\,12}$ 24^{6} 33^{8} $51^{7.\,12}$ 56^{2}, Jer 20^{10}, 2 Ch 14^{10}; cf. the Aram. *'ĕnāsh* in Ezr 4^{11} 6^{11}, Dn 2^{10} etc.

2. The portions of the OT which are characterized by the 'higher' style embrace the two categories of *addresses* and *poems*. This may be noted clearly enough, we think, by comparing the Book of Isaiah and the Psalms with one another. For instance, Is $1^{2f.}$ reads—

> 'I have nourished and brought up children,
>   and they have rebelled against me.
> The ox knoweth his owner,
>   and the ass his master's crib:
>   but Israel doth not know,
>   my people doth not consider.'

Here we find that peculiar construction of clauses to which, so far as the present writer is aware, the name 'parallelismus membrorum' was first given by Robert Lowth in the Fourteenth of his famous *Prælectiones de poesi Hebræorum* (Oxonii, 1753). But this ideal rhythm (explained psychologically and comparatively in *Stilistik*, pp. 307–311) is not met with everywhere in Isaiah. For instance, when we read 'When ye come to appear before me, who hath required this at your hand to tread my courts?' etc. (1^{12-14}), it would be precarious here to attribute to the author an aim at *parallelismus membrorum*. As little can any such intention be detected in sentences like 'In that day a man shall cast his idols of silver and his idols of gold, which they made each one for himself to worship, to the moles and to the bats' (2^{20}). Such instances occur frequently in the prophetical books; and if these contain also sentences which exhibit the *parallelismus membrorum*, it must be remembered that the higher form of prose, as employed especially by good speakers, was not without a certain kind of rhythm. This is pointed out by no less an authority than Cicero in the words 'Isocrates primus intellexit etiam in soluta oratione, dum versum effugeres, modum tamen et numerum quendam oportere servari' (*Brutus*, viii. 32); and we find a confirmation of his statement when we examine the opening words of his own First Oration against Catiline: 'Quousque, tandem, abutere, Catilina, patientia nostra? Quamdiu etiam furor iste tuus nos eludet? Quem ad finem sese effrenata iactabit audacia?' The word *nābî'*, indeed, means literally 'speaker' (cf. the present writer's *Offenbarungsbegriff des AT*, i. 71–78), and prophecies as such could be co-ordinated with the productions of poets only if *all* prophetical utterances bore upon them the characteristic marks of poetical compositions. But no one would venture to assert this, for instance, of Zec 1–8 or of the Books of Haggai and Malachi. The last-named portions of the OT lack even those elements of the higher diction described above, (1). Further, the author of Ps 74^{9} did not count himself a prophet, for he says expressly of the age in which he lived, 'There is no more any prophet' (see, further, *Stilistik*, p. 318 f.).

A characteristic feature of the OT prophecies is that they begin with a Divine utterance, which they then go on to develop. For instance, the Book of Isaiah contains at the outset God's declaration 'I have nourished and brought up children,' etc. (vv.$^{2b.\ 3}$), which the prophet as God's interpreter (30^{2a}) then illustrates in detail. Note the words '*They* have forsaken *the LORD*,' etc. (1^{4b}), and 'Unless the *LORD of Hosts* had left *us*,' etc. (v.^{9}). Many similar instances will be found in *Stilistik*, p. 255 f. Another peculiarity of the style of the Prophets is that many of them commence with censure, then speak of the punishment of the impenitent, and close with the announcement of deliverance for the godly. This order is found, for instance, in Am 7^{1}–9^{15} [on 9^{8-15} see Driver, *Joel and Amos*, pp. 119-123], Hos 1^{2}–2^{3}, Is 1^{2}–2^{4} 2^{5}–4^{6}, Mic $4^{9f.\ 11-13}$ $5^{1f.}$ etc.

The true relation of the Prophets of Israel to poetry consists, in the opinion of the present writer, in the circumstance that here and there they intersperse their addresses with poetical compositions. Thus in Is 5^{1-6} we have a 'song' about the vineyard of Jahweh, and specially frequent are passages which reproduce the rhythm of the lament for the dead (the *ḳînā*). This rhythm, which resembles the elegiac measure of the Romans, is heard in such passages as Am 5^{2}—

'The virgin of Israel is fallen,
she shall no more rise,
She is forsaken upon her land,
there is none to raise her.'

The same rhythm is found also in the Prayer of Hezekiah in Is 38^{10-20}. Another 'elegy' occurs in Jer 9^{11}—

'And I will make Jerusalem heaps,
and a den of dragons,
And I will make the cities of Judah desolate,
without an inhabitant.'

And such 'elegies' recur in v.^{21}, Ezk $19^{2.\ 14}$ 26^{17} ('How art thou destroyed,' etc.) $27^{3ff.\ 32}$ $28^{12ff.}$ $32^{2ff.\ 16.\ 19ff.}$. See, further, art. POETRY, vol. iv. p. 5.

3. The structure of the other poetical parts of the OT (cf. מַעֲשַׂי 'my works,' κατ' ἐξ. Ps 45^{1}) is not easy to determine. But certain conclusions may be affirmed with confidence, and the first of these is that the rhythm of ancient Hebrew poetry does *not* consist in the alternation of short and long syllables. W. Jones held, indeed (*Poeseos Asiaticæ Commentarii*, London, 1774, cap. ii.), that the poems of the OT exhibit a regular succession of syllables of different quantity, such as we find in Arabic poems. But he was able to prove his point only by altering the punctuation and by allowing the Hebrew poets great freedom in the matter of prosody. The conclusion on this subject reached by the present writer in *Stilistik* (p. 341) is maintained also by Sievers (§ 58): 'Hebrew metre is not quantitative in the same sense as the classical.' Hence it is now admitted in all the more recent literature on Hebrew poetry, that the rhythm of the latter is based upon the alternation of unaccented and accented syllables. Still there are various *nuances* to be observed in the views held by those who have investigated this subject. G. Bickell (*Metrices Biblicæ Regulæ*, etc., 1879, etc.) holds that 'the metrical accent falls regularly upon every second syllable.' But, in order to make this law apply to the Psalms, he has either removed or added some 2600 vowel syllables and proposed some 3811 changes, as is pointed out by J. Ecker in his brochure, 'Professor G. Bickell's *Carmina Veteris Testamenti metrice* das neueste Denkmal auf dem Kirchhof der hebräischen Metrik' (1883). Nevertheless, Bickell has adhered to his principle, and gives us his transcription, for instance, of Job 32^{6} thus—

'Ẕa'ír 'aní leyámim
W'attém sabím yeshíshim
'Al-kén zaḥált wa'íra'
Meḥávvoth dé'i 'éthkhem.'

That is to say, he makes Elihu speak in Iambic Tetrameter Catalectic. But, in order to reach this result, he introduces in v.$^{a\beta}$ the superfluous word *sābîm* 'grey-headed,' while in v.$^{b\alpha}$ he robs *zaḥaltî* of its ending -*î*, which in Hebrew is the characteristic of the 1st person singular. In spite of such objections, Duhm in his Commentary on Job (*Kurzer Hdcom.* 1897, p. 17) accepted without reservation Bickell's theory of the rhythm of ancient Hebrew poetry. Afterwards, however, he rightly abandoned it (in his Commentary on the Psalms in the same series, 1899, Einleit. § 24). The falsity of Bickell's view is demonstrated by the present writer in *Stilistik* (p. 339 f.), and in like manner Sievers (§ 55) declares, 'I can take no further account of Bickell's system.'—A preferable view of the rhythmical character of OT poetry is that which is represented especially by J. Ley. According to this theory, the ancient Hebrew poets paid regard only to the accented syllables (cf., on this point, *Stilistik*, pp. 330-336). But even the advocates of this view are divided into two schools. The majority (*e.g.* Duhm, *Psalmen*, 1899, p. xxx) hold that the Hebrew poets aimed at an equal number of 'rises' in the corresponding lines. To this group belongs also Sievers (cf. §§ 52 and 88 of his *Metrische Studien*, 1901, Bd. i.). But Budde and still more the present writer have come to the conclusion that a Hebrew poet aimed at nothing more than the *essential symmetry* of the lines that answer to one another in his poem. This may be observed, for instance, in the following four passages: 'Be instructed, ye judges of the earth' (Ps 2^{10b}), 'and rejoice with trembling' (v.^{11b}), 'and ye perish from the way' (v.^{12b}), and 'blessed are all they that put their trust in him' (v.^{12d}). Our conclusion is confirmed also by the poetical compositions which are sung by the inhabitants of Palestine at the present day (see *Stilistik*, pp. 337, 343). Cornill (*Die metrischen Stücke des Buches Jeremia*, 1901, p. viii) supports the same view, so far at least as the Book of Jeremiah is concerned: 'For Jeremiah an exact correspondence of the various *stichoi* was not a formal principle of his metrical system.' Duhm, it is true, in his Commentary on Jeremiah (*Kurzer Hdcom.* 1901) remarks on 2^{2b}: 'In all Jeremiah's poetical compositions the *stichoi* contain three and two "rises" alternately.' But, to make good his theory, he has to deny to Jeremiah a passage like 2^{4-13} because 'the metre of Jeremiah is wanting' in it. Such a conclusion, however, would be valid only if he were able to adduce other, independent, reasons for the excision of this passage. He urges, indeed, that v.^{4} contains a fresh notice of the Divine commission to Jeremiah. But this is nothing strange; such notes occur very frequently in Jeremiah and the later Prophets (see the passages in *Stilistik*, p. 174). Moreover, vv.$^{29-37}$ of the same chapter are allowed by Duhm himself to be Jeremiah's, and yet v.$^{29f.}$ is followed by a fresh call, 'O generation, see ye the word of the LORD,' quite in the manner in which v.^{4} follows upon v.$^{2f.}$ Further, Duhm thinks himself entitled to deny 2^{4-13} to Jeremiah because the people of the LORD are addressed in v.^{4} as 'house of Jacob,' a designation which Duhm believes to be unused except by later writers. But 'house of Jacob' occurs also in Is 2^{3} and 8^{17}, both of which passages are regarded by Duhm himself (in Nowack's *Hdkom.*) as Isaianic; and the same expression is found in Am 3^{13} and Mic 2^{7} 3^{9}, passages which cannot be attributed to 'later writers.' Finally, Duhm's view of Jer 2^{4-13} raises the difficulty that Israel is treated in v.$^{2f.}$ as a feminine, but in v.^{14} as a masculine, subject. But, if v.^{14} is the sequel of v.^{13}, Israel is naturally treated as masculine, because it has just been designated in v.^{13} by the masculine word *'am* 'people.' In any case, it may be added, the supposed interpolator of vv.$^{4-13}$ knew nothing of the metrical system which Duhm attributes to Jeremiah, else he would have accommodated the form of these verses to their surroundings. Hence the present writer is unable to accept Duhm's view as to 'the metre of Jeremiah,' quite apart from the fact that, according to our foregoing contention (see above, (2)), Jeremiah was not a poet.

4. Some interesting features of style occur sporadically in various parts of the OT.—(*a*) There are **alphabetical acrostics.** The present writer cannot, indeed, admit that Nah 1$^{2-10}$ belongs to this category [but see art. NAHUM in vol. iii. p. 475], which, however, probably includes Ps 9 f., and certainly Ps 25. 34. 37. 111 f. 119. 145, Pr 31$^{10-31}$, La 1–4, and Sir 51$^{13-29}$, as is shown by the recently discovered Heb. text (cf., further, *Stilistik*, pp. 357–359). There is another species of acrostic which we do not believe to be found in the OT. The letters, for instance, with which the lines of Ps 110^{1b-4} commence are not intended to point to שמען, as the name of Simon the Maccabee, who reigned B.C. 142–135. That such is the case is represented, indeed, by Duhm (*Kurzer Hdcom.* 1899, *ad loc.*) as unquestionable. But, in the first place, it is surely awkward that the alleged acrostic should include only part of the poem. Secondly, as has been shown by Gaster (*Academy*, 19th May 1892), the name *Shim'on* is written upon the coins (where the vowel letters are relatively rare) 40 times with and only once without the ו. Yet the latter is the way in which, upon Duhm's theory, it would be written in Ps 110. Once more, the clause 'until I make thine enemies thy footstool' (v.^{1b}) would be in glaring opposition to the statement of 1 Mac 14^{41} that Simon was to hold office 'until a trustworthy prophet should arise.' The former (Ps 110^{1b}) promises the highest degree of triumph for the king who is there addressed, the latter (1 Mac 14^{41}) reminds Simon that his choice to be prince was subject to recall.—(*b*) Other poetical compositions in the OT are marked by frequent use of the figure *Anadiplosis* described above (iii. (5)). Such is the case with the fifteen psalms (120–134). For instance, the 'dwell' of 'that I dwell in the tents of Kedar' (Ps 120^{5b}) is taken up again in the 'dwell' of 'my soul hath long dwelt with him' (v.^{6a}). Again, the two lines 'that hateth peace' (v.^{6b}) and 'I am for peace' (v.^{7a}) have a connecting link in the word 'peace.' The same characteristic is still more marked in Ps 121, as may be seen from the clauses 'From whence shall my help come?' (v.^{1b}) and 'My help cometh from the LORD' (v.^{2a}). The familiar title of these fifteen psalms 'Songs of *Degrees*' (AV; RV 'Songs of *Ascents*') has reference, in the opinion of the present writer, to their rhythmical peculiarity as well as to their destination to be sung by the caravans of pilgrims journeying to Jerusalem (cf. *Stilistik*, pp. 302–304).—(*c*) **Rhyme** is found in the poetry of the OT only in the same sporadic fashion as in the plays of Shakespeare (where, *e.g.*, 'rise' rhymes with 'eyes' at the close of *Hamlet*, Act I., Scene ii., or 'me' with 'see' in Act III., at the end of Ophelia's speech). Rhyme of this kind may be observed in the very earliest poetical passage of the OT, namely Gn 4$^{23f.}$, where *ḳôlî* 'my voice' rhymes with *'imrāthî* 'my speech.' But such rhymes, which could not readily be avoided in Hebrew, are not found at the end of *every* line of an OT poem. H. Grimme claims, indeed (in an article entitled 'Durchgereimte Gedichte im AT' in Bardenhewer's *Biblische Studien*, Bd. vi. 1901), to have discovered poems of this kind in Ps 45. 54 and Sir 44$^{1-14}$. But our suspicions are awakened at the very outset by the circumstance that the poet does not exercise his rhyming skill at the opening of his composition (Ps 45^{2}). Grimme offers, it is true, a scansion of the verse, marking it as he does with the sign of *arsis*, but he cannot point to the presence of rhyme in it. Further, with reference to the following lines, are we to hold that the poet considered an identity of final *consonants* (as in *'oznēkh* and *'ābîkh* of v.^{11ab}) to amount to rhyme, although the standing and correct conception of the latter demands an assonance of the preceding *vowel*, such as is heard even in the *rime suffisante* (*e.g.* in 'soupir' and 'désir') of the French? Again, Grimme, in order to establish a rhyme between the end of v.^{3b} and v.^{4b}, drops in v.^{3b} the closing word (*lĕ'ôlām*) of the MT, and alters the preceding words. In like manner he transposes the words in v.^{4a}, and again drops two words in v.^{10b}. Lastly, all the rhymes which Grimme discovers in Ps 45 consist simply of the assonance of the pronominal suffix *-kh*, and he increases the number by making the masculine form for 'thy,' namely *-khā*, the same as the feminine form, namely *-kh*. Thus instead of the MT *hădārékhā* (v.$^{3(4)b}$), 'thy majesty,' he would pronounce *hădārēkh*, a course of procedure which is shown to be wrong by R. Kittel in his treatise *Ueber die Notwendigkeit und Möglichkeit einer neuen Ausgabe der hebräischen Bibel* (1901), §§ 62–68. The weakest point in Grimme's contention is found in the circumstance that the rhymes he discovers depend upon an assonance of a series of pronouns, which could not be avoided in Hebrew. Why should not the composer of Ps 45 have placed at the end of v.^{4b} a word to rhyme with the final *lĕ'ôlām* of v.^{3b}? At all events, the tradition which allowed *lĕ'ôlām* to stand at the end of v.^{3}, knew nothing of any intention on the part of the author of Ps 45 to provide all the lines of his poem with rhymes. Grimme's attempt to demonstrate the presence of rhyme in Ps 54 and Sir 44$^{1-14}$ must equally be pronounced a failure (see the present writer's brochure, *Neueste Prinzipien der alttest. Kritik geprüft*, 1902, p. 24).

5. The last feature we wish to notice as discoverable in the stylistic structure of the OT is the construction of **strophes.** Those scholars who at present are disposed to co-ordinate the prophecies and the poems of the OT, speak of strophes also in the Book of Isaiah, discovering them, for instance, in 2$^{6-11}$ vv.$^{12-17}$ and vv.$^{18-21}$. But even an orator may unfold his subject in sections of nearly equal length, and may conclude each of these with the same sentence, the so-called *Epiphora* (see above, iii. (5*d*β)). Lately, the opening of the Book of Amos has been a favourite field for attempts to discover a strophic structure. The earlier attempts are examined in *Stilistik*, pp. 347–352, and Sievers (i. § 103) agrees with the judgment expressed there by the present writer. But a renewed effort of the same kind has been made by Löhr in his *Untersuchungen zum Buche Amos*, 1901. He proposes to regard the four prophecies against Damascus, Gaza, Ammon, and Moab (1$^{3-5}$ vv.$^{6-8}$ vv.$^{13-15}$ 2$^{1-3}$) as four strophes, each consisting of 4+2+4 *stichoi*. But, in order to make out this uniformity, he is compelled in 1^{3} to reckon the object 'Gilead' as the fourth *stichos*. Similarly, in 2^{1} the fourth *stichos* has to be made up simply of *lassîd* ('into lime'). Short parts of sentences have thus to be counted as whole lines, although in the corresponding passage of the prophecy against Ammon (1$^{13-15}$) a whole clause ('that they might enlarge their border,' v.$^{13b\beta}$) is found, which Löhr himself takes as the fourth *stichos* of the 'strophe' 1$^{13-15}$. The creating of *stichoi* in such a fashion, in order to form strophes, appears to the present writer to be an artificial procedure, the responsibility for which belongs, not to the

prophet Amos but to modern upholders of the theory that the Prophets of Israel meant to employ 'strophes.' Our view of the matter is that also of Cornill in the *Theol. Rundschau* (1901, p. 414 f.). Sievers (*Metrische Untersuchungen*, ii. p. 473) gives up the attempt to establish an exact equality between corresponding lines, for, according to him, 1^{3b} ('because they have threshed,' etc.) contains four feet, while v.^{6b} has five, v.^{13b} six, and 2^{1b} seven.—In the real poems of the OT there are not a few traces of an aim at a strophic structure. The latter cannot be denied, for instance, to the author of Ps 2, who evidently meant to exhaust his subject in four sets of three verses each. Such an aim was connected also with the construction of alphabetical acrostics (see above, (4)). What, for instance, are the twenty-two groups of eight verses each of which Ps 119 is made up, but strophes? Such divisions of a poem are at times indicated even externally. We have an instance of this in the occurrence of quite similar clauses, 'Surely every man at his best estate is wholly vanity' and 'Surely every man is vanity,' in Ps 39^{5b} and v.^{11b}. In $42^{5.\ 11}$ 43^{5}, again, we have the thrice repeated 'Why art thou cast down, O my soul, and why art thou disquieted within me?' and there are a good many similar 'refrains' in the Psalter (cf. $46^{7.\ 11}$ $49^{12.\ 20}$ $57^{5.\ 11}$ $136^{1b.\ 2b}$ etc., see *Stilistik*, p. 346 f.).

v. CONCLUSION.—1. In so far as the stylistic differences between Biblical writings depend upon the choice of words, the style is not without significance for the purposes of *literary criticism*. This is proved in the present writer's *Einleit. ins AT*, pp. 147–151, and its truth reaffirmed, in reply to recent doubts expressed by W. H. Cobb, and defended, with fresh materials, in the *Expository Times*, xiii. (1901) p. 134. For instance, the relative pronoun is expressed by אֲשֶׁר in Is $1^{1.\ 29ab.\ 30a}$ $2^{1.\ 8b.\ 20b}$ $5^{5a.\ 28a}$, but זוּ is not met with till 40^{24} and 43^{21}. Again, the negative לֹא may be counted at least sixteen times in Is 1–6. Yet how easily we might have had at least one occurrence of בַּל, the word used in 40^{24} 43^{27} $44^{8f.}$. Now, these and other words selected in chs. 40 ff. belong to the vocabulary of the 'higher' style of the Hebrews, and it is a fact that in chs. 1 ff. Isaiah cultivates the most elegant mode of writing. Why should he, then, have avoided in these chapters all those elements of the higher style for which a preference is shown in chs. 40 ff.? Such conduct would be all the more incomprehensible, seeing that the most of the linguistic peculiarities which mark Is 40 ff. concern expressions which, on account of their frequency, are employed without deliberate choice and almost without consciousness.—But a number of the more recent expounders of the OT have thought to discover a critical touchstone also in features of Biblical style which do not depend upon the choice of words. Duhm, for instance, says in his Commentary on Isaiah in Nowack's *Hdkom.* p. 30: 'The fate of the unknown city is depicted in $3^{25f.}$ in too elegiac a strain to allow of our assigning these verses to Isaiah.' He has in view the words 'Thy men shall fall by the sword, and thy mighty in the war,' etc. But to say that this is 'in too elegiac a strain' is simply a subjective opinion, whose correctness is not proved by Duhm, and cannot be proved. For the strongest expressions of grief over the catastrophes that overhang Israel are given utterance to by Isaiah in other passages, such as 1^{5-9} and 6^{11-13}, which are allowed by Duhm himself to be genuinely Isaianic. A number of similar critical judgments, which have been built in recent times upon the mannerisms of style in certain portions of the OT, are examined in the present writer's brochure, *Neueste Prinzipien der alttest. Kritik geprüft*, 1902, pp. 13–19.

2. The differences in style between various books of Scripture have a special significance from the point of view of the *history of religion*. It is a weighty circumstance that Nathan's prophecy, which is found in 2 S 7^{11b-16}, is reproduced somewhat differently in 1 Ch 17^{10b-15}, and that the oracle of Is 2^{2-4} has another form in Mic 4^{1-3}. From this we gather that the Israelites of earlier times cared for nothing more than to preserve the contents of revelation in their essential identity. The form was of importance only in so far as it served for the preservation of the contents, and thus, even with the Prophets, the form was the human element. God permitted His interpreters to make use of the language of their own time. If this statement required proof, it would be found in such facts as the following. In the prophetical writings the two forms for the pronoun 'I,' namely *'ānōkhî* and *'ănî*, stand to one another in the following ratios:—in Amos as 10 : 1, in Hosea as 11 : 11, in Micah as 1 : 2, in Jeremiah as 35 : 51, in Ezekiel as 1 (36^{28}) : 138, in Daniel as 1 (10^{11}) : 23, in Haggai as 0 : 4, in Zec 1–8 as 0 : 9, in Malachi as 1 : 8. Then in the historical books, Samuel has 48 *'ānōkhî* to 50 *'ănî*, Kings 9 to 45, Ezra 0 to 2, Nehemiah 1 to 15, Chronicles 1 (1 Ch 17^{1} ‖ 2 S 7^{2}) to 30, Esther 0 to 6. A number of other evidences will be found in the present writer's article 'Prophecy and History' in the *Expository Times*, xi. (1900) pp. 305–310. The above assertion that the form of the language is the human element in the Bible, is subject only to the reservation that the contents of a prophecy were naturally not without influence upon its form, and this was the case also with the spirit which animated the prophets (Mic 3^{8}, Is 8^{11} etc.). But we are convinced that there is still another point to be observed. When, for instance, we read 'They pierced my hands and my feet' (Ps 22^{16}), the present writer cannot believe this sentence to have been written without the co-operation of the Divine Spirit, who was the supreme director of Israel's history. Such expressions were meant to pre-establish a harmony between the Old and the New Covenant, so that believers who lived under the new dispensation might be strengthened in their faith by noticing the presence of such features in the earlier history of God's saving purpose.

LITERATURE.—In addition to the works mentioned in the introductory part of the above article, the present writer's *Stilistik, Rhetorik, Poetik, in Bezug auf die Biblische Litteratur komparativisch dargestellt* (1900) may be consulted throughout. For special points, reference may be made to Karl J. Grimm's *Euphemistic Liturgical Appendices in the OT* (1901), pp. 3–5, and Ed. Sievers' *Metrische Untersuchungen*, 2 vols. (1901).

SYMBOL, SYMBOLICAL ACTIONS.—

i. Distinction between Metaphor and Symbol.
ii. Symbols in Scripture.
iii. Symbolical actions: (A) in common life; (B) in the religious life: (*a*) constant or usual actions; (*b*) unusual actions. The symbolical actions in the prophetical literature.

i. DISTINCTION BETWEEN METAPHOR AND SYMBOL.—Both these terms stand for something which is not used in its barest literal sense or for its proper purpose. Both describe methods which are employed to give concrete expression to ideas belonging to the realm of spirit. But what the *Metaphor* is in the sphere of speech, that the *Symbol* is in the sphere of things. 'Metaphorical' applies to expressions, 'symbolical' is an attribute of objects and actions. How closely allied the two conceptions are is shown by the fact that in familiar speech the terms are occasionally interchanged. For instance, we recently met with this sentence: 'If the ordinary man is to fulfil the command to love God above everything, the word "love" must be understood merely as a symbolical [*sinnbildlich*] designation for two dispositions of mind for which there is no more fitting expression' (*Die Grenzboten*, 1900, p. 447). The correct term here would be 'metaphorical,' not 'symbolical.'

The varieties of Metaphor which occur in Biblical literature are enumerated and explained in the present writer's *Stilistik, Rhetorik, Poetik, in Bezug auf die Biblische Litteratur komparativisch dargestellt* (1900). But the notions of 'Symbol' or 'symbolical' could not be handled there, because they have not to do with a sphere in which language is the agency at work. Hence the explanation there given (pp. 93–109) of Metaphor and the present article will be found to supplement one another.

ii. SYMBOLS IN SCRIPTURE.—The extent to which symbolism pervades the Biblical literature is a doubtful question. The following may be regarded as the surest instances:—

(*a*) The word *'ăshēra*, which had all along, in the sense of 'gracious,' been an attribute of 'Astarte, and hence appears also as a personal name for her (1 K 15^{13} [=2 Ch 15^{16}] 18^{19}, 2 K 21^{7} 23$^{4.\,7}$), came in later times to be used mainly as the name for the symbol of this goddess, namely a tree, in allusion to the fruitfulness of the life of nature (Ex 34^{13}, Dt 7^{5} etc., 2 Ch 34^{7}).—Further, the *ḥammānîm* (Lv 26^{30}, Is 17^{8} 27^{9}, Ezk 6$^{4.\,6}$, 2 Ch 14^{5} 34$^{4.\,7}$ *et al.*) were miniature obelisks, which represented the sun's rays. They were symbols of the sun-god who in Phœn. inscriptions is called בעל חמנ or בעל חממנ, and the like (cf. Bloch, *Phön. Glossar*, p. 22).—The *maẓẓēbôth*, again ('pillars,' Gn 28^{18} etc.), were not set up on their own account. They were not meant to be dwelling-places of the Deity, but were symbols, expressive of gratitude for a Divine revelation (Gn 28^{22} 31^{13} etc.); primitive altars (cf. Ex 20^{25}, Is 19^{19}); allusions to the rock (*Ẓûr*), which formed the surest ground of trust for Israel (Dt 32$^{4.\,15.\,18}$ etc.; *Stilistik*, p. 99$_{32\text{-}34}$); or they were symbols of the twelve tribes of Israel (Ex 24^{4}, cf. 1 K 18^{31}).

(*b*) It is equally unmistakable that the visible dwelling-place of God, *i.e.* the Tabernacle and the Temple, was a symbol of His invisible dwelling-place. In point of fact, the Holy Place and the Holy of Holies correspond respectively to the heavens and the highest heaven (שְׁמֵי הַשָּׁמַיִם 1 K 8^{27} etc.), while the forecourt was the analogue of the earth, which, according to Is 66^{1}, is God's footstool. Josephus was quite right, then, when he said long ago that the subdivision of the sanctuary was an imitation of the constitution of the universe (*Ant.* III. vi. 4: *πρὸς μίμησιν τῆς τῶν ὅλων φύσεως*). The same notion is favoured by He 9^{24} *οὐ γὰρ εἰς . . . ἀντίτυπα . . . ἀλλ' εἰς αὐτὸν τὸν οὐρανόν*. Hengstenberg contended that the OT sanctuary was to be viewed as symbolizing the pre-Christian stage of the Kingdom of God (*Authentie des Pent.* ii. 628 ff.). But in that case the arrangement of the sanctuary of the religion of Israel would have pointed to the imperfection of that religion; and the view that this arrangement was chosen in order to express the truth that the OT religion was imperfect, is unnatural. Still less conceivable is the notion (Schegg, *Bibl. Arch.* 1887, p. 418) that 'the sacred tent typified the Christian Church.'

(*c*) A symbolical meaning of *numbers* cannot be certainly demonstrated for the OT. This question has already been so exhaustively discussed in art. NUMBER in vol. iii., that only a very little needs to be added here.—The circumstance that the sanctuary was divided into three parts, has just been explained. It was not, then, on account of the number 'three' that this arrangement was adopted. That number was not a symbol of the Deity (Schegg, *l.c.* 420) at the OT stage of religion. As little is a symbolical meaning of the number 'four' evident in the construction of the Sanctuary. Nor was the number 'teu' meant to express the idea of 'perfection' (Schegg, *l.c.* 419), as one may see from the fact that the Holy of Holies in Solomon's temple formed a cube of 20 cubits (1 K 6^{3}).

(*d*) With somewhat more foundation it may be contended that the *colours* selected for the adornment of the OT sanctuary had a symbolical meaning. Why, for instance, does blue- or violet-purple (*tĕkheleth*) occupy the first place among the four colours of the curtains of the sanctuary (Ex 26^{1})? Without doubt, because it was meant to allude to the unclouded sky and thus to God. But, to take another instance, it appears to the present writer doubtful whether the red-purple (*'argāmān*) 'recalls the God of judgment,' as was suggested by Franz Delitzsch in his interesting work, *Iris: Studies in Colour and Talks about Flowers*, 1888, p. 55. On the other hand, the white colour which we note in the high priest's dress (Ex 28^{5b} etc., Rev 4^{4}), and in the horses, etc., of Zec 6^{3a} and Rev 6^{2} 19^{11} (cf. 14^{14}), is as certainly a symbolical expression of purity, salvation, and victory as black (Zec 6^{2a}, Rev 6$^{5.\,12}$) is a symbol of death.

(*e*) It may be added that the forms of the CHERUBIM in the Tabernacle (Ex 25^{18} etc., 26$^{1.\,31}$) and the Temple (1 K 6$^{23.\,32.\,35}$, Ezk 41^{18}) were symbols of the presence of God (cf. Ps 18^{11}). Again, what but God's dominion over nature can have been meant to be represented by the carved *palms and flowers* (1 K 6$^{32.\,35}$ 7^{36}, 2 Ch 3^{7})? As to the *lions*, finally, which were to be seen on various pieces of the furniture of the Temple (1 K 7$^{29.\,36}$) and on the throne of Solomon (10^{20}), were these not symbols of the power exercised by the heavenly or the earthly king of Israel? This symbolical significance of the lion shows itself also in the description of the Cherubim (Ezk 1^{10} 10^{20}) and the four apocalyptic creatures (Rev 4^{7}); and in the same passages we find the *ox*, the *eagle*, and the *man* as symbols of strength, swiftness, and reason.

iii. SYMBOLICAL ACTIONS.—While it is a debateable question how far the realm of Symbol extends in the Biblical literature, the sphere of *symbolical actions* is defined with almost complete precision. For it is easy, in the case of each particular action, to perceive whether it is performed for its own sake or *in order to express an idea.* But what is the best classification for the wide department of symbolical actions? Perhaps as suitable a course as any will be to distinguish symbolical actions (A) of common life and (B) of religious life. The latter class will then be subdivided again into ordinary and extraordinary actions.

A. *SYMBOLICAL ACTIONS IN COMMON LIFE*—(*a*) The very *beginning* of life was connected with a symbolical transaction. The newborn child used to be placed on the knees of the father, not merely to be caressed by him (Is 66^{12b}), but also to be acknowledged as his offspring. This is the most probable meaning of Job's question, 'Why did the knees receive me?' (Job 3^{12a}). For in the two *stichoi* of v.^{12} it is most natural to find a reference to the action respectively of the father and the mother, and the placing of the newborn child on the knees of the father is encountered also outside Israel as a recognition of the child by the father (cf. *Il.* ix. 455, etc., and Lat. *tollere*). It is essentially the same act that is referred to when in the MT of Gn 50^{23b} it is said that great-grandsons of Joseph were 'born upon his knees.' The expression עַל־בִּרְכֵּי answers to the question Whither?, and the meaning is that great-grandsons of Joseph were brought after their birth to the supreme head of the family that they might be recognized by him as new members of it. It is quite natural that this statement should have come in later times to be regarded as incredible.

Hence in the Samaritan Pentateuch we find the reading בִּימֵי 'in the days of' substituted. But if this had been the original text, as is assumed in Kautzsch's translation of the OT, and by Holzinger in the *Kurzer Hdcom.* (*ad loc.*), it is unintelligible how such a strange reading as the other should have arisen. And how does the גַּם 'also' witness against the reading of the MT, as Holzinger contends? This conjunction really couples the two facts that Joseph lived to see grandsons not only in the line of Ephraim, but also in that of Manasseh. Holzinger further argues that, supposing the statement in Gn 50^{23b} refers to adoption, Joseph may have adopted Machir but cannot have adopted his sons. 'Machir certainly gained the same standing as Manasseh, but his sons did not.' But is it really established as a necessary conclusion that the narratives found in the patriarchal history simply reflect the later history of the tribes of Israel? Is it not rather possible that the story of Gn 50^{23b} contains an argument against the correctness of this recent theory?—Further, adoption on the part of the mother is clearly expressed in the words attributed to Rachel in Gn 30^{3b} 'And she (Bilhah) shall bear upon my knees, and so shall I come into possession of a family from her.'

(*b*) Not only the beginning of life but also *new steps* in life were marked by symbolical transactions. A woman captured in war, who is chosen by an Israelite to be his wife, 'is to shave her head and pare her nails' (Dt 21^{12}). In this way she is to indicate that her former state of mourning has ceased, and 'that she is about to begin life again under new auspices' (Driver, *Deut. ad loc.*). It is not possible to discover in either of the two actions 'expressions of grief,' as is done by Bertholet (*Kurzer Hdcom. ad loc.*). On the one hand, this interpretation is not required on the ground of 14^{1}. For in the last-named passage and in Jer 16^{6} and Ezk 7^{18} it is not the simple shaving off of the hair (Dt 21^{12}) that is forbidden, but 'the making of a baldness between the eyes, *i.e.* on the forehead.' On the other hand, Bertholet's view of Dt 21^{12b} is reduced to an impossibility in view of v.^{13a}. For it is added there that the woman in question is also to put off 'the raiment of her captivity,' which is quite a different thing from 'to strip herself naked like a mourner' (Bertholet). Consequently the three actions described in Dt $21^{12b.\,13a}$ are really meant to illustrate the fact that a happy change has taken place in the woman's life. It is true that she is still to be allowed a month's time to bewail her parents. But during this she is not to return to her previous absolute mourning. This is proved beyond question by the laying aside of her captive garb (v.^{13a}). The intention rather is merely that during the month specified she may have time to reconcile herself to the transition from the old to the new condition of things. Thus her situation during this month is a mingling of grief and joy.—A happy advance in life was very clearly expressed by the 'breaking of the yoke,' a symbolical action introduced in Jer 28^{10}; cf. Is 58^{6}, Ezk 30^{18}, Nah 1^{13}.

(*c*) Symbolical actions which denote a *disturbance* of one's life or its *end*.—The border of the garments, especially over the breast, is rent: *e.g.* Gn $37^{29.\,34}$ 44^{13}, Nu 14^{6}, Jos 7^{6}, 1 S 4^{12}, 2 S 1^{2} 3^{31} 13^{31} 15^{32}, 2 K 2^{12} (לִשְׁנַיִם קְרָעִים) 5^{8} 11^{14} 18^{37} 22^{19}, Is 36^{22} 37^{1}, Jer $36^{23f.}$ 41^{5}, Jl 2^{13}, Job 1^{20} 2^{12}, Est 4^{1}, Ezr $9^{3.\,5}$, 2 Ch 23^{13} 34^{27}, 1 Mac 2^{14} 3^{47} 4^{39} 5^{14} 11^{71} 13^{45}, Mt 26^{65}, Mk 14^{63}, Ac 14^{14} (Barnabas and Paul), Jos. *BJ* II. xv. 4 (γυμνοὺς τὰ στέρνα τῶν ἐσθήτων περιερρηγμένων). Further, one puts on sackcloth, a primitive article of dress, in order to show that one is giving up every convenience and every ornament: *e.g.* Gn 37^{34}, 2 S 3^{31} 14^{2} 19^{24} 21^{10}, 1 K 21^{27}, 2 K 6^{30}, Is 3^{24} 15^{3} 20^{2} 22^{12} 50^{3} 58^{5}, Jer 4^{8} 6^{26} 49^{3}, Ezk 7^{18}, Jl 1^{8}, Am 8^{10}, Jon $3^{5\text{-}8}$, Ps 30^{12} 35^{13} 69^{12}, Job 16^{15}, La 2^{10}, Est $4^{1f.\,3}$, Dn 9^{3}, 1 Mac 2^{14} (περιεβάλοντο σάκκους), Mt 11^{21} (cf. 3^{4}), Lk 10^{13}, Rev 11^{3} (cf. 6^{12} σάκκος τρίχινος).* One goes barefooted (2 S 15^{30}, cf. Is 20^{2b}) and without turban (Ezk 24^{17a}), or neglects washing oneself (2 S 12^{20}). Ashes are sprinkled upon the head: 2 S 13^{19}, Is 58^{5}, Est 4^{3}, Jos. *BJ* II. xv. 4 (τῆς κεφαλῆς κόνιν); cf. G. Jacob (*Altarab. Parallelen*, p. 15, where it is shown how the pre-Islamite Arabs were also wont to sprinkle ashes upon the head in token of great grief); or one simply sits in the ashes: Jer 6^{26}, Ezk 27^{30} 28^{18}, Jon 3^{6}, Job 2^{8} (cf. La 3^{16}). In this way one clothed himself as it were with ashes (Est 4^{1}, cf. Dn 9^{3}, Is 61^{3}), and thus proclaimed in a visible fashion that he was indifferent to the joy of life. Or, again, the hand might be laid upon the head (2 S 13^{19}, Jer 2^{37}), to express the fact that the soul was bowed down by a heavy sorrow. One covered the head (2 S 15^{30}, Jer 14^{3b}, Est 6^{12}), or at least the beard (Lv 13^{45}, Mic 3^{7a}, Ezk $24^{17b.\,22}$, cf. 2 S 19^{24} †) and thereby the mouth, in order to mark oneself as a person who could neither see nor speak for grief. Perhaps the smiting of the thigh or the breast (Jer 31^{19}, Ezk 21^{17b}, Lk 18^{13}) were also meant to express mental suffering.

(*d*) A special group of symbolical actions expresses the *establishing of a relation* between persons. This is above all symbolized by the *giving of the hand*: 2 K 10^{15} ('give me thine hand then'), Ezr 10^{19a} ('and they gave their hand'), Jer 50^{15a}, Ezk 17^{18b}, La 5^{6a}, 2 Ch 30^{8b}, Pr 6^{1} 11^{15} 17^{18} 22^{26}. In 1 Ch 29^{24} the giving of the hand by the vanquished is the sign of submission, and thus a pendant to the placing of the conqueror's feet upon his neck (Jos 10^{24b}). An alliance is likewise cemented by the one party *laying hold of the right hand* of the other: Is 41^{13} 45^{1}, Ps 73^{23} (cf. 80^{18}).—The concluding of an agreement was also symbolized by *a common meal* (Gn 26^{30} 31^{54}, Ex 24^{11b}, 2 S 3^{20}), and it is very natural to find that on such an occasion not only bread (Jos 9^{14a}, cf. v.^{5b}) but, above all, salt was eaten. For salt serves to keep other articles from putrefaction and consequent destruction, and might thus fittingly point to the security of the agreement. The same is still the practice among the modern Arabs (d'Arvieux, *Merkwürdige Nachrichten von einer Reise*, etc., Bd. iii. p. 164 f.), and hence the OT speaks of the 'salt of the covenant' (Lv 2^{13}) and of 'a covenant of salt' (Nu 18^{19}, 2 Ch 13^{5b}).—The establishing of a connexion with a property is indicated by a man casting one of his shoes upon it (Ps 60^{10a} ∥ 108^{10a}. See art. SHOE in vol. iv.). This is based upon the fact that walking upon a piece of ground is a sign of proprietorship. We may recall the Roman custom of bringing before the prætor a clod of earth from the field which one claimed as his property.—A certain relation was established also when Elijah the prophet cast his mantle upon Elisha (1 K 19^{19b}). A special meaning may be discovered in this act, namely, the investiture with the prophetic mantle (2 K 2^{13}, cf. Is 20^{2}). So the covering of a woman with one's mantle (Ezk 16^{8}, Ru 3^{9}) expresses the intention of becoming her protector *par excellence*, *i.e.* of marrying her. This is the interpretation already given to Ru 3^{9} in the Targum ('and let thy name be named [cf. Is 4^{1}] over thy handmaid, to take me to be thy wife'), and by Rashi (*ad loc.*: 'this is an expression for marrying' [לשון נישואין]); and 'thy wing' here does not mean 'thy protecting arm,' as M. Peritz (*Zwei alte arab. Uebersetzungen des Buches Rûth*, 1900, p. 37) holds. The correct view of Ezk 16^{8} and Ru 3^{9} is confirmed by

---

* Perhaps the *rending of the garments* and the *putting on of sackcloth* should be regarded as the earlier and the later form, respectively, of the same announcement of mourning (so M. Jastrow; cf. *Expos. Times*, 1901, p. 337 f.).

Arab custom. 'The son who, in the heathen period of Arab history, took over the widow of his father, threw his garment over her. So, too, Mohammed cast his mantle over the Jewess Safîja, captured at Khaibar, as a token that he desired to have her in marriage' (G. Jacob, *l.c.* p. 23, where other instances of the same thing will be found). Other actions whereby the conclusion of the marriage bond was symbolized, are not mentioned in the OT, unless we are to reckon among these the loading of Rebekah as Isaac's bride with presents (Gn 24^{53a}), and Isaac's conducting of her into the tent of his mother (v.^{67a}).

(*e*) The opposite condition of things, namely, the *dissolution of relations*, is indicated as follows. One person takes off another's shoe (Dt 25^{9a} וְחָלְצָה וגו'), or the wearer removes it himself (Ru 4^{8b} וַיִּשְׁלֹף וגו'). The idea at the basis of this act may be explained thus. Seeing that one enters upon the occupancy of a field by treading upon it with his shoes (see above, on Ps 60^{10} ‖ 108^{10}), the pulling off of the shoe indicates the intention of *not* carrying out this occupancy. The drawing off of the shoe was also, among the Arabs, a special sign of the dissolution of a marriage. This is shown by the use of خُلْعٌ (*khul'un=extractio*) for 'divorce.' 'The drawing off of a shoe also meets us in still later times as the symbol of renunciation of allegiance. When a ruler was declared to have forfeited the throne, it was customary to cast off the shoe in a solemn assembly' (Ign. Goldziher, *Zur arab. Philologie*, Bd. i. p. 47). A parallel to the above-cited passage, Ru 4^{8b}, will be found also in Burton, *The Land of Midian*, vol. ii. p. 197.—A very energetic expression for the complete dissolution of a connexion consists in the *shaking off the dust from one's feet* (Mt 10^{14} *ἐκτινάξατε τὸν κονιορτόν, κ.τ.λ.*; Mk 6^{11} *ἐκτινάξατε τὸν χοῦν, κ.τ.λ.*; Ac 13^{51}).—The superlative degree of separation from a person may be seen in the *covering of his face* (Est 7^{8b} 'and they covered Haman's face'). By this act he was marked as if non-existing. A similar symbolical action was practised among the Macedonians (Curtius, IV. viii. 22) and the Romans (cf. Bertheau-Ryssel in *Kgf. exeg. Hdb. ad loc.*). Similar to a certain extent is the Turkish custom of sending a silken cord to one who is condemned to death.

(*f*) *Symbolical actions affecting certain classes of society.*—(*a*) If a Hebrew slave declined to avail himself of the liberty that was open to him after seven years' service, *one of his ears*—probably the right one—*was bored through with an awl against the door and thus pinned to it* (Ex 21^{6b}, Dt 15^{17}). This was meant to indicate that the service of his ears—*i.e.* his obedience—must henceforth be indissolubly devoted to this house. The pierced ear is found also amongst other nations as the mark of the slave (Nowack, *Heb. Arch.* i. 177).

(*β*) The office of house steward was conveyed to one by *laying the key of the house upon his shoulder* (Is 22^{22}, cf. Rev 3^{7}). The investiture with the prophetic office is once, too, symbolized by the *giving of a book to eat* (Ezk 3^{1}).

(*γ*) We find quite a number of symbolical actions intended to indicate a man's rank as ruler. First of all there is *anointing* (Jg 9^{8}, 1 S 9^{16} 10^{1} 15^{1} 16$^{3ff.}$, 2 S 2^{4} 3^{39} 5^{3}, 1 K 1^{39} 19^{15}, 2 K 11^{12} 23^{30}, Ps 45^{8} 89^{21}, 1 Ch 29^{22}, 2 Ch 22^{7} 23^{11}, but not Ps 2^{2}). Although this practice of anointing princes is witnessed to even in the Tel el-Amarna letters (*KIB*, Bd. v., Brief 27$^{50-53}$ 37$^{6f.}$), it acquired a peculiar meaning in Israel. For the oil which fed the lamps of the sanctuary readily became a symbol of Divine illumination, and so a vehicle of the Holy Ghost. —In the second place, the elevation of a man to be ruler was expressed by putting on his head a *diadem* (2 S 1^{10}, 2 K 11^{12}, Ps 132^{18}, 1 Mac 11^{13}, Rev 19^{12}) or a *crown* (2 S 12^{30}, Ezk 16^{12} 21^{26} 23^{42}, Zec 6^{11b}, Ps 21^{4}, Est 8^{15}, 1 Ch 20^{2}).—Thirdly, a ruler was acknowledged by the act of *kissing*. Thus Samuel kissed Saul after he had anointed him king over Israel (1 S 10^{1}). The kiss, as an act of homage, is found, not indeed in Gn 41^{40a}, but in Ps 2^{12}, 1 K 19^{18}, Hos 13^{2}, Job 31^{27}, and the same custom prevailed among the Assyrians (Schrader, *KAT*^{2} 455) and other peoples.—Again, a person may be recognized as a sharer in rule by being *caused to sit at one's right hand* (1 K 2^{19}, Ps 45^{10} 110^{1}, Job 30^{12}, 1 Mac 10$^{62-65}$, Mt 19^{28} 20^{21}, Ac 7$^{55f.}$, Ro 8^{34}, He 8^{1} 12^{2}, Jos. *Ant.* VI. xi. 9: *παρακαθεσθέντων αὐτῷ, τοῦ μὲν παιδὸς Ἰωνάθου* [1 S 20^{25}] *ἐκ δεξιῶν*). Thus Nero made Tiridates, king of Armenia, sit on his right (Sueton. *Nero*, c. xiii.: 'Juxta se latere dextro collocavit'), and Sallust (*de Bello Jugurth.* xi. 3) tells us: 'Hiempsal . . . dextra Adherbalem adsedit . . . quod apud Numidas honori ducitur.' Moreover, when a person is spoken of who stands in need of protection, the man who stands at his right hand is his patron (Ps 16^{8b} 121^{5a}).—Finally, the act of *intercourse with the concubines* of a ruler was meant to indicate seizure of his sovereignty. This was a natural interpretation of the act in question, and is sufficiently authenticated by 2 S 3^{7} and 1 K 2^{22a}. But it was not *necessarily* its meaning, as von Bohlen (Com. on *Genesis*, 1835) maintains with reference to Gn 35^{22} and 49^{4}, and as has been held since by a number of scholars, as, *e.g.*, Guthe, *GVI* (1899) § 1. 4. In these two passages the act in question may denote merely a gross violation of filial duty, and the same interpretation is put upon it in 2 S 16^{21b}, whereas the struggle for the kingly sway was indicated by other acts (15$^{1ff.}$). It is not to Judah, whose tribe actually strove for the hegemony in Israel, that intercourse with one of his father's concubines is attributed.

(*g*) Another group of symbolical actions expresses *thoughts, feelings, and aspirations.*—(*a*) The consciousness or the assertion of innocence was symbolized by *the washing of the hands* (Dt 21^{6}, Mt 27^{24}, Herod. i. 35: *καθαρὸς χεῖρας ἐών*, cf. Verg. *Aen.* ii. 719 f.).—(*β*) A feeling of aversion to a person is proclaimed by *spitting in his face* (Nu 12^{14a} יָרֹק בְּפָנֶיהָ, Dt 25^{9a}).—(*γ*) Bitterness and anger show themselves by *gnashing of the teeth* (Ps 35^{16} 37^{12} 112^{10}, Job 16^{9}, La 2^{16}, Mt 8^{12} 13^{42} etc.). Hostile desires express themselves in a similar way: one *gapes with the mouth* as if he would swallow a person (Ps 35^{21}, Job 16^{10}, La 2^{16a}).—(*δ*) *Clapping the hands* is a gesture expressive sometimes of ill-feeling (Ezk 6^{11} 21$^{17.\ 22}$ 22^{13}), sometimes of joy (2 K 11^{12}, Is 55^{12}, Nah 3^{19}, Ps 47^{2} 98^{8}).—(*ε*) Scoffing wonder is expressed by *shaking of the head* or *the hands* (2 K 19^{21}, Is 37^{22}, Jer 18^{16} 48^{27}, Zeph 2^{15}, Ps 22^{8} 44^{15} 109^{25}, Job 16^{4}, La 2^{15}, Sir 13^{7}, Mt 27^{39}), silent astonishment by *laying the hand upon the mouth* (Jg 18^{19}, Mic 7^{16}, Job 21^{5} 29^{9} 40^{4}) or *pressing the lips closely together* (Is 52^{15a}, Ps 107^{42}, Job 5^{16}). —(*ζ*) The fear of profaning a place consecrated to the Deity is expressed by *putting off the shoes*, these being not only a product of man's work, but also dirty (Ex 3^{5} שַׁל וגו', Jos 5^{15}, Ex 29^{20}, Lv 8^{23}, cf. the covering of the feet in Is 6^{2}).—(*η*) The dread of looking upon the holy God found expression in the *covering of the face* (Ex 3^{6b} וַיַּסְתֵּר וגו', 1 K 19^{13} וַיָּלֶט וגו', Is 6^{2} יְכַסֶּה וגו'), and Verg. *Aen.* iii. 405 ff. describes the offering of a sacrifice thus—

> 'Purpureo velare comas adopertus amictu,
> Ne qua inter sanctos ignes in honore deorum
> Hostilis facies occurrat et omina turbet.'

(*θ*) The meaning of the interesting ceremony described in 1 S 7^{6}, when the Israelites, moved to repentance by the words of Samuel, *drew water and poured it out* before Jahweh, is unfortunately not clear. But perhaps we shall not be wrong to find in it an expression of humility. Bowed down with grief for its sin, the soul melts like water before its God (Ps 6^{7}), and prostrates itself before Him (Ps 22^{15} 'like water I am poured out,' La 2^{19}).—(ι) Much clearer is the meaning of the action attributed in Zec 9^{9} to the future ideal king, namely, the *riding upon an ass*. This is a striking allusion to the eminently peaceful aims of his rule. For the ass was the riding animal not of poverty (cf. 1 K 1^{33}) but of peace, whereas the horse along with the battle-bow is to be expelled from the future kingdom of God (Zec 9^{10}, Is 2^{4} 30^{15}, Mt 21^{7} 26^{52}, Jn 18^{36}).

(*h*) A connecting link between the symbolical actions of common life and those of the religious sphere is found in the *lifting up of the hand*, by which swearing is symbolized. The first instance of this meets us in Abraham's words, הֲרִמֹתִי יָדִי 'I have lifted up my hand' (Gn 14^{22}), and we have noted the same gesture as mentioned in the following passages: Ex 6^{8} (נָשָׂאתִי), Nu 14^{30}, Dt 32^{40}, Ezk 20$^{6.\ 15.\ 23.\ 28}$ 36^{7} 44^{12} 47^{14}, Ps 106^{26}, Neh 9^{15b}, Dn 12^{7} †. To the same category belongs the somewhat obscure expression יָד עַל־כֵּס יָהּ (Ex 17^{16}), whether כֵּס be regarded as a by-form of כִּסֵּא 'throne,' which to the present writer appears impossible, or whether it is a corrupt form of נֵס 'standard.' The latter view seems to us the correct one, because the words manifestly point back to the rod of God (v.^{9b}), which had once more evinced its character as the standard of Jahweh by the defeat of the Amalekites (vv.$^{10-13}$). The most probable rendering would thus be: 'With my hand on the standard of Jahweh I declare [as interpreter of the Divine oracle in v.^{14b}], War continues for Jahweh against Amalek from generation to generation.' Swearing is symbolized, further, by *placing the hand under the thigh*: Gn 24$^{2.\ 9}$ 47^{29}. See art. THIGH in vol. iv.

There are also two isolated actions mentioned in the OT, which are performed not on their own account, but in order to express an idea. We refer to the *cutting in pieces* of the concubine of the Levite (Jg 19^{29}), and of Saul's two oxen (1 S 11^{7}), both of which tokens bear the marks of symbol.

B. *SYMBOLICAL ACTIONS IN THE RELIGIOUS LIFE.* — (*a*) *Constant or usual actions.* (α) In *prayer* we find, first of all, the spreading out of the palms of the hands (כַּפַּיִם, Ex 9$^{29.\ 33}$, 1 K 8$^{22.\ 38.\ 54}$, Is 1^{15}, Ps 44^{21} 63^{5}, Job 11^{13b}, Ezr 9^{5b}, 2 Ch 6$^{12b.\ 13b.\ 29}$; cf. Ps 141^{2b}, La 2^{19} 3^{41}). This gesture symbolizes the thought that one comes forward as a suppliant and desires to obtain gifts from God. Hence it is intelligible how also at times the hands simply (יָדַיִם) are spread out (Ps 143^{6}, La 1^{17a}), or lifted up (Ps 28^{2} 134^{2}, Neh 8^{6}, 1 Ti 2^{8}), or stretched forth (2 Mac 3^{20} *προτείνειν τὰς χεῖρας*). It is not at all likely that the word כַּפַּיִם 'palms of the hands' was chosen because originally it was the custom to stroke the image of the god (Wellhausen, *Reste*^{2}, 105). Would *this* have been a reason for retaining כַּפַּיִם with the verb 'spread out'? It may be noted that the heathen Arabs also lifted up their hands to heaven in the act of prayer: *e.g.* we read, 'Then he lifted up his hand towards heaven, and said, O Allah, give me victory over Nahd!' This is a parallel to Ex 17$^{11f.}$ (G. Jacob, *Altarab. Parallelen*, p. 8).—Further, in praying, one practised bowing down (Gn 24^{26} 47^{31}, 1 K 1^{47}, Job 1^{20}, Neh 8^{6}, Jg 9^{1}) or kneeling (1 K 8^{54}, Ps 95^{6}, Dn 6^{11b}, Ezr 9^{5b}, 2 Ch 6^{12b}, Ac 20^{36} *θεὶς τὰ γόνατα*), sinking of the head (1 S 1^{26}, 1 K 18^{42}, Ps 35^{13}, Dn 9^{20}). There can be no doubt as to the idea expressed by these actions. They amount to a confession that man humbles himself before his Lord and Judge.

(β) In the act of *blessing*, the hand is laid upon the head of the recipient, or at least stretched out towards him (Gn 48^{14}, Lv 9^{22}, 2 K 13^{16}, Mt 19^{13}, Mk 10^{16}, Lk 24^{50}). This imposition or motion of the hand is meant to symbolize the passing over of the blessing from the one party to the other—an idea which is expressed by the imposition of hands in other cases as well. Cf. the following groups of passages: Nu 8^{10} 27^{18}, Dt 34^{9}, Ac 6^{6} 13^{3}, 1 Ti 4^{14} 5^{22}, 2 Ti 1^{6}; Lv 16^{21} 24^{14}, Sus^{34}; Ex 29^{10}, Lv 1^{4} etc.; Mt 9^{18}, Mk 5^{23} etc., Rev 1^{17}.

(γ) Other parts of the cultus also provided rich material for symbolical actions. To follow up what was said a moment ago, the *incense offering* is interpreted in Ps 141^{2} and Rev 5^{8} 8$^{3f.}$ as expressing the idea of prayer ascending to heaven. And no less are the other *offerings* the medium whereby such feelings as gratitude or penitence or the longing for reconciliation with God are expressed in an unmistakable fashion. For a God who is spirit has no need of such offerings for Himself (Ps 50^{13}; cf. Is 40^{16} and Ac 17^{25}).

(δ) Symbolical actions with a *negative* purpose included, in the first place, the oft-mentioned *washings* (Ex 19^{10} etc.). Washing oneself is spoken of elsewhere as an act of self-consecration (Jos 3^{5} 7^{13}, 1 S 16^{5}; cf. *Odyss.* iv. 759), and least doubtful of all is this symbolical sense in the case of Jesus' washing of His disciples' feet (Jn 13$^{7ff.}$).—Again, the *circumcision* of male children, when eight days old, as this rite was practised among the Israelites, had a symbolical meaning, being intended to indicate that the child in question belonged to the religious community of Abraham.—Within this community smaller circles receive a higher degree of consecration, and this, too, was effected by means of symbolical transactions. In the case of *priests* we read of washing, anointing (see above), etc., Ex 29^{1} 40^{13}, Lv 8$^{12.\ 30}$. Again, the symbolical actions whereby the separation of NAZIRITES was proclaimed, are described in Nu 6$^{1-21}$ (cf. Jg 13$^{7.\ 13f.}$, Am 2^{12}, and Ed. Vilmar, 'Die symbolische Bedeutung des Nasiräatsgelübdes' in *SK*, 1864). Once more, there are symbolical actions, although their number is very small, connected with *prophets*. The one action of which we read in this case is anointing, and the mention even of this is doubtful. In 1 K 19^{16} it is merely in parallelism with 'Jehu shalt thou anoint to be king' that it is said 'and Elisha shalt thou anoint to be prophet'; and in Is 61^{1} it is from the possession of the spirit that the inference is drawn 'therefore hath Jahweh anointed me.' Consequently we hear much in the prophetical writings of symbolical actions, and these demand a more detailed examination.

(*b*) *Unusual actions in the sphere of religion.*—This category does not yet include the writing up in public of Divine oracles in the way we find the prophets sometimes enjoined to do (Is 8^{1} 30^{8}, Hab 2^{2}; cf. Jer 36^{2}, Ezk 24^{2}). For this was not intended to give publicity to an oracle itself so much as to emphasize one quality of it, namely, its importance. With more reason may this class be held to include those instances in which prophets *gave a symbolical name* to a person or a thing: *e.g.* 'A remnant shall return' (*Shĕ'âr-jāshûb*), etc., Is 7^{3} 8^{3}; 7^{14b} 8$^{8b.\ 10b}$; 30^{7b}; Zec 11^{7}. For Isaiah, in bestowing upon one of his sons the name *Shĕ'âr-jāshûb* (Is 7^{3}), gave an embodiment to the hope that at least a minority of Israel would return to their God; and as often as the bearer of this name walked the streets, *he performed a symbolical action by the bearing of this name*. Although silent, he preached a sermon whose text was Is 6^{13}. But, in the most proper sense, the category with which we are dealing has to do with the following passages:—

The prophet Ahijah tore his garment into twelve pieces, to illustrate the Divine determination to divide the kingdom of Israel (1 K 11$^{30-32}$).

A parallel to this passage was found by 'some,' as Abulwalîd (*Riqma*, ed. Goldberg, p. 215, lines 28–30) says, in 1 S 15^{27b}. They presupposed the reading וַיִּקְרָעֵהוּ, and took Samuel to be the subject of the statement 'and he rent it' (namely, his upper garment). But the subject of the preceding clause וַיַּחֲזֵק וג׳ is Saul, as the second of two persons that have been mentioned is frequently in the OT taken for granted as the subject of an action (Gn 3$^{10a.\ 11a}$ etc.; cf. König, *Stilistik*, *Rhetorik*, *Poetik*, p. 180, lines 29 ff.). But a symbolical action is really recorded in 1 K 20$^{35ff.}$, where we read that one of the 'sons of the prophets' got one of his comrades to smite him, in order that he might exhibit by his wounds the punishment that king Aḥab had deserved. A symbolical character belonged also to the iron horns which the false prophet Ẓedeḳiah put on, in order to express the notion that Aḥab was to push the Syrians as with horns of iron (1 K 22^{11}). Something analogous is seen in the conduct of Tarquinius, who struck off poppy heads (Livy, i. 54) to indicate that his son should deal in like manner with the nobles of the city. While the imperative הַךְ 'strike' in Am 9^{1} is not certainly addressed to the prophet, chs. 2 and 3 of the Book of Hosea belong to the present category. Again, according to Is 20$^{2-4}$, the prophet Isaiah announced the defeat of Egypt and Ethiopia beforehand, by going about half-clothed (cf. 58^{7b}) and barefooted, like a captive. We may notice, in passing, the contrast to this presented by the words of Rev 11^{3} *προφητεύσουσι περιβεβλημένοι σάκκους*. Jeremiah, too, speaks of similar actions in 13$^{1-12}$ (the journey to the Euphrates), 18$^{1-6}$ (the work of the potter), 19$^{1-15}$ (the bottle cast out into the Vale of Hinnom), 25$^{15-31}$ (the handing of the cup, which is full of Jahweh's fury), 27$^{2ff.}$ (putting on of fetters), 28$^{10-13}$ (wearing and breaking a yoke), 32$^{7-15}$ (purchase of the field in Anathoth); cf. also the offering of wine to the Rechabites (35$^{2ff.}$), and the building in of great stones (43^{9}). In the Book of Ezekiel the following passages come into account: ch. 4 (the lying upon the left and upon the right side), ch. 5 (the cutting off, etc., of the hair), 12$^{3ff.}$ (the procuring of baggage appropriate to a captive), v.$^{17ff.}$ (eating bread with trembling), 21$^{11\,(6)}$ (sighing), v.$^{19\,(14)}$ (smiting the hands together), vv.$^{24-28\,(19-23)}$ (the appointing of two ways), 24$^{3ff.}$ (the setting on of the seething caldron), 37$^{16ff.}$ (the two sticks which represent the two separated portions of Israel). Finally, the prophet to whom we owe Zec 9–11 tells how he was appointed to be shepherd of the sheep for slaughter (11$^{4ff.}$), and received instructions to take to himself the instruments of a foolish shepherd (v.^{15}).

With reference to the above passages from the prophetical literature, the difficult question now arises, what we are to hold as to the literal performance of the actions mentioned by the prophets. We will examine the various possible solutions of the problem, in order to arrive at the correct solution.

(*a*) As in dealing with other questions, the proper course will be to consider the OT data themselves. It appears to the present writer that a starting-point from which a sure conclusion may be reached is to be found in Jer 25$^{15ff.}$. There we read: 'For thus saith Jahweh, the God of Israel, unto me, Take the cup of the wine of this fury at my hand, and cause all the nations, to whom I send thee, to drink it (v.^{15}). Then took I the cup at the hand of Jahweh, and made all the nations to drink, unto whom Jahweh had sent me (v.^{17}), namely, Jerusalem and the cities of Judah,' etc. (vv.$^{18-26}$). Now, it is obvious that the causing of whole cities and peoples to drink *cannot* have been carried out literally. But when, in spite of this, the narrative of this transaction runs as if it had been so, we have at least *one* certain instance of a prophetical action which to all appearance was literally performed, although its performance is seen to have been an impossibility. Jeremiah thus means nothing more than that he was stirred up by his Divine director to a certain action, and that he carried this out in his inner life. The purpose meant to be served by the Divine commission and the record of it, is to set forth the determination of God with the greatest clearness. Incidents belonging to the spiritual sphere are to pass like an earthly drama before the eyes of the hearer and reader.

The position of matters disclosed in Jer 25$^{15ff.}$ furnishes a ground for holding that some of the other symbolical actions of which we read in the prophetical books, could also have been performed only ideally. The prophets, like Jeremiah in the above passage, might so relate the symbolical transaction as to guide their hearers to the correct conclusion as to its actual or ideal occurrence. Let us examine this point in detail.

Jeremiah records in 13$^{4-7}$ how he was commanded by God to bury a girdle by the 'Perath' (פְּרָת), and that he carried out this commission. If the contemporaries of Jeremiah must necessarily—and no other possibility can be plausibly made out—have understood by 'Perath' the well-known great river of Asia, the Euphrates, they must at the same time have been aware that the prophet had not actually gone to the Euphrates.—Again, the circumstance noted in Is 20$^{2-4}$ that the prophet went about *for three years* half-clothed and barefooted, is far from natural. But it may be that the statement of time here is not original. The mention of a definite period seemed to be required, and so it was inserted in the form of a so-called round number. We venture to add another remark on this passage. The form of expression, 'At that time Jahweh spake *by* Isaiah' (v.^{2}) is extremely surprising, seeing that the following words are addressed *to* Isaiah. The form is not at all explained by such passages as Ex 9^{35}, Lv 10^{11}, 1 K 12^{15}, Jer 37^{2}, Hag 1$^{1.\ 3}$, which are cited by Duhm (in *Kurzer Hdcom.* on Is 20^{2}), for in none of these does any Divine message follow, addressed to the person who is introduced by 'by' (בְּיַד). Is it too much to assume that the man who wrote the words 'by Isaiah' meant to mark the contents of vv.$^{2-4}$ as containing nothing more than the report of an announcement by God? Have we not the same indication in the strange form of v.^{3}, where the words of God are reported in a definite form meant for the people? Was it not Isaiah's intention by this *narrative* to call attention to the overthrow of Egypt and Ethiopia?

But, be this as it may, the history which meets us in Hos 1 and 3 was certainly enacted only in the spiritual sphere. By means of the Divinely inspired narrative of the experiences of the prophet with an unfaithful wife, the ideal relations are meant to be portrayed, which had partly been realized in the case of the prophet's Master and the people of Israel, and were partly to follow by way of punishment. It is true that, even in recent times, there have not been wanting exegetes who have seen in these chapters the record of *actual* experiences (Nowack, *Die kleinen Propheten*, p. 29; Valeton, *Amos und Hosea*, 1898, p. 221 f.; O. Seesemann, *Israel und Juda bei Amos und Hosea*, 1898, p. 32 ff.). But the objections to this view appear to the present writer to be too weighty to be set aside. The marriage of the prophet with a harlot, if it had been an actual incident, would have been altogether too repulsive. And it may be remarked, in passing, that what the prophet was commanded to do was to take to himself a wife of whoredom and children of whoredom (1^{2}). The notion that 'the impure inclinations of this woman did not reveal themselves to Hosea till after marriage' (Wellhausen, *Skizzen und Vorarbeiten,* v. p. 104 f.; similarly W. R. Smith, *Prophets of Israel,* p. 181 f., and G. A. Smith, *Book of the Twelve Prophets,* i. 238 f.) cannot be reconciled with the text. Our first main argument may be reinforced by the following questions. Would Hosea, even supposing his wife to have been thus guilty, have inscribed her name on the page of history and thus pilloried her for ever? Or would the name of his wife have been so much as named, had it not been a significant one? No, the designations *Gomer bath-diblayim* (Hos 1^3) do not really form a proper name. We are constantly told, indeed, that these designations defy all attempts to explain them as appellatives (Nowack, Valeton, *et al.*). But why may not *Gomer* mean 'completion' (Frd. Delitzsch, *Prolegomena,* etc. p. 200), or, better, 'ripeness' (namely, for judgment), or 'end' (cf. גמר Ps 7^{10} etc.)? Why may we not find in *diblayim* the sense of 'double compression' (cf. E. Meier, *Wurzelwörterbuch,* p. 163 f.; Wünsche, *Erklärung des Hosea,* p. 15; Arab. *dabala*='coegit')? May not, then, the epithet *bath-diblayim* characterize Gomer as one who had to do with two husbands? (We may recall the question: 'How long halt ye on both knees? If Jahweh is God, follow him; and if Baal, follow him,' 1 K 18^{21}). Finally, it would surely have been a strange circumstance if Hosea's real wife had had a name composed of two elements, capable of being explained as='ripeness *or* end,' and 'double copulation.'

Further, Zec $11^{4ff.}$ records how the prophet was told to call one of the two staves, with which he was to shepherd the people of Israel, 'graciousness,' and the other 'union,' 'community of fate' (cf. Ed. König, *Syntax,* § 244*c*). Would not these very names be enough to show to the prophet's contemporaries that the actions recorded in vv.$^{4ff.}$ were not actually performed? This conclusion is favoured by the circumstance that there is no mention of the execution of the command given in v.^{15}.

Of greatest weight for the solution of the problem before us are the indications supplied by the prophet who speaks most of symbolical actions, namely Ezekiel. The data are as follows:—In the first place, in his narratives regarding symbolical actions, it is only rarely (12^7 24^{18}) that he states that these when commanded were carried out. Secondly, in place of mention of the actual performance of these, we find rather an account of their symbolical meaning ($4^{16f.}$ 5^5 12^{19} 21^{24-28}). Thirdly, the external performance of the charge 'thou shalt eat thy bread with trembling, and drink thy water with trembling and despair' (12^{18}), would have been scarcely noticeable. The intention of presenting clearly the Divine decree as to the final chastisement of Israel was realized by the bare narrative about a Divine command as effectively as would have been the case if the command had been actually performed. Fourthly, God's command to carry out a symbolical transaction is expressly introduced in these terms: 'Give to the rebellious house a parable (*māshāl*) and *say* (!) to them, Thus saith the LORD God, set on the caldron, and pour water into it,' etc. (24^3, cf. also 21^{5b}). This, too, favours the conclusion that Ezekiel's statements about commands from God to perform symbolical actions, do not differ essentially from the parables spoken in $17^{2ff.}$ and $18^{3ff.}$. But, as a matter of fact, these narratives may be understood as parables, whose subject is the prophet as the representative now of God and now of his people. As the *representative of God* he is to smite one hand against the other (21^{17}), to depict the conflict which Jahweh, to His sorrow, has to wage against the unfaithful majority of Israel (21^{24}), just as the smiting together of the hands is attributed to Jahweh Himself in 22^{13}. In the same capacity Ezekiel is also called on to depict vividly the rejection of Israel, to which God has been compelled to resort by the excessive unfaithfulness of His people (3^{24-27} 24^{25-27}). Hence, when the prophet has to picture forth the highest degree of the Divine displeasure, he does so by becoming dumb, *i.e.* by ceasing to act as a reprover (3^{26}), and by refraining from articulate expressions of grief at the destruction of Jerusalem, in order to impress upon the people about him the truth that this turn in their fortunes was a just punishment from God. This dumbness continued till, with the fall of Jerusalem, the Divine justice was satisfied, and then the Divine grace in the person of the prophet turned anew to the people ($33^{21f.}$), and sought to win their love.—Again, as *representative of his people,* Ezekiel is the subject of those narratives in which actions of Jahweh against Israel are vividly portrayed. This comes out with special clearness in the words, 'But thou, O son of man, behold, *they* shall put bands upon thee' (3^{25}), and 'Behold, I put bands upon thee' (4^{8a}). In this way the punishment impending from God upon Israel is described as inflicted upon the prophet, and the purpose of this is evident enough. The exiles who, living far from their native land, could not be onlookers at the act of judgment to be executed upon Judah and especially upon Jerusalem, were to have a clear reflexion of the fate of Jahweh's people placed before their eyes.

Such are the positive grounds for holding that Ezekiel's accounts of symbolical actions, whose actual performance is not specially mentioned (12^7 24^{18}), make up a species of parables, whose subject was the prophet as representative either of Jahweh or of Israel (cf. the present writer's art. 'Zur Deutung der symbolischen Handlungen des Propheten Hesekiel' in the *Neue kirchliche Zeitschrift,* 1892, p. 650 f.). The same conclusion, however, is supported by weighty considerations of a negative kind. For instance, is it credible that Ezekiel should literally have lain upon his left side for 390 days (4^5), *i.e.* for more than a year? Did the neighbours count the days? Or is it likely that he actually baked his barley cakes, using human excrement for fuel (4^{12})? These negative considerations have led even Smend (*Kgf. exeg. Hdb.* 'Hesechiel,' 1880, p. 27) to the conclusion that 'it is evident that such a transaction as that of 4^{4-8} cannot have been literally carried out.' Practically, the same standpoint is occupied also by Kuenen (*Hist.-crit. Einleitung,* ii. p. 258 f.), Toy ('Ezekiel' in *SBOT,* 1899), and Hühn (*Die Messianischen Weissagungen,* 1899, p. 160); and a similar judgment is passed by Frankenberg (in Nowack's *Hdkom.,* 'Sprüche,' 1898, p. 18). It may further be noted that Hos 1 and 3 are called 'parabolæ' by Wenrich (*De poeseos hebraicæ atque arabicæ origine,* p. 152).

(*β*) But in the most recent times there have been a number of exegetes who have held that all the symbolical actions mentioned in the Book of Ezekiel were externally performed. These scholars fall into two groups. The one group is made up of v. Orelli (in Strack-Zöckler's *Kgf. Kom.,* 'Hesekiel,' p. 3) and Giesebrecht (*Die Berufsbegabung der alttest. Propheten,* 1897, p. 171), who both found their interpretation upon the appearance of literalness in the language of the passages in question. In particular, Giesebrecht simply asserts that 'the symbolical actions of Ezekiel cannot be understood as mere figures.' But this is no argument.—The other group comprises the following scholars:—Klostermann, in his art. 'Ezechiel: Ein Beitrag zur besseren Würdigung seiner Person und seiner Schrift' in *SK,* 1877, p. 391 ff.; L. Gautier, *La mission du prophète Ézéchiel,* 1891, p. 85 ff.; Bertholet, in Marti's *Kurzer Hdcom.,* 'Hesekiel,' 1897, p. 24 f.; and Kraetzschmar, in Nowack's *Hdkom.*, 'Ezechiel,' 1900, p. v. They have come to this conclusion in consequence of accepting the hypothesis regarding the person of Ezekiel put forward by Klostermann in the above-named article. Hence it is necessary to examine this hypothesis, and to ask whether it can supply a ground on which to defend the view that the symbolical actions of which Ezekiel speaks were literally performed.

Klostermann's theory is based on the assumption that the dumbness of Ezekiel (3^{24-27} and 24^{25-27}) was due to a temporary *alalia* from which the prophet finally recovered ($33^{21f.}$); and that his long-continued lying posture ($4^{4ff.}$) was the result of *hemiplegia* (*l.c.* pp. 417 f., 422). But to this hypothesis there are the following objections:—(α) The Divine command to the prophet to shut himself up in his house and keep dumb ($3^{24.\,26}$), or to refrain from articulate lamentation ($24^{16.\,27}$), and to lie upon his left side (4^{4-8}), must be interpreted in the same manner as the command to shave his head and beard with a sharp sword ($5^{1ff.}$). It is impossible to pick and choose amongst the various records of symbolical actions contained in the Book of Ezekiel. If, then, symptoms of disease on the part of the prophet are to be discovered in Ezk $3^{24ff.}$ $24^{16ff.}$ and 4^{4-8}, all symbolical actions of which he speaks must be traced back to some disease of his, and we must be permitted to bring all the particular features of the narratives of $3^{24ff.}$ $24^{16ff.}$ and 4^{4-8} into a causal connexion with some pathological habit of Ezekiel. But it may be asked whether, among other disordered inclinations, he had a fancy for using human excrement for fuel (4^{12}). Did he at one and the same time suffer from temporary *alalia* and also have the peculiarity at one time of sighing (21^{6}), and at another time of crying aloud (v.^{12})? If the Divine command to refrain from any articulate lament for the dead (24^{16}) is to be explained by a temporary speechlessness, then the non-shedding of tears, which is enjoined in the same verse, must be derived from a bodily idiosyncrasy of Ezekiel.—(β) It must be observed that in 3^{24-26} Ezekiel speaks not of dumbness in general, but of keeping silence with any prophetic message. This is obvious from the single circumstance that, in order to carry out the injunction of silence, the prophet had to shut himself up in his house—a course of action which would have been unnecessary if he had been suffering from temporary speechlessness. The same conclusion follows, on the positive side, from the circumstance that his silence is to evidence itself by his not coming forward as a reprover (3^{26a}), and that it is to come to an end when his God again makes disclosures to him (v.^{27}).—(γ) If Ezekiel had suffered from temporary *alalia*, this could not have been unknown to his neighbours, whose principal representatives used to assemble in his house (8^{1} 14^{1} 20^{1}). But, in that case, a new attack of this dumbness could have had no symbolical meaning to them.—(δ) It must truly have been a remarkable *hemiplegia* which compelled the prophet to lie for exactly 390+40, *i.e.* 430 days, and thus to furnish a parallel to the 430 years (Ex 12^{40}) of Israel's bondage in Egypt.—(ε) If it was, as alleged, a bodily infirmity that prevented the prophet from articulate wailing (24^{25-27}), he could, and no doubt would, at least have expressed his grief at his bitter loss by practising all the other mourning usages. But, as he did not do so, it is unmistakably plain that his neglect of the lament for the dead was due, not to a bodily indisposition but to a higher impulse. What a novel kind of *alalia*, by the way, which had its cessation foretold (3^{26} 24^{27})!

Consequently, the view that all the symbolical actions mentioned in the Book of Ezekiel were literally performed, fails again to find any support from Klostermann's hypothesis about the condition of the prophet's health. On the contrary, in 3^{24-26} 24^{25-27} and 4^{4-8} he is only represented as the subject of a symbolical action in the same way as in $5^{2ff.}$ etc. It is also intelligible how he should be introduced as afflicted with dumbness. For God meant to symbolize the extreme of His displeasure against Israel by breaking off His revelations (3^{27}). Again, Ezekiel is described in 4^{4-8} as lying, because Israel's captive condition might suitably be regarded also as a lying, just as it is elsewhere (Hos 3^{3a}) compared to a sitting in isolation.

A subdivision of symbolical actions may be formed of those which depict some feature of the future consummation of the Kingdom of God. They may be called προφητεῖαι δι' ἔργων (Adrianos, Εἰσαγωγὴ εἰς τὰς θείας γραφάς, ed. Goessling, § 130) or 'types.' But it is questionable whether the OT speaks of any actions which were meant to be performed with the intention of pointing beforehand to some incident in the life of Christ. This is doubtful even in the case of the passage in which Adrianos (*l.c.*) appears with a measure of certainty to have discovered a προφητεία δι' ἔργων. We refer to Gn 22^{2} 'Take now thy son Isaac, thine only son, whom thou lovest,' etc. This story is rather intended to express the notion that the God who has revealed Himself to Israel, holds human sacrifices in abhorrence. It could all the less have been meant to point to the time of Christ, seeing that God did not spare Himself the sorrow of offering His only Son as a sacrifice for the sin of mankind. Nor was the Flood sent to serve as an allusion to baptism, although it might afterwards be viewed as an analogue to the latter (1 P 3^{21}). This has been noted also by J. D. Michaelis in his interesting work, *Entwurf der typischen Gottesgelartheit*^{2}, 1763, p. 37.

The most familiar symbolical actions of the NT (Jn $13^{4ff.}$, Ac 6^{6} ἐπέθηκαν αὐτοῖς τὰς χεῖρας, etc.) have been already referred to in speaking of symbolical *washing* and the *imposition of hands* (which see). To these may be added *the cursing of the fig-tree* (Mt 21^{19}, Mk $11^{13f.}$), the texts relating to which are not meant to be a mere 'symbolical narrative,' as has been recently maintained in the *Theol. Ztschr. aus der Schweiz*, 1899, pp. 228–238. Further, the *casting of lots* (Ac 1^{26}) is merely an external parallel to the previously (v.^{24}) mentioned prayer; and, finally, the *breaking of bread* (κλάσις τοῦ ἄρτου, Mt 26^{26}, Lk 24^{35}, Ac 2^{42}) and *baptism* (Mt 28^{19}) have a fundamentally symbolical character. See BAPTISM in vol. i. and LORD'S SUPPER in vol. iii.

RELIGION OF EGYPT.—

Introduction. Official religion and popular faith.
i. COSMOGONY.
  (*A*) Creation of the world.
    (1) Supposed reciprocal relation between deities and men.
    (2) Creation myths attributing the formative effect to *acts*: (*a*) separation of heaven and earth, (*b*) origin of the sun, (*c*) origin of gods and men, animals and plants, (*d*) methods of creation.—(α) a series of births, (β) artificial construction, (γ) procreation.
    (3) Creation myths attributing the formative effect to *words*. Supposed connexion between an object and its name. Creation by inarticulate sounds a late conception.
  (*B*) Destruction of the world.
    (1) Supposed allusions.
    (2) A deluge checked by the Deity.
    (3) Rā's partial destruction of the human race.
ii. THE GODS.
  (*A*) Historical development of the power of particular gods.

  - (1) Want of unity in the Egyptian religion.
  - (2) The nome gods.
  - (3) Attempted reformation by Amenophis IV.
  - (4) Changing fortunes of the principal gods.
  - (5) *Doppelgängers* amongst the gods.
  - (6) Uncertainties due to our lack of complete information.
- (*B*) List of gods.
  - (1) Native Egyptian deities.
  - (2) Foreign deities : (*a*) Libyan, (*b*) African, (*c*) Asiatic.
  - (3) Deified men.
  - (4) The popular gods. Partition of the great gods. (*a*) heaven and earth, and the heavenly bodies, (*b*) stone worship, (*c*) worship of high places, (*d*) cult of springs and streams, (*e*) animal worship, (*f*) worship of plants and trees, (*g*) city divinities, (*h*) veneration of buildings.
  - (5) Deified abstract notions.

iii. THE CULTUS. The daily temple ritual.
iv. CONCEPTIONS OF A FUTURE LIFE.
  - (1) Notions connected with the sun and his 24-hours' course.
  - (2) Dwelling-place of the gods.
  - (3) Realm of the dead variously placed : (*a*) above the earth, in heaven, (*b*) under the earth, in *Duat*, (*c*) on the earth, in the Plain of Åalu.
  - (4) The Osirian doctrine of immortality : (*a*) the Osiris myth, (*b*) later influences of sun-god myths, (*c*) judgment in the world beyond, (*d*) the Book of the Dead, etc., (*e*) principal features of the Osirian faith. Part-souls.

Literature.

Introduction.—In studying the religion of ancient Egypt we encounter a phenomenon which it has in common with almost all religions. Two forms of conception may be distinguished, which started from the same principles and exercised a permanent influence upon one another, but which at the same time exhibit a number of radical differences in the view they take of Divine things. These two are, respectively, the official religion of the upper classes, and the popular faith. It is true that the difference is not so pronounced in the Nile valley as elsewhere, since the Egyptian religion was never subjected to a systematizing process and a logical establishing of its various dogmas, but always remained in a fluid condition, so that even the official religion was thus permanently exposed to powerful influence from the side of the popular conceptions.

The sources of information of which modern investigation can avail itself in seeking to arrive at a knowledge of the official religion of ancient Egypt are very copious. It is the subject of the inscriptions on temples, and of almost all the texts found in tombs and on monuments (including the religious papyri) dedicated to the worship of the dead. Far fewer materials have to be taken account of in estimating the popular religion. Its adherents belonged in general to the poorer classes, who were not in a position to erect any fine monuments. Besides, in the texts they destined for publicity, such persons almost uniformly employed the terminology and the formulæ of the official monuments, even in cases where they understood the dogmas in view differently from the priestly colleges of the great sanctuaries. In order to recover this realm of ideas belonging to the popular faith, our main resources are a series of ill-executed sepulchral steles and rock-inscriptions, sporadic passages in the temple texts and those concerning the dead which show traces of popular influence, and in which, notably for instance in the so-called Book of the Dead, the popular doctrine could occasionally not be passed over. When referred to, this doctrine is, strangely enough, spoken of as a great secret. Lastly, we have to take account of the statements of the classical writers, who, like their countrymen that were settled in the Nile valley, were brought into contact less with the priests and the upper classes than with the great mass of the people proper, so that their accounts reproduce primarily the notions of the latter. What holds good of these Greeks applies also to the Israelites, who, if they acquired information or received stimulus from Egypt, must have derived these from the middle classes or the lower orders, and not from study of the doctrines in the temples which were so difficult of access to a non-Egyptian, or of the inscriptions which must have been almost always unintelligible to a foreigner.

Under these circumstances, it will be necessary in the present article to lay more emphasis on these popular notions than it has been usual, in view of the above described meagreness of the sources, to do in descriptions of the Egyptian religion. But, on the other hand, owing to the want of materials and the constant interpenetration of the two forms of conception, it becomes impossible to treat the two apart; the difference between their points of view can only be indicated from time to time in the course of our exposition.

i. COSMOGONY.—(A) *Creation of the world.*—(1) From the earliest times from which we possess Egyptian religious texts down to the period when the ancient polytheism gave way to the Christian faith, the relation between Divinity and humanity was thought of by the inhabitants of the Nile valley as reciprocally conditioned. Man dedicates to the Deity food, drink, clothing, a dwelling-place—the things which the Deity, who shares in all earthly qualities and needs, requires for comfort. The Deity gives in return such benefits as he can dispense—long life, endurance, joy, victory over enemies, health, and the like. If either party neglects his duty, the other is at once set free from any counter obligation. Man offers only to *that* god who shows himself helpful to him; the god favours only *that* man who does him some service. Thus in the inscriptions the god says to the king, 'I give thee victory in proportion to thine offerings,' and the king threatens to discontinue his worship if the god will not bestow long life upon him.

As in every instance where similar notions are cherished, this way of thinking led in Egypt to the continuance of a polytheistic system. Upon the assumption that only one or only a few gods existed, or that their supremacy was universal, it was difficult to conceive how, in view of the conflicting interests of different individuals, any decisive pressure could be exerted on the Divine will by a particular suppliant. This was more practicable if a man could apply to special gods who had to be considered in relation to only *one* or only a few individuals. Then, when he had obtained the good graces of these, he could leave it to them to accomplish their will in the circle of their fellow-gods, or to bring it at the proper moment under the notice of a higher god. The kings of the gods were accessible, if necessary, to the Pharaohs and their court; the sphere of their activity was far too exalted to permit of their rendering continuous help to ordinary mortals.

In this way the notion that every family and every locality or province possesses and must retain for itself its special deities, persisted for thousands of years, and was never absolutely suppressed. At no time was there a religious system in which every Egyptian was bound to believe; the belief in the gods always exhibits a particular form and development in the different divisions of the country, the so-called nomes (see below, p. 182ᵇ).

It is quite recently that historical science has come to recognize the above characteristic of the Egyptian religion. Only some thirty years ago it began to be urged and demonstrated that, in order to obtain a correct view of the faith of the ancient Egyptians, we must examine individual conceptions and individual deities, instead of setting up *a priori* principles. Up till then it had been the fashion to attribute to this people now an obscure monotheism, now a professedly profound but in reality perfectly unintelligible pantheism, or some other religious system, and to support such pretensions by sentences of the inscriptions torn from their context. From the point of view of scientific inquiry, the ancient Egyptian religion is made up of a long series of particular religions and separate spheres of ideas, which one has to follow in their development, unconcerned at first with the question which of the various conceptions is the oldest and whence each originated. The time may come when it may be possible to bring a number of the deities into connexion with the various elements that gave birth to the Egyptian people of history; with the Libyan aborigines, the conquering Ḥamites, and the Semite peaceful immigrants. But at present the materials at our disposal are far too scanty to lead to any certain conclusions, and the hypotheses that have been started about the Egyptian religion are already so numerous that in the interests of the progress of science any multiplying of them is to be deprecated.

(2) The variety of ways in which myth-forming speculation could view one and the same event forces itself at once on our observation when we essay a survey of the most important of the Egyptian myths intended to explain the origin of the world and of gods and men. It will be best to commence our study of the religion of Egypt with an account of these myths, because we can here take account at the same time of a number of fundamental ideas of the ancient Egyptians about religious questions, which exhibit resemblances to, or differences from, certain classes of notions that prevailed among the Israelites.

In the opinion of the ancient Egyptians, as with other peoples, our world, the heavens and the earth, and the beings that inhabit them, did not exist from the beginning, but were created. Not, indeed, out of nothing, but out of a fluidity which the Egyptians called *Nu*, and which may be compared with the *Chaos* of the Greeks. While this filled the universe, there was, as a text expresses it, 'not yet the heaven; not yet was the earth, not yet were formed the good and the evil serpents.' Or, as it is put in an inscription in the pyramid of a king belonging to the 6th dynasty (Pepi I. l. 663 f.), *i.e.* *c.* 3000 B.C., 'not yet was the heaven, not yet the earth, men were not, not yet born were the gods, not yet was death.'

(*a*) In this primeval mass lay hidden the germs of the future world, but no text as yet discovered points to any attempt on the part of the Egyptians to form a clear and harmonious picture of the relation of these germs to one another. It is only as to particular points that we have indications. Thus, according to a widely diffused notion, in primeval times the heaven, Nut (thought of as female), reposed in the close embrace of the earth, Seb or Keb (thought of as male). Besides the primeval fluid, Nu, there existed, according to Egyptian ideas, prior to the creation, *one* deity, who appears sometimes alone as a male god, and at other times falls apart into a male and a female form. This deity calls into existence from Nu the world that is to be. The means employed are very variously described, but they may be conveniently divided into two great categories, namely, *acts* and *words*.—Amongst the myths belonging to the first class the most popular is that which describes how the creating deity forced his way between heaven and earth, tore them from their embrace, trod the earth under foot, and raised the heaven on high with his arms. For the most part, it is Shu that appears as the separating deity, but his place is taken at times by Bes (Petrie, *Hawara*, pl. 2). We possess numerous pictures (especially from the period *c.* 1500–1000 B.C.), showing, with slight variations of detail, the breaking up of the ancient union. For the most part, the act is represented as just completed. The goddess of heaven, Nut, supports herself on her hands and feet, and so arches herself over the earth-god Seb, who is still falling. A number of other deities are generally to be seen, notably the gods of the Osiris circle. These are regarded as the children sprung from the union of Seb and Nut; they were gradually generated, but first made their appearance at the moment when their parents were torn apart.

Other pictures show a somewhat later scene in the process of creation. We see the earth-god lying wearied on the ground, while the separating god stands over him, holding up the goddess of heaven with his hands. To save himself from fatigue, he has sometimes called assistants to his aid: these either hold up particular portions of the heaven, or even form points of support for the arms of the god himself.—A variant of this legend found it unworthy of the god that he should himself permanently play the part of an Atlas, and be thus hindered from exercising his power in other ways. Accordingly, we are told how the god erected four bifurcated supports—one each in the north, the south, the east, and the west—to bear the arch of heaven. And, in order to ensure the stability of these supports, upon whose existence the continuance of the earth depended, a deity was set over each to guard it. It is the notion of these supports that underlies the figures of the four pillars which, in some pictures of the separation scene, appear beside the god. The names of the supporting deities are variously given. At times they are the usual deities of the regions of heaven: Horus for the south, Set for the north, Thoth for the west, Septi for the east; at other times the place of these gods is taken by goddesses. But the four supports mark the end of the world; and, when the Pharaoh desires to emphasize the fact that he is the lord of all lands, he declares that he rules 'to the supports of the heaven.'

The goddess of heaven is for the most part thought of as a woman, but at times also as a cow—two forms which from the point of view of Egyptian mythology are really identical. For in the Nile valley in general the only purpose served by the goddess is to be the mother and nurse of the future god. The natural symbol for this among an essentially agricultural people was the domestic animal that was most common, the cow, which hence appears as the form of manifestation of practically all the goddesses in their maternal activity. If, for instance, the Egyptians desire to represent the king drinking from the goddess, in order to imbibe, along with her milk, the immortality inherent in her, they introduce him in contact sometimes with the breast of an anthropomorphic form, sometimes with the udder of a cow. Even when such a Divine nurse is portrayed in human form, she is not infrequently provided with a cow's head, in order to indicate with corresponding emphasis her most important function (cf. *e.g.* Naville, *Deir el baḥari*, ii. pl. 53).

On the body of the goddess of heaven the celestial bodies move to and fro, the sun by day, the stars by night; hence she is often depicted with her whole body studded over with stars.

While in the above instances the deity of heaven always appears as female, there is another series of cosmological conceptions where a partition into a female and a male form takes place. We meet with these from about B.C. 1500 downwards, and it is quite possible that they originated at the date just mentioned, for during this period the whole Egyptian mythology is ruled by the effort to divide as far as possible all divinities into a male and a female form of manifestation. This is bound up with a phenomenon that appears even in the language. When the Egyptians wish to express a totality with the utmost possible clearness, they write both the masculine and the feminine of the word, thus exhausting the genders of a language that has no neuter. Thus they say 'every male and every female death,' 'every male and every female disease,' when they mean all forms of death or of disease. In like manner they seek to exhaust the totality of the notion of any particular deity by emphasizing the male and the female form of manifestation. This partition of the divinity is in most instances the result, not of a logical development of religious processes of thought, but of an artificial formation, the female supplementary being obtained simply by adding the feminine suffix *-t* to the name of the male deity. Thus from Ḥer was derived a Ḥer-t, from Rā a Rā-t, etc. (see p. 184^{b}).

In thus partitioning the deity of heaven, they usually thought of the female form as overarching the upper, inhabited, side of the earth, while the male form correspondingly arched the under side, both being thus placed at a distance, either above or below, the earth-god Seb. Starting from this conception, the rising of the sun is occasionally so depicted that the subterranean god of heaven holds up the sun at arm's length, while the *cynocephali* that have to greet the rising sun offer their praises to it.

Occasionally, although rarely, the sex of the deities of heaven is reversed, the upper heaven being male and its counterpart female. Thus in texts of the 13th cent. B.C. the rise of the sun in the under world is so depicted that the male god of the heaven of day hands the bark with the sun-god to the female deity of the nightly heavens, as she stands upon the spherically conceived under world.

(*b*) The above described cosmogonic conception is connected with another, intended to explain the origin of the sun, but to which we have as yet only brief allusions. One of these is found in the so-called Book of the Dead, a collection of magical formulæ, whose purpose is to procure, for the deceased, entrance into the world beyond and authority there. In pronouncing these the deceased is to identify himself with certain deities, and to endeavour to obtain advantages by pointing to this fictitious identity. One of the chapters (54), which we can trace back to about the year B.C. 2500, begins thus: 'I am the double lion of the egg of the great cackler, I guard the egg which the god Seb drops from the earth' (cf. *PSBA* vii. p. 152, xv. p. 288). This double lion is the horizon. Here sat, according to Egyptian notions, back to back two lions, which represented yesterday and to-day, the issue of the sun from the under world and his entrance into the upper world (cf. *Tombeau de Ramses IV.*, ed. Lefébure, pl. 40), and whose charge was to guard the sun as he rose between them. The sun himself is often called 'the egg of the great cackler,' while this cackler, again, is the earth-god, who was supposed to have let fall, *i.e.* laid, the egg. Hence he had assigned to him as his sacred animal the goose, which he frequently bears upon his head in those pictures in which he is introduced in human form as a man. How he conceived the egg is not expressly said in the texts, but a picture on a coffin of *c.* 1200 B.C. (Lanzone, *Diz. di mit.* pl. 159) points to the explanation. Here we see the earth-god strain himself under the male nightly heaven till his erected *phallus* points to his mouth. That is to say, he must have impregnated himself, and the sun portrayed behind him is the egg which he will detach from himself as the result of this act.

Alongside of the myth of the great cackler which in the form of a goose lays the sun-egg, runs another, according to which the sun- and also the moon-egg are fashioned by a deity upon the potter's wheel, a process in which it is especially the by-form of the god of Memphis, Ptaḥ-Tatunen (relief at Philæ, in Rosellini's *Mon. del culto*, pl. 21), that we find engaged. To Ptaḥ is attributed also the creation of the whole world, in which rôle he is called 'the great artificer,' so that in this instance we have to think not of a crude tearing apart of the primeval mass, but of an artificial construction of the universe. In this work the god had a number of coadjutors, the so-called *Chnumu* or 'formers.' These are little, dwarf-like, deformed, thick-headed forms, which, eight in number, were regarded as sons of Ptaḥ, or, at a later period, also of Rā. Images of them were frequently put in a grave along with the corpse. As they had once co-operated in the forming of the world, they would now in the world beyond devote themselves to the reconstruction of the deceased, and help him to attain to a new and everlasting life.

(*c*) But the creation of the world was a subject of far less interest to the Egyptians than the origin of the living beings and the objects it contains, gods and men, animals and plants. But in the myths connected with this subject we meet again with that want of systematizing which shows itself everywhere in the Egyptian world of ideas. We have statements as to the origin of particular beings and objects, but there is no finished story of creation such as we find, for instance, at the beginning of the Bk. of Genesis. It is this inability to combine individual notions into a whole that explains also how it was possible for the numerous particular statements to maintain their existence side by side in spite of their contradictions. Since it was not required to unite them into a harmonious system, there was no need to separate duplicate legends, or to exclude or harmonize irreconcilable elements.

For the most part, one was content to celebrate in general terms the praises of this or that god as creator. Thus, *c.* 1500 B.C., it is said of Osiris (stele in Paris, Bibl. Nat., published by Ledrain in *Mon. égypt. de la Bibl. Nat.* pll. 21–26; cf. Chabas, *Rev. arch.* XIV. i. 65 ff., 193 ff.): 'He formed with his hand the earth, its water, its air, its plants, all its cattle, all its birds, all its winged fowl, all its reptiles, all its four-footed creatures.' Again, we read of the ram-headed god Chnum: 'He created all that is, he formed all that exists, he is the father of fathers, the mother of mothers,' 'he fashioned men, he made the gods, he was father from the beginning,' 'he is the creator of the heaven, the earth, the under world, the water, the mountains,' 'he formed a male and a female of all birds, fishes, wild beasts, cattle, and of all worms.' In another passage the god of Thebes, Amon-Rā, is celebrated as 'the father of the gods, the fashioner of men, the creator of cattle, the lord of all being, the creator of the fruit trees, the former of the grass, the giver of life to the cattle.'

Similar functions are attributed also to other members of the Pantheon, and it even happens not infrequently that in the same tomb or temple different deities are hailed as creator in almost identical terms, without any sense of contradiction. It is seldom, however, that one gets beyond general language; and above all it is impossible to establish a fixed order in the succession of creative acts. Sometimes it is gods that first come into being, at other times men, or again animals or plants, etc.

(*d*) The choice of methods of creation, again, is left to the different deities—nay, one and the same god adopts one method according to one author, and another according to another. (*a*) Relatively most frequent is the conception of creation, after the analogy of earthly conditions, as a series of births. A god and a goddess are placed at the beginning of the development; these unite and have children born to them, who in their turn are gods. But gradually their posterity degenerates, becoming demi-gods and at last men. To avoid the difficulty of having to postulate the pre-existence of two deities, a myth, which recurs from the Pyramid era down to that of the Ptolemies, makes only one god pre-exist, namely Tum, who by means of Onani formed the first divine pair, Shu and Tefnut (Pyramid Pepi I., l. 465 f. = Mer-en-Rā, l. 528 f.; Papyr. Brit. Mus. 10188, ed. Budge, 'On the Hieratic Papyrus of Nesi-Amsu' in *Archæologia*, lii., 1891; cf. Pleyte, *Rec. de trav. rel. à l'Égypt.* iii. p. 57 ff.; Budge, *PSBA* ix. p. 11 ff.; Brugsch, *Religion der alten Aegypter*, 470 f.; and, for the creation myth, Wiedemann, *Urquell*, ii. p. 57 ff., where a collection will be found also of further ancient statements bearing upon the same circle of conceptions). Then were born to Shu and Tefnut the god Seb and the goddess Nut, who were the parents of Osiris and the gods of his group, whose children multiplied upon this earth. This genealogy shows that the Onanistic creation was placed before the heavens and earth were formed, the representatives of these first making their appearance as grandchildren of the pre-existing god.

It was not only gods that originated from a primeval deity by the instrumentality of Onani; men also were formed in the same way. In the tomb of Seti I., founded *c.* 1350 B.C., there are portrayed (Leps. *Denkm.* iii. 136^{b}) the four races of men, which, according to the Egyptian view, peopled the earth, and which are characterized as the flocks of the sun-god Rā. They are the reddish-brown 'men,' *i.e.* the Egyptians: the dark-yellow Asiatic Semites; the black negroes; and the whitish-grey Libyans. According to the accompanying inscription, these beings were created by another form of the sun-god, namely the hawk-headed Horus; the negroes by Onani, the Egyptians by his tears, the Libyans by the shooting forth of his eye, *i.e.*, apparently, by his warming beams.

A great creative power is attributed also in other inscriptions to the tears of a deity. They play a part in the most diverse periods of Egyptian history. There are other texts besides the above which trace the origin of the Egyptians to them. But then the sun as well brought other things into being by *his* tears. 'When the sun weeps a second time,' we read in a papyrus of *c.* 800 B.C. (Papyr. Salt, No. 825 in London, tr. by Birch in *RP* vi. p. 115), 'and lets water fall from his eyes, this changes itself into working bees, which pursue their task in flowers of every kind, and honey and wax are produced instead of water.' Further products of the tears of the sun-god Horus are cloth-stuffs, wine, incense, oil, the most varied objects used for offerings, which, accordingly, are designated 'the eye of Horus.' The tear of the goddess Isis, which falls into the Nile, causes the inundation of the river, and thus brings to the land abundance, wealth, and the means of nourishment.

Not only the tears but other fluids from the body of a deity have creative power attributed to them. From the blood that issued from the *phallus* of the sun-god when he cut himself, sprang, according to the Book of the Dead (chs. 17. 23), two gods, Ḥu (Taste) and Sa (Perception), who henceforth remained in his train. After the slaughter of the bull, in which Batau, who in the fable of the Two Brothers (composed *c.* 1300 B.C.) is conceived of as almost a divine being, had incarnated himself (Papyr. d'Orbiney, pl. 16, l. 8 ff.), two drops of blood fell upon the earth, and from these sprang two great trees, which now served Batau as an embodiment.—Side by side with the blood is the saliva. When saliva flows from the mouth of the senile sun-god and falls upon clayey soil, Isis forms from these materials a serpent, which at once assumes life, and whose bite threatens to be fatal to the sun-god (Wiedemann, *Rel. of Anc. Egypt*, 54 ff.).

The root idea is the same in all these instances. In every part of the body of the god, in everything that proceeds from him, there is a portion of his Ego, something Divine and therefore capable of development and life-producing.

(*β*) A further way to the formation of living beings was found in the artificial methods attributed to the gods. We have already had occasion to mention how Ptaḥ, the god of Memphis, was supposed to fashion the sun-egg on the potter's wheel. In like manner, according to the view that prevailed in Upper Egypt, the ram-headed god Chnum fashioned the king and his *ka* upon a similar wheel (relief at Luxor, in Maspero, *Hist. anc.* i. p. 157). If no wheel was available, the god was capable also of forming human beings in a simpler way. When the sun-god, in the fable of the Two Brothers (Papyr. d' Orbiney, pl. 9, ll. 6–8), found his favourite Batau alone, and desired to furnish him with a wife, Chnum 'built' a woman for him. Since the latter owed her origin to a god, she was more beautiful in her limbs than any woman in the whole land, and all gods were in her. The word 'built' has here for its determinative the picture of a man erecting a wall, so that the Egyptian writer thought of an actual construction of a woman—a manner of origin for which the reconstruction of the dismembered body of the god Osiris supplied him with a fitting analogy, for after this reconstruction the god at once acquired new life (cf. p. 195^{a}).

(*γ*) Procreation is another process which is not left out of account by the ancient Egyptians in connexion with the formation of man. It is employed above all by the sun-god when his earthly representative and son, the Pharaoh, has to be brought into being. In each successive case the god assumes the form of the present occupant of the throne, unites himself with the queen, and thus generates the future ruler (see the detailed representations in Naville, *Deir el bahari*, ii. pll. 47–53). This belief in the Divine origin of the monarch was held fast down to the Greek period. When Alexander the Great gave himself out as the son of Jupiter Amon, he was thoroughly accommodating himself to the notions of his Egyptian subjects. The ram's horn, moreover, which, in conformity with this origin, shows itself in the pictures of Alexander and his successors, has its prototype in the ancient Pharaohs, who (so, above all, Seti I. at Abydos) likewise, as sons of Amon, bear this horn.

For the most part, the king is satisfied with one god as his father; but at times a step further is taken, and the Pharaoh claims a plurality of heavenly fathers. Thus Ramses II. makes the gods of Egypt declare that they had generated him as their son and heir, while the goddesses tell how they nursed and brought him up, so that in a sense at least they performed maternal functions for the monarch.

(3) In all the forms of creation hitherto discussed, some *act* of a deity is required in order to call something new into being; it may be an act of violence, or a procreative act, or a shedding of tears, etc. But, side by side with these, there was a considerable series of myths which did not regard any active exertion on the part of the creator as necessary, but attributed the result simply to *speech*, the uttering of words.

The Egyptian assumed—and this is a very important notion from the point of view of the history of religion—that an inward and indissoluble connexion subsists between an object and its name (cf. Wiedemann in *L'Égypte*, i. 573 ff., and in the *Muséon*, xv. 49 ff.). Every thing has a name; without name is no thing, and without thing no name is conceivable. Thus the name becomes an imperishable component of the Ego, on a footing of equality with soul, form, heart, etc., and its continued existence is indispensable if the whole man is to enter upon immortality. Any one who utters the name of a god correctly is sure of his favour. When the goddess Isis succeeded by her wiles in inducing the sun-god Rā to whisper to her his real name, she thereby obtained the power of this god and became the supreme goddess. Any one who in the under world was able to call a demon by name was safe from any further harm at his hands; a gate must open its leaves to any one who named it correctly.

As acquaintance with the name of a god gave power over the god, so did acquaintance with a man's name give power over him. Hence it was very dangerous to one to have his name known to an enemy, who could make use of it in connexion with magic, and only required to introduce it into a formula to bring disease and death upon its bearer. The anxiety to escape such a result was sometimes so keen that the Egyptian bore two names—one civilian, by which he was called in his ordinary life, and one sacred, which was introduced only into religious texts, in the hope that its holy environment would avail to save its bearer from destruction. We meet with analogous notions among various peoples, it being sometimes the case that even the man himself does not know his real name, for fear of his inadvertently betraying it. The ancient Egyptians did not go so far as this, but the true name was uttered only in the narrowest possible circles. In the above-mentioned myth of the sun-god Rā, the god himself is made to say, 'My name was uttered by my father and my mother, and then was it concealed in me by my parent that no spell might be formed to bewitch me.' For these reasons it is often said of the great gods that their name is hidden, and from the second millennium B.C. downwards the Divine name *Amon* was explained to mean 'the hidden one,' as if the word had been derived from the root *ȧmen*='to be hidden,' which indeed is not true to fact.

The theory of the connexion between name and thing gave rise to quite a number of creation myths, which all go back to the same fundamental idea, however they may differ in details. The moment the deity in the exhilaration of his creative activity utters a word, the object designated by that word springs into being, even if it should happen that the word in the particular instance has quite a different meaning. The word had sounded so or so, and thereupon the notion inherent in it made its appearance, the word had assumed the form corresponding to it, and co-existed now with its notion to all eternity. Some examples taken from the presently to be described legend of the destruction of the human race, will best show how the Egyptians record the process of creation in such instances as we have in view. There the god says, 'I give thee authority to send forth thy messenger (*hab*), then originated the ibis (*habi*),' or 'I let thee turn (*ānān*) to the peoples of the north, then originated the *cynocephalus* (*ānān*).' Sometimes the word uttered is not even the exact name of the object, in which case a resemblance of sound sufficed to bring the latter into being. Thus in one text it is said, 'I let thee comprehend (*ȧnḥ*) both heavens, then originated the moon (*ȧāḥ*).'

Especially in the later periods of Egyptian history, from the 17th cent. downwards, such theories of creation, which in the earlier literature occur only sporadically, find favour, until in the Ptolemaic era a perfect passion for them sets in. Long, fantastic, occasionally unconnected, ætiological myths bring the god into the most diverse situations, in order to cause him to utter the word that shall bring into being one or another portion of the *materia sacra* of a particular sanctuary. And in such myths as little concern is displayed for logical connexion as for grammatically correct derivations (cf. *e.g.* the legend of the winged solar disc at Edfu, tr. by Brugsch in *Abhandlungen der Göttinger Akad.* xiv.).

The god who, above all, created by means of words, was Thoth; who appears sometimes, as at Hermopolis, the principal seat of his worship in Upper Egypt, as exercising this function on his own initiative, at other times as acting as the instrument of the creator proper, for whom he speaks. This was a rôle to which he was specially called, as lord of the words of the gods, composer of the most powerful magical formulæ, god of wisdom. Since he knows what is correct and gives it correct expression, he comes to be also the god of wisdom, who, along with his two embodiments, the ibis and the *cynocephalus*, is revered above all the gods by scholars and devout students of magic.

In all the ancient Egyptian literature known to us, actual words require to be uttered by the god in the act of creation. The notion that *inarticulate sounds*, his laugh and the like, could produce the same results, meets us first in the later Greek papyrus-literature of the Hellenistic and post-Christian period, and then in the Gnostic writings (cf. Maspero, *Études de mythol.* ii. p. 376). How far this belief is older than Hellenism cannot be determined. At all events, there is a connexion between it and the strange statement of the Church Fathers that the inhabitants of Pelusium paid Divine honours to flatulence and to the onions that caused it (Jerome, xiii. *in* Is 46; cf. Clem. Alex. x. 76; Minucius Felix, *Oct.* 28; Theoph. Ant. *Oct.* i. 15; Orig. *c. Cels.* v. 36).

The Egyptians had at their disposal a wealth of materials bearing upon the above doctrines, when it was desired to record the causes and the course of creation, but—to emphasize this point again and once for all—they never succeeded in harmonizing the particular conceptions and constructing out of them a finished system of cosmogony.

(B) *Destruction of the world.* — (1) While the ancient Egyptians have much to tell of the creation of the world, they know far less about its destruction, or even about a partial destruction of the world or of man. Presumably, this world appeared to the ancient Egyptian in a light so fair that in general he was unable to conceive of a time when it should be no more, and when no Egyptian should dwell any more on the banks of the Nile. It is true that recent investigators, founding upon some statements of a Saitic priest reported by Plato (*Timæus*, 22), have frequently attributed to the Egyptians a belief in a great world-conflagration. But the truth is that in the passage in question what is said is that, if a conflagration of the world should set in in consequence of the stars leaving their courses, the Nile would protect Egypt by its inundation. Egyptian papyrus-passages which have been cited for the same purpose (Ebers, *Papyrus Ebers*, p. 15), contain equally little to bear out the contention built upon them. They tell of a fire which threatened to be fatal to Horus, the son of the goddess Isis, and which Isis extinguished. But there is no thought here of a conflagration of the world, but of a local fire, presumably in a hut in the Delta where Horus happened to be at the time. The means, again, employed by Isis are little suited to the extinguishing of a world-conflagration (see Schaefer, *Aegyp. Ztschr.* xxxvi. p. 129 ff.).

(2) The only allusion as yet discovered to a deluge that threatened to destroy the whole earth, or at least parts of it, is contained in a papyrus of *c.* 1200 B.C. (Leps. *Denkm.* vi. 118, ll. 34–39 [the tr. by Pierret in *Études égyp.* 1 ff., is not free from errors]), which contains a hymn of praise to the pantheistically conceived Deity. Here we read: 'Thine (*sc.* the god's) overflowing water [lit. 'Thy spreading-itself-out'] rises to the heavens, the roaring water of thy mouth is in the clouds, thy jackals are upon the mountains [*i.e.* the jackals which, according to an Egyptian doctrine, drew the bark of the sun-god, have been compelled to retire before the flood to the mountain-tops]. The water of the god Horus covers the tall trees of all lands, the overflowing water covers the circuit of all quarters of the heavens and of the sea. A scene of inundation would all lands (still) be, were they not under thine influence. The waters (now) move themselves in the way which thou assignest them, they pass not over the bounds which thou settest them, (the path) which thou openest for them.' The Deity, that is to say, saved the world from destruction by the deluge, and now by his providence prevents a recurrence of that event.

(3) Another text treats of the destruction of a portion of the human race by the Deity, against whom they had rebelled, and thus belongs to the category of so-called Deluge legends in the wider sense of the term. We have this legend in two copies in Theban kings' tombs belonging to the period B.C. 1400–1200 (Lefébure, *Tombeau de Seti I.*, part 4, pll. 15–18, *Tombeau de Ramses III.*, pll. 2–5: cf. Bergmann, *Hierogl. Inschriften*, pll. 75–82; Naville in *TSBA* iv. p. 1 ff., viii. p. 412 ff.; Brugsch, *Religion*, etc., 436 ff., and *Die neue Weltordnung*, Berlin, 1881; Maspero, *Les Origines*, 164 ff. [*Dawn of Civilization*, 164 ff.]; Wiedemann, *Religion*, etc. [Eng. ed.], 58 ff.). There is a further allusion to this myth in Papyrus Sallier IV., of the Ramesside period (cf. Chabas, *Le calendrier des jours fastes et néfastes*, Chalons, 1870), which contains a list of the days of the year, with an appended note as to whether they are to be considered lucky or unlucky, and a record of the mythological occurrence which gave them this character. This text remarks on the 13th Mechir: 'Unlucky, unlucky, unlucky! Go not out in any wise on this day. It is the day on which the eye of Sechet grew terrible and filled the fields with desolation. On this day go not out at sundown.' The same occurrence is in view also in the plates of glazed clay which exhibit the lion-headed goddess Sechet, with a huge eye introduced behind her. These were intended, in all probability, to protect their owners from a fate similar to what then befell guilty men. Their pretty frequent occurrence down to a late period proves that the legend in question not only found its way occasionally into Egypt, but had wide and long-continued vogue.

The myth itself relates how the sun-god Rā ruled over gods and men. But men observed that he had grown old, his bones had turned into silver, his joints into gold, and his hair into lapis-lazuli. When Rā noticed how men were thus inclined towards rebellion, he secretly summoned the rest of the gods to Heliopolis to take counsel as to counter measures. The gods advised him to send forth his eye, the goddess Sechet (the sun in its consuming strength), against men to destroy them, although the rebels, filled with fear, had already begun to seek refuge in flight. Rā followed their counsel, and Sechet slaughtered mankind, wading for several nights in the blood of her victims, from Heracleopolis Magna in Middle Egypt to Heliopolis. But Rā quickly repented of having instigated this massacre. Not venturing directly to forbid the goddess to complete the task assigned her, he had recourse to stratagem. He caused beer to be brewed and poured into the blood of the slain. When the goddess saw this next morning, and found the fields flooded with it, she rejoiced, drank the mixture till she was intoxicated and could not recognize men. Thus mankind was rescued; but Rā was dissatisfied with himself, because he had not left their destruction unchecked. He saw in this a token of his weakness, and determined to abdicate his sovereignty voluntarily before a new weakness should overtake him. At first he set out, on the back of the cow of heaven, for the Mediterranean coasts. At this spectacle men were seized with contrition. They besought Rā to remain with them and destroy his enemies. But the god went on his way, men followed him, and, when it was morning, they came forth with their bows and joined battle with the enemies of the god Rā. Then spake Rā: 'Your transgression is forgiven. The slaughter (which ye have wrought on my behalf) compensates the slaughter (which my enemies intended against me).' In spite, however, of his forgiveness of men, Rā did not continue to dwell with them. He betook himself to higher regions, created the Fields of Peace and the Fields of Aalu, and settled many men there. Then he handed over his sovereignty of the earth to his son Shu (who was likewise a sun-god), called into being a number of sacred animals such as the ibis and the *cynocephalus*, and charged the earth-god Seb to give heed to the serpents, which must be charmed by means of magical formulæ.—In these details, which are not explained by the legend itself, some part is played presumably by the recollection of other myths, in which the serpents appeared as opponents of the sun-god, and with which the author assumed an acquaintance on the part of his readers.
